While riding along a deep ravine, a looaened atone attracted my attention on the mountain side to my left hand. It rolled a abort distance and atopped. I could discern no cause for its movement, and bad passed on a short distance where tbe ravene became more open. Looking away to the crest of a rocky ridge to my left, I canght sigbt of what I at first supposed to be a deer on tbe brow of tbe hill, but on bringing my glass to bear on tbe object I discovered it to he a Monntain sbeep. The ground was open and I dismounted, and loosening the lariat from my saddle, let tbe pony graze, while I took my rifle and withdrew into the ravine and struck off in circle to try, if possible, to get a shot at this rare and splendid game. The walk of a mile and a half or more seemed fully ten to me, so hard was the walking, but preaently I came in sight of tbe particular point sought for, where I had first sighted the sheep. As soon aa I reached a position where I could command a view of tbe ridge, I resorted to my glass and searched far and near for anything of life, bnt all was as silent as the grave, save now and then a light breeze would set the abrubs and brnshes of dry grass about me in motion. While lying thus secured from observation by a gnarled and twiated cedar, I chanced to glance down the hillside and waa startled to see a fine old buck leisurely making hia way np tbe gentle incline of a knoll about two hundred yards distant. I quickly dropped my glass and cautiously adjusted my gnn, but was lotb to risk ao distant a sbot, aa the deer's head was down and almost directly toward me.

I waited but a moment and was rewarded by seeing the buck continue to work toward me. A bunch of cedars hid him for a moment and then he appeared again and turning his broad side toward me, paused at bnt a little over half the distance, at which I had first sighted him. Drawing what I considered a carefnl head, I opened fire and was rewarded by seeing him sink in his tracks, without a strnggle. Going down to where he lay, I fonnd that I had all but overshot bim, the ball bad been most effective, however, in clearly breaking his back. I have always fonnd tbat shooting down hill with a rifle is wbat might be called "up hill" work. I soon reached my pony hy taking a more direct line and returning for my deer, pnt ont for camp, wbere I found my companions and a good snpper awaiting me. Two deer and numerons gronse had been bagged by my companions. A black bear was subsequently bronght in dnring the later days of our bunt, as were also tbree elk, one of whicb I had the pleasure of slaying. We were in camp five days, and I can truly say tbat tbe bunt marks one of tbe most pleasurable events in my field of experience.

One of the great attractions of tbis region is the unequaled scenery. It is unsurpassed. J. M. D.

Mr. E. T. Allen Returns.

A few days ago Mr. E. T. Allen at 416 Market S reet, City, returned from a two months trip among tbe gnn lishing tackle and notion manufacturers of tbe Eastern States.

On reaching Chicago, going eastward, he was prostrated by tbe heat and was seriously ill for some days.

When convalescent tbe trip was resumed and all prominent manufactnring centers visited.

At Syracuse, N. Y., he called upon tbe Hunter Arms Co., makers of the L. C. Smith gun. Mr. Allen was delighted witb the completeness of tbe gun plant and more so with the members of the firm whom he pronounces "very nice men."

Dan M. LeFever waa also called upon. He is described as a short, stout, shrewd looking man, very entbusiastic about his work and a keen sportsman and pleasant companion also.

Travelling along eastward Mr. Allen visited the Parker Bro. at Meriden, Conn., and became acquainted with tbat marvel of inventive genius, Mr. King, master of the Parker factory.

In Boston, Mr. Allen was entertained by members of the firm of Lovell and Sons. The families of Mr. Allen and tbe Lovells joined in a real old down East clam bake, of which tbe description alone is enough to start a a hegira to the Mayflower country.

Mr. Allen regrets that the extent of country to be covered prevented his calling npon some of his most valned correspondents, but anticipates another trip in which he will atone for seeming remisaness in that respect.

Local sportamen are glad to welcome home the genial, accommodating and very popular head of tbe Allen House.

They will profit in many waya by the trip, since all late novelties will appear on Mr. Allen's counters.

A Mammoth Tree and Large Bear.

Frank Lomis, an old bunter and mountaineer, with some friends, were out hunting in Fresno County recently, when tbey made a discovery wbicb is likely to make tbem famous. They were in tbe Sierra's east of Centerville, and bad wounded a bear, wbicb ran into a thickly wooded belt, in one of tbe wildest and most inaccessible regions of that district.

In pursuing the bear they were compelled to cut tbeir way throngh the tbicket of brnah which fairly matted tbe grounds, tbe branchea and tangled vinea being woven ao closely together tbat they preaented a compact obstrnction. After working tbeir way for some distance, they came to wbat is claimed to be tbe largeat tree yet discovered in the world. It is a mammoth sequoia, measuring at a distance of four feet from tbe grounds, 129 feet and 5 inches in circumference. The story is vouched for by several partiea wbo saw tbe tree. Tbey christened it "The Orejano." Three brown bears were captured by the party, one weighing 560 pounds.

Property In Game and Fish.

To whom doea tbe game belong; fish, birds and wild animals of every natnre? To the public at large. Every one has an interest in them. Any one may pursue and take them it he can, subject only to the laws whicb bave been enacted for tbe purpose of fostering and protecting tbis species of property in which the whole people have a like and eqnal interest. These laws are for tbe public good. Their enforcement and effective operation can but result in good to the public as it preserves their property.

Fish, especially as a food, forms no inconsiderable item in the line of tbe necessaries of life. Infringement of law effecting private rights, touches one person only, and effects the public also, as it interferes with the rights of one factor of tbe whole. Disregard of the game and fish laws effects the public as a wbole and is none tbe less a crime. Don't do it.

The Best Medicine.

A day in the field with gun and dog is a panacea for the ills of life which has few if any equals. It is a sure cure for the blues and for diaipating tbat aevere and gloomy nature which results from tbe close application to the counter or desk. There would be more sunshine in the home, more cheerfulness in tbe office, and more pleasnre infused into every day life, if there were more men who took a day's occasional field sport.

It is stimulative of all that is best in our natures, makes men more companionable, cheerful and social, and givea to life a new zeat. No one ever knew a sour, croas, dispeptic old bear taking pleasure in thia line, for if be did his natnre would soon change. There is sometbing radically wrong with the man whose nature is not made tetter by the association of tbe gun and dog.

The field, tbe sunshine and tbe woods; tbe birds, the pleasure of the hunt with the invigora'ing and stimulating effect of the exerciae, is nature's medicine to tbe worn and weary constitntion.

The effect of tbe hunt is always good. Just try it once, my skeptical friend, and see if thia will not be proven true.

The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, **7s, 6d**; postage, **6d** extra. Published by CHARLES LANCASTER, 151 New Bond Street London, W.

At the recent meeting of the California State Sportsmen's Association at Stockton, the regular annual meeting day waa changed from the second Thursday in October to the first Wednesday in September.

Gun for General Use.

San Francisco.

Editor Breeder and Sportsman: What class and make of gun would you recommend for shooting generally on the coast and in the mountains? I do not care to pay over $50 for a gun, and being unacquainted with the shooting in this country appeal to your judgment in the matter. H. J.

[To such general questions only general answers can be returned. A glance at the advertising columns of this paper will show you several responsible firms that handle guns and equipments. Go to any one of them and make your wants known and they will supply you with what is best suited to your purse and purpose. We should say in a general way that any of the standard ten gauge guns is about what you need. You can purchase a good shooting gun for the price mentioned. We have fired guns of several of the different brands and find but little difference in them.

Select a gun that is not choked too close, and in hunting deer or other large game, have your charges to chamber neatly in the muzzle of the barrel.

The most pleasurable hunting here is for birds, quail, grouse, ducks, etc.

By relying on the judgment of a responsible gun dealer, you can no doubt secure just what you want.—Ed]

A Modern Ananias.

One of the hands on board the steamer Penobscot, of the Bangor line, has gained a wide reputation as a story teller. It was recently that this famous raconteur favored a select audience with this reminiscence of his early days:

"It was a beautiful afternoon in July," said he, "the sun was pouring down through the hay fields, and as we toiled with scythe and rake we felt tired and weary."

"Coming suddenly upon a patch of strawberries, we sat down and feasted upon the luscious fruit, the single berries being as large round as your fist. While we sat enjoying this delicious repast we suddenly saw a bear come out of the woods on the other side of the meadow and make for us. You can bet we ran for our lives. I being the fattest fellow could not keep up with the rest, and more than once the nose of the bear grazed my legs as I flew along. Reaching the river, about two miles from the field, we rushed out upon the ice. It was so slippery that the bear could not keep up with us, and we made our escape."

One of the fellow's hearers innocently remarked that he would have believed the story "if the critter hadn't lied so about the size of the strawberries."—Ex.

The San Diegan mentions the fact that Mr. Charles S. Chase has shot a deer. It also says that it came very near being a dear shot for Mr. Chase.

Mr. Chase, weighs considerably more than ordinary men—in fact is a champion weight. Last week he was following a blind trail through the mountains, mounted on a broncho. In the course of his wanderings and much doubtless, to the surprise of each, a deer met him travelling in the opposite direction. Mr. Chase's double barreled gun was heavily charged with buck shot, so he let drive at the buck, when simultaneously the gun kicked and the bronobo bucked and Mr. Chase found himself thrown violently on the unfeeling stones of the mountain side. He affirms that hence-forward he will eschew bucks, buckshot and bucking bronchos. Separate, they are comparatively harmless, but taken together, they are a delusion and a snare.

Ducks are reported as becoming quite numerous in their usual haunts, in the bayous, marshes and streams along the coast.

He Did Not Break the Law.

"What should be done with a man who kills a doe in California under the present law?" asked a stranger of the writer a few days ago as he stepped into the office of this paper.

"The law provides," we replied, "that he shall be fined for the offense, as the killing of a doe, at any time of the year, is unlawful."

"That's the law, is it," said the stranger, eying us the while in a critical manner.

We again informed him such was our understanding of the statute.

"No provision for mistakes, no way in which an honest man could get excused when he couldn't possibly tell, beforehand, whether he was about to break the law or not," he continued.

We told him that the law seemed to have no loopholes, where even a "sharper" could crawl out, let alone an honest man.

"Well," he replied, "I've always tried to be an honest law-abiding citizen, but I'm afraid I came very near breaking the law the other day, in this regard."

"How was it," we asked.

"Well, I'll tell you. I took my old rifle the other day and went off into the mountains after deer. I hunted all day without finding any sign whatever, but just as I was returning home I caught sight of a fine deer, standing but a short distance from me. Its position was such that I could not see its head, so how was I to tell whether it was a buck or doe? That's the question, how was I to tell?"

"Was I to chase it up in order to see whether it was a buck or not, and let it run off? "Not much. I just up and blazed away and only after I shot did I become aware that it was a doe."

Well, that's too bad, we ventured, of course you couldn' tell, but your intention is to give yourself up, and pay the fine, as a good law abiding citizen should?

"No, I guess not," he replied, "the case isn't so bad as that, for you see I missed the doe clear and clean!"

"You see," he added, that poor shooting has some advantages. And we could but acknowledge that it had.

It requires considerable experience for one to come to the conclusion, as almost all are bound to sooner or later, that a 12-gauge gun is far preferable as an all-round gun for ordinary shooting at birds, squirrel, rabbits and doves than its heavier and too frequent companion, the 10-gauge. Almost all birds are shot within the forty-yard limit, and if the hunter will take careful note of his shots, he will be surprised to find how many birds really fall within half that distance. Why then carry a heavy gun charged for large game, and that which is usually reckoned to be reached at fifty or more yards.

During the early season and through the month of October, No. 8 shot are, as a rule, heavy enough for all classes of birds. Ducks in the fall are usually easily approached, and in most places the growth of the season presents perfect shelter about the swamps, and fine shot will be found to be very effective when shooting them with a 12-gauge gun. Later in the season, or under less favorable circumstances for approaching game, No. 7 shot may be used. It is well to have graded shells, carrying shot numbered 8, 7 and 4 from which to select as the distance or class of game may require. We have always found that the greater number of shot which may be thrown into a bird by using small shot more than compensates for size. Small shot and a 12-gauge is the best for all round shooting.

Austria has added much to her game interests by successfully acclimating and breeding the wild turkey of America.

Mr. H. H. Briggs a few days since paid Col. Harry I. Thornton, a visit at his ranch, where they enjoyed some fine quail shooting.

Two hundred and twenty three quail fell before the guns of Messrs. Wilson, Kittle, Bosqui and Orr on last Sunday. They were shooting on the Country Club preserve.

Mountain lions are reported as being unusually plentiful this fall and withal quite bold and fearless in their excursions to the ranches located in the mountain valleys.

The Highland Gun Club of Des Moines Iowa, which, by the way, is one of the leading clubs of the country, will hold an open tournament on their new grounds on October 28, 29 and 30. Everybody admitted. No limit.

England and France have successfully accomplished the importation and breeding of the kangaroo. It is now proposed by several enthusiastic sportsmen to try the experiment in the mountains of southwestern districts of this country. There seems to be no good reason why the experiment should not be successful.

Mr. Howard H. Carr of this city has a highly interesting article in the last issue of *Forest and Stream* on the subject of "Rifle Twist and Caliber," in which he gives the results of various experiments as to the force of the projectile, atmospheric resistance, effect of twist, and other conditions in rifle shooting.

The custom of some of the would-be sportsmen in the Adirondacks, of putting out their hounds for deer, and then sitting by the lakes of that region and waiting until the deer takes to the water when closely pressed by the hounds, and then killing them when no chance of escape is offered, is deserving richly of the severe condemnation which our Eastern brothers of the quill are heaping upon all those who are guilty of such wanton conduct.

In Vermont, the deer have been protected for five years by law. Deer were imported by the Rutland Club and by their exertion and motion the law was enacted protecting the game. The limit expires on November 1. It is now proposen to the legislature of that State, which is in session, to extend the law for another period of five years. It is stated that the re-enactment of this law is probable. Such enthusiasm on the part of sportsmen to protect the game is commendable.

The remarkably fine weather of the past few weeks, has been largely improved by local sportsmen in the field. Quail shooting has been for the most part the line in which they have been engaged, and highly satisfactory scores have been recorded. The birds never were fatter and more plump than they now are, and as a result of their plentifulness and the fine opportunities presented for shooting, almost every one so desiring, have been supplied with this most toothsome of all wild game dishes.

THE TERRE HAUTE PURSE.

$11,000 GUARANTEED $11,000

FOR

Trotting Foals of 1890.

$5,000 to First; $2,500 to Second; $1,500 to Third; $1,000 to Fourth; and $1,000 to the breeder of the Winner, in money or plate, at the option of said breeder.

Race to be mile heats, best three in five, in harness, and to be trotted over the superb mile track at TERRE HAUTE, IND., at a meeting to be held during the latter part of August, 1894, under the rules of the Association of which that track is then a member.

Entrance

Payable as follows: $10 with the nomination on November 1, 1890; $10 April 1, 1891; $10 October 1, 1891; $10 April 1, 1892; $10 October 1, 1892; $10 April 1, 1893; $15 October 1, 1893; $25 April 1, 1894; and $100 for Starters, payable August 1, 1894.

Special Provision.

In case the total amount received as payments and forfeits on nominations shall amount to more than the amount guaranteed, viz.: $11 000, then and in that event, fifty per cent. of such excess shall be added to the first money. It is estimated that this will make the first money amount to $9,000 or more, and should the winning horse be started in the race by the person who is also the breeder, the first money will, in all probability, exceed TEN THOUSAND DOLLARS.

Conditions.

Nominators will be required to state name, color and sex of foal; also to give the names of the sire, the dam, and the sire of the dam, when known; also the name and postoffice address of the actual breeder of each foal nominated.

No nomination will be received unless the first payment of $10 accompanies the same.

Nominations are only liable for the first payment, but failure to make any of the subsequent payments, when due, shall be considered a withdrawal, with forfeiture of former payments.

Nominations shall follow ownership of the foal, and the bona fide sale of any nominated foal prior to August 1, 1894, will entitle it to start against any other foal entered by the same nominator. The foregoing clause relative to transfer of nomination, shall not be construed to apply to that part of the purse to be awarded to the breeder of the winner, as it is a part of the purpose of this purse that $1,000 (in money or plate) shall go to the actual breeder, and that said breeder's interest to this extent in the purse, shall be non-transferable.

In the event of accident or injury to any foal nominated herein, nominators shall have the right at any time on or before April 1, 1891, to substitute another foal for the one originally nominated, subject, however, to this restriction, viz: the substituted foal must have been owned by said nominator, at the time he made the original nomination

The race shall be trotted over the TERRE HAUTE mile track, universally acknowledged to be one of the finest and fastest in the United States, and quite generally known as the track over which AXTELL trotted his famous mile as a three-year-old in 2:12.

The above PURSE is given and all of its provisions guaranteed by the VIGO AGRICULTURAL SOCIETY of Terre Haute, Ind.

Nominations to be made on or before NOVEMBER 1st, 1890, and addressed to

CHAS. C. OAKEY, Secretary, Terre Haute, Ind.

FOR SALE.

IDALIUM,

Brother to Sir Modred.

By Traducer (imp.) out of Idalia (imp.) by Cambuscan.

See English Stud Book.

Idalium is a black horse, foaled 1878. Shows all the quality of his family, combined with great substance, and is a sure foal getter. He is only offered for sale because his owner, having used him several seasons, requires a change of blood. Apply.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Address,

THE BREEDER & SPORTSMAN,

For Sale

A FIRST-CLASS

Napa County Farm

—OR—

STOCK RANCH,

800 Acres Improved,

SITUATED TWO AND A HALF MILES FROM NAPA CITY, with good roads leading thereto, a good hard finished house of nine rooms, with all modern improvements, streams running all summer, a great amount of live oak and black oak timber. It lies in a fruit belt, surrounded by fine vineyards and orchards growing upon the same quality of soil, and originally a part of this tract. About one-half hill, and one-half rolling land, but none of it is steep and all easily cultivated, splendidly situated for the breeding of fine horses. Price, $65 per acre. Further particulars given at this office.

BREEDER AND SPORTSMAN,
313 Bush St.

For Sale.

Tilton Almont.

Joint Auction Sale

—OF—

STANDARD AND WELL-BRED

Trotting & Roadster Horses

—PROPERTY OF—

D. J. MURPHY OF SAN JOSE and HON. HARRY I. THORNTON OF SAN FRANCISCO.

—TO TAKE PLACE ON—

Tuesday, October 28, 1890, at 11 A. M, at San Francisco.

At RAILROAD STABLES, corner of Turk and Stelner Streets.

The sale will comprise about 50 head of Stallions, Mares, Colts and Fillies. The get of Electioneer, Soudan, Alexander, Whipple's Hambletonian, Geo M. Patchen Jr., Director and most of the Noted Stallions in the State will be represented. Catalogues will be issued in a few days, giving full description and pedigrees. Apply to

KILLIP & CO., Auctioneers,
22 Montgomery Street, San Francisco, Cal.

IMPORTANT SALE OF

REGISTERED HOLSTEIN CATTLE

From the Celebrated

Cerro Alegre Herd

—OF—

GEORGE B. POLHEMUS, ESQ.,

Coyote, Santa Clara County,

On Tuesday, October 28, 1890, at Railroad Stables, San Francisco.

Sale to take place immediately after the sale of horses, of Messrs, Murphy and Thornton. **SEVENTEEN HEAD OF CHOICE BULLS** from three-year-old to yearlings will be offered. Catalogues ready October 4th,

KILLIP & CO., Auctioneers,
22 Montgomery Street, San Francisco.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp. Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

KILLIP & CO., Auctioneers,
22 Montgomery Street S.., F., Cal.

For Sale

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Jnanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,
Santa Clara P. O., Cal.

SOUTHER FARM

P. O. Box 208.

1½ miles northwest of San Leandro; 8 miles southeast of Oakland. Turn off county road between above places at "Stanley Road," ¼ mile north of San Leandro.

San Leandro, Cal.

Horses boarded at all times in any manner desired. Best of care but no responsibility for accidents. Colts broken and handled for the road or track. Terms reasonable.

1st dam Glenne by Messenger Duroc 106.	1st dam Hortense by Messenger Duroc 106.	1st dam Nellie Benton by General Benton 1755.	1st dam Emblem (sister to Voltaire 2:20¾) by Tattler 300.
2d dam Glenella by Woodward's Star, son of Seely's American Star.	2d dam Nelly McDonald (thoroughbred) by Colossus, son of imp. Sovereign.	2d dam Norma (dam of Norval, 2:17½) by Norman 25.	2d dam Young Portia (dam of Voltaire 2:20¾. Childe Harold two-mile record, 5 04 etc.) by Mambrino Chief 11.
3d dam Shangbai Mary (dam of Green Mountain Maid and grandam of Electioneer.	3d dam Maid of Monmouth (grandam of Praetor, 2:29¼) by Traveller.	3d dam by Todhunter's Sir Wallace.	3d dam Portia by Roebuck.
	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle	4th dam by Whip.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. In any ordinary weather the roads are very good, and they are fairly good after the unusually heavy rainfall of the past winter.

All stock sent from San Francisco may be brought over by Garcia's Express, No. 3 Market street, San Francisco. They also have an order box outside of Hawley Bros.' Hardware house on the corner of Market and Beale streets. The express leaves San Francisco on the Creek route boat, which starts at 1:30, but all orders should be in the order box at Market and Beale streets by 10 o'clock, or at the office, No. 3 Market street, by 11 o'clock at the latest. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

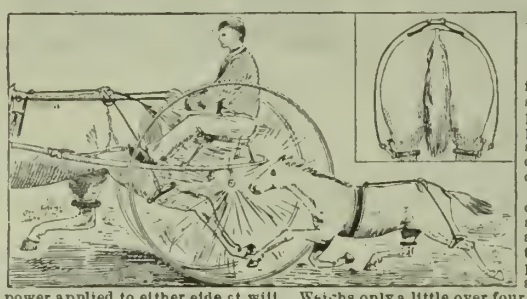
Phelps' "Common-Sense" Spreader



FOR GALLING TROTTERS AND PACERS.

Steel spring rods hinged or swiveled in saddle on hips pass down on either side, fastening to aud constantly pulling legs apart by means of appliance that does not chafe. The springs are held in position by the crupper and a stay rod from surcingle.

Improves speed in races in double or single harness. Valuable for horses and colts in pasture. Applied to colts ae shoulder-braces to children. Opens the motion, lengthens the stride and promotes speed; cures single-footing aud all forme of interfering. Amount of power applied to either side at will. Weighs only a little over four pounds.

Price $10, draft or money order, or C. O. D. by Express. Address

RALPH PHELPS, 628 Montgomery Street, Room 13, S. F.

AN UNQUALIFIED ENDORSEMENT.

Peruvian Bitters are made of the purest ingredients and compounded as carefully as any prescription.

Peruvian Bark, one of its principal ingredients, was introduced into Spain by the Countess, wife of Count CINCHON, Spanish Viceroy to Peru in 1630, who was cured of a fever by its use, since which time, no better remedy for Malaria and for Restoring the Natural Tone of the Stomach has been discovered.

On the Atlantic Coast they are used in the principal Hotels, Clubs and Restaurants, and sold by all Grocers and Druggists. We have sold them for the past three years WITHOUT ANY ADVERTISING and sales have constantly increased UPON MERIT ALONE, and we unqualifiedly recommend them to our friends and customers.

IMPORTED
ENGLISH BLOODHOUNDS.

The FIRST and ONLY LITTER of PURE ENGLISH BLOODHOUNDS whelped in California are now offered for sale. They are by Burgho's Warrior (A. K. C. 19753) out of Ripple Buxom E. K. C. 19,768), prize taker at Dover, England, New York and Albany. Warrior has never been shown, but is full brother to Burgho Jr., the well known show dog. Warrior is one of the handsomest hounds ever seen. His ears are twenty-seven inches across, and he is two inches taller than the average of bloodhounds. These noble hounds are kind and gentle, fond of children, marvelously intelligent, of stately bearing, and companionable in every sense. They are not fierce like the cross-bred hounds of Southern States, which are wrongly called bloodhounds, though they are excellent watch dogs. While possessing a rich, deep voice, they never give tongue without cause. A dozen bloodhounds make less noise than one pug. Their kind disposition, rare intelligence and wonderful scent fit them equally for house, farm or field. In the East the bloodhound is becoming more fashionable than the St. Bernard or the Mastiff, for while he is handsomer than either, his remarkable intelligence and scent make him useful as well. Read his character in the Century Magazine for June, 1889, and see his great beauty in the bronzes at Shreve's, and photographs at Vickers. For prices and pedigree address Manager, Santa Clara Kennels, Santa Clara, Cal. Photographs 25 cents.

FIVE DOLLARS A YEAR,

A Resume of Some Great Mares!

[Written for the BREEDER AND SPORTSMAN.]

In horse-breeding, is there a royal road to fame? It would appear not! What is that latent sometbing in some brood mares whicb makes them great speed producers, while mares much better bred are failures? Is it the blood or the brain? Who knows? While the foetus is drawing nonrishment from the mother, is it that mother's brain or her breeding that does the principal part toward making the colt a great horse? In sbort, does the superior intelligence, sagacity and strong will (the power to think, if you please) of the motber exert a greater influence upon the unborn colt, than the blood lines which exist within her? The longer one tbinks of this proposition, the longor he will be in answering it! What horseman has not seen a mare become the mother of a trotter of renown, perhaps two, while a msre of better blood, more individnality and higher speed, fails ntterly to produce a horse of equal speed, from the same sire! To be sure these cases are the exception—not the rule—but why do they occur at all? Is it explainable by such jingle-jangle expressions as "a hsppy nick," "tbe best strain of blood in each," "the physical condition of the parents at the time of breeding," "just a sufficient amount of inbreeding," etc., or shall we look elsowhere, and if so, where?

The editor of a well known borse paper once said, "arithmetical rules will not tell you just what a horse is going to be or to do, hut they tell you whst he ought to be or do!" Certainly nothing truer was ever written. When, however, two exsmples aro precisely alike, viewed from every standpoint, one a success, the other not even partially so, we look about in a maze of bewilderment and are prone to distrust tbat fundamental law that "like produces like!" I am acquainted witb numbers of stallions, mares and geldings, that would have achieved fame if they had been granted the opportunity. Thus sometimes an invidious comparison is made between two horses and their get; between two prominent families and their descendants; between two brood mares and their produce, when, in fact, the conditions of the individual cases are very dissimilar! One family may have bad splendid opportunities for further development, while the other had very little. Tbe produce of one mare may bave received the benefits of a fine and careful course of training, while another msre's colts may have been handled injudiciously. All these things are taken into consideration by intelligent horsemen, when passing judgment npon an animal. But for the purpose of obtaining any logical conclusion; it is necesssry to deal only with what appears upon record. While prohabilities have some weight, they lack the intrinsic value which absolute facts possess. Wbile, perbaps, many of us have in mind some certain msre, that, had it been her fortnne in life to have been bred to a reslly good horse, would have made a name for herself and money for her owner—at least we are morally certain of it—still, we are not warranted in entering into the realms of the unknown, in quest of something to substantiate a certain belief or vindicate a new doctrine. A theory that is problematical is never quite so good as one that is axiomatic.

It is only just to say that some mares are born great, some achieve greatness, wbile some have greatness thrnst upon them! This is a proposition which I think the records prove beyond controversy. As I progress, practical examples will be given of all these conditions.

Let us, then, enter the ranks of the great broodmares, taking for a basis of greatness those that have thrown four or more trotters. I assume that it is undeniable that there are plenty of mares that have at this present time two or three representatives in the list, that are destined, in years to come, to equal and possibly surpass many who now rank as their superiors. But this article will deal only with such facts and conditions as we find existent. There are some mares that are the dams of two trotters, whose blood would be considered of more value than that of some others that have produced twice the number, sometimes quslity is of more worth than qnantity! The highest measure of success attends the mare that produces quality and quantity both.

Alma Mater is the dsm of Alcantara, 2:23, Alcyone, 2:27, Almater, 2:29¼, and Arbiter, 2:30. The first two are near the top of the ladder as young sires, the blood of both being regarded very highly. It was, indeed, a very unfortunate affair for his owner when Alcyone died. Alma Mater was almost three-quarters thoroughbred.

Beautiful Bells, 2:29½, is the dam of Bell Boy (3 years) 2:19¼, Hinda Rose (3 years) 2:19½, St. Bel (4 years) 2:24½, and Palo Alto Belle (3 years) 2:22¾. Wben there is added to this list Chimes (2 years) 2:30¾, and Bow Bells (2 years) 2:32½, it makes a string of colt trotters that has not only never been equalled, bnt not even approached in the produce of sny one mare! Beautiful Bells is an example of a mare being born great. She is the most striking illustration to be found of developed speed in a brood mare. The Moor, her sire, is a universal speed producer, while Minnehaba, her dam, is a great mother of trotters herself. Chimes can undoubtedly beat 2:30, as can Bow Bells, and in the langusge of the camp-meeting song, "Still there's more to follow!"

Belle S. is by Sisr of the West, dam Kittie Wallis, pedigree unknown. She is the dam of Brittle Silver, 2:25½, King of the West, 2:30, Seth Thomas, 2:25¼, and J. B. S., 2:28¼, the first three being by Hamdallah and the last one by Allie Gsines. The cross between Belle S. and Hamdallah seems to have been particularly happy, insomuch as that horse got the majority of his performers from this one mare. As a general proposition, this demonstrates the greatness of the mare rather than the horse.

Black Flora is tbe dam of Huntress, 2:28, Perihelion, 2:25, Sister, 2:19¼, and Nona Y., 2:25. This quartette was by Admiral—a son of Volunteer 55, his dam being by Cassins M. Clay Jr. 20—a horse now twenty-three yesrs old, and certainly a well bred horse, bnt he hss failed as a sire of trotters, with the exception of Black Flora. It must he conceded, then, that she wss s great mare naturally. She was sired by a horse csIled Blsck Prince, ber dam being of unknown breeding.

Dolly is by Mambrino Chief, out of a mare by Ben Franklin. She is the dam of Director 2:17, Onward 2:25¼, Thorndale 2:22½ and Czarina 2:27½, all sired by different horses. Sbe is one of tbat small and select band which seems endowed witb singular prepotency. Director, Onward and Thorndale were all sure enough rsce horses, and all are now the sire of trotters.

Emeline, by Henry B. Patchen, dam by Soladin, is a msre that achieved grestness. From three different stallions, she foaled six colts, all of which beat 2:30! Adele Gonld 2:19, Angusta Schnyler 2:26, Daisy Hartshorn 2:24½, Jersey Prince 2:27½, Kate Taylor 2:23¾ and Ray Gould 2:29½. This is surely a great showing. None of them have been, apparently, so good as Adele Gould, who was a right good race mare, as many men who bought the long end years ago at Buffalo, N. Y., can testify. Adele, Fanny Witberspoon and Annie W. were the starters in the 2:20 class. Adele sold in the field both the others being tbonght a little too rich for her blood Annie W. won the first heat in 2:20 flat, Witherspoon the second and third in 2.19¼, 2:19 and Adele won the fourth, fifth and sixth in 2:19, 2:20½, 2.23¾, and the talent had a fall. Emeline assuredly is a nniform prodncer of speed, yet, we all know mares which are more highly and fashionably bred, than Emeline, that are being stinted to stallions of high speed and nndoubted coursge, that will never equal her as a brood mare. This is one of the anomylies of creation.

Fanny Jackson, a daughter of Stonewall Jackson, dam Betty Condon by North American, is another mare that acbieved greatness. She is the dam of Annie Page 2:27¼, Aristos 2:27¼, M. Y. D. Colt 2:28¾ and Miss Fanny Jackson 2:30. The first three are by Dsniel Lambert, and the fourth by his son, Bay Lambert. Again, I assume that there are plenty of mares that shonld prove the superior of Fanny Jackson in stud, bnt will they?

Green Mountain Maid is another most wonderful mare. She was a maro of great individuality, striking charscteristics and strong will. She is the dam of Antonio 2:28¾, Dame Trot 2:22, Elaine 2:20, Elista 2:20¾, Mansfield 2:26, Prospero 2:20, Storm 2:26¾, Dawson 2:20½ and Miranda 2:41. The incomparable mare is also the dam of Electioneer. She was sired by Harry Clay and her dam, as everyhody knows, was Shanghai Mary, whose breeding wss nnknown.

Maid of Clay, by Henry Clay, dam by Dey's Messenger, the dam of Capt. Smith 2:29 Carrie C. 2:24, Clay 2:25 and Clay 2:25½. They are sired by three different stallions—Locomotive, St. Clair and Electioneer. This mare's colts fro Electioneer ought to satisfy a searcher after Clay blood.

Minnehaha is another of tbe really great brood maresl Alcazar 2:20½, Beautiful Bells 2:29½, Eva 2:23½, San Gabrie. 2:29¾, and Sweetheart (three years) 2:22½, are sons and daughters whose performances have gsrlanded her brow with fame. She wss brougbt to California years ago by Mr. L. J. Rose, and proved a veritable gold mine for that gentleman. Her daughter Sweetheart was one of the first of phe nominal bsby trotters to astound the world and attrsct the especial sttention of the borse world to the Golden West. In 1880, she made a two-year-old record of 2:26½, wbich was the best in the United States, until Fred Crocker, by Electioneer, made a two-year-old record of 2;25¼ on November 20 of the same yesr.

Miss Russel, by Pilot Jr. dam Sally Russel by Boston, thoronghbred, is the dam of Maud S. 2:08¾, the Queen regent; Nntwood 2.18¾, a great sire; Cora Belmont 2:24½ and Russia 2:28. Miss Russel is a combination of trotting, pacing and thoronghbred blood. The pacing cross crops ont from time to time in the get of Nutwood. Her colts by Electioneer, which are now yonngsters, should add glory of the old mare.

Ned is the dam of Alice Stoner 2:24½, Clemmie G. 2:15½, Forest Wilkes 2:24½, Mystery 2:25¼ and Post Boy 2:23. Clemmie G. and Post Boy were true blue campaigners some six or seven years ago, and it took a stem winder to defeat Clemmie when sbe was just right. There is rather a singulsr circumstance attached to three of Ned's trotters—Clemmie C., Mystery and Post Boy.

These three horses are sired by Magic, who, in spite of his name, has never sired bnt one otber trotter, aside from Ned's produce. Magic is a son of American Clay, dam Lualobs h Berkeley's Edwin Forrest. He was bred to a mare hy Berkeley's Edwin Forrest, and hecsme the sire of three trotters, while his success was not noticeable with any other mare. Was this the resnlt of Ned's extreme excellence, or was it just the proper amount of inbreeding? Alas! that this last roseate theory sbonld. after all these yesrs, be impossible! It hss always been supposed that Ned wss sired by Berkeley's Edwin Forrest out of a mare by Mambrino Chief. It seems, however, that Mr. John H. Wallace—for whom I have the profoundest respect—has been prodding of late into the dim recesses of the past, and has uncovered the alleged fact that Ned's pedigree is nnknown. Thus Ned, after all these years of hard service, is classed with the great "untraced." Such is the irony of Fate! Althongh it is not so hard to be without parentage, when in the sere and yellow leaf, as it wonld be in the first finsh of callow youth!

Sontag Mohawk, by Mohawk Chief, dam by Toronto, is the dam of Eros 2:29¾, Sallie Benton 2:17¾, Sport 2:22¾, Colma 2:25½, and Conducter (3 years) 2:25¼. These four performers are hy three different sires—Electioneer, Gen. Benton and Piedmont. Condnctor won one of the very best three year old races ever contested not long since. The race took place at Cleveland, O., on the 19th of September, and

was a seven heat affair, Conductor winning the fifth, sixth and seventh heats.

Waterwitch was sired by Pilot Jr., dam by Kincaid's St. Lawrence. She is the dam of Mambrino Gift 2:20, Scotland 2:22½, Viking 2:19¼, Waterloo 2:27, and Wavelet 2:24½. Waterwitch is one of the very few mares that have thrown a trotter from a thoroughbred stallion—Scotland 2:22½, being a son of imp Bonnie Scotland. Along with such mares as Green Mountain Maid, Lady Patriot, Dolly, Beautiful Bells, Minnehaha, she is destined to found a great family.

Among the mares that rank in the first flight as producers, and whose progeny are highly valued, may be mentioned Addie Lee 2:36½, dam of Adair 2:17¼, Adalia 2:27 and Grace Lee (3 years) 2:29¼; Alley by Hambletonian 10, dam of Albert France 2:20¼, Wilson 2:19¼ and the pacer Alley Russell 2:22¾; Bicara, dam of Monte Carlo 2:29¾ and Pancoast 2:21¾; Black Jane, dam of Rosa Wilkes 2:18¼ and Simmona 2:28; Ctara, dam of Alma 2:28¾, Astoria 2:29½ and Dexter 2:17¼. The fact of this mare being the dam of Dictator, would alone place her upon an enviable pinnacle. Columbine by A. W. Richmond, dam Columbia by Bonnie Scotland, (imp) is the dam of Anteeo 2:16¼, Antevolo 2:19½ and Coral (3 years) 2:25; Countess by Whipple's Hambletonian, dam of Dawn 2:18¾ and Strathway (3 years) 2:26; Dame Winnie (thoroughbred) dam of Palo Alto 2:12¼, Gertrude Russell 2:23½ and Big Jim 2:23½; Fleetwing, dam of Stamboul 2:11½ and Ruby 2:13¾; Gauntlette, dam of Brown 2.18¾ and Williams 2:20½; Gretchen by Gideon, dam of Nelson 2:11¼ and Susie Owen 2:20; Gretchen by Mambrino Pilot, dam of Del Sur 2:24, Inca 2:27 and Romero 2:19½; Jenny Lind, dam of Dixie 2:30 and Tackey 2:26; Lucille Golddust, dam of Lucille's Baby 2.20½ and Spragne Golddust 2:19½; Primrose, dam of Ichi Ban 2:29¼ and Redwald 2:28½; Sally Chorister, dam of Belle Brassfield 2:20, Proteine 2:18 and grandam of Baron Wilkes 2:18 and Holstein 2:29¾; Soprano, dam of C. F. Clay 2:18, Eminence 2:18¾ and Strathbridge (3 years), 2:28½; Sprite, dam of Egotiat (4 years) 2:29, Sphinx 2:23 and Spry (4 years) 2:23¾; Tackey, dam of Class Leader 2:22¼, Naiad Queen 2:29¼ and Pilot Boy 2:20. She is also dam of Pilot Medium, Tansey by Geo. Wilkes, dam of Butterfly 2:19¾ and Eagle Bird 2:21 at four years. Woodbine, dams of Wedgewood 2:19 and Woodford Mambrino 2:21½; Yolande by Alexander's Belmont, dam of Yazoo 2:27½ and Yuba 2:24½ and some other younger produce that will be heard from in time; Midnight, dam of Jay-Eye-See 2:10 and Electricity 2:24¾; Lady Bunker, dam of Guy Wilkes 2.15¼ and William L., sire of Axtell.

Molly Walker, Nancy Whitman, Abbesa, Addie, Bay Fanny, Bazaar, Belle Brandon, Bell Clay, Belle Hastings, Betsy Trotwood, Crop, Dahlia, Eventide, Fanny Mapes, Flora Gardiner, Kate, Lady Carr, Mag Ferguson, Mayflower, Mother Hubbard, Sue, Wild Rose, Sable, Waxana, Lady Thorn, Goldsmith Maid, Lucy, Lulu, and many others are well-known brood mares, and are valued very highly both by owners and horsemen generally.

I have given this last thus particularly, and have entered into detail, that any reader might observe the composite breeding of these various mares. They are trotting bred, pacing bred, running bred, thoroughbred and a mixture of all! Yet a careful study seems to show that no one branch of them has succeeded in covering themselves (through their produce) with such effulgent glory, as to positively blind everybody to the perfections of the others. They all have produced trotters from stallions of the first class, stallions of the second class, stallions of the third class, and stallions of no class at all. These sires have been trotting bred, pacing bred and even thoroughbred, and a mixture of every breed.

When a man sits down and evolves a theory by which the ideal trotter may be bred, his deductions are valueless unless supported by sufficient evidence to justify their adoption. Perhaps, fortunately, no two men believe just exactly alike regarding the breeding, raising and training of horses. A puts his faith to the thoroughbred cross, B glories in a mixture of pacing blood, C wants nothing that is not standard, while D. knows that Arab blood makes them trot fast. These are individual theories, and are all doubtless worthy of study and consideration, but the superiority of any one of the first three theories is not apparent, and is not justified by an examination of the pedigrees of the list of mares given above. The records point unerringly to the fact that many mares of little breeding, surpass, as brood mares, those that we are accustomed to consider the acme of equine perfection and from whom we are led to expect the highest results!

Ella Hopkins is a striking illustration of this. Sired by a pacer of unknown breeding, she is already the dam of three trotters in the 2:30 list! It is alleged that this mare was bred to a jack for several years previous to becoming the mother of Geneva S., Mattie H. and Quinine S, and that the only reason she is not at the present time raising mules, is because the long-eared, brazen-voiced beast met with an untimely end—which was indeed sad! Ella Hopkins surely had greatness thrust upon her.

The dam of Jack 2:12½, sold for a song, yet it is not the fortune of many mares to become the dam of a trotter of Jack's speed and capacity.

Whiskey Jane, the dam of Sam Purdy 2:20½, was claimed to be by Illinois Medoc, but the preponderance of evidence proves her breeding unknown. Purdy was a good race horse, and although something of a Slug, a horse had to outclass him to beat him much. He has gone a great many heats better than 2.30.

Arab 2:15. is generally credited with five parents. Accumulative evidence shows that he was sired by Electioneer, Gen. Benton and Arthurton, while Lady Hamilton and Lady Hercules figure as his dam. Which of the three stallions is really his sire, possibly nobody knows—not even Arab himself—but he certainly had either Lady Hamilton or Lady Hercules for a dam, the breeding of both being unknown. Arab was a campaigner of very high order, and although the best horses of the Pacific Coast tackled him, they failed to beat him. It has been the lot of but few mares to produce his equal.

'Tis said there is a secret law of compensation! I wonder if it obtains in the horse world?

It would appear needless to elaborate this subject. Enough has been given to prove that many mares produce trotters when there seems no good reason why they should, while others fail when there seems every reason why they should not! In the language of the late E. A. Sothern, the comedian, it is "one of those things no fellow can find out!"

HARVEY WARD PECK.

Our Australian Letter.

SYDNEY, N. S. WALES, OCT. 1st, 1890.

BREEDER AND SPORTSMAN:—I notice that you were impressed by Captain Merry's statement with regard to pony and galloway racing, and very sensibly advocate the sport, if only in the interest of breeders getting off their undersized stock. The big Jockey Clubs try their best to crush the little fellows, but the proprietory Clubs find it pays well, the public like it, and it is carried on in the light of day, and under the electric light at night. The biggest meeting yet held starts to-day at Moorefield near Sydney, where there are—amongst other good things—two handicaps of 150 sovereigns each. Good ponies are now becoming valuable property, and at a pony selling race the other day, a pony was claimed and fell to the bid of Dr. Slate, at the respectable sum of £100. Dr. Slate is a Sydney dentist, who has imported some good trotters from your part of the world. And speaking of trotters reminds me that I saw in your paper that Mr. Foster, of Sydney, had purchased a trotter in the States who did a handsome time trial before the sale was ratified. However I would not mind laying a trifle, the horse never trots up to anything like his Yankee form when he comes over. They either do not acclimatise, or we know very little of the fixing up or driving of the trotting horse, and I am inclined to think the latter is the trouble. In my last letter I told you of the stealing of the gigantic sire Cranbrook, by Chester from La Princesse, own brother to Kirkham. Cranbrook has since been discovered in a cave some twenty miles from the station, looking none the worse for his adventure. It is supposed he was stolen for stud purposes, and as he is a horse likely to leave his mark on his progeny, it will be interesting to note if any racers of his stamp turn up a couple of years hence.

The Hawkesbury Race meeting, which for the past twenty odd years has been looked upon as the opening week of the season, started on September 4th. The course is picturesquely situated near the Hawkesbury River, some thirty miles from Sidney, and the outing is much liked by the public. The Hawkesbury guineas, a mile spin for 3-year-olds, was won by the clinking filly Prelude, by Martini-Henry—Phillina, bred by the late Hon. James White. The county purse, 1 mile, fell to the five-year-old Teksum with 7 st. 5lb., a son of the immortal Masket from Alhatroas, who was followed in by the three-year-old Queensland colt Megaphone, 7 stone 8 lb., about whom I shall have more to say later on. On the second day Prelude was backed at five to one for the Hawkesbury Produce Stakes, for three-year-olds, one mile and a quarter, colts 8 st. 5 lb., fillies 8 st. Prelude incurred a 7 lb. penalty for her win of the guineas on the first day, and she ran second to Cobham, a colt by the unbeaten Grand Flaneur from Belle of Cobham. The Hawkesbury Grand Handicap, the event of the meeting, fell to Megaphone, with Little Bernie second, and the pair all though the Randwick Spring meeting, showed the consistency of their running. Megaphone fairly cantered in ahead of Little Bernie, covering the mile and a half in 2 minutes 35½ seconds, equal time to that made by your Salvator when he defeated Tenny in their great race, both horses being ridden out to the bitter end. The Australian Jockey Club, Sidney, Spring meeting commenced at Randwick on September 13th. The trial stakes were won by Little Bernie, sire Cheviot from Myrtle, and then the Sydney Derby came on the board, or rather the turf. The gelding Titan, for whom the "Plunger" Brodribb gave 4,600 guineas at the Hon. Jas. White's sale, started favorite at even money, but the youngster was not himself, not having gone out of a walk for the week previous to the race, and when it came to a gruelling finish he went all to pieces, and the race was left to Gibraltar, Gatling and Whimbrel. Whimbrel slightly collided with Gatling and threw him out of his stride, but twenty yards from home the three were dead level, and they finished Gibraltar, Gatling and Whimprel, a few feet only separating the three colts. The winner is owned by the Hon. H. C. Dangar, and is a strapping chestnut by Grandmaster from Algeria. Gatling, by Musket's son Nordenfeldt from Petrotense, is the property of Mr. "Bill" Gannon, and thus early in the season that sportsman commenced to run his usual heartbreaking seconds. The Epsom Handicap, 1 mile for 3-year-olds and upwards, brought out a large and fine field. Megaphone and Bungebah were elected favorites, but it was asking the three year-old Megaphone too much to carry 8 st. 4 lb., as against the rattling five-year-old gelding Bangebah's 7 st. 10 lb., and Bangebah won somewhat easily. Then followed the Spring stakes, 1½ miles, for which the mighty New Zealander Carbine made his first appearance, starting at 5 to 4 on.

As a rule Carbine does not run up to his form in the first race of a meeting, but on this occasion he won as he liked, Melos, Gresford and Sir William running a dead heat for second place. Melos was without doubt a bit off color and did not show his true running, or Sir William and Gresford would never have lived with him at weight for age over a mile and a half. Gresford has since been sold for £1000 to Mr. W. T. Jones, who won the Melbourne Cup with Bravo, and it is not altogether off the cards that he may win another Cup with Gresford, by the Drummer from La Mentte. For the big handicap of the meeting, the Grand Metropolitan two miles, Megaphone had been backed for a mint of money by the public, and a perfect howl of indignation went up when the horse was scratched a comparatively few hours before the event, although in good health and condition. His withdrawal was balm to the Israelitish army of book-makers, of which Megaphone's owner is one of the principal in Queensland. In Megaphone's absence Bungebah was elected favorite, but he failed to run into a place, and the winner turned up in the consistent Little Bernie, followed in by Papua and The Queen. Time, 3 min. 32 secs. Sir Modred won the Metropolitan in 1884 in 3 min. 34¼ secs. Megaphone came out later in the day and won the Squatters' Handicap, 1¼ miles, with 8 st. 12 lb. up. On the third day the two big guns of the meeting, Carbine and Megaphone, met in the Craven Plate, 1¼ miles, Carbine carrying 9 st. 4lb. and Meg 9 st. 9 lb. the betting being 7 to 4 on Carbine and 7 to 4 against Megaphone. Musket's son Cuirassier, and Cardigan also started, but they were never in the hunt. As your readers must be aware, if they read the Australian turf gossip, Carbine is a regular sluggard until he toes the scratch, and he has, without any exaggeration, to be "whooed" like an old goose and fairly driven out of the paddock with a whip. Once at the post all trouble ceases, and it is a sharp horse that gets the better of Carbine in a start. Megaphone's rider made the pace with the hope of Carbine's weight wearing the champion down, and when half the distance had been covered he was three lengths to the good. Carbine then commenced to creep up, entering the straight on even terms with the flying colt, and then commenced a bitter struggle with the unusual sight of the champion under heavy punishment of whip and spur. Slowly, but surely, Carbine drew away and won by three-quarters of a length in the wonderful time of 2 min. 7 secs. for the 1¼ mile, the fastest time ever run on an Australian course. The pace told on Carbine's old weak spot, the heel, which opened slightly and since then he has been wearing a bar shoe. The Inspector of the Society for the Prevention of Cruelty to animals ought to have been around on Megaphone's behalf, as later in the day his owner started him in the Sydney handicap, 1¼ mile, with 9 st. 5 lb. up. She was elected favorite by the crowd, but as might be supposed his running to within a length of Carbine in wonderful time took too much out of him, and Little Bernie placed another win to his credit. On the concluding day the steeplechase was run amidst a regular chapter of accident. Every horse in the race fell, but Grafton and Reuben remounted and finished in the order named.

In the Waverly handicap Little Bernie weighed at 8 st. 11 lb. suffered defeat at the hands of the light-weighted 5 year old Claremont, and then Mr. Gannon had a well deserved win with Melos in the Randwick Plate, a weight for age three mile race. Simon won the Final handicap 1¼ mile followed by Sir Modred's handsome son Antaeus, an aristocratic field bringing up the rear.

Simon, who ran indifferently all through the meeting, runs in the name of his trainer, T. Brown, but is owned by the Hon. W. A. Long.

And now for a few words about Megaphone, the three-year-old by the Queensland sire Newbold, out of a well performed Queensland mare named Sound, upon whom we look for the successor to Carbine. Unfortunately he was not nominated for the Sydney and Melbourne Derbies, or the Caulfield and Melbourne Cups. He was entered for the Metropolitan, and had merely to go out and win, but at the last moment his owner scratched him, and the least said on the unpleasant subject the better. He has won races out of number in the colony of his birth, and the manner in which he extended Carbine in the Craven Plate stamps him as a colt of unflinching bravery under punishment. And now for the most pleasant bit of news about the colt. The Hon. D. S. Wallace, the straight running owner of Carbine, has purchased him for £3,000. That the wonder was not in worthy hands may be judged from his scratching for the metrop, and the starting of a three-year-old with 9st. 4lbs. up on the same day as his gruelling race with Carbine. "Plunger" Brodribb, whose horses are in the same stable as the Hon. D. S. Wallace's, trained by Walter Higenbotham, has ever shown himself to be a man ready to back his opinion. When the father died he left two boys and some embarrassed Station property, the equity of redemption of which the brothers sold for £500 each. "Plunger" said £500 was no good to him, and he would be either a man or a mouse, so he went out to Flemington and backed horses. His luck was phenomenal, and with his winnings he invested largely in the proprietory mine at the Barrier Ranges Silver Fields, which turned up trumps, and so far as appearances go, he is now a wealthy man. He lost £3,000 on Titan for the Sydney Derby, but he more than picked it up on Carbine's win in the Craven Plate, as he laid as many £600 to £400 as the books cared about taking, and rumor says at the end of the meeting he was £6,000 to the good. Titan is now in good health, and Brodribb has backed the double Titan and Carbine for the Melbourne Derby and Cup to win a pot of money. I should have liked to have said something about the Caulfield and Melbourne Cups in this letter, but as I fancy I have already overrun my space, I will subscribe myself "THE JUNGLE."

ANDY MCDOWELL.

The Well Known Driver Leaves for Montana.

A Short History of His Life.

On last Tuesday afternoon Andy McDowell, who has been intimately associated with the development of the trotting horse in California for the past seven years, bid a host of friends good-bye at the Market St. wharf, as he left for the Bitter Root Valley Ranch of Marcus Daly in Montana. During a conversation which the writer had with the noted reinsman prior to his leaving for his new home, the following short biographical sketch was obtained, and there is no doubt but what it will prove interesting to many of our readers. The subject of this sketch claims that his name is not Andrew but Andy McDowell, and that he was born at Kingston, Canada in 1849. His boyhood days were spent working on the Erie Canal, and it was there that he probably obtained the love for the horse, which finally caused him to adopt the training of horses as a profession.

One of the first persons he went to work for was Rhody Pringle, some twenty-five years ago, and it may have been even a little more. His first work was the ordinary rough labor with which all young lads have to become familiar when they associate themselves with a stable for the first time; but showing aptitude for his new business, it was not long before he was a full fledged groom and was entrusted with horses to exercise. Andy staid with the gallopers for about nine years and finally believing that a change might be beneficial, he left the Pringle stable and beat his way from Trenton, Canada to Oswego. It would seem that the Captain of the boat knew who his stowaway passenger was, for on arriving at their destination the officer very kindly gave McDowell $3 when he landed. In addition to riding in flat races, Andy had had some experience as a hurdle rider, having ridden for Smith German; while in Oswego this Mr. German, brought over from Canada a flee-bitten grey mare, with which he bantered several of the local celebrities to race. After many discussions a race was arranged between German's mare and another horse of the same sex called Jenny Lind owned by John Ford, who lived at Port Hope, Canada. McDowell was engaged to ride Jenny Lind, and won the race handily, many of the local sports losing heavily on German's mare. After the race Andy was given $60, which he claims was more money than he had ever had at any one time in his life. After this he made several trips on the Canal, mainly to Rochester, and was in a short time engaged by Thos. Parker of Albion, New York, with whom he staid seven years.

The first of the horses to bring McDowell fame as a driver was George Dawson, who was afterwards known as Billy Bowlegs; in the same string was old Stranger, Fearless and Brown Dick, the latter being a horse that was always sure of getting at least a little of the money hung up.

Along about the middle of the 70's McDowell went to work for Simon Butts, of Rochester, New York, where he had charge of John Barney and Bruiser. The first races in which he took part for the new stable were at Jackson, Michigan, where Bruiser was taken sick and distanced; from there the stable went to Greenville, Michigan, where McDowell met a stable of ringers under the charge of a man now prominent in horse circles in this State, but Bruiser was so fast that he never lost a heat, although as far as the pool box was concerned he might just as well have lost the race, as those who were in the crooked work were interested in the pool box, and from that day to this McDowell has never received the $1,800, which he placed in the custody of those who were selling pools. The race was protested, it being claimed that Bruiser, owing to a false representation, was not entitled to the money, and the judges upheld the protest so that the Butts stable had to get to their next point as best they could. While in Michigan, McDowell was hired at Bay City to drive the horses owned by Towsey, Westover and Merrill, for whom he worked about three years, driving in the meantime Palma 2:22¾, Walton, and Kate Hall 2:24½. At the end of the three years one of the partners took it into his head that McDowell had pulled Palma in one of his races, and as Andy puts it, "we dissolved there and then. I had won the race in three straight heats, but the judges had taken one of the heats from me, and I then requested the representative of the partner, who was present, to put up another driver, and Frank Van Ness was given the reins. The gelding was afterwards distanced, the only race he ever lost in two years."

In 1880 Andy went to work for B. J. Johnson, and won many victories with Sciola, who was also known in the Western country as Kate Wesner, Katydid, Honest Trotter, and at least a score of other names but that was before McDowell took charge of her. In the same stable was Fairmont 2:29½ by Wild Billy, dam a Black Hawk mare. McDowell vows and declares that this is the fastest horse, with two exceptions, that he ever sat behind in his life, and that he has been satisfied for many years that he could have driven him in 2:15 or better when that was a much lower mark than 2:12 is now. In connection with this horse it might not be out of place to say that while driving at Kansas City the two mammoth grand stands were burned to the ground while one of the heats was being trotted, and the excitement was so great that no time was ever given out, although McDowell says he knows it to be 2:22½.

Having driven for Johnson about two years, McDowell next transferred his services to the stable of Campbell & Kane of Dallas, Texas, they having in their stable Golden Rule and Keno. Shortly after McDowell joined forces with the Texans, he bought for them the brown gelding Sleepy Joe, and afterwards gave him a record of 2:19¼, and also gave Keno a record of 2:17½. After this mark was made for the latter horse, he traded him for Fuller who was then at Rochester, New York. Prior to this Fuller had not won a race and was considered of but little account by those who had seen him in his work; the horse was taken to Utica and while there some gentleman came on from Rochester and tried to secure four pacers as a side attraction for a grand trotting race that was to take place at Rochester on July 4th. Three pacers were easily secured, but those interested would not listen to the idea of McDowell's driving Fuller, as they claimed it would detract from the merits of the race to have such a slow horse in it, however, McDowell finally agreed to pay his entrance money although the other three horses were given free entrance, the purse hung up being $1,000. Much to the surprise and discomfiture of those who thought that the race could be easily manipulated, Fuller won the first, third and fourth heats. Next he was taken to Poughkeepsie but was there distanced, however, after that he never lost a race that year, McDowell giving him a record of 2:13¾. The following spring the horses were taken from Dallas and prepared for campaign work at Louisville, Kentucky. The circuit starting that season at Chicago. There McDowell got second money in two races with Sleepy Joe; afterwards winning at Pittsburg, Cleveland and Buffalo with him.

On arriving in Rochester, the old home of McDowell, one of the gentlemen interested in the stable made the suggestion that it would be a good thing to lose this race as the gelding was selling at $100 to $10 and $12 for the field. McDowell refused to "do business" and proposed to win as usual. On thus declaring himself, he was invited on the spot to settle up, when he was paid in full, together with $100 more than he was entitled to. One of the gentlemen who was interested in the stable, met McDowell at the bottom of the stairs and said, "What's the matter, Andy?" "Nothing, but you'll find out." The partner expressed surprise on learning of McDowell's dismissal, and said that he should drive Sleepy Joe during the balance of his engagements, and said that he would get $100 a week for so doing. McDowell assented to this very liberal proposition, and left the gentleman standing in the hall-way. Meeting a few friends, McDowell began celebrating his release from the close pressure of business, and it was not long before many bottles of wine had been uncorked and he was not fit to drive. Two different drivers had been up behind the favorite, but neither of them seemed capable of steering the gelding to victory, and the large audience very soon manifested signs of displeasure, and the marshal was instructed by the judges to hunt up Andy. After a short time, Marshal Palmer found Andy in rather a serious state of intoxication in the club house, but took him, however, over to the judges' stand, where Col. Parsons asked McDowell if the row which so many had been talking about was on the square between the owners of the stable and himself, McDowell answered, "Yes," whereupon Col. Parsons asked him if he felt that he could drive the horse to win, McDowell answered, "Yes, but I'm so full that I can't see the horse's ears." The horses were rung out for the fourth heat, McDowell being up behind Sleepy Joe and won the heat readily in 2:21¾, but in the fifth heat St. Cloud, who already had two heats to the good, ran into McDowell's sulky on the backstretch, and being a very handy horse, won the heat in 2:22; the judges not allowing the claim for foul, and consequently the public, who were backing the favorite, lost largely in the pool box. Immediately after this race was over, Mr. Valensin made McDowell a good offer to visit California and train his horses, the proposition being at once accepted. Having agreed to drive Sleepy Joe during the balance of his engagements, McDowell went to Utica and saw Campbell drive the gelding several miles, but not liking his appearance, refused to have anything more to do with him, so he started the same evening for the Golden State, where he arrived in September, 1883.

Bad luck seemed to attend the arrival of McDowell at the Valensin farm, for it was only a few months before both Buccaneer and Crown Point died, leaving nothing but young colts to be trained. McDowell, like a great many other drivers at that time, felt that it was beneath the dignity of a first class driver to handle youngsters, and resigned his position, although he states that he never worked for a more pleasant gentleman in his life, and was sorry when he left Valensin's employ. In answer to the question "what do you think about training youngsters now?" Andy laughed and said, "I have changed my notion considerably since 1883, and now feel that the only way to secure good trotters is to start in as early as possible with their education."

McDowell had not left the Valensin place before a telegram reached him requesting his attendance at the Palace Hotel to meet L. J. Rose and L. H. Titus. On arriving in San Francisco and meeting the gentlemen alluded to, an engagement was speedily consummated, it being understood that he was to take Nelnska to Chicago and Albany, where she was entered in some four-year-old stakes. Before getting ready to leave for the East, Nelnska developed "a leg" and it was considered policy to leave her behind, McDowell taking instead Belle Echo. This well known mare was started in thirteen races, nine of which she won, meeting such crack trotters as Maud Messenger and Harry Wilkes. After his return from the East McDowell trained a public stable for about two years.

The next good horses he had were Adair and Thapsin. During a race at Stockton, Mr. Smith was taken sick and McDowell was requested to drive Adair, Mr. Smith's instructions being to keep him simply inside the flag, as he felt that there was no chance to win against such horses as Manon, Guy Wilkes and Nelly R. McDowell, however, won the first heat in which he drove, the time being 2:19¼, the judges making the next heat a dead one between Adair and Guy Wilkes in 2:18¼. The race was postponed until the following day, but Adair, who was very sore from the fast work of the day previous, could not win, Nelly R. proving the victor. In the following week McDowell drove Adair, winning the first heat in 2:17½, it being in this race that Nellie R. broke down. The second heat was also won by Adair in 2:18¼, Guy Wilkes winning the next three in 2:19¼, 2:24 and 2:18½; it was in the third heat of this race that the driver of Guy Wilkes ran into McDowell's sulky and tore off a wheel, yet still the judges gave the heat to Wilkes and fined the driver $100. On October 1st of that same year, McDowell drove Thapsin against Antevolo and Marin, winning the first, second and fourth heats, the best time being 2:23¼. Knowing the peculiar reputation which some drivers have, the question was asked McDowell, "Were you ever suspended or heavily fined for work in the sulky?" The answer was, "I don't know what you mean by work in the sulky; I was expelled once although I was never taken out of the sulky in my life, and it occurred in that same year on the Bay District Track. On the 24th of October, a race took place between Magdallah, Mayboy, Antevolo and Thapsin. I won the first two heats with Thapsin in 2:22¾ and 2;24, but found the horse was almost dead, so I went to Mr. Miller who owned him and requested that another driver be secured, as I was certain the horse could not win. I begged of Wilbur Field Smith to take my place behind the black gelding but Mr. Miller would have me drive, so I finished two more heats with him, Magdallah taking the third and fourth in 2:23½ and 2;24¾ At my request Havey then took his seat in the sulky, but as I stated Thapsin could not take another heat, Mayboy winning the fifth and sixth in 2:26¼ and 2:27½. The race was then postponed, and on the following day Havey driving Thapsin won the seventh and deciding heat, distancing Magdallah in 2:24. After the race the judges announced from the stand that McDowell was expelled for not trying to win with Thapsin.

A meeting was called a few days afterwards at the Palace Hotel and the expulsion was changed to suspension for twelve months. "I served my time, said Andy, but behind no bars, as I was down at Sunnyslope working for L. J. Rose. As soon as "my time" was served Munroe Salisbury engaged me, and from that time I have been with him. The history of Direct, Margaret S. and Cricket are of too recent a date for any of your readers to wish to know anything about them. I feel almost sorry that I have to leave such a good employer as Mr. Salisbury has been to me, but it was simply a question of salary, Mr. Daly being willing to pay me much more than Mr. Salisbury felt that he could afford.

It may also be of interest to your readers to know that a few days ago, in addition to the sum of $200, which I received from the Cook Stock Farm as a present for getting such a low record for Cricket in behalf of their stallion Steinway, Mr. W. H. Meek, owner of Cricket handed me a check for $500 as a bonus for the low mark which I had given his mare. I feel sorry to think I am going to leave California, having cemented many friendships here, and sincerely trust that the day may not be far distant when I may be able to once more pay California another visit and shake all my old friends by the hand."

F. J. Berry & Co.'s Combination Breeders' Sale.

More than a hundred entries to our mammoth breeders sale have been returned to consignors, many of them being horses of great breeding. We have four hundred horses entered in our November sale, which are as many as we care to sell in five days and do justice to owners. We have issued our catalogue and buyers can see what choice breeding we offer for sale. Our consignment as a whole comprise the grandest lot of horses in breeding an intrinsic merit ever entered in a combination sale, and it is with pride we call the attention of horsemen to the many great bargains and choice individuals compiled in our sale catalogue. Does the breeder want a great sire? Then we quote Bay Wilkes by George Wilkes; Charles Backman by Hambletonian (10); Prince Gerait by Kentucky Prince; Chulo Sprague by Rounds Sprague; Ontok by Onward; Joe Moreland 2:27 by Woodburn; Fontaine by Mambrino Dudley; Glamour 2:26½ by Strathlan; Clay Cuyler by Cuyler; Grenadier by Princeps, second dam Midnight, the dam of Jay-Eye-See 2:10 and Noontide 2 20½. If any horseman wants a fast performer we cite him to such grand ones as Woodman 2;22, Billy J. 2;29½, Cora Cland 2;27½, Lnella 2;19¼, Bird 2:27½, Billy F, 2:20½, Fred Mills 2:27, Mac 2;29, Raven Girl 2;20, Mike Wilkes 2:15¾, Ayres P, 3 years. 2:40 trial 2:24, eighths in 17 seconds and many others with public records. In grand broodmare lines the choicest breeding will be found of the Wilkes, Hambletonian, Almont, Belmont, Dauntless, Pilot Medium, Magna Charta, Alcryone, Robert McGregor, Sultan and other great sires A number of the finest carriage teams in the land, great prize winners, are catalogued in the sale.

For fast road horses and brilliant prospects for trotters, our sale offers a strong field from which to make selections, as a large number of horses are consigned that can show from 3:00 to 2:20 that have no records.

The greatest opportunity ever offered to buy a race horse or 1891 campaigner, as Ayers P. and other consignments promise to be the sensational trotters next season.

Only choice animals have been admitted to our sale, and buyers can be assured that their purchases will represent the choicest breeding and the highest individuality. From the high quality of our entries, we expect our second grand breeders' sale will be the most brilliant on record. Our catalogue is out and will be mailed on application. Send for one to F. J. Berry & Co., Union Stock Yards, Chicago.

TURF AND TRACK.

The once mighty Dwyer Stable only won $1,735 at the Morris Park fall meeting.

Jimmy Rowe is said to have handled the starters flag at Washington with great success.

Garrison will in future race his horses in his own colors which are black jacket, yellow sleeves and cap.

Poor old Barnum is still at it. Surely some one should give the game old racehorse his well earned rest.

Last Sunday Goldsmith drove Stamboul a half in 1:03 4-5, and has great hopes next Saturday of lowering his record.

During the Morris Park meeting Snapper Garrison is said to have run a $10 bill up to $12,000 by desperate betting.

John Splan is greatly pleased with Navidad, and expects the son of Whips to go low down in the teens next season.

Matt Feakes has been employed to assist John Huggins in training the Rancocas string, which will number about sixty next season.

The four leading jockeys according to No. 13 of Goodwin's Official Turf Guide are Bergen 173, Hamilton 119, Taylor 109 and Barnes 98.

It is said that the first kite shaped track ever constructed was built at Weymouth, Mass., in 1865, and has been in use ever since.

The would-be record breakers will make their efforts on Saturday next, and also on the 14th and 15th at the Bay District Track.

Pete Williams says that Silver Bow will again make a season in the stud at Oakland instead of standing in Montana as was once thought of.

A contemporary says the besetting sin of the trotting turf is not pulling races, but pulling heats, or, as the expression goes, "laying up" heats.

Mr. C. D. Rose, the wealthy English Canadian, who added £1,000 to three races in England, is importing mares from Australia to England for brood mares.

John Davis is busy breaking the Winters' yearlings on the ranch near Sacramento. Several late visitors say that they are an exceptionally good looking lot.

Stambuld, three years, by Stamboul 2:11¼, dam Choice by Dictator, owned by J. R. Graham of Boston, recently showed a trial in Kentucky of 2:30½, last half in 1:12½.

The Pacific Coast Blood Horse Association have altered the date for the closing of entries to the 5th—next Saturday, in order to give several outsiders a chance to return in time.

J. A. Goldsmith, in addition to Stamboul and the San Mateo Stock Farm horses, is working Directa for Messrs. Loeber and Heald and Sidney Roy, Mr. Hatch's late purchase,

Colonel Robert S. Strader has sold to B. F. Kindig of Philadelphia, a pair of Arthurton geldings, dam May Sproul, (grand dam of Regal Wilkes, 2:17½) by the Moor, for a long price.

Charles Reed sustains a severe loss in the death of French Park, who, as a two-year-old was invincible. The son of King Ban and Lou Pike should have made a great name in the stud had he lived.

Dunton's Spirit of the Turf in its issue of the 23rd has on the outer cover the tabulated pedigree of Stamboul under the heading "The Horse that is likely to go into Winter quarters with the stallion record."

Last June Mr Apcar, a prominent resident of Calcutta, purchased Bravo, the winner of the Melbourne Cup, and took him to India, but shortly after his arrival the horse died, owing, it is said, to the excessive heat.

Mr. A. T. Hatch will very shortly move his trotting stock to his new ranch in Tehama county. Jas. Sutherland will go along to manage the ranch, which is admirably situated, having about ten miles of river frontage.

Homer P. Saxe, the well known breeder and importer, had a severe loss a few weeks ago, as his standard bred mare by Grosvenor, dam by Admiral, was injured by staking herself and had to be killed. She was in foal to Eros.

Byron McClelland has bought from Bradley Brothers, Lexington, Ky., for $2,500, the colt Outcry, a full brother to Outbound. Outcry is two years old, has never won a race, and is by Blue Eyes—Etna, by King Ban.

Bradley Bros., Lexington, Ky., have bought of Bashford Manor Stud, Louisville, Ky., the three-year-old bay colt Major Tom by Eolus, dam Scotia. Price, $2,750. Major Tom won three races during the Latonia meeting.

The Murphy sale on Tuesday did not draw many purchasers, and quite a large proportion of the horses were withdrawn. Billy D., who won a few races for Henry Schwartz last year, was offered, but did not elicit a single bid.

It is confidently asserted in the Eastern journals that Bob Stewart, the well known Kansas horseman, will winter in California with his large stable of trotters. If he does he will be sure of a hearty welcome and will be sure to return again.

Electioneer's list of 1890 2:30 performers is still further increased by the entrance of Electrician, 2:24¼, a six-year old horse by Electioneer, out of Rebecca (dam of Rexford, 2:24, at three years old) by General Benton. This makes twelve Electioneers in the 1890 2:30 list.

McDoel, the sensational winner at Lexington last week, was out of a brown mare fifteen hands high that has done nothing but farm work all her life. McDoel has a record now of 2:15½, and he, too, was a plow horse for many years until his speed was discovered by mere accident.

A. Herold, who is one of our prominent State treasury officials, says that his three-year-old trotter Dukes Cameo is anxiously sought after since his victory at Glenbrook Park. Only last week he was offered $1,000 for the big, black, Mulvenna colt, who should next year trot well inside 2:30.

The Bay District track is rapidly getting into great shape; it has been re-clayed wherever necessary, and should now be as fast as any in the State. Red Green says it is five seconds faster than Napa sure; and certainly judging from the fast work done on it lately, it must be in good order

Woodford & Buckner have lost their thoroughbred 2-year-old colt Bramblebush by Greenbush, out of the great Brambaletta, by Bonnie Scotland. He won two races this season and was second in the Lakeview Handicap, three-quarters of a mile, at Chicago. The time made in the race was 1:15½. He was valued at $3,000, and was a very promising colt.

Matt Storn yesterday took Lurline back to J. B. Chase's ranch in Sonoma; the four-year-old daughter of Longfield, and game old Katy Pease is in foal to imported Cheviot. Matt will bring back a couple of yearlings, viz. a filly (Centella) by Joe Hooker out of Katy Pease and a colt (Topgallant) by imported Mariner (Oat Cake) from Lady Clare by Joe Daniels.

Before All So, 2:20¼ was purchased by M. T. Pooler of Skowhegan, Me., he was bred to several mares with fast records, including Fanny Witherspoon, 2:16½, and Minnie R., 2:16½. He was foaled in 1884. All So duplicated his record of 2:20½ over a half-mile track at Topsham Me., on the 16th inst.

John A. Goldsmith is driving the three year old mare by Sidney out of Blonde by Elmo, on the road. Several times on the circuit she showed her ability to trot way better than 2:30, having gone halves with ease in 1:10, but she was held over until next year, when she should prove dangerous in her class.

Among the entries for the English Derby to be run in 1892 are some exceptionally high-priced youngsters. D. Cooper, New South Wales, has five youngsters entered which cost him $40,000; Baron Hirsch has three which were purchased for $50,000, Col. North's five represent $35,000, while Lord Dudley's six cost $45,000.

The racing season for 1890 is practically over for the big stables. August Belmont heads the list with a total winning of $167,000. John A. Morris is next with $158,000, while Senator Hearst, whose bad luck in previous years was proverbial, closes the season with $119,000. Nearly all the big money in the big stables has been won by one horse.

Several horses were withdrawn from the races at Elizabeth under peculiar circumstances, because their owners could not find competent jockeys. Taral, Taylor and Bergen have gone to Washington, leaving behind a miscellaneous assortment of "shoemakers." Hamilton rode but seldom. Garrison has virtually retired for the season, being content to "beat 'em on the outside."

Ed Corrigan, the owner of the Westside Driving Park, was sentenced by Judge Driggs on the 23rd, to pay a fine of $500 and costs for assaulting F. G. Manning at the Westside track July 30th. The assault occurred during a raid on the pool sellers. Manning was a spectator, and during the fight was assaulted by Corrigan. He had the latter arrested for assault, and the case has been pending in the courts ever since

Col. H. I. Thornton will sell several yearlings at the forthcoming Blood Horse Meeting, among them being two by imported Mariner (Oatcake) and one by Three Cheers. Australian stallions—Sir Modred and Darebin, have done so well that Mariner's colts should be in demand, while Three Cheers' son is out of Rosy by Shannon, from Myrtle by Lodi etc., good enough breeding for anything, and the colt is racy looking all over, greatly resembling his sire.

A despatch from Lexington says that Monbars, a black yearling colt by Eagle Bird 2:21, dam Lady Maud 2:18¾, by General Knox, has been sold by the Fashion Stud Farm of Trenton, N. J., to Richfield & Leathers, Lexington, for the unprecedented price of $8,500. No yearling trotter ever sold for so much money in Kentucky. A fortnight ago this colt trotted two quarters there in the remarkable time of 0:38¾ with only eighteen days' training.

It is at Morris Park and not at Monmouth where the proposed trotting meetings are to be held, says a well known Eastern writer. Mr. Nelson, he who attended to the wants of the inner man at Morris Park, is the originator of the idea, and has almost persuaded Mr. Morris to give up four days in August to trotting races. Liberal stakes ought to bring out a good class of horses, and the new venture would probably be well supported.

It is rumored that the speedy 4 year-old gelding Beaury Mc who obtained a four year old record of 2:19¾, has been sold to Mr. Hobart, the owner of Stamboul, who will use him on the road. He should make a perfect road horse, as he has very pure action, is level headed, and a very easy driver, with plenty of speed. Mr. Williams has two own brothers to Beaury, and also owns his dam, an Alexander mare.

John Osborne, the veteran English jockey, has performed a feat that is without parallel. It is just forty one years ago that he won the Newton Cup on his father's horse, Pity the Blind, and he steered Mr. Vyner's Aperse to victory in the same race this year. In 1849, old Mr. Osborne presented the Newton Cup to his son, which he still keeps as a family heirloom. In the same year Master John won the Liverpool Cup on Bon Mot.

During the fall meeting at Morris Park $186,610 was won by the various horses. The ten leading winning owners were Senator G. Hearst, $34,850; J. A. & A. H. Morris, $15,985; J. A. Cassatt, $8,600; A. Belmont, $8,285; D. T. Pulsifer, $8,080; Bashford Manor, $7,250; E. McElmeel, $6,410; E. Corrigan, $6,085; Santa Anita Stable, $5,820; S. S. Brown, $5,640. Thirteenth on the list is J. B. Haggin, $3,845, while two steps lower is the Undine stable, $3,570. W. H. E Smith won $1920, L. J. Rose, $675 and the Maltese Villa Stable $200.

Major P. P. Johnston, President of the National Trotting Association, has made the following sales of trotters: To C H Chatfield, New York, the three year old gelding Hardshell, by Commodore Wilkes-Mollie C., by Contractor, for $3,000 He has shown his new owner a mile in 2:25. To Bowerman Brothers, Lexington, the eleven year old blk m Diana Patchen, by Mambrino Patchen, dam by Edwin Forrest, and a suckling filly by her side by Wilton, 2:19¼, for $7,000.

Andy McDowell left last Tuesday for Montana, and on the same day Millard Sanders arrived in San Francisco, en route for Pleasanton, where he will handle the young Sidneys, being under a three years' engagement to train and drive for the Valensin Stock Farm. Mr. Sanders, who stayed a couple of days in the city prior to going to Pleasanton, was cordially welcomed by all the local horsemen, who seemed anxious to do everything in their power to make the brilliant driver of the erratic black gelding Guy 2:10¾, feel at home.

The foreign market for trotting stock is gradually enlarging. Dr. George Bierman, Berlin, Germany, last week bought from B. J Treacy, Lexington, Macey's Hambletonian, a bay stallion, fourteen years old, by Edward Everett, dam Ruth, by Rysdyk's Hambletonian; the price is said to be $10,000. The doctor will buy several head of fashionably bred brood mares for the purpose of establishing a breeding farm for trotters in Germany. He says the American is far superior to the Orloff trotter, and he believes the breeding of American trotters in Germany will soon be conducted on a grand scale.

Mr. C. L. Railey of Versailles sold his fine filly Semper Fidele to Mr. W. R. Letcher, Richmond, the owner of Bill Letcher. Price, $10,000. Semper Fidele is one of the best bred fillies of the year (Longfellow—La Sylphide), and her work for the year shows that blood tells. She has started seven times this year, winning her last five races, beating such cracks as Roseland, Anne Elizabeth, Ida Pickwick, Philors, Tom Rogers, etc. She is by Longfellow, dam La Sylphide by Fellowcraft, granddam Sylph by Glenelg from Squeeze 'em by Lexington.

Eastern racing men evidently have formed a great opinion of Racine's form as a race horse, for several prominent owners have attempted to lease his racing qualities, but we can authoritively state that T. H. Williams, Esq., has made all the necessary arrangements, and that Racine will again carry the pretty Undine jacket in the East, and if he meets with average luck, Eastern race-goers will have a still higher opinion of the bay son of Bishop, for say what they will, they have never seen his true form, as he was never really right after his sickness.

The old-time jockey, George Barbee, in, says the St. Louis Republic; now training the horses of F. F. Burnside, the young Englishman, who went out to California, made a little money there, acquired a love of racing, and finally established himself with some very poor horses. He owns Lord of the Harem and a few others of no account, but wagers his money on them with exceeding regularity. George Barbee is a thorough horseman, and if he had the good fortune to handle two or three animals of speed and staying power he would acquire the reputation which he deserves.

Black and Blue says: "Starter Caldwell was not in form on Saturday. His work in the first race was inexcusable. With a flash of his hand he made the bookmakers a gift of all the money invested on Nelly Bly, Bell d'Or and Al Farrow. If Caldwell were not held in such high esteem as an incorruptible man, there would be ugly talk of his work in this race. He took no pains to get the horses in shape. He lost no time at the post, but catching Mabel Glenn, Eolo and G. W. Cook well up, gave the starting signal. Nelly Bly's defeat is explained by the start. G. W. Cook had a good opportunity to win, but couldn't run."

The Dwyers will, on Tuesday next, sell all their horses in training except the yearlings, and possibly Longstreet, a colt that Mr. Philip Dwyers is particularly sweet on, as the colt is not mentioned in the list. In the list are Kingston, Hanover, Inspector B., Long Island, Anrania, Blackburn, Sir John, Honston, Caldwell, Congress, Flatbush, June Day, Kingsbridge, Longford, Bluebird, Baldwin, Baychester, Blacklock, Last King, Our Fellow, Westchester, Young George, Mikado, Ada B., Bush Bolt, Envoy, Hannibal, Hempstead, Himlex, Longshore, Blue Dress, Extra Dry, Hardwork and Last Chance.

The Chicago Horsemen in describing the oil painting (to be presented to the Coney Island Jockey Club by Mr. Belmont) of Potomac and Masher in the race for the Futurity, makes a very peculiar comparison between the two riders Hamilton and Bergen. The Horseman says: "Hamilton, in the lead on Potomac, shows in the painting his characteristic seat, with short stirrup and mane. Bergen, on the contrary, sits Masher with the loose, uncertain seat, long stirrup and long hold on the reins which is more of the English fashion. Bergen's heel is held high, his toe being pressed down."

How will that suit our English friends, and what is the meaning of short stirrup and mane?

All old time turfmen and a majority of the big brigade of race-goers, have been very much pleased to see the success of Mr. E. J. McElmeel with his filly Nellie Bly. This daughter of Stratford and Manmee is very near the top of her class. What is more to the point, however, is the fact that she has been instrumental in helping to repair the much shattered fortunes of Mr. McElmeel. Since he owned the famous General Monroe he has had the severest ill luck upon the turf. The horses that he trained were of no account. He could not win at the big tracks or at the little tracks, and it is a decided source of pleasure to see him renovating his fortunes now.

An acquaintance said to the owner of Granite and Come-to-Taw; "I think you made a big mistake in not putting up a jockey instead of that boy Miller. You ought to have won with Granite, and might have won with Come to-Taw. Who is Miller anyway?" "Oh, said Mr. Hough, he'a a boy I've just picked up to try. I think myself Granite should have won. He's good, and you know my horses are always out for the money. I would like to get a first-rate jockey." "Why not engage Taral?" "Well, I did try to get him for next year, and offered him $10,000, but he signed with A. F. Wolcott at $12,000. He's a great jockey, but I don't think any jockey is worth over $10,000 a year."

Isaac Murphy, the leading jockey in America, after wasting till he was nigh dead, has just been suspended because he had taken more liquor than was good for him, the facts being, as certified by doctors, that before the race he had a couple of milk punches, his strength being almost gone. The milk punches, of course, became exhausted, and he was unable to make a finish. Our British turf may not be all that it ought to be, but, says the Man of the World, let any lover of horse racing try the game in the United States, and he will yearn for the sound of the old parish church bells. Shade of pair Jamie Snowden! imagine a jockey suspended for having had a drop too much! Extend that rule to owners and backers and bookmakers and racing reporters, and that in all fairness, and how like a Highland plain after the rinderpest Newmarket would look, punctuated with scratching-posts.

The lady residents of Elizabeth, N. J., have been on the alert for some time past to secure a candidate to match against the old time winner of a prize given to the handsomest male resident of the town. The World says Jerry Dunn was caught sight of yesterday as he sat on the veranda of his new home on Morris avenne, The female opponents of the old timer may decide to have a new election before the race meeting ends.

George Starr, who last season wintered in Fresno, having in charge Budd Doble's crack stable, arrived in Chicago last week from Lexington, bringing with him McDoel, Nancy Hanks, Veritas and the rnnner Father John, of Doble's string. He also brought along Simmocolon and a yonng filly for Count Valensin, Pleasanton, as well as three or four others for different parties. George says that he will leave for California in about a week with some horses, and that he will remain in San Francisco about a month.

W. H. Wilson sold on the 20th, to the Pabst Stock Farm, Milwaukee, Wis., the black two-year-old filly Simonie by Simmons, dam Lady McDowell by Sultan; price, $1,500. Also, black yearling filly Simonie by Simmons, dam by Indianapolis, price $1,000. Mr. Wilson offered for another party $15,000 for the black stallion Coralloid, who made a four-year-old record of 2:19¾ at Lexington, but his owner Chas. Ganntlett, of Milan, Mich., who feels much elated over his great colt, refused the offer and has shipped his colt home.

A Melbourne sporting paper, says one of its colonial contemporaries, has recklessly decided to "chuck away" £250 among those readers who tip the five winners of Canlfield Guineas and Cup, Marihyrnong Plate, V. R. C. Derby, and Melbourne Cnp at one pop. There can be no possible infringement of any Lottery Act in offering a prize under snch conditions. The element of chance doesn't enter into the matter. The odds are illimitable—millions to nothing—that the newspaper can't lose its stake.

Last week in Turf & Track it was stated that Mr. Mulkey purchased Maggie R—the dam of Tim Murphy, from Mr. Murphy. Mulkey says, however, that he purchased her from Ivan Humason, Walnut Hills, Marin Co., Oregon. She is by Billy Newell, from Fannie Walker by Nameless, grand dam Baby Dale by Owendale. Tim Murphy was bought from McDonough and J. O'Mack, Dallas, Oregon, for $1100 and Mr. Mulkey says he has refused $2000 for him and had such a high opinion of him that he hunted up his dam and hopes to breed her back to Kyrle Daly.

Luke Du Bois went to Pleasanton last Sunday to see his grandly-bred mare Moscova (three-year-old record, 2:28½) by Belmont 64, dam Mosa by Woodford Mambrino 345, grandam Hermosa by Edwin Forest 49, etc. Mr. Du Bois says she is certainly in foal to Sidney, and when asked whether he thought the foal would be a trotter, answered: "Trotter! yon bet your life. Why, that mare could have trotted in about sixteen if that injun had not blistered all her legs to pieces, and you never saw a Sidney that wasn't fast. If it is a horse colt I should be afraid to put a price on it."

The faithful horse, regarded as an investment, is one of the most precarious animals on earth. Some time ago a New Zealand sport bought an expensive yearling, out of Florence M'Carthy, and just as he began to congratulate himself on the prospective value of the animal, his purchase fell over a precipice and broke its neck. Then he bought the next yearling out of the same mare, and this costly animal turned a somersault in the paddock and broke its back. After this the speculator grew tired, and concluded that the particular family of horses in question was too much given to calisthenics to be profitable, so he looked on while his particular enemy purchased the next colt which came into the market, and smiled a cynical smile as he thought of the consequences. Only the third animal did not break its neck, and last season it started in eleven races and won them all, and now every time he sees it, the maddened speculator opens his mouth wide, and lets his impressions explode.

M. Ephrussi's chestnut filly Alicante, the winner of the Cambridgeshire, is by the dead sire Hermit from Madiera. She has won three and lost three races in France this year while carrying 103 lbs. She ran a good second to Sheen in the Cesarwitch. She is described by a well known sporting correspondent as a great banging mare, standing, I should say, about 16 hands two inches. Yet she has not an ounce of lumber about her; her shoulders are exquisite, and she has the longest arms I ever saw on a horse. She has let down throughout, and thickened greatly over her loins, whilst her quarters have expanded and are so well clothed with good hard muscle that she presents much greater width to the eye than she did a twelve-month back. Her second thighs are full for a filly; her hocks clean, and her legs and feet seem capable of standing any amount of work. In color she is a whole chestnut, with the exception of a near white hind heel, and she has a switch tail.

A back number of Galignani's Messenger says: "An English jockey, an American proprietor and a French race horse have been sentenced to banishment from the sport for the period of two years and a half. The offence was as simple as it was degrading to all concerned. A mare called Roodante, which, according to the opinion of those present, including the qualified stewards of the race meeting, could easily have won a race at Spa, was not allowed to do so. The object presumably was to cheat those people foolish enough to have backed the animal out of their money. * * * Mr. Einstein, the owner, is an American who bets largely, and sports as his colors the stars and stripes of his native land, which have now for the first time been disgraced on the Turf. Joe Barker, the jockey, is as fine a steeplechase rider as there is in France. That such an incident can occur must be deplored by all worthy of the name of sportsman or gentleman, but no sympathy can exist for the promoters of the contemptible conspiracy."

Several of the mares to be sold in January at the dispersal of the celebrated Sylvia Park (New Zealand Stud Co.) sale have already foaled among them being:

Bianca, black mare, bred in 1884; by Black Eagle out of Bessie, by Angler out of Scraps, by Lord of the Hills out of Ragpicker. She has a chestnut colt at her side by Nordenfeldt, he by Musket (imp.) out of Onyx, by Angler out of Chrysolite (imp), by Stockwell out of Juliet, by Touchstone.

Steppe (imp.) (dam of Lady Norah and Russley) black mare, bred in 1868; by Saunterer out of Seclusion, by Tadmor out of Miss Sellon, by Cowl out of Belle Dame, by Belshazzar. She has a colt by Ingomar be by Uncas (son of Stockwell) out of Wild Deer by Red Hart out of Mary O'Toole etc.

Onyx (dam of Sardonyx and Nordenfeldt) brown mare, bred in 1872; got by Angler out of Chrysolite, by Stockwell out of Juliet, by Touchstone out of Lancashire Witch, by Tomboy. She has a colt by Ingomar.

During the middle of last week Senator Stanford and Arie Lathrop Esq , drove out to the race track at the Bay District and looked over Palo Alto, Sunol and the rest of the Palo cracks. Senator Stanford was highly delighted with the appearance of Sunol who looked as neat and fresh as a trim little school girl. She was driven a half in 1:06 and negotiated it so easily that the Senator went away with hopes of her yet spoiling the records. Palo Alto the pride of the ranch was generally conceded to be in better trim than he has been for several years—as hard as nails and apparently as sound as a good dollar.

On Saturday Marvin gave Sunol her first fast work since she returned and getting her well warmed up drove her a mile out. The first half was easily compassed in 1:08½, and from there home the peerless bay was doing her best and a wonderful best too for she passed under the wire in 2:12 last half 1:03½. How long can Mand S's record stand if Sunol keeps sound? and there seems no earthly reason why she should not. Palo Alto was given a mile in 2:15¼, last half in 1:04½ and like his stable companion he did it fearlessly and resolutely.

The war by the clergy of Elizabeth, N. J., on the race tracks and bookmakers, which has lagged for some months, was renewed with more vigor than ever last week. Circulars were read in all the Protestant churches warning the people that another attempt was to be made at the next session of the Legislature to pass a bill legalizing gambling at race tracks, and appealing to them to defeat at the polls any candidate for the Senate or Assembly who would not pledge himself beforehand to vote against such a measure.

The petition is addressed "To the Moral and Religious People of the State of New Jersey," and after denouncing the race tracks, goes on to say that success in passing the iniquitous measure means that New Jersey will sacrifice the moral interests of her citizens and surrender her deserved fame for justice in rebuking wrong.

Attached to the appeal are the names of Bishop Scarborough of the Episcopal Church, Prof. McCosh of Princeton, President Doolittle of Rutgers, Prof. Upham of Drew Seminary, Prof. Demarest of New Brunswick Theological Seminary, and 120 other clergymen, pastors of churches of various denominations throughout the State. The Rev. Dr. Kempshall and the Rev. Dr. Glazebrook preached little sermons to-day against the race track and the bookmakers.

The New Jersey Jockey Club on the 19th paid $3,000 for one year's tax on the property there to the City Treasurer. The same property formerly paid only $116 taxes to the city.

It is not easy to approach the supreme head of the American turf. When King Salvator was in his Eastern stable, casual visitors were expected to pay their respects from a respectful distance. Without proper credentials, callers were regarded with suspicion. The monarch's most immediate attendant was a colored boy named Brandon. There isn't a stable lad in America who wouldn't give up all claims upon watermelons for the balance of his life if he could have the honor which Brandon enjoys, and this, it will be conceded, is saying a good deal. When the Haggin horses were out for an airing the king was invariable at the head of the procession. The fitness of things finds further illustration in the fact that next in line came the queen of the track, Firenzi, whose claims to royal honors have been vindicated on so many hard fought fields. Successes have not turned the head of Salvator; greatness sits as easily upon him as his exercise blanket. A more tractable animal was never foaled. His royal highness is a chestnut, bald faced, and white-legged below the knees. He is a handsome horse, but not remarkably so. To see Salvator in his stable and to see him under a jockey is to look at two different quadrupeds. When he is being exercised at a slow walk his head is carried low and his motions give little promise of his possibilities; when he is fighting for his head and leaving his field behind, his stride, long, easy, smooth and natural, is perhaps as pure a gait as ever adorned the turf. For entertaining the opinion that, take him all in all, we shall see Salvator's like no more, Trainer Matthew Byrnes may readily be pardoned.

The emotional life of the horse is remarkable, says the Newark Sunday Call, in that it seems to undergo a transformation in the hands of the horse-tamer. Instances are given of the wild horses of the prairies being completely tamed in a few hours by subjecting them to certain methods of breaking. Another curious emotional feature which has come under the observation of all who have had experience with horses, is the liability of all the other mental faculties of the animal to become abandoned to that of terror, and according to Dr. Romanes, the horse is the only animal which, under the influence of fear, loses the possession of every other sense in one mad and mastering desire to run. For its other emotions the horse is an affectionate animal, pleased at being petted, and exhibits considerable pride.

It is related by General Sir Robert R. Gillispie that he was present on the race course at Calcutta during one of the great Hindoo festivals, when several hundred thousand people were assembled to witness all kinds of shows. Suddenly he was startled by the shrieks of the crowd, and was informed that a man-eating tiger had escaped from his keeper. Sir Robert immediately called for his horse, and grasping a boar spear from the hands of one of the crowd, rose to attack the formidable enemy. The tiger, when he saw Sir Robert, crouched and prepared to spring at him, and at that instant the gallant soldier leaped his horse over the tiger's back and stuck his spear through his spine. Had there been any lack of courage or show of indecision on the part of the rider, the horse would never have made the leap, and both would doubtless have been torn in pieces. It is further related that when the brave Sir Robert fell at the storming of Kalunga, his favorite black charger, bred at the Cape of Good Hope and carried by him to India, was, at the sale of his effects, competed for by several officers of the division, and finally knocked down to the privates of the Eighth Dragoons, who contributed their prize money to the amount of £500 sterling, to retain this commemoration of their late commander. Thus the charger was always led at the head of the regiment on the march, and at the station of Cawnpore was indulged with taking his accustomed station at the colorstand, where the salute of passing squadrons was given at drill and on reviews. When the regiment was ordered home, the funds of the privates running low, he was bought for the same sum by a party who provided food and a paddock for him, where he might end his days in comfort; but when the corps had marched, and the sound of trumpet had departed, he refused to eat, and on the first opportunity, being led out to exercise, he broke from his groom, and galloping to his ancient station on the parade, after neighing aloud, dropped down and died. Many other instances could be given which show the sagacity and courage of the high bred horse.

On the return of Patrol's jockey to weigh in after that horse had won the All aged Maiden Plate at Litchfield, Eng., a short while back, he could not draw the weight, even with the addition of the bridle. The same deficiency in weight, was found to be the case with the other jockeys who rode in the race. The acting stewards of the meeting, Mr. George Graham and Mr. Bernard Gilpin, were summoned, and an inspection of the scales was then made, when it was found that some miscreant had attached a piece of lead to the weight side of the scales. When this was removed each of the jockeys brought down the beam, and thus what might have proved a disagreeable incident was avoided. This will call to mind the Cambridgeshire won by Catch'em Alive in 1863, when a somewhat similar case occurred. Upon the jockeys returning to weigh in after that race the clerk of the scales found that the rider of Catch'em Alive did not draw the proper weight. He was first weighed without a whip, and a whip was afterwards given to him, which was stated to be the one he rode with. This barely made him weight, and the owner of the second horse objected to the jockey being weighed with anything given to him after he got into the scales. The clerk of the scales requested the stewards to come into the weighing room, and they decided that a jockey not having brought his whip with him into the scale could not afterwards weigh with it, and it plainly appeared that the jockey did not draw the weight. The rider of Merry Heart had been previously weighed, and passed by the clerk of the scales, and the stewards were on the point of giving the race in his favor when the rider of Summerside was weighed, and he also was found short of weight. On this the Stewards directed the scales to be examined, when it was found that they were not correct, and that some lead had been fastened on the bottom of the weight scale. When this was removed and the scales adjusted, the stewards felt satisfied that the rider of Catch'em Alive would have drawn his proper weight if the scales had been true, and the clerk of the scales, on being questioned, having assured them that he had no doubt on the subject, the stewards declared that Catch'em Alive was the winner of the race. A reward of £50 was afterwards offered by the Jockey Club for such information as should lead to the discovery of the person or persons who had fastened the lead to the scales. It is to be sincerely hoped that the miscreant will be speedily caught and brought to condign punishment, but at the same time it looks as though there must have been very reprehensible carelessness amongst the officials of the weighing room to have rendered such a scoundrelly action possible.

A recent visitor to Nantura, F. B. Harper's grand old Kentucky homestead, says, in a wonderfully descriptive article in the Times-Democrat, that, looking through the little rifts in the foliage that resemble little leaf-bordered windows, some of which frame in interesting pictures from Nantura: "In the direction of the barns was one peculiarly effective. Closed in by a border of trembling leaves, so as to almost conceal its surroundings, was seen a long, slender, brown head, with a narrow blaze extending down to the nose. The ears are fine and thin, and pricked sharply forward, the eyes are big and bright and full of fire, while the delicate, wide open nostril speak unmistakably of a patrician ancestry. There were only the face and head to be seen, for close around it hung that border of trembling leaves, making it look like a medalion portrait surrounded by a laurel wreath, but had that face been seen in Hong Kong instead of Nantura, no horseman could have believed that it was other than Longfellow. Through another of these little foliage-bordered windows could be seen a handsome monument of white marble, which bears the following inscription:

TEN BROECK,
Bay Horse,
Foaled on Nantura
Stock Farm,
Woodford County, Ky.,
June 29, 1872,
Died
June 28, 1887.
Performances:

1 mile	1:39¾
1⅛ miles	2:49¼
2 miles	3:27¼
2⅜ miles	4:58½
3 miles	5:26½
4 miles	7:15¾

The great attraction for visitors is that superb old sire Longfellow, and to see such a horse is well worth a pilgrimage to Nantura. Though his long career on the turf and in the stud has left its traces in his outline and general make up he is still a splendid looking horse. Altogether he is probably one of the rangiest thoroughbreds ever prominent on the American turf. He is a rich brown with a narrow blaze. He has a long, lean head, beautifully shaped and full of high quality in every point. His neck is very long, highly arched and muscular, but by no means massive or clumsy. He is very deep through the heart, his chest is broad and full, and his shoulders rangy and oblique. His body has great length, and though his back is considerably swayed, as might be expected, the admirable cylindrical form of his barrel is still admirably preserved. His back is possibly a shade too long, and his loin is not quite as good as the rest of his make-up, though this is partially attributable to the fact that his back has been considerably swayed by his many years of stud service. Back of the loin it would be hard to find a fault with Longfellow. He has the rangy and shapely quarters and the long high croup of the Leamingtons, beautiful and massive stifles, strong clean hocks set close to the ground, short cannon bones and long elastic pasterns. Despite his age his limbs between the knee and fetlock are broad, clean and flat as a knife blade; and, in short, he is a beautiful race horse, of immense size and range and exceptionally high quality. His pedigree is as follows:

Longfellow, brown horse foaled 1867, bred by Mr. John Harper. By imported Leamington.
First dam Nantura by Brawner's Eclipse.
Second dam Quiz by Bertrand.
Third dam Lady Fortune by Brimmer.*
Fourth dam Woodpecker's dam by imp. Buzzard.
Fifth dam The Faun by Craig's Alfred, etc.

Some contend that this Brimmer was a quarter horse, or at all events an animal of obscure breeding, while others are of the opinion that Lady Fortune's sire was a thoroughbred horse called Blueheard. As Longfellow himself was a thoroughly first class race horse in every respect, and as Nantura also threw such good ones as Fanny Holton (the dam of Ten Broeck) by Lexington and Extra by Endorser, it is hard to believe that her grand dam was by a cold-blooded quarter horse. Extra, however, never sired a foal that developed into anything resembling a race horse. Fanny Holton, besides Ten Broeck, produced Lyttleton, a horse that showed exceptionably high racing form, to imported Leamington.

Mr. Frank Harper laughs at the quarter-horse theory, and says that Lady Fortune's dam was the thoroughbred Blueheard, who had, for some reason, been nicknamed Brimmer,

AUSTRALIAN RACING NOTES.

Little Bernie Wins Two Rich and Historical Handicaps.

The recent Sydney papers have a full account of the great race for the Metropolitan Handicap, won by Little Bernie, a son of Dr. Ross' Cheviot and Myrtle by Gemma di Vergy. He also won the Sydney Handicap during the same week. At the Hawkesbury meeting, September 6th, he ran second to the Queensland colt, Megaphone, for the rich Hawkesbury Handicap, in the fastest mile and a half ever run south of the Equator. As Megaphone was likely to incur a ten pound penalty in the Melbourne Cup if he won the Metropolitan, he was scratched shortly before the race, to the intense disgust of the bettors. The race was a very fast one, and Little Bernie won in 3:31, the fastest two miles ever run at Randwick.

The Metropolitan was founded in 1866, and won by Bylong, with the afterwards famous stallion Yattendon a good second. Bylong carried 76 pounds, while Yattendon had 128 on him and Tim Whiffler 126. In 1868, it was won by The Barb, carrying 136 lbs. and Tim Whiffler was second with 120. The next heaviest weight carried by a winner was by Abercorn in 1889, when he put up 133 lbs. and did the 2 miles in 3;35½, being five-years-old. The next heaviest was by Sir Modred, who won it in 1884, and carried 122 lbs., covering the distance in 3;34½. The Pontiff by the Drummer, carried 88 pounds and did the trick in 3;31½. We append a summary of the race:

SUMMARY.

Metropolitan Stakes, a handicap sweepstakes of 20 sovs., with 1,000 sovs. added. Second horse 200, and the third 100 sovs. from the prize. A winner of any handicap race after the declaration of the weights to carry 5 lbs. extra; of any such race of the value of 200 sovs. 7 lbs extra; of any such race of the value of 500 sovs., 10 lbs. extra. Two miles.

Mr. J. Abraham's b h Little Bernie by Cheviot—Myrtle, 4 years, 6st 11 lbs. (including 5lb. penalty ....E. Schaefer 1
Mr. J. Allsopp's ch h Papua by Guinea—Roma, 6 years, 7st 2 lbs ....J. V. Warden 2
Mr. John Mayo's h m The Queen by The Drummer—Black Swan, aged, 8st 6lb....J. Phœnix 3

Antæus, 4 years, 114 lbs.; Ellerdale, 5 years, 106 lbs; Vespasia, 6, 105; Bungebah, 5, 114; Eclipse, 5, 102; Paris, 3, 94; Federation, 4, 94; Frisco, 6, 92; Pretty Kate, 4, 88 and Retford 3, 84, ran unplaced.

Betting—2 to 1 v Bungebah, 3 to 1 v. Little Bernie, 6 to 1 v. The Queen 10 to 1 v. Federation, 12 to 1 v. Frisco, 14 to 1 v. Vespasia, 17, to 1 each v. Ellerdale and Papua, 20 to 1 each v Eclipse and Paris, 25 to 1 v Antæus 30 to 1 v. others. Time, 3:31.

We give below a table of the winners of this stake since 1880.

THE METROPOLITAN STAKES—2 miles.

Yr.	Horse	Pedigree.	Age	Time.
1880	The Pontiff	The Drummer—The Nun	4	3 31 6-10
1881	Hesperian	Yatiendon—Jessie Bell	5	3 32 4-10
1882	Masquerade	Drummer—Romping Girl	a	3 33
1883	The Gem	Kelpie—Idea	5	3 36½
1884	Sir Modred	Traducer—Idalia	a	3 34½
1885	Acolyte	Newminster—Nightingale	4	3 31½
1886	Bohemian	Marihyrnong—Nina	5	3 31½
1887	Cardigan	Goldsbrough	5	3 38½
1888	Lamond	Newminster—Axiom	5	3 37½
1889	Abercorn	Chester—Cinnamon	5	3 36½
1890	Little Bernie	Cheviot—Myrtle	4	3 31

The Oaks was won by Prelude, daughter of that "old reliable" Martini Henry. She sold for 1,500 guineas at Mr. White's sale last spring, and has doubtless been "won out" already, as she annexed the Hawkesbury Guineas two weeks previously.

A. J. C. Oaks of 20 sovs each, 5 ft., with 300 sovs. added. For three year old fillies, 8st. 10lb. The owner of the second horse to receive 50 sovs. from the prize, and the owner of the third to save his stake. One and one-half miles.

Mr. V. Dowling's b f Prelude by Martini Henry—Phillina....E. Power 1
Mr. T. Lamoud's b f Emmie by Robinson Crusoe—Olga....R. Ramage 2
Hon. D. S. Wallace's blk f Wilga by Imp Epigram—Nellie....J. Gilnsford 3
Mr. H. C. White's b f Venspa by Martini-Henry—Formosa....R. Ellis 0

Betting: 2 to 1 on Prelude, 5 to 1 each v. Emmie and Wilga, 6 to 1 Venapa.

The Spring Maiden Stakes fell to the lot of a very handsome colt, Ethelbert, owned by William Gannon, whose name has long since become famous by the victories of Arsenal, Australian Peer and Melos.

Ethelbert was bred at Tocal by Frank Reynolds and is one brother to that capital mare Ellerdale who won the Hawkesbury handicap of 1889. Camden, a very handsome four-year-old son of Sir Modred, was beaten less than a length for third place.

Spring Maiden Stakes, a sweepstakes of 5 sovs. each, 1 foot, with 200 sovs. added; second horse 50 sovs. from the prize. For maiden horses. Weights, 3 years, 7st., 9lb; 5 years and upwards, 8st. 9lb. 1¼ mile.

Mr. Gannon's br c Ethelbert, by Goldsborough—Ethel, 3 years, 7st., 9lb....M. Harris 1
M. John Mayo's bl c Master Grand, by Grandmaster—Black Swan, 3 years, 7st., 9 lb....James Gough 2
Mr. J. McLaughlin's b c Norbett, by Goldsborough—Lady Laura, 3 years, 7st., 9lb....R. Ellis 3

Camden, 4 years, 119 lbs; Moonette, 4 years, 114 lbs; Gold Fleece, 3 years, 102 lbs, and Bradley, 3 years, 107, ran unplaced.

Betting: 5 to 4 on Ethelbert, 5 to 1 v. Bradley, 7 to 1 each v. Camden and Master Grand, 10 to 1 v. Norbert.

The Derby showed a decided rush to get the public money on Titan, the great cowhocked gelding, for whom Plunger Brodribb paid $26,000 last April. But the big fellow was short of work as was also Gatling, and the race fell to Mr. Harry Dangar's Gibraltar. We append a summary:

A. J. C. Derby, a sweepstakes of 30 sovs. each, 5ft. with, 500 sovs. added. For three-year-olds. Colts, 8st. 10lb.; fillies, 8st. 5lb.; geldings at the time of starting allowed 5lb. The owner of the second horse to receive 100 sovs. from the prize, and the owner of the third to save his stake. One and one-half miles.

Hon. H. C. Dangar's ch c Gibraltar by Grandmaster—Algeria ....T. Nerricker 1
Mr. W. Gannon's ch c Gatling by Nordenfeldt—Petroleuse ....M. Harris 2
M. D. O'Brien's b c Whimbrel by St. Albans—Curlew..J. V. Warden 3

Titan by Chester—Tempe; Paris by Grandmaster—imp. Enone; Victor Hugo by Chester—Kathleen; and Bradley by Goldsbrough—Queen's Head, ran unplaced.

Betting—Even money on Titan, 4 to 1 v. Gibraltar, 8 to 1 v. Paris, 10 to 1 v. Gating, and 20 to 1 v. the others. We append the winners since 1880 to date inclusive:

A. J. C. DERBY—1½ MILE.

Yr.	Horse.	Pedigree	Time.
1880	Grand Flaneur	Yattendon—First Lady	2:45 1-5
1881	Wheatear	Epigram—Wheatsheaf	2:52
1882	Navigator	Robinson Crusoe—Cocoanut	2:42
1883	Le Grand	Epigram—Legend	2:46½
1884	Bargo	Marioyrnong—Guelder Rose	2:42½
1885	Nordenfeldt	Musket—Onyx	2:47¼
1886	Trident	Robinson Crusoe—Cocoanut	2:38
1887	Abercorn	Chester—Cinnamon	2:39½
1888	Melos	Goldsbrough—Melody	2:46
1889	Singapore	Martini-Henry—Malacca	2:44
1890	Gibraltar	Grandmaster—Algerian	2:39

The Craven Plate, always memorable among fixed events for the sensational defeat of Malua by Sir Modred, brought out the mighty Carbine for the first time this season, with "odds on" at 7 to 4. Megaphone ran a capital race, but the giant was never in trouble. Cuirassier could get no better than third and Cardigan, the handsomest horse in New South Wales, did not get a place. We append a summary:

The Craven Plate—A sweepstakes of 10 sovs. each, with 500 sovs. added; second horse 100 sovs. from the prize. For three years old and upwards. One and one-quarter mile

Hon. D. S. Wallace's b h Carbine by Musket—Mersey, 5yrs, 9st 4lb. ....R. Ramage 1
Mr. C. E. Brown's b c Megaphone by Newbold—Sound, 3yrs., 7st. 9lb....M. Ryan 2
Messrs. R. and R. Duder's br h Cuirassier by Musket—Frailty, 5yrs, 8st. 4lb....John Kean 3
Mr. James Chambers' ch h Cardigan, aged, 9st. 4lb....R. Ellis 0

Betting—7 to 4 on Carbine, 7 to 4 v. Megaphone, 20 to 1 v. others.

CRAVEN PLATE—1¼ MILE.

Yr.	Winner	Pedigree.	W't. st	lb	Time m.	s.
1880	Sweetmeat	Yattendon—Suliana	9	4	2:12	5-10
1881	Wellington	Panic—Frou Frou	9	4	2:13	4-10
1882	Sting	Grandmaster—Queen Bee	9	0	2:13	
1883	LeGrand	Epigram—Legend	7	11½	2:14½	
1884	Sir Modred	Traducer—Idalia	9	4	2:10½	
1885	Nordenfelt	Musket—Onyx	7	9	2:11½	
1886	Trident	Robinson Crusoe—Cocoanut	7	9	2:10½	
1887	Trident	Robinson Crusoe—Cocoanut	9	0	2:12	
1888	Abercorn	Chester—Cinnamon	9	0	2:19½	
1889	Abercorn	Chester—Cinnamon	9	4	2:11	
1890	Carbine	Musket—Mersey	9	4	2:	7

Notwithstanding the victory of Little Bernie in the Metropolitan Stakes, it was with the greatest reluctance that the public, four days later, could be induced to accept him as the conquerer in the trial stakes, but he went out and won with 120 pounds almost as easily as he had done in the Metropolitan. He went out and beat a field of thirteen starters without a struggle.

The Trial Stakes, a sweepstakes of 5 sovs. each, 1 foot, with 200 sovs. added. For three years old and upwards which have not won a prize exceeding 100 sovs. in value up to the time of entrance. A winner of such prize hereafter to carry 10lb. extra.

Weights—three years old, 7st. 12lb; four years, 8st. 8lb; five and upwards, 8st. 10lb. Second horse 50 sovs. from the prize. 1¼ mile.

Mr. J. Abraham's b h Little Bernie, by Cheviot—Myrtle, 4 years, 8st. 8lb....Gallagher 1
Mr. J. Monaghan's ch h Clonard, by Newminister—Queen of the Anglers, 4 years, 8st. 8lb....M. Harris 2
Mr. J. Northern's b g Plaudit, 3 years, 7st, 8lb....J. Gilnsford 3

Ten others ran unplaced. Betting: 3 to 1 v. Little Bernie, 4 to 1 v. Cobham, 8 to 1 v. Plaudit, and 10 to 1 v. any others.

On the last day, Little Bernie scored his third victory for the week, carrying 116 pounds to Megaphone's 130. With all this difference of weight in a mile and a half, the money poured in like water on Megaphone. Five to one against Papua and Little Bernie was written for hours by the House of Bondage, and still the demand for Megaphone kept the other two back where they opened. Bernie won by two lengths with Claremont a neck in front of Papua. Time, 2:38.

SUMMARY.

Sydney Handicap, a handicap sweepstakes of 5 sovs., each 1 ft., with 500 sovs. added. For three years old and upwards. Second horse 100 sovs. from the prize. One mile and a half.

Mr. J. Abraham's b h Little Bernie by Cheviot—Myrtle, 4 years, 8st 2lb....M. Gallagher 1
Mr. J. Burton ns b h Claremont by Gemma de Vergy—Miss Emma (imp.), 5 years, 6st 2lb....J. Delaney 2
Mr. J. Allsop ns ch h Papua by Guinea—Roma, 6 years, 7st 10lb ....J. V. Warden 3

The following horses ran unplaced; Megaphone, Lancer, Marlo, Eveline, Yellowstone, Barbara, Federation, Sligo, Locksley, Frisco and Southerly Buster.

Betting: 5 to 2 v. Megaphone; 5 to 1 each v. Little Bernie and Papua, 7 to 1 v. Vespasia; 12 to 1 v. Frisco; 18 to 1 each v. Sligo, Marlo, Claremont and Lancer; 20 to 1 v. others.

Second Foal Stakes, of 20 sovs. each, 5ft., with 400 sovs. added. For three years old. Colts, 8st 10lb; fillies 8st 5lb; geldings at time of starting allowed 5lb. The winner of any race (not a handicap) of the value of 100 sovs. to carry 3lb; of 300 sovs., 5lb; of 500 sovs., 7lb; of 1000 sovs. 10lb extra. The owner of the second horse to receive 50 sovs., and the breeder of the winner 100 sovs. from the prize, and the owner of the third horse to save his stake. One mile and a quarter.

Hon. H. C. Dangar's ch c Gibraltar by Grandmaster (imp.)—Algeria (imp.), 9st 3lb, including 7lb penalty....T. Nerricker †1
Mr. W. Gannon's ch c Gatling by Nordenfeldt—Petroleuse (imp.) 8st 10lb....M. Harris †2
Mr. V. Dowling's b f Prelude by Martini-Henry—Phillina (imp.), 8st 10lb, including 5lb penalty....D. Bowes 3

†Dead heat.

Gresford, Argos and Ethelbert ran unplaced.

Betting: Even money on Gatling, 3 to 1 v. Gibraltar; 7 to 2 v. Gresford; 10 to 1 v. any other.

Betting (on run off): 5 to 4 on Gibraltar.

The Suburban Handicap brought out a field of twenty-three starters, Hurrah being favorite at 5 to 1. The distance was seven furlongs which he covered in 1:29 with 116 lbs., that good mare Ellerstene running up to his saddle. Alchemist was a good third. The race was one of the finest contests ever seen at Sydney.

SUMMARY.

Suburban Handicap—A handicap sweepstakes of 5 sovs. each, 1ft., with 700 sovs. added. For three-year-olds and upwards. Second horse 50 sovs. from the prize. Lowest weight 7st. Seven furlongs.

Mr. William Merthyrs' b h Hurrah by Marvellous—Queen Bee, 4 years, 8st 4lb....Jas. Gough 1
Mr. E. Chippendall Jr.'s b or br m Ellerstene by Goldsbrough—Ethel, 4 years, 7st 8lb....C. Pearson 2
Mr. W. E. Royd's br h Alchemist by Sardonyx—Peniteut, 4 years, 8st 10lb....W. Williams 3

The last race of the meeting was for the Randwick Plate, three miles, which was even by Melos in 5:36, the last two miles being done in 3:32½, a good race for a five-year-old horse carrying 132 pounds. The Epsom Handicap fell to Bungebah, with Megsphone second. Twenty-nine horses ran. The Grandmaster stock and the Musket family seem to have driven the once victorious Chesters to the wall completely as Chester did not have a single winner at either this or the Hawkesbury meeting. The famous Dreadnought, winner of the Australian Cup has gone amiss so far as to be struck out of all his Caulfield and Flemington engagements. Titan has shown none of his old-time speed, and is rated below Gatling for the Victoria Derby; and Aberoorn, the most famous of all the Chester family, has gone to the stud.

Condition powders—the best in the world is Simmons Liver Regulator.

The American Trotting Association.

The following persons and horses are suspended for nonpayment of entrance and other causes, viz:

Oct 2nd, 1890 By order of the Holes Co. Agricultural Society, Millersburg, Ohio.

C. F. Essburn, Shreve, Ohio, and b g George S. Hall.

Oct. 3rd, 1890. By order of the Kansas City Exposition Driving Park, Kansas City, Kan.

R. L. Bowles, Palmyra, Mo., and br m Mollie B.
B. J. Moore, Dunlap, Iowa, and ch h Golden Wing.
L. A. Gray, Topeka, Kan., and gr g Ensign (pacer).
Frank Fellows, Kansas City, Mo., and br h Ben Wright.

Oct. 4th, 1890. By order of the McHenry Co. Agricultural Board, Woodstock, Illinois.

George Earring, Richmond, Ill, and b h Ospery.

By order of the Boulder Driving Club, Boulder, Colo.

M. E. McKercher, Denver, Col.

By order of the Hillsdale Co. Agricultural Society, Hillsdale, Mich.

Dr. B. Hagerly, Montpelier, Ohio, and - h Tylee.

By order of the Dane County Agricultural Society, Madison, Wis.

John Kelly, Janesville, Wis, and b m Charley H.
J. Murphy, Chicago, Ill, and gr g Frank L.
W. S. Parson, Westfield, Wis, and h m Katie S.
W. S. Jones, Westfield, Wis., and b m Michigan Girl.

By order of the Pittsburg Driving Park Association, Pittsburg, Kan.

H. N. Spener, Carthage, Mo., and b h Prairie King.

Oct. 4th, 1890. By order of the Kankakee Driving Park Association Kankakee Ill

Bringham Bros., Goodland, Ind., and br h Rebate.
C. E. Robinson, Kentland, Ind., and br h Rebate.
J. C. Decker, South Bend Ind., and b h Inventor.
Ben Stanley, Detroit, Mich., and b g Cæsar (pacer).
Bert Crawley, Peoria, Ill., and b g William J. (pacer).
G. A. Fitch, South Bend, Ind., and ch m Betty K.

Oct. 4th, 1890. By order of the Edinburg Fair and Trotting Association, Edinburg, Kan.

Chas. Cole, Anrora, Ill., and b m Nannie Mc (pacer).
Chas. Ousler, Bloomington, Ind., and ch g Cap (pacer).
F. O. McGinnis, Danville, Ky., and ch m Hettie Mc.
Frank Clark, Columbus, Ind., and b m Elsie Wood.
Morrison & Phillips, Shelbyville, Ind., and b h Samuel A.
J. L. Fisher, Huntington, W. Va., and b g Dan D. (pacer).

October 6, 1890.—By order of the Montgomery Co. Union Agricultural Society, Crawfordsville.

Geo. W. Scott, Haughsville, Ind., and John P. (pacer), Indiana.

By order of the Whitewater Driving Association, Whitewater, Wis.

L. Bronson, Blaine, Ill., and br m Little Dollie.
J. F. Ryan, Rockford, Ill, and gr - Grayman.
J. F. Ryan, Rockford, Ills, and b - Rattan.

By order of the Douglas Co. Agricultural Society, Alexandria, Minn.

Amos Wilson, Motley, Minn., and gr m Lady Selkirk.
J. C. Murphy, Fergus Falls, Minn., and b g Charlie.
Jas Matthews, Grand Forks, No. Dak., and b m Iolantha.
The b m Hallie (runner), suspended for season of 1890.
O. Wilson, Motley, Minn., and br g Wiggler, expelled.

September 29, 1890.—By order of the Decatur Trotting Association, Decatur, Ill.

Isaac G. Clark, Indianapolis, Ind., and ru g L. B. Curtis (pacer)

October 9, 1890.—By order of the Richland Co. Agricultural Society, Mansfield, Ohio

E. P. Coulter, Mansfield, Ohio, and ch m Queen Stilson.
J. B. Picking, Spring Mills, and blk h Black Prince.
E. A. Blecker, Mansfield, Ohio, and — Darlington.

October 10, 1890.—By order of the Bay Co. Agricultural Society, Bay City, Mich.

O. S. Ortman, Elmore, Mich, and ch m Nettie.

By order of the Mahoning Co. Agricultural Society, Youngstown, Ohio.

A. L. McMillan, Salem, Ohio, and b m Lady May.
B. Walters, Minerva, Ohio, and blk h Nigger Doctor Jr.
B. Walters, Minerva, Ohio, and b m Maiden Blush.
J. R. Roderick, Warren, Ohio, and br g Doctor W.
Sam Grove, Beaver, Penn., and b g Rainbow.

By order of the Tri-Co Fair Association, No. Manchester, Ind.

L. Catlin, Napoleon, Ohio, and br g Elmer.

By order of the Southern Kans. Fair Association, Wichita, Kans.

J. S. Malernee, Belle Plains, Kans., and b h Charley Foster (pacer).
B. O. Shank Emporia, Kans., and b h Scott Wilkes (pacer).

By order of the Dowagiac Union Fair Dowagiac, Michigan.

John C Decker, South Bend, Ind, and b h Inventor.
Jos Brown, Meaha, Wis and b g Pat Murphy (runner), suspended by order of the member at Meadville, Pa
W. R. Kendall, Portage, Wis., suspended by order of the member at Eau Claire, Wisconsin.
D. A. Hosmer Clinton, Mo., and b h Sam P., suspended by order of the member at Nevada, Mo.
C. V. Townley, Olathe, Kans., and b b Lee Elector, suspended by order of the member at Cameron, Mo.
B. C. Vanderberg, Dodge City, Kans., suspended by order of the member at Council Grove, Kans
O. Robertson, Topeka, Kans., and b m Bay Minnie, suspended by order of the member at Emporia, Kans.
H. C. Smith, Lincoln, Neb., and Gypsy Bee (pacer), suspended by order of the member at Kahoka, Missouri.
E. W McGinnis, Rockport, Pa., and — h Joe Bluffer, suspended by order of the member at Youngstown, Ohio.
————, The b m Hostess, suspended by order of the member at Wymore, Nebraska
Frank Dally, Auburn, Neb., and blk g Ben B. McMahon, suspended by order of the member at Shenandoah, Iowa.
B. B. Hoadley, Brownville, Neb., and blk g Ben B. McMahon, suspended by order of the member at Brownville, Neb.
J. P. Stoneroad, Wichita, Kans., suspended by order of the member at Terre Haute, Indiana.
E. Marsh, Pleasant Hill, Mo., and b m Evenway (pacer), suspended by order of the member at Sedalia, Mo.
Jos. A. Wilson, Marion, Kans., and b h Free Trader, suspended by order of the member at Hutchinson, Kansas.
F. M. Ward, Webb City, Mo., and blk m Bessie Young (pacer), suspended by order of the member at Topeka, Kans
J. C Steward, Webb City, Mo., and blk m Bessie Young (pacer), suspended by order of the member at Topeka, Kans.
Milt. Engel, Fergus Falls, Minn., and blk m Lady Selkirk, suspended by order of the member at Alexandria, Minn.
Ed Davis, Beatrice, Neb., and b m Minnie P., suspended by order of the member at Wymore, Neb.

A Horse's Hoof.

The hoof of a horse resembles a piece of leather full of pores. Soaked in water it becomes soft, but when the water dries out it is harder, shrunken and more apt to crack than before. This accounts for the bad results from constant packing and soaking of horse's feet. If you don't think Campbell's Horse Foot Remedy will do your horse's feet good, try it on an old boot two or three times.

You feed, water and clean horses to keep them in good order. Why neglect their feet, without the proper use of which they are worthless? Campbell's Horse Foot Remedy will prevent as well as cure all ailments of the feet. Every horse owner should insist on its use. It will save time, labor and money, all the trouble of packing and soaking, and give much better satisfaction. Horses will drive freer, do more work and do it easier and last longer.

WARREN PARK FARM, TERRE HAUTE, Ind., July 15th, 1888.

JAS. B. CAMPBELL & CO.

GENTLEMEN—I ordered a five gallon can of your Horse Foot Remedy last winter, and used it freely on my horses' feet. I believe it to be the best thing I have ever tried, and I shall never be without it in my stable hereafter. I advise all horse-owners to give it a trial.

Very truly, W. P. IJAMS.

Mr Ijams is a gentleman equally as well known for his honest, conservative methods as his standard-bred horses and registered Jersey cattle, and would not endorse an article unless fully satisfied of its merits.

THE FARM.

Effects of Food on Dairy Products.

From an article by E. F. LADD in Country Gentleman.

The influence of food on the composition and quality of butter is a question that has been much discussed in the agricultural papers, and to some extent in scientific journals, yet we have almost no experimental data upon this subject. In a brief contribution at this time, I will endeavor to point out what has been accomplished at your State Experiment Station at Geneva, and the field of work I was engaged upon during the last two years of my connection with the station, and from which I had hoped to secure results that would in the end be of practical value to dairymen.

Few questions can be more complex than those we have to deal with in the study of the effect of the food on the composition of butter, and no definite conclusions can be drawn until a large number of experiments have been made under all the varying conditions with which physiological chemistry must deal. The experiments at the station were upon five animals—three Jerseys and two native or no breed cows, and the results have all pointed in one direction, but not always with the same marked force.

I shall draw attention only to those foods specially investigated, namely, hay of mixed grasses, corn meal and its by products, wheat, bran, cottonseed meal, linseed meal and oats. While considering each food separately, I may also note the influence on the total yield of milk and butter fat.

Hay.—This was a mixture of timothy, orchard grass, redtop, etc. The minimum quantity of milk and butter was produced on hay alone, and the addition of any of the grains at once increased not only the milk yield, but the butter fat as well. The quality of the butter made while hay alone was fed, was poor being exceedingly light colored, and early became rancid. We must not, however, judge too hastily of the influence of a food, for in some cases nearly or quite two weeks are required before the marked characteristics are manifested in the quality of the butter.

Corn Meal.—The addition of corn meal to the hay ration has always resulted in increasing considerably the flow of milk over hay alone. Two cows receiving hay *ad libitum* produced of milk per day, No. 1, 111 oz., and No. 2, 157 oz. When to this ration was added 8 lbs. of corn meal per day, the milk yield increased to, No. 1, 168 oz. and No. 2, 171 oz. We should bear in mind that this experiment was made when the cows were well along in period of lactation, and therefore would not respond so readily to feed.

The fat in the milk did not increase in proportion to the yield of milk, for cow No. 1. under hay feed furnished 8.7 oz. of fat per day, and a proportionate increase of fat to the milk. When corn meal was fed she would give 13.1 oz. per day, but in reality only 10.4 oz. per day was secured. Cow No. 2 gave, under hay, 8 8 oz. of fat per day, and with corn meal 9.1 oz. instead of 10.9 oz., proportionate to the increase in milk. The butter under corn meal feed was firm, good color and fine flavor; chemically it differed little from the butter made under hay alone, yet its appearance was markedly different, its quality vastly superior, and its aroma what is popularly demanded.

Gluten Meal.—This feed, when fed judiciously, has always increased the milk yield more than any other single grain fed; but there is one interesting feature, that, should it prove true for the majority of cows, is worthy of consideration—while the yield of milk was much increased, the total fat fell off considerably. With hay *ad libitum*, 6 lbs. corn meal and 2 lbs. wh at bran, the yield of milk was 308 3 oz; total fat, 19 20 oz, Substituting gluten meal for corn meal and we have: Hay *ad libitum*, 6 lbs. gluten meal and 2 lbs. wheat bran—milk yield, 335 oz; total fat, 17.72 oz. Thus while the milk per day was increased 26.7 oz., the fat fell off 1.48 oz. In this we have an illustration of how food may increase the milk without any increase in butter. The quality of the butter produced under gluten meal feed was inferior to that when corn meal was fed. Dry feed, another by-product from corn in the manufacture of starch, was quite similar in its influence to gluten meal, but to a less degree it affected the milk.

Wheat Bran.—In the experiments at the station, while wheat bran has been a good milk producer, yet when fed without other grain it has been found on the whole inferior to corn meal, but in combination with other grain foods it has given better results than when fed alone. The butter was inferior to that produced under corn meal, being much lighter colored, not so good grain and containing a less per cent. of olein, as judged by the iodine absorption.

Cottonseed Meal.—I do not feel warranted in saying very much in regard to the influence of this food on the quality of the butter as the experiments are too limited. In general the butter fats have been increased by feeding a moderate quantity of cottonseed meal. The butter has been excellent in appearance, in firmness about what is demanded in the markets, of good grain and a high melting point.

Linseed Meal.—Of all foods thus far experimented with, linseed meal has proved itself the greatest butter producer. The milk yield will invariably fall off when we have substituted linseed meal for corn meal, but the fats have increased, thus producing a larger yield of butter. As an illustration, in one experiment in the first period there was fed hay, corn meal and wheat bran with the following results: Milk per day, 20 lbs. 7 oz; milk for 1 lb. butter, 21 3 lbs.; butter per day, 15.4 oz.; per cent. of water in butter, 12.79.

In the second period linseed meal was substituted for the corn meal, otherwise the ration was the same as in period one: Milk per day, 20 lbs. 1 oz.; milk for 1 lb. butter, 16.2 lbs.; butter per day, 18 5 oz.; per cent. of water in butter, 12.65.

A slight falling off in milk, but 5.1 lbs. less milk required for a pound of butter.

Again, let us examine another case from the chemical composition of the milk. A native cow fresh in milk received per day for two periods as follows:

	First Period. lbs.	Second Period. lbs.
Hay	15.0	19.0
Corn meal	8.0	2 0
Linseed meal	0.0	5.0

The total milk and butter fat per day averaged as follows:

	Milk per Day. oz.	Total Fat per Day oz.
Period 1	464	20.24
" II	432	22 43

The two trials cited are the most marked, but the results have always pointed in the same direction in the trials at Geneva for the past two years.

The quality of the butter made under linseed meal feed was not such as to recommend it to the lover of good sweet butter. The butter was soft, white and oily, and without the fine flavor and aroma so much talked about. The chemical composition of the fats seemed to be changed, and this butter contained 3 5 per cent. more olein than the corn meal butter, if we accept the iodine absorption as a measure of the olein.

Oats.—Substitution oats for gluten meal the milk yield fell off 55.3 oz. per day, while the butter fat remained almost the same averaging for ten days 0.7 oz. or less. Had the oats preceded the gluten meal, I think we should have had results more favorable. The quality of the butter under a grain feed of oats was exceptionally good but a little crumbly. In color it ranked first.

From observation of the butters, and from the chemical composition of the butter fats, I should grade the quality of the butter, as found in these experiments, as follows:

Yield—1st, linseed meal; 2d, cottonseed meal; 3d, corn meal; 4th, wheat bran; 5th, oats; 6th, hay.

Color—1st, oats; 2d, cottonseed meal; 3d, corn meal; 4th, wheat bran; 5th, linseed meal; 6th, hay.

Grain—1st, corn meal; 2d, cottonseed meal; 3d, wheat bran; 4th, oats; 5th, linseed meal; 6th, hay.

Firmness—1st, cottonseed meal; 2d, wheat bran; 3d, corn meal; 4th, oats; 5th, hay; 6th, linseed meal.

By firmness as here used, I mean that quality of hardness fitting the butter for table use: Oats produced the hardest butter, but it was somewhat crumbly. Linseed meal gave the softest butter, and its oily nature did not recommend it as first class for the table use. These results are only given tentatively until further trials can establish the true order.

I do not wish to be understood as saying that any one particular food is best adapted to produce the highest quality of butter. In fact, the finest quality of butter was produced when several of these foods were combined in a ration and not by any single food.

From these experiments what practical deductions may be drawn? I may briefly state what seem probable:

1. That the chemical composition of foods do not always show their relative feeding value as butter producers.
2. That some grain foods increase the yield of milk without increasing the fat in the milk.
3. That gluten meal increases the milk yield over corn meal without producing an increase of butter fat.
4. That some foods diminish the milk yield but increase the butter fats.
5. That linseed meal produces less milk than corn meal, but more butter.
6. That the butter produced under linseed meal feed contains an excess of olein, therefore is soft and oily.
7. That the best butter was produced when a combination of several of these foods were fed together.

These results are given at this time since they may be of interest to those dairymen who are experimenting for themselves, and as I shall not be in a position to carry farther the work, I trust they may afford some suggestions to others who are interested in dairying.

Eastern and Western Cowboys.

"Ya'as," said the old cowman, "I've been East, been clean back to the tide water; an' I've seen some strange sights—things that strike a man from the plains as queer. There's a heap o' dif'rence 'tween things here an' the same things there."

"Take a cowboy, for instance. A man that is used to the every day 'puncher' of the range wouldn't hardly recognize the article they have back 'in the states' as belonging to the same breed."

"I never saw any of the gentry in the flesh, but their pictures are everywhere. A paper can't mention stock without ringin' in two or three likenesses of what they call cowboys. An' I should judge they were habitually on the prod and huntin' a victim."

"Their 'rig' is a paralyzer. It generally consists of a hat—sombrerer they call it—of the dimensions of an average wash tub; the same they wear pin'd up in front an' extendin' out behind like a summer kitchen. Of course they all wear long curly hair."

"Next comes the buckskin shirt an' pants, fringed and beaded all over. This is generally understood to have been done by an Indian mash. An' their boots!—well, they are something to walk around and wonder at. Twenty-inch legs, and, as if that wasn't enough, they had a kinder apron on that comes up over the knee and buttons behind."

"Naturally they had a spur to match all this gorgeousness, and it is a 'hun.' The shank is about four inches in the clear, an' on the end is hung a rowel somewhat larger than the head of a tomater can. They drag it along the ground an' it makes a furrer you could plant corn in."

"As is to be expected this apparition goes 'heeled,' and at such odd times as he hasn't got his 'gun' in his hand he wears it on his left side in a government scabbard with a flap buckled down."

"They appear to have a dialect of their own, 'say, stranger' seems to be the 'grand hailing greeting of the order."

"I used to think the old 'Lone Star' had trail some pretty snaky looking speciments on it, but they were plum civilized compared with the average cowboy of the eastern press."

"Now, just compare the outfit of the average ranch hand—one who knows enough about his business to hold a steady job—with the above. As a rule you will find him wearing a Stetson hat with a four inch brim that would't flop if the owner wanted it to, and a heavy wool shirt of some dark color that won't show dirt, maybe a handkerchief around his neck, pants or overalls worn outside of his boots as often as in 'em,' an', if he is in a bushy country, a pair of 'chaps' over these, the whole making a costume that is maybe picturesque, but gorgeous, hardly."

"As for a six shooter, not one in ten wears 'em, and the tenth man don't wear his on the left side and tied down in his scabbard. If he wants it at all, he wants it where he can get it ont and a barkin' terrible sudden."

"Of course you will occasionally run across a specimen 'rigged' out to strike terror on sight, but as a rule they are driftin' around huntin' a job, or else are kids who were weaned too young and don't know any better."

"The artists and writers in the east, in drawing their pictures of cowboys, have gone a chip or two over the limit and got 'em mixed up with the desperadoes and professional killers. No one can deny that there are bad men among the cowboys, but as a rule when one of them gets up a name as a killer, he quits 'punchin,' throws away his white hat and spurs, and drifts to the city, where he can exhibit himself, an' after awhile, if he isn't killed off, gets a steady job dealin' stud poker and lives in hope of some day going east to help elevate the drama."—Stock Grower.

American Veterinary Inspectors.

The following candid paragraph appears editorially in the North-British Agriculturist:

A great deal of feeling has been caused in certain quarters by the action of the American government in placing veterinary inspectors at London, Liverpool and Glascow, to examine and see whether the cases of alleged pleuro so frequently detected by the inspectors of the British government be really contagious pleuro or only sporadic inflammation induced by exposure. This, however, was a step which the American government was perfectly warranted in taking. That government has gone about the eradication of pleuro in a most thorough and effective way; and for several months no case has been detected outside Long Island, from which part no cattle are exported. And even in this last lurking place of the pest, no case has been detected since the middle of July. The American government, therefore, has a perfect right to examine for themselves and see whether the alleged cases found in American cattle at the landing ports were really and true contagious pleuro or not. Besides, there are some pregnant facts which show that some such action on their part was called for on the ground of justice. For one thing, the cases of alleged pleuro discovered in American cattle at the landing ports suddenly ceased on the appointment of these inspectors. For another thing, the British inspectors at Dentford blurted out to the American officials the fact that they did not expect to discover any cases of pleuro during summer weather and clearly pointed to a belief in the official mind that the pleuro so frequently detected in American cattle was only the non contagious form of pneumonia brought on by a stormy voyage across the Atlantic in the depth of winter. Besides, pleuro has never been among the American cattle landed at Glascow, where the work of inspection is in the hands of so conscientious an inspector as Professor M'Call. The cry is being raised just now that the country is to be bullied into admitting American cattle on the reports of American inspectors, who are naturally biased but, in view of the facts noted above, there is good reason to believe that American inspectors have not a monopoly of that professional bias.

Foreign Wheat Raisers.

Formerly our principal competitors in supplying Europe with wheat, were the Danubian provinces and the region about the Black Sea. But now all that is being changed. Of late years India has engaged in the production of wheat, and the British government to aid her, has spent millions of pounds sterling in constructing railways connecting with the Suez canal, by which to transport it to Europe. In like manner, Russia has largely increased her product, and is now establishing immense slaughtering and packing houses similar to ours, for beef, etc., and is spending large sums in extending her railroads for the rapid transportation of these articles in England, where she can deliver them in several days less time than we can from here. With the cold storage methods now in use, mutton and beef are being shipped in large quantities from Australia and South America, where the Argentine Republic and Brazil are fast becoming our rivals in all these products. Only recently I saw the statement also that large pork killing establishments are being established in Servia by German capital, to supply Germany with pork. As in all these countries, labor is much cheaper than with us, of course we cannot compete with them, except in so far as our inventions improved machinery, appliances and methods may tend to place us on an equal footing with their cheaper labor. Hence all must see that relief is not to be expected by any material or permanent increase in the price of our farm products unless by increased demand at home. Of course they will fluctuate, as the seasons are good or bad, and the supply great or small, but that will not change the condition of affairs.—Cor. Orange Judd Farmer.

Rules Governing Official Butter Tests.

Not long since I read an article in the Gazette by Mr. Campbell Brown in regard to butter tests of Jersey and Holstein Friesian cows, wherein he quotes part of the rules governing the tests made by the Jersey Cattle Club, and expresses a wish that the Holstein-Friesian breeders adopt the rule of the Jersey Club in order that yields be compared more satisfactorily. I think all will agree that it would be well to have a uniform rule, though really the Holstein-Friesian rule as it now stands is, I believe the stronger of the two, for the Holstein Friesian rule states that the butter "shall be of good marketable quality," while the Jersey rule states the butter shall be "ready for market." The Holstein-Friesian rule states that "after salting, the butter shall be worked free from any excess of water or buttermilk." The Jersey rule says "the butter shall be thoroughly worked." Both the Jersey Club and the Holstein-Friesian Association rules require one ounce of salt to the pound of butter. I write this in order that your readers may fully understand that the butter tests for the Holstein-Friesian Advanced Registry are made under the rules at least as stringent as those of the American Jersey Cattle Club. However, let's have a uniform rule by all means. —THOMAS B. WALES, in Breeders' Gazette.

An authority before us says: "Since the introduction of the mechanical cream separator into the Danish dairies, the industry has greatly increased. From 1883 to 1885, the export trade increased from 19,000,000 to 26,000,000 lbs., and that the export trade now reaches nearly 60,000,000 lbs. The dairy cows are curried daily; this is regarded as absolutely necessary."

The Prairie Farmer says: "The better the food with good care, which means health and good digestion, the better the outcome of the animal, either for flesh, labor, milk or wool, and also the better the manure. Hence the man who raises largely of grain, grass and clover, and feeds these to animals, reaps the greater reward of his labor. It is, in fact, diversified farming, and diversified agriculture is profitable whether a man's locality allows intensive or more superficial cultivation; for intensive farming can only be practical near centers of population."

Base Ball and Athletic Department.

The California League

GAMES PLAYED AT HOME, OAKLAND, SACRAMENTO AND STOCKTON.

STOCKTON vs. SACRAMENTO.

THURSDAY, OCT. 23RD, 1890, AT STOCKTON.

Although Perrott pitched good ball, the Stocktons gave him miserable support, thereby allowing the Sacramentos an essy victory. Harper pitched very effectively for the Senators, and Roberts in left put up a brillisnt fielding game. The runs were made as follows:

In the second inning Armstrong was given his base on balls. Fogarty's hit to Harper, who threw wild to second in an effort to catch Armstrong, who trotted to third. Fogsrty stole second. Perrott got his bsse on balls, filling the cushions. Then Harper hit Selna and forced in a run.

In the third the Sacramentos made three. Harper placed a safe one just over the pitcher's head. Goodenough sent a grounder out into left, and Hoffman's fumble allowed Harper to make the circuit, Goodenough landing on third. Roberts lined a hot one to Psche and was safe at first, but was touched out on an attempt to steal second. Bowman hit for three bags, scoring Goodenough. Fogarty's error of Stapleton's grounder allowed Bowman to score the third run.

In the fourth inning Daly was safe on an error by Wilson and got second when Pache dropped the ball thrown by Armstrong. Reitz hit to left field and, on Stockwell's foolish throw to third, Daly scored.

In the fifth inning Roberts went to third on Pache's wild throw, and scored on Bowman's second bit.

In the seventh inning the home team made another tally. Perrott, first up, hit for two bags and took third on Goodenough's error. Godar's error on Holliday's grounder allowed Perrott to score.

In the Sacramentos half of the seventh inning, Stapleton and McHale hit safely, but Godar forced Stapleton at third. Daly was hit by the pitcher and this filled the bases. Harper was given four balls, which forced in a run. Goodenough hit toward Perrott, who failed to get bis hands on the ball, as also did Fogarty and Pache until it was too late, and two more runs were added to the score of the Sacramentos.

In the ninth inning Stocktons got in the last run of the game.

OAKLAND vs. SAN FRANCISCO.

FRIDAY, OCT. 24TH, 1890, AT OAKLAND.

It was a razzle-dazzle game the Oaklands and 'Friscos put up at the Oakland grounds on this date before nearly eighteen hundred people, and the Oaklands for five innings were a "snap" for the Metropolitans. Shaw, who is generally reserved for the Oakland grounds, was in the box for the Colonels, and, as usual, his work was of a sky rocket description. He was wild and ineffective, and the 'Frisco sluggers had little difficulty in piling up ten runs in four innings. The Oaklands up to the sixth had only scored one run, but in that inning they lit onto Coughlin's curves, heavily hitting him for two singles, two sacrifices and a double. Lookabaugh was then substituted, as Speer had to retire from the game on account of receiving an injury to his finger, and Stevens was brought in from right field to do the back stop work. Coughlin was sent to Stevens' former position. The change proved to be a very disastrous one, as Lookabaugh was erratic, and through his wildness and an error, allowed three more runs for Oakland in the seventh. In the eighth, by base on balls, a hit and a stupid blunder, he allowed two more runs, which brought up the Colonels' score to nine against eleven for the 'Friscos, they having augmented their score one in the seventh. Neither side tallied in the ninth, and so the game which consumed two hours and twenty minutes, terminated in favor of the 'Friscos. The fielding in the game was clever and yellow at different intervals. Captain Ebright made a show of himself while coaching which brought down a storm of hisses from the audience. The score:

STOCKTON vs SACRAMENTO.

FRIDAY, OCT. 24TH, 1890, AT STOCKTON.

This was Stockton's day, for by timely and heavy hitting, together with rendering their pitcher, Kilroy, great support, they almost shut out the Senators. Fudger made his reappearance with the team, playing well in left, and Hoffman put up a strong game at short. Harper was again in the box for the Sacramentos, and although steady, was not so effective as on the previous day, being found for hard hits at opportune moments. In the fifth, Stockton made the first run of the game. Armstrong was safe on Daly's error, and Fogarty took his base on balls. Wilson's sacrifice advanced each a base. Fudger's ground sacrifice to right field scored both Armstrong and Fogarty. In the sixth, Holliday reached first on Stapleton's error and stole second. Hoffman took his base on balls. Stockwell reached first on Daly's excusable error. On Armstrong's triple to right center, the three scored. One more came in for Stockton in the eighth, on a wild throw. Wilson's single, Fudger's two base shot and a sacrifice by Selna gave them their last run. The Sacramentos saved themselves a shut out in their half of the ninth. Goodenough hit safely, stole second, and reached third on a poor throw from the field. Bowman's safe shot scored him. The score:

SAN FRANCISCO vs. OAKLAND.

SATURDAY, OCT. 15TH, 1890, AT SAN FRANCISCO.

Ten innings were played to settle this contest, but were not sufficient for either side to gain the requisite advantage and so at the expiration of the tenth, Umpire Sweeney called "game" on "account of darkness." There was a large crowd in attendance, and though no phenomenal plays were made, it was full of excitement from the third inning to the end. In the sixth inning, Stevens had his thumb split, which necessitated Ebright going behind the bat, Hanley to third and Speer to center. The change did not affect the playing, as all the players showed up well in their new positions. The Oaklands made four runs in the first inning on a double by Sweeney, singles by Dungan and Dooley, and Lohman's and McDonald's triples. In the third, the Friscos got three by two bases on balls, a passed ball and two safe shots. No runs were then made till the sixth, when each side scored two. Friaco got hers by a base on balls, a single by Levy and errors by McDonald and Cantillion. On Shea's and Everett's errors, McDonald's single and Cobb's sacrifice the Oaklands added their two. In the eighth they got one more by hits of Lohman and Cobb, Ebright and Isaacson's errors and a poor decision by Sweeney. The Friscos took three in the ninth on errors of Cantillion and Dooley and two hits. This gave them one run advantage, which the Oaklands tied in their half, scoring Dungan on his hit, one by Dooley and C. O'Neill's double. In the tenth, both sides went out in one, two, three order, two men of each team striking out. The game was then called as it was almost impossible to see the ball. The score:

SAN FRANCISCO.	AB	R	BH	SB	PO	A	E

SACRAMENTO vs STOCKTON.

SATURDAY, OCT. 25TH, 1890, AT SACRAMENTO.

Harper pitched his third consecutive game against Stockton last Saturday and had things much his own way, the Stocktons being unable to find his delivery with any degree of safety. Bowman caught him magnificently and threw effectively to bases. The infield showed a change, Daley being placed at second and Reitz at short, which change will undoubtedly prove a good one, it being favorable to Daly whose throwing was inaccurate from short field. Roberts was sick and Hoffman played left making a beautiful throw in the sixth inning, which nailed his man at the plate. At the bat Goodenough, McHale, Wilson and Armstrong did the best service. The Senators found Perrot when hits were most needed, winning easily. The score:

SAN FRANCISCO vs. SACRAMENTO.

SUNDAY, OCT. 26TH, 1890, AT SAN FRANCISCO.

This game at the Haight St. grounds was a disappointment in many ways to the ten thousands persons assembled. It was expected that Borchers, who was in the box for the Senators, would excel all previous efforts, as he came back from the Northwest league with a splendid record. But his work in this game was the most miserable ever seen this season. It seemed utterly impossible for the big pitcher to get the ball over the plate, as in the part of two innings he pitched, he sent five men to bases on balls, hit two others, made two wild pitches and an error, and altogether permitting seven runs. Harper was then substituted and did good work, but the game was irretrievably lost for the Senators. In the third inning, however, they developed a terrific batting streak, banging Coughlin's curves around most promiscuously. Bowman led off with a smashing home run over the left field fence. Stapleton followed with a triple to the club house. McHale pushed a corking single to left and Reitz rapped out one over the right field on which he only got two bases, as the ball striking the sheds bounded back again. This, together with Daley's long triple in the first inning clearing the bases, was almost the extent of their hitting. Lookabaugh was substituted for Coughlin with fourth, and like Harper did splendid service for the remainder of the game. As Speer and Stevens were both incapacitated from catching, Jimmy Ward, late of the Tacomas and Sacramentos, was secured. His back stop work was good, but his hitting as usual was weak. Tom Powers, the great Frisco favorite and who lately returned from Baltimore, umpired satisfactorily. The score:

SAN FRANCISCO.	AB	R	BH	SB	PO	A	E
Everett, s s	5	2	1	1	3	2	1
Hanley, c f	5	1	1	1	3	0	0
Shea, 2 b	5	1	1	2	0	2	0

STOCKTON vs OAKLAND.

SUNDAY, OCT. 26TH, 1890, AT STOCKTON.

There was a larger crowd than usual at the Stockton grounds last Sunday, who witnessed a fairly good game. The Gas towns fielded in good shape, but the Colonels hit Kilroy heavily at the right time, their three triples being a powerful factor in their victory. Carsey pitched winning ball all through. Dungan's triple in the first inning scored Sweeney, and his duplicate shot second inning sent three men over the plate. In the sixth Cantillion lined out a triple, scoring two runs. The fielding of Sweeney and Fogarty and the catching of Lohman and Armstrong were features of the game. Sweeney's errors were on the wide thrown balls from deep center to third, allowing runs to be scored. The score:

STOCKTONS.	AB	R	BH	SB	PO	A	E
Selna, 1b	3	0	0	0	11	0	1

SAN FRANCISCO vs. OAKLAND.

THURSDAY, OCT. 30TH, 1890, AT SAN FRANCISCO.

In this game the players seemed totally devoid of "ginger," both teams being weak at the bat, and evening up ten miserable and costly errors between them. The pitchers, Lookabaugh and Carsey, did not appear to good advantage, either being wild and ineffective. "Kid" Carsey's tremendous home run drive to the club house, and Levy's catch of a difficult foul were the only features of the contest. Charley Gagus umpired very satisfactorily. Each team made one in the first. Hanley forced Everett at second on his hit to Carsey, and then stole second coming home on Lohman's wild throw which Sweeney allowed to pass him. For Oakland, Sweeney's base on balls, his steal and Levy's muff at Dooley's fly gave them a tally. They scored another in the second on O'Neill's base on balls, his steal and Carsey's safety to right. The Friscos tied the score in the fourth. Stevens hit safely to center, making second on Sweeney's error. Isaacson took first on balls, Levy ditto, and Everett being hit by a pitched ball forced Stevens home. The Colonels added three in the fifth. Carsey led off with a beautiful home run. Sweeney hit to Shea and was safe on Isaacson's error. On Shea's error of Dungan's hit Sweeney made third and scored on a passed ball. Dungan followed Sweeney round the third, Dooley's sacrifice fly out scoring him. They made one more in the seventh. Sweeney was hit by a pitched ball and stole second scoring on Dooley's corking safe shot to left field. The score:

SAN FRANCISCO.	AB	R	BH	SB	PO	A	E
Everett, s s	2	0	1	0	3	3	2
Hanley, c f	5	1	0	1	4	1	0

THE STANDING OF THE TEAMS.

The past weeks' games has wrought no change in the positions of the teams, although there have been slight fluctuations in the percentages. Oakland now occupies a closer position to the 'Friscos, and Sacramento is keeping her pace steadily. Stocktons have dropped slightly, but occasionally take a game from the hay teams.

THE RECORD:—(to October 30th, inclusive).

CLUBS.	Oakland	Sacramento	San Francisco	Stockton	Games Won	Games Played	Percentage
Oakland	....	19	22	27	68	120	.567

SUMMARY.	Played	Won	Lost	Percentage
San Francisco	121	69	52	.570
Oakland	120	68	52	.567
Sacramento	119	66	53	.554
Stockton	120	37	73	.308

Professional Pick-Ups.

Harry O'Day was not reserved by Portland.

Jim McDonald still ranks third in base stealing.

Phil Knell is to pitch for the Los Angeles team this winter.

Still they come. Pop Swett returned from the East Tuesday.

Borchers late work with the Senators has been a dismal failure.

Isaacson's record is superior to Veach's, both in hitting and fielding.

Besides being a fine shortstop, long Bill Everett is said to be a great catcher.

It is quite probable that Goodenough will capture the base stealing honors.

To morrow the Oaklands and Sacramentos play and it ought to be a good game.

Unless Selna speedily gets rid of his rheumatism, his days in base ball are numbered.

Everett in trying to knock the cover off the ball has been struck out quite often recently.

The rumor that Veach and Whitehead were to play with the Vallejo team proved to be false,

It is reported that the improvements on the Seattle grounds cost something over $5,000.

McDonald leads in the vote contest with Ruhe Levy second. Tip O'Neill is now lost to sight.

Joe Cantillion will be stationed in right field next season, a position he is said to play brilliantly.

Willie Lange, whose work behind the bat took Port Townsend by storm, is back again in this city.

Pitcher Werhle of last season's Oaklands, is trying to recover $250 due him from the Wilmington team.

San Francisco is the winter Mecca for ball players, scores of whom are now turning their steps westward.

If the league intends playing their postponed games, it would be well to start in now while the weather is fine.

The week day games at Haight St. are now being called at half past two and the Friday games at Oakland, at three.

Charlie Gagus and Pete Meegan have been temporarily appointed to umpire. Vice Sweeney and Donohue resigned.

Will Carsey's home run hit to the club house in Thursday's game was one of the prettiest hits ever secured on the grounds.

A. G. Spalding, who lately returned from England says that base ball is very popular in the "tight little isle" and that its success is assured.

The players of the Spokane team are all mourning their last month's salaries which the management held ont presumably to even up losses.

Pitcher Duke of the Minneapolis team accomplished the wonderful feat of retiring eleven successive batsmen on strikes in one game this season.

McCarthy, Frisco's twirler says his arm is perfectly strong to pitch, but the rheumatism has now affected his legs so that he cannot move with any freedom.

Although the San Franciscos and Oaklands have been putting up Class A ball for the month of Octoher, neither team played an errorless game in that interval.

Lou Hardie is the latest base ball arrival from the East. Those returned within the past fortnight are Powers, Swett, Long, Sheridan, Carroll, O'Day and Hardie.

The Friscos have had more players on first base position this season than all the other teams combined. They were Sweeney, Veach, Perrier, Stevens, Ebright, Stanley and Isaacson.

Hanley has been making some of the most phenomenal catches in center lately. If "Blockers" gets his arm again, there's none will have any license to go above nim in class A of center fielders.

Jerry Hurley, who caught but eight games for Pittsburg this season ranked fifteenth among twenty three catchers with a fielding average of 903. In batting his average was 273 and rank fortieth of ninety five batsman

Fred Carroll, of the Pittsburg team of the Players' League, looks in the pink of condition. He says he will do no more backstop work, and will hereafter be seen on first base permanently. Carroll will play that position for the Los Angeles team this winter.

The following was the standing of the teams of the Pacific North West League at the termination of the season. Spokane first with .642 as percentage of victories; Tacoma second with .568; Seattle third, .510; and Portland last, winning but 25 of 92 games, a percentage of .271.

In the first ten batters, Oakland has four—Dungan, Dooley, Lohman and Dan Sweeney; San Francisco four, Ebright, Everett, Hanley and Shea; Sacramento one, Goodenough, and Stockton's only heavy hitter within the charmed circle—Cahill, has long since been released.

Stapleton, Goodenough, Harper, Hoffman and Reitz of the Sacramento team have all become Benedicts within the past two years, and although these players are all Easterners, it is decidedly complimentary to the Golden State that each chose a "Native Daughter" for his helpmate through life.

In the throwing contest of the players of the N r hWest League, which was participated in by Mills, Colga , Hnston, Peeples, Turner and Cahill, Turner, of the Spokanes, won easily, his last and best throw being 355 feet 9 inches. Harry Vaugh, of the New York (Players' League) team, holds the record, which is 134 yards 4 inches.

John Patrick Cahill was more than living the ball out in the last few games with the Portland team. White Wings is quite a "kidder," and when he talks its at a Salvator pace. He used to guy the life out of the pitchers up north, saying "Put them up the aisle and see them float away." "I can't miss them for I've got a whole barrel of base hits made to order, and I've got to unload before the season's over."

Dan Stearns, of the Kansas City team is said to be a Hebrew. He is the only one of the "chosen people" engaged in professional ball playing we believe.—Sporting Life. The author of the above must have given California the over look for we have four professional players in this State who recognize "Yom Kippur as the greatest day in the year. They are Rube and Dave Levy, Goldie (Goldstein) and Mike Fisher.

Marco Hellman's Los Angeles team will be made up as follows: Pitchers, Knell of Philadelphia and O'Brien of Brooklyn; catchers, Hardie of Boston and Milligan of Philadelphia; infielders, Carroll, Philadelphia; Lowe, Boston; Smalley, Cleveland; Burns, Chicago, and possibly Corcoran of Pittsburg; outfielders, Fogarty, Philadelphia; Tom Brown, Boston, and Bill Brown, New York Of the above Knell, Carroll, Smalley, Hardie, Fogarty and the two Browns are California players.

Speaking of the Vallejo—Santa Rosa game of last Sunday, the Vallejo Chronicle says this of Steady Pete Meegan, now umpiring for the Amateur League: "Pete Meegan umpired the game in a steady, sensible, and just manner. Mr. Meegan considers the umpire's position as an easy one to fill. He says that all one has to do is to be fair, firm and honest, and umpiring is no trouble at all. He is strictly business and has created a good impression on the Vallejo people."

Out of 48,692 guessers in the Philadelphia Press as to the winners of the Players' League championship, only 2806 chose Boston; 22,726 selected Chicago, 12,308 New York, 5,019 Philadelphia and 4,121 Brooklyn. Pittsburg was the favorite choice for tail-ender, Cleveland second. New York was the favorite for the League championship, Brooklyn, Philadelphia and Boston closely bunched, and Pittsburg had the call for the last place. In the Association, but 741 out of 48,692 named Louisville for the championship, the Columbus, Athletic and St. Louis Clubs being warm favorites.

The change of the San Francisco's batting order has not been prolific of any beneficial results. Everett is not a good man to lead off, as he is essentially a hard hitter and can't hunt, so that if he don't hit the ball he frequently strikes out. Shea was a "teaser," and his chances for getting the initial in the first inning either by bunting or on balls were always good. With reliable hitters following him a run or so in the first inning was generally likely and this in itself often wins a game. Finn would do well to return to his old batting order.

Quite a stir has been created in base ball circles by the double umpire resignation which occurred last week. On Sunday, just previous to the game, Charley Sweeney tendered President Mone his resignation, and on Wednesday Jack Donohue quietly followed the same plan. Sweeney resigned principally on account of politics, as to bring his fight for the assembly to a successful issue requires all his time and attention. Donohue's reasons are of a different character. Jack felt that he has been badly treated by a certain manager for some time past, and "the straw that broke the camel's back" was when he was unjustly charged with being drunk in the Oakland—Sacramento game of the 18th inst. Who will succeed them is not yet known, but it is quite possible that Sheridan will be secured for the remainder of the season.

While Cantillion, O'Neill, Ebright and other players are being "raked over the coals" for "actions unbecoming a gentleman on the ball field," Red Armstrong, the "royal Bengal tiger" of the Stocktons should not be over looked. This player has, on several occasions, used the most insulting language to both his own players and those of the opposing teams, a fair sample of which occurred at the Haight St. grounds Oct. 5th. It was in the fifth inning when Armstrong and Fogarty were on the third and first base coaching lines, respectively and Pache had reached first. Fogarty started him off so that he safely made second, and while playing off that bag, Levy of the Friscos ran up behind Pache, nearly catching him napping. Although it was Armstrong's place as much as Fogarty's to watch their base runner, the windy man from Stockton exploded in this fashion: "Say Fogarty, are you trying to work the grand stand over there? You'll never do it with that face though. If I fine you "ten" it will change it pretty quick and then you might be able to catch on. See!"

Some "fan" who knew of Dungan's inordinate love for flashy jewelry, played a good joke on the big right fielder in a recent game. When "Dunny" stepped to the plate in the first inning, umpire Sweeney advanced and presented him with a little blue box daintily tied up with pink ribbons, and to which was attached a neatly inscribed card bearing compliments of the unknown sender. "Dunny" smiled most gratefully to the grand stand, doffed his cap, and in order to see the more quickly just what that little jewelry box contained, struck out. The players gathered around him as he carefully untied the supposed precious token, and then there was one face in the team that looked savage enough to wipe the earth with somebody if that mischievous individual could be found, for imbedded in the velvet lining of the box was a villainous looking prize-box ring—a big, yellow piece of glass in a gaudy brass setting, and of such a counterfeit quality that even Oofty Goofty would blush to offer it for sale to a "hay seed" for a nickle.

The Amateurs.

The Santa Rosas are now almost assuredly first, and Vallejos' only chances now are to make a close second place. Third place will also be battled for in a lively fashion between the Fincks and Reports. The Allens have shown up fairly well in the past month, and although they can't get out of their rut, they will probably touch the 300 mark before the season is over. The record to date:

Clubs.	Will & Fincks	E. T. Allens	Report	Burlington	Vallejo	Santa Rosa	Games Won	Games Played	Percentage
Will & Fincks	....	4	2	2	3	2	13	27	.481

E. T. Allens	29	8	21	.276

VALLEJOS vs SANTA ROSAS.

Sunday, Oct. 26th, 1890, at Vallejo.

The Santa Rosa went down to Vallejo last Sunday and by superior hitting won a most decisive game from the Marines. There was an immense assemblage of Vallejo people present which was slightly augmented by a hundred or so Santa Rosa constitnents. Pete Meegan umpired most satisfactorily. Blondie Callen of Santa Rosa was in fine fettle and pitched out a splendid game, being touched up for only three hits and giving but a single base on balls. He was well supported at the receiving end by Pace. Baltz did not pitch his best game being hit for nine safe shots. He was steady however, sending three men to first base on balls and retiring eight on strikes. His support from the receiving end and infield was good but errors of the outfielders in the sixth inning, together with the Sonoma boys safe hitting lost the game for the home team. The Santa Rosas cinched the game in the ninth making two runs and winning amid great excitement. Pace and Callen each had two hits; Wise got in a three bagger and Reilly sent out at timely two base shot. Gimmel carried off the fielding honors making some marvellous plays and McCarthy did clever work in center. Scooney played a finished game of the initial, and McGuire, Hughes and Murdock of the Vallejos infield, did strong and efficient work in their respective positions. This game makes the pennant almost a certainty for Santa Rosa.

Vallejos.	AB	R	BH	SB	PO	A	E
McGuire, s s	4	0	0	0	2	2	0
Farrell, c	4	0	1	0	9	2	0
Hughes, 2 b	4	1	0	0	2	2	1

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
Santa Rosas	0	0	0	0	0	3	0	0	2	— 5
Vallejos	0	1	0	0	0	0	1	0	1	— 3

Earned runs—Santa Rosas—1. Three base hit—Wise. Two base hit—Reilly. First base on errors—Santa Rosas 4, Vallejos 1. First base on called balls—Santa Rosas 3, Vallejos 1. Left on bases—Santa Rosas 7, Vallejos 6. Struck out—By Balsz 6, by Callen 7. Hit by pitched ball—Bogle. Wild pitches—Callen 1. Double plays—Reilly, Hulen and Scooney. Sacrifice hit—Magnire. Passed balls—Pace 1, Farrell 1. Umpire—P. Meegan.

E. T. ALLENS vs BURLINGTON ROUTE.

Sunday, Oct. 26th, 1890, at San Francisco.

The Allens did some heavy batting in the second and fourth innings of this game, which gave them another victory. Both pitchers, Roban and Walcott, were bit freely, nine safe shots being gained off "his scissors," and ten, including three longraps, off Walcott. Roban was somewhat handicapped in his catcher, Wilds, who had a decidedly off day. On the other hand, Billy Billings caught Walcott in splendid shape. The fielding of both teams was only fair, and the majority of the errors made were at the difficult corner. Buckley led at the bat, having three hits, one of which was a triple. Cooney, Calliban, Roban and Kelly also did heavy work with the stick. Kelly and Geisbaker made some pretty catches in the outfield and this, with the first base play of Buckley and Traynor, constituted the fielding features. Buck Ebright umpired the game cleverly and impartially. The score:

Allens.	AB	R	BH	SB	PO	A	E
Saunders, s s	3	1	0	1	1	3	1
Cooney, 3 b	4	2	2	0	2	2	3
Buckley, 1 b	5	1	3	0	11	0	1
Philpot, 2 b	5	0	0	2	1	2	1
Billings, c	5	0	1	0	6	1	0
Leland, c f	4	1	1	0	2	0	1
Deane, l f	5	1	1	0	0	0	1
Geisbaker, r f	4	0	0	0	3	0	0
Walcott, p	4	2	1	1	1	3	1
Totals	39	8	9	4	27	11	9

Burlingtons.	AB	R	BH	SB	PO	A	E
Strand, 2 b	5	0	1	0	1	1	0
Wilds, c	5	1	1	0	8	2	1
Callahan, ss	5	0	2	0	0	2	1
Mulvey, r f	5	1	1	0	1	0	0
Traynor, 1 b	5	1	1	0	13	0	0
Roban, p	5	0	2	0	0	3	0

Kelly, l f	4	2	2	1	2	0	0
Totals	42	5	10	1	*26	13	6

*Philpot out for interfering with batted ball.

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
Allens	1	3	0	3	1	0	0	0	0	— 8
Burlingtons	0	1	0	0	0	1	1	0	2	— 5

Earned runs—Allens 1, Burlingtons 1. Three base hit—Buckley. Two base hits—Traynor, Roban, Crowley. Sacrifice hits—Saunders, Fitzgerald, Wilds, Callahan. First base on errors—Allens 4, Burlingtons 4. First base on called balls—Allens 4, Burlingtons 0. Left on bases—Allens 6, Burlingtons 9. Struck out—By Roban 8, by Walcott 5. Passed balls—Wilds 5. Wild pitch—Walcott. Umpire—Ebright. Scorer—Stapleton.

Amateur Short Hits.

Umpire McLaughlin is still in this city.

Leland was in center for the Sports last Sunday.

Dick Nagle and Jimmy English form a strong battery for Merced.

Batchelder, the pitcher and out fielder has been released by the Burlingtons.

Gimmel and McCarthy played a bang up fielding game for Santa Rosa Sunday.

Traynor, the big first baseman of the Burlingtons has the reputation of being a terrific hitter.

When Al Scooney appears on the principal streets in Santa Rosa, every body whistles "Dar's a new dude in town."

To-morrow will be another big day in Santa Rosa, and the Vallejos will bring up their Marine band with them again.

Billy Kennedy found it impossible to play last Sunday with the Allens, as his ankle was too weak to stand the strain.

A semi professional league is contemplated for next season which may include Santa Rosa, Vallejo, Suisun and possibly Martinez.

Elmer Smith won twenty-one of thirty games he pitched for Kansas City this season, which gives him a percentage of victories of .700.

Second basemen must surely be a "drug on the market" in amateur circles when such players as Dave Creamer and Aleck Bradley remain unsigned.

The Amateurs will finish the race in about this line—Santa Rosa first, Vallejo second, Will and Fincks third, Reports fourth, Burlingtons fifth and Allens sixth.

Jerry Denny is probably the greatest disappointment of the season, having only a batting average of .212, 25 sacrifice hits and 12 stolen bases and a *fielding* average of .888.

Callen was suffering from a badly sprained side last week but he came to this city and spent a few hours in the Hamman bath which put him in excellent condition. As a result, he pitched the game of his life.

Horace Wilds lost a valuable diamond pin at the Haight St. Grounds shortly before the game Sunday, which so worried the big brawny back stop, that he did not catch his usual game, having five passed balls.

It was quite evident from Billy Cooney's playing at third base for the Allens Sunday, that he is no longer fitted to fill the bill at the difficult corner. Billy's position is in the out field where he has few superiors in the business.

It is said that catcher Pace is not very popular with the Santa Rosa players; but he this as it may, he is an earnest, hard worker, both with and behind the bat, and the team owes much of its success to his clever performances.

Mart Devine, the bright and clever Sacramento correspondent for the Breeder and Sportsman was the president of the California Amateur League in '86. There are still many players scattered throughout the different teams in the State who played under Devines management at the Alameda, Central Park and Sacramento grounds.

Reserved Players.

The following is a list of the reserved players for 1891:

PACIFIC NORTH WEST LEAGUE.

By Portland—Thomas Parrott, W. Parrott, F. S. Buchtel, William Hassamer, William Whittaker, E. S. Breckenridge, H. E. Hulin, J. F. Cahill, Joe Schachern, August Land, Jake Stenzel, George McVey, W. B. Whitrook.

By Seattle—C. Bronghton, O. B. France, W. F. Fitzgerald, R. E. Pender, M. Zimmer, A. Fisher, G. Whitely, B. F. Snyder, P. Somers, W. S. Camp, S. Smith, P. Flaharty, J. Katz, T. Hernon.

By Spokane—E. L. Mills, W. H. Colgan, Gus Klopf, Geo. Borchers, John Huston, J. McQuirk, F. G. Ward, W. L. Peeples, Ira Phillips, A. Powell, Tom Turner, M. Polhemus.

By Tacoma—Frank W. Marsh, G. B. Stephens, J. J. Fanning, J. J. Reidy, W. Fuller, D. Van Zant, A. L. Mannassau, D. Connor, R. E. Burks, P. Wright, C. Stronthers.

NATIONAL LEAGUE

New York.—M. Welch, M. Tiernan, P. J. Murphy, J. Denny, J. W. Glasscock, C. E. Bassett, R. D. Buckley, J. H. Sharrott, A. F. Clarke, L. Whistler, J. Burkett, A. W. Rusie.

Chicago—A. C. Anson, T. E. Burns, J. J. Cooney, W. R. Wilmot, C. Carroll, E. E. Foster, W. F. Hutchinson, J. Luby, E. F. Stein, R. J. Glenalvin, M. J. Kittredge, H. Earl, T. Nagle.

Cincinnati—Latham, Beard, McPhee, Reilly, Knight, Holliday, Marr, Harrington, Keenan, Rhines, Dolan, Mullane, Clingman, Duryea.

Philadelphia.—J. Clements, W. Gleason, W. Sohriver, A. Myers, S. L. Thompson, W. R. Hamilton, R. G. Allen, E. Mayer, T. G. Vickery, Wm. T. Gray, W. A. Sunday, C. Esper.

Boston.—J. G. Clarkson, C. A. Nichols, C. W. Getzein, C. W. Bennett, C. W. Ganzel, C. M. Smith, H. C. Long, Jas. McGarr, M. Sullivan, R. E. Lowe, W. S. Brodie, T. J. Tucker.

Cleveland.—C. L. Zimmer, J. A. Sommers, E. A. Beatin, Leon Viau, Denton Young, E. E. Smith, R. J. Gilks, J. K. Virtue, W. L. Delaney, E. J. McKean, G. S. Davis, Wm. D. Smalley, W. S. Wright.

Brooklyn.—D. L. Foutz, H. Collins, G. J. Smith, G. B. Pinkney, W. H. Terry, R. L. Caruthers, T. J. Lovett, T. P. Daley, A. J. Bushong, R. H. Clark, Thomas P. Burns, P. J. Donovan, Wm. D. O'Brien.

Alleghany.—E. D. Burke, Geo. F. Miller, Guy Hecker, S. H. LaRoque, E. A. Sales, Wm. Wilson, J. P. Berger, E. H. Decker, David Anderson, Wm. Day, John F. Smith, Fred Roat. N. E. Young, Secretary.

AMERICAN ASSOCIATION.

St. Louis—J. Munyan, M. Trost, J. Stivetts, J. Neal, George Nicoll, Edward Cartwright, W. B. Fuller, C. E. Duffee, C. B. Miller, Thomas McCarthy, Joe Gerbardt, A. L. Hart.

Baltimore—C. Welch, J. McMahon, W. Robinson, P. Gilbert, W. F. Johnson, N. L. Baker, L. S. German, J. Mack, Thomas Power, G. B. Ray, G. H. Townsend, G. C. Tate, J. J. Sommers, G. W. Long.

Syracuse—Clarence L. Childs, W. McQuery, Daniel Casey, J. T. Keefe, Edward Mars, Herman Pitz, Grant Briggs, Fred Ely, Tim O'Rourke, Henry Simon, Pat Friel, C. Murphy.

Louisville—John B. Ryan, Peter Weckbecker, Edwin Bligh, E. Scott Stratton, Phil Ehret, George C. Meakin, H. F. Goodall, H. L. Taylor, T. J. Shinnick, H. H. Raymond, W. B. Weaver, Phil Tomney, C. H. Hamburg, W. V. Wolf.

Columbus—Elton Chamberlain, Frank Knauss, John Easton, John O'Connor, Henry Gastright, John Doyle, Mike Lehane, John Crooks, Charles Reilly, R. Wheelock, R. Johnson, John McTammany, John Sneed.

Toledo—W. J. VanDyke, E. L. Cushman, T. C. Nicholson, J. Peltz, E. C. Smith, Frank Schiebeck, Perry Werden, E. Rogers, C. E. Martwood, C. W. Sprague, Harry Sage, John Healy, James Welch.

Rochester—Wm. Callihan, Robt. Barr, Robt. Miller, L. Titcomb, Joseph Grim, Joseph McGuire, D. J. McKeough, Jas. Field, Wm. Greenwood, Jas. Knowles, Geo. Smith, Harry Lyon, F. C. Griffin, T. Sheffler.

Athletic—Al Sauters, Geo. Carman, R. B. Riddle, Chas. Snyder, A. Knox, E. O'Neill, J. Daily, B. Conroy, E. Green.

WESTERN ASSOCIATION.

Denver.—E. J. McNabb, Wm. M. Kennedy, C. H. Trumpy, Thos. J. Flood, Chas. L. Reynolds, Jos. H. Lohbeck, A. Park Wilson, Wm. H. McClellan, Wm. D. White, M. P. Whitehead, J. J. McGlone, Jno. Messitt, J. B. Curtis, Geo. Treadway.

Kansas City.—J. H. Manning, Jas. Donahue, J. B. Gunson, P. B. Swartzell, Jas. Conway, Frank Pears, Elmer Smith, W. W. Carpenter, Dan Stearns, Hugh Nicol, Jas. Burns, Wm. Hoover, Willard Holland.

Milwaukee.—J. J. Morrissey, Patrick Welch, A. P. Albert, T. J. Poorman, Robert J. Pettit, A. Dalrymple, A. G. Shock, Clark Griffith, Jno. Thornton, Jas. Renwick, Wm. F. Krieg, A. C. Jantzen, Robt. Westlake, Jerry Hurley.

Minneapolis.—Dan Minneban, M. W. McQuaid, F. B. Killen, C. E. Petty, Jas. Twobey, Jno. Ryn, Martin Duke, J. G. Mitchell, Jos. Miller, Jno. E. Carroll, D. E. Dugdale, Frank Day, E. J. Hengle.

Omaha.—Wm. H. Clark, Wm. Urquhart, C. H. Willis, E. H. Eiteljorg, Wm. Fagin, D. C. O'Connor, Wm. Hanraban, Jos. Walsh, E. E. Cleveland, J. J. Canavan, W. L. Works, Wm. Moran, Phil Knell, J. Newman.

Lincoln.—J. F. Macullar, John Cline, Ed. Flanagan, O. J. Patton, M. Brimblecome, D. B. Phalen, Wm. Trafiley, Wm. Hart, Chas. Hoover, Wm. Hemp, J. F. Roach.

Sioux City.—J. E. Powell, Henry Seibel, Frank Genins, R. B. Black, Wm. C. Crossley, J. Devlin, T. Brosnan, A. Shellhasse, W. Widner, H. Kappel, E. C. Glenn, Jos. Strauss, Jas. Crotty, —— Bell.

St. Paul.—J. Meekin, W. Mains, F. Schmit, F. Underwood, P. J. O'Brien, C. Abbey, Jas. Daly, J. J. McLaughlin, P. L. Murphy, M. J. Trost.

Omaha and St. Paul both claim the right to reserve Jacob Stenzel. M. J. Roche, Secretary.

SCHEDULE OF GAMES

—OF THE—

CALIFORNIA

Base Ball League,

SEASON 1890.

November 1st to November 8th.

AT SAN FRANCISCO

NOVEMBER 1.....San Francisco vs. Oakland
NOVEMBER 2.....San Francisco vs. Sacramento

AT HAIGHT STREET GROUNDS.

NOVEMBER 2.....Burlingtons vs. Will and Fincks

AT VALLEJO.

NOVEMBER 2.....E. T. Allens vs. Daily Reports

AT SANTA ROSA.

NOVEMBER 2.....Santa Rosa vs. Vallejos

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS,

SUMMARY.

The first invitation field day of the Olympic Club, which was held on last Saturday afternoon, was a splendid success and the Olympians will have no cause to be nervous in future about the welfare of their new out-door grounds. A genuine athletic fever is raging in our midst at the present time and California is fast becoming one of the most athletic States in the Union. The field athletes, the oarsmen, the cyclers, and in fact the entire sporting fraternity are taking advantage of the splendid weather and are preparing themselves for coming events.

THE WHEELMEN.

Fresno, Cal., at the present time has six lady riders.

The Palm Leaf Wheelmen of Fresno, Cal., are a very prospering lot of young riders. The following are the officers of the club: L C Chittenden, Pres; C H Tripp, Vice-Pres; A C Bants, Captain; O G Treat, First Lieutenant; W W Stocker, Sec'y-Treasurer. Some of the Fresno boys will probably visit this city before long and take part in some of the races which are certain to be held before the year is out.

The man who handicapped the one mile safety race in connection with the Olympic Club games on Saturday last used very poor judgment when he allowed Turner of the B C W a handicap of 175 yards over Morris and Harris, the Welsh bicycle men. The ridiculous ease with which Turner won spaaks for itself, and the handicapper should be removed from his position. Whether he meant to favor the B C man or whether he is incompetent is all the same; he should be prevented from bringing any further disgrace on the California Division L A W.

The Olympic track is hardly suitable for record breaking, but still some good time can be accomplished on it.

Ed. Bradford of the Alameda Bicycle Club and a young friend rode to San Jose last Saturday. They report the roads in very good condition.

Will Hebbard and Charley Culver of the same club took a ride over to San Leandro on Sunday evening. There must be some special attraction in that direction for these two young riders for they disappear over the San Leandro road quite often in each others company.

The Bay City Wheelmen have moved their quarters to 234 Van Ness Avenue. They will occupy the new rooms for the winter after which they expect to be able to move into their new club house. It is very doubtful, owing to the popularity of base ball, if the club will be able to secure the Haight St. grounds for Thanksgiving Day. They will try and hold a tournament any way on that day and a committee is now looking out for a suitable place to hold the meeting at.

There is considerable growling among the wheelmen regarding the three bicycle events which were included in the last games programme of the Olympic Club. The Olympic mon it is reported intended that the three races should be open, but strauge to say that only four riders knew of this fact. Several of the boys would have entered had they been permitted and there would have been no necessity to have turned two of the races into "special exhibitions" because of the lack of entries.

The wheelmen should not fail to remember the L. A. W. meet which will be held in the Odd Fellows Building this evening. The run which will be held to-morrow morning will he largely attended and all the clubs will he well represented. The start will be made from Van Ness and Golden Gate avenues at 10 o'clock.

Fred White, Bert Brummell and Frank Howlett of the Alameda Bicycle Club visited the Golden Gate Park on Sunday. They rode around the Cliff House and back.

Last Saturday night three of the Alameda boys, the Foster brothers and Fred Boyle rode to San Jose and returned on Sunday by way of Redwood City. They were pleased at the condition of the roads which they reported to be in fine shape.

UNIVERSITY JOTTINGS.

Royer McGee, the young man who so gallantly saved the life of the woman who jumped overboard from one of the Oakland boats a few evenings ago, is a brother of W. McGee, the University sprinter.

The U. C. tug of war team which will pull at the next "ladie's night" exhibition of the Olympic Club will he composed of Hunt, Roberts, Marrow and Bouse. They have been challenged by the Olympic Club tug of war team.

The "Occident" says that there is a lack of long distance runners at the present time in the University.

The students are determined to be on top on next Decoration Day. The championship team will be augmented by several new men from amongst the freshmen. The non athletic students will encourage the athletes as far as lays in their power, and the team will be in much better condition next year then it was last May.

The members of the foot hall team are very busy at the present time, and will soon be in condition to meet any other team on the Pacific Coast.

THE GAME OF CRICKET.

To-morrow forenoon the Alameda and Burnaby clubs will play a match game at the West End grounds.

The members of the Pacific Club are very much out of practice, and for the present they should play amongst themselves. It looks very bad for a well conditioned team to be pitied against a lot of men who seldom take a bat in their hands. Cricket matches should be like base ball, close and exciting, and if the public is to be constantly obliged to witness such uneven games, it will soon grow tired of the pastime entirely. The captains of the different clubs should bear this fact in mind, and in future try and arrange more even matches. To show how sadly in need of practice the Pacific Club men are we give the score of last Saturday's game.

Byes	1
Totals	119

The Pacific and Barnaby clubs will play at the West End grounds this afternoon.

On Tuesday evening last the first annual meeting of the Alameda Cricket Club was held at the residence of Captain W. Rogers on Santa Clara avenue, Alameda. The following officers were elected to serve for the ensuing term: Captain W. Rogers, President; J. M. Robertson, vice-President: Wm. Robertson, Secretary; John D. Neild, Treasurer. The club was found to he in a very prosperous condition, and as all the members are fond of practice, the other clubs will find it a very difficult job to produce an eleven that can defeat the Alamedas.

The musical and social re-union given by the Alameda Cricket Club in Harmonie Hall, Alameda, on Thursday evening of last week, was a financial as well as a literary success. The hall was crowded, and the different members on the programme were warmly applauded. After the literary programme was disposed of, dancing began, and it was nearly three o'clock on Friday morning when the guests turned their footsteps homeward after having thoroughly enjoyed themselves. The committee in charge of the affair deserve great credit for their good work in having everything carved out in such good order. Mr. John D. Neild, who acted as Master of Ceremonies, filled his position in a very able manner. The following programme was given:

1. Overture, orchestra.
2. Song, Thursday (Molloy), Mr. J. E. Bland.
3. Violin solo. Der Sohn der Haide Keller-hela, Master Leo Kowalski.
4. Song, Dear Heart (Matter), Mrs. John T. Grey, nee Alice Waltz (late of New York).
5. Ballad, The Maid of the Mill (Adams), Mr. Ben Clark.
6. Song, selected, Mr. Thos. Bolton.
7. Song, selected, Miss E. Stiefvater.
8. Mandolin quartette, the Messrs, Dittmars, Goggin and Jones.
9. Song, selected, Mrs. John T. Grey, nee Alice Waltz.
10. Violin solo, Les Melodies des Alpes, R Schener, Master Leo. Kowalski.
11. Song, selected, Mr. Sanford Bennett.
12. Comic Song, The Parson and the Clerk, Mr. E. Sloman.

The committees were composed of—Arragements: Captain W. W. Rogers, J. D. Neild, J. M. Robertson and W. Robertson. Reception: T. J. Barbour, E. Hood, J. D. Neild, W. Winter, F. W. Spairs and H. Boyd. Floor manager: J. D. Neild.

AT THE OARS.

A meeting of the South End Rowing Club was held in Justice Murasky's court room on Tuesday evening last. Five new members were elected. The club now has a membership of 75.

A meeting of the Alameda Tennis Club was held at the club rooms last evening for the purpose of organizing a boat club in connection with that organization. The following committee have been appointed to see into the matter: Geo. E. Plummer, G. T. Wright, A. Dalton Harrison. The probabilities are that a new boat house will be built somewhere at the south end.

The Alameda Rowing Club has issued invitations for its house warming which will take place this evening at the boat house foot of Grand street, Alameda. The members of the associate clubs of the Pacific Rowing Association, have all been invited to attend.

The following crew of the Alpine Club would like to contest with a crew from the Lurline Club for a small trophy and Thanksgiving dinner on that day: H. O. Farrell, bow; Henry Tank, No 2; A. M. King, No. 3; J. J. Larkey, stroke.

Last Sunday the Pioneer Club was well represented on the bay. The famous four oared shell crew were out, and all the club barges and single scullers were removed from their resting places by members who felt like practicing.

We have been given private information regarding a new professional crew which will shortly branch out under the auspices of the South End Club. A couple of the men are new arrivals on the Pacific Coast, and it is said by persons who are well acquainted with the crew, that it will be one of the best ever put together in San Francisco before. We have been asked to withhold the names for the present.

The Ariel club members seeing no prospect of their having to contest in any more races this year, are now devoting their time to fishing and hunting. The following crew were out for a row on Sunday to Harber View; Lewis F. Nunan, stroke; Charles Pless, bow; D. Battean, No. 2; Edward Finley No. 3. Eugene Flanders managed to bring them back to their boat house safely, and he hinted that the regular amateur crew would not he in it in the next regatta.

A well known oarsman who is connected with the Post Office department in this city informs us that he will pick out a crew from the carriers' department that will compete against a crew from any other branch of the Government Service on the Pacific Coast. Any crew desiring to take up the defy can obtain full information at the office of the BREEDER AND SPORTSMAN.

John A. Stillman, who was at one time a very prominent oarsman, has resumed practice again. He is training from the South End boat house.

The prospects of a regatta on Thanksgiving day are now very slim.

RUNNERS. WALKERS, JUMPERS, ETC.

The members of the Alpine Club contested in a half mile handicap run at the Bay District Track last Sunday morning. H P Coleman acted as starter and Captain John D Garrison set the marks for the men. Harry O Farrell and P N Gafney kept time. The men were all in fair condition on account of having had to prepare themselves beforehand for the games of the O C which were held on the previous day. Three prizes were given to the three men finishing first. The following members competed: Harry C Casidy and John D Garrison, scratch; Sol Choynski, 30 yards; George W Armbruster, 30 yards; G W Bishop, 50 yards; A Choynski, 65 yards; W F Vollmer, 65 yarks. A M Kieg and Mask Lang 75 yards each; John W Creagh, 50 yards. Garrison at once cut out the pace and at the hundred yard pole was in the lead. From there to the wire he continued to gain with Bishop, Sol Choynski and Casidy at his heels. Garrison finished first in 2 min. 12 secs., Bishop 2nd, Choynski, 3d and Casidy 4th. Casidy appeared to be over trained for he has beaten this time all to pieces in private trials.

The programme of games for Thanksgiving Day as arranged by the Directors of the Olympio Club is:

One hundred-yard run, open handicap; 440 yard run, open handicap; half mile run, O A C handicap; mile run, open handicap; 220 yard O A C maiden, for members who have never competed in a race; 120 yard hurdle, open handicap; 220 ysrd hurdle, O A C handicap; pole vault, open handicap; running broad jump, O A C handicap: putting 16 lb shot, handicap O A C; 220 yard run for O A C juveniles, handicap; one mile walk, open handicap; run from grounds to top of Mount Olympus and return.

We think a three mile walk might have been substituted for the one mile walk, as A Cooke of the Alpine Club is very anxious to meet Horace Coffin of the Olympic Club at that distance. Both men finished very close to each other in the three mile walk at the championship meeting and another race of the same distance between the two would prove highly interesting. Cooke will hardly compete in a mile race and as he and Coffin are the only two men that are liable to enter. The Directors who made out the programme should give the matter their attention. Cooley and Harry C Casidy will meet in the mile run and will both be put on scratch. This will give the Alpine man a chance to meet Cooley again at that distance.

The scribe who grumbled at the handicapping of last Saturday's games, knows as much about handicapping or athletics in general as a mule does about writing shorthand. Even after the fairness of the handicaps had been clearly demonstrated, he continued to make ill the public with outbursts of his ignorance.

The wrestling (?) match between McLeod and McInerney, which took place in Irving Hall on Tuesday evening last, was as brutal an exhibition of the kind as ever was given in San Francisco. The less said about the affair the better, and the Olympic Club should prohibit any of its members from taking part in similar exhibitions.

The gymnasium of the Y. M. C. A. on Sutter street, has just been refitted, thoroughly renovated, repainted and new apparatus added. The class evenings are Tuesday, Thursday and Saturday. The classes are in charge of Prof. G. A. Mattern. The best members have formed themselves into a club known as the Argus, and as several of them are fine tumblers, wrestlers and boxers, they do not agree with the rules of the gymnasium, which prohibit "sparring, wrestling, tumbling feats of contortion, etc." At the present time the Argus Club is negotiating to join hands with the Alpine Club, and should the two clubs come together, more improvements will be made at Central Park.

Clarke, a new member of the Alpine Club, walked 220 yards at the Bay District Track last Sunday morning in 39 2-5 seconds.

Massey, the Australian sprinter, ran half a mile easily in 2:22.

A week from to-morrow the Alpine Club will hold an invitation field day at the Bay District Track. Only members of the club will compete. The programme will consist of three events, namely: One-quarter mile handicap run; exhibition run by J. D. Garrison, and an exhibition sprint walk by P. N. Gafney. There are already twenty names on the list for the quarter.

Several members of the Scottish Thistle Club are training at Central Park. During the week the Park was crowded with runners and walkers, who took much pleasure in practicing by the pale light of the moon.

The Alpine and Thistle foot ball teams practice every afternoon at Central Park.

Hand ball is very popular with many members of the Olympic Club, and the court at the new grounds is never idle.

The Olympic Club grounds, which at one time were almost entirely deserted by the athletes, are now well patronized. Runners, jumpers, walkers, wrestlers, etc, are practicing out there day and night. It is really wholesome to watch the boys exercise.

Eddie Graney, the boxer, is rapidly recovering from the effects of the injuries he received by being thrown out of his buggy some days ago.

Two prizes will be given for each event at the Thanksgiving Day games of the Olympio Club. The prizes will be placed on exhibition before the games and delivered to the winners at the conclusion of each race. Entrance fee is fifty cents for each event. A time will be set for each event, and any athlete who is slow in getting on his mark will get left.

The boxing tournament which will begin at the Olympic Club rooms on next Thursday evening promises to be a grand success. Several new members have joined the club in order to be able to witness the contests to which only members of the Olympic Club will he admitted. There will be any amount of opposition from outside clubs, and it is safe to predict that the bouts in each class will he stubbornly contested.

The P. C. A. A. A. will act very wisely in holding an in door championship meeting in the Pavilion. The tournament is bound to be a success both athleticslly and financially.

The medals won by outside athletes at the games of the Alpine Club in May last are now ready for distribution, and can be obtained from Captain Garrison.

Curtis, the English amateur walker, recently made a mile in 6min 40secs on a pass course, which beats the world's record.

John A. Stellman, the well known and popular athlete, has had a fine gymnasium fitted up in the basement of his store on the corner of Mission and Sixth streets. Mr. Stellman is constantly punching the bag, swinging the clubs and using the dumb bells. He is also practicing wrestling and will possibly enter the next wrestling tournament.

CLUB JOTTINGS.

Captain Walter A. Scott suggests that a scratch field day be given on Washington's Birthday. Mr. Scott says that as neither Purcell, Schifferstein or Jarvis would enter, the contests between the Olympic, Alpine and University Clubs would he very close and it would be very hard to name the club that would win the most points. Of course the meeting would not he for the championships, but still the fact of all the events being scratch would help to attract a very large audience. We think the suggestion worthy of consideration by the boys.

Club run No. 13 of the Olympic Club will be held to-morrow from the rooms of the Alameda Olympic Club. Those who intend going on the run should take the 10 A. M. broad guage boat for Alameda. The run will be in charge of Capt. Scott and his lieutenants, John Elliott and D. W. Donnelly. Several members of the Alameda Olympic Club will join with the Olympic boys in the contest.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, Room 18, 181 Broadway

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)	
One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.
Advertisements running six months are entitled to 10 per cent. discount.
Those running twelve months are entitled to 20 per cent. discount.
Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.
Should the Breeder and Sportsman be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the Breeder and Sportsman, and not to any member of the staff

San Francisco, Saturday, Nov. 1, 1890.

The Highland Farm Catalogue.

We have received from W. C. France and son, of Highland Farm, Lexington, Ky., their fall catalogue for 1890, and as usual it fairly bristles with producing blood lines both in the stallions and in the brood mares mentioned. At the head of the list, occupying the post of honor, is found Red Wilkes, and the announcement is made that he is a private stallion, his thirty-one sons and daughters in the 2:30 list making him worthy of the position. Of the other stallions there are Allandorf 7462, Sentinal Wilkes 2499, Belzoni 9948, and Pilot Mambrino 632. Then follows eighty-nine brood mares, the great attraction to which is that almost all of them are marked "standard and registered," with those who wish to buy good stock this is always one of the incentives to purchase, and after a careful examination of the pedigrees in the catalogue we can commend the stock to prospective investors in first-class trotting horses.

Palo Alto, Sunol and Stamboul.

The Directors of the Pacific Coast Trotting Horse Breeders Association advertised prior to the late meeting at Napa, that Sunol and Palo Alto would be two of the the attractions present at their annual meeting. As Mr. Marvin did not return with the Palo Alto stable until too late, it has been deemed expedient to give another meeting, the first day selected being Saturday, Nov. 8th. As yet only one day's meeting has been prepared for, but others will undoubtedly follow during the succeeding week. The programme for Saturday as at present arranged is a Special Purse of $600 for named horses, viz. Maggie E., Mary Lou, Lee, Chas. Derby, George Washington, Wauda, Emma Temple and Redwood. Palo Alto will be sent to beat his present record of 2:12¼, while Sunol will endeavor to lower her mark of 2:10½. Stamboul has also been secured as one of the drawing cards, and as he has been trotting very fast since the Napa meeting, there are many who believe that on the date mentioned he will be able to beat the present record of Nelson. This attractive programme should draw a large concourse of people to the Bay District Track. As the weather at present gives every indication of remaining clear for some time, there need be no fear that the elements will stand in the way of a postponement. The track is being especially prepared for fast time under the personal supervision of Marvin and Goldsmith, and it goes without saying that these two trainers are as able, from their knowledge of track work, to prepare a fast course as any two man in the country.

The New York Sportsman is waging a war against the evils of collusion between the Bookmakers and racing establishments, and the Chicago Horseman is supporting it in the good work.

A Record Meeting.

The Directors of the San Joaquin Valley Agricultural Association have determined to give a supplemental meeting on November 18th and 19th, on which occasion there will be races for year-old, two-year-old, three-year-old, four-year old and all aged horses. These contests will be given under the new rules as laid down by the National Trotting Horse Breeders Association, and have been arranged more particularly for the purpose of allowing the breeders throughout the State to secure records for their horses under the standard rule. The entrance for each of the various classes will be $10, payable at the time of nomination, and as premiums the Association will give gold, silver and bronze medals for the various winners in the different classes. The entries for this meeting will close on November 16th, thus giving ample time for breeders to prepare their horses and get them ready for record purposes. We have no doubt but what the meeting will be largely attended, and that all horsemen throughout the State will take advantage of the opportunity to enable them to get their trotters into the 2:30 list.

The New Zealand Sale.

The highest bred lot of stock ever offered for sale south of the Equator is to be sold at Sylvia Park, six miles from Auckland, N. Z., on the 6th day of January next. The steamer which leaves here on the 15th of November is the last opportunity for buyers wishing to attend the sale; and there never will be another opportunity like this.

Among the sires are Nordenfeldt, St. Leger, Hotchkins and Fusillade. The first two are tried sires, while the two latter have as yet no progeny on the turf. Nordenfelt completely outclassed all contemporary horses, and his brother, Enfilade, was also a colt of great speed. Nordenfelt won the Derby of 1885, both at Sydney and Melbourne, a performance to which neither Abercorn, Melos, Australian Peer nor Carbine was equal. He got "off" in the fall, and the Leger was won by his stable companion, Matchlock, to whom he could always concede five pounds. In the Melbourne Cup he was weighted at 134 lbs., the heaviest weight ever carried up to that time by a four year old; and even then had to be bumped and jostled to death by the "stiff horses" in the race to keep him from winning. He is a dapple brown and the most evenly turned horse we ever beheld. He is but eight years old and is already the sire of seven winners.

St. Leger is a year older and has four winners already. He is a golden chestnut and handsome enough to carry a king. Got by Doncaster (the sire of Bend d'Or) out of Atlantis by Thormanby (she was the dam of our King Ban). He shows as good blood as can be found on the top of the earth. One of his sons, Town Moor, has already shown very high form and looks very much like a future winner of classical events. Our local breeders should not miss getting one or the other of these two horses; and if they secured both of them, so much the better. Indeed, we do not consider any stud farm complete without a Musket stallion. If a man cannot afford to buy Nordenfelt, who is apt to go as high as $20,000, he should buy Hotchkiss, who is an immense horse and vastly superior, in our opinion, to his half-brother, Fusillade, and not likely to sell above $5,000.

The mares are, for the most part, too old for importation to America, but there are a few young ones on which there will be some spirited bidding. One of these is Lady Mersey, 6 years, by Musket, out of imp Mersey, and therefore a full sister to Carbine; Forma, 6 years, by Sterlingworth, out of imp Pulchra by Rosicrucian; Lyre, 11 years, by Patriarch, out of Lyre by Thormanby; and Sister Agnes by Rosicrucian, out of Penance by the Flying Dutchman.

Among the yearlings, our preference is the bay colt by Nordenfeldt, from Florence McCarthy (dam of Tirailleur), by Macaroni. Next to him comes the brown colt by Nordenfelt from Atlantis (dam of St. Leger) by Thormanby. Third among our prefereuces is the brown colt by Nordenfelt, out of imp Nelly Moore by Voltigeur. She is the dam of Lochiel, the great horse who won the Australian Cup on Tuesday, and the Newmarket handicap, six furlongs, on the following Saturday. Fourth best we deem the bay colt by Leolinus, out of Woodnymph, own sister to that great horse Martini Henry. Our fifth choice is the chestnut colt by St. Leger, out of imp Lady Ravensworth by Voltigeur, her dam own sister to Thormanby. There are yearling sisters to Carbine, Whakawai and a Nordenfelt filly out of Manton's dam, all of which ought to sell for good figures, We certainly hope California buyers will be represented, as we do not know when another such chance is likely to occur. Catalogues of the stock can be had on application, or at the office of the New Zealand Fire Insurance Co.

Hickok and McDoel.

For the past month or six weeks several Eastern newspapers, which pay attention to horse-racing news, have seen fit to criticise very severely the driving of McDoel at Buffalo, by Orrin A. Hickok. One particularly, the American Sportsman, has been very outspoken in its charges against the celebrated Californian driver, and as a result Budd Doble and Hamilton Busbey have each sent us a letter in which they take the grounds that Hickok was innocent of any wrong doing. So that our readers may understand what the trainer of the horse, and one of the judges in the stand thought, it will be better to give their letters in full. Our correspondent, who was on the ground at the time made no mention of any suspicious circumstances in connection with the race, and but very few of the newspapers published in the East did, still, as so much has been copied in reference to the affair, it is only just to Hickok that this side of the story should be given.

Lexington, Ky., October 15, 1890.

Editor Breeder and Sportsman:—My attention having been called to articles recently published in the American Sportsman and the New York Times, relating to a race at the late summer meeting at Buffalo, N. Y., in which Mr. Orrin Hickok drove the horse McDoel, I desire to state that having on that day three races to drive, I asked Mr. Hickok to drive the horse McDoel for me. He consented and drove him, but after the second heat he came to me and said he feared he could not win and wished to be relieved, and requested I should drive the horse the rest of the race. I declined, and told him he was driving the race as well as any one could. I have reason to believe Hickok afterward went to one of the judges and requested him to ask me to drive him the balance of the race. I was at the time, and am now, entirely satisfied that Mr. Hickok drove the horse honestly and to the best of his ability. I desire to further state that Mr. Hickok drove simply as a favor to me, and that there was no sort of arrangement or understanding as to any lease of the horse or any other sort of an agreement except to drive the horse for me to the best of his ability. This I believe he did, and have never doubted or questioned it, and any assertion to the contrary I believe to be unjust and untrue. Budd Doble.

Lexington, Ky., October 20, 1890

I was a judge in the two twenty two (2:22) race at Buffalo, in which McDoel was defeated by Mambrino Maid. I spoke to O. A. Hickok, who drove McDoel, and he stated that he was doing the best he could with the horse, and added that he would prefer that Budd Doble should finish the race. I then spoke to Doble, telling him of Hickok's request, and he replied that he was satisfied with the driving of Hickok; that McDoel was off, and that he did not believe that any one could win with him. He did not wish to drive McDoel on that day, because he was driving Jack and Ed Annan in two important races, and he claimed that to drive a third race would completely exhaust him and render him unfit to do justice to the other horses. The explanation was a reasonable one, and it satisfied me and my associates in the stand.

Hamilton Busbey.

San Jose Blood Horse Meeting.

The Directors of the San Jose Association are once more to the front with their semi-annual announcement. A meeting will be held next month for runners only, and already quite a large number of thoroughbreds are in training there, prominent among the stables being those belonging to L. J. Rose, W. L. Appleby and Wm. Boots. The spring and fall meetings at San Jose have been uniformly successful, and it can readily be believed that the approaching one will equal any of those held in the past. The Secretary sends us word that every attention will be paid to the track and that it is in better shape now than it has been for a long time. The programme is a good one and consists of races at all distances usually run now-a days, so that all classes of horses may have a chance to share in the money hung up in purses. The entries will close on Monday next and the full list of races can be found in our advertising columns.

A Change in Time of Entry.

The Blood Horse Association have held a meeting lately and changed the time of receiving entries for the Fall meeting, as it is presumed that some of the horses which have been running in the East will arrive during the coming week. Originally, November 3rd was announced as the closing day, but now the date has been changed to the 8th and undoubtedly a larger number of entries will be received and the sport considerably enhanced. Those having thoroughbreds in training are interested in remembering this change.

Reports come from the East that Mr. Nelson is confident that his now celebrated stallion can trot in 2.10. Well, all Californian horsemen are confident that Stamboul can go that fast or better, with Palo Alto as an unknown quantity, when it comes to trotting below 2:12¼. Let the rain hold off for three weeks and there is no telling what the Eastern horses may have to aim at next year, we can guarantee a low mark now with a much lower one in prospective. Counseller Crawford saved his money last year owing to rain, and it may be possible that the calculations of Messrs. Hobart and Goldsmith will go awry this season owing to the same cause.

Our Lodi Letter.

EDITOR BREEDER AND SPORTSMAN:—As it is some little time since the readers of the BREEDER AND SPORTSMAN have had any information in regard to the horses now located here, perhaps a few lines would not be amiss, seeing that there is so much interest taken in the light harness horse, especially after the sensational records that were made at Napa.

At present Lodi is quite a lively horse town, and many of the principal business men here are taking an active interest in well bred and speedy trotters. The Lodi Driving Park Association has a good mile track with twenty box stalls, 12x14, with a fourteen feet awning running in front of the line of stalls, and sixty more new stalls are at present in course of construction. It is the intention of the Association to give a first class meeting here some time in December, and as the Directors are of the enterprising sort, the meeting should be a very successful one. The officers are L. M. Morse, President; B. F. Langford, Vice President; G. W. Currier, Treasurer; and D. H. Corran, Secretary. Of all the many horsemen who have visited here and taken a look at our superb course, there is not one who has not been willing to acknowledge that for winter purposes the Lodi track has no equal; even after the heaviest rain of last winter twelve hours was all that was needed to dry the track sufficiently for the horses to work on it. I am not sure but I ought to speak a word for the roads, as they are always in the best of condition here, the peculiar soil seems to suck up the water and leave no muddy roads for the drivers to haul through.

If there be any of the trotting horse men throughout the State who desire to secure comfortable winter quarters for their horses and at the same time secure a track that can be used almost every day in winter, by all means let them come to Lodi and they will find just what they require. There are several horses now quartered at the track, Mr. L. M. Morse, owner of Dexter Prince having Cleo 2:37, a black filly four years old, by Dexter Prince, dam by Silverthreade. The same gentleman also has a chestnut colt two years old, by the same sire, the dam being by Abbotsford 2:19¼. At Mr. Morse's home place, which is situated some two and a half miles from Lodi, there are quite a number of very promising trotters, the large majority of them being by Dexter Prince, who it is well known, is the sire of Princess Alice 2:17, Lottery Ticket 2:30, and the very fast two year old owned by David Young of Stockton, and if there be any favorable conditions, it is almost a moral certainty that Dexter Prince will have several others in the 2:30 list before the 1st of January next.

The Hon. B. F. Langford is the fortunate possessor of several well bred youngsters, among them being James L., bay gelding, four years old, by Dexter Prince; a gray filly three years old, by the same sire; and a bay colt two years old, also by the same sire; he has a very good black filly three years old, sired by Hawthorne, Mr. Shippee's well known stallion.

C. H. Corran, the Secretary of the Association, owns Somersette Prince, chestnut stallion four years old, by Dexter Prince, dam by Chieftain 721. This stallion took first premium at the State Fair last year, for the best stallion of four years old or over. He is a very showy horse and has considerable speed, he having been driven quarters in 36 seconds while in service in the early part of last summer; his owner predicts very confidently that this beautiful animal will enter the 2:30 list next season. Mr. Corran also has a full brother to the above, a bay, three years old, which is almost as fine a looker as the older brother. The same gentleman has two fillies by Dexter Prince, dam by Silverthreads, and the dam of these little beauties has again been stinted to the same sire.

Mr. Hamilton has Prince Wood, chestnut stallion, four years old, by Dexter Prince, dam by Nutwood 2d dam Maud (dam of Reliance, 2:22½, and Magdallah, 2:24), This is a very speedy young horse, and can pace a 25 clip to a buggy. Mr. Hamilton also has Hector C., a chestnut gelding by Priam. This is a very fast horse, and has shown quarters in 33 seconds, but went lame, and his owner has had him fired and turned out, but fully expects to beat all green horses on the track next season; if he is brought to the wire in good condition, look out for another Frank M., and as both of them are by Priam, it would look as though the old, despised horse could produce speed equal to that shown by representatives of more famous stallions.

Among the recent arrivals at this place is Mr. Mike Costello, who has brought with him two fine looking youngsters from Tacoma, Wash. The first is a bay stallion by Hernani (a son of Electioneer), dam by Hock-Hocking, and a bay gelding, pacer, by Patsey Clinker; dam a thoroughbred mare. After the recent rains Mr. Costello pronounced the Lodi track the best he had ever seen for winter work, as almost immediately afterwards horses were ready to go out in their preliminary jogs.

Chas. Thayer owns a gray stallion by Judge Salisbury 5872, dam by A. W. Richmond. This stallion has any quantity of speed, and has electrified the spectators on several occasions with very fast quarters. He a two-year-old he trotted in 2:38, and a very low mark is promised for him when he starts in his next race. Mr. Thayer also has a two-year-old colt by his great stallion, which is also out of an A. W. Richmond mare, and the tenth time he was ever in harness, showed a quarter in 46 seconds.

The Harrison Bros. of Stockton are now quartered at the track, and have the well known race horse Hello, by Shannan, also a bay colt Kyle by imported Cyrus. These two horses are being trained and the Harrison boys expect to have them both in shape for the Blood Horse meeting, and as usual give the talent a surprise party.

Jno. Doughterty also has a speedy young pacer for which great things are predicted. There are several horsemen who have stated that they would winter here, and as the various strings arrive, I shall keep the readers of the BREEDER AND SPORTSMAN posted as to the work being done here on the track.

VETERINARY.

Conducted by Wm. F. Egan, M. R. C. V. S., F. E. V, M. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Wm, F. Egan, M. R. C. V. S, 1117 Golden Gate Avenue, San Francisco.

J. D. J.

My boy has a pony five years old, and he has got what they call around here the epizootic. He runs at the nose a yellowish discharge, and has a big lump under his jaw. Please let me know if I can cure him, and how?

Answer.—Put him in a box stall, if convenient, and blanket him. If the lump under the jaw be hard, blister it with Cantharides one part to eight of lard. When it gets soft, lance it, and apply a poultice to it daily, syringing it out with warm water containing a little carbolic acid each day before applying the fresh poultice. Steam his head daily by putting it into a sack containing warm bran. Take the cold out of his drinking water, and feed him on small warm bran mashes. Give him no grain and very little hay. Get an ounce each of quinine and antipyrine made into twelve powders, and give him one of those powders morning and evening in the mash.

L. C.

I have lost a great many horses from time to time from lung fever, and have at present three laid up with it. Please tell me how to treat them and oblige.

Answer—Put the horse in a box stall if convenient. The place should be well ventilated, but not draughty.

Put a warm woolen blanket on him, and if legs be cold handrub them and put woolen bandages on them.

Apply mustard to the sides and chest. The mustard may be washed off after about two hours and a half, with warm water, but you must be careful to dry the part well, and cover him immediately for fear of catching cold.

Give him three times a day half a drachm each of sulphate quinine and antipyrine.

Give him no grain and very little hay. Let him have some flaxseed tea to drink and a small warm bran mash morning and evening. If he is very sick do not give him even bran, but a little oat meal gruel may be put through the flaxseed.

R. S. H.

I have a five months old colt with a bruise just above the knee. I don't know how it was received. It might have been kicked or the mare might have stepped on it. It is a hard callous lump somewhat larger than a hen's egg. The skin is perfectly loose around it. I have been using liniment on it but it does not seem to recede any. It has been hurt about a month. The swelling has all gone, but the callous lump still remains. If you advise blistering how will I prevent it biting it.

Answer.—Apply tincture of Iodine to the part once a day until a scruff appears. Then discontinue its use until the soreness has left it, when you may repeat the application as before, until the enlargement disappears. After each application it would be well to tie a cloth or bandage loosely over the part, so as to prevent him getting his mouth to it.

A Level Head.

The Advantage of Presence of Mind in an Emergency.

During the late strike on the New York Central Railroad, the militia were ordered to be in readiness in case of a riot, but they were not called out.

In an interview, Gov. Hill said the troops were not to be called upon except in case of an emergency. The emergency had not arisen, therefore they would not be ordered out. He remarked that this was the first great strike with which he had had experience, and he did not propose to lose his head; the only point at which there had then been serious trouble was at Syracuse, and there a deputy sheriff had lost his head and precipitated an encounter.

The strike continued several weeks and there was riotous action at various points along the road, but the civil authorities were able to cope with it without calling on the militia.

The test of a man's real ability comes when an emergency arises which makes a hasty call on his good judgment and discretion. The man who retains his presence of mind, maintains his equipoise and exercises sound discretion at such critical junctures, is to be relied on and will be put to the front.

Men with level heads have the staying qualities which do not falter in the face of danger. Otis A. Cole, of Kinsman, O., June 10, 1890, writes: "In the fall of 1888 I was feeling very ill. I consulted a doctor and he said I had Bright's disease of the kidneys and that he would not stand in my shoes for the State of Ohio." But he did not lose courage or give up; he says: "I saw the testimonial of Mr. John Colman, 100 Gregory St., New Haven, Conn., and I wrote to him In due time I received an answer, stating that the testimonial that he gave was genuine and not overdrawn in any particular. I took a good many bottles of Warner's Safe Cure; have not taken any for one year."

Gov. Hill is accounted a very successful man; he is cool and calculating and belongs to the class that do not lose their heads when emergencies arise.

As good luck would have it, I happened across Mr. John Mackey and Mr. Matthew Byrnes, the other night at a time when the two worthy gentlemen had not yet recovered from the astonishment provoked by my comparison of the merits of Salvator and Hindoo last week, says Druid Hill. As a consequence, I came away quite convinced that if the chestnut colt had been asked to run after the moon he would have caught her without much trouble and returned with her to earth with less, and, by the way, speaking of Byrnes and Mackey reminds me that while it has been definitely decided to run Salvator no more, the question of Firenzi's reappearance under saddle next year is still an open one For my own part I think we shall see the little Queen again, for I take no stock in the talk about Mr. Haggin's withdrawal from the turf. Persons who look about to engage two jockeys are scarcely contemplating retiring from active racing. Besides, Firenzi on the turf and Salvator in the stud will mean a bread winner of high degree at each end of the line.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

F. L. H.

Will you kindly give me through the columns of your paper, the full pedigree and record of Dan. Voorhies 2nd.

Answer.—He has no record as far as we can find out. There is a pedigree given for Dan Voohees II as follows, but it must be taken with grains of allowance, by Dan Voorhees 2:23½, dam Black Swan 2:28½ by Dave Hill.

J. G.

Please give pedigree of Johnston, the pacer, record 2:06¼, and oblige.

Answer.—By Joe Bassett, dam Roulette by Swettings Ned Forrest.

W. S. Sacramento.

Three parties are shaking dice. First man shakes 3 fours; second man shakes a pair of aces; third man makes a side bet he will beat 2 aces, and on shaking, shakes 2 aces. Does he lose?

Answer.—Yes.

G. H.

Can you let me know whether Cora Van Tassell has any record, and if so, when was it made?

Answer—We cannot find that she has entered the 2:30 list, although a close examination has been made of all the authorities.

L. V.

Please kindly inform me, through your valuable paper, if a filly twenty-five months old can be bred with success?

Answer.—Your question is a very indefinite one. If you simply mean to find out whether they will get in foal, we have to say yes, in fact, A. B. Spreckles, of this city, had a filly who became pregnant when less than twelve months old.

Foals of 1890.

Property of Mrs W. B. Prentice, McRae Ranch, San Diego County, Cal.—

October 13th, bay colt by Alcazar, dam Lady Bella by Whipple's Hambletonian.

If your horses have worms give them Simmons Liver Regulator—a safe and sure remedy.

Thoroughbreds and work horses are kept in condition by Simmons Liver Regulator.

For horses and cattle—Simmons Liver Regulator. One dose is worth 100 dollars.

To make a slow horse fast tie him to a post, or give him S. L. R. (Simmons Liver Regulator.)

Supplemental Meeting

NOVEMBER 8, 14 AND 15.

UNDER THE AUSPICES OF THE

Pacific Coast TROTTING HORSE BREEDERS ASSOCIATION.

First Day,

Saturday, Nov. 8, 1890,

AT THE

Bay District Track.

SUNOL, against time, 2:10 1-2
STAMBOUL " " 2:11 1-2
PALO ALTO " " 2:12 1-4

SPECIAL PURSE, $600

For the following named horses: Maggie E., Mary Lou, Lee, Charles Derby, Geo. Washington, Wanda, Emma Temple and Redwood. Entrance 10 per cent.; 3 to enter, 2 to start. Entries to close with the Secretary Monday, November 3, 1890.

CONDITIONS.

Entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

Purses will be divided into four moneys, viz , 50 per cent. to the winner, 25 per cent. to the second horse, 15 per cent. to the third horse, and 10 per cent. to the fourth horse.

A horse distancing the field shall only be entitled to first and third moneys.

Two horses from the same stable are eligible to start for above purse.

Trotting and racing colors shall be named by six o'clock on the day preceding the race, and MUST be worn upon the track.

Otherwise than the above National Trotting Association rules will govern.

FRANK L. COOMBS, President.

JAS. P. KERR, Secretary.
313 Bush street, San Francisco.

Crystal Palace Cigar Store,

No. 5 Kearny Street.

C. LEONHARDT - Proprietor.

Fresh Imported Cigars Constantly on hand.

Grim's Gossip.

Walter Frost has started a public training stable at Petaluma and is already handling several trotters.

San Jose should have a successful fall meeting as many of the noted horses of the State will be in attendance, and there will be many a hot race at that point.

The Undine Stable car arrived all safe at Sacramento last Wednesday night; on board were Racine, Rinfax, Glenlevit and the pacer Adonis. Racine will winter at Palo Alto again.

Wilbur F. Smith would like to know if there is any one going to send trotting horses east this fall, as he has a couple of brood mares and two weanlings that he will help to fill up a car with.

We would call attention once more to the strong recommendations published this week in reference to the efficacy of Peruvian Bitters, one of the best health giving tonics now before the American public.

It is not yet certain that Major Du Bois' great horse Superior is dead, for on Thursday a well known Denver horseman received a letter from that city, the last paragraph in which was "I suppose you would hear that Major Du Bois' Superior was *almost* killed."

Senator Hearst has had a mile track surveyed and plough d up on his Pleasanton property, and we hear that men are at work leveling it off. Drainage pipes will carry away the surplus water so that even in the winter time the track may be used for training purposes.

The owners of Belle Button and Tom Ryder had a half mile race lately, between their well known pacers, the conditions being best 3 in 5, half mile heats. The race took place in Yolo County, Belle Button proving the winner in straight heats; time, 1:10, 1:11 and 1:09¾.

A letter from W. F. Cutler, the well known veterinary of Sacramento, states that El Rio Rey who has been a very sick horse is now on the convalescing list, and although a slight cough still troubles him, all danger is past and it is thought he will in the near future be as well as ever.

For many years M. C. Delano has been acknowledged as one of the best trainers and drivers in the State of Maine and many a trotter has he piloted to victory. Lately he gave up the trotting horse interests for the time being and is now located at Rocklin in this State where his brother has large business interests.

Monroe Salisbury of the Pleasanton Stock Farm is at present on a trip through Montana, looking after his stage interests in that section. It turns out now that the mares, which were bought by a Lexington firm and reported as being purchased for Mr. Salisbury, were secured for Marcus Daly of Bitter Root Valley.

Four boys, the oldest but sixteen years of age, engaged in a row with John Chisholm at the Santa Rosa track yesterday evening. During the melee one of the boys drew a pistol and shot Chisholm in the leg. The boys were each arrested and held on $1,000 bail. Chisholm's wound is a serious but not necessarily fatal one.—Petaluma Imprint.

Mr. A. T. Hatch has removed all of his stallions and brood mares from Pleasanton to the farm lately purchased by him in Tehama County. Mr. Hatch will have one of the most complete stock farms in the State when finished, as it is his intention to spare no money in equipping it thoroughly. James Sutherland will have full charge of the place and we expect to hear of record breakers from Tehama county next year.

Simon Seymour, of the Russ House, one of California's enthusiastic horsemen, will shortly visit the East to be gone several months. It is not known to many, but this gentleman is rapidly gathering together a small but select collection of brood mares, and already two Guy Wilkes youngsters are numbered among his posessions, with many other representative Stallions' produce also to be seen. Bon Voyage.

After a trip of several months in the East, Mr. Valensin returned to his Stock Farm at Pleasanton last Saturday, much improved in health, although he had a severe attack of pneumonia while away. He reports having seen some grand racing on the "big circuit", but is confident in the belief that California will ultimately have to furnish a large majority of the fast horses for the amusement of our Eastern cousins.

Mr. C. F. Dunbar, who recently purchased Johnston 2:06¼, and who, by the way, has fallen head over heels in love with him, is out in a letter to the Buffalo Association, asking it to take the bar from his horse and offer a purse for Johnston and Hal Pointer to contend for next year. This doubtless will be done, and what a race it will be should both the horses take the word at an edge. Our money goes on Ed Geers' old favorite.

When our Santa Barbara correspondent sent us in an account of the Hueneme races he made the record show that Ballona Boll was second in the two-year-old race. O M. Converse, one of the gentlemen interested, sends in a letter which states that Red Girl was second, Ballona Bell third, and Miss Idle last, Lulu H. being the winner. We are always willing to rectify errors, but the query arises, how did the correspondent make the mistake.

The meeting at Napa was a very successful one, and there were but very few stables but what were enabled to carry off more or less of the money offered by the Breeders Association. In looking over the books of the Secretary, it is found that the bay gelding Homestake 2:14¼, owned by M Salisbury, won more money than any other stable of horses that competed during the meeting. The winnings of Homestake amounted to $2250, the San Mateo Stock Farm being the next principal winner, that stable receiving a check for a little over $2100.

It need not surprise the readers of Grim's Gossip if very shortly the Nephew gelding, Beauty Mc is seen on the roads of San Francisco, as Dame Rumor has it at present that a wealthy Californian is negotiating for him for that purpose. Of all the horses that have been seen on the circuit this year, probably Beauty Mc is one of the very best which might be used for road purposes. He is extremely level headed, of good disposition and always has speed enough to enable him to pass even the best of the road horses now in use.

A gelding called White Wings is trotting down East, and the boys all shout, "He never grows weary," when the animal comes down the homestretch in front of the others.

During the early portion of the week, much fast work was indulged in at the Bay District Track. Stamboul was sent two half- miles, the first being made in 1:06 the last quarter of which was completed in 31 seconds. The second half mile was trotted on the same afternoon, and the great son of Sultan finished it in 1:03½. When the supreme effort is made, look out Mr. Nelson, for there is something in the air that seems to indicate that the Stallion Championship will perch on the California banner this year. If not, good luck to the Pine Tree State.

Some of our Eastern contemporaries give the breeding of G. W. C. as being by Adonis, 2:11½, the pacer owned by Orrin A. Hickok. This is not correct, and G. W. Hancock, of Sacramento, puts the matter straight in the following letter:

DEAR GRIM: G. W. C. is by Morris Toomy's Adonis, he by California Dexter. Toomy's Adonis was bred in Sacramento county, as was also G. W C. California Dexter sired the dam of Toomy's Transit, 2:26½, at five years, by Prompter.

Foxhall A. Daingerfield writes from Wrens Nest, the home of Sam Purdy, near Harrisonburg, Va., that Charlie C. 2:21½, and Strontia 2:25½, are not brothers. Both horses are by Sam Purdy, but Charlie C. is out of Bessie O'Malley, by O'Malley, a mare used in a livery in Harrisonburg for years; while Strontia's dam is Madge, a small gray mare by Zirkle's Engineer, a saddle horse sired by Engineer (thoroughbred), out of a gray pacing pony, said to be a Canadian. Madge is a saddle mare, owned by Miss Heneberger, a daughter of A. E. Heneberger of Harrisonburg.

I see by some of the Eastern sporting papers that Budd Doble is reported to have said that he would not send out any horses to winter in California this year; there must surely be some mistake about the rumor, as we have positive information here that inside of ten days Geo. Starr, who is Doble's right hand bower, will leave Terre Haute for the Golden State with a carload of trotters and pacers. Mr. Doble has found by experience that horses wintered in California are far better able to stand a long campaign in the East than those which are wintered east of the Rocky Mountains

The Victoria Racing Club of Melbourne has abolished selling races over its famous course at Flemington, on the ground that they are generally devoid of interest and foregone conclusions for one horse in the race. They never should be tolerated on any first-class course. To begin with, the horses themselves are generally old and worn-out "skatee" that ought to be sold for saddle use, while the men who nominate them are generally the worst rogues on the turf. It might, perhaps, be desirable to give a selling race for two year olds, but not for older horses. In establishing this precedent, the great club of Melbourne has taken an initial step in turf reform that our Long Branch and Westchester Clubs would do well to imitate.

Chas. Green of this City offers for sale the brood mare Sultan Queen by Sultan, dam by Whipple's Hambletonian. This mare is in foal to Sidney, and has also a foal at her side by the same horse, which is a very handsome and promising youngster. He also desires to sell a two year old filly by Junio, dam Sultan Queen; and Emma G 2:27¼ by Elmo, dam by Whipple's Hambletonian. This mare is in foal to Dawn 2:18¾. These mares can be bought on reasonable terms and full particulars will be sent on addressing Mr. Green. He also desires to sell the well known pacer, Chapman 2:26, who in his time was a good campaigner and should be a first class road horse for any gentleman, who may desire to drive one of the side wheel division.

Marigold's two miles in 3:30½ at the recent Los Angeles meeting was the fastest time ever made in a race in California, and the fastest ever made in a race in America except by McWhirter, who covered the distance in 3:30 An attempt was made to give Monte Christo a similar record about four years ago, but none of the private watches agreed with it and it is generally believed to have been an error, as no previous nor subsequent performance of Monte Christo indicated that he was even a second class horse. The only two times that 3:30 has been beaten in a two-mile race was in Australia and, on both occasions, in the Melbourne Cup. Sheet Anchor did it in 3:20½, an aged horse with 104 lbs. up, and Dunlop, a five-year-old with 115 in the saddle, in 3:28½. Considering that he was the same age as Ten Broeck and carried five pounds more, he does not suffer by comparison.

Dr. Rose must feel proud over the news received from Sydney by the Zelandia. The bay colt Little Bernie, by Cheviot out of Myrtle by Gemma di Vergy, won the Great Metropolitan Stakes, two miles, covering the distance in 3:31¼. Sir Modred won the same race in 3:34½. Later in the week, Little Bernie won the Sydney Handicap, of one and a half miles, beating Bungebah, a six year old gelding to whom he conceded eleven pounds. Mr. Rose, Mr. Baldwin and Senator Hearst, have all bred mares to Cheviot; and we look for good results to flow from this union. It must be borne in mind that Cheviot was trained in the same stable with Sir Modred and had to wait his turn for a good many races for which he had, at least, a fighting chance. Little Bernie's dam was also the dam of that great mare, Cerise and Blue, owned by the "leviathan bookmaker," Humphrey Oxenham.

Lucky Baldwin's fairy tale about trotting at Monmouth Park has caused some amusement says the Sportsman. Mr. Nelson—racing men know but one Nelson, he who fed them so well at Morris Park, grieves that Mr. Baldwin should have stolen his thunder. It was he who conceived the idea of holding a trotting meeting on one of our great race courses next year, and that course was not Monmouth but Morris Park. You see, murder will out. Mr. Nelson used to have a trotting track of his own, and a running track as well for that matter, and it is the most rational thing in the world that he should seek to combine the two His plan is to give up four days in August to the trotters, days when there is no racing at Monmouth, and offer liberal stakes to be raced for. He believes partly in the dash system, but does not object to heats, provided not more than three are required to decide a race. Mr. Morris is almost persuaded to adopt his suggestion. "The park is too valuable a property to lie idle," says Mr. Nelson, and a trotting meeting there would conflict with nothing."

I had a very pleasant visit last Tuesday afternoon from Millard Saunders, who for more than a decade of years has handled the trotting horses owned by Mr Gordon of Cleveland. As has already been mentioned in these columns, the proprietor of the Valensin Stock Farm while East this Summer engaged the well known reinsman for a term of years to handle the Sidney and Simmicolon colts, and from the reputation that Mr. Saunders has already obtained, it can safely be said that no better man could have been secured for the place. I have not heard whether Simmicolon was brought back by Mr Valensin or not, but it is extremely probable that if not already at Pleasanton, he will arrive here within a very few days.

As soon as it became known that Dreadnought and Cuirassier were both scratched for the Caulfield Cup, the New Zealand colt Dunkeld advanced to the position of first favorite for that event at odds of 100 to 6 Dunkeld won three races at two years old and one at three, beating Chicago and Tartar. He also ran a dead heat with Bravo for second place in the Caulfield Stakes of 1889, won by Dreadnought. In the Caulfield Cup he will have to carry but 114 lbs. and therefore has a fighting chance. He has been anything but a consistent performer, however, and lost at least two races he should have won. Dunkeld is by Apremont out of Athole and is a rather good looking brown horse, about 15½ hands high. Apremont his sire, was bred in France and is by Mortemer out of Araucaria (dam of Ravon D'Or) by Ambrose.

An Eastern contemporary is responsible for the following: "Lucky Baldwin, who divides his fancy for racing between the thoroughbred and the trotter, is quoted as saying: 'Beginning with next season, we're going to inaugurate straight mile trotting races at Monmouth Park, and then we'll see some record-breakers. Maud S and Jay-Eye-See will not be in it. You'll see a 2:00 mile record as sure as you're born. We're going to offer big stakes and get the best horses of the country there. Can better time be made over a straight than a curved track? Why there's no doubt about it. The out horse is always at a disadvantage, and the pole horse always has the best of it. In a mile race I'll venture to say the out horse has to run fifty to sixty yards more in a curve mile track. There being such disadvantages, then, at the start, it is not remarkable that frequently it is not always the best horse that wins the race, running or trotting.'"

Now it is more than an even wager that Lucky Baldwin cannot tell a trotter from a pacer, and it is dollars to doughnuts that he never uttered the language quoted above.

There are but few of the readers of the BREEDER AND SPORTSMAN but what will remember the jockey Fred Carrillo, who was ruled off at the time of the Al Farrow fiasco. Notwithstanding that, strenuous efforts have been made to have the lad reinstated, as yet he is still "on the ground." A few days ago, at least so the story goes, Fred attended a meeting which was held in Lake County, and while there was requested to accept a mount on one of the short horses entered in one of the local races. Fred put on the silk and was soon prancing up and down in front of the judges' stand, whereupon one of the officials called him and asked him the question: "Is it not true that you have been ruled off every track in the United States?" The jockey answered "yes," whereupon the judge stated that he would not be allowed to ride in the race, which was about to take place. With a comical look in his eyes, Carrillo answered: "Well, I will acknowledge that I have been ruled off every track in the United States, but this is the first time I was ever ruled off a sheep trail."

Tournament closes the season with something less than $89,000 to his credit, despite the fact that he did not win a race until July. With the exceptions of Hanover and Luke Blackburn, he has been the most consistent performer of his age in America. He will be trained next season again, after which he will be retired as the premier stallion of the San Simeon stud. As his owner has no end of wealth, in addition to being a large winner on him, he should give him some substantial opportunities. Two of the best sons of Musket were out of mares by Traducer, the sire of Sir Modred. Hence we believe the Senator should import several Musket mares to breed to Tournament, who is a horse of great substance and should prove himself a great sire. There is no reason why he should fail it properly mated Mares of this famous strain can now be had from $700 to $1000 each in New Zealand, and from six to nine years of age, which is very cheap for such good stock. When we consider that Mr. Haggin paid $6000 for Glidelia (who has produced no great performer up to date) at the Astor sale last week, we think that the Musket mares now purchasable in New Zealand are the cheapest in the world. The low prices now ruling there are owing to the fact that the country is mortgaged for every dollar it is worth, and that all the select breeders are badly pushed for money. We do not know when similar opportunities have been presented to our breeders and they will regret if they do not take advantage of it.

The California season which extends up to midnight of December 31st, is at its meridian and it is not beyond reason to expect that Father Time will have a little more tribulation—a few more hard trials—before he goes into winter quarters. Already Homestake, by Gibralter, son of Echo, that started the year without a record better than 2:30 has placed 2:14¼ to his credit at the trotting gait. The tracks are being jack-planed and the watches oiled up for great deeds. The mighty Stamboul under the masterful touch of Goldsmith is out for blood and his mile at Napa in 2:11½, last quarter in 31¾ seconds, tells of great speed and stamina and that in the race for stallion preeminence the son of Sultan and Fleetwing will be no laggard. Palo Alto and Sunol are now on their native heath, and as their owners have not cried enough, will be sent a few more trips against the watch and who knows what will be the final result. The filly has possible as much if not more speed than any living trotter, but with it a disposition sour and vixenish as an old shrew that will always stand in the way of her accomplishing what she should. Palo Alto has a leg that when the track is hard and the mile long, burns, but what he will do in the way of reducing the stallion record is not plain. And so it goes, the world's records, those mile stones that mark the progress of the breeding interest have strewn the season as never did leaves in Valambrosa's favorite dell. All this coupled with a campaign clean in the matter of jobs, the increased interest manifested by the public, the largest stakes and purses offered through The Terre Haute $11,000 purse, Chicago Horseman $10,000 stake, The Spirit of the Times $10,000 purse, California BREEDERS' AND SPORTSMAN stake, Hartford $10 000 stake, Kentucky Breeders' Association stake, Clark's Horse Review $15,000 stake, etc., have gilded the horizon of harness sports with a rainbow of promise that foretells of a future that is dawning on the trotting horse of America, bounded only by the enthusiast's wildest dream. So mote it be.—Terre Haute Express.

Sleep in Peace!

The Commercial Fire Despatch Co. Will Notify You if Your Place of Business is on Fire.

A sadly neglected feature in connection with conflagrations in the past has been the fact that the owners of the places of business which were being burned, lived at a distance, and were only made aware of the loss they had sustained upon their return to their offices, stores or workshops the next morning, then to find their premises reduced to ashes, or the contents deluged and destroyed by water. In view of the vast responsibility resting upon all persons in business, it does seem strange that in all of the past years no service has been established that would notify property owners of the destruction of their premises, and find a means to enable them to reach the fire expeditiously. This difficulty no longer exists, and merchants and others can now retire to their beds at night with a full assurance that should their places of business be attacked by, or threatened with fire at any time of the night, they will be promptly notified, and the means placed at their disposal to reach the scene in the most expeditious manner compatible with safety.

This service has been established by the Commercial Fire Despatch Company, whose main office is No. 61 Flood Building, where all information regarding the working of the organization can be had, and where can be seen the names of over one thousand of the principal bankers, merchants, railroad men, real estate dealers, dentists, lawyers, doctors, architects, lumbermen and manufacturers in the city, together with testimonials from those who have already experienced the benefits of the system. David Scannell, Chief of the Fire Department and his Assistant Chief, James Riley, give warm endorsements to the operations of the company. A brief resume of the organization and its plans will be found interesting to every one.

The reading of testimonials is quite interesting, if from no other point of view than to establish the fact that rapid transit in this city at any hour of the night is not only obtainable, but that the cost is so trifling in comparison to the service rendered as to make one wonder where the profit of the concern comes in. For instance, J. L. Merguire, vice-president of the Truckee Lumber Company, says that at the time of the fire in the neighborhood of his premises, corner of Fourth and Townsend streets at half past 2 o'clock in the morning of August 21, 1889, the company's messenger called for him at his residence 816 Valencia St., near 20th, which is three miles from the fire, and he was taken to the spot in just 29 minutes after the alarm was sounded. Steiger and Kerr say that at the fires which occurred on the evening of the 20th and the morning of the 27th of September 1889, they were placed on their premises in such good time that they could have removed all of their books and papers had not the efforts of the firemen subdued the flames and rendered their removal unnecessary.

It is not simply confined to the owners or occupants of the building on fire, but to all subscribers occupying adjoining buildings.

The combined testimony of all subscribers who have been under the necessity of making use of the Company's facilities, is to the effect that the cost is nothing compared to the service. And it is also gratifying to know that one can lay his head upon his pillow with the comforting assurance that if fire should attack his place of business, or even be in close proximity to it, a vigilant, sleepless guardian has his eye upon the premises and will immediately notify him in case of necessity. The members of an organization are always its endorsers and if a contemplating subscriber will but take the trouble to look over the list of those who have already signed, he will see on the books of the Commercial Fire Despatch Company the names of twelve hundred and fifty of the leading business men and firms of this city.

Wait.

From time to time I have sought to emphasize the importance of allowing colts to get well started toward maturity before seeking to develop extreme speed. About a year ago I wrote for the Stockman an article on the subject, in which I predicted that neither of the two great performers, Axtell and Sunol, would equal their records this year. I did not make the prediction because of any desire to belittle the grand attainments of these two youngsters, but because I was firmly convinced in the light of past experience that the efforts had taxed the colt and filly too severely. At the time I knew if it was possible for either to beat its record in 1890 the opportunity would be given it.

Let us consider Axtell first. He has been in the hands of that master horseman Budd Doble. In the spring it was announced that he would do a limited stud service, and then he would be withdrawn and fitted for a fast mile. A match with Sunol was freely talked of and his owners felt confidant of the stallion's victory. What is the outcome of the plans and talk? Axtell withdrawn from the stud, put in training, and then retired from training without a public effort against the watch. Of course, those who advocate getting all the speed possible out of youngsters will say that Axtell's stud season unfitted him for racing or for a grand effort Well, a heavy stud season would probably unfit an older stallion, but did it unfit Axtell? With the possibility of beating Sunol, and lowering his own record in view, and fully proposing to train and trot the horse, would his owners have allowed him to do so much service as to unfit him for fast work? Hardly. The truth is, he cannot trot as fast as last year, and his owners feared that breeders would get the notion that the youngster had lost his speed if he was started up. Now, as two let-ups are equal to one break-down, I predict that Axtell as a five-year old will not trot better than 2:15. He cannot to-day, and I doubt if he can beat 2:16.

Now as to Sunol. She has been in the best of hands, had the best of care, and been kept on an edge since she made her phenomenal mile in 1889. She has been handled by the same man who always guided her, and yet all her efforts have proved of no avail in trying to beat her last year's mark. Each effort has been made over a track as nearly perfect as could be asked, and when the filly was in the very best of condition. Her effort was a grand one, but she could not beat her own time. Now for the lesson. It such horses as these are not equal in speed to that reached last year, although given the best care and handling, does it not go to prove that their efforts last year took too much out of them.

Almost every year we see a horse six, eight or ten years old coming out for the first time and winning race after race, to close the season with a mark inside the 2:30, and perhaps inside the 2:20 mark. Take Stevie this year? He is a new comer and downs them all in each class as he reaches them. He is 11 years old, and bred well enough to have beaten 2:30 as a three year old if his owners had cared to have him. Now take Miss Alice, trained and trotted as a three year old and put in the 2:20 class last year. She can trot in about 2:21, but when three heats must be put in better than 2:19 to win a race she is not in it. Goldsmith Maid was six years old before she was trained, Prince Wilkes was four, and the best wearing trotters and pacers were not asked to show extreme speed before they were six or seven. It pays to wait and not hurry the colts. Go a little slow with the youngsters and you will reap more money in the end.—H. L. Hines in National Stockman and Farmer.

Athletics—Continued.

The Olympic Club gymnasium was packed on Wednesday evening, "Professors Night." The Introduction of such a novelty was a move in the right direction and the club membership should be doubled inside of a year.

VICTORIOUS OLYMPIANS.

A Successful Invitation Field Day.

Five Thousand People Witness the Games.

When the first event was called shortly after two o'clock at the Olympic grounds last Saturday afternoon, at least three thousand people sat in the grand stand and around the railing which separates the cinder path from the passage way. The sight of such a large and fashionable audience gladdened the hearts of W. Greer Harrison and his fellow directors.

The crowd kept pouring in, and at three o'clock, on the lowest calculation there must have been five thousand persons on the grounds. Never before in California was such a large audience present at an athletic meeting. The grounds were dressed in their best robes, consisting of beautiful flowers and green grass. The center of the enclosure was dressed in a lovely green suit, and the turf looked both inviting and refreshing. The entire managment was faultless, and every thing went off smoothly and at the proper time. The officials were happily selected, and the competitors found no cause for complaint.

THE FIRST EVENT.

The first and second man in each heat was allowed to start in the final—which heat was to finally decide who the winners were. Heat No. 1 was won by E. Mays, V C; 1 yd in 8¼ secs. C A Bailey, G C A C second.

Heat No. 2 was captured by A S Henderson, O A C; 1½ yds in 8 2 5 secs; R Belan, second.

Heat No. 3 was won by C A Jellenesk, O A C, 3 yds; F G O'Kane, O A C, second.

Heat No. 4 was taken by A J Mahoney, A A A C, 6 yds in 8¼ seconds, J C Kortick, O A C being second. The final heat was won by Jelleneak in 8 1-5 secs, E Mays second.

THE AMERICAN CHAMPION WALKER.

George D. Baird, the ex-American champion walker then gave a half mile exhibition of running. Through some mistake the programme said "exhibition walk" but the audience were soon convinced of the error. Mr. Baird is a very ungainly runner and should take a longer stride. He never could compete with such men as Hill, Scott, Sutton or Garrison, but with more practice he might make the 'half' in 2:20 or less. Some years ago Mr. Baird won two championships, the one and the three mile walks, but it seems he has given up heel and toe to practice the heel motion. President Harrison was so delighted with the large audience present that he mistook Baird's running for heel and toe walking and 'perfectly square at that,' his style being acquired from long practice. It was a bad break for Mr. Harrison but he will probably be more guarded when giving his opinion in future. Baird ran the distance in 2:50¼, slow time on such a good track.

JUVENILE SPRINTERS.

The 220 yards handicap, run for O A C juveniles was a very funny and exciting race and the audience cheered and cheered the lilyputs as they scrambled around the track. There was a dead heat for third place between three of the youngsters and they will have to run over again.

The 120 yard run handicap was run as follows:

First heat—S. V. Cassidy O A C, 1½ yds., 1st; A. G. Sheath O A C, 7½ yds, 2nd. Time 12 4-5 sec.

Second heat—C. A. Baily, G C A C 5 yds., 1st; E. Mays, U C, scratch 2nd. Time 12 2-5 sec.

Third heat—J. D. Garrison, A A A C, 2 yds., 1st; N. L. Williams; O A C, 10 yds. 2nd. Time not taken.

Fourth heat—W. Gawne, A A A C, 6 yds.; J. C. Kortick, O A C, 3½ yds. Dead heat. Time 12 3 5 sec.

Fifth heat—C. A. Jellinek, O A C, 3½ yds. 1st; W. T. Haberly, O A C, 12½ yds. 2nd. Time 12 2-5 sec.

Final heat—Cassidy 1st, Jellinek 2nd. Time 12 1-5 sec.

O. T. Morgan, of the Welsh Racing Cyclists, broke the coast safety record for one mile bicycle riding. His time was 2:59 1 5 seconds against 2:59 2-5 made by W. A. Shockley, O. A. C. Mr. Morgan used the pneumatic tire wheel, and on a larger track would have made much faster time. His performance was loudly applauded by the audience The one-mile safety race, handicap, was a farce. Turner, of the B. C. W., who had 175 yards start, winning easily from Morgan and Harris.

The 250-yard run was won by E. M. Frances, O. A C (26 yards); S. V. Casady, O. A. C. (scratch), second; time, 26 2-5 seconds.

F. F. Foster was handicapped out of the 120-yard hurdle race. A. G. Sheath, O. A. C., who had 10 yards start, won, C. W. Meyer, A, A. A. C. (11 yards), being second. Time, 18 1-5 seconds.

The 600-yard handicap run was hotly contested. There were seven starters, and J. A. Christie, O. A. C, won in 1:14 3 5; W. H. Toomey was second. The former had 40 yards start. F. F. Foster, O. A. C. (scratch), won the 220-yard hurdle race, and in doing so he broke the Coast record by one-fifth of a second. Time, 29 seconds. Had Foster been pushed, he certainly could have done much better.

COOLEY WINS.

The three-fourth mile run brought out a good field of starters. Cooley started from scratch and Harry Casidy of the Alpine placed himself five yards behind scratch. The race lay between Cooley and Sol Choynski of the A A C; Cooley won by about two feet in 3 minutes 28 seconds, which breaks the record of 3:46 made by P. D. Skillman. Casidy furnished twenty yards in the rear of Choynski. There were several boxing and wrestling bouts during the day on the turf in front of the grand stand, and on the whole the sport was far above the average. The following were the officers who had charge of the game:

Referee—Wm. Geer Harrison, O A C.

Inspectors—P N Nahl, A O C; James McElroy, O A C; Capt. H. T. Sime, O A C; George W. Jordan, O A C.

Judges at Finish—P N Gafney, Breeder and Sportsman; J A Hammersmith, O A C; V E Schifferstein, O A C.

Field Judges—A C Forsyth, O A C; E A Kolb, O A C; J H Gilbnly, O A C.

Timers, Sprints—Prof. F Sonle, U C; Peter McIntyre, O A C; D W Donnely, O A C.

Timers, Distances—George H Strong, O A C; M H Weed, O A C; Gaston Ashe, O A C.

Starter—Walter A Scott, O A C.

Clerk—Horace Coffin, O A C.

Assistant Clerks—K H Catton, O A C; J M Hamilton, O A C; H L Fabry, O A C.

Scorer—Eugene Van Court, O A C.

Assistant Scorer—DeWitt Van Court, O A C; P P Berubard, O A C.

Announcer—J F Larken, O A C.

Marshals—J Kitchen, Jr., Acme A C; J J Corbett, O A C; Geo. S. Miehlin, O A C.

AMERICAN CHAMPIONSHIP GAMES.

Four hundred and forty yards run—First heat won by W C Downs, N Y A C; A W S Cochrane N Y A C, second; G L Estes, M A C, third. Time, 51 1-5 seconds. Second heat won by D M Dickinson, C A C; T. Spencer, B A A, second; M Remington, M A C, third; time, 52 seconds. Final heat won by Downs; Remington second, Cochrane third. Time, 50 seconds. Dickerson led tor over half the distance, but fell while spurting around the lower turn with Downs, He claimed a foul, but the inspectors agreed that he fell over himself. Remington was interfered with at the start, but Downs won with something in hand.

Half mile run—Won by H L Dadman, M A C; J S Roddy, M A C second; W H Morris Y M C A of Philadelpbia, third. Time, 1 minute 59 1-5 seconds. Dadman's victory was a genuine surprise.

One mile run—Won by A B George, M A C; T P Conneff, M A C, second; J D Reid, A A C, third. Time, 4 minutes 24 4-5 seconds. Reid ran a good race for four-fifths of the distance, when he fell back. Conneff did not push his club mate, allowing him to win without a struggle.

Five mile run—Won by T P Conneff, M A C; W T Young M A C, second; F F Carr, M A C, third, Time, 25 minutes, 47 4 5 seconds. Conneff attempted to beat Carter's American record of 25 minutes 23 3-5 seconds, but failed. He was quite sick at the finish.

One mile walk—Won by C L Nicoll, M A C; W R Burkhardt, P A C, second; E D Lange, M A C, third. Time, 6 minutes 41 1-5 seconds. Nicoll lead for three-quarters of the distance when Burkhardt came closer. Four hundred yards from home Burkhardt drew up level, and for a hundred yards further it was a neck and neck race. Then Burkhardt drew away so easily that all thought the race was over. He had a commanding lead entering the stretch, but fifty yards from home Nicoll made a spurt and drew up almost even with Burkhardt. The latter was not expecting Nicoll, and seeing him at his shoulder threw out his arm, but Nicoll shoved him to one side and the push threw the little fellow off his stride. Nicoll crossed the line first. The judge decided that Burkhardt had fouled Nicoll.

Three mile walk—Won by F P Murray, Acorn A A; C L Nicoll, M A C, second; E D Lange, M A C, third. Time, 22 minutes, 38 seconds. This was another surprise. When "Cinders" announced his intention of competing few thought the veteran would acquit himself so handsomely. He took the lead at the start and at the end of a mile had opened up a gap from Nicoll, while the others were spread eagled. Murray won by 300 yds.

One hundred and twenty yard hurdle race—First heat—Won by F C Puffer, N J A C. Time, 17 secs. Second heat A dead heat between A F Copeland, M A C, and F Ducharme, D A C. Time, 16 1-5secs. The latter won the toss. Third heat—Won by H L Williams, N Y A C. Time, 16 2 5 secs. Copeland won the heat for second men in 16 3-5 secs. Final heat—Won by Ducharme, Copeland second and Williams third. Time, 16 secs.

Two hundred and twenty yard hurdle race—First heat—Won by L C Lewis, A C S N; G Schwegler, N Y A C, second. Time, 26½ secs. Second heat won by P J Finneran B A A; H L Williams, N Y A C, second. Time, 26 secs. Third heat won by F Ducharme, D A C; E E Barnes, N J A C, second. Time, 26 1-5 seconds. Williams won the heat for second men in 26 3-5 secs. Final heat won by Ducharme, Lewis second, Finneran third. Time, 24 4 5 secs. Williams fell at the last hurdle.

Running high jump—Won by A Nickerson, N Y A C, with 5 feet 10 inches; R K Pritchard, M A C; H L Hallock, M A C and D Long, B A A, all tied at 5 feet 9 inches. In the jump off Hallock won with 5 feet 10 inches; Pritchard getting third, with 5 feet 9½ inches.

Running broad jump—Won by A F Copeland, M A C with 23 feet, 3¾ inches; E F Ramsdell, A C S N, second, with 22 feet 5¼ inches; A A Jordan, N Y A C, third, with 22 feet 1¾ inches. Copeland's jump if correct, sustains M W Ford's world's record of 23 feet 3 inches.

Putting Sixteen-pound Shot—Won by George R. Gray, N. Y. A. C, with 43 feet 9 inches; F. L. Lambrecht M. A. C. second with 40 feet 10 inches; J. S. Mitchell, N. Y. A. C., third with 39 feet 9 inches.

Throwing Sixteen-pound Hammer—Won by J. S. Mitchell N. Y. A. C., with 130 feet 8 inches; C. A. S. Queckenberner M. A C, second with 129 feet 8 inches; W. L. Covdon, N. Y. A. C. third with 119feet 2 inches.

Throwing Fifty-six-pound weight—Won by C. A. J. Queckberner M. A. C. with 32 feet 10 inches; D Long. B. A. A. second with 29 feet 5 inches; W. I. Condon, N. Y. A. C. third with 29 feet 1¾ inches. Mitchell made three fouls. Queckberner's throw becomes the world's record.

Tug-of-war teams. first pull—Won by the Acorn A. A., by defeating the M. A. C. seven inches. Two teams of the N. Y. A. C. pulled in the second trial heat, and No. 1 won by a foot and a half. The Acorns won the final pull by a foot. The New Yorks forfeited second place to the Manhattans.

Tug-of-war, individual, final pull—Won by A. Cale, Acorn A. C.; F. L Lambrecht M. A. C. second; C. A. J. Queckberner third.

Two-mile Bicycle Race, First Heat—Won by C M Murphy, N Y A C; W C Crist, C A C, second; P J Berio, M A C third. Time, 5 minutes 54 seconds. Second heat—Won by W F Murphy, N Y A C; A A Zimmerman, N J A C, second; W C Leeds, W A C, third. Time 6 minutes 13¼ seconds. Final Heat—Won by W F Murphy; C M Murphy, second; Zimmerman third. Time 6 minutes 10 3-5 seconds. The Murphy boys had no trouble in beating Willie Windle's conqueror.

Jordan, Carey, Cooper, Crane and Rodenbergh were trying 10 feet 4 inches in the pole vault when darkness caused a postponement.

The officials of the day were:

Referee—Frank W Eddy, D A C. Judges at Finish—G W Carr, M A C; W G Schuyler, N Y A C; John F Huneker, A C S N. Field Judges—W H Rogers, A C S N; Cyril Robinson, M A C; H H Bueymeyer, N Y A C; G B Morrison, B A A. Timers, C C Hughes, M A C; C A Reed, B A A; M Bishop, S I A C. Judge of Walking—Samuel Austin. Starter—George D Turner.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

An Exciting Dash.

Chasing the Jack Rabbit on its Native Heath.

YORK, NEBRASKA.

EDITOR BREEDER AND SPORTSMAN:—No more invigorating sport can he imagined, so it seems to me, than a good chase with three or four fine greyhounds after Jack rabbits. I have followed the pack in fox chasing, and have worried myself and horse into a long fever of excitement and consequent fatigue chasing wolves but I have never known superior sport to that of chasing Jacks over the well nigh level plains of this State.

In 1878, it was our custom at this place to have a chase every few days, in which almost every lover of the sport of our then but small village would join. It was, in fact, about our only outdoor pastime. Everybody enjoyed it and not a few ladies were wont to be with us on these occasions. We had then to go but a couple of miles from town, upon the level prairie, to the north, in order to reach the grounds, which at that time were unobstructed, although long since turned into cultivated fields.

Mr. Laycock, at that time the landlord of one of our pioneer hostelries, was the owner of some of as fine greyhounds as ever chased a Jack over the prairies. He was also the owner of some rather lively saddle horses. His appearance on the public streets astride of one of these horses, followed by his dogs, was ample notice to us all that there was sport in the air. In an incredibly short space of time, from ten to fifteen horsemen might be seen ready for the chase. Away we would canter to the elevated plateau above mentioned, stringing out in single column front about ten paces apart, so as to cover as much ground as possible, we would begin advancing at a brisk walk so as to arouse the rabbits, the dogs being kept in our front near the center of the line.

We usually would not have to cover much ground before a Jack would be sprung and then the chase would begin, every one riding with such reckless daring, at the very top of their horses speed, that it makes me shudder even now as I think of it, and the disastrous consequences which we were inviting by headlessly plunging over that stretch of prairie where rabbit burrows and squirrel holes were not infrequent, which might be the means of throwing both horse and rider with eminent danger to both man and beast.

But accidents were few and far between. Although I do remember of one of our number being laid up for some months with a broken ankle, caused by his horse stumbling and falling on top of him on the frozen ground, while almost even with the hounds and pressing Long Ears closely.

Jack rabbits under these conditions can run. They are fresh and hearty and inured to running, and they show a speed, when thus sprung on their native heath, and running over grounds with which they are thoroughly acquainted, and to "cities of refuge" of their own choosing, where they know they will be secure, which can never be hoped to be witnessed on an inclosed course, such as are provided at coursing club trials.

Any wild game and more particularly a rabbit, will loose courage by being confined. They appear at such disadvantage when turned out upon an inclosed track, that it seems to me but little sport to chase them where the result is a foregone conclusion.

I hear frequently the merits of certain dogs discussed, usually by their enthusiastic owners who boast that it is no trouble for their dogs to "pick up" a jack with but little effort. Well, perhaps this may be true of the coursing event so called, but I should like to see the hound that could pick up a crack running rabbit when jumped on its own ground and given a fair show. Some rabbits, like special animals in all other classes, are much swifter than others, and my experience has been that a good strong rabbit under favorable conditions stands about an even chance for life when chased by the very best dogs in the land. Such coursing is sport unequalled. No one can judge of it until they have actually engaged in the chase under such circumstances as aboved mentioned. I recall with pleasure one particularly fine coursing event which took place on the above named grounds.

It was a beautiful afternoon in the month of January. There was a light fall of snow on the ground, and the air was cool and crisp, yet not too bracing. We had been on the ground but a short time, in fact had but commenced our forward movement, when a fine Jack jumped from near the center of our line, right in front of the hounds. In an instant the crowd of leaders were flying down the road, all well bunched. Three of the dogs ran with scarcely a length's difference between any of them, and scarce a rod behind the Jack. For more than a mile the race was along as smooth and perfect a course as one could wish. After the first few hundred yards dash, the horses began to drop back one by one until only three of ne were found to be near the hounds. One of our party, mounted on an unusually fine animal, was now taking the lead, keeping up with the hounds. I shall never forget the splendid picture presented. In front, and in spite of all the efforts of hounds and horse, the Jack was measuring the ground, more as a low flying bird than an animal. His long ears were laid back along its shoulders, and it appeared like a streak of grey light as it skimmed along over the snow.

The dogs, old Tony now leading the other two by a length, were doing their utmost to lessen the distance between their long noses and the game Behind the dogs but a short distance, seated on a long, lithe, nervy horse, one of our number was urging his steed to its utmost exertion, which was, believe me, at no inconsiderable speed. The rider had dropped his whip, and now leaning forward, utterly regardless of the destruction of that highly useful article of apparel, was belaboring his steed with his hat and occasionally giving vent to a yell, which would have caused a Comanche Indian to turn green with envy had he heard it. It was a pretty and stirring scene.

After running for fully the mile, the Jack was turned across a ploughed field by reason of meeting some parties coming from the opposite direction. It came near proving a fatal move for the rabbit. Away across the field dashed the game and dogs. Before they had gone far over the ploughed ground, we could plainly see that the dogs were gradually closing on the game. Both rabbit and dogs were slipping about as in lighting they would strike on a slanting piece of sod, from which the sun had melted the snow and rendered it slippery. For the last 200 yards over that ground the dog Tony was nipping at the rabbit but just missing his expected grip. The other dogs were some yards behind, all of them with tongues extended and the foam dripping from their mouths.

'If that rabbit ever reaches the road on the opposite side of the field, it will come down this way and make for its burrow not far from where it started" said one of our number. This proved to be the outcome of as pretty a coursing event as I ever witnessed.

The Jack reached the road and it would have done any true sportsmans heart good to see it begin to gradually yet steadily from the first leap it made in the clear and unobstructed path, draw away from the hound.

Several of us hastened back to intercept the course the game was taking. Just as we were nearing the road, down which, not over 300 yards distant the Jack, closely followed by the hound were coming, we noticed the rabbit dash to one side of the road and disappear. The next moment old Tony was at the spot, but to no purpose. The Jack was secure in its burrow, and I for one was glad of it. So splendid a run was deserving of success. If you want to see Jack rabbits run, chase them on their native heath. C. T.

Chasing Hares at Newark.

Coursing is popular. It is daily becoming more so in this city and vicinity. It is a stirring and highly interesting sport. Everybody who becomes interested in it become enthusiasts. Last Sunday was a magnificent day at Newark. The weather was superb. The crowd was ample and generous. The grounds were in excellent condition, as were also the hares and hounds. As a result the assembled sportsmen witnessed some fine coursing. The hares were uncommonly fine ones, spirited and enduring.

The dogs appearing in the events to advantage were Daisy Girl, Tipperary Girl, Harriet S., McGinty, Fleet and Tom Moore.

John Grace acted as judge; slipper, James Wren. The following is a summary of the races:

First round—J. Shea's McGinty beat J. J. Brady's Tom Moore; J. McCormack's Tipperary Girl beat M. Hynes' Lady Hynes; P. Carroll's Harriet S. beat M. Nolan's Fleet; J. Shea's Fenian Boy beat P. O'Connell's Mission Boy; Limerick Dairy Girl beat P. O'Connell's Mark Devlin; J. R. Dickson's Volunteer ran a bye.

Second round—Tipperary Girl beat McGinty; Harriet S. best Fenian Boy; Dairy Girl beat Volunteer.

Third round—Tipperary Girl beat Harriet S; Dairy Girl ran a bye.

Final—Dairy Girl beat Tipperary Girl and won the stake, $25. Tipperary Girl taking $15 and Harriet S. $8.

The sport was also very fine at Ocean View Park. The contest here was for the Taber and Kreling stakes. The following dogs were entered for the sport:

T. J. Cronin's Chicopee Lass, T. Walton's Daily Report, P. F. Canavan's Freestone, J. J. Rademaker's Al Farrow, P. F. Canavan's Maud Jones, T. J. Cronin's Dan B., J. J. Edmonds' Soldier Boy, David Dillon's Sidney Dick, J. J. Edmonde' Bones, J. J. Edmonds' Pippin, Jr., P. F. Canavan's Examiner and John Hugh's Dexter.

In the first ties Dan B. defeated Freestone, Maud Jonee defeated Soldier Boy, Al Farrow defeated Bones, Dexter beat Sydney Dick, Examiner defeated Chicopee Lass, and Pippin, Jr. beat Daily Report.

In the second ties Dan B. defeated Al Farrow, and Examiner ran a bye.

In the final tiee Dan B. defeated Examiner and won for her owner (T. J. Cronin) $30 in coin and a gold badge, which is valued at $40 and which was presented by C. W. Taber, the nominee on the Republican ticket for Supervisor of the Eleventh ward. The second prize ($20) was won by Examiner, and the third ($10) by Al Farrow.

The Coursing Event of the Year.

The sportsmen of the city who love the chase are all agog over the prospects of some fine sport at Merced. Never before has so much interest been taken in any event of this nature on the coast. It is to be made the coming event of the year. No doubt but that it will amply repay all who attend, for there will be an opportunity offered to witness some as fine chasing as was ever placed before the public. Every precaution is being taken by the active and efficient management to render this an event long to be remembered by the coursing loving public. The premiums offered are such as to insure a good attendance of the very best dogs in the country. They will be there, and no doubt but that all races will be hotly contested from start to finish. The first prize is $500, followed by a second for $300 and a third one of $100

It is stated also that dogs winning two courses will get $20 each. This is a very liberal showing, and should call out the very best dogs in this entire section of country. It is evidenced by the high interest already taken by the sportsmen of this city that this event will far surpass anything ever attempted in this line west of the Rockies.

They are not only in earnest, but their interest has reached a point which can only be described properly by the term enthusiasm.

One exceedingly good feature about the event is that the officers and managers are determined that it shall be in all things square and honorable. Any attempt by any one to avoid the spirit of the rules governing this event will be barred from participating in the races. All dogs entered, must be fairly so, under their true name and that of their genuine owner. No hyplay or chicanery of any nature will be permitted. This statement is deemed necessary, owing to the fact that certain transactions in like events has given rise to discussion and hard feeling in coursing matters. Let it be strictly guarded in this event that no grounds may be found for subsequent bitterness and accusation as to unfair treatment.

Entries close on November 13th, and all arrangements must be complete with the Secretary, Mr. J. R. Dickson, before that time. Remember the date, Nov. 18th.

Whelps.

F. A. Amee, Irish Setter Nida, (Lady Elelio T—Mike T.) by L. L. Campbell's Barrymore, 6 pups, 5 dogs, 1 bitch.

It is absolutely essential that more good dogs be imported and bred on the coast. The interest is such as to warrant the enterprise. It is impractical for every one wishing a good dog to have it expressed from the east. The cost is too great. We must breed our own dogs. There are a number of good kennels on the coast, but we need more of them.

Mrs. Cleveland's German Poodle.

The good will of the American people was evidenced in a striking manner toward Mr. and Mrs. President Cleveland, by the large number of pets that were showered upon them.

Among this collection was an Alderney cow, the gift of Geo. W. Childs; Ray, the cream colored mastiff sent by Richard Watson Gilder; a beagle hound, brought from Germany by Mrs. Cleveland's mother; a red squirrel, a monkey, a canary, an alligator, a coon cat, a deer, the special pet and pride of the President, and last, but by no means least, the famous black poodle, sent as a puppy from Holland.

This latter, while a very nice appearing dog, seemed to be melancholly and lonely. It took no interest in anything whatever. The servants and all observers, declared the dog to be deaf as a post. When spoken to it gave no heed. Command and entreaty were alike unheeded, until one day by chance a Dutchman wandered into the east room where the poodle chanced to be.

Noticing the little poodle he spoke to it in German, at which the puppy, which had been lying on the floor in its usually abstracted manner, jumped up and frisked about with every manifestation of pleasure. These manifestations of pleasure increased as the German continued to talk to the poodle until those present decided that the dog had evidently gone mad.

Gradually the truth began to dawn on the minds of all as the dog clung to the Dutchman with every indication of delight.

It was the first words that it had ever understood in its new home. No wonder it was pleased.

Mr. C. P. Hubbard, of Broken Bow, Nebraska, has a full assortment of Irish setters, Pointers and beagles in his "Loup Kennels."

In dogs, as in everything else, it pays to handle only the best, A good dog is a comfort and a pleasure, a poor dog is worse than no dog at all.

If you wish to conquer a savage dog, saturate a glove strongly with ammonia, and hold it to his nostrils. The pungent odor will take away his desire to bite or do much else, which requires an inhaling process.

The treadmill should be abolished If you cannot give your dog proper exercise in the open air, don't keep him. Let some one have him who will care for him properly. Treadmill exercise will break the spirit of the best dog in the land.

Every agricultural and industrial fair, should encourage the holding of a bench show in connection therewith. Dogs are so useful to the farmers, that they should encourage their breeding. Keep Old Tray out of bad company by furnishing him with good companions.

All interested in rough coated St. Bernards will be gratified to see that splendid old dog Jumbo (No. 5663 A. K. R.) performing with Arizona Joe at the Orpheum this week. He is of royal blood and bears his honors becomingly. We may have something more to say of him in the near future.

A coursing match is announced to take place at Lodi, tomorrow, Sunday, the 2d instant. The event will be conducted under the management of the Lodi Coursing Club. Entrance fee $2. The grounds selected are said to be fine for the sport.

Full particulars may be obtained from J. W. Dougherty or D. L. Smith, president and secretary of the club.

A bench show will be held in this city, under the auspices of the Pacific Kennel Club, sometime in next April. It should be made a success. There is no good reason why it should not be successful, in the highest degree.

From the nature and business tact of the gentlemen in charge of the matter we have no hesitation in saying that it will be a surprise to the public, when compared with the shows of the past. Not that the shows of the past have been failures by any means, but because there is a greater interest now taken in the matter than ever before.

Messrs Norman and Linndle, have just returned from a visit to Watsonville and the Allender Kennels.

The dogs were found in excellent condition, and those intended for the field trials taking to their work in a splendid manner. The visitors were given an opportunity to try their hands at quail shooting, which they improved to the best of their ability, under the circumstances, and these must have been very poor, at least we will kindly so state, for one single bird was the result of their efforts. The object of the visitors was mainly for the purpose of securing a dog for Mr. Frank Maskey, from Nestor—Dash California litter recently whelped. This litter is said to be as fine as could be expected, and taking their breeding into consideration, this may be said to be a high encomium.

Mr. F. G. Stewart, formerly of Hoosic Falls, New York, one of the best posted and most earnest dog fanciers and breeders in the country, has just returned from an extended visit from the east.

His well known kennels at Hoosic Falls contains some of the best specimens of the beagle, greyhounds, dachshunds and foxhounds.

Mr. Stewart has had exceptionally fine luck with beagles' having sold nearly twenty-five of these beautiful little animals since last May. His greyhounds also stand in the first rank. He found the duck hunting exceedingly fine at Cape Cod where sixty-five birds were bagged in one hour.

Mr. Stewart, we are pleased to say, will remain on the coast, probably in this city. We extend him a cordial welcome.

THE GUN.

Autumn Shooting on the Farm.

[WRITTEN FOR THE BREEDER AND SPORTSMAN.]

When the golden days of Autumn,
Painte the leavee a scarlet hue,
And night'e silent breath congealing,
Chills to frost the falling dew;
When the prairie chickens gather,
In great numbers for their flight,
I love to sally forth to shoot them,
By the early morning light.

See them sitting on the haystacks,
And upon the shocks of corn,
Lighting on the fence by hundreds,
Ers the day is fairly born;
Winging swift and low o'er meadows,
Perched upon the tallest trees,
While the world is yet a slumber,
Yet unwaked the morning breeze.

How I love to steal upon them,
Ere my prssence they divine,
For the pleasure is exciting,
As the taste of rare old wine.
Lining two or more fine fellowe,
In the range of my old gun,
At its fire to see them tumble,
As they two or more were one.

You fine fellows in the city,
Never know the pride and joy,
Which then fills the heaving bosom,
Of the farmer-hunter boy
Call it "murder" if you want to,
Not a fig for that care I;
It makes not the sport less pleasant,
Nor lees sweet the chicken pie.

FARMER BOY.

Kindness and Buckwheat Tames Quail.

A correspondent of the New York Sun, writing from Scranton, Pennsylvania, gives an interesting account of the manner in which a flock of quail were tamed. Kindness and buckwheat are said to have accomplished the result as the following description of the manner in which the work was done attests:

Mrs. N. D. Snyder, of Jefferson township, saw a lot of quail dusting themselves under some currant bushes in the back end of her garden The birds looked so happy and contented that she thought it would be too bad to disturb them, so she returned to the house without pulling the weeds out of a patch of onions that she had gone there for the purpose of doing. In an hour or so the quails had disappeared in the tall timothy of the adjourning meadow, and Mrs Snyder scattered some buckwheat around where they had been wallowing. On the following day the birds came there again, gobbled up the buckwheat and had a good time. Every day for a week or so Mrs. Snyder scatterad grain among the bushes for the quails to feed on, and the birds soon got so that they looked for food in the garden as regularly as they did for a resting place at night out in the woods, back of the big meadow lot.

One morning the kind hearted woman forgot to throw the buckwheat, but the quails reminded her of her negligeuce by appearing at the usual hour and making a great fuss and noise because there wasn't any grain in the garden for them to pick up. Mrs. Snyder let the birds hunt for other kinds of food that day, and for several mornings after that she didn't fail to give them a good feed of buckwheat. Then she missed a morning to see how the quails would act when they didn't find any grain near the currant bushes, watching from a second story window for them to make their appearance.

Promptly on time the whole flock crept under the garden fence from the meadow, ran among the bushes and began to dodge and flutter about where they had been in the habit of finding the buckwheat. When they had searched long enough to learn that no grain had been put there for them the birds piped in low tones, fluttered uneasily, scattered into the vegetable beds and appeared to be very much disappointed. In a little while the quails gave up the search, assembled under the currant bushes and went to dusting themselves in the soil. Mrs. Snyder counted fourteen in the flock, and then she went downstairs, got a basinful of buckwheat and tiptoed her way into the garden.

When she had got as near to the quails as she could go without scaring them Mrs. Snyder flung a handful of buckwheat toward the quiet little flock. It fell among them, and all scrambled under the fence and went out of sight in a hurry. Then she threw some more of the grain on the ground where they had been, and secreted herself behind a row of pea vines. Presently one of the birds ventured to crawl under the fence into the garden. It soon found the buckwheat and set to filling its crop, and at this the other birds took courage, filed from their hiding places and went to picking up the grain as though each was determined to get its share

From her place of concealment Mrs. Snyder flung a handful of buckwheat into the air so that it fell into the midst of the flock. It scared the birds a little, but they quickly resumed their feeding, and Mrs Snyder began to whistle to them, flinging more grain into the air as she whistled. That excited their curiosity just enough to make them look up for a moment, and Mrs. Snyder emptied the basin and stole away, without letting the birds see her. She fed the quails in this way for a few days, gradually got them used to her whistle and voice, and let them get sight of her by degrees. Inside of a month from the time she first saw the birds in the garden she had them so well tamed that they fluttered out of the meadow whenever she called them, ate in her presence and did not seem to fear her at all. Since then Mrs. Snyder has taken a good deal of comfort with her strange little flock, and she said the other day that the confidence the birds have in her pays her many times over for all the trouble she has made herself in getting the wild little creatures to be as tame as they are.

Dr. A. De Monco's Grizzly and Lion.

Some weeks ago I called on Dr. A. De Mouco, of Denver, and as our wont, was soon engaged in talking of dog and gun. The Doctor has a fine pointer, Don, by name, of which he has just cause to be proud. In speaking of the fine quail fields of Texas, the Doctor at once became a most attentive listener, and finally decided that he must take his fall outing in that State.

"Where are you going?" he inquired, and when we told him that we preferred the mountain districts and the more exciting chase after large game, he said: "I have got over all that. You know I spent ten years in the Rockies, in Wyoming, Montana and Colorado. The sport is exciting in the extreme, there can be no doubt of that, but I have killed every species of large game, and I now prefer the easier and to me better sport with dog and birds."

"I remember one fall," he continued, "when I spent some three months in the mountains with a friend. We had our camp away out, some seventy-five miles or more from Rollins, in the very wildest mountain districts of that region."

"On that hunt I killed the largest grizzly bear it has ever been my fortune to meet with. The morning was lowering, and gave every evidence of a heavy fall of snow. After I had been out from camp some time, in the vain attempt to get a shot at a mountain lion, which I had tracked several times unsuccessfully, I was returning to camp just as the air was being filled with large white flakes, that came down as steadily and silently as could be imagined."

"I was coming along the side of a very deep ravine, the rocky sides of which were well nigh perpendicular, when I heard a growl that caused me to look about apprehensively. I finally looked into the ravine, and there, reared upon his hind legs stood the largest grizzly I ever beheld. I took in the situation and calculated that I could put considerable distance between myself and the great brute, even should my first shot prove ineffectual.

"I leveled my rifle, which was an uncommon heavy one, carrying a large ball and waited a moment until the bear had lowered his head so I could get a good square shot. I then pulled the trigger, and waiting not even to note the effect of my shot ran at the top of my speed to more elevated ground, but did not stop until I reached camp, where I awaited the return of my companion.

"We then together cautiously returned and could discover no place about the ravine where the bear had left it, and much to my surprise we found it laying dead where I shot it. The ball had literally torn his skull clean off, dashing out his brains, having struck him just above the eyes, but with a downward slant. I have the robe yet.

"The mountain lion, to which I above refer, was killed by me the next day.

"I managed to reach him in this way. I had learned by tracking him that he always crossed a ravine on a large fallen pine, which I would not attempt to cross as it was many feet below to the bottom of the gorge.

"I sent my companion to track him while I secreted myself within shot of this fallen tree. I did not have to wait long for his coming. He walked out on the log and stopped, presenting a beautiful picture as he lashed his long tail from side to side. The pause was fatal to him, as it gave me an easy shot from my concealment, and I sent a ball crashing through his body just back of his fore legs, and he fell in a heap at the bottom of the ravine.

"This is the only mountain lion I killed during my whole mountain experience, as they are exceedingly cautious, their keen scent enabling them to slip away from the hunter when pursued."

Count "Kreutzer Sonata" and the Bear.

An incident is related of the now celebrated Count Tolstoi, showing that the cunning hand, which has so marvelously wielded the pen as to set the civilized world agog, showing that he is somewhat of a novice in bear hunting. The incident related shows how near he came losing his life, which he would have done but for his presence of mind.

He went out on a bear hunt with some of his friends, and, after selecting a spot which commanded a good view of the surrounding grounds, some of the more experienced hunters suggested that the snow had better be trampled down so that it would be easier for them to move about and get out of Bruin's way and have time enough to take a shot at him if he should come upon them unexpectedly.

The Count, however, although up to his waist in the snow, objected to this and said that it was entirely unnecessary, since the whole thing consisted of shooting the bear and not wrestling with him.

They did not have to wait long, for the bear, which had just risen from its lair, was walking along to get out of the way of the hunters when it suddenly stepped out into the open space directly in front of Tolstoi.

He coolly took aim and fired, but the ball, for some reason or other, went wide of its mark. Taking aim again he fired, this time hitting the bear in the head, and the bullet lodged in the lower jaw, and of course only made a very irritating wound, which made the bear so savage that, taking a few jumps, he was upon Tolstoi before he was able to realize it. Just as the bear came close enough to him, he dropped down, and of course the bear went right over his body. Tolstoi's whole body sunk into the deep snow, and the only part that remained exposed was his head, which the bear tackled as soon as he had recovered from his surprise in seeing Tolstoi disappear so suddenly.

Tolstoi did his best to push his head down as low as possible, and elevated his fur cap for the bear to bite. Twice the savage animal snapped at it, and then discovering his mistake, made a bite deeper down, this time taking a piece of flesh from the Count's right cheek.

Just at this moment his comrades returned, and by their loud yells succeeded in driving away the bear, who very slowly turned his back upon the hunters and walked into the woods, master of the situation.

The Last of a Noble Race.

The interior department has recently communicated with acting Governor Melburn of Wyoming, relative to the whereabouts and safety of a band of about seventy buffalo, that escaped from the Yellowstone National Park in July. Reports have been received stating that the herd has been seen in the valley of the Big Horn and the region of the Red Desert, between Rawlins and the Shoshone Indian reservation.

Hunting parties have been formed to go out and attempt their recapture but so far reported have been unsuccessful. It is proposed that a large party be organized by the state authorities, under the direction of the state authorities for the purpose of driving them back to the park.

This will afford a last opportunity, perhaps, for the splendid sport of chasing these, the sole remaining representatives of a race of animals, which, but a few years ago, existed on the great plains, in immeuse herds, numbering thousands upon thousands.

The country through which they will have to be driven, presents the wildest and most picturesque scenery of any to be found on the continent. It is to be feared that the Indians in disregard of law may have discovered and slain many of them.

This herd is said to contain the only buffalo in the country in a wild state.

We sincerely trust that they may be returned to the park and preserved by the government in a state as near that of their original condition as possible. It would be an irreparable loss should they be permitted to stray away and fall a prey to the Indians and hunters of the country.

Practical and Impractical Sportsmanship.

It is somewhat remarkable to notice the tenacity and unweilding firmness with which many hunters adhere to a certain brand or make of gun.

This is easily accounted for, outside of any moving cause which might tend to bias or pedjudice their judgment in the matter. Tho continued use of a certain patern, which under all circumstances gives to the user good satisfaction, is cause enough for the high enconiums which he may choose to heap upon the inventor and manufacturers of his chosen weapon. But when anyone, in this day of advanced science in gun making, takes the unqualified position that this or that brand of gun is the very best one in the market, he only succeeds in causing a smile to spread over the countenance of his readers, who, while they may admire his enthusiasm, are compelled to feel that his judgment is based on limited experience.

It is almost needless to say to the average sportsman that there are a large number of guns of well nigh equal merit for field use. Improvements are being made so rapidly that the gunner of to-day no sooner discovers a point where improvement can be made, than he sees such improvement has actually been made.

Gun making, it would appear, is now well nigh perfected, and the discussion of sportsmen seems to be turned to the question of the penetrative force, which a given quantity of the several powders may give to shot or ball.

The discussion, made interesting by actual demonstration and numberless tests, has long since carried the subject beyond the range of practical field work and made it a matter of mere speculative interest. In this, as in a great deal of the work of our desk or theoretical hunters, whose most dangerous weapons are a number two soft faber, or the ordinary steel pen, the battle wages hot and fierce. Straw game is set up and knocked down by shots which are models of skillful marksmanship.

The practical hunter, in the mean time, is found, all oblivious of these all important matters, going right on, bagging more game, ten to one, than the whole improved and pre-eminently scientific association of hunters.

To him a gun is a gun, and powder is powder. His object is to shoot something and he usually succeeds. It is undoubtedly true, that the great majority of the game of the country is killed by men who would miss fifty per cent of the Peoria black-birds or glass balls, when thrown from a trap, and this too with a cheap gun of an inferior brand or no brand at all—just simply a gun.

We do not write depreciatingly of good guns, far from it, for we are as partial to a superior gun, as anyone can be, and recognize and appreciate the improvements of recent years made in their manufacture. The practical situation remains unchanged, however, which is that the practical work in the field is too frequently overshot by the majority of organized sporting bodies in their efforts to improve it.

The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, 7s, 6d; postage, 6d extra. Published by CHARLES LANCASTER, 151 New Bond Street London, W.

Some parties report the quail shooting to have been very fine at Point San Pedro..

Messrs. Bosqui, Kettle and Orr almost repeated their performance of last Sunday, bringing in about 125 quail.

Mr. E. H. Briggs was out at Throckmorton's ranch but secured only about a dozen and a half of birds and found the tramping hard work.

Some of the hunters complain that the birds are growing quite shy. This is well. Good scores will now begin to indicate good marksmanship.

Local sportsmen had a hot time of it on last Sunday. The day was too warm for both man and dog; however, a number of good bags were made on quail.

Mr. A. S. Sage, of Canon City, Colorado, forwards a communication to a gentleman at Pueblo conveying the intelligence, and describing how he killed two bears at one shot. The ball, fired from a 45—70 Winchester went through the first and broke the spine of the second one. A lucky and remarkable shot indeed.

Mr. J. A. R. Elliott, of Kansas City, seems to be the champion shot at live birds. We would much love to see he and Dr. Carver come together in a match at 100 live birds. The chances would be almost even. In a recent match for $1,000 a side Elliott beat Edgar G. Murphy by a score of 93 to 88, out af 100 birds, five of Elliott's birds falling out of bounds, killed by second barrel purposely.

The Southern sportsmen are having some of the finest woodcock shooting this fall that they have ever known. The high waters have driven the birds from the low lands to the upper and more open fields where they present far easier shooting than that presented while in their usual haunts. There is no finer sport for either man or dog, than that presented by these birds.

Judging from advices from all over the country, it would seem that the principal shooting for the future will be confined to quail and migratory birds. It is wonderful to note how completely the prairie chickens have vanished from the districts in which they were so well known but a few years ago. They do not seem to take to civilization with anything like the good grace which marks the quail. The latter seem to multiply rapidly whenever given an opportunity, but not so with the chicken. It would seem that the pheasant could be bred more easily than most any other bird, in districts suited to its nature and thus we can rely upon having a diversion of sport. In this State, it is believed that the conditions are most favorable for the introduction of pheasants of different species, our varying altitudes and temperatures being such as to allow the birds to seek homes approximating their native countries more nearly than that of almost any other State in the Union. The valleys, tablelands or mountain districts are open to them, with spots of tangled copse for shelter and seclusion. It is to be hoped that our sportsmen will take liberal advantage of these favorable circumstances and push the work to a successful issue.

ROD.

Which Shall it Be Seals or Codfish?

The questiou of protecting the seal fisheries has been agitated for several years. It has been the subject of national legislation and has occupied the attention of some of the leading minds of the country. But in spite of all endeavors to the contrary, the seal fisheries have been for some time past and still are steadily waning. It will be but a comparatively short time until they will become almost extinct. As a commercial business, it ie now attended with painfully frequent failures.

Senator Pettigrew, of Dakota, has called attention to the fact that if the seal were extinct, no serious inconveuience would accrue to the country, and least of all, would be the loss to the laborere engaged iu the business.

The Senator calls attention to the fact that cod fisheries could be established on the Alaska Cossts, which would be much more profitable to all concerned than that of the seal interests. It would furnish more employment to labor as it would require the employment of vast numbers of persons in carrying on the industry.

The change from the seal industry to that of codfish, migbt not be pandering to the codfish aristocracy of the country, but it would be opening up a channel for furnishing an increased food supply to the millions. In this light, it would seem that there could he but an answer to the question: Shall the chaoge be made?

The question of the preservation of the territory snd interests involved, are and ever have been under the supervision and control of the Hudson Bay Company. It is but the conflict, in another phase, of the interests of the people as a whole against the few, who have occupied vast interests which have occupied great extent of territory to carry on their several lines of business to the detriment of the people who have come iu at a later period.

The country is made for the people. The right of corporate power has ever fallen away before this advance of settlement and the artifully arranged and subtly presented claim of vested interests has never been seriously advanced since the days of the Dartmoth College case. The rights, the interests and the welfare of the whole people are superior to the claim of the few, however, much this claim may contribute to the commerce of the country, it requires but a glance at the question to become convinced, that the development of any interest which would supply an article of commerce which would become of general use, would be of far greater importance as a commercial factor.

The districts, no doubt, directly interested in the change, would derive the greatest benefit. and the whole country would be proportionately aided. The question should be treated solely from the standpoint of the greatest good to the great number. The Victoria Times speaking of the seal interests shows that the pay for those engaged in it, is not such as to be of any especial benefit to labor as they are poorly paid. It says:

"For some time back the seal hunters on this port have been discussing the question of wages, and lately several of them met together and agreed upon a fixed sum that should be in the future considered ae the right amount for seal killing. The figure decided upon was $3 per skin, and all the hunters of the port pledged themselves not to ship for a less wage than this.

The schooner owners and masters say that the uncertain state of the business forbids any such hard end fast rule. While aware that the work of the hunter is arduous and dangerous, demanding good men for it, they think that it will be impossible to acceed to the demande of the hunters. Several of the schooner owners suggest that a sliding scale be adopted, the amount paid to the huntere to be controlled by the price paid for sealskins by the dealers. They point out that if for instance the price of sealskins should drop to $5 or $6, it would be prohibitive of the bneinees to pay $3 for each skin to the hunters.

In view of thie fact eteps have been taken to engage men from the east who will be willing to accept the old rate of pay, and it is probable that several porpoise and swordfish hunters from Nova Scotia ports will he sent for, should the seal hunters of this port pereist in their demands. These porpoise hunters are all good shots. and the owners and mastere of sealers olaim that they will make good seal huntere.

There is no donbt the hunters have some cleim for consideration iu their demands for an increase, as their work is dangerone; but at the present ecale of wagee good men make very fair pey, although perhaps not enough to offset the privations and triale of a seal hunter's life. The men now here are well trained in the business, and no donbt some consideration will be taken of that fact before the ownere import comparatively strenge men. However, the hunters will no donbt on their part consider the propoeition of the owners that a sliding scale be adopted, and the matter may be adjusted amicably.

The Effect of Foul Fishing.

The Corning Observer has the following to say relative to the condition of the fish in the upper Sacramento river:

"Laet year there was a good deal of fish caught in the river all the way to Red Bluff. This year there are no large fish canght, bnt very few coming up, not enough to pay men to haul nets. Now, something ie wrong below. No doubt the mean, selfish, dog-in-the-manger work is a net put across the river somewhere below. If this is the case, it can be easily discovered. Find out where salmon is shipped from and right ehove that place the net will be discovered. We understand the fishermen of Tehama have given up trying to catch fish, where last year they ehipped an immeuse qnantity. If this net ie put across it will prevent the fish spewning, and by that meene the salmon will be driven away from the Sacramento river."

This matter ehould receive the prompt attention of the anthorities. The fishing grounds of the State are very much circumscribsd, especially for trout and salmon, ae there are very few streams in which there is to be found water sufficient during the year, in whicb they can be successfnlly bred. The use of nets, as above suggested, will keep the fish from their spewning grounds, and as a result the rivere will become depleted. At best the State must make such provision as will guarantee the annual replenishing of the streams. Let no euch work he carried on as will prevent the fish having free access to their spawning beds. In this field there is pressing demand for active and efficient work. Let the matter be thoroughly investigated to the end that no guilty man escape.

Culture of Lobster and Cod.

It is very probable that unless we have resort to artificial culture to replenish our lobster fisheries there will be a marked decline in Nova Scotia's ontput during the next few years. Already New Foundland is ahead of us in this branch of fish culture, for under the management of Adolph Nielsen, a Norwegian expert, "the ancient colony" has taken a new departure in the propagation of cod and lobsters. In a recent article Rev. Moses Harvey writes that the fish hatchery on the shore of Trinity Bay is the largest in the world for the propagation of codfish and lobsters, and capable of hatching 300,000,000 of cod and 200,000,000 lobsters in a single season.

A single mother lobster can stow away no less than 20,000 eggs, and she carries these about with her until they are ripened and hatched. The lobster trapper takes these mother fish and carries them to the factory, where they are thrown into boiling water, and of course the eggs are destroyed. The quantity of lobeter ova that perish in this way is beyond all calculation, and is one great cause of depleted fisheries.

Mr Havey thus describee Mr. Nielsen's ingenions methods: He gete the female lobster at the factories before they are boiled, and with a sort of spoon constructed for the purpose he strips the eggs from the fibrils and returns the lobster uninjured. He takes the eggs, which are not nearly so delicate as those of the cod, and places them in the incubators, where the water is kept in constant motion.

After a time, longer or ehorter according to the degree of ripeness they have reached before being removed from the mother, these ova are hatched. With some of them only two days are required; in the case of others less advanced a month or even two months may be needed to hatch them. Unlike the ood the young lobster must be fed, for it has no yolk sac to feed on when it breaks from the shell. Mussels chopped fine, with occasioonally a few yolks of eggs, furnish food on which they grow rapidly, and in five or six days they have gone through their first shelling and are fit to be set free in the water to pick up their own living

Mr. Nielsen has invented floating incubators to be placed in the water near the lobster factories which are scattered around the shores. In these incubators the eggs are placed and attended to by men properly instructed. He has 432 of these floating incubators distributed thie year at thirteen different stations—thirty-six at oech. They are reported to be working admirably. There would be no serious difficulty involved in making similar experiments upon our own coast, and we understand that the energetio minister of marine already has the project under consideration.—Ex.

Stanley's Credentials as a Member of the Amalgimated Association of —— Fishers.

The Fishing Gazette of London is responsible for the following which shows thet the great African explorer is eomething of a fisher himself:

Mr. H. M. Stanley, the celebrated African explorer, was in our office the other day, and after congretulating him on the evident great improvement in hie health, we took the opportunity of asking him how it was his expedition did not do some fishing.

"How was it, Mr. Stanley, that you did not get more fish? If your men had been able to fish you would have had plenty of food."

"My dear Mr. Marston," said Mr. S., "if you edited all the Fishing Gazettes in the world, if you had been with me I am quite sure you would never have asked me to let you stop to fish. Like the rest of us, you would have been eager to press on to the gardens and banana plantations. As a recreation, fishing is all very well, but if you wanted your dinner, and had the choice of getting it in a Strand restaurant or fishing for it in the Thames —well," said Mr. Stanley, smiling, "that's much about ae it was with us."

And then, as though to convey another delicate hint that those who fished for their dinners did not always get them, he said—

"I remember on one occasion seeing Lieutenant Stairs fishing for hours from a rock, and he only caught one or two little fish; yet he had a rod and a hook, and string, and a bait." Mr. Stanley emphasized the word bait strongly.

"But eurely, Mr. Stanley, there were fish in the rivers you met with and marched along?"

"Oh, yes, plenty of fish, and fine ones too."

And then Mr, S. proceeded to tell us a little fish story, which takes the cake this week.

"I saw," he said, "one of our men catch a fine fish, which had another fine fish inside him, and thet fish had a big ffsh inside him also; so he caught three fish at once."

"Was it a large fish?" we asked.

"Oh, yes, a big fellow."

"As big as that?" -(pointing to a 10 lb. Thamee trout in a glass case which hangs on our office wall).

"Larger than that," said Mr. Stanley. Adding, "As large as that"—

indicating a space about as long ae his umbrella).

"My dear sir, if we each had had fishing rods and lines, instead of losing as many men as we did we should have lost all."

A non-angling friend who was prerent suggested that a net might bave been useful.

"Ah!" eeid Mr. S, "If we only had had a big net and a big crane fastened over the river we should have had some big hauls of fish, doubtless."

It was no use; we could not convince Mr. Stanley that the ancient art and mystery of fishing—an art as old as mankind—would have been of any use to him on hie expeditione. On the other hand, we cannot admit that he convinced us that it would not.

Mr. Stanley's own little fish story proves that large and voracious fish abound, unless the distinguished traveler, having entered the Benedictine order, considers that the 'copper kettle' would be a useful addition to hie household goods, and was competing for it; anyway he must have wanted a big kettle to cook the fish in.

The beauty of the weather on last Sunday was instrumental in calling out more lovers of the rod and reel than any day in some weeks past. The coast in every direction was lined with fishermen. Not a rock could be found at any of the available points but was occupied, while the bay was dotted all day long with fishing smacks, and crafts of every description filled with anglers. The waters about Sausalito and off Yellow Bluff were central resorts. The catches were good, rock cod and smelt being especially plentiful.

Oyster Culture on the Coast.

The Astoria Pioneer, speaking of the oyster beds of this coast has the following to say of the industry:

With the advent of a railroad to Wallaps harbor, the oyster business of Shoalwater bay will be increased to immense proportions. The title to the vast shoals is said not to be clear at present, but the question will shortly be settled, when it is said that the business of transporting oysters from the east will be engsged in largely. Nowhere in the country are the prospects so good in this respect, and there is comparatively little expense connected with the growing of the bivalves in that section. In San Francisco bay the beds have to be protected from the raide of the deadly enemy of the oyster, the stingeree, by a fence extending for mile after mile, while in Pacific conuty there ie only the star fish to contend with, and these can easily be killed at low tide. The stingeree, on the contrary, comes and goes with the tide, and consequently can pursne his depredations with impnnity. Thonsands of dollars are spent annually in San Francisco by the Morgan company in keeping their fences in good condition, and thie fact, in addition to the greater cost of transportaton to the Sonnd, where there is a large market to be supplied, is an important factor in favor of Shoalwater bay The difference in the time required to reach the Sound cities is also favorable to Washington business, the fish arriving in much better condition.

This trade will yet contribnte largely to the development and welfare of Pacific conuty.

An Immense Run of Salmon.

The Tacoma Ledger of the 23rd has this to say of salmon fishing in that region:

"The bay ie alive with salmon and the fishermen are taking more than they can dispose of. At 10 o'clock yesterday morning the Tacoma Fishing company's men cast their net off shore near the fish house, and surrounded at least ten tons of the big fellows.

From the time the draw strings were closed in making prisoners of the salmon the sport was most exciting, and it was nearly 5 o'clock before the last fish was clear of the net. They were given away by the host load to any one who happened along and then there were more than the fishermen could handle. The fishers brought four boat loads to shore, the lot aggregating 8700 ponnds. All the available space in and around the fish house is piled high with big fat salmon ranging from twenty to thirty ponnds in weight. The quantity is so great that Hume says that he will either have to sell a portion of them for little or nothing or give them away. Nearly five tons were turned loose from the net. They will probably be canght again to-day."

The Splendid Salmon Catch.

The Seattle Press, speaking of the fishing interests of that section says: "From time to time during the past fishing season the Vanconver Truth has informed its readers of the large amount of fresh salmon on ice that was being shipped eastwards over the Canadian Pacific from this city by express to the markets, and it gives the total amount of shipments by Messrs. D. W. Port & Co. and W. H. Vianen, our wholesale dealers, both of whom have had a considerable number of men employed in the industry. Nearly every station along the C. P. R from west to east has been supplied by either one of the firms, the largest markets being Winnipeg, Toronto, Montreal and New York. Most of the consignments of Port & Co. are sent to their Toronto house, from which place the salmon are distributed throughout Ontario and New York state and city. The total number of pounds forwarded by both firms during six months is as near as can be calculated about 800,000 lbs. or 400 tons, valued at about $40 000. This amount is about equally divided between the two firms as far as shipments are concerned, and is over twice as much as exported any other year in the same manner. During the three yeers since the shipments began, the shipments increased from about 20,000 lbs. the first year. The outlook for next year is exceedingly bright, and if the salmon run well, it ie said that two other firms will begin operations in this line in this city, so that the competition may possibly be keen.

Sawdust in the Columbia River.

The Paktawet Gazette has this to say of the wanton destruction of the fishing intersets in the Columbia river by the sawmill interests: "An unusually large quantity of sawdust is found floating in the river at present. Two fishermen from Waterford called at our office recently to state that the sawdust was piling up on the banks and damaging fishing. This ie a matter that needs the attention of our fish commissioner, as the sawdust ie very detrimental to fishing interests, beeides forming almost insurmountable obstacles to navigation in the shape of bare which it is almost impossible to remove. There is a strict law against dumping sawdust in the river which should be enforced.

Salmon fishing is reported as being exceedingly fine, all along the coast this fall. Some accounts of remarkably fine catchee with the hook and line comes from Tacoma. The bay at that point ie said to be literally swarming with these splendid fish which bite eegerly and afford much sport to the anglers in landing them in the boet.

A great deal of care is necessary in landing a good sized salmon, as their months are exceedingly tender and any hand, save that of an experienced fisherman, is apt to pull so eagerly as to break the hold of the hook. Gentleness, skill and patience is required to land a selmon.

An exchange relates the following aneodote of the late Captain Dunn: "On the night of his demise, and within a few hours of the time of his tragic ending he was talking with a knot of Fraser river salmon canners. He was as usual brim full of fun, put he presently put on a very serious countenance and said: 'I have noticed, gentlemen, that before you put fish in the cans you always remove the tails. This not much to be wondered at, for the tail is really not a palatable part of the fish. But the thing that puzzles me to understand is that as soon ae yon have removed the tails and sealed the cans yon go to great pains and expense to send the fish across the ocean to London to have them retailed!' An explosion of loud laughter testified that the last joke of the gallant and lamented captain, told with all that pranky humor, which distinguished the man, had succeeded."

GRAND OPENING

—OF THE—

CORONADO BEACH

Driving Park,

Under the Auspices of the

	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle	4th dam by Wblp.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. In any ordinary weather the roads are very good, and they are fairly good after the unusually heavy rainfall of the past winter.

All stock sent from San Francisco may be brought over by Garcia's Express, No. 3 Market street, San Francisco. They also have an order box outside of Hawley Bros.' Hardware house on the corner of Market and Beale streets. The express leaves San Francisco on the Creek route boat, which starts at 1:30, but all orders should be in the order box at Market and Beale streets by 10 o'clock, or at the office, No. 3 Market street, by 11 o'clock at the latest. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car.

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

For Sale.

SULTAN QUEEN,

By SULTAN, dam by WHIPPLE'S HAMBLETONIAN.

Seven years old; perfectly sound and kind; in foal to SIDNEY, with a foal by Sidney which is a very handsome and promising youngster, showing the nominal speed for his age.

A Two-Year-Old Filly,

BY JUNIO, 2:22, out of SULTAN QUEEN

This filly is a very desirable animal, and with but one months' training, has shown a full mile in 2:50.

EMMA G., 2:27¼,

(NINE YEARS OLD)

By ELMO, dam by WHIPPLE'S HAMBLETONIAN.

This mare is in foal to Dawn, 2:18¾.

THE CELEBRATED PACER

Chapman, 2:26.

A great campaigner. Drove out L. C. Lee in almost a dead heat in 2:17¼.
For terms and particulars, address

141 Natoma Street, S. F.

For Sale

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure. This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,
Santa Clara P. O., Cal.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Address,

THE BREEDER & SPORTSMAN,

313 Bush St., San Francisco, Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp. Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

AN UNQUALIFIED ENDORSEMENT.

Peruvian Bitters are made of the purest ingredients and compounded as carefully as any prescription.

Peruvian Bark, one of its principal ingredients, was introduced into Spain by the Countess, wife of Count CINCHON, Spanish Viceroy to Peru in 1630, who was cured of a fever by its use, since which time, no better remedy for Malaria and for Restoring the Natural Tone of the Stomach has been discovered.

On the Atlantic Coast they are used in the principal Hotels, Clubs and Restaurants, and sold by all Grocers and Druggists. We have sold them for the past three years WITHOUT ANY ADVERTISING and sales have constantly increased UPON MERIT ALONE, and we unqualifiedly recommend them to our friends and customers.

IMPORTED
ENGLISH BLOODHOUNDS.

The FIRST and ONLY LITTER of PURE ENGLISH BLOODHOUNDS whelped in California are now offered for sale. They are by Burgho's Warrior (A. K. C. 19753) out of Ripple Buxom E. K. C. 19,768), prize taker at Dover, England, New York and Albany. Warrior has never been shown, but is full brother to Burgho Jr., the well known show dog. Warrior is one of the handsomest hounds ever seen. His ears are twenty-seven inches across, and he is two inches taller than the average of bloodhounds. These noble hounds are kind and gentle, fond of children, marvelously intelligent, of stately bearing, and companionable in every sense. They are not fierce like the cross-bred hounds of Southern States, which are wrongly called bloodhounds, though they are excellent watch dogs. While possessing a rich, deep voice, they never give tongue without cause. A dozen bloodhounds make less noise than one pug. Their kind disposition, rare intelligence and wonderful scent fit them equally for house, farm or field. In the East the bloodhound is becoming more fashionable than the St. Bernard or the Mastiff, for while he is handsomer than either, his remarkable intelligence and scent make him useful as well. Read his character in the Century Magazine for June, 1889, and see his great beauty in the bronzes at Shreve's, and photographs at Vickers. For prices and pedigree address Manager, Santa Clara Kennels, Santa Clara, Cal. Photographs 25 cents.

Being the oldest established firm in the live-stock business on this Coast, and having conducted the important auction sales in this line for the past fifteen years, amounting to one half a million of dollars, we feel justified in claiming unequaled facilities for disposing of live stock of every description, either at auction or private sale. Our list of correspondents embraces every breeder and dealer of prominence upon the Pacific Coast, thus enabling us to give full publicity to animals placed with us for sale. Private purchases and sales of live stock of all descriptions will be made on commission, and stock shipped with the utmost care. Purchases and sales made of land of every description. We are authorized to refer to the gentlemen whose names are appended.

THE GREAT

STABLE DISINFECTANT

DARBYS FLUID.

Many **horses** and **cattle** become diseased and die from the impure atmosphere of their stables. And even though stables may be kept clean and the foul air be unnoticeable, it may still exist.

DARBYS FLUID

IS GOOD FOR CUTS, BRUISES, ETC., WARDS OFF DISEASE, PURIFIES THE AIR AND PREVENTS CONTAGION AMONG ANIMALS.

It is cheap and never wasted by free use; should be sprinkled about the stalls and stable as a safeguard against Influenza, Pink-eye, Epizooty, etc.

If you value your horses and stock never be without Darbys Prophylactic Fluid.

"Soundness" in Veterinary Law.

[From a paper read by Prof. A. Liautard before the 27th Annual Meeting of the United States Veterinary Association, Sept. 17, 1890.]

The decision of the question of the soundness of a horse, or, in other words, his value when offered for sale or sought for purchase, is one of the most important of the duties devolving on the veterinarian. As affecting the seller or the purchaser of the animal, it is of course the first in importance, and it is one which is constantly coming before the veterinarian for the exercise of his skill and trial of his integ rity, and I may add, his courage. Every day animals are brought to him for examination and judgment, and he is called upon for written certificates as to their condition and soundness, and it is usually his verdict which determines the question of sale or no sale. The responsibility which is thus laid upon his shoulders may be, and is in fact, sometimes enormous, and no man can count the damage he may incur from an unacceptable decision, *pro* or *con*, however honest, when the result of such an opinion may spoil a good trade for one man, or involve another in a bad bargain. In the performance of this part of our professional duty, there is no possibility of escape or of chance for the concealment of an opinion, it must be stated in black and white, and whatever our judgment may be, it is most likely, in a majority of cases, to be a condemnation of the animal. * * *

What is soundness? is indeed, not a question which can always be answered correctly off-hand. If it must mean a *perfect* horse—perfect in form and wholly free from blemish or disease, it will undoubtedly be as difficult, perhaps, as impossible a task to find such an animal as it would be to find a literally perfect human being. But this cannot be the true meaning of the definition of soundness. The term certainly cannot mean literal perfection; but where then, it may be asked, can it be said that perfection ends and imperfection begins; at what point or line will soundness become merged?

The definition of J. Stewart, who says: "That a horse is sound when he has no disease about him, nor any effect of disease that renders, or is likely at any future period to render him less useful than he would be without it," can scarcely be admitted, because it approaches too nearly the idea of literal perfection, especially when the author goes on and states further that a "horse may have disease about him and be sound; he may at least have the effects of disease, have splints, bony or callous tumors, warts, specks on the eye, be blemished all over and still be a sound horse." I might ask what we would think here of a veterinarian certifying as sound an animal whose metacarpal regions were covered with splints, whose coronets were enlarged with large ringbones, whose eyes contained speck cicatrices of keratoma, and whose coarse hocks were scarred with the cicatrices of actual line and point cauterization?

Oliphant tells us that "a horse free from hereditary disease, being in the possession of his natural and constitutional health, and having as much bodily perfection as is consistent with his natural formation," can be certified to as being sound.

No doubt this is a much better definition than that of Percivall, who says that "any horse that is lame or has that about him which is likely, on work, to render him lame is unsound," a definition which largely covers the subject of soundness so far as the functions of locomotion is concerned.

But aside from all this, with us, the question must necessarily remain the same. Courts of law will differ in their opinions, and judges will express the varying ideas of various nations on the subject, and the announced results of experienced veterinarians will be too often treated with contempt, or ridiculed on account of difference of opinion, and their various interpretations of lesions and symptoms; and to use the words of a learned judge in a case recently decided: "It is more and more wonderful to know how anyone could pretend to know what was soundness and what was not soundness."

In the presence of such facts, gentlemen, facts with which I think you are familiar, and in the light of such an experience as is common with us all, and of occurrences which I have witnessed too often in a long and extensive practice of this specialty, a doubt has often arisen in my mind, whether we are doing right in conducting our examination as we do, and whether in granting our certificates as most of us do, we are dealing justly with all parties concerned with our employer, with the dealer, and with the horse that has been brought before us. Are we dealing in a strictly legal sense with the inquiries made of us, and justifying fully the confidence lodged in our integrity and intelligence?

What, indeed, is asked of us by the gentleman who wishes to become the purchaser of an animal which, after satisfactory trial, he has selected as one fit to do his work and minister to his pleasure? The question is a simple one: "Is he sound?" and the answer ought to be equally simple. But how many horses can fulfill the conditions of an unqualified answer, even if literal perfection is not demanded? We may pass a horse because nothing but a small splint is visible, and yet in a few days he may become lame with it.

We may reject the next case because of a small exostosis on one hock, or a small spavin, and yet he may be purchased and may turn out a good and serviceable animal. Can we always distinguish, or are we to reject every animal which exhibits one or any of the ailments that we find in the true sense of the word to constitute unsoundness. To use the words of Dr. William Hunting, the editor of the *Veterinary Record*, "the want of a good definition renders the seller of a horse who gives a warranty, or *the veterinarian* who gives a certificate, liable to actions at law by the buyer whenever his new purchase goes wrong." And if this should be a correct view, it is easy to see in what a peculiar position we may find ourselves in some easily supposable cases. Let us suppose some condition in which an animal may be affected with some form of acute ailment, which has assumed a serious character, and may become incurable, or possibly prove fatal. Here is a patient which, at the time of examination, had but a slight discharge from one nostril, not very abundant; muco-purulent; inoffensive. We consider it a simple case of catarrh, and before many days have passed it proves to be merely the first indication of a diseased condition of a tooth, which may prove troublesome and refractory to treatment, and perhaps results finally in death. Again, assume an animal free from any blemish or unsound indication other than a slight increase of temperature, and, perhaps, a slight cough. He is bought, though sickly, and only a few days later dies from an attack of lung disease of an acute character, perhaps grafted on an organ already affected with chronic disease. Next in the category may come an animal in apparently perfect health, but which dies a few days after with colicky pains, due to calcareous formations in the intestines or a vesical calculus.

Similar cases almost without number might, if necessary, be cited in illustration of the point we are discussing. Are we to reject all these because, as vaguely and indefinitely expressed, they are sick?" Yes; but what, then, of those with (perhaps latent) diseases which we have not been able to detect, or whose termination we have failed to foresee? If such as these are to be rejected for mere negative reasons and on hypothetical grounds, are we, again doing justice to our calling, to our obligations and to all the three parties concerned. If not, I fear that general investigations which constitute our so-called "examinations" are mere farcical and barren pretexts, and our certificates are worth less than the paper on which they are written, and can furnish no protection to the buyer, but, indeed, are rather detrimental to the honest dealer and unjust toward the good qualities of an animal which, though unsound, we know in many instances might prove to be a very useful servant, and fully compensate his purchaser, and perhaps might be turned against us in a court of justice.

If I am right, gentlemen, in suggesting such an interpretation of our position, and such a view of the performance of an examiner's duty, according to the English law of warranty, as well as the at least possible, ill effects of its application, it seems to me that the moment may not have been badly selected to consult with this assembly of veterinarians on the subject, and to ask for their opinion and their suggestions in respect to a remedy for the evils to which I have referred.

This is no new subject with me. Years have passed since its first presentation by myself in Boston, before this same Association. But we were young then—our membership was small—and to-day, when we have strengthened our standing by the accession of so many worthy and accomplished associates, I hope the matter will receive at your hand the attention and consideration to which it is so well entitled. And now, admitting the inefficiency of the old law, with its errors, the problem presents itself into two forms: First. what better methods can be devised? and secondly, if proposed, can they be made practicable and available, and if so, by what means?

Let us consider the first of these points, and to answer this it will be necessary to call your attention to foreign legislation on the subject, and refer you to the laws which exist in various European States. Let us, for instance, consider the French law which, with some modification, however, we find re-inforced in other nations, including Belgium, Switzerland, I believe, Italy; and this may be called the Continental law. In this law the condition of soundness or unsoundness is not judged by the rules which prevail with us, although the method leads to the same results. But the point principally considered, is the effect of the unsound condition, when it exists, so far as it bears upon the usefulness or the value of the animal. For example, the question is not so much whether an animal has any of the exostoses of the locomotory apparatus, or whether, when present, they interfere as a matter of fact with his working power, as by causing lameness for example. It is not so much whether he is affected with disease, either acute or chronic, as whether, in a case of fatal termination, it existed previous to the purchase. It is not soundness as we understand it, concerning which the veterinarian is called to decide, but whether the animal has a "vice redhibitoire," which, at the time, interferes with its present and possibly future usefulness or value. By the term "vice redhibitoire," is understood a vicious and deficient condition, such as those which by law render the contract void, if the animal was warranted free from them. By this definition you observe, this warranty is almost synonymous to our English warranty of soundness, which means free from diseases that constitute an unsoundness, while the other means free from any "vice redhibitoire" which have been specially designated.

To illustrate the first: An exostosis will not be a *vice redhibitoire* as long as it does not give rise to the characteristic lameness of those affections, "intermittent in character," either when warm or when cool.

A disease which proves fatal soon after, or within a few days of the purchase, will not authorize the repudiation of a bargain, unless it is proved that it existed before purchase, or was grafted on a chronic lesion previous to it. And it is true that we find intermittent lameness and chronic affections of the lungs prominent among the "vices redhibitoire" of continental laws of warranty.

Considering now both what you will permit me to denominate the English and the French laws together, we shall no doubt find much similarity in the two cases mentioned. The result may be about the same, but how much simpler and more satisfactory otherwise, professionally considered,

the latter, in view of the performance of the duties and execution of the trust placed in our hands. To comply with our English laws we must certify to the existence of a condition which can hardly be found, either in man or horse—perfection in the abstract and literal sense of the word—and expose ourselves to no end of perplexity and trouble in the pursuit, while for the fulfillment of the more rational and practical provisions of the continental laws, we are only required to detect within a certain period of time the presence of a few designated diseases, or the manifestations of a few definite symptoms. The English law obliges us to detect one of all diseases, the French code asks us to discover at the time of purchase previously, or within a given period from the delivery, any one of the following diseases and pathological conditions, viz:

Speaking at present for the horse only—periodic ophtalmia, glanders, farcy, immobility, pulmonary emphyeema, intermittent lameness of long standing, intermittent hernia and chronic diseases of the thoracic organs, roaring, and some peculiar forms of cribbing.

And there is another point which I am sure will, in your estimation, count in favor of the Continental mode of examination. I refer to the time at our disposal for the completion of our task. Indeed, what time is allowed to us for the formation of our judgment, and for the preparation and the delivery of our certificate? A very insufficient time, as we all know. It may vary from a few minutes to perhaps a few hours. Is that sufficient? How in such a length, or rather such a "shortness" of time, are we to detect some of the special forms of disease, peculiar intermittent lameness, roaring, perhaps intermittent hernia, epilepsy, etc. In the European law from 9 to 30 days, according to the "vice redhibitoire" looked for or alloted to the buyer, who thus has ample time to satisfy himself of the quality of his bargain, and thus also the veterinarian has a reasonable opportunity to detect an unsound condition, which according to our English mode, becomes impossible.

In fact, Mr. President and gentlemen, it seems to me that in the superiority which I have endeavored concisely to point out in the European legislation on this subject, we are inevitably brought to the following conclusion:

Under a reformed regime, when it is once established, we shall have no more fear of contradictory certificates—one of them asserting soundness to-day, to be followed by another, affirming unsoundness four or five days later, and *vice versa*—no more danger of opposing opinions amongst veterinarians employed as experts who discredit one another, and the general profession likewise, by contrary announcements of the presence or the absence of morbid conditions; no more decisions of judges in the courts of law directly in opposition to those of practicing veterinarians; and above all, no more doubts, or at least a reform of opinion in respect to the supposed and generally imputed dishonesty of every man in the community who chances to have a horse for sale.

In respect to the consideration of the means by which such a law, after being properly framed, could be made practicable, I see no reason why such a thing might not be effected in this country as readily as it is in the various European States, if we will but bring ourselves to profit by their experience and follow their example in framing our laws and putting them in execution, as they have done and are doing.

But I have already held your attention too long, and the subject is so exhausted that I am almost tempted to ask you, paradoxical as it may seem in me, not to discuss it. I yet consider the matter to be one of such importance to all parties interested, and see so much injustice to be reformed, so much opportunity to do good both to buyers and sellers, and so fair an opening for securing a benefit to ourselves in the elevation of our profession, in the performance of this special duty of the examination of animals on purchase, that I can scarcely bring myself to suspend the discussion. I trust to your good nature to forgive the detention to which I have subjected you, and to attribute it wholly to my interest—which I am sure you share with me—in the subject which I have endeavored to illustrate.

"Rattle-Headed."

We hear a great deal about the "rattle-headed" horses, but very little about "rattle-headed" men, and yet we will venture the assertion that there are in this country ten "rattle headed" men (horsemen we mean) for every one "rattle headed" horse. This may not be an elegant expression, but there can be a great many solid facts stated about the horse business that are not "elegant." Think how often we have seen a good and noble horse lose a heat or race through the mismanagement of a "rattle-headed" driver, and who is it that cannot call to mind from one to a dozen phenomenal prospects that have been regarded into a state of "inocuous desuetude" by the same cause. Drivers are not the only class of horsemen that are subject to attacks of this peculiar kind of malada cerebal, for it is frequently the case that it is the owner's "rattle headedness" that brings wreck and ruin to the prospect. Then, too, men sometimes get "rattle headed" on blood lines and particular phases on the breeding problem.

Owners sometimes get "rattle headed about their own particular stock, so much so that they can see no earthly merit in anything they do not own. We have known breeders who would talk for hours in dilating upon the greatness of the blood lines of their own belonging, and then prattle the year round about the breeding of a neighbor's stock that were bred in exactly the same lines of his own stock. There is no "horse sense" in this kind of business. A driver that cannot "keep himself together" and use cool, calculating judgment from wire to wire and in all kinds of close places, is not fit to sit in a sulkey. And a breeder that cannot recognize the merits of the various strains of blood and the good qualities of any animal, whether he owns it or not, is no more fit for a breeder than an anarchist would be fit for Queen Victoria's head cook. "Level headedness" beats brilliancy in most all avocations in life, and especially is this so in the horse business. Ex.

Musket and his Progeny.

A Great New Zealand Sire Who is but Little Known in America.

The greatest sire ever brought from England to the Australian colonies, was Musket, beyond all probability of a dispute. And just why no son of his has yet been imported into the United States, when it is evident that he outbred all contemporary stallions, is "one of those things that no fellah can find out." He certainly got two winners to Traducer's one, although credit must be given to Traducer in that two of Musket's best sons were out of daughters of Sir Modred's sire. A high price was paid for Darebin, although his sire never got any other good performer: and while Darebin was a great racer himself, it should be borne in mind that Lurline never dropped an average good performer except Darebin, although mated with all the best sires of her day.

The uniform excellence of Musket's sons and daughters as performers is a hard matter to compile just now, not having all the records at hand. We know that Foul Shot lost but two races out of nine starts; that Brigadier won six races as a two year old and broke down in a trial of a mile, in the following spring, which he is reported to have run in 1:38½ over the old turf course at Auckland; that Martini Henry won both the Derby's in his three year old form, as well as the great Melbourne Cup, and was beaten by the shortest of heads for the St Leger by that phenomenal colt Le Grand; that Nordenfelt never lost a race at even weights and won both Derby's in a canter, as well as annexing the Craven Stakes in his four year old form with 130 lbs. in the saddle, a performance equalled only by Wellington, Sir Modred, Abercorn and Carbine, all of whom were five year olds; and that all his get were consistent performers at some distance or other.

Mitrailleuse was a good mare up to a mile, but at five and six furlongs she was absolutely invincible, without any regard to weight. She won half mile races with 155 pounds, and was sold for £525 to Donald Wallace when hopelessly broken down. Hon. L. J. Rose, of Los Angeles, has two full sisters to her, one in foal to Forest King and the other to Roodee, own brother to Chester. Her sisters never had the speed of Mitrailleuse, but are larger and showier mares and therefore better calculated for stud matrons.

The performances of Nordenfelt stamp him as first class, he having won the A. J. C. Derby at Sydney and the V. R. C. Derby at Melbourne, a feat that lay beyond the reach of such great performers as Carbine, Carlyon, Melos, Abercorn and the Australian Peer, and previously achieved only by that phenomenal performer, Grand Flaneur. In the fall of the same season Nordenfelt went completely amiss, and Mr. Payton was obliged to start his half brother Matchlock, for both St. Legere, each of which he won with ease. Mr. Payton has often told me that Nordenfelt could give Matchlock five pounds and a beating. The brother to Nordenfelt was called Enfilade, and won the Anniversary Handicap at Caulfield, carrying 108 pounds as a three year-old, beating a field of fourteen. He broke down in a two mile race for the Loch Plate won by Carlyon.

Martini Henry was a rather leggy bay colt but has now thickened out into one of the grandest looking stallions in the world. He won the Derby at Melbourne and the St. Leger as well. He also won the Melbourne Cup of 1883 and ran second to Le Grand for the Champion Stakes of three miles. He is the sire of Rudolph, Prelude, Singapore and Litigant, all noted winners, Singapore being regarded as one of the very highest class. He is a full brother to Mons Meg recently sold in England for the large price of $13,000.

Trenton was likewise a very good looking horse. He won a good many handicaps and was regarded always a very formidable competitor. He was out of Frailty by Goldsborough. As a four-year-old he carried 132 pounds in the Melbourne Cup and was third, the race being won by Sheet Anchor, an aged horse with 109 pounds. In 1886 he started again for it with 134 pounds up and was beaten by Dunlop, 5 years 115 pounds, in the fastest race ever run between horses, 3:28½ for two miles. He was then retired to the stud of the late Andrew Towne and was sold for $15,000 at auction. His full brother, Cuirassier, is a great performer and won four races out of five starts. Mary, by Nordenfelt out of Frailty, won five races off the reel and died a few days after her last victory.

Matchlock and Fusileer were both out of Yatterina by Yattendon, but Matchlock was a great deal the better horse. He won both St. Legers in 1884 and carried off the Champion ship race, three miles, in 1886. Fusileer was also a frequent winner, but not of any classical events. Firelock, another brother, won two out of four races.

Volley, out of the imp mare Lady Vivian by Strathconan, won five stakes at two years old, out of six starts, being beaten by Lonsdale in the Maribyrnong Plate. At three years she won the Caulfield Guineas, and the V. R. C. St Legor, beating Pearl Shell and Meloe.

Pearl Shell, out of the imp mare Pearl Ash by Lord Clifden, won the A. J. C. Oaks, and ran second to Melos for the Derby. She also beat Volley and Bonnie Spec for the V. R. C. Oaks of the same year.

From the imported mare Looket by Thunderbolt, Musket got Necklace, Thunderbolt and Necklet, all good goers in good company. Necklet won the Maribyrnong Plate, the greatest two year old race run south of the Equator. Thunderbolt was a capital performer up to a mile and a half, and is now one of the favorite New Zealand sires. He won six consecutive races at two years old.

Krupp and Tranter were both magnificent looking horses but hardly realized expectations based upon their showy appearances. Tranter lost the V. R. C. Derby of 1887, won by the Australian Peer, by sheer bad riding. He beat Mentor and Pakeha cleverly for the Maiden Plate, and was sold to Mr. W. R. Virgoe for stud purposes.

Maxim, out of imp Realization by Vespasian, was of the same class as Trenton and Martini Henry. He won four times out of six starts as a two year old, being beaten by Abercorn for the Sires' Produce Stakes and for the Champagne Stakes by Matador. At three years he won five consecutive races, and wound up by beating the great Nelson for the Canterbury Cup, 2½ miles.

Tetford, brother to Krupp and Tranter, won two races out of four at three years old, one of which was the Wanganui Cup of two miles and a distance. He won two good handicaps in the following year.

Carbine is, however, by long odds, the best son of Musket over all distances and at all weights. In his two year old form he started five times and never lost. As a three year old he won nine times out of twelve starts, being beaten by Ensign for the V. R. C. Derby, by Lochiel for the Australian Cup, and by Abercorn for the Autumn Stakes at Sydney. He afterwards beat Abercorn and Lochiel each three times. At four years old he won nine races out of thirteen starts, being beaten twice by Deadnought, once by Melos (three miles) and in the Melbourne Cup by Bravo, an aged horse, carrying 119 lbs., while Carbine carried 140 and was beaten the shortest of heads. He has since won two rich weight-for-age races at Sydney, and is favorite for the great Melbourne Cup, notwithstanding he has to carry 145 pounds. We believe he can carry 140 and beat any horse in the United States with 135, not excepting Salvator, Firenzi, Tournament or Kingston, at any distance over a mile.

Manton, out of Tres Dance by Traducer (sire of the great Sir Modred and Cheviot), won only one out of four starts at two years old, being beaten thrice by Carbine. As a three year old he won six out of nine races, including the Canterbury Cup, 2½ miles, in which he beat Lochiel and Chain Shot. He was subsequently beaten a head by Lochiel for the Auckland Plate, two miles, the great Nelson being third. In his four year old form he started but three times and was second twice to Abercorn and once to Melos.

Tarlar, out of the imported mare Steppe by Saunterer, may be fairly called an unlucky horse. He started eleven times and won but once, although he never ran out of a place.

Tirailleur, out of imported Florence McCarthy by Macaroni, ran four times unplaced as a two-year-old. In his three-year-old form he ran nine times and was first on all occasions, winning both the New Zealand and the Canterbury Cups, a task to which neither Lochiel nor Nelson were equal.

Foul Shot, out of Slander by Traducer, was a consistent performer, although his efforts were confined exclusively to the New Zealand tracks. He is now owned near Lyttelton, where he is regarded as one of the coming sires.

Take him for all in all, Musket was to New Zealand what Lexington was to America; and why no one has seen fit to import one of his sons to America, is one of the unrevealed mysteries. Senator Hearst has five entire horses, of which Tournament is the only one equal to his mares; and there are twelve stallions at the Rancho del Paso, of which at least seven could be sold at a profit to their owner, no matter what was the price realized. Even at Palo Alto the running stallions are manifestly inferior to the mares; and at Santa Anita the Emperor is wholly untried, although a marvellous race horse, while Grinstead mopes about the paddocks, reduced to the mere shadow of a great name.

All this time the semi-insolvent colony of New Zealand offers bargains to intending purchasers, such as can be found in no other part of the world. Even if a man could not afford to pay $20,000 for Nordenfelt at the coming January sale (and I have no idea that he will go for anything less), there are Manton, Hotchkiss, Brigadier, Fusillade, Tranter and Maxim, any of which can be had for $5,000; and as there is no son of Musket in the United States, such a horse can earn his way out in one year at Lexington or Nashville and then be brought back to California to stand by private contract. It would take $20 000 to buy Martini-Henry, in my belief: and it is possible that even that liberal offer would be refused, as the White family are by no means short of money.

Already two of Musket's sons have shown themselves to be worthy successors of their great sire, and it is quite evident to me that there are others whose scions will be earning brackets before the close of 1891; and it will not do to wait till they are old and superannuated, and then begin talking about what might have been accomplished if anyone in California had possessed sufficient enterprise to import one. Just as it looks to me now, the season of 1891 will open with only two really tried and valuable sires—Wildidle and Cheviot—open to the breeding public. Darebin, Sir Modred and Saviour are virtually private stallions, and Emperor of Norfolk and Argyle will, in all probability, be kept for the exclusive service of their owners. Hence there is a chance for a good investment on such a horse as Hotchkiss, Fusillade or Manton.

T. B. M.

John Madden, an old trotting horse owner, has bought Kenwood and Folsom for $15,000. Folsom is a beautifully bred colt, being by Falsetto out of Semper Felix, the dam of the unbeaten Leonatus. Here is one of a few grandly bred colts to whom we may look for the sires of the future. The truth is that we breed race horses every year, but we only breed sires about twice or three times in a century.

The Ventura Races.

Friday, October 24th, was the initial day of the meeting of the Ventura races, and it is to be regretted that a larger attendance was not present, as the sport was exceedingly good; however, it must be born in mind that at present the farming community of that section are too busy looking after the lima beans, and they cannot find time to attend the sport of the kings. Last year thousands and thousands of dollars were lost to this valley owing to the elements, and it behooves the farmer to do everything he can this year to make up for the losses of the past.

The judges of the day were N. H. Johnston and T. R. More of Santa Barbara, their associate being O. C. Carle of Ventura. The first race was a mile and a quarter, for a purse of $200; the only starters being Othello and Minuet, the latter selling as choice in the pool box at $10, the supporters of Othello feeling that the chances of their horse was only worth $4. The Rose filly looked in perfect condition, and fully warranted the faith of her backers by winning a good race in 2:16½. It must be remembered that while this time looks slow on paper, it was exceedingly good for a half mile track, especially when it was taken into consideration that the track was rather heavy. It is to be regretted that the promoters got no more encouragement from the people, as they have worked assiduously towards making the meeting a success. It is altogether probable that if the track were lengthened to a mile, that those who live in this vicinity would give the management better support, and we rather fancy it would warrant the outlay.

SUMMARY.

Running—One and one-quarter miles. Purse $200.

L. J. Rose's s m Minuet, 3	Roach 1
Harris' b s Othello, 4	Hastings 2

Time, 2:16½.

The second race was a half-mile and repeat, for Ventura county horses, in which started Ulpiano, ridden by Tonie, Bird by Hastings, Red Girl by Et. Ulpiano sold for $10, Bird for $6 and Red Girl for $15. The horses were started after some delay, as Ulpiano acted badly. Red Girl took the lead immediately and was never headed, winning the heat, Bird second, Ulpiano third, in 0:53.

Ulpiano still cold favorite. The horses acted well and were soon sent on their way around. Red Girl took the lead, and after running three hundred yards, she flew over the track and ran into the outside fence. Bird won the heat and race, Red Girl distanced.

SUMMARY.

Running—Half mile and repeat. Purse $150.

J. Mack's Bird	Hastings 1
Del Valle's Ulpiano	Tonie 2
Barker's Red Girl	die

Time, 0 53, 0.54½.

The third race was for the 2:40 trotters. The starters were Begs' J. B., Paulin's Dewdrop. Pools sold: J. B. $10, Dewdrop $6. J. B drew the pole. Dewdrop scored up well, and when they started he had the better of J. B., but around the first turn Dewdrop broke, and J. B. had a three length's lead when the half was reached in 1:24; J. B. won the heat easily in 2:45.

The second heat was a repetition of the first. The third heat was closer, but J. B. had little trouble to win the race.

SUMMARY.

J. Begs' s g J. B., 3	Mack 1 1 1
Paulin's b s Dewdrop, 5	Ferguson 2 2 2

Time, 2:45, 2:48, 2:46.

Dewdrow will not trot on a half-mile track.

The fourth race was for the three-minute class. In this race Ben Harrison and Barney started. Pools sold: Barney $10, Harrison $3. This race was too one-sided; Barney was ten seconds fast; he trotted around four lengths ahead, and won the race handily.

SUMMARY.

L. J. Rose's b g Barney, 5	L. J. Rose, Jr. 1 1 1
Stone's b g Ben Harrison, a	Mack 2 2 2

Time, 2:54, 2:56, 2:59.

This ended the day's sport.

SECOND DAY.

There were not over two hundred people present to witness the last day. The programme was a good one, but lima beans are too valuable to be given up for a race. The first was a three quarter mile dash, in which started the great two-year-old filly Peri, that ran in Los Angeles a three quarter mile in 1:14½; Othello started against her. Pools sold: Peri $10, Othello $5. The filly was too speedy for Othello; she won the race easily.

SUMMARY.

Three-quarter dash. Purse $200.

L. J. Rose's b f Peri, 2	Roach 1
Harris' b s Othello, 4	Haslings 2

Time, 1:19.

The second race was a quarter-mile dash, in which started Sid Law, Bob and Sleepy Dick. Sid Law sold for $10, Bob $7, Sleepy Dick $5. More money went into this race than any during the meeting. The horses were fully half an hour starting. When they started Sid Law had half a length the best of it. Bob tried to run out, but was well kept on the track by Tonie. Sid Law won in a gallop, Sleepy Dick second, Bob third.

SUMMARY.

Merchera's b g Sid Law, 6	Hastings 1
Harding's Sleepy Dick, a	Roach 2
Ferguson's b g Bob, 6	Tonie 3

Time, 0:25.

The 2.30 trot was a great betting race, Cyclone, with a record of 2:30, sold for $20, Conkling, with a record of 2:32½, sold for $14 and Bashaw, with a record of 1:31¾, sold for $8. Cyclone drew the pole, Conkling second, Bashaw third. They were sent away to a very even start. Bashaw broke at the eighth; Conkling and Cyclone trotted well together, reaching the half in 2:21. Conkling, after leaving the half, made a disastrous break, from which he recovered too late to make any effort for the heat. Cyclone won easily in 2:41, Conkling second, Bashaw third. Pools sold: Cyclone $20, field $6. Cyclone won the second and third heat and the race easily.

SUMMARY.

2:30 trot. Purse $250.

Grier's g g Cyclone, a	Mack 1 1 1
Bonestel's g g Conkling, 6	Gillett 2 2 2
Bennet's b s Bashaw, a	Delaney 3 3 3

Time, 2.40¾, 2:41¾, 2:41.

The fourth race was a trotting, heat 2 in 3, between Mollie and Elector. Pools sold: Elector $5, Millie $3. Millie drew the pole; she took the lead immediately and won by a length in 2:59. Elector, for the second heat, was hitched to a cart. The big stallion showed up better. The two trotted like a double team from start to finish, making a dead heat. The third heat and race Millie won.

SUMMARY.

Trotting—Special; purse $100.

Kaiser' b f Millie, 3	Gillet 1 0 1
Ayers' Elector, 3	Mack 2 0 2

Time, 2:59, 0:00, 3:01.

L. J. Rose, Jr., J. M. Kaiser and Mr. Bennet left no stone unturned for the comfort of the horses and visitors. They deserve credit for their management and their desire to please all. Their purses were liberal, and it is unfortunate that the attendance on both days were so poor. A half-mile track will not draw people, and as the track at Ventura has been so freely patronized that no money can be put out, as no returns are promised. Hueneme, in Ventura county, has the great track south of San Francisco. Next year there will be a week's racing at Hueneme, and purses will be offered that will be inducements for first-class race horses. T. M.

October 28, 1890.

The Texas Derby.

A California favorite has been giving the Texans a taste of what horses from the Golden State can do, Guido by Double Cross, dam Aurora by Thad Stevens, winning the First Texas Derby, at the Dallas meeting. There was a large number of entries, but the wonderful speed shown by Lonnie B during the summer had caused all of the horses to be declared out except Guido, and when he appeared the spectators knew there would be a race sure. The account given below is taken from the Dallas Morning News, and to be brief, will simply say that the first money was a trifle over $5,000.

THE DERBY.

Now the racers are at the post, and Mr. Funck, with his bit of bunting in his hand, is waiting impatiently for them to get on even terms so that he may come in for no share of condemnation from the losers. He has not long to wait: there is a sudden flash of color and a bit of red flashes perpendicularly through the dusty air. "They're off" comes in a chorus from thousands of throats, and then a deep silence ensues as the noble racers sweep around the first curve, with Guido on the inside and both animals neck and neck. Entering the straight the first time Lonnie B took the rail, but again Guido came up, and the two raced neck and neck past the grand stand, amid the admiring plaudits of the crowd "Phew! how they are going!" says an onlooker; and the dusty track seems to fairly fly from under the horses, so terrific is the speed. Lonnie B is now slightly in front, and Myers is just rating him along. Smith keeps Guido well at his hindquarters, and watches Myers with anxious eye. Around the turn they sweep in a cloud of dust, and in the same position. Smith is seen to urge Guido as they get to the backstretch, and like a flash the winner of the Rocky Mountain handicap closes up the half length that separated him from Lonnie B, and a second later has opened up the least little bit of daylight between himself and his pursuer.

"Look at Guido leave him," shouted a hundred enthusiastic Guido partisans.

"Not much," answered the admirers of Lonnie B., as Myers lets out a link and resumes his old position a short half head in front of Guido.

The place is getting hotter; faster and faster the swift racers travel, and the far turn is reached with the pair running so close that a blanket would have covered them. Now the battle royal has begun. The stable boys lining the fence on the turn can see the jockeys take a firmer wrap on the rein. A grim look of determination settles on both their faces, and they feel that they have a horse race before them. On and on they sweep and neither shows any sign of weakening yet, and the enthusiasm of the spectators is aroused to boiling point. The spectators, men and women, mount chairs and railings to get a view of the grand struggle. On the far turn Smith lets out a link on Guido, and his partisans shout that all is over as he opens up a gap and forces Myers to begin to ride hard with Lonnie B. "Look at Guido go away," shout his delighted backers. Myers redoubles his exertion, but as they sweep into sight Guido is three lengths in front of Lonnie B.

"Guido wins in a walk," is the cry, but it was a trifle too soon, for under Myers' vigorous riding Lonnie B. began to gain slightly. Crack, crack came the catgut on Lonnie B.'s side, and he went forward like a shot out of a gun. Smith saw the move and was prepared for it.

"See him come, see him come!" shouts the crowd as Lonnie B. came up the canter of the track. Soon the sound of the horse's hoofbeats could be heard by the thousands in the grand stand. Men's faces were blanched white and hard with sympathy or money interest; women sobbed hysterically and laughed and shouted. Then came a time when people hold their breath, when they live only in the eye and ear, when the lungs are strained and still, and when the heart ceases its pulsing and hammers the brain with quick, hard blood beats. That patter of the hoof beats growing louder, finally helps to loosen the tension. It is an audible evidence of the great race, and the hush that hangs on the silent struggle at the far turns is broken as the animals are booming home.

Myers is riding like a devil, and now the multitude can see him plunge the wicked spurs into the heaving ribs of the willing brute he strides. With a bound the game colt starts forward, and as he does not collar the leader fast enough he gets the whip in unlimited doses.

Up to this time Smith had been sitting like a statue, but as Lonnie B. began to gain slowly he had to exert himself and ride for all he knew how. Myers fairly seems to lift his horse, but ride hard as he might he was not able to overtake the leader, and the assembled thousands are yelling like mad as the horses pass under the wire, Guido two lengths in front.

SUMMARY.

W. H. Babb's ch c Guido 3, by Doublecross, out of Aurora, 122 pounds	Smith 1
A. G. Atkineon's ch c Lonnie B. 3, by Indower, out of Fitna, 122 pounds	Myers 2

Time, 2:47.

Betting—Guido 1 to 5. Lonnie B. 4 to 1.

Only an Old Plug.

The Stockton Mail is responsible for the following story, which is certainly readable, if not true:

A stranger dropped into Oakdale the other day. He wore a torn felt hat, had a two weeks' stubble on his face and was very hayseedy. He drove a raw-boned old horse hitched to a rickety spring vehicle, a little barley and some old cans. His plug hobbled along through the streets to a livery stable. On reaching the stable the stranger alighted clumsily, got the tangles out of his legs and, approaching the stable man asked:

"Kin I put my hoss here to night, Mister?"

"Certainly."

"Yer ain't goin' fer ter charge mor'n a dollar, are yer?"

"No, that'll be all right."

"Be keerful of him now, Mieter, 'cause that a mighty valuerable animal, that is, and he's kinder sick now. He aint feelin' right smart, and I want yer ter take good care of him, Mieter."

"Where are you going?"

"Oh, I'm goin' up here fer ter look after some stock. Say, take good care of that 'ar hoss, now. I'll be round by sunup and see how he's gettin' along. I'm mighty sorry about that 'ar boss takin' sick, because he's got good stuff in him; he's a goer, he is."

The stranger went out into the yard of the stable, where his wagon was put, and, as it was growing dark, lay down under the vehicle and fell asleep.

The stableman repeated the old fellow's remark that there was "good stuff" in the dilapidated plug, and the joke spread about town. It was decided to have some fun the following day at the old man's expense, and a citizen of Copperopolis who owns a fast horse and who chanced to be in Oakdale jumped at the opportunity of getting the hayseed to stake money on his plug's speed.

Early the following morning several persons were waiting at the stable when the stranger appeared. He had already examined his steed in the stall, and was asked how the animal was getting along.

"Oh, tolerable middlin'," said the old fellow, stroking his tobacco-frescoed chin beard; "he's a-feelin' pooty good fer a hoss that's nigh eighteen year old. I reckon as how he'll get over ther ground right smart when I start out to-day."

"Is he fast?" chipped in one of the gronp.

"Wall, he does pooty good fer an old hoss."

"What do you say to a race?"

"Bring on yer plug! I've got the stuff to back me."

The Copperopolis man, who was expecting the summons, was sent for, and a match of $250 a side was made at once. The stranger borrowed a Petaluma cart from the stableman and hitched up. Then he remarked "as how" he'd like a new whip, but "'lowed" that a fresh willow stick was good enough for him, and accordingly procured one from a tree as they passed along to the race grounds.

After scoring two or three times and getting his plug warmed up the stranger sent him off at a pace which nearly paralyzed the spectators with surprise. The animal cut out the work for the Copperopolis horse and won the race in three straight heats. The stranger pocketed the $250, hitched up and drove out of town in his rickety spring wagon as unconcernedly as he had entered the place.

It was afterwards learned that the old fellow was a veteran turfman and that his "plug" has a record of 2:20. The pair have been traveling all the way from Eureka, and it is supposed that every town on the line has been taken in as was Oakdale.

The turfman is going by the name of Fields. The Copperopolis man whom he so shamefully deceived is Doc Shumake.

The Goldsmiths.

There are very few of the present generation of horsemen who can remember the time when the name of Goldsmith was not prominently identified with the trotting horse interests, both in a breeding and racing way, says the Horse World.

Many years ago Alden Goldsmith set out to demonstrate to the unbelieving public that his horse Volunteer was a sire of race horses. How well he succeeded in his undertaking is a matter of history, but a less determined man would have been discouraged by the bitter prejudice shown by many of the leading breeders towards the get of Volunteer. He brought out one after the other such great race horses as Denver, 2:19½, Gloster, 2:17, Bodine, 2:19¼, Alley, 1:19, Huntress, 2:20¾, and Powers, 2:21, each one of which proved to be the gamest of campaigners, and to show that they trained on with the best, it will only be necessary to state that the six horses mentioned have 435 heats in 2:30 or better to their credit. With such a man for a father, it is no wonder that his two sons are as successful as they are in developing trotters. John, the elder son, has this season the leading stable of money winners on the Pacific Coast. He has given five three-year olds records of 2:18 or better, something never accomplished by any other trainer. The five referred to are Yolo Maid, 2:14, Rupee, 2:16½, Regal Wilkes, 2:17½, Lillian Wilkes, 2:17¼, and Sable Wilkes, 2:18. He is this season driving a phenomenal string, and he intends before the close of the season to drive Stamboul a mile faster than 2:11 as well as to put a yearling colt into the 2;30 list. This latter feat is looked upon as impossible by many, but he has already driven this yearling a half in 1:11, and the chances are that he will at least beat the present yearling record of 2:31¾ before this season closes. [We are glad to say that he has already accomplished the feat of putting a yearling in the 2:30 list.—ED. BREEDER AND SPORTSMAN.]

The younger son "Gentleman James," as he is called, occupies as high a position among the Eastern trainers as his brother does in the West, for this season he drove one of the most successful stables ever seen on the tracks of the grand circuit. With such horses as Pamlico, 2:16¾, Mambrino Maid, 2:17¼, Simmocolon, 2;19, and many of less note he has met and defeated the best horses of their class, and the winnings of his stable will undoubtedly foot up as large or larger than those of any stable on the turf this year. Both John and James Goldsmith are men of brains, and are always so gentlemanly and of such modest demeanor that there are none to envy, but everyone stands ready to congratulate them on the well-deserved success which they have attained in their chosen profession.

One dollar a year will cover your doctor's bill if you take Simmon's Liver Regulator.

TURF AND TRACK.

Marcus Daly's Bitter Root Farm is said by Montanans to be the Palo Alto of the North.

Knapsack McCarthy has been elected treasurer of the Trainers' and Jockeys' Association.

Budd Doble has turned over to Crit Davis, the grey gelding Jack, by Pilot Medium dam Carrie Russell by Magna Charta.

Goldsmith drove the two year old Vida Wilkes three heats last Monday, the first heat in 2:32, the next in 2:22¼, and the last in 2:21.

John A. Goldsmith has, during the past season, driven twenty-eight winners, not counting walk-overs and matches against time.

W. H. Wilson, of Abdallah Park, Cynthiana, has sold to United States Treasurer J. N. Huston the great show stallion Jubilee de Jarnette 5105.

Charles Marvin gave Palo Alto an easy mile in 2:17. Snnol was driven a mile in 2:15. The bay mare is confidently expected to trot in 2:10 or better this afternoon.

Giovanni, a bay yearling colt by Red Wilkes, dam by Aberdeen, has been bought by C. A. Cornforth of Rochester, Minn , of A. S. McCann of Lexington for $3,000.

Owing to ill health Hon. W. L. Scott has decided to sell his entire string of horses in training and also his yearlings. The sale will take place on the 20th of this month.

The Horseman in speaking of the new President of the Saratoga Association says it will be Senator Hearst of California, a gentleman in all the word implies and an honor to the turf.

The Horseman had last week as a frontispiece a picture of Los Angeles, E J. Baldwin's game five year old. The mare has, during her five years on the turf started in ninety-two races, winning forty-one.

The chestnut wealing filly, by Kingfisher, dam imp. Princess, by King Tom, died at Mr. A. Belmont's farm, in Kentucky. The youngster was a full sister to Prince Royal and a half sister to Her Highness.

R. P. Ashe's crack sprinter Geraldine returned on the Unoine Stables car last week. Whether she will race again or not we do not know but think the speedy Grinstead mare will be relegated to the paddock.

The Santa Anita Stable will winter in the East this year, as we stated some time ago. The Emperor of Norfolk and several of the mares have already returned to the ranch, and the big horse will this time retire to the stud.

L. B. Du Bois has decided to leave his mare Moscova, 2:28½, in the State She is heavy in foal to Sidney, and will be bred to Stamboul next year, and then with a Sidney and a Stamboul, how can they beat me? says the General.

Last Saturday Goldsmith drove Stamboul a mile out in 2:14, and from the fearless way in which he trotted, Nelson's record is in serious danger, and with a good day and track Stamboul should this afternoon trot in 2:10½ or better.

Adonis, Hickok's crack pacer, is once more at the Bay but the boys says he needs a rest and is not the Adonis of yore, but it is safe to say that challenges will be scarce now for the Sidney crack is ever dangerous. Blood will tell.

The Glenview Stock Farm's five-year-old stallion Egotist, lowered his record at Lexington to 2:22½. Egotist is by Electioneer from Sprite (dam of Sphinx 2:23 and Spry 2:28¾) by Belmont 64 grandam the celebrated Waterwitch, dam of five in the 2:30 list.

Electioneer's 1890 2:30 list now reads Sunsun 2:18½, Susette 2:23½, Electrician 2:24½, Electricity 2:24¾, Coral, 2:25, Ladywell 2:25, Fay 2.25, Conductor 2:25½, Colma 2:25½. Alma 2:28½, May King 2:29, Aleck B. 2:29¾ and Laura C 2:29½. Thirteen, and the season is not yet through.

W. H. Wilson has bought for $2,300 of C H. Tenney, Methuen, Mass., a bay colt, foaled in 1890 by Simmons, first dam Lady Rose by Sultan, second dam Atalanta, and for $2,300 a black filly foaled in 1890, by Simmons, first dam, Genie by Sultan, second dam Lady Graves by Nutwood.

Warnke's speedy filly Reclare was reported nearly dead a fortnight ago is taking walking exercise again, A wire penetrated the hoof and the foot swelled up to an enormous size. Dr. Shepherd, who was called in, was afraid of gangrene setting in, but luckily the mare pulled through.

Lord Feversham very truly remarked at a meeting of the English Jockey Club some time ago, that such great horses as Touchstone and the Flying Dutchman were not run off their legs at two years old, and consequently their turf career was twice as long as that of the crack race horses of to-day, yet they were not injured for the stud.

While East last season Messrs. Williams and Ramsdell, bought a yearling by Falsetto from Galanthie—a sister to Springbok, but the youngster was a little tired when the car reached Ogden, and he was left there, but will be brought on to Sacramento on the Haggin car, which was expected shortly after.

A rather peculiar entry in Wallace's Register has been noticed in the Turf, Field and Farm. Aaron Pennington in Wallace's Year Book in the great table figures among the P's as "Pennington' Aaron." Had he been put in his proper place he would have been first in the list of sires. He ie a thoroughbred!!

Gorgo by Isonomy from Flirt by Hermit, etc , reads well and every one knows the mare never disgraced her ancestry. She is expected back on the Hearst car under Donathan's care. It will be interesting to note whether, after all, Senator Stanford will breed her to Palo Alto. Bred as she is, with a racing pedigree all round, it seems worse than desecration to contaminate her with trotting blood.

The thoroughbred yearlings sold at auction in America this year number 431. They brought the round sum of $388,400. an average of over $900. It would be an interesting study to keep track of the whole number next summer to ascertain whether their collective winnings would total as much as their sale cost.

P. Lorillard is making extensive improvements on his stock farm at Johnstown N. Y., and in a couple of years his colors will be seen on almost every course. He is endeavoring to secure the services of Superintendent Puckett of the Saratoga course, as he wishes to construct a new half mile track for training purposes.

The Dwyer Bros. will race separately in future, the two firms being known as P. J. Dwyer & Son, and M. F. Dwyer. The horses in training were offered at auction last Tuesday. Philip Dwyer paid $30,000 for Kingston, while Hanover was knocked down to E. C. O'Reilly for $15,500, and Inspector B. at $10,000 returns to Belle Meade.

The death is announced at Napsnee of the chestnut stallion War Cry, by War Dance. He was in his 20th or 21st year, and was brought into Canada from Kentucky in 1873 or '74 by Messrs. T. C. Patterson, A. Smith and C. F. Elmes, the last named becoming sole owner at the dissolution of the partnership, paying $2,500 for the horse.

At the Messrs. Tattersall's sale at Newmarket, England, Oct. 8th, the bay filly Democracy by St. Simon, out of Morning Glory by Silvio, her dam Anemone by Lord Clifton, out of Pulsatilla by Orlando, was bought by G. Barrett for $9,180, which we believe is the highest price ever paid for a weanling in England, and cheap at that.

Chas. Reed's ill luck still continues. Last week the highly bred brood mare, imported British Beauty, by Oxford, dam Runaway, by Oulson or Stampedo, 2nd dam Gretna by Stockwell, died at Fairview. British Beauty was the dam of Cruiskeen, Brixa and the fast colt Timothy, and was valued very highly by Mr. Reed. She was foaled in 1874, and died of old age.

The most valuable shipment of young trotters that ever left Kentucky was sent from Lexington on the 26th of October to Marcus Daly, "the copper king" of Anaconda, Mont. These were three two-year-olds, including the $10,000 Lady Wilton, record 2:25; ten yearlings and three wealings. They are by Red Wilkes, Robert McGregor, Bell Boy and Billy Wilkes. This lot of youngsters cost Mr. Daly $54,000.

The Saratoga Racing Association held a meeting on the 28th ult., at which Senator Hearst, W. J. Arkell, L. B Cramer, H. J. Young and Willard Lester were elected trustees. The following officers were chosen: President, Senator Hearst; Vice-President, W. J. Arkell; Secretary, W. J. Wheatley; Treasurer, Wm. P. Bokes. The old track at Saratoga is now being remodeled and promises to be one of the finest tracks in the country when completed.

The pacer Ed Annan, and the young trotting mare Marie Jansen, both of whom were in Doble's stable this season, are to winter in Brooklyn, where they are owned. Annan is lame, and in all probability will not again appear on the turf, but Marie Jansen should be a star some day. She trotted a close second to Edgemark in 2:21 when she was three years old, and can beat 2:20 now, but has never been just right this season.

John Madden, who has been prominent among the buyers of trotters for the last five years, is dipping into the runners pretty heavily. At the dispersal sale of F. A. Walbanm's stable in New York he bought Kenwood, paying for him $7,500, and also secured Folsom, by Falsetto from the dam of Leonatus. Madden still has a few trotters on hand, but it is understood that he will in the future devote himself exclusively to the runners.

A hatter in Bethel about fifty years ago had a dozen workmen in his employ. One day, on going into the village store, where several of his neighbors were, he said: "The hatting business has been dull for five years. I have lost 25 cents on every hat I have made during that time." "Why don't you quit the business?" he was asked. "How the devil am I going to support my family if I don't do something?"

Gladdus, a pacing mare that was in Doble's stable the fore part of the present season, and that has a record of 2:26½, is to be bred to Nelson. It is said that the fee of the Maine stallion next season will be $1,000, but it is doubtful if this report is based on fact. Of course, now that Nelson has on several occasions reduced the stallion record, finally landing in the 2:10¾ notch, and showing a public half mile the next day in 1:03, he will get plenty of mares.

In the proper columns will be found an advertisement of several well bred thoroughbreds by Duke of Norfolk, and trotters offered for sale by W. L. Appleby. Norfolk blood is well known all over America now, and the Duke of Norfolk is own brother to his best sons, The Emperor and El Rio Rey, besides being the sire of Longshot and several other winners, while the trotters are all well bred and can be seen at any time at the ranch at Santa Clara.

It is, we understand, definitely arranged that after the Blood Horse Meeting, W. L. Appleby will take charge of the Rosemeade stable of runners; three (Rico, Conrad and Peri) will be under his charge during the meeting. Appleby has during the past season been very successful on the California Circuit with Carmen, Odette, Raindrop, Alfarata and the other horses under his charge, and we hope that he will have the same, if possible better, luck in the East next year with the Rose stable.

Among the many visitors to the California circuit this year, none was more popular than the old-time horseman Luke Du Bois, who returned to Denver last Tuesday. Mr. Du Bois since 1861 has made many visits to the State and brought many good horses here, including Longfield, at present at Rancho Del Paso, and Lilly R , who died at Colonel Thornton's; and his descriptive powers were brought into full play when he described his journeys across the plains with an unheard of quality of flour to counteract the alkali water and a little whisky to settle the lot. Mr. Du Bois left last Tuesday for his home in Denver, but he says he hopes to buy a residence near San Francisco and spend his winters here.

The Duke of Westminster, has recently sold an own sister to Orion, by Bend Or, out of Shotover, covered by Rosebery, for 2 000 guineas, probably to come to America. The prices paid for the yearlings that Lord Marcus Beresford recently bought in England for Mr. Marcus Daly were 1,600 guineas for the filly, by Hampton, out of Nameless; 3,100 guineas for the Springfield colt, and 1,550 guineas for the Bend Or colt. For the two year old Inverness, by Cymbal, out of Belle of Scotland, the large sum of 4,500 guineas was paid, and as we hear "Inverness is worth all the money."

The victory of Alicante in the Cambridgeshire was not popular, although she started as first favorite at slightly better odds than did Marion. The mare won handsomely enough, but she had not been backed very freely in England. the Frenchmen having made her first favorite by the money they piled on her. "Chippy" Norton, (John Bull) the eminent bookmaker, created some amusement in the betting ring when the time for settlement came by shouting, "Come up here now, yer bloody Frenchmen, and get your revenge for Waterloo."

The fallacy of the claim that mares that have been driven to extreme speed would be worthless as brood mares is gradually being proven. Last year Lucille Golddust, 2:16¼, took her place in the table of great brood mares, with Sprague Golddust, 2:19¼, and Lucille's Baby, 2:20½, to her credit: and this year Adelaide; 2:19¼, will go into the list of great mares as the dam of Nina D., 2:26½, and Addie D. 2:27¾. It is also worthy of note that the fastest one of Lucille's produce is by the developed sire Governor Sprague, 2:20½; and both of Adelaide's fast ones were sired by the developed sire Nutwood, 2:18¾.

Some men down in Belfast, says the Lewiston Me. Journal, thought to puzzle a local jockey by bringing out two sorry looking equines, one considerably larger than the other, and asking him which was the better one. But he was not caught napping. He looked each carefully over, examining the feet of each and then rendered judgment as follows:

"One's worth just as much as t'other."

"How's that?" asked the crowd.

"Well, the big one has got more hide and bones than the smaller one, but the latter has got the best shoes on, which makes it about an even thing."

To close out the interest of the ruled-off trainer, William McGuigan, all the horses belonging jointly to that trainer and the trotting horse man John E. Madden, were sold on the race track at Nashville last Saturday.

Among the horses sold were such winners as Linlithgow, Rose Howard, Gen. Caldwell and Onlight and the two crack colts Chimes and Dundee. To a reporter Madden has stated that the sale does not mean his retirement from the running turf. It becomes necessary on account of McGuigan's ruling off, and then again he states he will in the future have no affiliation with another trainer, but will handle himself the horses that bear his colors on the running turf.

"For the last year or so the smart horsemen around Lexington," says a well posted writer, "have been picking on the Eagle Bird colts. They all showed well, and the buyers argued that as Jay Bird was such a great sire, his developed son, Eagle Bird, would prove a still better one, and it begins to look as though the argument was a pretty good one." Jay Bird is the son of George Wilkes that got the great Allerton, four year old stallion record 2:15½. Eagle Bird was developed and driven to her record of 2:21 by Lyle E. Simmons, son of William L. Simmons, the owner of the great galaxy of Wilkes stallions in Kentucky, including William L, sire of Axtell 2:12, and Jay Bird, sire of Allerton 2:15½.

C. J. Emery of Cleveland, in connection with Tennessee and Kentucky breeders, has inaugurated the largest stake purse ever offered for trotting horses. It will be a guaranteed stake of $50,000, for three year olds, foals of 1890, although the time limitation has not been definitely decided upon. The total payments for each horse will not exceed $350, and the entrance fee will be less than three-fourths of one per cent. The place and date of trotting the race will not be definitely decided upon for some time. A number of breeders have signified their intention of entering from five to ten horses each as soon as all settlements are made. The stake will be called the American Trotting Horse Breeder's Stake.

The thoroughbreds in training belonging to the late Hon. James White, the celebrated Australian racing man, were sold at Tattersall's on Oct. 6th and brought the following prices in guineas (a guinea is equal to about $5):

	guis
Kirkham, 3, chestnut colt, by Chester—La Princess (Captain Machell)	610
Narellan, 3, chestnut colt, by Chester—Princess Maud (Mr. Swan)	260
Wentworth, 2, bay or brown colt, by Chester—Trafalgar (D. Cooper)	1,700
Nepean, 2, bay colt, by Chester—Iolanthe, (D. Cooper)	360
Mons Meg, 2, bay filly, by Martint Henry—Malacca (D. Cooper)	2,600
Bay yearling colt, by Martint Henry—La Princess (D. Cooper	550

C. Mueller, Lower Ranch, Kingsley, Iowa, who also has interests in Germany, has recently purchased and shipped from New York to Germany on the steamer Elder, the following thoroughbred brood mares and foals: Bonnie Lawn, by Bonnie Scotland, with filly foal by Iroquois—in foal to Iroquois; Bonnie Belle, by Bonnie Scotland, with filly by Great Tom—in foal to Erdenheim, by Leamington; Jaconet, by Jack Malone—in foal to Luke Blackburn; Mignonette, by Jack Malone, with colt by Great Tom—in foal to Erdenheim; Susie G., by imp. Brigadier, with colt by Ecuador—in foal to Erdenheim. Youngsters imported into Germany by the side of their dams are eligible to entry in the stakes offered by the government, the same as if foaled in that country.

Senator Hearst's three-year-old colt Tournament, has been retired for the winter as the greatest money winner of the season. In stake money he credited $90,995 to his owner. Potomac, August Belmont's crack youngster, won $77,000, and placed the banker at the head of winning owners. The regular racing season East has closed. The runners that won over $25,000 in that section are

		Amount.
Tournament, 3 yrs., owned by	G. Hearst	$90,995
Potomac, 2 yrs., owned by	A. Belmont	77,010
Russell, 2 yrs., owned by	J. A. & A. H. Morris	56,883
Sallie McClelland, 2 yrs., owned by	B. McClellan	56,455
Strathmeath, 2 yrs., owned by	G. B. Morris	40,355
Salvator, 4 yrs., owned by	J. B. Haggin	30 400
Burlington, 3 yrs., owned by	Hough Bros	30,295
Sinaloa, 3 yrs., owned by	E. J. Baldwin	26,180
Tenny, 4 yrs., owned by	D. T. Pulsifer	25,420

E. J. Baldwin's Los Angeles won $19,000 and J. B. Haggin's Firenzi $14,260.

A remarkable price was recently made in England, says the N. Y. Spirit. A two year old filly by Isonomy, out of Magdalen (sister to Shotover), only standing 14 3 was put up to auction. Her owner estimated her value very low and did not expect more than 100 guineas for her; in fact, odd as it may seem to use an undergrown two year old as a hack, he had been doing so. When she was knocked down, it was to a bid of 610 guineas, made by Sir George Maude, on behalf of the Queen's Stud. Three thousand dollars and a bit over, seems a goodish price to pay for such a one! (by Isonomy, and no one ever saw a much better race horse from Magdalen, sister to Shotover, winner of Derby and 2000 guineas, by Hermit, from Strayshot by Toxopholite. Was she expensive with a pedigree that cannot be surpassed?—Ed. T. & T.) Another good price was fetched by the brood mare, Maid Marian, by Hampton, out of Quiver, who covered by Galopin sold privately for 3,000 guineas. Her vendor bought her two years ago uncovered for 300 guineas, so that he got a good margin for expenses. (But since then Memoir, a daughter of Quiver, has won the St. Leger and other big races which explains the increase.)

The Sacramento Trotting and Pacing Colt Association last Tuesday at Sacramento, trotted off the three-year-old pacing colt stakes. The judges there were G. W. Hancock, Wilber Smith and E I. Robinson. Timers, Messrs. Swan and McKinney. There were originally five entries, but only three came to the post, S. H. Hoys, Brilliantine, F. P. Lowell's Falrose and W. C. Harlan's Vigor. In the first heat Vigor went away fast and at the half in 1;13 was well in front, but breaking all to pieces was outside the flag when Brilliantine went under the wire four lengths in front of Falrose. Time, 2;31½. The second and third heats were readily accounted for by Brilliantine in 2;31½ and 2;33½.

SUMMARY.

Agricultural Park Course, Sacramento, November 3, 1890.—Three-year-old pacing colt stake open to all foals of 1887, owned in California, on a line all north of and including the city of Stockton, under the auspices of the Sacramento Trotting and Pacing Colt Association. Entrance $75; mile heats, three in five.

H S. Hoy, ch f Brilliantine by Brilliant, dam by Prompter	1	1	1
F. P. Lowell, b c Falrose by Fallis—Roseleaf by Buccaneer	2	2	2
W. C. Harlan, b c Vigor by Sterling, dam by Prompter	dis		

Time, 2:31½, 2:31½, 2;33½.

The Passiac County Grand Jury came into court on the 27th, says the New York Times, with forty-one indictments and retired to continue their business. It was rumored that bills were found against the Clifton race track and the bookmakers on the races there. The most extraordinary reports have been in circulation to-day regarding the prodigious efforts made by the race track people to procure a reconsideration of the vote by which the indictments were found. One grand juror is said to have spurned an offer of $1,500 and another an offer of $3 000. Threats and personal and political appeals were made to members in vain. The race track people deny these stories, and intimate that only last week they refused to pay as low as $300 to members who were willing to protect them "for a consideration." They intimate that efforts have been made to blackmail them, and deny that any indictments have been or will be found, and if they are found they seem to think they will be quashed as being defective in some way. It is admitted by grand jurors who voted for the indictments that the evidence lain before them by the Prosecutor was insufficient to justify indictments, but frankly say that they favored indicting on general principles, as everybody knows that the law has been habitually violated at the race track.

The statistics for the nine months ended September 30th, show says the London Live Stock Journal, that the number of horses exported was 9,492 compared with 10,642 in the same period of 1889, the value being £522,556 against £749,084; a rather serious drop, due chiefly, we believe, to the South American trade, as the figures for "other countries" are £140,288 against £328,495. the numbers being 1,295 against 2,564. There were 3,019 horses exported to Belgium, 1,849 to Holland 1,169 to France, 805 against 865 to the United States, 1,325 against 2,478 to British North America, and 1,295 to other countries against 2,564. Of the 1,751 stallions exported, 389 against 524 went to U. S. A., the value having, however, apparently increased from £43,194 in 1880 to £53,795 this year. The value of all stallions exported was £207,973. against £314 762; mares £168,586 against £264,265; and geldings, £145,997. against £170,057. In the same period we imported 16,336 horses, against 11,235 last year, the value being £273 987 against £220,500. There were 1 407 stallions imported against 870; 3,358 mares against 2,283; and 11,571 geldings against 8,802. The average value per head of the horses exported was about £55, and the average value of those imported about £22.

We notice by the late mails that our Colonial neighbors have been spoiling time records on the Hawkesbury and Randwick tracks at the Spring meetings. The Sydney track has hitherto been one of the slowest, yet Carbine, with 131 lbs. up, runs the mile and a quarter in 2:07, Bungebah, a grandson of Gladiateur, a mile in 1:40 and Little Bernie two miles in 3:31—the fastest ever run at Sydney, and a mile and a a half in 2:37—mile and a half with 122 pounds up. The sires of these phenomenal performers were Musket, Cheviot and Grandmaster. It is worthy of note in dissecting these pedigrees that Grandmaster, a son of Gladiateur, who was a distinct failure in the Mother Country as a sire, should prove so successful, and it is still more remarkable and significant that his grand dam was Slander, full sister to The Libel, the sire of Tradncer, the most successful of all New Zealand or Australian stallions. Both are descendants from the old fashionable nick of Pantaloon upon Touchstone's sister. To show how much is thought in the Colonies of the blood, we quote the well known Sporting Editor of the Sydney Telegraph, who, speaking of Cheviot sire of Little Bernie, the Metropolitan Stakes winner, says

"Cheviot. the sire of Little Bernie, is a full brother to Sir Modred, being by Traducer—Idalia. This is a really wonderful family and it is to be regretted that Cheviot as well as Sir Modred were allowed to leave Australasia. There were five brothers and not one of them now remains in New Zealand. Cheviot and Sir Modred are in America and Idalium and July are in New South Wales. Betrayer, the eldest of them and also the smallest, died recently in Canterbury, New Zealand. Considering how few mares have been served by Sir Modred and Cheviot in Australia, it is really surprising the number of first-class race horses they have left behind."

The Metropolitan Stake has been won in the past by some of the greatest race horses in the colonies, to wit: The Bard Dagworth, Goldsborough, The Pontiff, Masquerade, The Gem, Sir Modred, Acolyte, Cardigan and Abercorn.

It is a well known fact that so much attention has been devoted to short races during the last few years that a genuine stayer is very hard to find, and when he is found there is very little for him to win. But this does not prove that there are no stayers in the country, or that there would be none were there any long distance races. It simply proves that no one wants them; if they did, probably plenty of so-called sprinters would be found to go the route. Take an example from the volume on racing in the "Badminton Library of Sports and Pastimes." In 1866, the late Mr. Swindells owned a horse called Abergeldie, and entered it for the Cesarewitch. Wishing to test its staying qualities, he obtained permission from the Duke of Beaufort to try it with that well known long distance champion, the four-year-old Gomera. A three-year-old filly called Proserpine, which up to that time had always been considered a half-miler, and had been handicapped in the Cesarewitch at 5st 7lb, was put in to make the running as fast as she could over two miles and a quarter on Winchester Racecourse. To the astonishment of all, Proserpine won easily, and when the Cesarewitch was run the despised sprinter was third, being scarcely more than a length off the winner—the gallant little Lecturer.

Mr. Ramsdell, who was part owner and manager of the Undine stable, says that they had bad luck all through after reaching Chicago Homer, who was undoubtedly the best two-year-old in the stable, picked up a nail and had to be let up on for a while; and when he was once more doing good work, he stepped on his quarter, bruising it badly and was once more placed on the shelf yet in the Friendly Stakes, he ran a good second to his stable companion Rinfax. When on the way to New York the car broke down and the horses remained for a long while outside Pittsburg in the hottest season of the year, and all caught a slight touch of influenza Homer, however, rounded too later on, and had the six furlongs dash at Brooklyn, on the 22nd of September, at his mercy, but in a collision was knocked over the fence and severely bruised.

Racine was a great racehorse before the Pittsburg accident, but he never fairly rounded too until the Proteotory Stakes which he won in a gallop despite the mud. Rinfax paid his way handsomely and should do well next year, but Glenlivet, although she showed lots of speed, stopped after going a couple of furlongs, seemingly scared. Mr. Ramsdell also said that while East he purchased from L. J. Rose the two year-old Palo Alto bred Oscar by Wildidle from imp. Petrolense by Plebian.

The Gentleman's Driving Association held its regular weekly meeting last Saturday, at the Oakland Trotting Park, but the attendance for some unaccountable reason was not up to the usual standard. The first race was a trotting match, best two in three, for a purse of $600. The entries were James Welsh's b m Lady Dudley, W. E Meek's b m Flora, Charles Babb's gr m Pet. Flora won the first beat in 2:37½, but the veteran, P. J. Williams, got up behind Pet who won the second and third heats in respectively 2:37½ and 2:34.

The second race was a pacing match, best three in five, for a purse of $1 000 The entries were; W. Coleman's g g Oberon and H. Meek's g g Sam. The first heat was won by Sam in 2:38, the second heat by Oberon in 2:28, the third heat by Oberon in 2:31, and the fourth heat by Oberon in 2:30½.

The third race was a trotting match, best two in three, for a purse of $400. The entries were: Carl Iverson's b m San Leandro Girl; F. Prindle's s g Dan P; J. F. Jordan's b g Brooklyn Boy; W. T. Veitch's b g Jenny; W. J. Wilson's blk m Mabel; Thomas Beard's blk g Blackbird; T. Carpenter's b Cipher. Mr. Emlay drove Dan P. in the first heat and came third, while San Leandro Girl came in first in 2:53½. Dan P. was driven in the next two heats by his owner, 2:49½ and 2:47½, winning the race.

The National Horse Show Association offers a first prize of $100 to the horse owners whose animals shall jump the highest at the coming show at the Madison Square Garden. The association will also give $50 to the rider of the winning horse. The conditions attached to this contest are that the winner of the first prize must at least equal the jump of 7 feet 1 inch, made by Roseberry at the Toronto Horse Show last September. Two horses, the property of different owners, must enter at $25 each or no prize will be awarded. If the horses fail to jump the prescribed height on the day appointed for the trial, the Executive Committee has the power to permit another trial on a later day. The horse will be required to carry at least 135 pounds. The rules governing the contest are as follows:

First—The start will be with a fence 4 feet 6 inches high, to be raised 6 inches at a time until 6 feet is reached, when it will be raised 2 inches at a time until the contest is decided.

Second—Each horse will be allowed four trials until 5 feet 6 inches; from and after this height five trials will be allowed until the horse is disqualified.

Third—Knocking the top bar off will count against a horse the same as an actual refusal.

The top bar will be held in place by employes of the association.

Fourth—Time between jumps to be left to the discretion of the judges.

Pink Eye, a disease which, while it seldom results fatally, is much dreaded by owners of horses and mules, has made its appearance in New Orleans, says the Times Democrat, though it is hoped that it will not spread to such an extent as to damage business interests. One stable in which there are thirty seven mules, has been invaded by it, and it is making a run through a large livery and boarding stable, in which many fine driving horses are located. All the animals that have been attacked by it thus far, are coming around nicely, and none of them have been very seriously affected, a fact which gives good ground for the belief that at the time it is a very mild type of the disease that has made its appearance in the city.

Dr. Morice, the well known veterinary surgeon, thus describes the symptoms and characteristics of pink eye and the best mode of treatment:

"The horse at first has considerable fever and the legs begin to swell. The eyes become red and run freely. The patient coughs frequently, and walks with a zigzag motion of the hind legs.

"Pink eye is a disease of the blood, and may localize in the head, bowels, feet or legs. In the first period a tablespoonful of quinine should be administered three times a day, but should the case not yield to this treatment, a veterinary surgeon should be consulted. as the further treatment ought to be determined by the peculiar character and localization of the ailment. In France this disease is called typhoid fever of the horse; in this country it is termed typhoid pneumonia."

The New York horse show which opens on Monday promises to be one of the most successful ever held in America The entries are numerous.

The thoroughbred stallions on exhibition will include Edward Kelley's Greenland, and the imported Top Gallant Hard Liner and St. George. As usual, hunters and trotters will have a big representation. Over a hundred trotters are already entered, among them being choice collections from the studs of C. J. Hamlin, whose celebrated Mambrino King will again delight the eyes of all good judges of horseflesh, of Major Dickinson, A. B. Darling, Labor Willets, J. H. Shults, and Jacob Ruppert. It is also understood that the great Nelson will make his appearance in the ring.

A new and welcome feature of the show will be the exhibition of hackney stallions, mares and geldings. Among these will be the famous Matchless, owned by Henry Fairfax, while Dr. Seward Webb will contribute a large number of his imported animals. Mr. Burdett-Coutts will make a special trip to this country to be the judge of this class.

He was the center of a little group of racing men in an up town hotel the other evening, and as he puffed a fragrant weed mechanically, he moralized somewhat on the distinguishing features of the mammoth game.

"When you talk about gambling on the high roller principle," said he, "the coon can give the white man cards and spades and whip him before they get to the first quarter pole. Just to illustrate this, I recollect at one spring meeting at Nashville putting up a little nigger we called "Monk" on a mare that had an outside chance. I told him I would give him $100 if he won, and his reply, considering he was a youngster who never had a five dollar bill in his possession before, somewhat startled me.

"Ize gwine ter win, shuah, boss. Ize gwine ter win, shuah. Dey won't nebber beat me. Jest put dat ole hundred on de mare fur me. We can't lose, noways."

I studied a moment, and finally agreed to this wonderful proposition. It was a 10 to 1 shot and the mare won easily; so I handed the boy his winnings with a caution to be careful of the way he spent it.

In the cool of the evening I was taking a drive with a friend, and as we were passing the track I thought I would call in and see how things were getting along at the stable. As we drove up and hitched our horse we could see two dusky forms seated on the bench in front of the feed room deeply engaged in a game of cards.

We stole up along the shed unperceived, and there sat Monk with a cigar in his mouth almost as large as himself. His clothes were just as ragged and unkempt as ever, and his little, black face concealing every emotion with an air of calm indifference. He was playing seven up with Eddie West for $250 a game, and he didn't have enough in the morning to take a street car ride.

The bookmakers and horsemen congregated at Washington last month found themselves confronted with the serious problem, "How shall we kill time," when the heavy rain storm, which set in early in the morning, caused the club's officers to announce the postponement of the programme arranged for the day. The very disagreeable weather put seeing the town out of the question, so some of the pencillers took in the matinee at the one wretched variety theatre of which the town boasts. Others pitted their prowess with the billiard one against that of some other member of the fraternity or against local talent with varying results, while others found their way out to Monte Carlo on the other side of the city's boundary, where the pool rooms are located in deference to the law's command.

'Two fifty to fifty Young Grace, one, two," fell upon the ear of a New York bookie as he entered a dilapidated building; and a moment later, "Seven fifty to fifty Young Grace, to win."

"Whew! they take big money here" remarks the New Yorker to himself; and peeling a fifty dollar note off his wad, he handed it to the gentleman who was raking in the money and said "Strata gem."

The erstwhile complacent and self satisfied announcer of odds looked once at the bill, once at the man who wanted to bet it, and once at the ceiling. Then he fell off his seat in a dead faint. The onlookers, too, were trembling in every limb. The New York bookie rushed from the place in alarm, and not until the evening. when he was relating the incident to a friend who lives here, did he learn the cause of the consternation in the pool room The "two fifty to fifty" and "seven fifty to fifty" represented United States one cent pieces, and the sight of a fifty dollar bill had paralyzed the crowd.

The St. Louis Bookmaking Association is the latest concern to bid for the patronage of that portion of the public who make a specialty of picking the winners. The circular issued by the concern is very unique, says the Republic.

After announcing that Cole Ullman is president and Robert R Kerr, Secretary and Treasurer, the document goes on to say that the association is formed for the purpose of carrying on a general bookmaking and pool room business in St. Louis. Mr. Ullman is to receive a nominal salary and 40 per cent of the profits. The remaining 60 per cent is to be divided among the stockholders. The value of the shares is to be $100 each and there are to be 50 shares. Dividends will be declared every three months, and if a stockholder wishes to sell out a purchaser is furnished at the market value of the stock, which will decrease or increase according to the amount of the 'roll' in the box. A board of directors is to be elected by the stockholders.

The man who evolved the scheme gives promise of becoming a financial genius: that is, not only able to cope with the intricacies of bookmaking stock companies, but to successfully set at defiance certain laws and statutes passed by old fogies on the plea of necessity. This rising young Napoleon boldly proclaims that a stock company can be organized and not incorporated; that a stockholder is only liable for his own stock, when it is the general impression that a partner in a partnership is liable for the whole concern. It is the usual custom for the stockholders to elect a board of directors and for the board to elect the president and other officers. Here the conditions are reversed. The officers are named before the stockholders materialize. This point will be of great benefit to persons who are about to organize similar companies. The rise and fall of the stock promises to be more exciting than the fluctuations in Sugar Trust. No lively commission house can do without quotations on the St. Louis Bookmaking Association.

"Dividends will be declared every three months" says the card. But "how 'bout you, Petie," if it comes to swipes?" In other words, if the capital stock is wiped out by some ornery. good for nothing. lazy, disreputable man putting $100 on a 50 to 1 shot? Yet such things can be. Then, like Othello, the occupation of the president, secretary, treasurer and board of directors is gone.

Sidelights of Sulkyites.

The average man that sits up in the grand stand at a trotting meeting and sees a field of horses coming up for the word, does not think for a moment that every horse in that race has a history that would read well in any publication, and that the men in the sulkies are each week patiently adding valuable pages to turf history. A curious reporter that is ever looking for details, can, during the morning, skirmish round the stables and learn where each starter was bred, by whom broken, how shod, hooted, and how much weight, if any, he carries, together with the amount of work he has had to bring him up to a race. In each particular, which is freely given, the experienced mind knows that there has been, in many instances, days spent in discovering what should be used and what should not. In rigging a trotter, possibly nothing puzzles a trainer more than the weight of his shoes. Many start with the same weights all round, and if the horse goes well does not change until he finds when speeding something faulty in his action. Then the shoes are made lighter or heavier, as the case may require, caulks put on or the edges rounded off, heels lengthened or shortened, until the regular one, two, three, four beat of the pure gaited trotter is arrived at, and until it is, no man can expect, no matter how fast his colts or matured horses are going, to have a campaigner. To a novice the array of boots are bewildering. Scalpers, quarter boots, shin and pastern, hock boots with all kinds of attachments, shin boots, elbow boots, rolls, ankle boots, and half a dozen others, all find a place on a perfectly trimmed rack, which every rubber, that has an eye to business, prides himself in keeping as trim as the quarter-deck of a man-of-war. Each boot has its place, and when not wanted for protection is frequently worn for safety. Happy is the rubber that has a horse whose complete outfit, aside from his harness, is possibly a pair of scalpers and quarter boots, as it is not a very easy task to keep the harness clean, together with every conceivable combination from a pair of hobbles to a shin boot presentable.

On the stock farms, when the youngsters are taken up, they are, as a rule, hooted at every point, until it is found where they pass in safety and where they are apt to hit themselves. At that time their actual training begins. In the country districts, however, the boot is on the other foot. The majority of the horses trained have arrived at maturity, and the trainer has to try every plan known to the profession to make a trotter or pacer, as the case may be, fast enough to go out for the money before he sends the horse home, if he stands the racket without going lame. Then he sees a loss of so much a month should he give up the task of training this favorite, and as the average county trainer has not to keep horses standing in the halls over night, on account of insufficient stall room, he keeps on persevering until the flag falls in his face a few times, if the owner becomes impatient, or until he discovers that he has at last secured a desirable piece of racing property.

What the unknown trainer in a small town has to contend with day after day in the pursuits of his calling, his more favored brethern cannot avoid, only they do not meet it possibly as frequently, as many of their pupils come to them almost ready made. Of course, at times they improve on the work of others and get the horse going faster, steadier, and make a better race horse; still all of them, or at least almost all of them, have a desire to take the horse in the rough and bring him from chaos, as it were, up to Grand Circuit form. Those that have sat inside the fence of drivers' arguments will remember that Splan always contends that a horse is born with his flight of speed and that it is as fast in the rough for a little ways as it will ever be, even when the hand of the master mechanic has turned the soft muscles of colthood into bands of steel, taught the willing or unwilling pupils, as the case may be, how to score, come back at the pressure of the bit or rush at an opponent at the command of an encouraging voice or the biting stroke of the whip. He quotes Rarus and Johnston as his examples. He gave both of them their records and saw them driven before he ever sat behind them, and who can gainsay his word. Still for argument's sake there must have been many notable exceptions, and it is just possible that Leopard Rose should be one of them. No one ever saw her rush away from the word on the half-mile tracks last year or any preceding year at a free-for-all clip, and where is the conservative claimant for any high faugled trotting done by Tom Arden before he was put into the moulds by the young man that sold him at Wellington. But in following this topic a drift has been taken from the field of horses coming down for the word and the probable threads of history dangling behind their sulkies. Take McDoel for example, a menial plough horse until his speed was discovered; and Captain Lewis was no better and would have been as fast if his Rochester owners had been disposed to let his leg alone after Horace Brown had made more than one spectator's teeth rattle with his successful trip down the line.

Men not horses, however, is the theme and it is one that interest every one that buys a pool ticket or asks a secretary for a complimentary on race day. Of course these interests come closer on account of association with the gentlemen that make such good use of the holders on the reins when heats are being decided and a continual run of favors running from one town to another. It is a strange fact and one that track managers have been unable to solve satisfactorily and that is, if a man gets a complimentary once it is a hundred to one he will never buy another ticket for a race meeting but will spend money, time and skill to devise means through which he can ingratiate himself with the authorities and by so doing be remembered on the afternoon of the day before the meeting by receiving through the mails a coveted complimentary.

It is, however, to be regretted that this lagging prose will not skip over the fence on to the quarter stretch and rake up a few sidelights of sulkyties, or, rather, little incidents in the careers of a few prominent drivers. At first sight the name of James H. Goldsmith appears. His name has been a prominent one for years, but has only won what might be called national fame in the last three when after the death of his father and settlement of the estate he became the master of Walnut Grove and branched out as a public trainer. The precedence given him on this occasion can be excused when it is remembered that he has won more money this year than any man that went through the Grand Circuit, as was shown in the comparative tables published in a recent number of The American Sportsman and which were, by the way, quietly published without credit by the majority of its contemporaries. James Goldsmith learned his business at home under the shadow of Volunteer's fame and his first successful performers traced to the loins of Lady Patriot's greatest son With Huntress, Driver, Trio, Sister, Alley, Powers and Carver he won many a race and learned the lessons of patience that have landed him at the head of his profession. "As game as a Volunteer" has become a proverb and another might read "as difficult to understand." James H. found that kindness was the key to their continence and that while they resented a stroke they would follow a caress. The records of the turf tell the rest.

The most striking display of Goldsmith's patience that was ever seen in public appeared on the cards at Hartford two years ago. He had Company in a race against Captain, William Kearney, Frank Buford, Charley Gibson and Jeremiah. The Kentucky Prince gelding had two weeks before won a remarkable race at Poughkeepsie defeating Graylight, who afterwards became a free-for-all candidate under Goldsmith's pilotage, Superior, who was injured at Pueblo, Col., Friday week, and a number of others taking a record of 2:19¾, which he could never after equal, let alone reduce. He was known to be a very uncertain horse, unsteady and a tremendous puller, in fact so had that the late John Murphy, who gave him his first lesson pulled him up in a race at Cleveland and sent him to the stable.

Somehow Company was the kind of a horse that Goldsmith cottoned to, possibly on account of nearly every other driver being disposed to give him the cold shoulder. At all events he got him, won the race at Poughkeepsie, and then popped up at Charter Oak as it were on top of a mushroom The race was one of the kind that make game men dizzy. A thick set man with a flowing mustache busied himself round the pool box buying fields at $3 with William Kearney in, and as Feek, the developer of the Lysander family, had him, he considered that he was better off than the New Yorkers with Company or the Bostonians with Captain. But to come to the meat of the story. Feek won the first two heats with William Kearney, and the individual betters soon assiled in to keep out of the wet. In the third heat Company made him sit down and then Captain won two heats, Goldsmith fighting Golden at every available point. When Company won the sixth heat the money went on in loads, as Goldsmith felt he could win. It was then the fun commenced. A swarm of bees had landed on Company's head, and their buzzing made him dizzy, rank, cantankerous, mean. Guy in his sulkiest mood was not a marker to him. For over three quarters of an hour he sashaed, waltzed, danced and hobbled down the stretch with Kearney and Captain. The public was disgusted, the speculators were dismayed, but Goldsmith was unruffled. He had a whip and an arm that can use it as unmercifully as any in the business when the position warrants it, but he sat there and waited patiently for that horse to get over his tantrum. When he did it was only temporary, however, and lost the race to all appearances through it, but Goldsmith did not loose his presence of mind or temper with Company, but stroked him as good naturedly after the exhibition that had cost him a number of good dollars as if he had landed the pool box for his followers. It was this perseverance that made Goldsmith a success with the Volunteers, and it is this quality that would, were such a horse as Guy to come into his stable, make him the driver of a record breaker. For in the case of Guy, Goldsmith would have not only the patience to wait for him to go away level, but also the skill to rate him when he got him going. In the fast miles that Guy has been driven, he has been permitted to rate himself, and as a natural consequence it has been a very common thing for him to trot to the half at a record breaking clip and finish as best he could. In this way he has managed to trot in 2:10¾ and trot a mile and an eighth the day he made that record.

But while Goldsmith possesses the quality or patience, he has also others that have gradually moved him along in front one of them being the ability to shake up a tired horse in front of the party. At the last Cleveland Grand Circuit meeting, the bay gelding Dawson cost a few of the boys some money and they wanted to get it back at Buffalo. They got it back according to the records, but by the narrowest scratch imaginable. In the third heat the horse was almost done and a boy that sat by the distance stand thought he heard Goldsmith murmer as he gathered the horse up in his bosom, "Come to my arms thou son of Mansfield, thy legs are weary and thy heart is faint, but for the honor of the family to which you belong, and the farm on which you were foaled, you must stagger home in front," or words to that affect, and the horse did win, strung out to the limit of his speed.

It would be a very difficult matter to tell the reasons for Goldsmith's success in the sulky as he was literally born in it and has had and handled horses from youth. He was particularly fortunate in having his lot cast among the Volunteers, as the highest class race horses are like them horses of great resolutions and will power that can be controlled by kindness and made useless by resistance. Last summer, one day, when speaking of Mambrino Maid, he showed this point by stating that she is a rather willful mare and one that must be let go when she wanted to. By humoring her and working her carefully he placed her name at the top of the list of Grand Circuit winners, something that possibly few others would have succeeded in doing.

To an observer Goldsmith's triumphs might be attributed to perseverance, backed by firmness allied with an intuitive knowledge of horses and their ways. His seat in the sulky is not so graceful as that of Doble or Hickok as he leans forward further, a fact that does not come from his using a higher seat but that he is a taller man. In this way he gets nearer his horse and can take a stronger hold on a bad actor of the company kind. In his finishes Goldsmith appears to combine Splan's unequalled rallying powers and Doble's catapault drives.

With the yell of a Sioux, and a pistol grip that would make a gun maker weep, Splan rustles his charges along, panting, flinging, shoving and banging his tired horse to the wire, where the money is up and being reached at each stride. Turner, on the other hand, sits as erect as a judge on the bench, trusting to his horse's gameness and early training, which he has gradually drawn to an edge. Doble waits patiently for the final drive, and reefs his tired horse as skillfully as a seaman stows away a sail. Goldsmith unites the reef with Splan's electrical flourishes, seeing, feeling and knowing only one thing until the wire is reached. The cherry and black jacket and cap of the Walnut Grove horseman has been on all of the prominent tracks of late years, and would have closed the season of 1890 at Philadelphia, had not the man that has made it prominent been struck down with what appeared to be partial paralysis at Lexington. At last accounts he was recovering, and next spring the public may expect to see him again, whirling round the oval and kite-shaped tracks, behind the pupils wintered at Walnut Grove, and this last word wintered means considerable, as the now prominent trainers of to day will not take a horse to campaign, that does not come to them in the fall. This week Goldsmith has sent two from vicinity that he would not take under any other conditions Geers has, to the knowledge of the American Sportsman representatives, refused several, which owners did not dispose to send to his winter quarters in Tennessee. There are several reasons for this state of affairs, but they cover so much ground that it would be advisable to reserve them for another installment, under the head of Sidelights of Sulkyites, when the methods of some of the veterans will be discussed, and what remarkable changes have been made in the methods of training trotters within the memory of those still prominent in the ranks. When those whose hair is now growing gray in the service were learning their first lessons, or starting out to 'paddle their own canoe' as it were among the master mechanics of the sixties long jogs, heavy sweats, were the accepted truths of the profession and no man could hope for good results that did not set into line. A horse was never given a mouthful of grass from the day his work began until the campaign was over, and his daily exercise was enough to kill anything but a horse with an iron constitution. Of course in those days there was more manufacturing done than at present, where selection in breeding has given the embryo trotters a confirmation and gait that their ancestors had to acquire. Then again the modern trainer does not aim to draw his horse so fine that he can slide him through the eye of an needle but rather to keep him in good hard flesh but with no fat inside. By grassing him he also keeps his bowels in good condition and by sharp brushes keeps him at his speed.—The American Sportsman.

Marcus Daly's New Purchases.

On October 27, there was shipped from Lexington, Ky., to Marcus Daly, Anscouda, Mont., sixteen head of trotting horses, consisting of two year olds, yearlings and weanlings, in care of Mr. Ben B. Kenney, the young and successful trainer of Nancy Hanks 2:14½, who will take charge of Mr. Daly's splendid stable of trotters, says the Spirit of the Turf. This shipment is perhaps the richest bred in trotting lines of any similiar consignment that ever left the State of Kentucky, and it is safe to say that they cost their owner more money than was ever paid for a like number of youngsters. While the prices for all of them cannot be learned, it is known that Mr Daly paid $10,000 for Lady Wilton alone. While the aggregate amount spent for the entire lot is believed to be from $40 000 to $60 000. Following is a list of these priceless youngsters: Lady Wilton br f, 2, by Wilton; dam Lemonade 2:27¾, by Kentucky Prince Jr; second dam Susie Melbourne by Melbourne, Minnie Gorn f, 2, by Jay Bird, dam Betsy Higgins by Sharmont; second dam Roan Betty by son of Cavanaugh's Davy Crocket; Winell br f, 2, by Wilkes Boy; dam Miss Mamie by Contractor; second dam Alice by John Dillard Jr. Yearling—Annie Wilton b f, by Wilton; dam Annie B by Hambletonian Mambrino 2:21¾; second dam Gilbert mare by Clifton Pilot Jr. Merry Will br c, by Wilton; dam Mary Sprague by Governor Sprague; second dam by Edwin Forrest. Lellia Keene ch f, by Red Wilkes; dam Myrtle 2:34¼ by Norman D; second dam Lizzie H by Norman. Liddy Mac ch f, by Robert McGregor; dam Lucille F by Stratmore; second dam the Casel mare by Oakwood son of Backwood. Red Ann b f, by Red Wilkes; dam Annie Clay by Sayres' Harry Clay; second dam Calypso by Hambletonian 10. Carrie Moore b f, by Red Wilkes; dam Belle Moore by Homer; second dam by imp. Knight of St. George. Minnie Thorne b f by Red Wilkes; dam Tillie Thorne by Mambrino Patchen; second dam Lady Ayres by Redmond's Abdallah. McCap ch f, by Robert McGregor; dam Mary Cap (dam of Linnie 2:25), by Mambrino Time; second dam Cap by Ward's Flying Cloud. Wilshaw ch c by Robert McGregor; dam Wilkie Monroe by Bourbon Wilkes; second dam Nino Moore, dam of Wilshire 2.26¼ by Jim Monroe. Red Cherry b f, by Red Wilkes; dam Madame Herr, full sister to London 2:20½, by Mambrino Patchen; second dam Becky by Alexander's Edwin Forrest. Weanlings—Dark brown or black filly by Bell Boy; dam Annie Jackson by Red Wilkes; second dam Miss Patchen by Mambrino Patchen. Black colt by Billy Wilkes; dam Miss Bemis, dam of Judge Rider 2:28½, by Mambrino Patchen; second dam Lady Ayres, dam of Lottie Thorne 2:23¾, by Redmond's Abdallah. Dolly Johnson bl f, by Wilton; dam Diana Patched, dam of Lexington 2:24½, by Mambrino Patchen; second dam, dam of Rothschild by Edwin Forrest.

Certificates.

An accomplished Eastern turf writer has the following to say about certificates: A very important step is about to be taken by both England and Germany, and it is that other foreign countries where trotting is being introduced will adopt the same measure. The Trotting Union of Great Britain proposes to pass a new rule, which will go into effect in January, providing that no American horses shall be permitted to enter for the races excepting those that have already raced in this country. The rule makes another exception which is extended to horses able to produce an American certificate. The latter is a move in the right direction. It should long ago have been adopted in this country and the curse of "ringing" would not have grown to such appalling dimensions. The certificate business will put a most effectual stop to the sharks who purchase outclassed trotters in this country and ship them to foreign countries for the purpose of "ringing" them as native-born horses. They will have to show where the horses came from. On the other hand, no fraud can be perpetrated in palming off a native bred horse for an American-bred trotting stallion. The very protection demanded and conceded to foreign countries is denied the honest owner in this country, where, owing to immense number of unknown trotters, the opportunities for committing fraud are endless.

What a guarantee an owner would have if no horse could perform without an official certificate properly indorsed by an officer of the course over which the horse last trotted. A certificate of that kind would entitle a horse to perform in any race in his class, over any course controlled by the National Trotting Association, and no protest could avail against it unless it should appear that the owner, nominator or driver was under penalty. An owner armed with one of these certificates could trot his horse over the tracks of the association without danger of inference so far as the horse was concerned, precisely as a ship with proper papers can navigate the high seas without fear of molestation. Another excellent rule would be to make compulsory the payment of five per cent., when the entry is made, with no further charge if the horse does not start. With a rule like this there would be no entering of horses on remote tracks without consent of the owners, by rascals who desire to vent a personal spite. No man will enter a horse in that way if he is compelled to pay down five per cent. of the entrance fee. Another instance is recalled now, and the case will come before the next meeting of the Board of Review. An owner had occasion to discharge his driver, and the fellow in order to "get square," entered his horses at several places throughout the country. The owner knew nothing of it until he came to start in the fall, when at the first place a bill for the back entrance money was presented, and he was obliged to put up more than two hundred dollars before the horse could start.

No harm ever done by the use of Simmon's Liver Regulator.

Drunkenness and the craving for liquor banished by a dose of Simmon's Liver Regulator.

THE FARM.

To Cattle Men.

We have received the following letter which speaks for itself:

CHICAGO, Ill., October 15, 1890.

TO THE CATTLEMEN OF THE UNITED STATES:

Gentlemen: During September I sent out a number of letters asking cattlemen, "If they would join an Association which I would form to better their condition," and was surprised to receive 80 per cent. in favorable replies.

Much elated with the result, I will push forward an Association which will be the greatest one of its kind in existence.

It was my intention, first to learn, if the forming of an Association was possible, and then give you my ideas as to how it can be successfully worked to save millions of dollars. Then advance the price 30 per cent to where it was in 1882.

First. To form an Association to protect ourselves.

Second. To stop shipping cattle at a certain time to accomplish the object.

Third. To build Stock Yards at most advisable points to receive cattle, where packers and dealers may purchase from the Association.

Fourth. To do away with brokers and commission men, and save the excessive yardage charges.

Fifth. To advance prices 30 per cent.

Forming the Association is an easy matter, but it must be so strong and determined that when a member receives an order from headquarters; "he must obey it," and I feel certain he will, when he knows it will be to his interest.

My reason for "stop shipping cattle," (on your receiving notice to do so,) is to accomplish our object, which can be done with success in no other way, as it will be impossible for the packers and dealers to do business without the cattle.

As to building Stock Yards for receiving cattle it will cost very little money, which will be advanced. I can secure any amount of suitable land as near cities (such as Sioux City, Iowa and Hutchinson, Kansas) as the Union Stock yards are to Chicago, by agreeing to build yards on it.

We can save $6 000,000 annually by the Association handling the cattle with its own employees. By making a small charge of 25 cents per head, (where we now pay 75 cents—50 cents to broker and 25 cents to Stock Yard Co.) we can realize over $2,000,000 each year, which will pay employees, have money to advance on shipments, and also be used for buying cattle from small producers and the few men who refuse to join the Association. If we found by charging 25 cents per head it accumulated more money than needed, it could be used as a "benefit fund."

The prices can be advanced 30 per cent without the retail price necessarily advancing. In 1882 choice beeves weighing from 1,200 to 1,500 pounds, brought on an average of $5 60 per 100 pounds, and porterhouse steak retailed for 15 cents a pound. In 1889, the same kind and weight of beeves sold for $4.05 per pounds, and porterhouse steak retailed for 22 cents per pound. No reason why price cannot be put back to $5 60 and kept there.

Let me give you an idea of how it will save you, by referring to the cattle I own and control: For instance, I have 20,000 head, weighing on an average 1,200 each, or 24,000,000 pounds at present market price, 4 cents per pound, worth $960.000. When we advance the price to 5½ cents (30 per cent) per pound, the cattle will be worth $360,000 more, not including the $10,000. (50 cents per head) I will save by sending them to the Association's yard.

The most important thing we must do is to regulate and control the production, and that can be readily done if we find that "over production" is one of the causes of the bad condition of the cattlemen. We can purchase and send to market entire ranches, which will in a time reduce the production, and when the "shipping of cattle" is thoroughly systematized, there will be a great change from the present condition.

As to advancing money, that may be easily arranged, until the Association has its own funds. Have unlimited capital I can draw on, and have the promises of many banks to advance. I am receiving letters constantly from bankers and wealthy men, who have seen notices in the newspapers of the new Association, offering to assist me. The following letter is one of the many recently received:

D——, COLORADO, Oct. 1, 1890.

MR. WILLIAM T. HUNTER, PALMER HOUSE, CHICAGO, ILLINOIS.—DEAR SIR:—The attention of the writer was directed a few days ago to your circular letter, and the editorial relating to same in the Denver News. While not being entirely posted in regard to all of the points which you have in mind, it strikes me that this is a very important proceedure, and the idea is most favorably received by a majority of the cattle men in this country to whom I have spoken.

No one here, so far as I am aware, has received the letter or other communication from you. The writer being an old cattle man in this section, and intimately acquainted with everybody handling cattle here now, would take pleasure in sending you the names of them all, or aiding you in this scheme in this section of country to the best of his ability. The idea as you suggested, will undoubtedly work well, provided an advance could be made to those stock men who must of necessity sell at any price to pay their bills.

They would be glad, however, to pay a fair rate of interest on money and hold their cattle over for awhile, if they could have any assurance that their cattle would ultimately be sold to advantage.

I should like very much to hear from you upon the subject, and can assure you a hearty co-operation, providing the idea proves to be as it appears on the surface. This is a fine cattle country, and there are lots of cattle in it. It is, however, subject to the same drawbacks as most of the rest of the range in the United States, from the fact that it is overstocked, and the water a little scarce. Trusting to hear from you in the very near future, I am,

Yours very truly, D. K. D.

A prominent broker at Union Stock Yards in Chicago, made these remarks to a newspaper man, which he has published: "There is no doubt that the ranchers have been badly treated, and the men that made millions in the meat business had bled them. He had told the native cattle men that if they did not take care they would be in as bad a plight as the ranchers."

Another more prominent broker in speaking of the financial condition of the ranchmen, said that "undoubtedly through reckless expenditure and over-production some were in difficulties, but he believed that by conservative methods and careful attention to business things would come right, and that in the next four years the increased consumption of dressed beef would send the price of cattle up to 5 and 7 cents a pound." He seems to lose sight of the fact that if there is an "over-production" it has been caused by natural increase, and careful attention to business will not lessen it any. It is true that in the next four years there will be an increased consumption of dressed beef, but there is no possible chance for the price to advance, unless an association is formed and the production controlled. I quote here figures taken from a broker's book, called "Facts and Figures of Chicago Live Stock Trade," to show you that it does not look like "over-production." In 1888 the receipts of range cattle sent to the Chicago market was 269,509, and in 1889 it was 160,396. No over-production about these figures. This marked falling off was not caused by a hard winter, as I know from personal knowledge that the loss on the range was not over 2 per cent., and that was mostly young stock, which is expected. The cause of the great decrease is from being forced out of business by the steady decline of prices.

Mr. Jas. H. Campbell is quite correct when he says: "Whatever may be said against the combination or Big Four, as it is called, it must be allowed that they are men of capital, energy and ability."

I should like very much to hear from you, and receive names and addresses of cattle men in your country, as it will take some time to reach you all. In the meantime I will see about locating yards, and arranging other matters which must be done in advance. Would advise you not to ship any more cattle than is necessary this year, as this time next year you will receive much more for them.

Yours very truly, WM. T. HUNTER.
Palmer House, Chicago, Ill.

California State Board of Horticulture.

We have received the following letter and circular from the Secretary and as it is of great interest to the Horticulturists of the State, we print both letter and circular:

SAN FRANCISCO, Oct. 31, 1890.

DEAR SIR:—We beg leave to call your attention to the within circular, being a call issued by the State Board of Horticulture, for a State Convention of Fruit Growers, to convene at Santa Cruz, November 18th to 21st inclusive.

The meeting will be largely attended by representative fruit men from throughout the State, and many others interested in kindred pursuits. Many subjects of great interest will come before the Convention for consideration, and among others, the advisability of forming a union with Florida fruit growers, the exhibition of California products at the coming Columbian World's Fair, a report of the Eastern fruit shipments, etc.

This Convention is called to enable fruit growers and others interested to come together for a general interchange of ideas, and be profited thereby, and an invitation is extended to all interested. Very truly, B. M. LELONG, Secretary.

CONVENTION OF FRUIT GROWERS, OFFICE OF STATE BOARD OF HORTICULTURE.

SAN FRANCISCO, Oct. 31, 1890.

The Fourteenth State Convention of Fruit Growers of California will convene at the city of Santa Cruz on Tuesday, November 18, 1890, and will continue in session four days. The citizens of Santa Cruz, the Board of Trade and the members of the State Board of Horticulture, cordially invite fruit growers, shippers, nurserymen and others interested in horticulture and kindred pursuits to be present at said convention and to participate in its deliberations.

Every effort will be made to insure a large attendance, and it is to be hoped that the meeting (as were the previous ones) will be of interest and profit to all.

It is especially requested that samples of fruits, either fresh or dried, be exhibited at this meeting. A card should be attached to all samples, giving name, etc., and stating briefly how processed. It is also requested that all those having new fruits and inventions of value to horticulturists will exhibit them at this meeting.

The Southern Pacific Railroad Company will allow return tickets at reduced rates from all points on their lines to Santa Cruz, provided not less than 100 persons make the trip, and a receipt for the ticket purchased be taken at starting point. This will be countersigned by the Secretary at the convention, and entitle the holder to a return ticket at one-third the regular rate.

Hotel accommodations are ample and reduced rates will be allowed.

OPENING DAY.

The Convention will assemble at 10:30 A. M., Tuesday, Nov. 18, 1890.

1.—Calling to order by the President.
2.—Election of two Vice-Presidents.
3.—President's semi-annual address.
4.—Address of welcome.
5.—Response.

Many very valuable essays on different subjects will be presented, written by prominent and experienced horticulturalists, to be followed by general discussions, of the wide and diversified field of horticulture.

It is impossible at this time to make a complete announcement of a programme, that will include the entire lists of writers, but it may be sufficient to say that a rare treat by way of valuable essays and discussions, await those that may attend.

We go to Santa Cruz in the discharge of our regular obligation, to aid in all ways possible in furthering the interests of horticulture, and also at the cordial invitations presented by the citizens, and because of the widely diversified interest represented in her vast territory, and varied products which many have desired to see and investigate for themselves. For these and many other reasons we believe that all who may attend this meeting will be gratified with its results.

Respectfully, ELLWOOD COOPER, President.
B. M. LELONG, Secretary.

NOTE.—The State Board of Horticulture is a State Institution, and the Conventions held by it semi-annually in different sections throughout the State are to enable fruit growers and others interested to come together for a general interchange of ideas and be profited thereby. All who shall attend will receive a cordial welcome.

The State Board of Horticulture as at present constituted is:

Ellwood Cooper, President, Santa Barbara, Commissioner for the Los Angeles District.

L. W. Buck, Vice President, Vacaville, Commissioner for the Napa District.

S. Runyon, Treasurer, Courtland, Commissioner for the Sacramento District.

J. L. Mosher, Auditor, San Francisco, Commissioner for the State at Large.

Diphtheria in Cows.

A paper read before the Royal Society of England by Dr. E. Klein in May last, and recently published, contains some remarkable facts in regard to the nature of diphtheria in cows, and its effect upon the milk which are of surpassing interest to intelligent dairymen and consumers of milk. The facts are more important for the reason that this serious disorder has all the outward manifestations of a very common disease among cows, known as cowpox, or vaccine variola, and which from its simple character rarely attracts notice among the owners of cows, whether they be private persons keeping a cow for the domestic supply, or farmers, or dairymen. This simple disease is a mild specific fever, which presents no serious symptoms beyond a sometimes inconvenient eruption upon the teats of the cow, that may interfere with the operation of milking, from their soreness during the short continuance of the disease, or upon the udder, where they cause no inconvenience whatever. This disease rarely lasts longer than fifteen or twenty days, when the eruption dries up, forms scabs which drop off, and rapid healing follows. The eruption appears as small pustules, which become vesicles, containing a fluid serum that changes to pus, which finally forms the dry brownish scab which is used by physicians as the vaccinating virus for the prevention of small-pox. These pustules are surrounded by a red ring of inflammation and underlaid by a somewhat hard nodule. They become in time flattened and depressed in the center, and soon after—if not broken in the act of milking or by violence—dry up, as mentioned. Very similar pustules appear as the outward and visible symptoms of the more serious disease, which is so closely related to the human diphtheria as to be conveyable to persons and animals through inoculation by the virus or through the milk. Consequently, a cow affected with this disease may be very easily supposed to be suffering only from the scarcely serious cowpox or variola, and so much injury may result from the mistake as to call for more than ordinary notice and precaution.

The experiments related by Dr. Klein are as follows: During some years past various outbreaks of diphtheria among residents of the city of London in 1888, led to careful investigations, by which they were traced to the use of milk taken from cows supposed to be in good health, but which had chaps or sores upon the teats. Other cows examined under suspicion were found to be in apparent good health, but had sores and crusts on the udder and teats. No substantial evidence was consequently found to connect the numerous cases of diphtheria, so many in fact as to amount to an epidemic, with the actual disease in the cows, until a thorough investigation was made. In the course of this investigation two cows were inoculated with a culture of diphtheria bacilli taken from a person suffering from the disease. It is unnecessary to recapitulate the results of the experiment further than that the operation there appeared on the udder and teats red raised pustules, which soon changed into vesicles surrounded with the red ring which is characteristic of the cowpox. The vesicles contained a clear lymph, and were underlaid by hard nodule. The next day the vesicles changed into pustules containing pus; in another day these dried into crusts with sores underneath; in two days more the crusts became thicker and larger, and soon after fell off, leaving dry, healing sores. All this happened in from five to seven days, which is precisely the time in which the same manifestations occur in the cowpox, and, as in this disease, fresh vesicles appeared, passing through the same stage, constantly between the fifth and eleventh days after the inoculation.

The milk drawn from one of the cows on the fifth day was examined, and thirty-two colonies of the diphtheria bacilli were found in less than one teaspoonful of it (one cubic centimeter). The matter from the pustules was found by microscopical examination to contain the bacilli, and the virus injected into two calves caused the characteristic eruption of vesicles changing into pustules and dry crusts, as in cows. The calves, too, were affected by the same bronchial inflammation and pneumonia which appeared in the cows soon after inoculation with the cultivated germs of the human diphtheria, and the presence of the bacilli was exhibited in them as in the cows in the tumors formed at the place of inoculation. In fact, the whole system, the lungs, the liver, the heart, and the muscular tissues, were pervaded by the diphtheria bacilli. Thus the contagious nature of the disease was clearly ascertained both of the virus of a human subject and from the cows, and also the fact that it is absorbed into the whole system, including the udder, and that it escapes in the milk and contaminates it. Later an accidental occurrence proved that the diphtheria is conveyed by the diseased milk in the same form, viz., the prevalent false membrane of the throat in animals in which this disease manifests itself in this way. Many experiments have been made with cats which are subject to the disease in precisely this form, and which are known beyond question to contract the disease by infection from persons, and to communicate it to them in turn. The milk taken from one of the inoculated cows above mentioned on the fifth day after the operation was ordered to be destroyed. But this order was disobeyed, and part of it was given to two cats. These cats became sick, and soon after died of diphtheria.

This evidence goes to prove beyond question the fact that milk of diphtheritic cows carries the disease with it, and justifies the suspicion of the physicians attending the cases out of which the investigation grew at first. No uncertainty can now exist in regard to this most important matter, and the imminent danger that, from the similarity between the appearances upon the udder and teats of cows in the frequent occurring cowpox and in the fatal diphtheria, this may be mistaken for that in more cases than persons interested may be aware of.

The exodus of stock sheep from northern Montana to North Dakota still continues. The Montana Farming Journal says: Fifteen thousand head were purchased in this vicinity last week and will be forwarded by the Great Northern as cars can be obtained. Of this number J. M. Hawkins, representing E. M. Pronty, of Grand Forks, bought 10,000 head, comprising two of the best bands of grade merinos on the Teton, those of Hobbins & Hefferman and Hammel & Zimmerman, and a band from the flocks of the extensive Cooper-Martin Company, and 128 thoroughbred Shropshire bucks, from Seims & Armington. Sheep raising has been found very profitable in North Dakota, and Mr. Prouty will lease these sheep to the farmers there on easy terms.—River Press.

GAMES PLAYED AT HOME, OAKLAND, SACRAMENTO AND STOCKTON.

SACRAMENTO vs. STOCKTON.

THURSDAY, OCT. 30TH, 1890, AT SACRAMENTO.

This was a jag handled game, the Senators having no difficulty in hitting Perrott at will, while the team back of him gave him miserable support, shirking many easy chances. On the other hand, the Sacramentoa put up a strong game behind Hoffman, who pitched excellent ball. Armstrong atarted in to catch for the Gas towns, bnt hurt his finger badly in the first inning. Stockwell catching the remainder of the geme. The batling featurea of the game was Stapleton's terrific hitting, the Senator captain making four hits, two of which were triplea, and Hoffman and Roberts' work with the stick. Bowman's catching, the infielding of Reitz and Godar, and Roberts' work in lett were tho fielding features. Pete Meegan umpired in a very satisfactory manner. The score:

SAN FRANCISCO vs. OAKLAND.

FRIDAY, OCT. 31ST, 1890, AT OAKLAND.

Although the Colonels had a big lead in the forepart of this game, the Friscos by some heavy hitting, and aided materially by errors, overtook and passed them in the seventh inning, winning handily. It was a good hitting game, the Metropolitans having the best of it in bunching, while the fielding was a combination of yellow and rosy work. Midget Sweeney made a most surprising catch, running to deep center with his back to the audience and getting the ball over his shoulder. Ebright, C. O'Neill and Hanley also made some very brilliant catches. After Cobb was hit hard in the eighth, he went ont of the box before a hand was ont and Shaw pitched for the balance of the inning. Coughlin was steady and fairly effective throughout the game. The score:

SACRAMENTO vs. STOCKTON.

FRIDAY, OCT. 31ST, 1890, AT SACRAMENTO.

The Senators and Gastowns played two games at the Sacramento gronnda on this date, being victorious in both. They opened very lively on Kilroy, Roberts and Bowman, each making a home run in the first inning. After that he steadied down, bnt errors of the infield, lost his game. Harper was in good form, doing great work and receiving magnificent support. In the first inning, Goodenough threw a man ont at the plete from deep center, and in the following inning doubled up a runner at first, after making a brilliant catch. Bowman led the hitting with a homer and a triple. The infielding of Wilson, Fogarly, Reitz, Daly, and Stapleton, Bowman's backstop work and Goodenough's splendid assists constituted the fielding features. The score:

SACRAMENTO vs. STOCKTON.

FRIDAY, OCT. 31ST., 1890, AT SACRAMENTO.

There was a good sized crowd present when the second game was called. Borchers was in the box for the Sacramentos and Fudger and Wilson formed the battery for the Stocktons. Borchers was frightfully wild in the first inning, sending six men to first on balls, which with a wild pitch gave the Gastowns three runs. After that he became steadier, striking ont ten men and allowing but five hits. Fudger waa also wild, bnt all things considered did good work. Stapleton again came to the front with three pretty hits. Fogarty was the star of the game, accepting twelve difficult chances aronnd the middle cushion. The Stocktons had a lead of two runs at the beginning of the ninth, when after Roberts and Stapleton gained the initial on balls, Daly banged ont a home run over the right field fence, making the winning run himself. The score:

SAN FRANCISCO vs OAKLAND.

SATURDAY, NOV. 1ST, 1890, AT SAN FRANCISCO.

There were eleven exciting innings to this game, which finally resulted in favor of the Friscos, disastrons errors of the Colonels, allowing the home team their victory. Carsey went in the box, and as he haa been especially effective against the Mets, it was expected that he would again down them. But after three innings in which he was touched ont pretty lively, he retired, Shaw taking his place. Although fidgety, and at times wild, Shaw pitched his best game seen here. The Oaklands tied the Friscos' lead of two runs in the ninth. C. O'Neill led off with a single, and McDonald's corking three bagger to the small left field fence, scored him. Oo Tip O'Neill's hit to Ebright, McDonald started home, bnt was caught at the plate. O'Neill stole second, and by Ward's high throw, Hanley's juggle and Everett's slowness, O'Neill came home. In the eleventh, Hanley was safe on Cantillion's fumble, and stole second. Ebright banged out one to center, Hanley going to third. On Ebright'a heiog caught between first and second, Hanley made a desperate steal for home, scoring the winning run. The score:

SACRAMENTO vs. STOCKTON.

SATURDAY, NOV. 1ST, 1890, AT SACRAMENTO.

Both teams put up brilliant ball in this game notwithstanding the eight errors made, and after a hard struggle the Gastowns finally came off victorious by scoring three runs in the eight inning. Hoffman and Perrott were the pitchers and each did splendid work, receiving strong support from their respective catchers. Holliday captured the batting honors, securing a hit for every time up. The Senators cored two runs in the eighth, but the Stocktons went them one better, sending three men across the rubber on hits by Perrott, Holliday and Hoffman, a base on balls, Hoffman's error and Bowman's overthrow to second. The score:

SACRAMENTO vs. STOCKTON.

SATURDAY, NOV. 1ST, 1890, AT SACRAMENTO.

Although the Stocktons had a lead of six runs at the end of the fourth inning in this game, the Senators by some very lucky hitting in the fifth, managed to get five men over the plate, and a lively repetition of the same kind of work and several errors in the seventh placed five more over the rubber, giving them the lead which they maintained till the close. Borchers was in the box for the Sacramentos, and along with being wild was hit hard when he did get the ball over the plate. The hitting waa terrific all throngh, Reitz and Holliday leading. Perrott retired in the eighth inning, Holliday replacing him in the box and doing fairly well. Of the five gamea played between these teams during the week, the Senators captured four which greatly increased their percentage in the pennant race. The acore:

SAN FRANCISCO vs. SACRAMENTO.

SUNDAY, NOV. 2ND, 1890, AT SAN FRANCISCO.

An immense crowd witnessed a fine game between the Senators and Metropolitans Sunday. There were many fine plays, a running foul catch by Roberts, being a most wonderful piece of work, while Goodenongh, McHale, Reitz, Hanley and Ebright also made some excellent catches. Both Coughlin and Harper were steady and effeotive. In the third inning Ward was safe on Harper'a muff bnt Conghlins hit to the pitcher forced him at second. Shea's single and Hanley's sacrifice scored Conghlin. The Senators tied the score in the eighth. Roberta hit safely, atole second and crossed the plate on Levy's error in not taking Daly's fly. In the tenth, the Sacramentos won. Goodenough made first on Coughlin's poor throw to the initial, atole aecond and tallied on Roberts magnificent double to right. The score:

STOCKTON vs. OAKLAND.

SUNDAY, NOV. 3RD, 1890, AT SACRAMENTO.

There was an immense orowd at this game and the sympathies of the audience were clearly with the Stocktons, who lost the game in the ninth inning. Wilson put up a phenomenal game at third accepting ten of eleven difficult chances. Carsey started in to pitch but retired at the end of the fourth having been hit for seven safe shots. The runs came in as follows: In the first inning Dungan hit safely and scored on Dooley's home run drive. Stockton earned a run in the fourth on hits by Stockwell, Armstrong and Fudger and Shaw's errors. In the fifth Cantillion hit safe, was forced to second on Sweeney's base on balls, and both scored on hits of Lohman and Shaw. In the sixth, Wilson scored on his hit and the errors of Cantillion and N. O'Neil. In the seventh Dooley scored on Wilson's error, and Lohman's triple. In the ninth the Stocktons took the lead on Fudger's single, a steal, Lohman's passed ball, Holliday's base on balls, errors of McDonald and Dooley and two steals. In the last half, the Oaklands batted out the game, Dungan hit safely and went to second on Dooley's single, both stole a base and scored on Lohman's single. The score.

SAN FRANCISCO vs. OAKLAND.

TUESDAY, NOV. 4TH, 1890, AT SAN FRANCISCO.

The game the Friscos put up last Tuesday against the Oaklands was one of the rookiest exhibitions ever given on the coast. The home team seemed utterly unable to field a little bit, and this allowed the Oaklands to score sixteen unearned runs. Both Lookabaugh and Shaw experienced a severe cannonading, there being twenty eight hits made on the game, giving a total of forty three bases. In the fifth inning the Colonels bunched eight hits off Lookabaugh, which with five errors, gave them ten runs. Their were few fielding features, Dungan, Stevens and Levy doing the only good work. Charley O'Neill was injured in the fourth inning causing his retirement and Carsey took his place. At the bat McDonald, Dooley, Sweeney and Speer did some very powerful service. Meegan as umpire, did fairly well but was somewhat off on balls and strikes in the beginning of the game. The score:

STOCKTON vs OAKLAND.

THURSDAY, NOV. 6TH, 1890, AT SAN FRANCISCO.

The Stocktons, by heavy and timely batting in the third inning of this game, scored a big victory over the Colouels. They were virtually without a pitcher, but Fudger went in the box and did masterly service. His support, with few exceptions, was all that could be desired. Carsey did good work in the points for the Colonels, except in the third inning, when, through errors of himself, Tip O'Neill and Sweeney, a man hit by a pitched ball, Fudger's single and a home run by Armstrong, six runs were scored. This gave the Gas towns a big lead, which they increased toward the close. The features were magnificent catches by Wilson, Hoffman and Holliday, and McDonald's and Fogarty's superb infield work. The score:

THE STANDING OF THE TEAMS.

The home team is now in the lead by a slight majority, with Sacramento following and Oakland coming third, with the same difference in percentage between them and the Sacramentos as is between the Senators and Metropolitans. The Stockton's percentage column shows a slight advance over late previous weeks.

THE RECORD:—(to November 6th, inclueive).

Professional Pick-Ups.

Pete Sweeney, Van Haltran and Fogarty are yet to arrive.

Matt Stanley continues to catch great ball for the Fresno team.

Pokey Chase is to take Kilroy's place with the Stockton team.

Jimmy Ward is to do the catching for Hoag's California Colts on their Hawaaian trip.

Last Tuesday's game was a veritable slugging match and both pitchers suffered severely.

Little Ward is undoubtedly the weakest hitter that ever appeared in a San Francisco uniform.

Ed Stapleton and Jim McDonald are now hitting the ball as hard and frequently as any of them.

It is said that "big Chief" Borchers will be releaseed from Sacramento, his work not being at all satisfactory.

The 'Frisco's work so far this month don't commence to approach their clever fielding of the first week of October.

Ed Reeder, who was here with the old Californias, is now playing first base with the Dallas team, of the Texas League.

Billy Daley, the south paw pitcher of the Boston team will not come out here this winter, but will remain at his home in Poughkeepsie N. Y.

Speer's hand is mended, and from this on, barring further accidents, he will be constantly seen in his position behind the bat for the "Mets."

Ward, of the Spokanes, led the North Pacific League in hitting, making 111 safe hits and 16 sacrifices in 71 games, giving a percentage of 367.

The Kansas City team has beaten the Philadelphia League team's record of 16 consecutive victories, and now leads the country for 1890 with 17 straight.

Mike Kilroy is now a Senator, having been sold by the Stockton to the Sacramento management last week. The young pitcher is well pleased with the change.

Billy Cooney did better stick work in the North Pacific League than any of the California boys, ranking seventeenth among 92 hitters, with the high batting percentage of 292.

Dick Beloher, who played a few games with Tacoma, heads the fielding list with a percentage of 1,000. In batting, however, he was very low, having only 150 as his percentage in that department.

Borchers and Polhemus are the only players who received their last month's salary from the Spokane management. The others were paid in thirty day checks, and good for what they could get on them.

It is now stated that on account of business obstacles the Comiskey-Kelly aggregation trip to the Pacific Coast will not be made, and that the Chicago's first baseman will be seen with the Los Angeles team during the winter schedule.

The Championship games between the Louisvilles and the Brooklyns have been postponed till next spring on account of the cold weather and small attendance. Seven games have been played, each winning three and the other resulted in a tie.

The Sacramentos bring down a big excursion next Sunday, over four hundred tickets being already sold. It ought to be a great game for between no two teams in the league is the rivalry so keen as that which exists between the Senators and Colonels.

There ought surely be a place in some of the teams for Tom Buckley next season. Tom has kept his hand in by playing with one of the amateur teams with which his work has been exceptionally reliable and clever. He has also done splendid service with the stick.

Alvord, the third baseman who was signed by Sacramento last year, has just closed an agreement by which he will play with the Cleveland (National League) team next year. This looks as though Billy Smalley will be on the market unless he is retained to play some other position.

The meeting of the directors of the league to investigate charges brought against certain players, etc., was postponed as a quorum was not present, the absent directors being actively engaged in political affairs. It is quite probable that the meeting will be held as soon as the election is settled.

Gagns has again stepped on the diamond in the official capacity of umpire, a position he fills creditably to himself, and generally satisfactorily to an exacting and highly critical audience. Charley is well up in all the points of the game, is active and possessed of excellent judgment, and never fails to maintain the dignity of his position on the field.

Chicago has a new "infant phenom" who is said to be better than Willie McGill. B. G. De Hart is his name and he won 64 out of 80 games played in Atlanta, Bristol and Knoxville this season. Mike Laue declares that he cut his teeth on a base ball. Instead of a rattle his baby hands toyed with a bat, and he could twist an up-curve before he said "mamma".

Says a well known theatrical manager: "A ball player ie not a 'White Slave,' though he imagined he was, which made the national game almost a 'Legal Wreck.' The magnates' talk reminded me of 'Natural Gas' and they will find that it was injurions to baseball 'Later On.' That is 'A Straight Tip,' and anybody who imagines that base ball has not been hurt ought to take 'A Trip to Chinatown.' The public is no longer 'Bewitched' and something must be done to make the base ball business 'A Gold Mine' again and put the magnates and players on 'Easy Street.' My name—well, look in 'The City Directory.'—Exchange.

Henry Chadwick, the veteran writer says: "George Washington Bradley is now night watchman in a Chestnut St. carriage store." It is not so long ago when pitcher Bradley and catcher Miller—originally from the Easton (Penn.) team—were regarded as one of the crack battery teams of the professional arena. But that was in the days of the underhand throw delivery of the ball to the bat. Base ball heros of yesterday are of but little account to-day, and to-morrow they may be relegated to the list of retired veterans. Colts are in the ascendant nowadays, and deservedly so in a majority of instances.

The damage done to base ball by the fight of the season just finished is shown very plainly by the little interest taken in the world championship series between Brooklyn and Louisville. A few years ago, when Detroit or Chicago and St. Louis were battling for this same honor, the games were attended by thousands and the excitement over them reached a fever heat. The papers were eagerly watched for and reports of the games as eagerly read. This season, after the Brotherhood's fight to knock off their shackles, Louisville and Brooklyn are playing to benches that are almost empty and the interest in the games seems to have reached the zero point of indifference. The Brotherhood revolt was a pretty costly matter for base ball and it looks now as if the players would regret it in sackcloth and ashes.

Franklin, the manager of the Female Baseball Club, who left Cincinnati last spring with nothing except ten three-sheet posters and his gall, is back again. Now he is a sight for ye gods and men. When he shot athwart the vision of the writer last night he looked like a prize-winner in a beauty show. His luxuriant crop of whiskers were oiled and groomed like the coat of a racer. From his shirt-front, his fingers and his wrists big sparklers reflected back in brilliant style the rays of the electric light. He had on an English suit, and a very much Henry Stanley hat. He was as full of business as the driver of a twelve-horse team making a short turn. "I just dropped in to see how they were coming with you," he said. "How am I doing? Well, now, you're chirping. I don't look like I was stalling for a poorhouse, do I? Well, I should say not. It has been oil for me all summer. The magnates may talk about 1890 being a frost, but I did not get any of the snow. It has been aces up or better for me all season. I have got all kinds of money, a dozen sparks, any one of them big enough to board me for three months, and two comic opera companies. Oh, no, I don't know a thing, somebody else does. I have been up through the New England States with my Ladies' team, and while the professional tossers were playing to three men and a 'yaller dog' we were turning 'em away. Well, I must be off; so long."

Here's one on Oakland's second baseman. One day not long ago Cantillion and a party of friends after tarrying a while near the grounds, were preparing to take the cable cars home, and the second baseman was fairly loaded down, having his bat bag and Carsey's and his own grip to take care of. In his right hand he carried his own valise and seemed to be laboring under a cumbersome load as that side of his body was almost bent to the ground, while he carried Carsey's grip and his bat bag in his left hand with apparent ease.

"What's the matter Cant?" asked one of the boys, "You don't seem to be getting along very lively.

"Oh! nothing!" replied the pugnacious little player, "only you see I work so darn hard in a game that my uniform gets all soaked through with perspiration and that makes it weigh a ton. "Just feel the difference between mine and the 'Kids.'"

Accordingly several of the party took turns in lifting the two grips, and all declared that Cantillion's was fully three times as weighty as the pitcher's. There was one old sport in the crowd, however, who had played ball way back in the sixties when sweaters, gloves, masks, and all the late appliances were undreamt of, and after taking a tug at the bag, shook his head dubiously and said: "How many pair of shoes do you carry in that, anyhow?" "Only one, of course," replied the player; "and I'll bet you a round for the crowd there's no more in there." "Well, open up," responded the other, and so the contents were exposed to view, but the uniform and shoes were buried from sight, for all that could be seen were two big cobble stones, three broken bricks and a dozen or more soda water bottles which some frolicsome player had silently slipped into the bag. But the old fellow wouldn't set them up, swearing all the time that it was a fake of Cantillion's to let people feel how heavy his clothes were after playing, and thus gain for him some mite of sympathy for his supposed hard work.

The Amateurs.

The Vallejos downed the Santa Rosas Sunday and have now a fighting chance for first place. The Burlingtons also did up the Fincks and may possibly land themselves in fourth place before the season is over. The Reports and Allens had no game for last Sunday. The following table shows the correct standing of the teams with their relative percentages. The record to date:

Clubs.	Will & Fincks	E. T. Allens	Report	Burlington	Vallejo	Santa Rosa	Games Won	Games Played	Percentage

BURLINGTONS vs. WILL & FINCKS.

Sunday, Nov. 3rd, 1890, at San Francisco.

Strengthened by the addition of Patsy Cahill, George Sharp and Billy Kennedy, the Burlington team presented a formidable array last Sunday morning in their contest against the Young Giants. The game was for blood and also a large sized bank note, and it was easily seen that the Fincks were outclassed from the start. They however made a rattling finish. Sullivan was in the box for the Giants for seven innings, during which he was hit out pretty hard. He gave way in the eighth to Leveque, who did well. Rohan pitched great ball for seven innings, but in the eighth he weakened, the Fincks placing him safely three times in each the last two innings. He fielded his position in great form and received fine support from catcher Wilds. Cahill captured the batting honors, making three safe and timely hits. Mulvey, Tillson and Delmas also did heavy work with the stick. The infielding of Tillson, Strand and Kelly, and the outfield work of Leveque and Sharp were the prominent features.

The runs were made as follows: In the second, Sharp took his base on balls, second on a wild pitch, third on Rohan's single to left and scored on Farrell's error. They made two more in the fourth, Sharp putting a safe slow one down toward third. Traynor hit to Sullivan, who had Sharp "dead" at second, but Farrell dropped the ball and both men were safe. Mulvey's two baser to right scored Sharp and Cahill's hot single past short sent Peek-a-boo Traynor over the plate. In the seventh, Billy Kennedy opened up by pushing a corker down the third base line and stole second. Cahill's triple to the left field fence scored Billy, and Mulvey's double to left gave "White Wings" a run. Mul went to third on a wild pitch and scored on Wilds single to right. Strand had flew out to Frank Delmas, Sharp to Leveque, and on Leveque's overthrow from center to first Wilds started for third but was nailed at that bag on Frank Delmas' assist to his brother Lonny.

The Fincks failed to score till the eighth. After Deeney was assisted out at first by Strand, Conway was safe on Kennedy's short throw. Delmas's single to left advanced Conway to second, but Tillson's hit to Strand forced Frank at the middle cushion, Conway moving to third on the play. Tillson stole second, and Farrell's safe rap to center enabled Conway to tally. On Levy's safety to right Tillson scored, and although Leveque was given first on balls and filled the bases, they failed to get another man over the plate, as Sullivan was thrown out by Kelly. In the ninth they tacked on two more to their score. Lonny Delmas flew to Kennedy who made a splendid catch back of the bag. Deeney banged out a safe one to left, but was forced at second on Conway's hit to Kelly. Frank Delmas again pushed out a safely to center, Conway scoring and Delmas taking second on the throw in. Tillson put a beauty in center, Delmas making third, and on Wild's error of the throw in, scored. Tillson cleverly stole third, and after Farrell had two strikes called on him. Tillson made a daring and almost successful effort to reach home, but was declared out by a close decision. Tom Powers umpired most satisfactorily. The score:

Will & Fincks	0	0	0	0	0	0	0	2	2	— 4
Burlingtons	0	1	0	2	0	0	3	0	*	— 6

Earned runs—Burlingtons 2, Will & Fincks 1. Three-base hit—Cahill. Two-base hits—Mulvey, Kelly. Sacrifice hits—Strand, Mulvey. First base on errors—Will & Fincks 4. First base on called balls—Burlingtons 3, Will & Fincks 2. Left on bases—Burlingtons 6, Will & Fincks 6. Struck out—By Rohan 9, by Sullivan 7. Wild pitches—Sullivan 2. Time of game—1 hour and 30 minutes. Umpire—Thomas Power. Official scorer—J. W. Stapleton.

SANTA ROSAS vs. VALLEJOS.

Sunday, Nov. 2nd, 1890, at Santa Rosa.

The Marines turned the tables on the Sonoma boys by administering them a great drubbing in last Sunday's game, beating them easily 12 to 5. The Santa Rosas were totally unable to do anything with Sprague's curves, while Callen was hit freely and heavily and received miserable support all around. The Marines put up a magnificent fielding game, Stanford captaining the honors. Jack Donohue umpired splendidly. No official score of the game was published.

Interior Base Ball.

FRESNOS vs. STOCKTON MYSTICS.

Sunday, Nov. 2nd, 1890, at Fresno.

The Fresnos again did up the Mystics, hitting Chase with great frequency and ease, while Howell pitched another of his splendid games. But three hits were secured off the "two year old" and he struck out ten opposing batsmen. Matt Stanley, at the receiving end, supported him in great style. The fielding of the Mystics was slightly superior to Austin's mens work, whose infield had an "off day." Mike De Pangher caught for the Stockton boys, and barring three passed balls, did well. Stewart, also at one time with the Stockton professional team, played a fine first base for the visitors. Dextraze late of Seattle, appeared in center with the Fresnos, and his batting, stealing and fielding, together with G. Dyer's general work, Stanley's catching, Howell's twirling and Stewart's first base play constituted the brilliant features of the game. Four splendid double plays also occurred and were well applauded. The score:

Fresnos.	AB	R	BH	SB	PO	A	E
Dextraze, cf	4	2	3	3	4	1	0
G. Dyer, s s	5	2	3	2	2	2	2

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
Fresno	1	0	0	0	1	1	0	3	2	— 8
Mystic	0	0	0	0	2	0	0	1	0	— 3

Earned runs—Fresno 4, Mystics 1. Two base hits—Dextraze Howell. Three base hits—G. Dyer. Double plays—Stanley to H. Dyer; Stanley to Utt; Lockhead to Stewart to DePangher, and Walters to Stewart. Base on balls—Fresno 3, Mystics 5. Base on being hit by pitched ball—Fresno 1. Passed balls—Stanley 1, De Pangher 3. Left on bases—Fresno 6, Mystics 5. Struck out—By Howell 10, by Chase 7. Time of game—2 hours and 30 minutes.

Amateur Short Hits.

Jack Donohue umpired last Sunday's game at Santa Rosa.

Billy Farrell seemed out of condition at second last Sunday.

Now that election is over, Jack Lewis will probably return to the diamond.

It is reported that centerfielder McCarthy will soon play with the Fresnos.

Dave Levy is without doubt the hardest working catcher in the amateur league.

The Vallejos have beaten the Santa Rosas as often as all the other teams combined.

Charley Tillson showed up in fine form in last Sunday's game, both at the bat and in his position.

Cahill's heavy hitting aided the "Railroaders" materially in their victory over the "Giants" Sunday.

Joe Leveque plays a great outfield, covers a whole lot of ground and always has his arm with him.

Zemansky is no longer umpiring. Donohue will probably officiate at the remainder of the games up country,

Shorty Mahony umpired the game between the O'Connor Moffatts and Keane Bros. teams last Sunday at Central Park.

Peek-a-boo Traynor, the big strapping first baseman of the Railroaders, is one of the best natured fellows in the amateur ranks.

Sharp, Cooney, Creamer, Leveque, Reilly and Joe Tillson will probably be with Hoag's team of California Colts on the trip to Honolulu.

"Giraffe" Stewart, the elongated pitcher who appeared in a few games early this season with the Stocktons is now playing first base for the Amateur Mystics.

The Reports play the Santa Rosas to-morrow at the Haight Street grounds at 11 o'clock, and the Fincks and Allens will probably play at 9 at the same grounds.

Billy Kennedy made his reappearance at third with the Burlingtons last Sunday, and although he is a trifle lame, managed to get through all right. It's as hard to keep a duck out of water as to keep Billy from playing base ball.

There seems to be some hitch in the arrangements of the Allen's trip to Fresno. But it is more than likely that whatever it is, everything will be satisfactorily concluded before the end of the month when the Sports are billed to play Austin's team three games.

Dextraze, of the Seattles, and who played a few games with the Will & Fincks, is now playing with the Fresnos. His record in last Sunday's game with the Mystics is an excellent one, he making two runs, three hits, three base steals, four put outs, an assist and no misplay.

When the Vallejo team returned home last Sunday night after their overwhelming victory over the Santa Rosas, they were enthusiastically welcomed by the delighted citizens, who, with brass band and torches, met them at the depot, and forming a procession paraded the streets of the city, yelling and shouting in their glee.

The Burlington team of last Sunday was one of the strongest amateur nines that ever appeared at Haight street. The battery is a cracking good one; there were four hustling hard hitting infielders at the bases and short, and the outfield, made up with Cahill, Sharp and Mulvey, was a terror. This team, if in the league at the beginning of the season, could well be called the "Annihilators," and it is doubtful if any of the others would be "in it" with them.

Per the steamship Zelandia on the 15 inst. Frank Hoogs, a well known theatrical manager will take down a team to Honolulu to give a series of nine exhibition games. The team will be known as the California Colts and will be captained by Tom Powers late of the Baltimores. The make up of the teams is Farrell pitcher, Ward catcher, Powers first base, Creamer second, Howard third, Reilly short, Cahill right field, Sharp center and O'Day left. They play a three weeks engagement and will be back by Christmas.

There is talk of getting up a pool of one thousand dollars for a match game of ball between the Vallejo and Santa Rosa clubs, provided the latter will raise an equal sum, the games to be played after the league season is over. The plan is for those who desire to place whatever sum they wish into the pool and in case the Vallejo club wins to draw down double the amount they put in. In case the club losses, the amount to go to the Santa Rosas. A number of the lovers of the game are ready to put up their money. Now will be the chance for the home club to get in and drill.—Vallejo Chronicle.

The Phœnix base ball club of St. Mary's College, Oakland, played an exciting and interesting game of ball with the Santa Clara College Club at Redwood City, Oct. 30th. Both pitchers were in excellent form and pitched splendid ball. The features of the game were the battery work of Cartwright and Phelan of the Phœnix team, the fielding of Cooney, Duffy, Strand and McElroy, and the batting of Sinnott, Phelan, Flannery and Eckley. To enable the players to catch the evening train the game had to be called at the end of the sixth inning, when the score stood Phœnix 7, Santa Claras 4.

Frank and Lonny Delmas will both, in all probabilty, be with the Salem team, of the Willamette Valley League, next year. Frank is one of the best amateurs on the coast and has ranked first as the heaviest batsman in the California Amateur League for several years. He has also played a fine reliable first base, but his position is more properly on second, where his activeness, good judgment and sure catching would make him a most valuable man at that station. Lonny is also a good all round player, though not so heavy a hitter as his brother Frank. His is, however, a splendid base runner and has played a bang up third base for many years with the Nationals, Keanes and Will & Finck teams. Both boys being very steady in their habits have promising futures before them.

SCHEDULE OF GAMES

—OF THE—

CALIFORNIA

Base Ball League,

SEASON 1890.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS,

SUMMARY.

The annual Amateur Boxing Tournament for the championship of the Pacific Coast began in the gymnasium of the Olympic Club on Thursday evening last. The out-door amateurs are preparing themselves for the great field meeting of the Olympic Club which will be held on Thanksgiving Day. In the rowing and bicycling line everything is quiet just now. The Alpine Club will hold an out-door athletic meeting at the Bay District track to morrow forenoon. The cricketers are still keeping up practice, and many of the players are getting into good form.

RUNNERS, WALKERS, JUMPERS, ETC.

The Alpine sprinters were well represented at the Bay District track on last Sunday morning. The short distance men are in fine condition for to-morrow's quarter mile dash.

Captain John D. Garrison of the Alpine Club has gone into the saloon business at 1161 Market Street, close to Central Park.

Charley Jelleneak of the Olympic Club is making rapid strides towards championship form. The great improvement in his speed during the last year speaks well for his future chances of success.

The gymnasium of the Olympic Club was again filled with spectators on Wednesday evening when the professors were given an opportunity to show how much their pupils knew.

A rumor is current to the effect that many of the Olympic Club boys showed the white feather in refusing to enter their names for the boxing tournament. It is scarcely necessary to deny the assertion, for the grit of such men as Cooley, Green, McArthur, Lafferty, etc., is too well known to permit of any charges of cowardice being made against them. The plain reason in most of the cases is that the men want *prizes* instead of medals. In refusing to box for medals, these athletes do not show a very good taste. A man who is a true amateur should always be proud of a medal, and any person who professes to be an adept at boxing who would not think it worth his while to compete for one of the handsome and valuable medals which will be presented to the winners of the coming tournament, should retire from the field of competition. The first night's work began on Thursday evening, and as we had already gone to press, we are enabled to publish the results in the present issue. Next Saturday a full account of the bouts will appear. The total number of entries is 20. The Olympic and Alpine clubs have five entries each; the Lurline and Acme clubs four each, and the Sacramento Athletic club two. The following is a list of the names entered:

Bantam, not exceeding 115 pounds—Phil Boulo, Olympic Club, 115 pounds; H. J. Donegan, Lurline Athletic Club, 114 pounds; M. J. Lyons, Alpine Club, 115 pounds; Joseph Lyons Alpine Club, 107 pounds; Walter Smith, Acme Club, 115 pounds; George W. Bishop, Alpine Club, 115 pounds; William Spellman, Olympic Club, 115 pounds.

Feather weight, not to exceed 125 pounds—James Lucy, Lurline Club, 124 pounds; H. M. Pitman, Olympic Club, 125 pounds.

Lightweight, not to exceed 135 pounds—W. H. Dooley, Alpine Athletic Club, 134 pounds; H. Gallagher, Lurline Club, 135 pounds.

Welter weight, not to exceed 145 pounds—John D. Weil Sacramento Club, 143 pounds; William Gallagher, Lurline Club, 135 pounds.

Middle weight, not to exceed 158 pounds—William Johnson, Sacramento Club, 158 pounds; Herman Hanson, Alpine Club, 155 pounds; J. Satterwhite, Olympic Club, 156 pounds; R. McCord, Olympic Club, 150 pounds.

Heavy weights—John Kitchen, Acme Club, 170 pounds; William Sullivan, Acme Club, 178 pounds.

An unusually large crowd of the Olympic Club athletes took exercise at the out door grounds on Sunday. The weather was charming, and many of the boys lay around in their running costumes the greater part of the day.

Foster is paying all his attention to the hurdles, and the U C representative, H. C. Moffet, will be somewhat surprised at his agility next spring.

The joint meeting arranged by the Manhattan Athletic Club, the Salford Harriers and the Athletic Club of the Schuylkill Navy, came off at the grounds of the latter organization at Stanton, near Philadelphia, on Saturday afternoon, Oct. 25th. The day was cloudy, with a chilling wind from northeast, and the track was soggy. About a thousand persons were present. Summary:

One hundred yards run—Final heat: E L Sarre, Manhattan Athletic Club, 5yd. start, first, in 9 4 5s; E S Ramsdell, Athletic Club of the Schuylkill Navy, 3½yd. second; L F S Pynchon, Young Men's Christian Association, 8½yd, third. The winner poached about three yards, which partly accounts for the time given.

One mile run—E W Parry, Salford Harriers, 20yd, start, first, in 4m 35s; J C Williams, Young Men's Christian Association, 85yd, second; J B Large, Young Men's Christian Association, 120yd third.

Hurdle Race, 120yds.—Lewis C Lewis, Athletic Club of the Schuylkill Navy, scratch, first, in 16s; Eugene Goff, Manhattan Athletic Club, 14yd, start, second; J C Devereux, Manhattan Athletic Club, 9yd, third. The winner was handicapped at 1½ yd., but declined to accept a step and ran from scratch. Owing to the heavy condition of the track, the correctness of the return is questioned.

One furlong run—E S Ramsdell, Athletic Club of the Schuylkill Navy 8yd, start, first, in 23 1-5s; R W Lloyd, Young Men's Christian Association, 13yd, second by a foot; Murdo Mackenzie, Young Men's Christian Association, 15yd, third, the same distance behind.

Quarter mile run—H W Schlchter, Athletic Club of the Schuylkill Navy, 25yd, start, first, in 51 1-5s; R W Lloyd, Young Men's Christian Association, 30yd, second; J S Roddy, Manhattan Athletic Club, 8yd, third.

Two mile steeplechase—E W Parry, Salford Harriers, scratch, first, in 12m 6 2-5s; E W Lapp, Athletic Club of the Schuylkill Navy, 1m, start, second; J C Devereaux, Manhattan Athletic Club, 45s, third.

Half mile run—J C Williams, Young Men's Christian Association, 40yd, start, first, in 2m 6s; W B Woodbridge, Manhattan Athletic Club, 10yd, second; G H Morris, Salford Harriers, 10yd, third.

Five mile run—W H Morton, Salford Harriers, scratch, first, in 30m 28 2 5 s; James McKay, Young Men's Christian Association, 1m 30s, start, second, G H Morris, Salford Harriers, 45s, third.

Three mile walk—Everett Schofield, University of Pennsylvania, first, in 27m 8s; W J Hagan, West Philadelphia Young Men's Christian Association, second.

Running Long Jump—John A McGlinn, C A S, allowed 2ft 2in, first, 21ft 9¾ in, including handicap; R B McMullin, Young Men's Christian Association, 1ft 3in, second, 21ft 9½ in; E L Sarre, Manhattan Athletic Club, 1ft 6in, third, 21ft 7¾in.

Pole vault—W S Rodebough, Athletic Club of the Schuylkill Navy, scratch, first, 9ft 7in.

The Amateur Academic Athletic Association announces that its first Field Day will be held at Berkeley Campus on Saturday, Nov. 8th, at 1 P. M.

The University athletes are beginning to make preparations for their next field day. The chances are that a trophy will be given to the class winning the largest number of points.

The interior athletic clubs are very enthusiastic over field sports just now and on Thanksgiving Day the Los Angeles and Sacramento Athletic Clubs will hold games. The Pasadena Club which was recently admitted into the P C A A A will also give a short programme of field games on the same day. From present indications it is certain that many clubs will be represented at the next championship sports and there is no telling how many "dark horses" are liable to make their appearances.

If G D Baird enters the walk at the Olympic Club games on Thanksgiving Day the Athletic Committee should be very careful in selecting a judge for that event. We do not think Mr. Jarvis would accept the position of Judge of Walking for the occasion, and as there are only a handful of competent judges in the city, a good man should be selected to officiate.

It is but three weeks from now until Thanksgiving Day, and the athletes who intend competing in the Olympic Club games on that day should not neglect their training. We again publish the programme: 100 and 440 yards, open handicap runs; half mile run, O A C, handicap; 1 mile, open, handicap run; 220 yard O A C, maiden for members who have never competed in a race; 120 yard hurdle, open handicap; 220 yard hurdle, O A C handicap; pole vault, open, handicap; running broad jump, O A C handicap; putting 16 lb. shot, handicap O A C; 220 yard run for O A C juvenile handicap; one mile walk, open handicap; run from grounds to top of Mount Olympus and return.

Valuable prizes will be given to the different winners. The hill climbing contest will be a very exciting one and the spectators will have a fine chance to watch the contestants from the grand stand.

Commencing at 11 o'clock to-morrow forenoon the Alpine Club members will hold a series of sports at the Bay District track. The principal event will be a quater mile handicap run for which there are a very large number of entries. Garrison will be at scratch and most of the starters will find it hard work to keep in front of him until the tape is reached. P N Gafney will walk 220 yards heel and toe. Garrison will give an exhibition run and several other races will be arranged on the grounds. Two prizes will be given for the "quarter."

The Alpine Club foot ball team is making rapid progress, and the following members practice at Central Park almost daily. J J Larkey, J D Garrison, H O Farrell, P N Gafney, R J Luttrenger, E Steinway, A M King, Mark Lang, George Armbruster, Charles Armbruster, W F Vollmer, J McKaughlin and the Choynski Bros.

There was a fair crowd of people present at the Olympic Club grounds last Sundsy morning to witness the athletes train. A 200-yard handicap run was gotten up and the handicaps were as follows: J C Kortick, C A Jelleneak and P M Maud, 9 yards each; M L Espinosa, 11 yards; J F McDonald, 12 yards; N L Williams and C M Yates, 13 yards each; D J Barnert, F Smith and J S Ottis, 20 yards each; H S Allen, 22 yards; George W Hupers, 25 yards; M Trombone and F G Redding, 30 yards each; W M Phelps, 32 yards and H H Egbert, 35 yards. The race was divided into four heats and a final one resulted as follows: First heat won by Redding in 24 2 5 seconds, second heat won by Maud in 25 seconds, third heat won by Jelleneak in 26 1-5 seconds, fourth heat won by Espinosa in 25 seconds. McDonald did not feel well after winning his heat, and it was agreed that Phelps should replace him in the final. The final heat was won by Charley Jelleneak in 24 1-5 seconds, Redding 2d, Phelps 3rd. The fast man won a pair of running shoes, the second prize was an exercise shirt and the third a fine razor.

Frank Cooley is a victim of *ennui*. He is unable to sleep o'night and the surgeon in attendance attributes the cause to the fact that Mr. Cooley has not received any challenges during the past twenty four hours.

C. M. Yates, the walker, has joined the Olympic Club.

Henderson and Casady, of the O. A. C. are getting themselves into great condition for Thanksgiving Day. Garrison of the Alpine Club will be with them in the "quarter," and the winner will have no time to sleep.

The joint cross country road of the Olympic and Alameda Olympic club which was to have taken place last Sunday was indefinitely postponed.

McLaughlin, the Irish amateur shot putter and hammer thrower is about to join the Alpine Club. Captain Garrison is trying to get up a championship team that will bring credit on the club.

Rules for Amateur Boxing, Adopted by the Olympic Athletic Club, Nov. 6, 1890.

1—Weights shall be:
Bantam, not exceeding 115 lbs. Welter not exceeding 145 lbs. Feather, not exceeding 135 lbs. Middle, not exceeding 158 lbs. Light, not exceeding 135 lbs. Heavy, not exceeding any weight. Competitors shall weigh on the day of competition (at some hour to be fixed by the Board of Directors), in boxing costume without gloves.

2—Competitors shall box in light boots or shoes (without spikes), or in socks, with knickerbockers, trousers, tights or trunks, and shirt (with or without sleeves), and boxing gloves of fair size and first quality.

3—In all competitions the ring shall be roped and of not less than sixteen feet or more than twenty-four feet square. The posts shall be padded.

4—The Board of Directors shall appoint a referee, two judges, and two time keepers. When the judges disagree, the referee shall decide. All decisions shall be declared by the referee, and shall be final. None but the referee and the competitors shall be allowed in the ring during the rounds.

5—In all competitions the number of rounds shall be four. The duration of each round shall be three minutes, and the interval between rounds shall be one minute. When thought necessary in order to reach a decision, an extra round or rounds may be ordered, in which case the interval between an extra round or rounds, and the preceding round, shall be three minutes. Should a glove burst or come off, it shall be replaced by the referee. Any tampering with the gloves by forcing the hair from the knuckles, or otherwise, shall be considered foul.

6—Each competitor shall be entitled to the assistance of two seconds (not professionals), who, during the rounds, shall not interfere, advise or direct the competitors; shall refrain from all offensive and irritating expressions, and in all respects conduct themselves with order and decorum.

7—Where a competitor draws a bye, such competitor shall be bound to spar such bye for the specified number of rounds and with such opponent as the judges of such competition may approve. If such opponent be chosen from among the previously defeated competitors in the class, and he shall be adjudged the winner of the bye, he shall be re-instated and eligible for further contests.

8—During the competition, if either competitor be knocked down, fall through weakness or otherwise, he must get up unassisted, ten seconds being allowed him to do so. The referee, meanwhile, must stand between the competitors, and if the competitor fails to come to the scratch in ten seconds allowed, he shall lose the bout. A competitor on one knee shall be considered down.

9—If either competitor shall willfully throw him down without receiving a blow (whether blows shall previously have been exchanged or not), he shall be deemed to have lost.

10—Any competitor voluntarily quitting the ring previous to the decision of the judges or referee; shall be deemed to have lost.

11—In all competitions the decisions shall be given in favor of the competitor who displays the best style and obtains the greatest number of points. The points shall be—for 'Attack'—direct clean hits with the knuckles of either hand on any part of the front or sides of the head or on the body above the belt; for 'Defense'—guarding, slipping, ducking, counter-hitting, or getting away. Where points are otherwise equal, consideration shall be given the man who does most of the leading. A competitor clinching to avoid punishment, shall forfeit points.

12—The referee may disqualify a competitor for delivering a foul blow, given intentionally or otherwise, and may also disqualify any competitor who is boxing unfairly, by flicking or hitting with the open glove, by hitting with the inside or butt of the hand, the wrist or elbow. No butting or wrestling allowed.

13—In the event of any question arising not provided for in these rules, the judges and referee shall have full power to decide such question or interpretation of rule.

14—In order that these competitions may be conducted in an orderly manner, it is suggested that the referee should request all persons present to refrain, while a competition is in progress, from any loud expression or demonstation.

15—Resolved, that the duties of the referee and judges be limited to the conduct of the contests, and shall not in any way extend to the conduct of the tournament.

16—That the judges be requested to discountenance slogging, and that the referee shall be instructed to bar altogether the use of the so called La Blanche or pivot swing blow.

17—That contestants having entered for any one class may extend their entry to any other class in advance of their own.

18—That contestants called on to box a bye must work as if in an actual contest, and the referee is empowered to dismiss from the ring any contestant who appears to be shirking his work.

19—That the referee shall be empowered to dismiss from the ring contestants, who, by shirking work exhibit the fact that they have arrived at an understanding as to the result of the contest—with an agreement to take first and second places without actual contest.

20—That the referee shall be empowered to honorably dismiss from the contest any contestant who is so palpably overmatched as to make his continuance in the ring a mere exhibition of his capacity to suffer punishment.

21—That any contestant so dismissed with honor, may be selected to box a bye, although he may not have completed his four rounds in the original contest, if in the opinion of the referee he has earned this right by his skill and courage.

DEFINITION OF AN AMATEUR—An amateur is one who has never competed in an open competion, nor for either a stake, gate money or entrance fee; one who has never competed under a fictitious name, nor with a professional for any prize or where gate money is charged; one who has never instructed, pursued or assisted in the pursuit of athletic exercises as a means of livelihood, nor for gain nor any emolument; one whose membership of any athletic club was not brought about nor does not continue because of the waiver of the initiation fee or the remission of dues; nor because of any understanding, expressed or implied, whereby his becoming or continuing a member of such club would be of any pecuniary benefit to him whatever, either directly or indirectly; and who shall in all respects conform to the Constitution, By-Laws and Rules of this Association.

DEFINITION OF AN AMATEUR CLUB—And of such amateur athletic clubs which, in addition to the adoption of the foregoing definition shall have a bona fide amateur membership of at least twenty-five; and which shall be organized and continued for amateur athletic pursuits; and whose membership shall consist only of amateurs.

No club which is a branch of, or bears the name of, or directly or indirectly receives support from, or whose members are required to qualify by first becoming members of any club which makes a specialty of professional contests, shall be eligible to membership in this Association.

THE WHEEL.

The L A W run which was held on Sunday, was largely attended. Henry Burmester had charge with T. H. Doane for a lieutenant. The start was made from the Odd Fellows Hall, corner 7th and Market streets, and the wheelmen proceeded up Golden Gate Avenue to the Park. The procession took in the Park and Cliff House, and returned home by way of Fort Point. The station was inspected by the riders.

The Oak Leaf Wheelmen of Stockton are now the largest body of wheelmen on the Pacific Coast.

Advertising Rates

Per Square (half inch)	
One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. disconnt.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of yonr paper indicates the time to which your subscription is paid.

Should the Breeder and Sportsman be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the Breeder and Sportsman, and not to any member of the staff

San Francisco, Saturday, Nov. 8, 1890.

An Australian Horseman.

During the early part of July mention was made in this paper of a horse, which had been purchased by a Mr. Foster of Sydney, for the purpose of taking him to Australia; it was also stated that the horse had trotted two miles in 4 minutes and 51 seconds, information to that effect having been given one of our reporters by a gentleman who claimed to have witnessed the performance. We are in receipt of a letter from this man Foster, in which he writes as follows:

"In your issue of the 5th of July there is a paragraph referring to a horse I brought from America. Now that paragraph is all false, and could only have been inserted to do me an injury by influencing the handicapping of the horse over here. I bought the horse from Mr. O'Rourk, and the only trial I had was a road trial in a buggy, and placed him on the Bay District Track for exercise and safety until the steamer left."

We have not answered Mr. Foster's letter up to the present, owing to the fact that it was rather difficult to hear from all the persons interested, but we now have full and complete data of everything that was done in reference to the transaction. The representative of the Breeder and Sportsman, who visited the track, asked the question from several who were standing on the stoop of the Club House: "Has the two-mile horse beaten five minutes?" And the answer was understood to be "by nine seconds." but now it transpires that the gentleman who gave the information intended to say that it was nine seconds over five minutes instead of nine seconds under; but from what we know of Mr. Foster, it would not make any difference whether we stated 4:51 or 5:09, as he has told a deliberate falsehood in his letter. The trial on which he bought the horse, was not made on the road, nor yet in a buggy, but was made on the Bay District Track and in the presence of quite a number of persons. It would seem that like many other Australians, Mr. Foster does not want the gullible public over there to know what he purchases, as by the same mail in which he sent us the above letter, he also sent another to a gentleman in this city, asking him to buy another horse, and to get it out of California without anybody knowing anything about it. Mr. Foster, if a thorough horseman, should not care who knows of his purchases, but he evidently intends to deceive the Australians, who are in the habit of patronizing the trotting tracks over there. The horse which Mr. Foster took over with him was worked some little time on the Bay District Track prior to the purchase being consummated, it being understood that the gelding was to show two miles in five minutes, for a stipulated price. The time not being quite as good as was expected, part of the price asked was deducted, and at a lower figure Mr. Foster purchased the trotter, knowing full well the horse's capacity and speed. It is a great pity that such men as Foster own trotting horses in the Antipodes, for it is such as he that has done more to bring trotting into disrepute in the colonies than anything else could possibly have done. The Breeder and Sportsman will keep a sharp look out for any horses that may be consigned to Mr. Foster, and he may rest assured that the Australian public will receive full particulars of any ringers that he may desire to foist on his fellow citizens.

Mr. Valensin Returns.

Mr. Valensin, the well known owner of Sidney and Simmocolon, has returned from a trip through the Eastern States, where he has been visiting the principal race tracks and many of the large breeding establishments on the other side of the Rocky Mountains. As is natural to believe, the gentleman feels highly elated at the success attained by his young stallion in the big circuit, and still at the same time feels a little disappointed to think that he did not get a better record than 2:19.

On being asked if he thought it probable that Simmocolon would go East again next year, his reply was: "Certainly not, I shall keep him for use on our own circuit here, so that the people of California may be able to see for themselves what a great race horse I have. Mr. Andrews, who drove for me at Lexington, owing to the illness of Jas. Goldsmith, is authority for the statement that Simmocolon is one of the best and fastest stallions that he ever drove behind; and Mr. Goldsmith has also assured me that next season, with ordinary luck, that the horse should knock several seconds off his present mark. As you are aware, while in the East I secured the services of Millard Saunders, of whom it is unnecessary for me to speak, as his reputation is known from the Atlantic to the Pacific, having been for so many years in the employ of Mr. Gordon. The wonderful success that he attained with the erratic Guy, is enough to stamp him as one of the leading drivers of the country, and I feel perfectly satisfied that under his able management, the Valensin Stock Farm will have many more Sidneys and some young Simmocolons to go into the 2:30 list."

Mr. Valensin was asked what he thought of Freedom's wonderful mile made at Napa, and the answer was characteristic of the man: "It is a pretty low mark for a yearling to make, but I feel satisfied that I have some weanlings at present on the ranch that will warrant me in shooting at that mark. I fully intend to prepare a number of yearlings next season, and if they do not beat 2:29¾, it will be no fault of mine. Sidney, as is well known, is a producer of early speed, and I see no reason why that record should not be materially lowered in the near future."

"Did you have a good time while in the East?"

"Yes, I never passed two months more pleasantly in my life. Everywhere I was received with the utmost cordiality, and the officials of the various associations where I visited, did everything that lay in their power to make my stay a pleasant one. I also had many happy days visiting the various breeding farms in the different States through which I passed, and while in Kentucky, added two more brood mares to my already large list. The first one I bought was Bessie Bowne, foaled in 1881, by Dictator, dam Lady Lightfoot, 2:35, by Mambrino Time; 2d dam by Paddy Burns; 3d dam by Mosley's Copperhead. The second one is a dark brown filly named Brita, foaled in 1887, by Dictator, dam Ethel Wynn, 2:33½, by Harold; 2d dam Kathleen by Pilot Jr.; 3d dam Little Miss by imp. Sovereign. This filly is in foal to King Rene."

Mr. Valensin also told us that there is a strong probability that there will be many Eastern breeders visiting California during the coming winter, as the remarkable time made by California horses this year has drawn more attention to the State than ever before, and he is satisfied that there will be a good market all winter for well bred trotting horses.

The San Jose Meeting Declared Off.

A letter from Secretary Bragg of the San Jose Blood Horse Association, notifies us that only three of the races advertised for the proposed meeting at that point have filled, and as a consequence the Board of Directors has declared the meeting off. It is to be regretted that this action was found necessary as the Garden City has always been one of the favorite places for horsemen to attend; and, as a usual thing, the betting fraternity have been in the habit of attending the San Jose races for the "purpose of getting a line" on the thoroughbreds that are expected to race at the Pacific Coast Blood Horse Meeting. Some of the owners of the thoroughbreds have expressed themselves very strongly against paying 10 per cent. entrance for purses, and it may just be possible that this has had a strong bearing toward limiting the entries at San Jose.

The Sportsman as a Factor in Society.

The public have a right to inquire into the standing and composition of all organized bodies. Every organization has its effect upon society. This effect, in some cases is so subtle and quiet that but little is known of its source, while the public may be benefitted or injured by its workings.

As a factor in the progress of society for the past one or more decades, we venture to assert that few organizations have produced more beneficial effects than that of the true sportsmen of the country. As a rule, the individual sportsman is cosmopolitan in the fullest sense of the law.

As a result, the great body of sportsmen have engendered a feeling of good will from one end of the land to the other. In our sporting publications they are furnished channels of communications, which in effect, bring them more readily together than almost any other body of men that can be mentioned in the land.

This spirit of good fellowship produces marked results for the good of society at large. The effect of all sporting organizations is to foster and uphuild a community of interest, which in its beneficial effects on society at large, is of no inconsiderable importance.

From Maine to Texas, and from Oregon to Florida, this interest is more marked than that of any other organizations throughout the country. The contact of man with nature, in its wildest and most natural modes, has ever been and will ever be, a source of education and inspiration which is beneficial to mankind. The cultivation of the animal kingdom and the association with them, has a decided tendency to elevate and refine the best qualities of one's nature.

If there were more lovers of animals in the world there would be noticed a correspondingly higher sense of justice between man and man. No class of knowledge is more useful than that which tends to a clear and practical understanding of the nature and conditions of the several sections of our country. In this respect, the literature of the sportsman, as set forth in the sporting journals of the country, serves a most excellent purpose.

It is a matter for congratulation, not to the sportsman alone, but also to society at large, that the interests of the fraternity are so rapidly advancing.

Australian Horses in England.

In another portion of this paper will be found a letter from one of our oldest and most valued contributors, upon the value of the Musket blood. So far, Senator Rose is the only American breeder to secure any of this valuable stock; and the only regret is that the Sage of Rosemeade did not secure a stallion of the same blood.

There has been a disposition to sneer at Australian and New Zealand horses in America, which we have always deemed unjust and unwarranted. In England they are better judges of horses and are not afraid to pay long prices when they can get value received. We subjoin a list of the six Australian youngsters disposed of at Tattersall's, in London, on the 6th of October, being the stable of the late Hon. James White of Sydney. The prices are in guineas:

Kirkham (3), chestnut colt, by Chester—La Princess (Captain Machell)	610
Narellan (3) chestnut colt, by Chester—Princess Maud (Mr. Swan)	250
Wentworth (2) bay or brown colt, by Chester—Trafalgar (D. Cooper)	1,700
Nepean (2), bay colt, by Chester—Iolanthe (D. Cooper)	950
Mons Meg (2), bay filly, by Martini-Henry—Malacca (D Cooper)	2,000
Bay yearling colt by Martini-Henry—La Princess (D. Baird)	550

The filly, Mons Meg, bids fair to become a grand looking matron, and the price realized for her, something in excess of $13,000, is sufficient evidence that the blood of Musket is thoroughly appreciated there. Mr. Cooper, who purchased Mons Meg, is the owner of the Australian filly Lady Betty (by St. Alhaus out of Pardon by Yattendon), which beat the Prince of Wales' crack mare at Goodwood. Wentworth is brother to Dreadnought, the crack three year old of 1889, whose victory in the Australian Cup of February last, is the fastest two and a quarter miles ever run under the Southern Cross. We sincerely regret that men in our midst, with ample means to essay high priced importations, are so wanting in a proper spirit of enterprise.

Large Purses.

For the past two or three years many writers on turf topics have expressed surprise at the smallness of purses offered for trotting horses, and of the large stakes which are annually announced for thoroughbreds. Surprise has also been manifested at the large prices which breeders have been willing to pay for well bred trotting horses as in comparison with what running horses have been sold for, as there has always been a chance for a good thoroughbred to win a small fortune in a season, while the heaviest winners in trotting races could scarcely get more than money enough to pay an ordinary stable's expenses. During the past two years, however,

a change has taken place, and we now find that large stakes are being instituted all over the United States. The New York Spirit of the Times, the Chicago Horseman and the BREEDER AND SPORTSMAN, have each brought before the public, stakes which will amply repay owners for training and conditioning trotting horses. The Terre Haute Guaranteed Purse which closed on the 1st of the present month, is another step in the right direction, and although we have not received as yet a full and complete entry list, a telegram received on Thursday morning from Frank McKeen notifies us that already 510 entries have been made and that more are expected. This fact alone goes to show that the trotting horse men of this country are willing to subscribe liberally towards any large stakes or purses, and it can be readily believed that the day is not far distant when there will be fully as heavy stakes and purses opened for the trotter as there is at present in existence for the thoroughbred. In furtherance of this idea, Mr. C. J. Emery, of Cleveland, is at present hard at work trying to get up a guaranteed stake of $50,000, which will probably be given for three-year-olds, foals of 1890, although as yet no definite limit has been placed upon age or time of meeting. As outlined, the total payments for each horse will not exceed $350 or $400, and the entrance fee will be less than three fourths of one per cent. A large number of breeders have already signified their assent to assist Mr. Emery in his great scheme, and although the venture is a very bold one, we predict that it will be successfully carried out.

VETERINARY.

Conducted by Wm. F. Egan, M. R. C. V. S., F. E. V. M. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Wm. F. Egan, M. R. C. V. S, 1117 Golden Gate Avenue, San Francisco.

F. H.

My horse went suddenly lame last week without any cause.

I was driving him on a nice, smooth road when he suddenly became lame, and by the time I got him home he could scarcely walk. He appears to be a little better now, but is still very lame.

I don't know exactly where he is lame, but I applied some of Kendal's Spavin Cure to the fetlock joint, which appears to do him some good.

Please give me some advice about it in your next issue.

Answer—You are not definite enough in your description of the lameness.

Please say if you took the shoe off, and examine the foot for nails, corns, or any other injury, or if you noticed any more heat in one part of the leg than another, or if he yields more on pressing one part than another, and whether he shows more lameness when walking, trotting, backing or turning, and last, but not least, what leg (fore or hind) is he lame on.

Subscriber.

Please tell me what is the best treatment for lung fever. I have just lost two fine horses from it, and another is showing signs of having it to-day.

Answer—See our issue of Nov. 1st.

Subscriber.

My horse picked up a nail a few days ago. It did not appear to lame him much just then so I worked him as usual. He appears to be getting worse every day, and he is now very lame, and there is great heat in the foot and swelling round the top of the hoof.

I got the shoe taken off to-day and the nail hole pared out and found it full of matter. The horse shoer said that he thinks it will break out at the top of the hoof.

I have applied blue stone to it and poulticed it. Is there anything more that you could recommend?

Answer.—Open the hole well to give free access to the pus, but do not bleed the part—if possible avoid doing so. Wash the part well with warm water and poultice it daily until the severe pain leaves it.

When the pus or matter has disappeared put on a leather sole with oakum and tar, and do not work until all the lameness has gone.

Veterinary Department.

SPINAL MENINGITIS.

This disease appeared in most parts of the United States as an epizootic in the Spring of 1872, and as a sporadic disease for fifteen years after. It occasioned much loss to horse owners on its first appearance in Boston and vicinity, occurring, as it did, just previous to the great fire and the horse disease that caused such loss and destruction during the Fall of the same year.

The animals affected were usually adults, some young, some aged, male and female, driving horses and work horses, all in good condition. Some were attacked on the street while at work. As they lost the power behind, their hind legs would move awkwardly, sometimes straddled, at other times crossed, until, being unable to go further, they would drop down, and being usually unable to get up had to be conveyed to the stable.

Others were taken in the stable, usually at night, and found on the floor in the morning struggling to get up, on account of their hind legs refusing to perform their functions.

I will not attempt to give the causes that induced such a disease, as that would be mere supposition and guessing; but I will try and describe the methods of treatment which I carried out. On entering a large stable attacked, one or more of the animals would be found lying on the floor, occasionally raising themselves on their fore legs.

Treatment: First offer them a little water to drink, as, although the pulse may not be more than thirty-eight when they are still, they would generally drink and be refreshed. Next examine the hips and loins, then insert your hand into the rectum and empty its contents, which cannot be expelled on account of the paralysis having extended to it, and the bladder too. When your hand is in the rectum feel for the bladder, which will be full of urine; in a mare it can be easily evacuated by using a piece of half inch rubber tubing ten inches or a foot long. If the patient is a male a long catheter will be necessary.

Unlike blackwater, in this disease the muscles of the hips and loins will be soft and normal, instead of large and swollen, neither will the animal be in such a profuse sweat; then instead of the water being black or dark as in blackwater in spinal disease, the urine will be found from a slight syrupy consistency up to that of paste; indeed, I have often had to put my hand in the rectum and squeeze it to force the contents through the catheter. In the male I seldom use a catheter, as it soon gets the urethra chafed and sore, so I empty the bladder by pressing it with my hand against the wall of the pelvis. I regard it as best to empty the rectum and bladder before slinging, as I have known the bladder to be so full that it got burst in slinging.

In slinging, see first that your roof or rafters are strong, and high enough that the blocks will not meet before the animal is lifted high enough, for, unlike black water, in this disease they can almost invariably be lifted, and it is very important that they should be. The blocks ought always to be two double ones, then three or four men only will be required; if one single block and one double are used it will require many more men.

Be sure that the sling is strong and not too long, and merely fastened round the breast, and also round the quarters behind, so that it will not slip back or forward too much. Do not fasten the sling to four opposite corners, as this will cause it to chafe, but use a whiffle-tree and then suspend it from the blocks, and allow an easy swinging motion. Be sure not to lift the animal too high. It is also best to place him in a narrow stall a little to one side, and put a timber covered with thick cloth behind, to allow his hind quarters to rest on when he likes.

There are other little matters to be attended to, such as a very wide sling might interfere with the male urinating. The breast strap might cause choking. The bladder sometimes gets so full that it runs over and deceives one into thinking that they are evacuating it all right.

As soon as they begin to show a little strength in their legs, slacken the sling for an hour or two daily, gradually increasing it; begin also to make them move in the stall.

For medicine it is well to give them when down and before slinging a dose of raw linseed oil and a little ginger, to which I sometimes add one-half pint of gin. Then apply hot blankets to the back, wring quite dry in winter; in summer a slightly stimulating liniment and hand rubbing. If a blister is used, let it not be very severe. Attend to the feet and legs, by placing them frequently in hot water. Give in drinking water flaxseed tea, and keep bowels soft. Some cases will pull through and be fairly useful; others will convalesce slowly. An occasional permanent defect in the male is his inability to retract his penis, which often requires to be amputated, and the bladder of both male and female are sometimes left in a diseased and partly paralyzed condition. It is a disease that always reduces the value of the patient to a considerable extent.

MILLIAMSON BRYDEN, V. S., in the Horse Breeder.

Thoughts on Breeding.

There is no subtle alchemy by which the breeder can take so much Hambletonian, Morgan, Clay or Pilot, not to mention thoroughbred blood, and by the admixture, or by any known physiological or vital chemistry, invariably produce a record breaker. Possibly it is well that this is so, for the very uncertainty adds interests and zest to the attempt, and with intelligent effort there is always the possibility of achievement, and it is surely more pleasurable to have the one success among many failures than that degree of mediocre success than is common to us all. Ethan Allen never achieved the success in the stud and that marked the career of his son, Daniel Lambert, and the difference between Lakeland Abdallah and Harrison is still marked. Yet in both of these cases the blood lines were identically the same. The rule that like produces like or the likeness of some ancestor applies here with a difference. And this proves another law, and that is that individuality counts for something. Blood, however, will tell, and in succeeding generations the progeny of Lakeland Abdallah and Ethan Allen may vie with that of Harold and Daniel Lambert, their more popular brothers. Likewise the descendants of Phallis in the second and third remove may do credit to his splendid breeding and speed.

There is always a possibility that a quality—speed for instance—may be latent or dormant in an individual or in one generation, and yet manifest itself in succeeding ones. Because a Williams can take a non-standard mare, that cannot trot in less than four minutes and breed her to a horse without a record (the pedigree was there) and as a result of this union produce the great Axtell, we are not to conclude that breeding is entirely a lottery. The trotting horse is just now being evolved. It is unusual to find even five uncontaminated trotting crosses. The breed is in process of formation and is, so to speak, just being established. The Hambletonian, Morgan, Clay, Pilot, Blue Bull and other families have been crossed and intermixed until the trotting conformation and instinct are becoming more and more intensely fixed and a degree of propotency acquired which will reproduce itself with increasing frequency and certainty as the breed is developed. For these reasons it would seem a colossal mistake for breeders to ignore what has been already accomplished, and shutting their eyes to all past experiences, hope to achieve success by blind experiment One chance success will not atone for the million inevitable failures. Each of the trotting families have their own peculiar excellencies and defects.

There is abundant scope for experiment and improvement without going outside of these families. For instance the long-striding but somewhat slow Hambletonian may be improved by a cross upon the quick, trappy, but short-stepping Morgan. Its cross with the Clays has produced a George Wilkes, an Electioneer and others, and so on *ad infinitum*. It would be an instructive thing, especially to one like the writer who is new to trotting horse lore, if some one of your many correspondents who are fully qualified for the task would write up the different trotting families, giving a history of their founders with their family traits, good, bad and indifferent, armed with which knowledge the beginner might make an intelligent venture. We do not want crosses that tend to destroy the trotting gait and instinct; we want this intensified and increased. The past, with its primal ignorance and many consequent failures, has yet in fifty years reduced the record from three minutes to 2:08¼. Let us not ignorantly do our first works over again, but go on to perfection and produce, in fact, the two minute trotter.—EASTERN SHORE in Clark's Horse Review.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

F. W. B. Vancouver.

Jerseyman was by Geo. M. Patchen, Jr., dam by Doble's Black Baehaw.

M. R.

Did Sisson Girl 2:28½, ever have any other name?

Answer.—She was at one time known as Black Nance.

J. M. G.

Please let me know the pedigree of May Howard and when she trotted 20 miles inside of an hour.

Answer.—May Howard, by Captain Hanford 804 (called also Paddy McGee), dam the McCormick mare, pedigree untraced. We have no information that May Howard ever trotted twenty miles inside of an hour; you probably mean Mattie Howard.

J. M.

Can you let me know when the original Ida May was first known of in this State?

Answer.—The first we can find out about her is in the year 1859, when she was shown at the State Fair by W. Reynolds of Colusa County.

J. W. Deacon.

Racquet had his right ear slit about one-fourth of an inch on the point (vertical slit); he also had a brand of J. C. or C. J. on hip. No white hair on his body or legs.

E. W. B.

A meeting was advertised to be held according to the rules of the Blood Horse Association—Entries 10 per cent. of the purse. In a half a mile and repeat race were entered three horses of which all started. The horse winning the first heat bolted the track in the second heat, the other two horses running a close finish. After a lengthy discussion the judges awarded the race to horse winning second heat, making him walk over in the third heat. The horse running second in the second heat was refused second money. Is this right?

Answer.—Yes, if only two monies were advertised, but if the purse was given in three amounts the ruling is wrong as per last section of rule 84.

Quartz.

An Australian correspondent sends on the following advertisement out from an interior paper, and asks some questions in relation thereto.

Sensation 2d to stand this season at Narromine, the imported American trotting stallion, Sensation 2nd, (imported).

American trotting stallion, bred by Mr. Savage, Reno, Nevada, U. S. A. Senator 2nd is a beautiful brown, 6 years old, from the purest strains of American trotting blood that can be got; full of quality, splendid action, perfect temper, and thoroughly quiet in harness, he carries himself with an elegance only observable in natural born trottera. Last season he travelled the Kiama and Shoalhaven districts and has proved himself a sure foal getter. Sire, Sir David (performance on record), dam Bellfounder by Hambletonian.

Can be seen for a week at the Royal Hotel, Dubbo. Full particulars in future issue. F. MACK, Narromine.

1. How is Sir David bred? Has he any record, where made? What is the dam of Sensation 2nd, and how bred?

Answer—We do not know Sir David, and he has no performance on record that can be found in any of the authorities. Never heard of the dam of Sensation 2nd.

Names Claimed.

GEORGIA RALSTON for iron grey filly by Chancellor, dam Flirt by Monday. The filly has two white ankles, star in forehead and few white hairs in face. CHAS. A. JONES, Beowawe, Nev.

NOONBELL for br f by Noonday, dam Lillie C. by Alcona Clay 2756; 2d dam Flora Belle 2:24 by Alcona 730; 3rd dam Fontana (dam of Silas Skinner 2:19 and Flora Belle 2:24) by Almont 33; 4th dam Fanny Williams (dam of Bay Chieftain, 2.28) by Abdallah 15. H. B. STARR, Napa.

The American Trotting Association.

DETROIT, Mich., Oct. 30, 1890.

Notice is hereby given that the next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Ill., Tuesday, December 2, 1890, at 10 o'clock A. M., for the transaction of such business as may be properly presented to the Board for its consideration.

Parties desiring to bring cases, or file additional evidence, should send same to the Secretary at Detroit, Mich., as soon as possible, and not later than November 20, 1890.

J. H. STEINER, Secretary.

Jessie Pepper, the daughter of Mambrino Chief, keeps increasing the value of her line through her descendants. The latest addition to her family of fast ones is the black mare Irene 2:23, by Alcantara and out of Jessie Pepper's daughter Iola by Administrator.

No matter how well bred, how good looking, or how much speed your horse may possess, he is absolutely worthless if he has unsound feet. More horses depreciate in value through neglecting their feet than from any other form of abuse. In a state of nature no artificial means need be employed to keep the foot of the horse healthy, but 95 per cent. of those kept in stables will sooner or later contract thrush, which disease is certain to destroy their usefulness if not checked in time. This ailment is a result of picking up the filth that must accumulate in the horse's stall, and there is no way to prevent it except by keeping the bottom or sole packed with something that will exclude the manure and urine from the frog.

Grim's Gossip.

The Journalist of October 18th had a very creditable picture and biography of J. M. Rouck, founder of The Fresno Turf.

The indications at present point very strongly to the fact that Mr. Corbitt's string will be seen on the Eastern circuit next year.

Can Vida Wilkes touch Sunol's two-year-old record? is now a leading question. That she can beat 2:20 almost every one agrees on.

Judge Salisbury, the son of Nutwood that is owned in Kentucky, is out of the same daughter of Volunteer, that produced Homestake, 2:14½.

Ethel Mack by Anteeo, dam by Milton Medium is another of Electioneer's grandaughters to enter the list, she making a record of 2:29½ at Independence, Iowa.

The entries to the Stockton record meeting promise to be very large, and if the weather holds good there is a prospect of many more horses entering the 2:30 list.

Three of the get of Thomas Jefferson died this summer, all three deaths taking place within about a month of each other. They were Farmer Boy 2:19¼, Lizzie M 2:20¼, and Patrician 2:26¾.

Already from all portions of the State horsemen have congregated at this point to witness the great flights of speed that is expected to-day at the Bay District track. Let us hope that none of them will be disappointed.

We have received number thirteen of the Goodwin's Official Turf Guide which will be the last of the bi-monthly editions for this year. As usual it contains all the latest racing information, and is a valuable addition to any turfman's library.

A correspondent of an English exchange reports the birth of a filly with an udder full of milk, which flowed freely from the teats, while the mother had not a drop. It took careful management for more than a week to remove this preposterous condition of affairs.

We would call the attention of our readers to the advertisement of W. L Appleby, in which he offers two young thoroughbreds for sale. "Billy" also announces that he is agent for the Laurelwood Farm, and that driving horses and Durham cattle can be had cheap.

W. H. Wilson, of Cynthiana, Ky., has at last sold his famous show horse Jubilee De Jarnette to J. N, Huston, of the United States Treasury Department. The price is not stated, but undoubtedly it took a lot of big American dollars for Mr. Wilson to part with his pet.

Mr. L. Swan, of Yreka, has been in town for several days, having been attracted toward the Bay City by the races that are announced to take place to-day at the track. Mr. Swan has five young Antevolos, three of which are far above the average trotter, and he expects good reports from them next year.

The trainers have been rapidly picked up for next season. James Nebro will go with the Jewett Stock Farm, A. McDowell and Ben B Kenney with Marcus Daly, Dan Brown with George W. St. Clair, Fred Margrove, with Mr. Rockefeller of Cleveland; J. W. Knox with the Fashion Farm, Trenton, N. J.

There is nothing like going away from home for news. The Horse Breeder says: Advices from the Pacific Coast state that the half-mile track record was broken at Napa, Cal., on the 11th inst. by Homestake, which trotted two heats in 2:14½, which beats Nelson's half-mile track record three-fourths of a second.

Although nothing has been stated in the Eastern papers about the matter there is a rumor current that George Starr has left the employ of Budd Doble, and that the horses he is bringing to this State are not part of the Doble string, but a separate lot that George has taken in training. He is expected here at almost any moment.

If there be any one who wishes to send back horses to the East within a few weeks, a chance will be offered shortly, as George Starr will arrive within a few days with a car load of trotters, and will return with the car about the first of the months. Letters addressed to the gentleman care of this office, or care of Mr. Corbitt, San Mateo Stock Farm, will reach Mr. Starr.

Mr. Salisbury has been in Chicago most of this week, but is expected back here on Wednesday next. Margaret S has entirely recovered from her lameness, and it is not yet definitely settled but what she will be started once more this year to beat her present record of 2:12½. Direct is also on the improving list, and if his stable companion is turned loose for a fast mile he may also be given a chance to show what he can do.

August Belmont heads the list of the winning owners for 1890 his total being $171,350. of which $78,650 was won in the Futurity Stakes by Potomac. La Tosca comes next with $18,190, Her Highness, $16,100 and Prince Royal $11,215. Mr Belmont is the High Priest of the American turf, a man of faultless honor, and those are the men whom we like to see victorious.

Now then gentlemen of the Eastern press, remember that Homestake trotted at Napa the second heat of a race in 2:14½ and the third heat in 2:14¼. It took almost two years for the journalists of the East to find out that Anteeo trotted in 2:16¼ instead of 2:16½, and the same mistake is being made almost every day about Homestake. His record is 2:14¼.

On Wednesday last a meeting of the Directors of the P. C. T. H. B A. was held at the rooms of the association 313 Bush Street, to finish up the business of the late meeting. Notwithstanding the harpings of those who would like to see the society a failure, it was found that after paying all bills that there would be a total of almost a thousand dollars on hand with outstanding accounts due of sufficient amount to swell the treasury many hundred dollars more. Those most interested are highly gratified at the good showing, and feel that the future success of the association is assured.

How the Sunday morning papers will sell in Maine! Every horseman in the Pine Tree State will want to see how fast the California stallions have trotted on the first exhibition day, their State pride being at stake. A spirit of prophesy almost makes me say that 2:10¼ will be the new stallion mark and that the Golden State will have all the honors of the record.

An Oakland gentleman has a gelding for sale at a price so extremely low that there should be no trouble in disposing of him especially as he is by Sultan, and the dam was by The Moor. The owner wants more stable room for valuable brood mares, which is the only reason given for selling. Those who wish a good road horse should write for full particulars to the address given in our advertising columns.

There is no more attractive embelishments for the stable or saloon than horse pictures, and Currier & Ives announce this week that they have had prepared four elegant lithographs of Sunol, Stamboul, Palo Alto and Salvator prepared which can be purchased at the low price of twenty cents each. In addition to these Californian horses, the same firm also have pictures of all the principal horses, both trotters and runners.

Demuth will be, if he winters well, one of the formidable candidates for the Suburban and Brooklyn handicaps, He will probably get in with from 113 to 115 pounds, while Tournament of the same age, will get from 123 to 126 pounds. Racine will not get less than 120 and Riley's imposi will be about the same. Hence we would not be astonished if Demuth was either first or second. With Salvator retired to the stud, the talent can put on their guessing caps.

Entry blanks have been received at this office for the Coronado Beach meeting, and all who desire to make nominations may obtain them on application. Mr. Baldwin has determined to make this the great winter meeting of the State and will use every effort to insure the horsemen that may visit the famous resort a good and profitable time. The purses are very generous, $8,000 in all being offered, and we fully expect to see a large number of turfites at the Southern city during the meeting.

If the signs are to be relied on Electioneer will again head the list of trotting sires this year, as far as numbers are concerned. At Birmingham, Alahama, last week, Alma by Electioneer dam Alvaretta by George Lancaster,- 2nd dam Melinche (dam of Fred Crocker 2:25½) won the 2:30 class race in 2:28¾, 2:31½ and 2:28¾. This mare is owned by G. M. Fogg, Esq., of Nashville, one of the most enthusiastic of all the Tennessee breeders, and as at this same meeting his stallion Benton by Gen. Benton, reduced his record to 2:23¾, we heartily congratulate him.

It was disappointing to both Marvin and Hickok to return to California without champion records on Palo Alto and Sunol. But the talk of their campaigning being a failure is nonsense. Is it a failure to trot a four year old filly a mile in 2:10½, and a stallion the third heat of a race in 2:13? They did not beat the world, but they enhanced the glory of the Electioneer line. And in sweet fall days in California, with the springing grass and the balmy summer air, we may hear something drop before 1891 knocks at the door of the future.—Horse and Stable.

On that particular Saturday afternoon at Napa, when John Goldsmith gained a record for the yearling Freedom of 2:29¾, Mr. Corbitt approached his driver, and, after congratulating him on the great achievement, said: "Charge me with $500 for what you have just done, Mr. Goldsmith," and it was a cheap day's work for the owner of the San Mateo Stock Farm. By the way, it is firmly believed at the farm that there is another yearling down there that can beat Freedom; she is by Sable Wilkes out of a mare by Le Grange; 2d dam by Arthurton, and on being hitched to a sulkey for the eleventh time, made a quarter in 38¼ seconds.

Mayor De Lashmutt of Portland Oregon has lately purchased a fine lot of youngsters from F. G. Babcock, Hornellsville N. Y. Among the number are the yearling filly Nellie Bly, by Georgia Wilkes, dam Snap, 2:28¾, by Strathmore; yearling filly Crystal Slipper, by Georgia Wilkes, dam Olga Hartwood, by Hartwood; filly (three years) Tot, by Lumps, 2:21, dam Ada D., by Onward, 2:25½; weanling filly Mount Hope, by Smuggler, 2:15½, dam Modjeska, by Abraham; filly (two years) Silvershell, by Nutshell, dam Delight, by Chesterfield; filly (four years) Minnie Hartwood, by Hartwood, dam Edsall's Issue, by Major Edsall.

Dates of English fixtures for 1891: The season under the Jockey Club rules begins at Lincoln on Monday, March 16, and ends at Manchester on the last Saturday in November. Dates of important fixtures are as follows: Lincoln Handicap, March 18; Liverpool Grand National Steeplechase, March 20; City and Suburban Handicap, (Epsom), April 9; 2,000 Guineas (Newmarket), April 29; Chester Cup, May 6; Newmarket Stakes, May 13; Derby (Epsom), May 27; Oaks (Epsom), May 29; Ascot races, June 9, 10, 11, and 12; Goodwood races, July 28, 29, 30, and 31; Doncaster, St. Leger, Sept. 9; Cesarewitch Handicap, Oct. 14 or 15; Cambridgeshire Handicap, Oct. 28 or 29; Grand Prix de Paris (if run) June 7.

Mr. Charles Reed has purchased the Australian bred horse Cheviot, brother to Sir Modred. He is a bay horse, with black points, standing fifteen hands three inches high, was foaled in 1880, and is by Trafalgar, dam Idalia. He was bred by Dr. Rosa, whose brother imported the horse to California a year ago, The horse is now at Sacramento, Cal., from whence he will shortly be shipped to the Fairview Farm, near Gallatin, Tenn.

The above paragraph is taken from an Eastern exchange, but Dr. Ross states that he has had no notification that such a sale has been made. It may be true, however, as John Mackey was authorized to negotiate a sale, and it may be that Mr. Reed has purchased the full brother to Sir Modred.

T. H. Tongue wrote a letter to the secretary of the National Trotting association protesting against the decision in the 2:26 class trotted at City View Park, Portland, September 10. Homestake won the race, Clara Z second, and Lady Maxim third, says the Portland Oregonian. Kitty Ham was fourth, but Tongue thinks he should have had third money on account of Homestake and Lady Maxim being owned by the same man, J. H. Kirkendall. The secretary of the national association thereupon wrote to the Portland Speed Association saying that if the purse had not already been paid over, to suspend such payment until the matter could be investigated. To this letter the reply was made that the association made a practice of paying all purses when the race was over, and that the question of ownership had been broached, but waived before the race started.

The last issue of the Chicago Horseman has a portrait of Mr. Baldwin's great mare Los Angeles, and a beautiful picture it is. The deep chest, strong loins and beautifully turned hips, are all given with striking fidelity. The broad flat gaskins and ponderous stifle recalls the lovely mare, with her wide forehead and intelligent face. We indorse all the Horseman says of her as a performer, and concur in the belief that Los Angeles is destined to be one of the Belgravian matrons of the American stud. Our only regret is that old Grinstead is not ten years younger, so that he and Los Angeles could produce a family of winners second to none in America. Los Angeles has started in 92 races, of which she won forty-one times. While we do not deem her the equal of Firenzi at long distances, she is, nevertheless, a great mare.

While chaffing over the respective merits of different blood lines in the BREEDER AND SPORTSMAN's office a few days ago, Mr. Valensin stated that he had a filly in foal, which if the produce came a horse colt he did not care for it, whereas if a filly was the result, a small fortune would be necessary to purchase it. On being asked the breeding, the owner of Sidney gave it as follows: the filly in foal to King Rene 1278 (sire of Fugue 2:19¼ and eight others in the 2:30 list) she by Dictator, next dam by Harold 413 (sire of Maud S 2:08¾ and twenty six others in the 2:30 list) next dam by Pilot Jr. 12 (sire of nine in the 2:30 list; also sire of seven sires with sixteen trotters and two pacers in the list, and sire of fifteen dam who have thirty two trotters in the charmed circle). On being asked what he would take for the foal if a male, a price was stated, and was at once purchased by a gentleman present, the price being a long one, but still not too much for such goods.

Billy McGuigan, who kept up a career of fraud and crime for years with the trotter Small Hopes, bids fair to become permanently disgraced as an owner of running horses. He bought the black mare Meckie H. by Red Boy, from the Montana Stable (Hundley & Prewitt) and has since been running her in his usual crooked way. Everything now looks towards a richly deserved expulsion.

Since the above was put in type we learn that at 7 o'clock last Saturday night, in the crowded corridor of the Phœnix Hotel, in Lexington, Gen. James F. Robinson, President of the Kentucky Association, made the following announcement: "GENTLEMEN: I am sorry to have to state to you that, after a full and careful investigation, the club has decided to rule off William McGuigan, his foreman Scales, and his rubber Bridges." This was greeted with considerable applause. The cause of this ruling off was the way in which Meckie H. ran in her race on the preceeding Thursday, and then won in such grand style on Saturday. The owners of Meckie H., Shannon Bros. of Lexington, took their filly from McGuigan Thursday night, and O. O. West ran her to victory on Saturday. William McGuigan is the only man in America that has been ruled off both the trotting and running turf. Old trotting horsemen will remember how in 1874 and '75 he campaigned the noted trotter Small Hopes in Iowa, Missouri, Kansas and Massachusetts under the names of Lysander, Lapland, Westbrook, etc., and how he was caught with three other ringers at Mystic Park, Boston, and expelled.

At a meeting of the executive of the Victoria Jockey Club, held last week, says the Victoria Daily Colonist, the resignation of A. N. Munsie as caretaker of the Driving Park was received, and H Stone appointed temporarily to the vacancy created. The resignation of Mr. E. W. Mathews, necessitated by the confliction of the secretarial work with his business interests, was also dealt with, the finance committee being authorized to make the necessary appointment.

A resolution was discussed and adopted to the effect that $25 must be deposited with the club whenever the track is engaged for a match race, unless 10 per cent of the stakes exceeds the amount named, when that proportion of the money for which the race is run will be required to be placed with the treasurer of the club. This is to guard against the disappointment of the public by the unnecessary postponement of advertised matched races.

The financial affairs of the recent meeting having been wound up, it is found that the receipts in the hands of the club, will not only cover indebtedness, but leave a snug balance on the right side of the books.

On motion the protest of Mr. Mason, of Vancouver, laid after the trotting and pacing race in which his Vancouver Dan was defeated, was thoroughly discussed and the action of the judges sustained the protest being disallowed.

The jockey Frank Baldwin, trainer Johnston and George Renwick have been expelled for life from the Victoria track.

It is thought that the spring races of the club will open on May 1st, and the fall meeting commence about August 1st, opening the North Western circuit.

The Directors of the Stockton Fair are determined to take a new departure, says the Mail. The Board proposes to have a straight mile course, the first on the Pacific Coast. Negotiations are now pending for a suitable piece of land, properly located, for this purpose. Under such an arrangement in every speedy contest the time will be taken by electricity, both at the start and finish, thus avoiding any possible question as to time made in the race on trial. With this system any number of horses may start, and the animal covering the mile in the shortest time is the winner of money and record. In such races or trials on this course every horse must travel an absolute mile and a mile only, the chances for fast time are from 3 to 5 seconds better than on a circular course. Time is always lost, and moreover there is danger of injury to horses, by breaking or "cutting down" on turns on a circular track. The straight course absolutely does away with any excuses of drivers or riders for losing because of being pocketed or forced out of their proper places in the finish of a race.

In order to take the time by electricity a very simple but effective device is employed A length of loosely twined thread, which is very easily broken, is stretched across the track at the height of the horse's breast. When the horses run across the thread they break it and an electrical device is made by the breaking of the thread to register the time of the start. When they reach the other end of the course the animal in the lead breaks another thread and thus the time of the finish is registered. Both threads have electrical connection with the same registering apparatus, as trouble might result if there were two, for it would be difficult to make the two keep exact time with each other.

Under the contemplated system it will be necessary to have two judges, one at the start and one at the finish The grand stand and other structures will be located opposite the finish.

The new track will be situated near the city limits, and the Board hopes to have it completed in time for the next fair.

Accident to Superior 2.15.

Mr. A. L. Jessup of Denver, Col, sends us the following from the Denver News: "Our correspondent caught Major J. J. B. Dubois, as he was coming out of the Grand Hotel dining room. He had slept but little, if any, all night, and looked worried and tried.

"Yes, Superior is in a bad fix," said he. "I was with the men and the horses early in the evening, but there was trouble in getting the cars to the depot, and after waiting some time, I left, after especially cautioning the men to exercise the utmost care in loading. Two or three hours later I was sent for and hurriedly rushed down. It seems that the horse got on the wrong side of the train, and in order to let him out, they had to move the cars. Instead of uncoupling a few cars, and letting him out, the train men, without warning, suddenly pulled up the whole train. Superior was just half way in the car, and was dragged for forty feet with his front feet inside the door and his hind feet on the ground, when he fell under just as the cars were stopped. We had to pry up the cars on jacks to get him out. There was no veterinary surgeon about that I knew anything about and sent at once for Dr. Collins. I admire the way the doctor took off his coat and went to work. He felt as I did, that Superior was more than a mere horse and he willingly did the work. Of course, the Denver and Rio Grande will pay the damage in cash. They acknowledge the fault entirely their own, but they cannot stop the poor stallion's pain. I consider Superior worth more than any other trotting horse on earth. He is superior in name and breeding. He is by Egbert, who put seventeen in the '30 list last year. His first dam is Mary, by Woodford Mambrino, his second Belle by Norman, his third Vic by Mambrino Chief. On the track here last Wednesday, he did well, and was going easy, when he lost his hind shoe and scalper, which threw him off his feet. The mile was done in 2:17¼. It is had to tell what he would have accomplished if he had not lost his shoe. Some are confident that he would have made it in 2:14. I have owned him for two years, and have a challenge out to trot any stallion in the world at Overland Park. A short time ago I offered to trot Palo Alto on his own track for $3,000 or more. A match is being gotten up between the Montana trotters Manning and Kneebs, Jessie Gaines, and between the pacers Major Wonder and L. C. Lee for next week at Overland Park, and I intended again trotting Superior against time.

Dr. Charles Greshwell, a Denver veterinary surgeon, was sent for and arrived at noon. He spent the entire afternoon with the horse, which is at the Valley Stable.

This evening he gave the following diagnosis of the case to The News correspondent:

"His greatest injuries lie below the hock, on the right leg. They consist of a peeling off of the periosteum, six or seven inches in length, and about one and one-half inches in width, exposing a considerable surface of bone. One of the lateral ligaments of the hock joints is gone, and the tendons exposed. In addition to this, the whole of the bone of both hind legs, from the hocks to the fetlocks, is considerably bruised. The muscles of the loins are bruised very much, and other important muscles are lacerated. He has had high irritative fever throughout the whole of the day, and his general condition is alarming. I am and will practice antiseptic surgery entirely. A careful examination of the lungs, ribs and other bones of the body has shown no other fracture. Should the systematic disturbance abate and tetanus or blood poison not supervene, I am of the opinion that he stands a good chance of recovery, but I am exceedingly doubtful if he will ever be seen on the track again. I have never seen a horse behave so well. He takes his medicine and stood the surgical treatment more like a Christian than any animal I have ever seen."

W. S. Adams, the agent for the Denver & Rio Grande, is very assiduous in his attentions. He was up nearly all night, and to-day he is doing all in his power to help the matter. The yards are very much overcrowded and the men are overworked."

It is quite likely that this accident will end the turf career of Superior.—Dunton's Spirit.

The Value of Pedigree.

The value of pedigree is best known to those who deal in thoroughbred or pedigreed stock, says the World. To the man who knows nothing of the protection that a pedigree affords in establishing purity of blood it is treated lightly by egotistical expressions as, "I want the animal, not the pedigree." "Give me a good animal and he will make the pedigree for himself," etc. Such remarks never pass the lips of a breeder, a man skilled in producing pure bred stock for the pure bred market. As soon as a person becomes interested in producing any kind of pure bred animals you will find that person making inquiry about the origin af this family or strain of stock.

It is natural to want to trace the family history back to noted ancestry. This can only be done through a systemized record of pedigree. The demands of the times require that you be able to tell all about your stock, if you make any claim at all to purity of blood. Be able to give sire and dam grand sire and grand dam, etc, back to some noted and familiar animals at least. A break in this history by throwing in, "I don't know what the sire of her great great dam was, is fatal in most instances, especially if your purchaser knows his business and is after straight goods.

Recently we called at a large poultry killing establishment in Omaha, and in looking over the various coops and pens of chickens, discovered a dozen or more very large, fine looking Light Brahma chicks fenced off by themselves. On inquiry they were introduced to us as a lot of choice, pure bred birds of great value, and were held for a fancy price. We made more inquiry and were assured by all manner of assertions that they were as fine a lot of thoroughbred chickens as could be found in the United States. We at once accepted the price and asked for the evidence of purity of blood. This could not be produced, not even the evidence to prove that they were natives of Nebraska. Yet the owner thought they were good enough to introduce into any pure blood flock.

If you make breeding a business for the purpose of selling your produce for breeding purposes, you cannot be too careful in the matter of pedigree, even if it be in a poultry yard. You can accommodate those who do not know or care for the value of pedigree, and you are regarded reliable by those who would not buy from a breeder whose stock is not based upon purity of blood.

The Breeders' Leading Desire.

Every person has a hobby, says the Buffalo Commercial. The desire to excel in any business or professional vocation, increases in proportion to the success attained. A ward politician is satisfied with being elected an alderman at first, but, alas, long before his term of office expires his natural greed for more makes him sigh to be in the Mayor's chair! A lone fisherman on a shady bank always wants to catch just one more whopper before he leaves, and so it goes. It's the same old, old story, never enough, never enough!

'Tis well it is so, for without this ambitious desire, man would be a drone bee left in the weeds by the wayside. Mr. A. J. Alexander, of Woodburn, has the honor of having bred Maud S., 2:08¾, queen of the horse world, and for several years past the leading desire of the stock farm kings from the mild Pacific Coast to the blustering Atlantic, from the great lakes to the gulf, has been to dethrone the daughter of Harold. Wonderful has been the progress, yet Maud still reigns. We have all seen a baby trotter go in 2:10½, yet 2:08¾ is still written in red letters upon the blackboard of time. For over five years it has been there, and with as perfect regularity as the coming of the springtime, have ambitious writers upon equine topics told, in glowing terms, of their phenomenal favorite that would surely lower the fractional figure, to say nothing of those of those sanguine enough to talk about two minute flyers.

The result of this competition has had its beneficial results. It has stimulated men of wealth and brains to engage in breeding. The old rickety farm barn and rail fences in many charming localities throughout the country have disappeared as if by magic, to be supplanted with modern improvements by the new millionaire candidate for breeding honors. Even clergymen have discussed the creditable calling of advancing the standard of that noblest of animals—the horse—and today the world knows that a gentleman may own a trotter, and that a driver may be a gentleman.

Our friends from over the sea, the Russians, French and English people, have caught the fever and are making liberal purchases in trotting-bred nags in this country every season, thus opening a new market that will surely increase in magnitude as the fleeting years come and go.

The trotting horse family is purely of American origin, but pacers are spoken of by an eminent writer on equine topics as long ago as in 1667, or 121 years before imported Messenger stepped upon the shore of the new continent. A peculiar feature of the history of Messenger is the conspicuousness of the figure "8" in his life. He was foaled 1780, imported 1788, died 1808, aged 28.

Much has been written of the old established stock farm kings of America. In fact, the names of Robert Bonner, Senator Stanford, Charles Backman, William M. Ryadyk, Gen. B. F. Tracy, Major Campbell Brown, Major H. C. McDowell, Capt. B. J. Treacy, W. H. Wilson, Gen. R. L. Howard, Col. A. J. Alexander, Henry C. Jewett, Judge P. P. Johnston, L. J. Rose, Col. R. P. Pepper, C. J. Hamlin, Miller & Sibley, F. G. Babcock, S. E. Larabee, S. A. Browne, J. C. McFerran, Gen. W. T. Withers, Senator Stockbridge, George A. Middleton, "Axtell" Williams, Alden Goldsmith, Judson H. Clark, H. N. Smith, C. F. Emery, "George Wilkes" Simmons, Wm. A. Singerly, Dr. L. Herr, Gerhard Lang, Merrill & Scott, Sutherland & Benjamin, Dewey & Stewart, William Simpson, Frederick Aikers, H. S. Henry, J. I. Case, C. H. Nelson, Dr. A. S. Talbert, C. M. de Garmendia and others, are as familiar as household words.

PECULIAR INFATUATION.

Different Methods of following the Injunction "Love One Another."

Do men ever fall in love with each other?

Women do. Not long ago a young woman in New Jersey was married to a youthful laborer on her father's farm. Sometime afterward it was discovered that the husband was a female; the young wife refused, however, though earnestly entreated by her friends, to give up her chosen consort. The strangest part of the discovery was the fact that the bride knew her husband was a woman before she was led to the altar.

If men do not exhibit this strange infatuation for one of their own sex, they at least often times give evidence of the fact that they love one another. There are many instances on record where one man has given his life for another. There are many more instances where men have given life to another.

It is a proud possession—the knowledge that one has saved a precious human life. Meriden, Conn. is the home of such a happy man. John H. Preston, of that city, July 11th 1890 writes: "Five years ago I was taken very sick, I had several of the best doctors, and one and all called it a complication of diseases. I was sick four years, taking prescriptions prescribed by these same doctors, and I truthfully state I never expected to get any better. At this time, I commenced to have the most terrible pains in my back. One day an old friend of mine, Mr R. T. Cook of the firm of Curtis & Cook, advised me to try Warner's Safe Cure, as he had been troubled the same way and it had effected a cure for him I bought six bottles, took the medicine as directed and am to day a well man. I am sure no one ever had a worse case of kidney and liver trouble than I had. Before this I was always against proprietary medicines, but not now, oh, no."

Friendship expresses itself in very peculiar ways sometimes; but the true friend is the friend in need.

Racing by Natural Gas Light.

R. J. Wheeler, the now famous starting judge, spent most of the past week at home, and while here was met by a Journalite and "drawn out" on the question of the great four day's meeting at Lancaster, O., at which place Mr. Wheeler acted as starting judge. The driving park at Lancaster is, to use Mr. Wheeler's words, "one of the grandest natural amphitheaters in the world, famous alike in song and story," the legends of early Indian life hovering about the spot rendering it one of unusual interest. Overlooking the spot is the grand old Mt. Pleasant, while extending from it on either side are plateaux, the whole forming a grand picture of natural beauty.

But to the races there. There was a four days' meeting, with a grand field of horses, and some very close and exciting races, heats and finishes. Yet these are not uncommon in Mr. Wheeler's experience. It was the "racing by natural gas" that proved the great attraction. Lancaster tried the experiment a year ago, and, being then an experiment, it did not attract the best field of horses. Enough was developed, however, to prove the feasibility and practicability of the plan, and this year the best horses, and in large numbers, were there, and the evening sports may be, beyond a doubt, classed as the finest ever indulged in anywhere. The crowds came and filled the coffers of the association. The grand stand was full to overflowing, while the quarterstretch was one sea of anxious, upturned faces.

The horses acted finely, and as shown in the running race, the time was very fast—1:50 and 1:51. In the three-year-old race the first afternoon, Biddy Donovan should have been there, as she could have won the $150 purse "hands down." Ivorine won the 2:24 pace at night in 2:30¾, 2:29½ and 2:25 easily. In the free-for-all pace there was one of the hottest races of the season, resulting in a match race between Dallas, with a record of 2.11¼, and who was distanced in the first heat, and Scioto Girl, driven by Willis Laird. The race was $500 put up on Dallas, to $250 put up on Scioto Girl. This was won by Dallas in the first, second and fifth heats. Time, 2:21¾, 2:21½, 2:22, 2:21½, 2:24¼, Dallas securing first and third heats by only about six inches, but was set back in the third for "pinching" Scioto Girl on the turn. Immediately on the finish another match race was arranged for between the same two horses, the stake being doubled.—Toledo Journal.

Athletics—Continued.

THE GAME OF CRICKET.

The Pacific Club suffered another defeat at the hands of the Burnaby Club on the West End Grounds, Alameda, on Saturday last. This was the "most unkindest" cut of all. The total score of the Pacific eleven was 44, while three members of the opposing team made 97. Hood, of the Burnaby Club, earned a score of 47 or three more than the entire 11 of the Pacifics. The following was the result:

BURNABY.

Webster, l b w., b Theobald	18
Hood, not out	47
Newton, not out	20
Reynolds, Robertson, Bennett, Neish, Chalmers, Dodd, Turnbull.	Did not bat.
Extras	12
Total	97

PACIFIC.

Buckleton, c Dodd, b Newton	3
Hill, st Robertson, b Newton	4
Adam, run out	9
Theobald, c Neish, b Webster	1
Ward, b Webster	13
Howell, b Reynolds	6
Weise, b Reynolds	0
O'Donnell, c Neish, b Reynolds	0
Bryan, b Reynolds	4
Burke, c and b Reynolds	3
Shephard, not out	1
Extras	44
Total	

On Tuesday last two teams representing the bachelors and the benedicts met in a game at the West End grounds. The players were selected from the different clubs. The single men made 124 in two innings against 123 made in one inning by the benedicts.

AT THE OARS.

The Scullers did not make much of a showing in the vicinity of Long Bridge on Sunday last. The majority of the club members were over in Alameda enjoying the hospitality of the Alameda Boat Club.

The first annual high jinks and jollification of the Alameda Boating Club was held last Saturday evening and all day Sunday in the boat house in the estuary. The Alameda boys were not very sparse with their invitations and the result was that many representatives from the Ariel, South End Dolphin, Pioneer and Halcy boating clubs and Oakland Canoe Club, and Corinthian Yacht Club were in attendance. C. C. Brock acted as master of ceremonies. Saturday evening was spent in a very pleasant manner. There were singing, recitations, speeches and music. On Sunday the fun was continued, and at 4 o'clock in the afternoon there was a race of a mile and a half. Two crews composed of members of the Ariel Club and the Alamedas competed. The crews were made up of Barge "Alameda", C. Dennis, bow; H. Terrell, stroke; J. Nyland, aft; C. Bamber, fd.; Paul Kellogg (cox). Barge "Kate": W. W. Crough, bow; C. Pless, stroke; George Fifer, aft; J. Hartman, fd; Bert Jeffries (cox). The Alameda won in 13 minutes. The Kate was four seconds behind.

The new professional crew which we spoke of last Saturday took a trial spin from the South End boat house on Sunday morning. They pull with a clean, strong stroke and after a little longer practice they will certainly make it warm for any other crew on the Coast.

The Lurline Boating and Athletic Club held a high jinks on Sunday afternoon. Too many invitations were issued and the hall was crowded to excess. There was lots of amusement consisting of eating, drinking, athletics and a literary programme. The Lurline Club is gaining its popularity again, and possibly its members may be heard from in some of the coming exhibitions.

THE WHEELMEN.

Eleven members of the Alameda Bicycle Club attended the L. A. W. run on Sunday last. They were N H Foster, Walter Osborne, M Foster, Will Hebbard, Frank Howlett, H Williams, C Conkey, Jesse F Ives. F White, E Bradford, R A Smythe.

We are in receipt of an invitation to attend the first invitation party of the Alameda Bicycle Club, to be held in Harmony Hall, Pam Street, Alameda, on Wednesday evening, Nov 12th.

The Oak Leaf Wheelmen of Stockton, Cal., opened their winter festivities last Saturday evening with one of the ever popular "smokers." The affair took place at the new club rooms in the Masonic Temple. Several members of the Bay City Wheelmen would have ridden up to Stockton had they received their invitations in time.

Through a very natural mistake we last week reported one of the men riding in the open bicycle event at the late field day of the O. A. C. as being a member of the Bay City Wheelmen. Many members of that body would have been glad to have raced at the time but we wish to call attention more particularly to the sad lack of honor in some men, who being expelled member of the B. C. W., yet have not sufficient sense of the fitness of things to stop wearing the uniform of the club which they have disgraced. The Bay City's fortunately have but a few of these "thorns in the flesh" who persist on all occasions in passing as members of the club, and it is only regretted that they should have carried their practice to such an extent as to make a notice in these columns necessary.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

The English Setter Standard.

The English setter is, beyond question, one of the most practical dogs yet known to the sportsman. In the lines of intelligence and beauty, he stands in the front ranks. Owing to the changes which have taken place in the type of this splendid animal, and the universal interest taken in this class, we herewith present the standard as adopted by the new English Setter Club:

ENGLISH SETTER STANDARD.

Head (20).—The scull is of a peculiar character, not so heavy as that of a pointer, and without the furrow and marked prominence of the occipital bone. It is narrow, or of medium width between the ears, and the brows should be raised at a sharp and decided angle from the nose. The nose should be long and with width in harmony with skull, without any fullness under the eyes. In the average dog the length should be four to four and one half inches from the inner corner of the eyes to the end of the nose. Between the point and root of the nose there should be a slight depression, at all events there should be no fullness, the nostrils must be wide apart and large in the openings, and the end of the nose moist and cool. In all setters the end of the nose should be black or dark liver-colored, except that, in whites or lemon and white, a pink nose may be pardoned. The jaws should be exactly equal in length, a "snipe nose" or "pig jaw," as the receding lower one is called, being seriously faulty. The ears should be hung well back and set low, of moderate length and slightly rounded at the point, and without the slightest tendency to prick. The "leather" should be thin and soft, carried closely to the cheeks, so as not to show the inside, and should be clothed with silky hair about two inches in length. The lips are not so full and pendant as those of the pointer, but at their angles there should be a slight fullness, not reaching quite to the extent of hanging. The eyes must be full of animation, and the width between them should be in proportion to the size of the head and face, so that the eyes should be equally free from a close set, as well as a wide staring expression, and they should be set with their angles straight across. The best color is a rich brown.

Neck (6). The importance of a long, lean neck has not been fully realized until quite recently, or, at all events, there has not been sufficient stress laid upon the point. Length of neck tends to high-headedness, and permits the dog to feel about for scent over a greater amount of space than he could with a short neck. Besides it adds greatly to his style, and to the ease and freedom of action of the shoulders and forelegs. The setter's neck has not the rounded muscularity of the pointer's. Being considerably thinner, it should gradually deepen as it approaches the shoulders, joining them in a graceful curve. It must not be throaty, though the skin is loose.

Shoulders and Chest (15).—The shoulders should be formed so as to permit of perfect freedom of action to the foreleg moving from the shoulder joint, giving a long, extended stride. The shoulder blades should be deep and wide, and sloping well forward. The upper arm should of good length from point of shoulder to elbows, and the elbows well let down and at such an angle as will bring the legs fairly under the dog, A leg formation that is straight from point of shoulder to foot is objectionable, and more so one with the excessive angle throwing the leg too far back under body of dog. A medium angle from point of shoulder to elbow is the correct form. Mr Laverack was said to be fond of a setter with well-sprung ribs back to the shoulder, a feature all right, provided that they had depth also, but he laid so much stress upon this point in his selection of dogs for stock purposes, that his breed was not only round in the barrel, but the width was carried forward between the shoulders, a very objectionable form, as also is the deep, thin chest, with light spring of the ribs behind the shoulder, known as "slab-sided." Public field trials have demonstrated that there should be as much volume of the chest as it is possible to obtain, distributed in such a manner as not to interfere with the shoulder of the dog, or restrict his pace in any way, that is, the chest between the shoulders should be thin enough to lie flat and move with freedom. Back of the play of shoulders, the ribs should spring gradually to the middle, and then gradually lessen to the back rib. The greater the length from the shoulder to the last rib, and the greater the depth of the last rib, the better. The drop in chest should be just back of the elbows, the chest sloping from this point upward toward the neck, permitting the dog to carry his neck and head up with more ease. Great depth between the shoulders is objectionable, since it puts too much weight on the shoulders and forelegs. The weight should be distributed as evenly as possible between the forward and hind parts; the tendency is too much forward. By bringing the greater volume of chest back of the shoulders, the fore parts are relieved of weight that should be, in part, supported by the hind parts. A longer dog than the type described in former standards is desirable, but with the additional length and weight in the middle, there will follow a tendency to "sway-back" which is to be met with a slight arch or additional strength in the back.

Back and Loins (10) —It has been the custom of some writers to treat of a dog's loin as his back, we make the distinction between it and the back as extending from the last rib to the hips. These two parts are to be considered separately, since a dog may be good in one and weak in the other. The loin should be strong and of moderate length. There is such a thing, however, as a dog having too much loin. Every ounce more than he needs is so much dead weight. In estimating the quality of a dog's loin, due regard must be paid to his condition, as a fat dog with naturally a poor loin, appears exceedingly good in this particular, while a dog with naturally a good loin, but in poor condition will appear deficient. An arched loin is desirable, but not to the extent of being "roached" or "wheel-backed." The back should be strong at its juncture with the loin, a slight arch not objectionable, and should slope upward with a slight rise, to the point of the shoulders. Any "sway" or "drop" back of the shoulders is a sign of weakness.

Quarters and Stifles (8). The quarters should be broad across the top, the hip bones slightly prominent and wide apart with good length from them to point of bones, at root of tail; the quarters should be well muscled; the stifles should be well bent—excessive bend, although fashionable for a time, is not desirable. A slight bow at stifles is a point of merit, as the feet in such cases stand squarely under the dog and are moved forward in a straight line, the slight bow serving as well to keep the stifles and legs easily away from the body when the quarters are brought forward.

Legs, Elbows, Hocks (8) and Feet (7) (15).—The elbows and toes should have the same direction, and should point straight from front to rear, and if not straight the "pigeon-toe" or in-turned leg is less objectionable than the out-turn, in which the elbow is confined by its close attachment to the ribs.

The upper arm should be flat, muscular, strong and bone fully developed, the muscle should feel hard and should be devoid of flabbiness. The forelegs should be flat and taper gradually from elbow to pastern joint; it should feel hard and flinty, with no looseness of skin. The pasterns should be short and strong and nearly round. The slope from pastern joint to foot should deviate but slightly from the perpendicular. The hind legs should be muscular, with wide thighs and wide, flat hocks and plenty of bone. The lower thigh should have fair development of muscle. The feet deserve careful attention, as upon their capability of standing wear and tear depends the utility of the dog. Two types are recognized, the round cat foot and the long hare foot. Either type is good, but the cat foot is preferred. The feet should be close and strong and well padded, with toes well arched and clothed with hair, but it should be short and thick.

Stern (5).—The stern or tail should be carried straight, or with slight curve upward, either slightly above the middle of the back, or down. There should be no curl, it should taper to a fine end, and reach the hocks. The feather must be composed of straight, silkey hairs, falling loosely as a fringe when the tail is raised and tapering to the point of the tail. There must be no "bushiness" whatever.

Coat and feather (5).—The coat should be flat, with an absence of wave or curl. By this is meant a full coat such as characterizes the true English setter. The feather should be moderate, and that on the back of the legs should be thin and regular.

Color and markings (4).—Too much stress must not be put upon color, for the color in this breed is largely a matter of fancy. Some prefer black and white, or black, white or tan; others, lemon and white, and others again liver and white. Being so largely a matter of fancy, it should be dealt with gently. The colors now recognized are as follows: Blue belton, black, white and tan, black and white, lemon or orange and white, lemon or orange belton, liver and white, liver belton.

Symmetry.—After examining a dog critically in all his points there yet remains to be estimated the harmony of the whole. The dog may have a good head, shoulders and quarters when looked at simply as single points, but when they are looked at collectively, as a part of one dog, they may be sadly out of harmony with each other. The head may be a good head seen simply as a head, but it may be too large or too small for the dog. The foreparts may be good in themselves, but too heavy or too light for the hindparts or the rest of the dog. It is harmony of all the points which constitutes the symmetry and quality, and these points, in their proper relation to each other, go a long way toward what constitutes the beauty and servicable qualities of the dog.

SCALE OF POINTS.

	Value.
Head	20
Neck	6
Shoulders	15
Back and loin	10
Quarters and stifles	8
Legs, elbows, hocks and feet	15
Stern	5
Coat and feather	5
Color and markings	4
Symmetry	12

Objecting to Standards.

SAN FRANCISCO.

EDITOR BREEDER AND SPORTSMAN:—I am sure that I speak for a large number of sportsmen aside from myself when I ask for information regarding the standards as outlined by the several clubs of the country representing the high courts, as it were, for the various breeds of dogs, of which these organizations are the accredited heads.

Take as a sample the standard just promulgated by the English Setter Club. It illustrates my objections to standards generally in an admirable manner.

This standard, I am informed, was chosen because it most nearly represents the consensus of opinion of the leading English Setter men of the country. We are told that great care has been exercised in its formation, yet to me it represents but little of value to any one who honestly depends upon it for information. It is too elastic, too general to be of any practical value as a standard by which to gauge or measure the perfections or imperfections of a dog. Its terms, where it seems to me, they should be specific, are provokingly general. In fact so general, that I am at a loss to see how it can be of any particular use or value for the purposes which standards are supposed to serve.

To my mind, any standard falls short of its purpose which will not permit a reasonably intelligent person to take it, and by applying its suggestions to any one of the class of dogs which it purports to measure, arrive at a fair judgment of the dog's merits and demerits. Can this be done from the English Setter standard as promulgated by Secretary Ohl, for the consideration of the membership of the club?

I, for one, do not believe it can, for the reason that much that is given is so indefinite as to be of little value, and again the exceptions to the supposed rule, are almost, if not quite as numerous and weighty as the rule itself.

In describing the head largely taken from "Stonehenge," the only approach to a rule is that "in the average dog the length (of nose) should be four to four and one-half inches from the inner corner of the eyes to the end of the nose." Now if the nose of an average dog be permitted to vary one-half inch in length from the inner corner of the eye, how much variation shall be considered admissible in a larger or smaller dog; especially is the question problematical when we are given neither the weight or measurement for the average dog. Great stress is laid upon the neck. We are informed that it should be long and lean, and are told that "length of neck tends to high-headedness, and permits the dog to feel about for scent over a greater amount of space than he could with a short neck" The latter portion of this sentence, relative to the use of neck, seems to me to be the climax of absurdity. In my ignorance, I had never supposed that the length of a dog's neck controlled the keenness of his scent.

So through the whole standard. The writer evidently intended his description to be general—very much so and doubtless the thought that it should serve for more than a general purpose, never entered his mind. Now in all candor we ask, Cannot a more specific standard be formulated? Must we still be left entirely to the special idea of a judge to determine as to the merits of the dogs on the bench?

Is there not some scale of weights and measures which may be given out as a standard for the breed? Must it all be left to symmetry? Is not some standard of form better than others? If so, what is the best by measurement?

Horsemen have ideal standards, taken perhaps, from some choice animals. A good horseman never buys an animal without first placing the tape line on them, not as to one point alone, but several.

Cannot a similar scale be adopted for a given breed of dogs? If not, why not? INQUIRER.

The question is an old one and probably presents a subject over which there has been much discussion and the end seems afar off.

It would appear to the critical observer that nature seldom makes a perfect animal, and it has been found that the consensus of opinion of large bodies of men, made up, as it of necessity must be, of rules and expressions representing concessions from each individual, represents only partially the ideal of any one member. Each man has his own opinion. His convictions of what is best are usually firm, and if tinctured with prejudice, as we all more or less are, they may be said to bend, under protest, but immediately fly back to the former position, being at best subject to change by the slow process of education by experience only.

The standard of dogs of every breed are changing constantly. What was considered the typical dog a few years ago in the English Setter breed, as well as that of other breeds, has changed—advanced. The judging of a dog is not unlike the judging of a picture, in that the effect of the picture or animal as a whole, is considered. Types of beauty vary, even in different sections of our own country, at the same period. To note how much the style has changed since a few decades of the past, one has but to look upon the ideals of those times. By looking into the old sporting journals, and noting the sketches presented of ideal dogs of those times, they are found so different to the types of to day of the same class, as to appear to bear but little relation to them. Nature makes the dog, and by systematic breeding is continually making changes for the better. If it were possible to formulate strict measurements, they would be found to be of but little service, as they would last but for a short period.

Coursing at Great Bend.

The fifth annual meeting of the American Coursing Club came off at Great Bend, Kansas, on the 22d, 23rd and 24th of last month. The meeting was eminently satisfactory in every way. Mr. Joseph Holloway of Denver, discharged the duties of judge to the general satisfaction of all concerned. The dogs entered, presented perhaps, as fine quality as the greyhounds of the day possess, and the fact that numerous rabbits made a successful dash for liberty proves that the swiftest rabbits, on their native grounds, with 50 or 60 yards start, can escape from the best greyhounds. They are admittedly much swifter than the English hare. Score one for the American Jack, he stands a winner over them all.

The management is spoken of as being of the very first order, the promptness and efficiency with which the programme was carried out, securing much of the pleasure of the occasion.

There was found to be a balance in the treasury after paying all bills.

SUMMARY.

Great Bend, Kansas, Oct. 21st.—The summary of the racing in the American Field Cup Stake race as follows:

I.

Lowe & Page's brindle dog, King Lear (Lord Neversettle—Partera) beat Mr. J. H. Watson's fawn bitch, Fly Time (Briton Still—Hay Time.)

D. C. Luse's white and brindle dog, Lord McPherson (Trales—Dick's Darling) beat Rockwood-Landseer Kennel's white and black bitch, Nettlefield (Dick Day—Camerone).

Lowe & Page's brindle and white bitch, Liberty (Lord Neversettle—Partera) beat Mannion & Halladay's black and white dog, Lord Moses Glendyne (Trales—Lady Graham Glendyne).

M. E. Allison's white and brindle dog, Major Glendyne (Trales—Little Lady Glendyne) beat Emporia Kennel's brindle dog, Deck (Palmer—Blue Queen).

Rockwood-Landseer Kennel's brindle and white dog, Norwegian (Jester—Bit of Fashion) beat Lowe & Page's brindle dog Line of Luck (Lord Neversettle Partera),

Lowe & Page's white and brindle bitch, Little Climber (Lord Neversettle—Partera) beat Rookwood-Landseer Kennel's brindle and white bitch Belle of Eltham (Jester—Bit of Fashion).

D. C. Luse's brindle dog Lancaster (Trales—Dick's Darling) beat Dr. L. G Tandy's white and brindle bitch Miss Beatrice (Sir Charles—Lady Rebecca).

D. C. Luse's black bitch Lady In Black (Trales—Dick's Darling) beat D. N Heizer's white and black bitch Lady Jane (Trales—Lady Graham Glendyne).

Lowe & Page's brindle bitch Lancashire Lass (Lord Neversettle—Partera) beat A. Haigh's white dog Master Glendyne (Tralee—Little Lady Glendyne).

Lowe & Page's brindle dog Lord Neverstill (Lord Neversettle—Partera) beat Blemton-Hollywood Kennel's brindle bitch Minnie Staton (Pinkerton—Madeline).

A. C. Schermerhorn's white and brindle bitch Belle (Trales—Blue Bell) beat D. N. Hetzer's white bitch Snowball (Trales—Lady Millie Glendyne).

W. W. Carney's white and black bitch Lady Graham Glendyne (Jester—Lady Glendyne) beat Rookwood-Landseer Kennel's brindle bitch Verdure Clad (Greentick—Cotillion).

D. C. Luse's fawn bitch Lady Barton (Trales—Dick's Darling) beat Emporia Kennels fawn dog Cute (Palmer—Blue Queen).

Dr. S. J Shaw's white and brindle bitch Dollie (Tralee—Blue Belle) beat A. Haigh's fawn dog Nip (——— — ———,.

Lowe & Page's brindle dog Master Peter (Lord Neversettle—Partera) beat L. D. Brougher's fawn dog Barney, Jr. (——— —Minute).

D. C. Luse's fawn dog Yonder He Goes (Trales—Arthur's Gipsy) beat G. N. Moses' white and brindle dog Tralee (Wandering Tour—Little Emily III).

II.

Lord McPherson beat King Lear. Liberty beat Major Glendyne, Little Climber beat Norwegian. Lady In Black beat Lord Neverstill. Belle beat Lady Graham Glendyne. Lancashire Lass beat Lancaster. Lady Barton beat Dollie. Yonder He Goes beat Master Peter.

III.

Lord McPherson beat Liberty. Lady In Black beat Little Climber. Yonder He Goes beat Lancashire Lass (withdrawn). Lady Barton beat Belle.

Lord McPherson, Lady In Black, Yonder He Goes and Lady Barton divided first, second, third and fourth.

SUMMARY.

Grest Bend, Kan.. October 21.—Great Bend Derby. For 16 or more dogs 18 months old or younger. The records of the winners are as follows:

I.

Emporia Kennels' black bitch, Girl's Favorite (Trales—Beeste Lee), beat Russell & Nichol's black and white bitch, Busy Bee (Spring—Alas).

Emporia Kennels' brindle dog, Denmark (Bobolink—Meta), beat D. C. Luse's white dog, Lieutenant Leo (Trales—Dick's Darling).
Rookwood-Landseer Kennels' brindle dog, Surplus (Master Rich——), beat Emporia Kennels' brindle dog, Ajax (Bobolink—Meta)
Russell & Nichol's black and white dog, Bartender (Spring—Alas), beat Emporia Kennels' brindle dog, Maddox (Bobolink—Meta).
D. C. Luse's red dog, Lanaradzo (Trales—Dick's Darling), beat Rookwood-Landseer Kennels' red and white bitch, Dewlap (Sport—Queen).

II.

Denmark beat Girl's Favorite. Bartender beat Surplus. Lanaradzo a bye.

III.

Denmark beat Lanaradzo. Bartender a bye.

IV.

Denmark beat Bartender and won first.
Denmark, 1st; Bartender, 2d; Lanaradzo, 3d; Girl's Favorite, 4th.

Visits.

Mr. Geo. W. Peltiers (Tuscarora Nev.) Gordon Setter bitch Nanon (12145) to Whip (11255).

Nanon is from the kennel of Mr. F. M. Bennett, Westfield, N. J. and Whip from Mr. Harry Malcolms, Baltimore Md., Kennel.

This union should produce some remarkably fine Gordons.

A Sagacious Collie.

On Saturday forenoon, while a gentleman was being driven in his private carriage past the Cross, Paisley, a little girl ran in front of the horse and would inevitably have been seriously injured but for the sagacity of a large collie dog which was running behind the carriage and saw the danger. The animal seized the child's dress and actually swung the little one round about in his efforts to extricate her from her perilous position. She was knocked down, but was not much hurt.—Pall Mall Gazette.

Mr. J. C. Maynard of San Mateo, has recently purchased three superior Irish setters, but our informant was unable to give us their pedigree.

The greyhounds seem to run fast enough to capture, not only the rabbits but also that more elusive and captious game—public opinion.

Mr. Frank Dole of New Haven, Conn., recently purchased the Bulldog Harper from Mr. Lawyer of England. Mr. Dole stands in the front rank as a breeder of this class of dogs.

Whippet racing is becoming more of a feature in doggy exhibitions. These events at the Canadian Show, created a great amount of interest, 100 yards being run in 6¼ sec, and 200 in 12¾ sec.

Two mastiff pups are advertised in our kennel column by Mr. J. B. Martin, of 1323 Page street, this city. They are good specimens of the breed, and persons desiring one of the large breeds of dogs should certainly see these pups.

The last few days of cloudy weather has rendered the work for the dogs much better than it has been for some weeks past. The birds lay better and the dogs work better. Such weather does much to render pleasant, the field work all round.

The twenty second annual great national poultry, pigeon and rabbit show, will be held at the Crystal Palace on the 17, 18, 19 and 20. The catalogue, containing mention of entries, rules, prizes, etc, makes quite a book containing nearly 50 pages. They have shows over there, as Uncle Rube, would say: "Well I vum! Them Britishers do go a heap on such things. Don't they?"

Anent the heated controversy which is being waged by some of our dog fanciers and breeders in the columns of some of our leading sporting journals, we would ask them to pause and consider this question: Which has the more irascible temper, the dog or his master? We will lay odds on the latter and appeal to the records.

The attention of owners of fox-terrier bitches is called to the advertisement of Blemton Shiner in the stud: this dog was imported by Mr. J. B. Martin, 1323 Page street, this city, last summer from the well known kennels of Mr. August Belmont. Shiner is exceedingly well bred, and combines the blood of the best winning dogs of the day; he is a very handsome dog, and is thoroughly game, and goes to ground perfectly.

In the judging of the St. Bernard class at Oldham, a Mrs. Sorby thought the Judge was going to give her dog third prize. Taking umbrage at this supposed slight or misjudgment of her dog she flounced out of the ring, taking her dog with her. She was much mortified to learn subsequently that it was the Judge's intention to give her pet the first prize.

This is not the first time that a hasty temper has spoiled a good thing.

Mr. Washington sees Mr. Covert in a recent letter and goes him one better. In other words he calls his hand, or more accurately his dog. Now we shall see what the outcome of all this blood red Irish setter war is any way. But will the method proposed be satisfactory? Neither of the gentlemen's dogs will gain anything in the opinion of the sporting fraternity by such a test. The only way to reach a settlement, it would seem, that would be fair and equitable, would be to judge by the A. K. C. records. These cannot be made in a day. They must be properly won under the rules of the club. Ot one thing we may be assured and that is that the Irish setter is being brought before the public for all he is worth. Let her hum, gentlemen, so long as the dogs are not injured, no serious harm can result.

Mr. G. Valensin, the well known horse fancier and breeder, informs us that he purchased, on his recent Eastern visit, "the finest foxterrier in the country." The dog has not arrived yet, but when he comes Mr. Valensin promises to show us a pedigree which will certify to the royal family of his dog.

The preliminaries for the coursing event at Merced are progressing finely, and there is no longer a doubt but that the sport on that occasion will be of a high order. A number of dogs are looked for from outside the State, and they should be given a warm and cordial greeting. It is but right and proper that more than ordinary courtesy should be extended to all those who may come from a great distance to participate in this meet. A journey from the east of the Rockies to the coast, even in these latter days is not one unalloyed round of pleasure, and our guests should be made to feel that we appreciate their coming. The party from this city will leave for Merced, on the 17th, and one of the principal events will open up the meeting on the following day. It is expected that a large number will go from here to participate in the sport.

The California Kennel Club will hold its regular monthly meeting at No. 436 Montgomery St. next Wednesday evening. The club intends holding a bench show next spring, possibly in April, and is already in communication with several well known Eastern judges

The club is endeavoring to have the Southern California Kennel Club hold their bench show either one week before its show, or one week after and also to have the same judge officiate at both shows. If these arrangements can be made, it will be of great advantage to the owners of dogs.

While on this subject, I would suggest that a bench show circuit be established in this State, and for that purpose the owners of dogs in the principle cities should get together and organize.

THE GUN.

Deer Hunting Near Salinas.

Salinas, Cal.

Editor Breeder and Sportsman:—The game abounds within a radius of twenty five miles of this point, in great quantities. All of the game birds, now in season, are especially plentiful. The quail are to be found in every direction. All of the fields and highways are alive with them They appear as yet to have been but little hunted. Last week it was my good fortune to have an outing of some three days. The weather, it is true, during the middle of the day was rather warm for effective work, but we found by taking advantage of the early morning hours, resting during the heat of the day, and renewing our sport from about 3 o'clock P. M. until nightfall, that we could get all the sport that any reasonable man could ask for, and that too in a most comfortable and pleasant way.

Our dogs worked splendidly, and we succeeded in making some fine scores at quail.

The mallard ducks also furnished us with some good shooting, upwards of two dozen falling to our guns. Perhaps the most pleasurable hunting was for deer, which abound in the mountains, but a scant score of miles from here.

On Friday morning we found ourselves ready for a still hunt, and cautiously strode away from camp into the mountains.

It was about sunrise when I first found myself away from my companions and alone with my Winchester, anxiously awaiting any sign which might indicate the presence of this royal game.

I had proceeded from camp scarcely a mile when looking up a gulch to my right, where it debauched, forming a little pocket-like valley, I caught sight of a beautiful little drove of fine deer. They were some considerable distance from me, and were quietly browsing about on the foliage and tufts of grass which dotted the scantily clothed opening. It required some moments thought and investigation to ascertain the direction of the moving air, for there was scarcely a well defined current.

Presently I was happily assured that the wind was in my favor from my present position, and I cautiously began to approach the deer, under shelter of the rocks and shrubs which lay between me and the drove. The time taken up in my efforts to secure an advantageous shot could not have exceeded a few minutes at most, but it really seemed hours. After climbing the rugged side of the gulch and pausing to rest a moment and note what effect, if any, my movements had had on the game, I was gratified to see them still quiet and leisurely stepping about, all unconscious of my presence.

Another survey was now taken. Can I reach yonder point where the rooky ledge projects for some distance into the valley? was the question which ran through my mind. I finally decide that I cannot. The risk of scaring the game would be too great. Should they once become startled from any cause, they would be off like the wind.

I determined that the more prudent plan would he to lie still in my present position, and if the game should show signs of uneasiness to then risk a shot, long as the distance was, rather than take the chances of scaring them by attempting to approach more near them.

Thus I lay calculating for some moments, my eyes fastened on the graceful creatures. It was a pretty sight. The drove was composed of a full grown buck, that carried a beautiful pair of horns, well pronged; a doe and fawn and two yearlings, buck and doe.

The distance from my position, behind some stunted shrubs, was fully 300 yards, and I had carefully drawn a head on the old buck time and again, the while wondering if I should press the trigger whether he would fall or I should be doomed to see the whole drove dart away into the brush on either hand. I must have lain for ten minutes thus contemplating them, when the old buck threw up his head and sniffed the air, looking in the opposite direction. The whole drove moved back of him and toward me, the head of each raised expectantly in the air. They will come my way, said with the thought I assumed a position to be ready for a running shot, thinking that they would most likely pass down the gulch to my right.

A moment more, and the buck advances a few paces and stamps his feet as if in challenge to some hidden foe in the thicket beyond. He made a beautiful picture with head half turned, so as to present a quartering view, the very ideal representation of alertness and latent power. The next instant he turns, and at a swinging trot leads the drove down the ravine toward my right. I quickly adjust my sim and await their approach. They come on within easy range, and as I am about to pull trigger they change their course to the left and present their broad sides at a lesser distance, perhaps not over sixty yards, when I fire and see the old buck throw up his head and bound into the air. I know that I have hit him hard, but I pull again upon him as he strikes the ground, when I have the satisfaction of seeing him roll over with scarcely a struggle. The others by a bound have reached the brush and disappeared, and all is as still again as when the drove stood but a moment before in the valley below. I descend to my prize, and find that both balls have passed clean through the deer and that he is quite dead, one shot having passed through near the heart, while the other is a trifle too low to do immediate execution. It was a beautiful specimen, weighing when dressed about 200 pounds. This concluded my morning hunt and marked my first as well as last success at deer hunting on my trip, but it was enough to satisfy the most ravenous hunter's desire. The picture of that morning; the deer in the valley and that successful shot, will serve as a bright and satisfying picture for many a day to come. My companions were equally as successful as I during the trip, and we all have cause to remember our hunt with feelings of peculiar satisfaction.

Winchester.

A Michigan Woodcock Hunt.

Kalamazoo, Mich.

Editor Breeder and Sportsman:—The American Woodcock is found in the eastern part of North America, north to British possessions, west to Dakota, Nebraska, Kansas, etc. As will be seen by this habitat, the long bill whistler is practically confined to territory in the Mississippi Valley eastward. Sportsmen residing in the west cannot have the pleasure of gunning for this game bird. Thinking that your readers would be interested in a sketch of a day's sport in Michigan, this article is contributed.

On a bright morning in early October three of us started at the early hour of five A. M. for a well known ground several miles distant, and at the hour of six we had provided for our team at a neighboring farm, and stood ready with dogs and guns for the work and pleasure of the day. Henry started in above, accompanied by his white setter Jim, leaving Percy and the writer to hunt with the Gordon, Don, over which we had so frequently shot in the past. For a time we had no success, and twice heard Henry shoot ere a sign of game appeared to us, but at a time when we were beginning to consider the advisability of changing our cover, Don suddenly began to road with head well up. There was a stiff wind blowing, and of course the scent was borne from a distance, but after three or four rods of careful and slow progress, a staunch point was made at the edge of a small stream. Percy motioned me to move forward, which I did, and had the pleasure of the first shot that, contrary to the rule, was successful. Less than ten rods beyond another bird arose and my companion scored to our credit; at the report a hustler got up wild and a goose egg was oredited to my slate.

At a place where a clearing had been made in the open bass-wood and elm woods, a heavy growth of rank weeds had occurred, forming a first class protection for quail, but one would never dream of finding a woodcock in such a situation; however, at the very edge of the patch the Gordon became rigid, and we looked at one another painfully aware that there was nothing there for us, as we only thought of bob-white in the cover and the law prevented our bagging them. Nevertheless, we moved forward to patronize the dog's faithfulness, thinking to merely aim at the short-bills as the flock arose; but instead of the bevy of quails two cocks whistled up almost simultaneously, of which one fell to my gun, but Percy failed to score as he shot too soon His bird dropped apparently unhurt on the farther side of a small alder and not more than four rods from its first position. So suddenly did the birds settle that no opportunity was given to use the second barrel. Don unaware of the proximity of the bird was unable to scent it, as the wind was a regular gale and he was not directly in the track, and we flushed it walking abreast when my companion brought it down.

The wind was now too severe for hunting, and after a half hour's useless attempt at flushing we returned to the team where we found Henry. We ate an early dinner and amused ourselves with the primitive game of horse-shoe quoits, during which we learned that a young farm hand could give us counts and distance and still beat us badly. By noon the wind greatly moderated and we once more took up the more entertaining occupation of shooting. We visited a swale in a distant woods which was surrounded by a dense protecting wall of thick undergrush and small trees. The barrier was next to impenetrable and it was difficult for man or beast to work his way through. More as a bother to the others, I insisted on going through it to the free ground beyond and was blackguarded for my contrariness, but no sooner was the act accomplished and the whistle of wings heard than the others floundered through in a hurry and we had no reason to regret our exertions. The birds lay remarkably well only one flushing improperly and that one when I was entering.

Once inside, the freedom from the wind was noticeable. The dogs were on their best behavior and gave a grand exhibit of their training and breeding. We took nine birds within thirty minutes and with very little effort and in fourteen shots, while one other bird, apparently severely wounded and seen to fall, was hunted for by all hands and the dogs in vain. It is one of the most surprising things in my experience as a gunner, how a single bird can fall, apparently in plain sight and undoubtedly struggle to get away and yet elude the vigilence of hunters and dogs, but this experience is invariable with all who hunt to any extent.

We next left the woodcock park, as we called it, on the opposite side where the escape was comparatively easy, and took our course along the banks of a small creek covered on either side with a dense growth of willow, alder and alder, interspersed with an occasional larger one; here we were fairly successful, but the severe work of making their way through the heavy borders of the banks quickly told on the dogs. Jim soon absolutely refused to go into the cover and was tired out in even following his master: he was an old dog and had not been used to any extent during the

fall, and was very fat. Don was more willing to work, but his coat being black we could with great difficulty see him, and one time when we had gone quite a ways Percy had to go back for him, when he found Don on a staunch point in a very somber place. Tying a large white handkerchief around his neck gave a vast percentage in our favor. We secured a few birds along this route, although our misses were far in the lead of our scores, owing to the nature of the cover. The birds were in no wise wild, and would repeatedly fly but a very short distance or across the stream, but the brush was so thick and the birds flew off, offering but a poor show, there was but little opportunity to greatly increase our score.

We now marshalled our forces, and finding that we had twenty-four woodcock between us, agreed to discontinue as it was getting well along in an October afternoon, and Percy was about out of No. 11 cartridges. In two hours we were back home in the city, having been gone just twelve hours and a half. EUGENE.

Birds as Bonnet Ornaments.

It is said that India is fast becoming depleted to its beautiful birds, so great is the demand for them as ornaments for ladies' bonnets.

A look into the milliner's windows where these goods are displayed for sale, will leave no doubt of the truth of this statement. Thus the vanity of woman is causing wholesale destruction of one of God's most beautiful forms of expression.

From the humane point of view the habit is inexcusable. If properly considered for a moment, it will cause a blush of shame to mantle the brow of every fair one who may be instrumental in encouraging this worse than useless destruction of the beautiful birds. From the dainty little humming bird which reflects the rainbow's tints from its tiny wings as it moves with lightening speed and matchless grace, or hovers at the threshold of the flowers to the golden pheasant of the tropic woods, this insatiable avarice of vanity runs. The oriole—those murmurs of music and flashes of gold—the little sun bird, the wings of which reflect a thousand ever changing tints of color indescribable; the paddy bird, the finches and the roller bird all fall under the murderous demand of these fair autocrats of fashion.

Many of the efforts made to attract attention only succeed in arousing feelings of disgust. The cold glittering eye of the pheasant, despite its beautiful plumage, is enough to make the cold chills creep over one It invariably has that effect upon me and this same feeling is produced by looking at the unnatural position in which the birds are necessarily placed

The object of every effort, in whatever line, should be and is properly measured by the effect produced.

Nature after all, notwithstanding her many defects, is the only true and perfect artist if we may so use the term. Man, whether with brush or chisel and mallet, can only hope to produce a subject, the appearance of which may cause an effect in the mind of the beholder, similar in kind to that experienced when looking upon the natural or original object intended to be represented.

What would be thought of an artist who would paint a deer, I care not how cleverly, with the village church spires and the farmer boy driving the cattle home over the hills as a background? No artist could be induced to paint so inartistic a subject. The deer, to appear at its best, must be made to appear within its natural environments. The sequestered woodland lake, half hidden by clustering boughs and drooping vine; the lily by the brook, or the woodland violet, reflecting the tintings of the summer sky from its home, nestled among the ferns and grasses of some moss-grown rocky glen, are beautiful, but lose more than half their charms when removed from their natural surroundings and presented in any other company.

Birds as ornaments are inartistic, and we much question the taste of any who may choose them as such. But we are aware that this will not deter them being worn as long as fashion demands them The better plan would be for the countries of the South to place a heavy prohibitive tax upon the export of their skins and feathers.

The Country Club.

The Country Club of this city, which have their preserves in this and Marin County, have just issued a code of rules governing the affairs of the club [illegible] to be very full, and provide for all emergencies [illegible] necessary to be considered in building up and [illegible] the welfare of the club. Below we give a list of the gentlemen composing the organization.

Officers—President, Frederick R. Webster; vice-President, Austin C. Tubbs; Secretary and Treasurer—J M Quay.

Directors—Frederick R. Webster, Austin C. Tubbs, J. M. Quay, Ramon E Wilson, Clinton E. Worden.

List of members, September, 1890—John M. Adams, John De Witt Atlen, Harry Babcock, William H. L. Barnes, Gordon Blanding, William B. Bourn, Nathaniel J. Brittan, Emile A. Bruguiere, James K. Byrne, Ed L. Bosqui, Spencer C. Buckbee, Evan J. Coleman, James V. Coleman, George Crocker, Walter E Dean, Edgar J De Pue, Peter J. Donahue, Charles P. Eells, Thomas Ewing John G. Follansbee, Arthur W. Foster, E F. Gerald, Daniel B. Gillette, Jr., Joseph D. Grant, Robert R. Grayson, Louis T. Haggin, Henry E Hall, Alexander Hamilton John Hays Hammond, Richard P. Hammond, Robert Harrison, J. Downey Harvey, Charles H. Haswell Jr., William R. Hearst, Horace L. Hill, Wm. E. Holloway, Charles Josselyn, Andrew Jackson, Homer S. King, W. S. Kittle, Eusebius J. Molera, Daniel T. Murphy, Ward McAllister Jr, Frank McMullen, W. C. Murdock, Walter S. Newhall, Charles Page, Louis B. Parrott, Theodore F. Payne, James D. Phelan, Horace G. Platt, Edward F. The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, 7s, 6d; postage, 6d extra. Published by CHARLES LANCASTER, 151 New Bond Street London, W.

RIO VISTA, Nov. 1, 1890.

SPORTING EDITOR, BREEDER AND SPORTSMAN:—What is necessary to be done to prevent hunting and trespassing on ones land according to law? Is it sufficient to have notices posted or does one have to have their fence complete? Part of our fences were washed away last winter by the flood. Is it necessery to have the fences repaired completely before we can prosecute according to law?

Please answer the above questions in your query column, and oblige, A SUBSCRIBER.

In the absence of the local statue applying to the subject, we should say that ownership is the only requisite necessary to maintain an action for trespass. Fences, from the ancient time when they were maintained as walls of defense against the attacks of enemies, have long since deteriorated into matters of convenience and ornament only.

Posting notices is only a friendly means of warning to all trespassers, that the aid of the law will be invoked to punish them, if they presist in coming on the land of another without permission.

An English company, with a capital of £250,000, has been organized for the purpose of controlling and manufacturing Mr. Giffard's new gun.

Now that the season for ducks has fairly been opened up, much of genuine sport is anticipated by our gunners. Mallards are said to be unusually plentiful, and the shooting generally of a first class order.

Shooting and Fishing states that 477 persons were arrested for violating the game laws of New York last year. Of these 296 were convicted, their fines aggregating $7,229.56. Many of the other cases are still pending.

The Shooting Times gives an account of a deer being chased by a locomotive, and when jumping finally from the track, killed by a snap shot from the front of the engine. The train was brought to a stand and the deer secured.

Mr. F. G. Stewart had a splendid turn in the mountains below Salinas last week, and was fortunate in securing a fine buck.

"It was most provoking," said Mr. Stewart, "when armed only with a Winchester, to have the quail fluttering up all about me in great numbers." Mr. Stewart says that there is any quantity of game in that region, both for light and heavy shooting.

The Pacific Coast Field Trials Club will hold its annual event on the 19th to 26th of January inclusive. Twenty-six entries for the Derby stakes have been made. A large number is indicated for the all-age stakes. The interest is increasing.

At a recent meeting of the Executive Committee of the club R. T. Vanderwort, D. M. Pyle and N C. Nelson, were elected Judges. It is expected that this event will exceed all former ones of a like nature, held on the coast.

Along the banks of the Sabine river, which flows along the boundary line of Louisiana and Texas into the Gulf of Mexico, are to be found a number of shell mounds, among which are to be found indications that the Aborigines were good anglers. Much of interesting data is to be collected in this region relative to the early Spanish and Indian settlements. The crude stone bake oven, on which they were wont to prepare their food, from the oyster and shell fish, are to be found in these mounds.

A dispatch from Eugene, Oregon, tells of the fatal shooting of a man there while out hunting. He was fired upon and killed by his companion, who was under the impression that his friend was a deer coming through the thicket. It seems worse than useless to draw the moral lesson from such carelessness. It may not be such carelessnees as would lay one liable to the law, yet in a moral sense such certainly cannot escape condemnation. Hunters should always have a knowledge of the object of their aim, sufficient at least, to distinguish the brute from the human.

The new law governing quail shooting in Massachusetts, which places the date of the open season at September 15th, has, as might have been expected, proven to be far too early. The birds were found to be not more than half grown at that date, and only awoke feelings of disgust in the minds of sportsmen who attempted an outing at that time. The 15th or 20th of October is the earliest date at which the birds may be found matured—and this, too, in considering early broods Late broods will even then be found unfit for sport or the table. Give both the quail and grouse a chance to take wing before shooting them.

The *Whatcom Reveille* of Washington is responeible for the report that a hundred or more hunters in the employ of a Denver firm are now in the Olympic mountains, waiting for the snow to drive the elk down from the high and well nigh inaccessible peaks, where they now are, in order to commence a wholesale slaughter of these rare animals, for the purpose of securing their heads and antlers The bodies will be allowed to decay where slain. The traffic in elk heads is great, the price of a good head ranging from $75 to $100. It would seem that the State authorities would be authorized in stopping this contemplated butchery. It should by all means be done. Such a band of cut-throats should not be allowed to carry on their nefarious work of destruction.

Lillian H. Smith, the California girl champion rifle shot of the world, gave a glass ball exhibition shoot at the exposition building at Portland, Oregon, on the 28th of last month From all accounts her performances are steadily becoming more wonderful. We take great pleasure in mentioning the success of this wonderful little lady. Her performances are marvels of quickness and accuracy. She leads where others are content to follow.

ROD.

THE FOREST OF FLOWERS.

Bowers of Beauty where Nature's Choicest Expressions of Pleasure Abound.

Fishing in Magnolia Park, Houston, Texas. Four Hundred Acres of the Wonderful Trees Watered by Splendid Streams.

HOUSTON, Texas.

EDITOR BREEDER AND SPORTSMAN: During the past summer it has been my privilege to visit extensively the points of interest in the southwest, none of which I have found to present superior attractions to that of the wonderful Magnolia Park, situated on an arm of the sea, some fifty miles distant from the Gulf of Mexico and but three miles south of this beautiful and thriving city.

No one who has not seen the magnolia in its native state can conceive of the beauty of this matchless tree. Imagine, if you can, a body of forest of some four hundred acres composed almost entirely of magnolias, ranging from seventy-five to one hundred and fifty feet in height and this entire body of timber in full bloom, or rather filled with flowers in all stages of development. The pure white of the bud and fully developed flower contrasting most strikingly with the deep, fresh green of the matchless foliage of the trees.

By the courtesy of Colonel John T. Brady, the owner of this beautiful spot, we were permitted to spend a day within its welcome shades, rendered indescribably pleasant by the beauty of the scene and the aromatic odors which filled its every bower and shaded nook.

With an eye to the beautiful, too often marred by the introduction of so-called art, the forest has been preserved as presented by the matchless hand of nature. The open glades have been more firmly matted with grass, and the decayed members of the forest have been carefully removed. The banks of the streams have been more carefully defined, but not to such an extent as to give to the surrounding that stilted appearance which invariably arises from too great an interference with the graceful lines and curves suggested by nature. The thousands of beautifully arched and overhanging bowers of vine and spreading thorn have been left undisturbed, presenting inviting retreats from the midday sun. By means of artesian wells, a number of artificial lakes have been formed of clear, sparkling water mirrored on the bosoms of which the surrounding scenes appear enhanced in interest and beauty.

The Buffalo river, which sweeps around the well defined banks of this lovely park, adds manifold to its attractions. The water in the river is of a uniform depth of fifteen feet at this point, in places much deeper, and is swarming with a great variety of fish.

A branch of the river penetrates the park, enclosed in clear cut banks, running to almost the center of the park, where it describes a perfect circle, forming an island which is high and dry, yet several feet lower than the great body of the park, which separated from it by this stream. In these waters also the fish abound in such numbers as to render most pleasant a day here spent in tempting them from their cool, shady retreats, with rod and line. Bass, sea trout, sheepshead, mullet and catfish are plentiful, and reward the angler well for his pains, furnishing any quantity of most excellent sport.

The river presents, for miles along this point, admirable facilities for boating, especially for the oar. While the sculling interest are yet in their infancy, it is understood that they will now be improved, and the magnificent course presented will be occupied for this purpose.

It was a beautiful afternoon in the month of June, that seated in the Colonel's carriage, my friend and I accompanied him on a trip from the city to the park. A more pleasant drive could not be imagined, our way leading through the dense growth of pines, which stood like an array of sentinels on either hand of the broad highway which leads to the park. The first point we struck was as picturesque and charming a lake, within the park, surrounded on every hand by the splendid floral laden magnolias as I ever beheld.

This beautiful woodland mirror has been christened "Lake Estelle," in honor of the Colonel's charming wife. Seeing some fine bass darting through the water, we were preparing to make a cast when we were checked by the Colonel saying:

"Anywhere in the park, friends, but here. I have just fairly begun to stock these waters, and desire to give the beauties a little more time before tempting them."

We were then driven about over the park and finally turned loose, so to speak, to wander at will in search of the most favorable sports for angling. We soon took our position along the creek and in succession selected the pools where the shade was the deepest, and was rewarded by making several fine hauls. One sea bass weighing twelve pounds was taken with a number of smaller ones. A shout from my companions who had chosen the river drew my attention and steps in that direction, where I found them still endeavoring to land a splendid channel cat, which, perhaps judging from the way in which it lashed the waters and darted about while held taut at the end of some thirty feet of line, was of no inconsiderable size. Such finally proved to be the case, as we had the pleasure of determining, for after a hard fought battle for liberty the fish was finally landed. It proved to be upwards of twenty pounds in weight.

We caught several others during the afternoon, but none of which tipped the scale at anything like the weight of the one above mentioned.

We then strolled about through the inviting shaded paths and admired the beds of fern which here present this beautiful plant in all of its beautiful wealth of perfection and gathered buds and semi-tropical flowers, which we carefully packed and expressed to our northern friends. The cape jasamine here attains its highest development; the odor of a cluster of these rare and splendid flowers can be detected when carried favorably by the wind for fully a mile. Everything that art and money can do is being done to enhance

the attractiveness of this spot upon which nature has lavished so many charms. No one visiting the gulf coast should consider their visit complete without visiting this, the only cluster of magnolias of any considerable size to be found in the country.

The fishing, boating and hunting is fine. Quail, squirrels and pheasants are to be found in abundance, and the deer runs of east Texas, of which I spoke in a former letter are within easy reach. CRINO.

The Mirror of Death.

One of those wierd electrical tales, which stir, to rapid surges, the blood of the phlegmatic Teuton, and cause the straight hair of the Indian to present the appearance of the African's and the latter to turn pale and ejaculate "Good Lor' steer the feet oh dis chile fur frum dar," comes from the true guardians of the public—the press.

For years, so the story runs, the whites have been familiar with an old Indian tradition relative to a mysterious water monster which has it's home in a placid and beautiful lake about six miles to the southeast of Mullen, Idaho.

The grandeur and surpassing beauty of the scenery surrounding this lovely lake, is enhanced by the remarkable clearness of its placid water. Hemmed in by rockey walls, the jutting points of which, are covered with a luxuriant growth of fern and vine and flower, which cluster and deepend with the surpassing grace of natures charms about the irregular circle of its solid masonry.

St. Stephen's Peak, the most elevated point in the Coer d'Alene mountains, towers over it, and the famous St. Joe range of mountains prevents its waters from flowing south into the St. Joe River.

Sitting on its banks and looking into its quiet waters where so much as a ripple is seldom seen, save those made by the sportive fish, one catches sight of the mountains around, the trees and cloud and sky with such startling clearness as to really doubt for the moment that they are not looking upon the original objects but upon a reflected picture.

Some years since some miners came to its shores. They were warned by the Indians to avoid its waters, but unheeding proceeded to bathe in its cooling shades One, more venturesome than the rest, swam out near the center of the lake, and was by his companious seen to turn suddenly and make every exertion to reach the shore. A commotion was observed in the waters They seemed to rise near its center and a sound was heard like muffled thunder and then a great sea monster rose and seized the unfortunate man in its great jaws, then slowly sank beneath the surface. His terror stricken companions were speechless with horror. Spots of crimson in the water here and there testified to the fate of their companion and compelled their bewildered minds to grasp the truth of the awful tragedy they had witnessed. This, then, was the cause of the natives warning, and the translation of the Indian phrase "Mona kaw chee wou," meaning "The mirror of death".

It may be, and certainly is, quite a mystery how fish of almost all well known varieties, get into the lakes which are nestled in the pockets of some of our high mountains. It is said that perch and pickerel eggs may be, and probably are, carried thither by the wild ducks, as the eggs of these fish are sticky and adhere to almost anything with which they come in contact. It is well known that trout can and do go almost anywhere, however steep the incline, where there is enough water to form any possible passage way. Bass are much of the same nature. These are the most natural navigators of all the fish family. We have seen trout and bass work their way over a dam where the water poured over a planked incline of 25 degrees, the water being but three or four inches in depth. This, of course, will not account for the fact that many lakes, thousands of feet in the air, are stocked with perch and bass. They get there, but how? Evidently they never swam up there, for there is not, nor are there any evidences, that there ever have been streams leading thereto. Men did not carry them there. Did the birds? If not, how did they get there?

Some Choice Fish Dishes.

The culinary artist of the New York Tribune, discourses as follows, on the manner in which a number of varieties of fish should be prepared. Every one loves fish when properly prepared, but all must confess that more fish are spoiled in cooking than almost any other article of food.

Bluefish can only be considered in prime condition within the hour after it is caught. There are various methods of cooking it, but one of the best is to wrap it in slices of bacon and bake it in a quick oven. Another is to fill it it. Under this process the fish is first cleaned and then skinned. After cleaning it cut through the skin down the length of the backbone and around the gills. This should be done with a little honing knife, such as come for honing chickens, though any sharp vegetable knife may answer. Slip the vegetable knife under the skin at the head and begin to pull the skin off toward the tail. It will usually come off smoothly; but if not, use the knife, not to cut, but to push the skin from the flesh. After skinning the fish on both sides, slip the knife inside and cut out the bones, using the finger to push the flesh off the bone as much as possible. The knife must be kept close to the bone. If this is done the flesh will come off on each side in one piece, leaving the bone almost perfectly clean. Take these two fillets, one of which will be thick and the other thinner, and cut them each in two or three pieces. Season each piece, dip it in egg, then in bread crumbs, fry it in a kettle of fat until it is a crisp brown, and serve with a garnish of parsley and *maitre d'hotel* butter. This is also a delicious way to cook black bass.

"That reminds me", began Jim, the story teller of our party, as one of our number finished the recital of a well worn tale, which had done service about the camp fire, for several successive seasons. We all simultaneously drew closer together and assumed a listening attitude, for we knew that when Jim began in that way that he had been "reminded" of something worth listening to. He had relit his pipe, and as the blue wreaths of smoke curled upward, from a few preliminary puffs, he said: "That reminds me of the hardest fight I ever had in landing a fish. My companion and I were fishing in one of the bayous on the lower Mississippi along in the seventies.

"We had not been overly successful but had managed to make some pretty fair hauls during the day, when we concluded that we would do some night fishing. All the boat we possessed was a flat bottomed one made out of rough lumber, but with it we managed to paddle about and tend our lines. It was early in the evening just as the full moon looked over the tree tops into the bayou that we pulled out for a little sport. We had not been out but a few moments when something struck one of our large hooks and at the very first dash succeeded in almost upsetting our frail craft. I thought that we surely had caught a three or four hundred pound cat. The line fairly cut through the water, back and forth as the fish lashed the water into foam in its frantic endeavors to regain its freedom.

"For some minutes we could do nothing but let it have its own way our pulling upon the line only serving to accelerate the motion of our boat. After a struggle of half an hour we landed the fish, only to find it to be a monster gar. It measured quite eight feet, and had four rows of teeth, which were as sharp as steel. It took several shots from our revolvers to settle it. The sport was fine, but I tell you I felt shaky in that old rickety boat. I don't care to repeat the experience. That fish could have bitten off a man's leg with little or no exertion. I don't care to catch any more like that one."

"Half hours in the Sierra Nevada" is the title of some very interesting and instructive articles now running in the *Forest and Stream*, from the pen "Arefar," Auburn, this State.

The Fishing Gazette notes the fact that a violator of the fish law there atoned for his sinning by a payment of £100. Dear fishing that.

Mr. F. P. Callundan, is devoting considerable time in looking after the fish interests of the State. Last week was spent mostly in the Sacramento valley.

It would seem to be a sound principle of law that any act which is once lawful, cannot by lapse of time become unlawful. However frequent the acts of legislatures may contravene this principle, the courts declare such action to be unsound.

Mr. F. P. Callundan, Chief of Patrol, arrested a pig-tailed Celestial on Thursday, in the Washington Market for having a basket of striped bass in his possession, all them weighing two pounds or less. A few good heavy fines will teach the heathen better.

Where, as in camping out, a kettle of hot fat is not at hand, fillets of fish may be fried in butter or baked and served with cream sauce. To bake it, slice an onion over the fillets of fish and squeeze over them the juice of half a lemon. Put half a cupful of butter in a frying-pan, fry the fillets in it for a few minutes until slightly brown, then turn them and brown the other side. Take up the fish and lay it on a platter or grattin dish; stir three tablespoonfuls of flour into the butter in which the fish was fried; add a slice of carrot, a slice of onion, a sprig of parsley, a bay leaf, and a cupful of water or white stock in which fowl has been boiled. Let this sauce simmer for half an hour before the fish is fried. When it is done, add a cupful of cream or rich milk, and salt and pepper, and let it boil up once. Strain the sauce over the fish, and set the whole in an oven for 15 minutes. Serve it with Saratoga potatoes.

A method of cooking fillets of striped bass which is very delicious is to season each slice with salt and pepper, and sprinkle it with a few drops of lemon juice and two or three drops of onion juice. Cover the fish laid on a platter with a large dish and put it away for half an hour on the ice. Then dip each slice in melted butter, dredge it with flour, and lay it in a tin dripping-pan in a hot oven. Serve it with a white sauce like the one just given. Decorate it with the whites of three eggs cut in rings as a border, and with the yolks of three eggs grated over the fish and the sauce. It may be decorated with a little minced parsley.

Manhattan Food.

Of the many beautiful and attractive exhibits at the recent Mechanics' Fair in this city, none created more attention than that of the Manhattan Food Co. Andy McDowell says that "during the fall, winter and spring of 1888 and 1890, he has fed to the horses under his charge a ton and a half of Manhattan Food, and considers it the best article of the kind he has ever met with or used." B. C. Holly says, "the Manhattan Food gave good results. Send me 500 pounds more." The Company have also received similar testimonials from Messrs G. Valensin, Samuel Gamble, Z. Birdsall of Wells Fargo & Co.'s Express, the John Weiland Brewing Co., and numerous others who consider it an excellent adjunct to feeding. It is not surprising that such a highly recommended article is becoming very popular with our horsemen.

Three-fourths of your ailments arise from liver troubles which Simmon's Liver Regulator cures.

Pleasant to the taste and readily taken is Simmon's Liver Regulator.

Pictures of Great Horses.
ALL IN COLORS.
Size of Sheet 13 1-2 by 17 3-4 Inches.
Price 20 Cents, or Six for $1 00.
The racing season is over, and now everybody wants pictures of the great horses. We have ready Elegant Pictures of the great California horses
Sunol, Stamboul, Palo Alto and Salvator,
And also the champion Nelson, Axteli, Belle Hamlin, Guy, Maud S, Jay-Eye-See, Roy Wilkes, Richball, Johnston Salvator and Tenny Race, Hanover, The Bard, Terra Cotta and Ten Broeck.
PRICE—Twenty Cents each, or Six for One Dollar by Mail, Post Paid, on receipt of price. Address,

Catalogues Compiled.
Pedigrees Traced & Tabulated
The undersigned, having had an experience of over five years in work of this kind, is well posted in regard to trotting pedigrees and performances, and will give special attention to compiling catalogues, circulars, advertising cards, tabulating and tracing pedigrees etc. My facilities are unexcelled for doing this sort of work, and parties can arrange with me to do both compiling and printing at reasonable rates. Samples, estimates and references will be furnished parties contemplating having work done. Satisfaction guaranteed.

MESSRS. BRUCE & KIDD

Will Sell at Auction on

Friday, Dec. 5, 1890,

AT TREACY & WILSON'S LIVERY STABLE,

LEXINGTON, KENTUCKY,

Thirty-seven Head of Thoroughbreds,

The Property of MESSRS. J. K. MEGIBBEN & CO.,

Consisting of eighteen horses in training, twelve yearlings and seven broodmares. Among the horses in training are the stake and purse winners

Sportsman, Laura Davidson, Avondale, Eberlee, W. G. Morris, Abilene, Vallera, Birdella M., Van-a-Clar

and eight other promising two-year olds. Among the yearlings are own brothers to Audrain, Goano, Arcalon, Ascell and Jennie R.; own sisters to Lela May and East Lynne, and half sisters to Irish Dan, Vallisea, Nimblefoot and Zulu.

The broodmares are young and highly bred, and thought to be in foal.

Owing to the death of one of the partners, and a division, this stock has to be sold to the highest bidder, without reserve.

SIXTH DAY, JANUARY, 3, 1891.

PURSE $200, of which $30 to second and $20 to third; for horses that have run and not won during the meeting. Entrance free. One mile.

PURSE $150, of which $25 to second horse. Owners' handicap. Weights to be announced through the Secretary not later than six P. M. of day preceding race.

$500 will be reserved for special purses.

CONDITIONS.

All trotting and pacing races best 3 in 5 to harness, unless otherwise specified. Entrance $10 per cent. on amount of purse to accompany nomination. Any horse distancing the field or any part of it will only be entitled to first money.

American Association rules to govern all trotting, pacing and running races, but the Board reserves the right to trot heats of any two classes alternately or to trot a special race between heats; also to change the day or hour of any race if deemed necessary.

A horse making a walk-over will be entitled to only one half of entrance money paid in.

All entries not declared out by 6 P. M. of the day preceding the race, will be required to start.

When there is more than one entry by one person, or in one interest, in trotting races, the particular horse they are to start must be named by 6 P. M. of the day preceding the race.

If in the opinion of the judges, any race cannot be finished on the closing day of the meeting, it may be continued or declared off, at the option of the judges.

Non-starters in running races will be held for entrance under rule 6.

Racing colors to be named on entries.

In trotting races the drivers will be required to wear caps of distinct colors, which must be named in their entries.

These two last rules will be strictly enforced.

All races to be called at 2 P. M. sharp.

Trotting and pacing races are divided in four moneys—50, 25, 15 and 10 per cent. of purse.

Entries to all the above trotting and pacing races to close with the Secretary, Thursday, November 13th. The entries to the running races to close December 1st.

E. S. BABCOCK, JR., President.
F. B. BALDWIN, Manager.
N. I. BALDWIN, Secretary,
Coronado Beach Hotel, Coronado.

☞ Remember we go according to rule—three to enter and two to start.

First Annual Record Meeting

San Joaquin Valley

Agricultural Ass'n

(DISTRICT No. 2, Cal.)

STOCKTON,

November 18 and 19, 1890.

Entries close NOVEMBER 16th for 1, 2, 3 and 4 year olds, and aged horses.

TROTTING.

To Trot in divisions. Contestants in gronps of three, or not more than four in each class, to beat 2:30. OPEN TO THE WORLD.

ENTRANCE $10 each in all classes; Payable with Nomination.

PREMIUMS.

First, the Association's Gold Medal.
Second, the Association's Silver Medal.
Third, the Association's Bronze Medal.
Class 1, Yearlings. Class 2, Two-year Olds.
Class 3, Three-year olds.
Class 4, Four-year olds. Class 5, Aged Horses.

All races to rules of the National Association of Trotting Horse Breeders, and the National Trotting Association.

Fastest time in each division beating 2:30 wins first premium, the remaining horses continue to compete for record of 2:30 or better.

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,
Santa Clara P. O., Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp. Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. In any ordinary weather the roads are very good, and they are fairly good after the unusually heavy rainfall of the past winter.

All stock sent from San Francisco may be brought over by Garcia's Express, No. 3 Market street, San Francisco. They also have an order box outside of Hawley Bros.' Hardware house on the corner of Market and Beale streets. The express leaves San Francisco on the Creek route boat, which starts at 1:30, but all orders should be in the order box at Market and Beale streets by 10 o'clock, or at the office, No. 3 Market street, by 11 o'clock at the latest. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

A Two-Year-Old Filly,

BY JUNIO, 2:22, out of SULTAN QUEEN.

This filly is a very desirable animal, and with but one months' training, has shown a full mile in 2:50.

EMMA G., 2:27¼,

(NINE YEARS OLD)

By ELMO, dam by WHIPPLE'S HAMBLETONIAN.

This mare is in foal to Dawn, 2:18¼.

THE CELEBRATED PACER

Chapman, 2:26.

A great campaigner. Drove out L. C. Lee in almost a dead heat in 2:17¼.

For terms and particulars, address

CHAS. GREENE,
144 Natoma Street, S. F.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Address,

THE BREEDER & SPORTSMAN,
313 Bush St., San Francisco, Cal.

IMPORTED ENGLISH BLOODHOUNDS.

The FIRST and ONLY LITTER of PURE ENGLISH BLOODHOUNDS whelped in California are now offered for sale. The sire is Burgho's Warrior (A. K. C. 19,753) out of Ripple Buxom E. K. C. 19,768), puppies by Baker at Dover, England, New York and Albany. Warrior has never been shown, but is full brother to Burglo Jr., the well known show dog. Warrior is one of the handsomest hounds ever seen. His ears are twenty-seven inches across, and he is two inches taller than the average of bloodhounds. These noble hounds are kind and gentle, fond of children, marvelously intelligent, of stately bearing, and companionable in every sense. They are not fierce like the cross-bred hounds of Southern States, which are wrongly called bloodhounds, though they are excellent watch dogs. While possessing a rich, deep voice, they never give tongue without cause. A dozen bloodhounds make less noise than one pug. Their kind disposition, rare intelligence and wonderful scent fit them equally for house, farm or field. In the East the bloodhound is becoming more fashionable than the St. Bernard or the Mastiff, or while he is handsomer than either, his remarkable intelligence and scent make him useful as well. Read his character in the Century Magazine for June, 1887, and see his great beauty in the bronzes at Shreve's, and photographs at Vickers. For prices and pedigree address Manager, Santa Clara Kennels, Santa Clara, Cal. Photographs 25 cents.

Cocker Spaniels for Sale

THE FIRST
SOUTHER FARM
SALE

WILL BE HELD ON

Thursday, Nov. 20, '90.

At 12 Noon, Sharp.

THIS FARM has been breeding and collecting TROTTING STOCK for over three years, and in that time has never offered anything for sale. It is now greatly overstocked; and the very complete barns, hoxstalls and shelters are too crowded to allow for the rapid increase in the business of educating and boarding horses, joined to the demands of the space required for wintering TROTTING and RUNNING HORSES. Consequently, all the young stock, exceptiug the weanlings and three fillies reserved for broodmares (and two or three that are out of order) will be sold at

PUBLIC AUCTION

On the above date. On the same day will be sold the entire

Souther Farm Collection of Brood Mares,

Among which will he found many well bred and worthy individuals. All will be sold without limit, reserve or by bidding of any sort whatever. This is an unusual opportunity to purchase first-class young stallious and gilt-edged broodmares from producing lines at what they will bring at fair and square auction.

Among the young Stallions that will be offered are:

GRAN MORO, blk c, foaled 1888, by LE GRANDE (sire of Grandee (three years) 2:23½), dam SUNNY SLOPE BELLE (dam of Don Carlos (three years) 2:32), by THE MOOR (sire of dams of Bell Boy (three years) 2:19¼, Hinda Rose (thr e years) 2:19½ etc.; also grandsire of Stamboul, 2:11½). GRAN MORO is sound and fast, and will earn money for somebody.

JIM LINFOOT, blk c, foaled 1888, by FIGARO (son of Whipple's Hambletonian and LINFOOT by ERWIN DAVIS, sire Ed, 2:26, and Carrie F., 2:27¾, and the dam of Florence R., 2:26½. JIM LINFOOT will make a race horse, and is a very handsome young stallion.

There are a number of others, Two-Year-Olds and Yearlings. They will be shown at the Sale.

The following are among the Brood Mares:

VERONICA, b m, foaled 1884, by ALCONA 730 (sire of Flora Bel) .d grandsire of Silas Skinner, 2:19); first dam FONTANA (dam of ner, 2:19, Flora Belle, 2:25); second dam FANNY WILLIAMS (dam of Bay Chiefta) y ALEXANDER'S ABDALLAH 15.
Sister to FLORA BELLE, 2:25.

ROSALINE, b m, by MAJOR MONO.
ROSALINE is also a good road mare.
Dam of ALPHEUS, 2:27.

EFFIE DEANS, br m, by WHIPPLE'S HAMBLETONI dams of Dawn, 2:18¼, Elector, 2:21¼, and seven others wi oetter than 2:28).
Dam of GERSTER (pacing) 2:33.

PUSS, ch m, by SKENANDOAH 926 (Kentucky Hunter).
Dam of HAVERLY (pacing) 2:25.
MODJESKA (pacing) 2:32½.
BELLE DAVIS (three years) 2:40.

ROSEBUD, br m, foaled 1884, by GIBRALTAR, 2:22½ (sire of Homestake, 2:14½); first dam JOHNSON MARE by A. W. RICHMOND, sire of Arrow (pacer) 2:13¾, Richmond Jr., 2:22¾, etc; second dam by CRICHTON (thoroughbred son of imp. Glencoe and mare by Wagner), sire of dam of ARROW (pacer), 2:13¾, etc.
ROSEBUD showed a mile in her work at Napa in 2:40. She is a fine road mare.

Edwin F Smith Sacramento

And many others of First-class Breeding and Good Individuality.

There will also be Sold some Good Roadsters and General Purpose Stock.

Sale Day Thursday, November 20, 1890, beginning positively at Noon.

EXHIBITION DAY, on Thursday, November 13th, beginning at 1:30 P. M.

It is a pleasant drive to the Souther Farm from Oakland, or from San Francisco by the Creek ferry; take county road from Oakland to San Leandro, and turn off at signboard, three-quarters of a mile this side of San Leandro. To go by train, take 12 o'clock boat (on the 13th), and you will he met at station and taken to the Farm. Get something to eat before you start, or on the boat, as there will not he time at the other end. On the day of the sale an earlier train will run and lunch will be served to all at the Farm.

SPECIAL TRAIN ON DAY OF SALE, leaving Foot of Market Street, at 9:30 A. M., and First and Broadway, Oakland, at 10 A. M.

To drive to the Farm, take Creek Ferry Boat at about 9 A. M. Lunch will be served to all comers.

Beautiful Weather and Good Attendance.

"Is trotting played out?" was a question we heard asked last Friday night, and an answer is unnecessary, as the large and fashionable attendance at the Bay District Track on Saturday afternoon last, amply testified to the fact that San Franciscans will turn out when the bill of fare is such that it whets their appetite for sport. And such sport is rarely seen; the very cream of California horses were down on the programme to give a trial of their speed, the magic names Sunol, Stamboul and Palo Alto being sufficient to attract a larger crowd than has been seen on the Bay District Association's Grounds for years. The four hundred were present in full force and every prominent horseman from Yreka to San Diego was attracted by the galaxy of talent that had been slated to appear on November 8th. The matinee was managed by the Pacific Coast Trotting Horse Breeders Association and not a stone was left unturned to make the affair a financial success for the promoters, and a day long to be remembered in the horse annals of the State. As is only natural to believe, particular attention was paid to the track which was prepared under the personal supervision of Messrs. Marvin and Goldsmith, and many of the trainers and drivers present were outspoken in the belief that it was as fast as human ingenuity could possibly make it. Millard Sanders was confident that it was the equal of any he had ever seen in his many years of experience, his expression being "there is just enough velvet to make it safe and it should be as fast as a bullet." As against these opinions many others thought it was too hard and would sting the horses feet, and predicted that not one of the contestants would break their records.

There were other causes that effected the speed of the flyers and that was the wind which commenced to blow rather strongly about thirty minutes before the advertised time of the races, and there was no cessation during the afternoon.

One o'clock was the hour announced for Palo Alto to start and at that time fully 1500 persons were present, but before two o'clock the spectators would number fully 3,000, the gate receipts showing that 2,080 paid admission which at one dollar a head shows a handsome return to those interested.

According to the rules of the Association, only members of the Association can act as judges, so during the day M. F. Tarpey, J. H. White, F. L. Coombs, Gilbert Tompkins, Wilfred Page and F. W. Loeber, alternated in the stand. The timers selected were Adolph B. Spreckels, C.W. Smith and F. H. Burke, and it may be as well to state here that these gentlemen are well known, not only as business men, but for their large interests in horse matters, so that the silly insinuations given vent to by one of the daily papers that the horses were given the advantage of the watch, was given little heed to by those aware of the reputation of these gentlemen.

Shortly after the bell rang Marvin, in his now familiar suit of gray, appeared on the track, driving Palo Alto, and was the recipient of some slight applause.

Jas. A. Dustin was selected to drive the runner in each of the trial miles, and it was no fault of his that the horses did not succeed in the accomplishment of that for which they were driven. With voice and gesture Jimmy ably assisted both Marvin and Goldsmith, and was the right man in the right place. After Marvin had scored Palo Alto several times, he finally nodded for the word and was sent off, the stallion going in easy style, in fact, too easy many thought, for it took him 33½ seconds to get to the quarter pole. When a short distance past the three-eighths, he was noticed to tip-toe, which finally ended in a break, and he had gone fully a hundred feet before Marvin got the stallion settled. When the half mile pole was reached 1:07¾ had been consumed, and it was now deemed an impossibility for him to beat his record. The last quarter in the Bay District track is slow as in comparison with any of the others, and it was probably owing to this fact that many decided that he could not win, and that the scythe bearer would prove the victor. That they were true in their deductions is shown in the time made, Palo Alto not being able to finish better than 2:14¾. It would seem that the pet of the Palo Alto stable had not recovered from his long and arduous campaign in the East, and that he wants rest badly was patent to the eyes of all observers. He has travelled so far and done so much hard work, that he is justly entitled to a let up.

When the judges announced that Stamboul would now try to reduce his record of 2:11½ quite a ripple of excitement was noticeable, and some little applause was given at the mention of the noble stallion's name. After the lapse of a few moments, Goldsmith appeared behind the handsome brown, and after scoring three or four times was given the word. The quarter pole was reached in 33 seconds, but following the lead of Palo Alto, when shortly past the three-eighths pole he also broke, and had run almost one hundred and fifty feet before Goldsmith got him settled. It was now thought that the noted driver would ease up on his charge and finish a slow mile, but contrary to the expectations, he urged the stallion to his utmost, the half being reached in 1:06½, and the three-quarters in 1:39. Coming down the homestretch the son of Sultan seemed to shirk his task a little, and yet finished strongly in 2:13, a second and a half slower than his remarkable mile at Napa. Goldsmith announced that after the necessary space of time had elapsed, he would send Stamboul another mile, trusting that he could accomplish the breaking of his record.

When brought out for the second attempt, it was noticeable that his coat was very dry, in fact, he seemed dull and not nearly so full of life as a horse should be, who is expected to lower 2:11½. On the second trial, he trotted fairly and squarely and without a break, but 2:13¼ was the best he could do, which, however, goes to his credit as being the two fastest heats ever trotted by a stallion in one day.

The peerless Sunol was the next object of interest, being brought out for the edification of the spectators, but she did not seem the Sunol of old, she presented a ratherwasted look, and was not the clean cut greyhound as of old. Mr. Marvin scored but very little with her and very soon nodding for the word, was promptly sent away. The quarter was made in 33¼ seconds, and the second quarter in 32¾ seconds, the three-quarter pole being reached in 1:39¾; while the mile was completed in 2:12½.

One of the trials not down on the programme was that of Sondau trying to lower his record of 2:27½. He was ably handled by Pat Farrell, and although urged to his utmost, failed to do better than equal his own time; the quarters being made in 37, 1:13¾, 1:50½ and 2:27½.

Goldsmith next appeared on the scene of action with the now celebrated two year old filly, Vida Wilkes, the object being to have her lower her record of 2:22¾. The little midget was the cynosure of all eyes and was an especial pet of the ladies, many thinking that it was a shame that such a little thing should be driven at such a very high rate of speed. She scored up very well, and on the first time of asking Goldsmith nodded and the judges started him off on his undertaking. Vida reached the quarter pole in 35¾ seconds; the half being accomplished in 1:10¾, Goldsmith having the filly well in hand; the three quarters was reached in 1:46, and it now looked as though the daughter of Guy Wilkes would cut considerable from her record; upon being urged, she responded nobly, but the slow quarter spoken of before, tended to make her ease up and the best she could do was 2:22½, cutting one-half a second from the time made at Napa.

The first regular event on the card was the race between Directa, owned by F. W. Loeber, and Amigo, the property of the Palo Alto Stock Farm. Amigo was one of the horses taken back East by Marvin in the early portion of the year, and it was thought at one time that he would make a very low record but having gone amiss, he was let up on; still the Palo Alto driver deemed him good enough to beat the daughter of Director. Amigo had no trouble in winning the first heat in 2:29, the second heat being taken by Directa in 2:28, and in the third heat Marvin sent his horse for all there was in him, making a record of 2:20½, Directa being timed separately in 2:24.

Time, 2:29, 2:28, 2:20½.

Millard Sanders, the driver lately engaged by Mr. Valensin, now made his first appearance on a California track behind the mare, Crown Point Maid, her opponent being Mariquita. Sanders evidently intended that the Californian public should know that he was out for a record, as from the time the word was given, he never let up on the mare for a single instant, and easily distanced the La Siesta entry in 2:31¼.

SUMMARY.

Bay District Track, same day. Match race $50 a side.

Valencia Stock Farm's br m Crown Point Maid, by Crown Point—by Overland	Sandere 1
La Siesta Ranch's b m Marquita, by Eroe—dam by Obleftain	Vioget dis

Time, 2:31¼.

The principal race event of the day was for a purse of $500, the contestants being Maggie E., who was driven by Goldsmith; Lee, handled by Dustin, and Wanda, who had the laughing Billy Vioget behind her. The betting was rather spirited, Maggie selling for $40; Lee $14 and Wanda, $5. The backers of the favorite had good reason to congratulate themselves as she won easily in three straight heats in 2:25, 2:19½ and 2:22. It was thought by some that Lee might have a possible chance but the best he could do was to come in second in the first heat, while Wanda was second in both the second and third.

Time 2:25, 2:19¼, 2:22.

The last race of the day was between Express, who made his first appearance in a long time, and the stallion, Redwood, owned by Messrs. McFadyen & Murphy of Santa Rosa. Those who had made money on the prior race were just as eager to invest on this one, Express selling $40, while a few were willing to invest on Redwood at $10, but much to the disgust of the long enders, Express was never in it; Redwood winning the first heat in 2:25 and the last one in 2:21½ This gives Redwood a new record, and one to which he is justly entitled, for in his work during the early portion of the season, he has shown his ability to put three heats inside of 22 whenever he was right and fit.

SUMMARY.

Time, 2:25, 2:21½.

The meeting was a success in all ways except the breaking of records, but as there will be two more days of the noble sport, there are many chances that California will yet be heard from. The weather looks favorable, and we will trust for the best, hoping that in the next issue of the BREEDER AND SPORTSMAN, we may be able to say: "The Golden State far ahead."

The Concise and Simple Annals of John Bradford.

Harvey Wards Peck.

The Bradford homestead was situated about twelve miles from Savannah, Georgia. It comprised one hundred and thirty acres of land especially adapted to the growing of rice and cotton. In those halcyon days, before the war, Squire Bradford had many negroes; the cotton and the cane grew luxuriously and produced abundantly, and life on the plantation was a joyous thing. Then came the war—that relic of barbarism and curse of civilization—and the family were reduced to a financial status with which they had hitherto been unfamiliar, and at which their proud spirits rebelled. The darkies were treed, and all of them left (not having sufficient sense to realize that they were better off on the plantation than they would ever be again), with the exception of Uncle Joe, a white haired servitor who had been in the family for three generations.

It was at this juncture that John Bradford, the eldest son resolved to go to the far West, and in some distant State or territory, build a fortune for himself, that the devastated condition of the entire South would seem to preclude the probability or even the possibility of doing.

John was a man of twenty-five, a good looking, courageous, happy-go-lucky fellow, who had received a good education, and had never thought seriously of life, having always entertained an indistinct idea that, sooner or later, he would be the owner of a plantation, and live as befitted a Southern gentleman

Now all this was changed, and he awoke to find that the "visions he had in dream" would never materialize. His mother was long since dead, and when he informed his father of his determination, the old gentleman—who stood in the eventide of life and gazed from its west windows—laid his hand upon his arm as he said:

"Go, my boy, and success attend you! Only—don't stay too long!"

The young man had no very definite idea where he should go, but he was filled with the desire to "see the world," a longing which he had secretly cherished for some years, but which he had never given expression to.

Years afterwards John Bradford recalled the last evening he spent upon the old plantation. The moon seemed to hang just overhead, the air was very still, and the mocking-bird sang him to rest.

The next morning he parted from his father and brother, promising to return within a year. As they waved him farewell, they little thought that they had looked upon him for the last time.

* * * * * * *

It has been truly said, "Man is a creature of circumstances." At no time is this so perfectly exemplified as in the case of a young man leaving home and friends for the first time. If his search for fortune or fame lead him among a certain set of people, with whom he constantly mingles, his own individuality will take on the general ways and traits of his companions, quite unconsciously to himself.

John Bradford was a man of high temper, who had never brooked opposition. He had been reared in comparative idleness, and had much to learn before he could successfully contest a hand to-hand fight with the world. The world looked very large to Bradford, and he longed to spread himself over its surface as much as he could.

His first important stop was New Orleans. That city of guitars and dark-eyed beauties, of mandolins and creoles, was a gay and charming place in those days, as, indeed, it has ever since remained.

John started wrong! For many weeks he led a wild life! For the first time in his life he recognized, one evening, while out with some boon companions, that he was very drunk. This fact, together with other things, caused him serious contemplation—the result of which was a sudden resolve. The midnight express bore him away from the city, and a Creole girl called Elsie mourned his hasty departure.

Thus for the first time in his life he left between two days!

* * * * * * *

One night in September, 1868, two men were standing on the sidewalk in front of Byrd & Ashburner's saloon, in Virginia City, Montana. Virginia was then the capital of the territory, and with Bannock City, was among the liveliest camps ever seen in the mines. The night was extraordinarily dark—so dark, in fact, that a person would have to grope his way very slowly if outside the radius of light cast by the lamps. It was mild and delightful weather, however, for the time of year. The men were engaged in earnest conversation. One of them was John Bradford! This was three years after his overnight leave taking of New Orleans, and he had travelled much in those three years. He had gradually acquired an accurate knowledge of "ways that are dark and tricks that are vain," until he was known in every camp in the territory as a sport and a tough man. He was dressed in the typical garb of a frontier gambler. He did not look much older, but his face had undergone that change which always comes, sooner or later, to the man who follows a career of vice. John's companion was known as "The Eagle Bird," from the very slick manner in which he manipulated the cards in Monte. His name was Jack French. This latter individual was saying:

"Anyhow, don't think I'd do it! 'Tain't worth it! 'The Duchess' ain't much over average, I reckon, no way, though she must a been mighty nice goods once. But, as I just said, don't think I'd do it. If you was to kill him, somebody would kick terrible hard, likely, for he seems a harmless sort of chap, and long as she don't take to him, I wouldn't bother with him."

"That's all very good, Jack, but I told him to let go, and he hasn't done it, that's all. Whose fault is it? Let's go inside and try some of that new whiskey."

The interior of Byrd & Ashburner's was a sight for a "tenderfoot." A long bar stretched entirely across one end of the room, and against it were leaning a motley crew of miners, teamsters, gamblers and peddlers, drinking, singing and carousing. Throughout the body of the room were nearly a hundred men, some seated at games of various kinds, while others were idly looking on. From the bar Bradford and French made their way to one corner of the room, where a Mexican woman was dealing faro. As French placed a bet upon the table, Bradford turned and left the house. He walked very rapidly after gaining the sidewalk, until the intense darkness compelled him to make haste slowly. Presently a ray of light in front of him penetrated the gloom. It grew brighter as he proceeded. The scraping of violins and the twang of a harp, accompanied by the shuffling of many feet, reached his ears, and a moment afterward he mounted the steps of Mercedes Navorra's dance house! But he didn't go in. He stood beside one of the windows from which a fine view of the interior could be had. As the so-called orchestra turned up, he gazed searchingly throughout the room, which was full of men, principally miners. Interspersed among these were half a dozen women. The men were patronizing the bar liberally, and occasionally attempting the somewhat difficult feat of "cutting the pigeon wing." Everybody was talking at once and chaos reigned supreme. Suddenly from the farther part of the hall came the tinkling of a piano, and a woman's voice singing:

"Backward, turn backward, O Time, in thy flight!
Make me a child again, just for to-night!"

The woman was a very good singer, but the pathetic beauty of Elizabeth Ackers' most delightful poem was lost on the crowd, who would have applauded vigorously, however, if the alleged orchestra were to render "The Irish Washerwoman" or "Billy in the Low Ground."

Still the woman sang and still the man stood at the window. Rising above the din he heard,

"Mother, dear mother, the years have been long,
Since I last listened your lullaby song;
Sing, then, and unto my soul it shall seem,
Womanhood's years have been only a dream!"

There seemed to be tears in the woman's voice. A far away look came into Bradford's eyes, and turning his back to the wall he looked into the inky darkness as if endeavoring to solve some problem, but seemingly its solution was beyond him. He opened the door and entered the room. As he stood inside the door, momentarily blinded by the light, it was evident that he was not a favorite with the men present, if their looks were any indication of their thoughts. But he was used to that, and his lips curled contemptuously as he sauntered slowly through the crowd, until he stood beside the fire. The woman started slightly and paled perceptably. Immediately beyond her, with one hand upon the piano, stood a smooth-faced handsome fellow, of perhaps twenty-two years. As Bradford walked up, the young man straightened himself quickly, for he seemed to realize that trouble was imminent, and as the woman cowered between them, their revolvers rang together, and the boy (for he seemed little else) sank to the floor, never to rise again!

The woman was "The Duchess!"

A terrible commotion ensued, sixshooters were drawn, and everybody seemed wild. During the excitement Bradford got out the back way.

About an hour after the shooting took place, Jack French succeeded in finding Bradford. Without preliminary remark he said quickly:

"Gus Rollins is looking for you! So is Tom, his brother! "Big Ralph" says either you or him is going to quit business here below, soon as ever you meet! They are all relations of the kid, and claim you had no right to kill him. He never done you no harm, says they, and likewise he's got an old mother somewheres that'll miss him a good deal, so they swear they will fill you as full of holes you'll look like a sieve whenever they run across you. Now, you listen awful close! These men mean business, they are good shots, and they are three to one. Course you ain't no coward, and there ain't no law as amounts to nothin', except the law of getting the first shot always, and that's just what these men will aim to do. If you stay here you're a goner, sure shot! If you're here in the mornin' you'd better put a "copper" on yourself. You an' me has been good friends for a long time, an' I've been huntin' you some time to tell you these things. Course you can do as you please——"

Shortly after this succinct conversation, John Bradford went to his room, pocketed a small handbag, pulled off his sporting clothes, kicked them under the bed, and with them, metaphorically speaking, his past life, for, as he expressed it to himself, he had concluded to "change his system." He emerged in a dilapidated suit marching down the road, shook the red dirt of Virginia City off his feet forever!

Thus, for the second time in his life he left within two days.

* * * * * * *

About the middle of October 1870, Broncho Pete was harangning a crowd in front of a livery stable in Denver, Colorado. Broncho was inducting his listeners into the mysteries of roping wild cattle, and relating the powers of some cowboy of the plains. Broncho was always entertaining, unless too drunk to speak. His only possessions were the usual cowboy outfit—a wild-eyed mustang, a fine Spanish saddle, bridle and spurs. In addition he had a pair of revolvers that were his special pride, and an appetite for liquor that was always with him.

"Yes," said he, "life on the plains is full of exigences, same as braidin' a mule's tail. Of course the people are good, sociable, easy going folks enough, but they're sensitive and restless, and mighty liable to act on any little impression they get, the same being frequently erroneous—so it's a good plan to wear your gun while partakin' of their hospitality."

"There's a good deal of shootin' taking place on the range—mostly young fellows, not bein' old enough to have any *sabe*—what the Injuns calls *tum tum*, so they think they got to burn some powder, or they ain't on earth none. You let a man get alone towards thirty, and if he ain't got no notch in his stick yet, his chance for preservin' the peace is mighty good. One day on the voyage, an old man rides up to me and sez, sez he:

"This is Mr. Broncho Pete, I take it," at the same time fingerin' his gun nervous like.

"That's shorely me every time," sez I, watchin' him with both eyes.

While this flow of border eloquence was in progress, an elegant road team jogged by. The horse, harness and top wagon betokened the evident wealth of the owner, who was driving. It was no less a personage than John Bradford! Within two years he had become a rich man; the owner of good mines; a successful speculator in real estate, and a well known subscriber to charity. He had "changed his system!" This blossoming forth had taken place under the *nom-de-guerre* of Joseph Manning. By this appellation he was well and favorably regarded by all, having the *entree* into the best circles in the city.

Although he had been successful beyond his wildest expectations, Bradford was restless. He had valuable mines; owned property that was rapidly increasing in value; lived at one of the best hotels; still he was discontented and unhappy. He was too much hardened to feel remorse, but the thoroughly respectable life he was leading was in some ways obnoxious. His life in the mines had taken a strong hold upon him, and now he craved excitement. This feeling found an outlet in the purchase of some thoroughbreds in California. His best buy was "Manchester," a bay two year old, sired by Norfolk—not so highly esteemed as a sire then, as he has been since Marion's produce have appeared. This colt was a big, racy looking chap, and if appearances were indicative of anything, showed to be a race horse. John Roche trained him on the old track, and he informed Bradford that he had a coming wonder. There was also at the track a local two year old, named Oriole, a colt that was regarded very highly by the resident horsemen. A match was made between the two to take place late in the spring of the next year, when the colts would be three-year-olds. The race was for $5,000 a side, catch weights, three-quarters and repeat.

When the time drew near, it was rumored that Oriole had a new trainer, who had improved the colt so much that he was deemed almost invincible by the local horsemen. Bradford seldom went to the track and had never met this individual, but Mr. Foster, the owner of Oriole, told him his trainer was a villainous looking scoundrel, with a breath like a vulture and a record like a convict—but he was a good trainer, and good trainers were scarce!

At last the day of the race came, and everybody turned out. One of the Denver papers gave the usual account—"the sea of faces, the elegant equipages; the gathering of fair women and brave men," etc., etc., *ad infinitum*.

A large amount of money went into the box, the odds being slightly in favor of Oriole. Manchester's owner had two men at the pool box, who bought nearly every ticket sold on that horse.

Finally, amid a hum of excitement, the horses were flagged off. After a ding-dong finish, in which both were rather well punished, Manchester won the heat by a short head. The backers of the long end were both disgusted and alarmed. After a critical examination of both horses, immediately after the heat, they decided Manchester must win, and, in accordance with that opinion, they backed him strongly at two to one.

At this juncture Mr. Joseph Manning and a lady drove up to the track's edge in a stunning rig. Rumor had it that Mr. Manning and this young lady were soon to be married! Rumor is sometimes wrong—this was one of the times! She was the daughter of a Denver merchant, and a most estimable and handsome young lady.

As the horses were being led, hooded and blanketed, up and down the stretch, the eyes of the trainer of Oriole happened to meet those of Mr. Manning. The latter turned hastily away, while an evil smile played for an instant over the trainer's face as he exclaimed very softly:

"Well! if that ain't him, my eyes are no good."

Mr. Manning felt a premonition of evil, and knew it had appeared when a boy came to the carriage side and told him a gentleman wished to see him at the stables. For an instant he thought of sending the boy away without even an answer, then, changing his mind, he excused himself to the lady and followed the boy. As he went through the crowd, he frequently stopped to shake hands with some acquaintance and receive their congratulations.

By a roundabout course the boy gained the stall where Oriole was kept, and ushered Mr. Manning through the half closed doors. The horse was yet on the track, but his disreputable looking trainer stood within. The trainer looked even worse than usual in the half light, as he said cheerfully:

"How are you, John?"

"None the better for seeing you, you d——d tramp!"

"Never mind me, John, it's your interest I'm looking after. I don't look any more like a tramp than you did the night you shook Virginia City. But to come down to the present day—speaking of the lillies of the valley, that toil not, neither do they spin, they don't loom up any finer 'n you do," and he looked over his own person discontentedly.

"Will you cease your infernal chatter, and tell me what you want? and hurry up, too!"

"Softly, John, softly, the young lady will stay till you get back," and he grinned mendaciously, "but I'll give you the whole thing. Foster, owner of Oriole, told me he would give me one-half the purse if I won this race with his colt. You know I'm a pretty fair judge of capacity in a race horse, and I know your colt is too fast, and I can't win—on the square. See? Now you must lose the other two heats."

"You must have lost what little sense you ever possessed, you donkey. I'll not do it."

"All right, John O. K., I thought maybe you wouldn't want all your high toned friends around here to find out all about you, that's all. I thought maybe the young lady out there wouldn't like to have a little bird tell her a few things—guess I was mistaken though," and he moved toward the door.

With the greatest effort of his life John Bradford swallowed the rage within him and said quickly:

"Hold on, Bill! You are the most despicable rascal upon earth to thus attempt to take advantage of my position. I've been tough, but never as bad as that! But we'll drop that—suppose I give you the twenty-five hundred and have Manchester win?"

"Won't do. I've lived long enough to know what a "cinch" is when I see it, and this is the first one I ever had."

"I'll give you $5,000 cash after the race is over, and let the best horse win, and you keep your mouth shut now and forever."

"Done. No funny work though, you keep your end up and I keep mine."

The voice of one of the judges was heard calling up the horses for the next heat.

Mr. Joseph Manning again appeared before the public and quietly regained his carriage.

Manchester won the heat and race and the crowd went home.

That night Bill got his $5,000.

Things from this time on seemed to go badly for Mr. Manning. He was as unfortunrte as he had hitherto been fortunate. His mines began to yield assessments instead of dividends, and he sold his real estate to keep them going, hoping Fortune would smile upon him after awhile. But that inscrutable fatality that follows the human race, seemed to be against him. To add to his general disconfiture, he was promptly refused by the young lady when he proposed to her. But his greatest source of annoyance was Bill, the trainer. That individual had bedecked himself with choice apparel and had become a swell among a certain clique, spending money with a lavish hand. He and his crowd drank $4 wine as long as his money lasted—and then they drank beer.

As soon, however, as Bill got broke, he went to Bradford and demanded money, holding over his head the knowledge he possessed of his former life. This happened several times, and finally Bradford began debating whether to leave for a time or shoot Bill! He was probably strengthened in the first determination by a facinating widow he had recently become acquainted with. He accordingly sold every thing he possessed, and with Mrs. Fannie Sargeant he left the city, in the middle of the night, for parts unknown.

Thus, for the third time in his life, he left between two days!

* * * * * * * * * * *

The shades of evening were falling upon the old City of Mexico. The day had been extremely warm and the entire population were on the streets. Every phase of existence could be seen and every nationality noticed within the confines of that historical city. From the days of Aztecs, who offered human sacrifices in the magnificent temples to Mexibli, their God of War, down to the present time, the lights and shades of life within its borders have been portrayed in song and story. The country itself bears some similitude to the land of the lotus-eaters—it is a country of dreamers—with not a thought for the morrow and no other ambition than to dream again.

The Cathedral was crowded with worshippers, who knelt in silent prayer before some saint, when, rising hastily they would look toward the altar, cross themselves devoutly and retire.

As the hours went by the air grew cooler, and some of the stragglers went inside.

Among the crowd yet upon the streets was John Bradford and the widow Sargeant. They had prolonged their stroll more than usual and were unconsciously nearing the outskirts of the city, when a man rose from a bench by the wall. Approaching them, he touched his hat rather awkwardly, as he inquired:

"Do I not have the pleasure of addressing John Bradford?"

The man addressed looked at him keenly, recognized his questioner, and knowing it was futile to deny his identity, answered,

"You do! What do you wish of him?"

"I wish him to walk with me to the center of the street and exchange the civilities of Montana."

Without a word Bradford left his companion, who failed to understand the meaning of the stranger's language, standing upon the sidewalk, and stepped rapidly into the middle of the street. Both men turned at the same time and the reports of their six shooters sounded as one. There was a regular fusilade until both weapons were empty. The stranger threw his on the ground and hurried away. Bradford stood very still, apparently looking after him. Ten seconds went by, while the woman was too terrified to speak. With a quick, convulsive movement, John Bradford threw his arms into the air and fell in a heap to the ground—dead.

The stranger was Gus Rollins!

Thus, for the last time in his life, John Bradford left between two days!

The Blood Horse Association Entries for the Fall Meeting.

FIRST DAY—SATURDAY, NOV. 22, 1890.

No. 1—Introduction Purse $400; for three-year-olds and upwards, $15 from starters. Winners this year of one race at this distance, when carrying weight for age or more to carry five pounds; of two or more such races ten pounds extra. Maidens, if three years old, allow seven pounds: if four years or over twelve pounds. Starting money divided, 70 per cent. to second, and 30 per cent. to third horse. One mile.

Dennison Bros.' ch c, 3, Prince's First by Prince of Norfolk, dam Lizzie Idle.
J. J. Dolan's b g Revolver by Joe Daniels, dam Jule.
M. A. Foster's bh, 4, Dan M. Murphy by Speculator, dam Leona.
Wesley George, b g, a, Applause by Threo Cheers, dam Alice N.
T. S. Montgomery's br m, 4, Alfareta by Wildidle, dam by Monday.
L. J. Rose's b g, 3, Rico by Shannon, dam Fannie Lewis.
Matt Storn's ch g, a, Kildare by Kyrle Daly, dam Mistake.
Kenney Bros.' b g, 4, Kilgariff by Flood, dam Patilla
Bert Lane's b g, 4, Wild Oats by Wildidle, dam Mary Givens.
E. S. Paddock's b f, 3, Adelaide by Grinstead, dam Victoria.
Palo Alto's ch f, 3, Muta by Wildidle, dam Mutiny.
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
L. U. Shippee's b c, 3, Take Notice by Prince Charlie, dam Nota Bene.
P. Siebenthaler's ch c, 3, King Hooker by Joe Hooker, dam Violet.

No. 3—Purse $400; for two-year-olds; $15 each from starters. Winners of any two-year-old race this year to carry three pounds; of two such races, five pounds; of three or more, 12 pounds extra. Starting money divided 70 per cent. to second, 30 per cent. to third. Three-quarters of a mile.

Matt Storn's b f Cheerful by Three Cheers, dam Queen Emma.
Lone Stable's b c Getaway by Argyle, dam Cutaway.
Lone Stable's blk c Power by Powhattan, dam Lawn Tennis.
C. Mulkey's b c Sinfax by Wildidle, dam Fostress.
Palo Alto's b c Nero by Flood, dam Queen Bess.
Palo Alto's ch f Rosebud by Wildidle, dam Rosetta.
L. U. Shippee's b c Lodowic by Longfellow, dam Carrie Phillips.

No. 4—The November Stakes, for three-year-olds and upwards; $25 each, $15 forfeit, with $400 added; $75 to second, third to save stake. One mile and a quarter.

Dennison Bros.' b h, 4, Hotspur by Joe Daniels, dam sister to Jim Douglas.
John F. Foster's ch g, 4, Nalcho B. by Wanderer, dam Flower Girl.
W. L. Appleby's ch m, 4, Odette by Shiloh, dam Margery.
Matt Storn's ch m, 3, Marigold by Milner, dam Katie Pease.
Bert Lane, b g, 4, Wild Oats by Wildidle, dam Mary Givens.
P. Siebenthaler's ch c, 3, Sheridan by Young Bazar, dam Lost Girl.

SECOND DAY, TUESDAY, NOV. 25, 1890.

No. 5—Selling purse $400, of which $50 to second; for three-year-olds and upwards. Fixed valuation $1,000; three pounds allowed for each $100 less down to $700, then one pound for $100 down to $300; selling price to be named through the entry box at 5 P. M., the day before the race. Three-quarter mile heats.

J. J. Dolan's b g Revolver by Joe Daniels, dam Jule.
W. George's b g, a, Applause by Three Cheers, dam Alice N.
C. Holloway's ch g, a, Forrester by Joe Hooker, dam Mattie C.
Jas. Irvine's br g, 4, Joe Wynne by Planeroid, dam Selima.
Kenney Bros.' b g, 4, Kilgariff by Flood, dam Patilla.
Bert Lane's b g, 4, Wild Oats by Wildidle, dam Mary Givens.
H. D. Miller's ch m, a, Ida Glenn by Glen Elm, dam Queen.
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
Elmwood Stable's b m, 5, Nerva by Bob Wooding, dam Lizzie Marshall.

No. 7.—The Record Stakes for three-year-olds and upwards; $25 each, $15 forfeit, with $500 added, of which $50 to second, third to save stake. Five furlongs.

Dennison Bros.' ch c, 3, Prince's First by Prince of Norfolk, dam Lizzie Idle.
Geo. Dinsdale's ch h Joker by Joe Hooker, dam Daisy Miller.
M. A. Foster's b h, 4, Dan M. Murphy by Speculator, dam Leona.
John F. Foster's ch g, 4, Naicho B by Wanderer, dam Flower Girl.
L. J. Rose's b g, 3, Rico by Shannon, dam Fannie Lewis.
T. S. Montgomery's br m, 4, Alfarata by Wildidle, dam by Monday.
J. W. Harper's b g, 5, Jack the Ripper by Captain Jack, dam Jennie Mc.
Matt Storn's ch g, a, Kildare by Kyrle Daly, dam Mistake.
Jas. Irvine's br g, 4, Joe Wynne by Planeroid, dam Selima.
H. D. Miller's ch m, a, Ida Glenn by Glen Elm, dam Queen.
Love Stable's b g, 3, Leland by Flood, dam Amelia.
C. Mulkey's r g, 5, Tim Murphy by Kyrle Daly, dam Maggie R.
Piedmont Stable's b g, 3, Gorget (for Reno) by Wildidle, dam Mary Wade
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
W. B. Sanborn's b g, 4, Inkerman by Ironclad, dam Alice
Elmwood Stable's b f, 3, Initiation by Inauguration, dam Brown Maria.
Gus Walters' br g, 3, Gambo by Wildidler, dam Dottie Dimple.
P. Siebenthaler's ch c, 3, King Hooker by Joe Hooker, dam Violet.

No. 8.—Purse $350; a handicap for two-year-olds; $10 each, $5 declaration; $25 to second, $10 to third. Weights announced on the first day of the meeting; declarations due at 5 o'clock P. M. the day before the race Seven furlongs.

L. J. Rose's b c Conrad by Flood, dam Goula.
Matt Storn's b f Mystery by Three Cheers, dam Mistake.
Matt Storn's b f Cheerful by Three Cheers, dam Queen Emma.
G. H. Kennedy's b f Acclaim by Three Cheers, dam Rosette.
Lone Stable's b c Getaway by Argyle, dam Cutaway.
Lone Stable's blk c Power by Powhattan, dam Lawn Tennis.
C. Mulkey's b c Sinfax by Wildidle, dam Fostress.
Palo Alto's b c Nero by Flood, dam Queen Bess.
Palo Alto's ch f Rosebud by Wildidle, dam Rosetta.
L. U. Shippee's b c Lodowic by Longfellow, dam Carrie Phillips.
Elmwood Stable's br c Sir Walter by Nathan Coombs, dam Bessie.

THIRD DAY, THURSDAY, NOV. 27, 1890.

No. 9.—Handicap Sweepstakes for three-year-olds. $30 each, $15 forfeit. $10 declaration, with $400 added; $60 to second, third to save stake. Weights announced on the second day of the meeting; declarations due at 5 P. M. the day before the race. One mile and an eighth.

L. J. Rose's b g Rico by Shannon, dam Fannie Lewis.
W. L Appleby's b f Raindrop by Wildidle, dam Teardrop.
Matt Storn's ch f Marigold by Milner dam Katie Pease.
Palo Alto's ch f Muta by Wildidle, dam Mutiny.
L. U. Shippee's b f Mabel F by Longfellow, dam Carrie Phillips.
L. U. Shippee's b c Take Notice by Prince Charlie, dam Nota Bene.
Elmwood Stable's b f Initiation by Inauguration, dam Brown Maria.
P. Siebenthaler's ch c Sheridan by Young Bazar, dam Lost Girl.

No. 11—Selling Purse $400; $50 to second; for three-year-olds and upwards. Fixed valuation $1,200. Three pounds allowed for each $100 less down to $800; then two pounds for each $100 down to $400. Seven furlongs.

M. A. Foster's bh, 4, Dan M. Murphy by Speculator, dam Leona.
W. George's b g, a, Applause by Three Cheers, dam Alice N.
C. Holloway's ch g, a, Forrester by Joe Hooker, dam Mattie C.
Jas. Irvine's b g, 4, Joe Wynne by Planerold, dam Selima.
Kenney Bros.' b g, 4, Kilgariff by Flood, dam Patilla.
Bert Lane's b g, 4, Wild Oats by Wildidle, dam Mary Givens.
Lone Stable's b g, 3, Leland by Flood, dam Amelia.
Piedmont Stable's bb, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
Piedmont Stable's bh, 4, May Boy by Lame Deer, dam Bess.
Elmwood Stable's br m, 4, Installation by Inauguration, dam Brown Maria.
Gus Walters' br g, 3, Gambo by Wildidler, dam Dottie Dimple.
P. Siebenthaler's ch c, 3, King Hooker by Joe Hooker, dam Violet.

No. 12.—Purse $400; for three-year-olds and upwards; $15 each from starters; starting money divided, 70 per cent. to second, 30 per cent. to third. Five furlong heats.

J. J. Dolan's b g Revolver by Joe Daniels, dam Jule.
M. A. Foster's bb, 4, Dan M. Murphy by Speculator, dam Leona.
W. L. Appleby's b f, 3, Rainprop by Wildidle, dam Teardrop.
L. J. Rose's b g, 3, Rico by Shannon, dam Fannie Lewis.
J. W. Harper's b g, 5, Jack the Ripper by Captain Jack, dam Jennie Mc.
Matt Storn's ch g, a, Kildare by Kyrle Daly, dam Mistake.
H. D Miller's ch m, a, Ida Glenn by Glen Elm, dam Queen
O. Mulkey's s g, 5, Tim Murphy by Kyrle Daly, dam Maggie R.
Piedmont Stable's b g, 3, Gorget by Wildidle, dam Mary Wade.
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
W. R. Sanborn's b g, 4, Inkerman by Ironclad, dam Alice.
Elmwood Stable's b g, a, Vinco by Bob Wooding, dam Mollie H.
Gus Walter's br g, 3, Gambo by Wildidler, dam Dottie Dimple.
Picket Taylor's ch h, a, Peregrine by Joe Hooker or Jumbo, dam Irene Harding.

FOURTH DAY, SATURDAY, NOV. 29, 1890.

No. 13—Purse $400, a handicap for two-year-olds; $10 each; $5 declaration: entrance and declaration money divided 70 per cent. to second, 30 per cent. to third. Weights announced on the third day of the meeting. Declarations due at 5 P. M. the day before the race. Fifteen-sixteenths of a mile.

L. J. Rose's b c Conrad by Flood, dam Goula.
Matt Storn's b f Mysterie by Three Cheers, dam Mistake.
Matt Storn's b f Cheerful by Three Cheers, dam Queen Emma.
Lone Stable's b c Getaway by Argyle, dam Cutaway.
Lone Stable's blk c Power by Powhattan, dam Lawn Tennis.
C. Mulkey's b c Sinfax by Wildidle, dam Fostress.
Palo Alto's b c Nero by Flood, dam Queen Bess.
Palo Alto's ch f Rosebud by Wildidle, dam Rosetta.
L. U. Shippee's b c Lodowic by Longfellow, dam Carrie Phillips
Elmwood Stable's br c Sir Walter by Nathan Coombs, dam Bessie.

No. 15—The Holiday Handicap, for all ages; $50 each, $25 forfeit, $15 declaration, with $750 added; $100 to second, $50 to third. Weights announced on the third day of the meeting; declarations due at 5 P. M. the day before the race. One mile and a quarter.

Dennison Bros.' b h, 4, Hotspur by Joe Daniels, dam sister to Jim Douglass.
J. J. Dolan's b g Revolver by Joe Daniels, dam Jule.
L. J. Rose's b g, 3, Rico by Shannon, dam Fannie Lewis.
W. L. Appleby's ch m, 4, Odette by Shiloh, dam Margery.
W. L. Appleby's b m, 3, Raindrop by Wildidle, dam Teardrop.
T. S. Montgomery's br m, 4, Alfareta by Wildidle, dam by Monday.
Matt Storn's ch f, 3, Marigold by Milner, dam Katie Pease.
O. Mulkey's b c, 2, Sinfax by Wildidle, dam Fostress.
Palo Alto's ch f, 3, Muta by Wildidle, dam Mutiny.
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
L U. Shippee's b c, 3, Take Notice by Prince Charlie, dam Nota Bene.
L. U. Shippee's br f, 4, Picnic by Mr. Pickwick, dam Countess.
Elmwood Stable's b g, a, Naheau by Nathan Coombs, dam Beauty.
P. Siebenthaler's ch c, 3, Sheridan by Young Bazar, dam Lost Girl.

No. 16—Purse $400, of which $50 to second, $25 to third; an owner's handicap for horses that have started and not won at this meeting. Weights to be named through the entry box at the time of declaring, 5 o'clock P. M. the day before the race. One mile.

John F. Foster's ch g, 4, Naicho B. by Wanderer, dam Flower Girl.
M. A. Foster's b h, 4, Dan M. Murphy by Speculator, dam Leona.
T. S. Montgomery's b m, 4, Alfareta by Wildidle, dam by Monday.
Matt Storn's ch g, a, Kildare by Kyrle Daly, dam Mistake.
H. D. Miller's ch m, a, Ida Glenn by Glen Elm, dam Queen.
Lone Stable's b g, 5, Leland by Flood, dam Amelia.
Love Stable's b c, 2, Getaway by Argyle, dam Cutaway.
Piedmont Stable's b g, 3, Gorget by Wildidle, dam Mary Wade.
Piedmont Stable's b h, 5, Jackson by Luke Blackburn, dam Ivy Leaf.
Elmwood Stable's b f, 3, Initiation by Inauguration, dam Brown Maria.

Pedigrees.

EDITOR BREEDER AND SPORTSMAN:—The promiscuous "making up" of pedigrees indulged in by breeders of horses, both trotting and running, and the selling of horses with such "made up" pedigrees to parties coming from beyond the confines of our State, is now in a fair way to work a great injury, not only to our breeders who give straight pedigrees, but also to place barriers in the way of the purchasers, which will prevent their having their horses registered as they should be. It would be well for parties contemplating the sale of horses to foreigners to see to it that the pedigrees which accompany such animals are correct. In the first place it will facilitate the registration of the horses in the country to which they are sent, and again will enable the party or parties who make the purchase to claim for their stock an authentic pedigree and not (as has been the case) be told after having made the breeding, given them a matter of record, that a horse which they claim to be by "so and so" out of "such a dam" is owned in the State and that the exporter is parading in false colors. Such little "schemes," done only for the purpose of getting rid of some "skate," may be all right for the time being, but it cannot last always. Let us look over our own Register as an example of what I wish to show. You do not have to run over many pages until you see—said to be by—out of a mare said to be by —. This refers to our early horses; those who came here in the sixties. Breeders all know what trouble they have had in this pedigree line. The men who are to day selling horses with pedigrees of a shady character to our neighbors are paving a good road to place other countries in the same fix we are in. This particularly refers to Japan and horses sent there.

The people who come here from Japan to purchase horses are far ahead of our horsemen as regards the examining of a horse as to defects in his conformation, but they are not well posted on the pedigree business, which they leave solely to those of whom they purchase horses. Now, certain unscrupulous fellows have taken advantage of this and sent horses over to Japan with pedigrees as long as your arm, when they might as well have tacked them up to a clothes horse—they would come as near being the pedigree of the clothes horse as any thing else. Our Japanese friends have accepted them without considering the source from which they came. Have the parties who have been doctoring pedigrees ever looked at the exportation of horses to Japan in this way? Here is a new country—one just branching out in every line, and within the past ten years has advanced with great rapidity. They are being recognized over the entire world in every business.

Lately they have turned attention to breeding fine horses, and California has obtained recognition from them in the purchase of many. Is it a square deal to give them a doctored pedigree, and drive them from our market which will surely be the case when they see how they have been treated. England is trying to command their attention and will obtain the trade of the country, which if it were worked on a mutual benefit basis and honest work done, would be of great value to the Japanese and to the California breeders.

Give straight pedigree, and when you are treated squarely try and return the compliment and not ruin a business which will open up a market for our horses. Lay a good foundation and in return breeders will reap a reward, not only monetarily, but in years to come can look with pride upon the race of horses which will spring from the foundation they lay, providing it be well done. TOKIO.

TURF AND TRACK.

The Grand Prize of Paris for 1892 has 383 entries.

Potomac, the Futurity winner, is on the sick list.

St. Simon's book is full for the next two years at 250 guineas—($1250).

Bosque Bonita is the fastest trotter in Europe having trotted a fast mile in 2:19½.

The will of the late Mr. Jas. White, the great Australian race horse owner, has been proved at £349,731.

In the English Derby for 1892 there is only one Hermit viz., Mr. C. D. Rose's chestnut colt by Hermit from Monotony.

John Mackey says that Firenzi will remain in Matt Byrnes hands for another season, as she has been leased to him until next fall.

B. C. Holly says that he will sell out the first week in January. Trotters, thoroughbreds and mules will all be offered without reserve.

F. C. O'Reilly, who bought Hanover at the Dwyer sale for $15,500, has resold him to Milton Young, the well known breeder for $20,000.

Prince Soltykoff has disposed of the well known racehorse Mephisto to Count Lehndorff for a big figure. The horse will be taken to Germany.

Isaac Murphy, the crack colored rider, is still very sick at his home in Lexington. It is said that if he recovers he will not be seen in the saddle again.

E. J. Baldwin last week sold two horses at auction, Ganymede, b c, 4, Grinstead—Jennie B., $400, and Lijero, b g, a, Rutherford—Jennie D., $100

M. M. Ephrussi, the owner of Alicante, won $125,000 on her for the Cambridgeshire, and M. E. Blanc took $70,000 out of the ring by the mare's victory.

The 'Rural Spirit' Stakes for foals of 1890, foaled in Oregon, Washington, Montana or Idaho closed with twelve entries in the Trotting Stake and eleven in the Running Stake.

The Monmouth Park racecourse will be beautified and improved by numerous walks and driveways, ornamented on both sides by evergreens, shrubs and flowers before next season.

John Mackey last week purchased a trotting mare, full sister to Rosa B., the dam of Alfred G. 2:19¾. She is by Speculation from Elizabeth by Alexander 490, third dam by Glencoe.

El Dorado, four year old, by Starling, from Palm Flower, was purchased in England a short while ago by the Hungarian Government for $17,500, but on his way to Hungary he took cold and died at Dresden.

President Green, of the St. Louis fair, has got himself into great disrepute, says an exchange, and the directors wish to get rid of him. He ruined the St Louis Jockey club and has run the fair into a debt of $305,000.

T. C. Anghlin has purchased from E. R. Sparks, Nicholasville, the Stanberry farm for $22,000. The farm is about one mile from Lexington, and Mr. Anghlin will use it as a breeding farm, with Wilkes Boy at the head of the stud.

Sidney Fry, son of the well known penciller, is said to have landed a big double event of £5,000 to £35 about Sheen and Alicante for the Cesarewitch and Cambridgeshire. Joe Thompson, the Australian bookmaker, was the layer.

Major B. G Thomas has purchased at auction the imported horse Paramatta, four years old, by imported Cheviot (the English Cheviot taken to Australia) from Scrans for $2,000, and will probably relegate him to the stud at Dixiana.

The death of Gemma di Vergy is reported from Sydney. He was by Gemma di Vergy (son of Sir Hercules) from Mainstay, and was 27 years old. Among the horses he sired were Moonshee, Caloola, Normanby, Democrat, First Demon &c.

The following gentlemen have been chosen stewards of the Saratoga race course under the new managment: Stephen Sanford of Amsterdam, George Perkins of Kentucky, Joseph Clark of California, and W. J. Arkell and Henry Stull of New York.

Among the nominations for the English Derby of 1892 are three royally bred ones: Hyeres, a sister to Seabreeze and Riviera, Pilgrim's Progress by Isonomy out of Pilgrimage and Dragoman by Isonomy from Jannette; the trio with four others are named by (The Duchess of Montrose) Mr. Milner.

J. McCloskey has leased from James and Louis Kittson the Erdenheim Stud Farm at Cheatnut Hill, Pa., for a term of years. McCloskey was for many years stud groom at Erdenheim, having charge of, among other celebrities, the mighty Lexington, Alarm and the great broodmare Maggie B B, the dam of Iroquois, while also under his care were the well known trotters, Flora Temple and Rysdyk.

While East last month John Mackey sold the stallion Hyder Ali to some wealthy Montana breeders. Hyder Ali is a bay horse foaled 1872, by imp. Lexington, from Lady Duke by Lexington, grand dam Magdalen by Medoc, from Keph's dam by Sumpter. The stallion should prove very useful in Montana as he has in his time got many good horses, the best known being Spokane; the price paid is said to be $6,000.

The English Jockey Club have received a petition from the Gloucester Diocesan Conference, inviting them (the Jockey Club) to take such steps as may be in their power, collectively and individually to discourage everything which facilitates practices that have been declared illegal on all race courses and other places under their control. The clergy probably will be told to attend to their own flocks.

Millard Sanders made his debut on a California track last Saturday at the Bay District, and the style in which he kept Crown Point Maid going all the way was highly appreciated by the audience. Count Valensin had not expected her to go better than 2:34, as she has had no work and besides looked very suggestive of twins, but she now has a record of 2:31½.

The bay Stallion Vauxhall by Lexington, from Verona, died recently of old age. He was foaled in 1865.

Sheen has retired into winter quarters as one of the best stayers seen in England for years, he won the first and the last of 'the Roses'—£1,000 added by C. D. Rose Esqre, and also won the Cesarewitch in between. In the last race the last two miles of the Cesarewitch at the Newmarket Houghton meeting carrying 134 lbs., he beat that consistent performer Amphion easily by three lengths. Sheen is a five year old by Hampton out of Radiancy.

A peculiar incident happened at Ludlow, England on the 24th of last month. Eleven horses started in the first race—an open hunter's hurdle race, and after the race Mr. Gordon Canning, the owner of Protection, who was unplaced, lodged an objection on the ground that only seven hurdles had been jumped. The stewards found that such was the case, the man who should have superintended the work having neglected to put up the flight in the straight; the race, therefore had to be declared void.

The Duke of Portland thinks that he owes something to his great luck on the turf, and is building some almshouses on his estate at Welbeck, to commemorate the victories of his racers. An inscription on the principal building reads: "These houses were erected by the sixth Duke of Portland, at the request of his wife, for the benefit of the poor, and to commemorate the successes of his racehorses Ayrshire (Two Thousand Guineas and Derby), Donovan (Derby and St. Leger), Memoir (Oaks and St Leger), Semolina and others."

The news that such well known trainers as James Rowe and Wm. Lakeland are training themselves for starters has drawn a good deal of attention to that particular business. Caldwell and Sheridan receive $100 a day apiece when they handle the flag on any of the race courses, and their engagements last pretty well throughout the season. There is little doubt now among racing men that Caldwell will retire this year, and hence the earnest desire on the part of trainers like Rowe and Lakeland trying their hand at the business.

The race of ponies is believed by students of horse-ology to result from centuries of exposure and scant food. If so, says a contemporary, we ought to have a race of diminutive cows, also, smaller than the Jerseys, for cows have been starved and exposed for quite as many centuries as horses. Perhaps Bantam fowls are also the result of exposure and starvation for centuries before they were introduced into America? And perhaps mice were rats originally, bred down by hard treatment, short rations and outdoor lodging in bad weather? If one theory is good, why not the other?

At a special general meeting of the members of Bowes's Tattersall's in September, it was decided to raise the entrance fee of bookmakers desiring to become members from £10 to £50. This is a very substantial increase, but Australian turfmen say it will not "bluff" many who wish to become members as bookmakers. Under the guidance of Mr. M'Millan and other members, Bowes's Tattersall's has progressed in a most satisfactory manner, and now that the club is in so sound a condition, it is only right that new members who wish to act as bookmakers should pay a respectable sum for the privilege.

Some months ago Supt. Whitehead of the Wisconsin Humane Society shot a horse belonging to Samuel J. Haynes, a Racine county farmer, to prevent further cruelty to the animal, which it is claimed had not been out of the stable in nine years. After the animal had been killed Supt. Whitehead removed the hoofs to keep them as a curiosity, but some one stole them from him. Farmer Haynes afterward demanded the return of the hoofs, which Supt. Whitehead was unable to do, and the farmer secured a judgment for one hundred dollars against him on the first inst. Mr. Whitehead paid the judgment and costs which amounted to $120.

Blue Jeans, the chestnut colt formerly known as Kasson, who showed good form at Washington, and went from there to Elizabeth, is the joint property of John J. Carter of Nashville and Joseph Arthur, the playwright. The animal is named for Mr. Arthur's play, now running at the fourteenth Street Theatre, and the fact that both play and horse are "goes" would indicate that there is something fortunate in the name. Blue Jean is 4 years old, by Springbok, out of Edith. He is one of the few horses that as a two-year old had the honor of beating the great Proctor Knott, which he did at Latonia, with Come to Taw third. Mr. Arthur has backed the horse steadily this fall to a profit of nearly $10,000. The horse will be entered round New York for the winter races, and his owners count upon an improvement in performance.

It is dollars to doughnuts, says the New York Tribune, that Mr Withers will arrange a trotting meeting at Monmouth Park next autumn. Before he engaged "Knapsack" McCarthy to train the Brookdale horses, it was dangerous to mention the name of any trotter in his presence, but "Knap" seems to have been wiped out all his prejudices against the "sidewheelers," and in order to convince the public that a straight track is the best track in the world for runners as well as trotters, he has decided to offer a purse of $15,000 for the horse that trots a mile in two minutes on the course on which the mighty Salvator ran a mile in 1:35½. The straight track will receive a special preparation for the trial, and on a certain day in September, 1891, the trial will be made. It is certain that Sunol and Maud S. will be competitors. Axtell may also enter the lists, and it is likely that Belle Hamlin, Guy and Palo Alto will be sent for the prize.

Work has begun on the new grand stand of the Coney Island Jockey Club, a structure demanded by the insufficiency of the accommodations at the meeting of the club last fall. The New York Times says: "The architects, Messrs. Rowe & Becker, have furnished plans which should accommodate every one even on Suburban or Futurity days. The plan heretofore described in The Times as the one which would probably be adopted has been materially changed. The new plans call for a three-decked structure, and utilize the present stand as a portion of it. From this building wings will be built down to the clubhouse on the one side, taking in the ground now utilized as a members' stand, and on the other side as far down as the limits of the betting ring. The depth will be the same as that of the present structure, but there will be seats provided on the roof of the entire building, which will therefore accommodate as many people as the lower story. The boxes in the present structure will be retained, but in the wing nearest the betting ring the general public will be admitted to the second story as well as to the first story and to the roof. When completed, the new stand will not only be a handsome one, but as commodious as any in the country.

A glimpse at the calendar of the Victoria, a racing club will show the giant strides horse-racing is making in the antipodes. This artistically got up volume mentions, that 25 years ago, the amount of added money, given by the V. R. C., at their meeting, was £3,205. This year they are giving from the club funds £44,100. No entrance fee, nomination or deduction of any kind is made. All sweepstakes and forfeits go to stake. The stakes this year will reach between £60,000, and £70,000, including the Melbourne Cup £10,000.

The New York Sun says: "A gentleman who has had a wide experience as manager of race tracks remarked yesterday that the real obstacle to locate reforms in the tracks hereabouts was to be found in the extraordinary contempt which the big turf magnates expressed for one another's opinions.

"'Mr. Withers is a man whose ideas of racing are of a cast iron and immovable description He knows all about racing from the breeding of horses to the draining of a track. So does Mr. Belmont. They are both great millionaires, and their word is law, socially and in a business way, wherever they may be. Neither one of them is accustomed to brook comment or opposition, and both of them express their opinion shortly and decisively. In a general way, Mr. Haggin and Senator Hearst are men of the same characteristics. They are impatient of restraint and intolerant of all details. Such a thing as harmony among them is so nearly impossible that the practical managers of race tracks have long since given up any notion of ever welding the men together on any question of important turf reform. Mr. Lorillard's plan for forming a club for licensing jockeys is a good one, but if he expects to drive the quartette of great millionaire racing men together in harness he will learn what the word trouble means within the next six months or I'm no prophet.'"

Undoubtedly one of the best trotting stallions ever imported from America to Australia is the chestnut Honesty, Angur, the well known sporting writer says, Before he left his native land he showed of what he was capable by putting up a record of 2:25¾ for a mile, and here in Australia he has trotted a mile in a fraction over 2:30, and has trotted two miles in 5:13. I saw him accomplish both his Australian records in a manner which delighted everybody who saw his grand style of trotting. He won the Australian Trotting Championship, and Mr. Andrew Towne was so pleased with his performances and his breeding that he sent down and bought him for a large figure. When Mr. Towne died Mr. D. G. Clark purchased Honesty and a number of trotting mares, and he has determined to place him at the service of the public this season. The horse will stand at Cumberland, Oaklands, six miles beyond the Essendon railway gate, and the terms are 12 guineas only. Honesty descends from some of the best of American trotting blood, for his sire, Priam, was by Whipple's Hambletonian from Revere, by Glencoe, the English thoroughbred who has done so much for the American turf, and to whose picture Honesty bears a good deal of resemblance Honesty's dam, Western Girl, is by Chieftain, a notability in America, his grand dam is the Dodge mare by Jim Crow. Honesty has already sired Mystery, Probitus, Lord Exeter, and other promising young trotters in the Colonies.

The Salambo case, in which the Australian jockey Greenhalgh was implicated, is causing a good deal of excitement in India. A mare called Salambo came out at the Poona Sky Meeting in February and cleared everything before her. Nothing could make her gallop. A few days afterwards she went to Bombay, and Greenhalgh was engaged to ride her in the All-horse Handicap. She was made a hot favorite, but finished a bad fourth, and the stewards of the Western India Turf Club suspended the jockey for suspicious riding. Salambo then went to Meerat, where she died of inflammation of the lungs a fortnight after the race. Greenhalgh appealed to the stewards to reopen the case, stating that the mare had been coughing badly before the race and producing veterinary evidence to that effect; but as they declined to accede to his request Greenhalgh has brought an action for libel against the stewards of the Western India Turf Club, claiming 50,000 rupees damages. Donald Greenhalgh, the jockey referred to, is a native of Hartley, in New South Wales, where under the eye of J. Cook, the well known Sydney trainer, he gained his experience as a jockey. In 1885 he went to India with W. Southall, who buys and trains horses for Mr. A. A. Apcar, the chief racing man in Calcutta. Greenhalgh's career in India has been very successful, and he has generally borne a good character.

A fortnight ago "Lucky" Baldwin in an interview in New York insinuated that Barnes rode a number of suspicious races for him this season, and that he would not engage him to ride for next season. Barnes in an interview at Nashville says:

"My contract with E. J. Baldwin this year was to ride for him for the sum of $5 500, the contract to end with the Westchester meeting on October 15. On September 11, at noon, Dowd Williams, Mr. Baldwin's trainer, notified Horace Jackson, my valet, that McLaughlin would ride Sinaloa that afternoon in the Sheepshead Stakes.

"This was the first intimation that I had of the fact that I was not in the race, whereupon I notified L H. Rush, the agent of the stable, that I desired an interview with Mr. Baldwin, and was told I could not see him for two weeks. During that time I rode Los Angeles and Sinaloa, and Mr. Rush told me Mr. Baldwin was sorry for his (Baldwin's) action, and wished to engage me for next year. This proposition I promptly declined. Had there not been a monetary difference between us I would have quit at that time. After Westchester they wanted me to go to Linden and Elizabeth, but as they paid me $3 500 of the $4 000 due me, and therefore only owed me $500, I refused to go to the Jersey tracks, my contract having been fulfilled with Mr. Baldwin, and told his manager if they did not want to settle up they could keep the $500, which they certainty have done, Mr. Baldwin still owing me that amount.

"I have signed next year for first call with J. B. Haggin, and second call with D. T. Pulsifer. In regard to my riding, I have ridden over 100 winners this year, one-fourth of my mounts, and to make that record I think any sane person will agree that a jockey must at all times do his best on the horse he rides. The racing public expects too much of a favorite jockey these times. I tell you when I can be beaten in a race it is up and up so far as riding is concerned, and the defeat is the fault of the horse or the owner, who may have him dead under him.

"Some of these writers who are giving me notoriety as the season's disappointment and casting slurs upon my integrity any honor had better watch their fences sharply, as I may yet ask them to prove these charges before a higher court than the racing public, who get sore on any jockey who is unlucky enough to ride a losing race or so on some favorite horse."

C. W. Williams says he will have three meetingsat Independence, Iowa, next year.

The Anstralian Derby winner is said to be a magnificent fellow. Alsop informed me says 'Augur' that he had lately measured him, and found that he was 16 hands 2½ inches; he is 6 feet round the girth, and with his deep ribs I don't see why he should not stay as well as anything in the country. His legs are not perhaps the best in the world, and his pasterns are rather straight, bnt he has done plenty of work, and after his two races at Randwick he was all right, so there is every probability of the colt coming to the post for the V. R. C. Derby. Whimbrel has improved since I saw him run in Victoria, bnt Alsop informs me that he had a great deal of trouble with him during the winter. His feet gave him some trouble, and one broke out badly, while one morning he came home with what appeared to be a bowed tendon, but it was only a slight blow. A course of physic pnt him all right, and if he continues to improve in a similar ratio. he will be very hard to beat for the V. R. C. Derby.

Breeders generally will be interested in the result of a case recently tried in the courts at Paterson, N. Y. Among the mares sent to Cypress at the Invincible Stock Farm this season was one owned by Assemblyman Carr, of Paterson. Mr. Bassini takes special pride in his fences, but the mare in question managed to break them, and finally got in one of the barbed wire abominations on other grounds and was injured so that she was destroyed. Mr. Carr brought an action for $2,000 damages, and though the plaintiff showed no negligence on the defendan't part, the jury returned a verdict of $250, carrying costs along. In the course of the trial the judge held that the notices accompanying advertisement. "mares kept at owner's risk," will not protect stock-farm proprietor, unless he can clear his skirts of any vestige of neglect. It seems that the jury in Carr vs. Bassini was divided, and that the verdict was merely a compromise in the face of a strong charge from the bench in favor of the defendant. The more important feature to other breeders is the legal decision about their liability in case of injury to the mares sent to their farms. "No responsibilities for accidents or escapes" is the way one large establishment tries to protect itself, but it seems the notice has no value as a preventive or defense, and there must be a special agreement under signature of the parties.

It was blowing a lilipntian gale outside and the well lighted interior was snug and warm. Laughter sounded ever and anon above the murmur of conversatiou and blue rings of rich Havana smoke curled up to the tinted ceiling, coquetting with Troubadour, Raceland and all the other pictured cracks as it rose. The sprightly Geraldine curvetted in delight as a group of prominent breeders approached the table, over which she presides in all the glory of her golden coat and scarlet rider. For she recognized every member of the group. She knew that one came from Kentucky, another from across the Rockies near where her own dear home had been, while the third represented the breeding interests of the glorious Empire State. So Geraldine pranced about in her pretty gilt frame and listened eagerly to the conversation which went on below where she hung. The Kentuckian had practical ideas ou the breeding problem, the expression of which he interspersed with dashes of philosophy, for the Kentuckian is a philosopher every inch of him. He and the Californian, having expressed their views on the questiou of breeding successfully, were on the defensive, for they disagreed with our Eastern friend. The latter waxed warm and finally, having cited innumerable which cases seemed to prove his theory, turned to the Kentuckian and said:

"Now, see here, Mr. ——: you are a practical man; a practical breeder. Tell me, then, if you wanted to get a perfect race horse, how would you go about to get one?"

The Californian looked at the Kentuckian and the Kentuckian leaned back and stuffed his hands in his pockets. Then he looked fixedly at the Eastern breeder and in measured tones.

"What should I do in order to get a perfect race horse?' he asked.

"Exactly," said the Easterner.

Well, sir," replied the Kentuckian slowly. "I fancy I should buy him!" And then the Eastern breeder rose hurriedly and buttoning his great coat over an immaculate shirt bosom went out into the gale.

It has leaked out, says the New York Times, that Pierre Lorillard's new jockey club is going to be a very exclusive affair, a sort of Racing Four Hundred, don't you know? The twenty-four privileged ones who were with him at diuner in the sacred precincts of the Union Club are to legislate for the interests of the Monmouth Park Association, the Coney Island Jockey Club, and the New York Jockey Club, who are to make a sort of trust to legislate for themselves. They will adopt a rigorous set of rules, if Mr. Withers consents, and other racing associations may use them if they care to. But the Dywers are not to be in it, nor is the Brooklyn Jockey Club. It isn't exclusive enough, and there is too much practical business about the Messrs. Dwyer to suit Mr. Lorillard and his associates. So they are to be "frozen out." The Saratoga Association may possibly be allowed to enjoy some of the privileges of the new club, which is to be known as the Jockey Club, because Senator Hearst and W. J. Arkell, who know very little about the practical conduct of a racing association, are in "the right set."

The Jockey Club. it is proposed, shall be a central governing body, like the Jockey Club in England, to whom the associate clubs shall delegate the power to make and alter rules, license jockey and trainers, regulate the collection of forfeits, and generally purify matters on the turf. One important and imperative rule will be that no horse owned in whole or in part or controlled by a bookmaker, shall be allowed to run over tracks governed by the Jockey Club rules. All of which is a proper rule, of course, but one that it would be pretty hard to enforce at the present time.

There is certainly need of such a governing body as is proposed by Mr. Lorillard, bnt it will need some more thoroughly competent and equally capable legislators to make it enthusiastically acceptable with the public than DeCourcey Forbes, the Morrises, father and son; Gen. Butterfield, W. K. Vanderbilt, J. G. Hecksoher, E. Gray Griswold, Lawrence Kip, John Hunter, J. O. Donner, ex Gov. Wetmore, R. O. Livingston, and Cornelius Fellows. None of these is well known as a turfman of experience sufficient to be trusted with such important questions as would arise. There are competent men like Messrs. Withers, Belmont, Lawrence, Bradford and Coster indentified with the olub, but they are by no means the only ones in the country, and the great West might like a chance to say something about such turf legislation as is proposed. Their representative men like Secretary Brewster, Col. Clark and other recognized turf authorities ought to be consulted when general turf legislation is to be attempted.

In England the first cross of the Arab is very seldom successful, says Augur, but I notice that a colt of Lord Bradford's named Solyman, by Chippendale from an Arab mare, won a selling race at Newmarket in July. Being a believer in the Arab cross, Lord Bradford bought the dam of the colt a few years ago from Sir Wilfred Blunt, the Arab enthusiast, with a view of breeding fillies from her, and so getting the second cross from the Arab for breeding purposes, but with the usual perverseness of the sex she produced four colts in succession, and the winner of the race in question was one of them. Her last foal, however, was a filly, with which Lord Bradford hopes in due course to try the cross in question.

Mr. J. B. Haggin seems to be disappointed at Darebin's two year olds not turning out well, says "Augur". Darebin is hardly the horse to get precocious stock. His descendants will be more likely to run better at three, four and five years old, and, when matured, carry big weights and win important handicaps, or weight-for-age and special races. The Darebin—Tulare colt purchased in America for Mr. Lionel Rothschild has been nominated for the English Derby of 1892, and he perhaps by that time will be able to win a race or two. I can easily understand one of the Rothschild family sending all the way to America to purchase a son of Darebin, for one member of the great banking firm bred Darebin's granddam. Darebin, as most Australians are aware, is by The Peer from Lurline, by Traducer from Mermaid, by King Tom. Well, Mermaid was bred by Baron Rothschild, and the family from which she sprang did much toward making the name of Rothschild famous on the English turf; hence the desire of Mr. Lionel Rothschild to secure a colt by Darebin. The great son of Lurline will put size and substance into the American stock, if he does nothing more, and in a year or two Mr. Haggin will find that he made no mistake in securing him for his stud.

The conversation turned on selling races and a quiet looking turfman, who sat in the corner silently puffing a cigar, tilted his chair back while the sunshine of pleasant reminiscences flitted across his good natured countenance.

"The funniest incident I ever experienced," said he, "occurred during the winter meeting at New Orleans. It was in the early days of the track, and some of the officials of lesser note were not distinguished for their Chesterfieldian polish. I had a mare entered in a cheap selling race under my trainer's name, and after winning the event she was put up for sale. At first there was no raise on the entered price, bnt the auctioneer dwelt considerably, and finally a young fellow about town ran her up to $500. I wanted to keep her, but didn't care to pay that figure to do it, so I let her go. As luck would have it, however, the purchaser could not make good within the specified time, so she was brought out and offered again."

"Just before the actioneer mounted the rostrum, I went to him and informed him that I owned the mare and did not care to let her go, hinting that he need not dwell too long in calling her off."

"If I'd a knowed you owned her, Mr. K——, I'd a fixed it last time, but wait till you see me do the business now," said he, with an air that convinced me that everything would go all right.

"Now, gentlemen," said he. "here's a filly by Great Tom, out of one of the most no account mares that ever dropped a foal at Belle Meade. She's entered to be sold for $300, bnt if you take a good look at that nigh fore leg you'll see that she's liable to go down at any minute, and everybody here knows that to carry more'n 90 pounds breaks her heart. Anyhow, come ter think of it, I don't know as there's a gent here as has money enough to keep a filly of this kind over winter, so I'll just knock her down to the owner. Sold ter the owner, Mr. Secertary, sold to the owner."—Exchange.

Charles Reed's luck seems to have changed. Last month he purchased through John Mackey the imported stallion Cheviot for $10,000 and a few days after the purchase the news came that Little Bernie, one of the very few colts left by him after a short season in Australia, had won three big races in remarkably good time. Immediately on receipt of the news a promiuent California racing man made a big offer for Cheviot, but was too late. Cheviot is a good, hard bay, foaled in 1879, in the Middle Park Stud, New Zealand, and was imported to America in 1888 by Dr. W. G. Ross, making a short season at Senator Hearst's ranch at San Simeon, and again standing there the next season, while last season he was taken to Sacramento and his book readily filled at $100; Senators Hearst and Stanford, L. J. Rose, E. J. Baldwin, and others sending the pick of their broodmares to him. prominent among the mares being Glendew. the dam of Guenn, Guardsman, Geoffrey, and others; Lady Evangeline, the dam of Flood Tide; imported Mntiny; Santa Anita, the dam of Gano; Santa Anita Belle, a sister to Gano. Imported Fairy Rose, dam of Racine: Precious, the dam of Peel and Pliny, and several of Senator Hearst's best mares have exceptionally good looking foals by Cheviot, which are in good hands and are bound to race. It is greatly to be regretted that the horse was sold out of the State, but until too late no one here showed any great anxiety to pay a fair price for him, despite the glowing accounts that were received from Australia every mail, and the colts they should have seen growing every day to be more like race horses. Cheviot is a full brother to Rancho Del Paso's Sir Modred, and was a good race horse, winning, among other races, the Canterbury Derby, Midsummer Handicap and Craven Stakes. In order to show plainly the grand blood which courses through the veins of Cheviot we give his tabulated pedigree.

CHEVIOT.

* Imported from England.

Notwithstanding the recent revolution in Buenos Ayres, racing there is going ahead, and the season so far has been a great success. The crack three year old appears to be Asteroide, by Retreat from Black Stocking, who was purchased in England as a yearling for 300 guineas. He has run twelve times and has only been beaten twice. Of the elder horses Gloriation, who won the Cambridgeshire in 1887—remains unbeaten, but he has never yet met the native-bred champion Indecis. Frazer, the Australian trainer, has been very successful with the horses belonging to Mr. Kemyss, who it is said will shortly try his luck on the English turf.

The death of the Hon. James White has created a discussion in English sporting papers on the subject of nominations becoming void by the death of the nominator. According to Australian ideas, says a well known writer, such a rule has nothing to recommend it; but 'A Member of the Jockey Club' thinks differently. A correspondent who advocated the adoption of a rule similar to the A. J. C. rule had said among other things, that the English rule was "unfair to the executors or legal representatives of a deceased nominator, because they are placed in the forfeit list, and expected to pay, whilst they have no chance of winning, or of transferring their liability; but 'A Member of the Jockey Club' replied that "on the death of the nominator, the nomination is void, and there is no forfeit due to or from anyone. It is not by any rule of the Jockey Club, but by the laws of this country, that the nomination must become void. If an executor paid the forfeit the Court of Chancery would make him pay the money out of his own pocket. The only alteration possible would be to adopt the Australian Jockey Club rule. It is by no means sure that this would be an unmixed blessing in many cases. Take, for example an owner of twenty or thirty horses in training dying in the prime of life. His heir may be a distant relative whom he either scarcely knows or does not know at all. If he has made his will and left his money and estates to some one or more friends, he might very probably not have mentioned his horses in his will. They change year by year, and if the will had been made five or ten years before his death, a completely fresh lot of horses would be in his stable. What is to become of these horses? Will the heir-at-law take them and pay the £8,000 or £10,000 worth of forfeits due? If they are good horses there would be no difficulty in selling them with their engagements; but those known to be bad, and those untried publicly, would never be sold. With all its disadvantages, I believe the present law or rule causes fewer difficulties, and is fairer than any other which has yet been suggested. The Australian rule is the next best, but it might lead to a large stable of horses being left without an owner. By transferring the forfeit from the deceased owner to the horse you could not force the heir to take horses with such liabilities, all of which he would have to meet if he failed to sell them by private contract or public auction. There is a great deal to be said on both sides, but no alteration of the law can be made without incurring disadvantages that are even greater than those which exist."

John Mackey, Rancho del Paso's well known superintendent, returned last week from New York, bringing with him a car load of mares, Fresno and the Prince of Milers Salvator. Dr. Hall, the celebrated New York veterinary surgeon, came out with the horses which arrived in good trim. Mr. Mackey who came down to San Francisco last Saturday, says the trip was made very successfully, there being no sickness among the horses, while Salvator walked out of his box as fresh as a pink. It is the first appearance of the premier racehorse of the age to California, and he will attract many visitors to Sacramento during the next six months. Fresno, who is four years old, was very promising as a two-year-old, winning three good races, never got into form again, and will be put in the stud, he is by Falsetto from Cachuca by King Alfonso, etc. He should prove a good sire.

Sixteen mares were brought on the cars and they will retire into private life at Rancho del Paso. They were Bella B., five years old by Enquirer from Colossa, and therefore own sister to Inspector B. As a racehorse Bella has, though rather erratic, been very successful in the Dwyer colors. As a two-year-old old she did not start; at three years old she won nine races, including the Ladies Stakes at Jerome, the Mermaid Stakes at Coney Island, the Alabama at Saratoga, in which she beat Los Angeles by a head at two pounds the worst of the weight, the Sceptre at Brooklyn, one and three sixteenths of a mile winning in a canter by three lengths from Santalene, Los Angeles and others, the Vestal Stakes 1½ miles at Baltimore, by twelve lengths from Los Angeles.

As a four-year-old she did not run up to form, only winning four races and this year accounted for three races.

Bessie June, a bay mare six years old by King Alfonso, from Virga: she was also very successful on the race track under the Dwyer colors, winning ten races at two years old, four at three, eight at four, and six at five years old. Clay Stockton, a bay mare five years old, by Longfellow, from Lida Gaines; she has won eight races during her turf career.

Dalnshire Lass, a three-year-old filly by imp. Dalnacardoch, from imported Yorkshire Lass (dam of Little Fred, Ruetler, etc.)

Pink Cottage, a bay mare ten years old by imported Buckden, from Beatrice; during her long career on the track, she has won thirty-one races in good company.

Rosette, a three-year-old sister to C. H. Todd and Sorento.

Flora Ban, a three-year-old by King Ban, from Flora by War Dance.

The other ten were purchased at the Ferncliffe sale. They are: Bedotte (sister to Brocade) by imp. Bonnie Scotland, from Ermengrade (dam of Baltic, Belvidere, Brocade, etc.), by Lightning, from Sister to Ruric, dam of Grinstead, Viceroy, Kelpie, and other good race horses.

Bonnie Leaf, a bay mare 14 years old by Bonnie Scotland, from Ivy Leaf, and therefore own sister to Bramble, By and Bye, Brambaletta, etc.

Glidelia, a chestnut mare 13 years old, by Bonnie Scotland, from Waltz, dam of Hop, Gladiola, etc. Glidelia was a great race mare, and should prove a great broodmare.

Jewelry is a 12-year-old chestnut mare by War Dance, from Gold Ring (dam of Bullion, Ninon, etc.) by Ringgold. Jewelry was a good performer, and is the dam of Guess.

Naiad, a chestnut mare by imp. Mortemer from Highland Lassie by Blair Athol. Peoria, a chestnut mare eight years old by imp. Mortimer from imp. Matchless by Stockwell; she is a full sister to Puzzle and Pagan and is one of the most royally bred mares in the stud book, her dam being by Stockwell, grand dam by Kingston, thru Birdcatcher and Touchstone. Prude, a bay mare 12 years old by King Alfonso from Marguerite (dam of Katie Creel, Azalea, Rocket, Macola and Nellie C. all winners) by Lexington etc. Imported Windmill, a five year old mare by Favonius out of the dam of Instructor. by North Lincoln, and the yearling filly by imp. Friar Tuck is from Windmill.

Breeding Race Horses.

Some time ago there was a controversy in these columns on the scientific breeding of thoroughbred racehorses, says the Australasian. Those who took the scientific side advanced many theories, but we are afraid that not one of them is likely to lead to the royal road to success which the scientists so confidently asserted would follow an adherence to their principles. One enthusiast declared that if scientific principles adopted in connection with the growing of cabbages resulted in success, why should not similar results follow in the breeding of racehorses? The answer to that is very simple. By growing cabbages scientifically you can always depend upon ninety out of every hundred being first-class, whereas with racehorses, no matter what science you bring to bear, the percentage is almost invariably the other way. If a breeder should happen to hit upon a sire like Chester, who nicks successfully with nearly every mare put to him, whatever her blood may be, than the owner of such a stud horse is surely on the road to fortune; but a full brother to Chester, put to the same mares, would just as likely prove as great a failure as Chester was a success, even though he had the very same advantages, and the mares were fed and attended in an exactly similar manner. This is an anomaly which even the most scientific of scientific breeders cannot explain. In England, an enthusiast on breeding, Mr. H. Strickland Constable, has been airing his opinions upon the subject, and to show how the presumed judges differ he gives the ideas of several whose names are known throughout the sporting world. "Why is one race horse better than another?" is the query submitted by Mr. Constable. One judge, he says, will declare that it is because he has more crosses of Whalebone blood, while another says it is because he has more crosses of Herod blood, while a third will go bald headed for the Blacklock line. Just now the descendants of Blacklock are right at the top of the tree, and those who have so consistently denounced them have to sing small. Mr. Constable seems to be of opinion that the reason one racehorse is better than another is that if two colts be equally well bred that which is the better shaped of the two will, as a rule, turn out the more brilliant racehorse.

He refers to Admiral Rous as one who held different views, for the gallant old Nestor of the turf declared that breeding was a lottery, and that horses ran in all shapes. The Admiral said that the best bred horse he ever knew was the slowest he ever tried; that some of the greatest mares upon the raceconrse bred nothing that could win a race, while some of the jadiest bred the stoutest racehorses. Matthew Dawson, who stands at the head of his profession as a trainer in England, in an interview was asked if he agreed with the doctrine of breeding from certain strains of blood. "Not at all," answered the trainer. "The conformation of the mares is of far more importance than their special descent, despite fanciful theories of crosses and so on." Other authorities favor the in-and-in system of breeding; but Mr. Constable tells us that if there is nothing else to say against it, Darwin has proved that it ends in sterility. "We cannot efface from our memory the fact that many of the greatest racehorses of all times have been in-bred, and therefore we are not at all inclined to accept any theory which is opposed to inbreeding, so long, be it remembered, as it is not too close. Mr. Constable is a firm believer in make and shape, and while he agrees that good horses with a string of illustrious ancestors are more likely to breed successfully than others that are to most eyes equally well shaped, he declares that it will not be from any imaginary mystic quality in the blood, but from the the extra good make and shape which the average human eye is not acute enough to discern. He denies that horses run in all shapes, but, nevertheless, we have seen some very curiously shaped horses win important races. Still the best shaped horses are, as a rule, the most celebrated upon the turf, though, in our humble opinion, action often has more to do with success than anything else. "Some horses," says Mr. Constable, "are speedy, some are stayers, but it will be all in the make and shape if we only had eyes to see it. The best judge of a racehorse I know tells me he has observed that good stayers are apt to be somewhat narrower to follow than the speedy ones for a short distance. Blood in these days is so mixed that it is easy to talk plausably about four or more crosses of Whalebone blood being necessary, or some other such fancy.

But to bring one of these theories to anything like proof would require careful analysis of the breeding and performances of all horses that are trained, and then some mathematical demonstrations carried out in the doctrine of chances. But what theorisers do this? Given their way of proving a case, I could prove anything whatever, as, for instance, that four crosses of white hairs in the tail will make a first-class race horse. When a man gets an idea into his head he often rides it to death, and can see no other. There is much lottery or chance in breeding, but it is not, as Rous said, all chance. He said that good horses breed bad ones, but they are rather less likely to do so than others equally well shaped to the eyes of the merely average good judge. On the other hand, the idea that only the best performers can sire a good race horse is much exaggerated. Unfashionably bred horses like St. Gatien are often first-class. According to Admiral Rous, in proportion to the numbers of untashionably-bred ones born and well trained, they win as many races as those that are fashionably bred Archbishop Whately was fond of composing and propounding riddles. One day he asked, 'Why do white sheep eat more than black ones?' After listening to sundry answers, as for instance, that black sheep absorbing more caloric requires less food, the Archbishop said 'No, the reason is that there are more of them.' So, we may ask, why do the progeny of celebrated and fashionable horses win more races than those of less known ones? Then will come answers about their having more whalebone blood in them, or some such guess. Then comes the answer, 'Because there are more of them.' More are born, more are trained. Besides this, the fastest mares (that is, the best-shaped ones) go to them, and the progeny, having cost more, get into the best training stables."

There is a good deal of sound reasoning in the remarks of Mr. Constable, who evidently is a believer in common sense principles being adopted in relation to the breeding of thoroughbred stock, but he scarcely demonstrates to our satisfaction why one racehorse is better than another. In Australia we might take Carbine as an illustration. He is a far superior racehorse to many who are better shaped, and he is so because he possesses that beautiful machine-like action which, when he is thoroughly extended, is the admiration of everybody. A full brother might not be worth as many pence as he is worth guineas, simply through an absence of that magnificent action which has enabled Carbine to electrify the spectators in many a hard fought contest. For our part we should strongly advise breeders to stick to those sires whose sons and daughters are most successful on the turf. In breeding thoroughbred stock there is no certain road to success, but this is more likely to lead to a satisfactory result than trying experiments which in ninety-nine cases out of a hundred end disastrously.

John Nelson, the Celebrated Horse.

The recent correction in the date of the death of John Nelson by the Breeder and Sportsman, of San Francisco, Cal., and fixing it in 1878, instead of 1871, has again brought the question of that horse's pedigree before the public. In 1867, or perhaps earlier, we found what purported to be the pedigree of this horse somewhere, and we think we took it from an advertising card when he stood on Long Island. The source of our information simply read: "John Nelson, ch c, foaled 1851, by a son of imp Trustee, dam the Redmond mare by Abdallah." No breeder nor owner is given, and in this very unsatisfactory shape it has stood for many years. In order to get a start in the then trackless wilderness we had to accept many things on evidence then that we would wholly reject now. The great twenty-mile gelding, Trustee, died the same year that John Nelson was foaled, but he left behind him a fame so wide that everybody thought, and we among the number, that Trustee blood was the most valuable of all the elements entering into the trotter. Hence we could have had no sinister purpose in writing "son of Trustee" instead of "Trustee" himself. It is said he was engaged in some races and was quite a fast trotter for his day, but unfortunately was an inveterate puller. He was taken to California in 1859 and died in 1878. He has four to his credit in the 2:30 list, and some of his daughters have been good producers. He seems to have left no sons that have succeeded as sires.

In the Monthly for April, 1887, page 118, will be found an article from the pen of a very intelligent correspondent, Mr. John W. Newell, of New Brunswick, N J. He says that John Nelson was bred by a neighbor of his, now dead, named Thomas Evans, that he knew the colt well, and that Evans always said he was by imp Trustee. The dam of the colt was a long bodied, black roan mare, and Mr. Newell says her breeding was unknown, but it was understood she came from Vermont. This colt was sold by Evans to Mr. Goelet, and by him taken to Newark N. J., and he afterward passed to Halsey Snyder, of Newark, for a debt. Beyond this point in his history Mr. Newell is unable to go. Now the question is, Did Dr. Evans send this mare of unknown breeding away off, at a large expense, to be bred to Trustee in 1850? Was he a horse fancier who could afford to spend his money in this way? Trustee was kept in Westchester County, N. Y., at that time, and died there in 1856 The books of his services would settle the point whether Mr. Evans bred a mare to him in 1850, but unfortunately an earnest search of more than a dozen years has failed to secure an inspection of those books. In his old days Harry Booth, the keeper of Trustee for a great many years, lost his wife and married again, leaving no family by either woman. When the old man died he was very poor, and his widow is spending the remainder of her days in a charitable institution. Thus have vanished all hopes of ever obtaining possession of Trustee's old books.

In the complete absence of all details and circumstances connected with the journey of the mare from New Brunswick to Westchester County, it is very hard to believe that she ever saw Trustee. This conclusion we might accept without doing violence to the good name or truthfulness of Mr. Evans. The early history of the mare was unknown in New Brunswick. She came there as a stranger, and it is possible, indeed probable, that Mr. Evans bought or traded for her when in foal, and as was the custom of the times the trader would select the most noted horse he could think of as the one to which she had been stinted. If he represented Trustee as the horse, Mr. Evans could believe it and repeat it to his friends as the sire of the colt, and do so without any dishonest purpose or motive.

Mr. Newell leaves the horse without a name, so far as known, at Newark, N. J., and some years afterward Mr. Roe, a reputable citizen of New Brunswick, found the horse John Nelson in Sam McLaughlin's stable in 1859, about to be shipped to California, and says this was the horse that had been bred and reared by Thomas Evans We take it for granted that there is no doubt about John Nelson having been stabled with Sam McLaughlin in Jersey City, for we know that Sam had a stable there. But what about the history and ownership of the horse during the years between his leaving Newark and his arrival in Jersey City in 1859? Who were the owners and what are the dates? Without these connecting links Mr. Roe's identification of the horse is not worth a pinch of snuff unless he can give special reasons and objects on which it is based. Every year of our experience we have learned to place less and less confidence in these so-called identifications. One rule is to invariably reject them unless they are based upon particular markings, either natural or artificial. A case in point illustrating the uncertainty or identification after a term of years is furnished in connection with this Trustee family in the mare Fanny Pullen. She was a noted trotter in her day, and afterward became the dam of the famous twenty-mile Trustee. She was owned by James Bridges, of Long Island. Her name was a clew to the name of her breeder, and James Pullen came all the way from Maine and fully identified her under oath as a mare he had bred. True, there was some trouble about the history and dates, but the "identification" was without doubt. Soon afterward the truth came out with complete historical proof, and it was shown that the mare was foaled the property of Sullivan Pullen, of Anson, Maine. There was no need of "identification," the history of the animal proved it, and that is what is needed in this case.

Now, who can supply the missing links in the history of this horse? Until that is done there is no use in spending any more time on the theory of his New Brunswick origin. Neither one of the two difficulties has been removed. (1) Was he bred in New Brunswick, and was he by Trustee? and (2) was the "Evans Horse" the horse John Nelson that was taken to California? We must, therefore, leave the matter just where it has stood for many years, for we have nothing to guide us in one direction or the other.—Wallace's Monthly.

Preserve your horses' health by sprinkling Darby's Fluid freely about their stables.

For animals—the best cure for Sprains, Sores, Swellings, Bruises or Cuts is Darby's Fluid.

To purify the air in stables, use the best disinfectant known—Darby's Fluid.

The Great Brood Mares.

Editor Breeder and Sportsman:—In an entertaining article in the Breeder of Nov. 1st, Mr. Harvey Wsrde Peck, one of the very few writers on the subject of breeding trotters, who seems to have no pet theory and no prejudice after enumerating sixty one "great brood mares," makes the discovery that there is a "latest something in some brood mares, which makes them greater speed producers, while mares much better bred are failures," but he seems not to have discovered what that something is.

He sums up his conclusions as follows: "A. pins his faith to the thoroughbred cross, B. glories in a mixture of pacing blood, C. wants nothing that is not standard, and D. knows that Arab blood makes them trot fast. These are individual theories, and are all doubtless worthy of study and consideration, but the superiority of any one of the first three theories is apparent, and is not justified by an examination of the list of mares given above."

I will not take up your valuable space with a re-enumeration of the list, but will content myself with a statement that any one can verify for himself. Let the reader examine the list of mares, and their breeding and see if Mr. Peck has not been hasty in his conclusions. Thirty-one of those mares, as will be seen on examination of their pedigree, have at least one pacing cross. As the breeding of nearly all of the remaining thirty is entirely unknown, on one side at least, it is but fair to assume that an equal, proportion of those untraced mares have pacing blood. This would give three-fourths of the whole number the speed producing blood of the pacer. Is not this showing alone, which was meant for an argument against B's. preference for a "mixture of pacing blood" a strong argument for it? And does it not answer the gentleman's question "What is the latent something in some brood mares which makes them great speed producers, while mares much better bred are failures?" Was it not this same element in Bertie, the daughter of Blue Bull, that gave the great trotter Phallas his first 2:30 trotter after years of failure on the most fashionable mares that money could buy? Was it not this same pacing element that gave some thoroughbred sires the only 2:30 trotters they ever got?

It is no answer to the above facts to say that in some of the instances given the pacing ancestor is remote. If pacing blood close up, begets trotting speed, (and I think no sane man questions it) it is no more lost by remoteness than is trotting blood. Either may be measurably "bred out" by numerous crosses of non-trotting or pacing blood, but when either is noted with kindred speed producing blood, it is a law of evolution and development that the speed increases, but with more certainty when there is a commingling of pacing blood as the records prove.

I challenge the world to point to a single "best record" held by a stallion, mare or gelding, or colt or filly of any age, which is bred in straight trotting lines, and with no pacing cross, near or remote. Does the presence of this element in the fastest trotters in the world, and in the sires and dams that get and produce the largest percentage of fast progeny mean nothing? Why was Nutwood more prepotent than his sire Belmont? Nutwood had a pacing cross which his sire lacked. Why was George Wilkes more prepotent than his sire Hambletonian? George Wilkes had a pacing cross and his sire not. Why is Director by Dictator more prepotent than Phallas by the same sire? Director has a pacing cross and Phallas is bred in straight trotting lines. I could multiply examples until you would reject my article for its length, but I think these are enough to justify "B." in his partiality for a "mixture of pacing blood." M. W. Hicks.

WOMAN'S INTUITION.

Nearly Always Right in her Judgment in Regard to Common Things.

An old gentleman over seventy, came into the city from his farm, without his overcoat. The day turned chilly and he was obliged to forego his visit to the fair.

To a friend who remonstrated with him for going away from home thus unprepared, he said: "I thought it was going to be warm; my wife told me to take my overcoat, but I wouldn't. Women have more sense than men anyway."

A frank admission.

Women's good sense is said to come from intuition; may it not be that they are more close observers of little things. One thing is certain, they are apt to strike the nail on the head, in all the ordinary problems of life, more frequently than the lords of creation.

"According to Dr. Alice Bennett, who recently read a paper on Bright's disease before the Pennsylvania State Medical Society, persons subject to bilious attacks and sick headaches, who have crawling sensations, like the flowing of water in the head, who are 'tired all the time' and have unexplained attacks of sudden weakness, may well be suspected of dangerous tendencies in the direction of Bright's disease."

The veteran newspaper correspondent, Joe Howard, of the New York Press, in noting this statement, suggests: "Possibly Alice is correct in her diagnosis, but why doesn't she give some idea of treatment? I know a man who has been 'tired all the time' for ten years. Night before last he took two doses of calomel and yesterday he wished he hadn't."

A proper answer is found in the following letter of Mrs. Davis, wife of Rev. Wm. J. Davis, of Basil O., June 21st, 1890:

"I do not hesitate to say that I owe my life to Warner's Safe Cure. I had a constant hemorrhage from my kidneys for more than five months. The physicians could do nothing for me. My husband spent hundreds of dollars and I was not relieved. I was under the care of the most eminent medical men in the State. The hemorrhage ceased before I had taken one bottle of the Safe Cure. I can safely, and do cheerfully recommend it to all who are sufferers of kidney troubles.

THE FARM.

Order and Regulations for the Inspection of Cattle and Sheep for Export.

Issued by Secretary Rusk.

The following order and regulations are hereby made for the inspeotion of neat cattle and sheep for export from the United States to Great Britaio and Ireland and the Continent of Europe, by virtue of the authority conferred upon me by Section 10 of the Act of Congress approved August 30, 1890, entitled "An act providing for the inspection of meats for exportation of adulterated articles of food or drink, aud authorizing the President to make proclamation in certain cases, and for other purposes."

1. The Chief of the Bureau of Animal Industry is hereby directed to cause carefnl veterinary inspection to be made of all neat cattle and sheep to be exported from the United States to Great Britain and Ireland and the Continent of Europe.

2. This inspection will be made at any of the following named stock yards:—Kansas City, Mo.; Chicago, Ill ; Buffalo, N. Y.; Pittsburg, Pa.; and at the following ports of export, viz:— Boston and Charleston, Mass.; New York, N. Y.; Philadelphia, Pa ; Baltimore, Md.; and Norfolk and Newport News, Va. All cattle shipped from any of the aforesaid yards must be tagged before being shipped to the ports of export. Cattle arriving at ports of exports from other parts of the United States will be tagged at said ports.

3. After inspection at the aforesaid stockyards, all cattle found free of disease and shown not to have been exposed to the oontagion of any oontagious disease, will be tagged under the direction of the Veterinary Inspector in oharge of the yards. After tagging, the cattle will be loaded into cleaned and disinfected cars, and shipped throngh from said yards, in said cars, to the port of export.

4. All animals will be re inspected at the port of export. All railroad companies will be required to furnish for the transportation of cattle and sheep for export, clean aud disinfected cars, and the various stock-yards located at the ports of export shall keep separate clean and disinfected yards for the reception of export animals only.

5 Shippers will notify the Veterinary Inspector, in charge of yards, of intended shipments of cattle, and will give to the said inspector, when possible, the name of the locality from which said animals have been brought, and the name of the feeder of said animals, and such further and other information as may be practicable, for proper indentification of the place from which said animals have come.

6. The Inspector, after passing said oattle, and tagging the same, will notify the Veterinary Inspector in charge of the port of export of the inspeotion of said animals, giving him the tag numbers, and the number and designation of the cars in which said animals are shipped.

7. Export animals, whenever possible, shall be unloaded at the port of export from the cars in which they have been transported directly at the wharves from which they are to be shipped. They shall not be nnnecessarily passed over any highway or removed to cars or boats which are used for conveying other animals. Boats transporting such animals to the ocean steamer must be first cleansed and disinfected under the supervision of the Veterinary Inspector of the port and the ocean steamer must, before receiving said animals, be thoroughly cleansed and disinfected in accordanoe with the directions of said Inspectors. When passage upon or across the public highway is unavoidable in the transportation of animals from the cars to the boat, it must be under such oareful supervision and restriction as the Veterinary Inspector may, in special cases, direot.

8. Any cattle or sheep that are offered for shipment to Great Britain or Ireland, or the Continent of Europe, which have not been inspected and transported in accordance with this order and regulations, will not be allowed to be placed upon any vessel for exportation, as they will be deemed under the law to have been exposed to infection so as to be dangerous to other animals.

9. The supervision of the movement of cattle from the oars and yards to the ocean steamer at the ports of exports will be in charge of the Veterinary Inspector of the port. No ocean steamer will be allowed to receive more cattle or sheep than it can oomfortably oarry. Over crowding will not be permitted.

10. The Veterinary Inspector at the port of export will notify the Collector of the Port of the various shipments of cattle or sheep that are entitled to clearance papers, and certifioates of inspection of said animals will be given to the consignors for transmission with the bills of lading.

Lean Pork and Bacon.

Feeding and breeding for lean meat seems to be a much mooted question. The man who solves the problem by either method, or both, is the coming benefactor of his age, for then it may be made, like the bogus diamond, without regard to time, beyond ten months—four to farrow and six to feed—and presto! we have it to suit the demaud, either lean meat or lard.

Do all men desire the production of lean meat? I think not. Having a wife and five children and all her relations devoted to lean meat exclusively—would as soon think of eating the fowl called commou and unclean as a bite of fat meat —so by oonsequence it becomes my duty, if not my pleasnre, to eat all the fat of eight or ten Poland Chinas, else it would be thrown to the dogs, which is too much waste for one who hopes for heaveu. Now one must provide for his own household—and of course such things as they desire—before he may escape that awfnl anathema of "worse than an infidel." As this provision of lean meat at our house is an absolute necessity, the question recurs: Can I have five hogs to produce a given quantity, or must I have ten? Here is where ohnnks of benefaction would be showered upon me in the shape of lean meat, with a family united and happy, if feeding and breeding would bring the desired result.

Now, I have an opinion as to our success of making lean meat that has not, so far as I have seen, entered into the disoussion. It may be too slow for these times of lightning express and electrioal movement generally, but I at the risk of exciting the criticism of that class of men who have done most to enlarge the carcass, perfect the symmetry and shorten the time of maturity, that we all accept as efforts in a right line, nevertheless I say we have sacrificed upon this altar that toothsome, lean old ham of the "daddies" that was made from less blood and more age, when in the olden time hogs were allowed more range and grass, less grain, longer time to mature without the foreing process so universally practiced now.

It would not do to limit science and say that rapid growth and the production of lean meat were incompatible or impossible, but until coffee, tobacco and whisky can be aged without time, I think the probability of producing lean meat without it, extremely problematical. Eighteen months of natural growth would be sufficient time to develop the fibers into bone and muscle in one of our small boned varieties; then say seventy to ninety days full feeding with corn and an occasional ration of shipstuff or clover would round up a three hundred pound hog with thick leaf lard and a ham not too large for curing and cooking whole. Now this is my idea of bacon for the family. If commerce must have the elephantine swine we have him already to perfection; let's see if we can't produce something fit to eat at home, if it does take more time.—J. L. McAllister, Bath county, Ky., in O. C. Farmer.

Importation of Live Stock.

The regulations in the McKinley bill regarding the importation of live stock for breeding purposes are changed somewhat from those at present in force and, as they are of interest to both stock breeders and farmers, we give them in full:

"Any animal imported specially for breeding purposes shall be admitted free: Provided, That no such animal shall be admitted free unless pure bred of a recognized breed and duly registered in the book of record established for that breed. And provided further, That certificate of such record and of the pedigree of such animal shall be produced and submitted to the customs officer, duly authenticated by the proper custodian of such book of record, together with the affidavit of the owner, agent, or importer that such animal is the identical animal described in said certificate of record and pedigree. The secretary of the treasury may prescribe such additional regulations as may be required for the strict enforcement of this provision.

"Animals brought into the United States temporarily for a period not exceeding six months, for the purpose of exhibition or competition for prizes offered by any agricultural or racing association; but a bond shall be given in accordance with regulations prescribed by the secretary of the treasury; also teams of animals, including their harness and tackle and the wagons other vehicles actually owned by persons emigrating from foreign countries to the United States with their families, and in actual use for the purpose of such emigration, under such regulations as the secretary of the treasury may prescribe; and wild animals intended for exhibition in zoological collections for scientific and educational purposes, and not for sale or profit."

These regulations put an end to the free importation of live stock except such as will tend to improve the breeds in the country. Heretofore large numbers have been brought in nominally for breeding purposes which were unfit and were used in other ways. This was largely done in the case of horses brought in from Canada and then used as work teams. The new regulations were drawn up by a well known Michigan stockman, and will correct abuses prevalent under the old law.—Drovers' Journal.

Cheese Making.

John Benton, instructor in the British Dairy Institute gives the methods for making soft cheeses.

The first is made from whole milk only, and is somewhat similar to the French coulommiers. One gallon is required to make two cheeses. The milk is set in quantities of six gallons or so in oak tubs provided with lids holding rather more than this quantity. Rennet is added at a temperature of 78 degs. F., sufficient only being used, mixed with a little water, to coagulate the milk in about twelve hours. The rennet is usually measured with a French cubio centimeter pipette, which is more suitable than the English measuring glasses. When the curd is firm enough to break clean over the finger it is ladeled out into moulds provided for the purpose, which are placed upon mats spread on beech or yellow pine boards. These moulds are in two divisions, and when the curd has sunk into the lower half the cheese is turned and slightly salted on one side, the same process being gone through with the other side the next day. When the cheeses are firm enough to handle they are ready for sale, or if the consumer prefers a more ripened article they may be kept a few days in a cool place without harm.

The other cheese is generally called the Gervais, a cheese made from thin cream. I think the latter cheese the best. About three quarts of the mixture is required to make one dozen cheeses, and if Jersey milk can be procured so much the better. The cream should be of such a consistency that 1½ quarts would make one pound of butter; this is important, as if the cream used is too thick it reduces the profit. The mixture is set in earthenware vessels at a temperature of 65 degs. F., about three drops of Hansen's rennet being added for one dozen cheeses. The mixture is stirred occasionally to prevent the cream rising, but not on any account after coagulation has been commenced.

In about twenty four hours the curd will be found sufficiently firm to ladle out in clean slices, and very carefully, into thick huckaback cloths, about three quarts into each cloth, and then hung up to drain or placed in the small presses used for the purpose. The cloth should be opened out once or twice during draining, and the curd scraped down to facilitate draining. When the curd has acquired nice "salvy" consistency it is ready to put into the moulds, salt being added if necessary. These moulds are lined with a special kind of paper, which, besides keeping the cheese in shape, absorbs the superfluous moisture. In making these cheeses it is necessary to keep up the temperature in the cheese room to about 60 degs. F.

The Pekin Duck.

After experimenting for the last twenty years in duck culture with the large breeds, crossing them in every possible way to get the best results, Mr. Rankin, who is perhaps the most extensive duck raiser on this continent, asserts that he is perfectly satisfied with the Pekins. As he states that he grows nearly ten thousand ducklings yearly, his opinion will be considered valuable. His seeking has been after the bird that will grow the greatest number of pounds of flesh in the shortest time, and also be a bird that will give the first eggs of the season, to as to enable him to get young birds on the market when they will command the highest prices, and the Pekin, with him, has best met these requirements, while at the same time yielding pure white elastic feathers, largely mixed with down.—Canadian Live Stock and Farm Journal for October.

Why Meats go Bad in Summer.

A correspondent of the New York Advocate, writing on this subject says: "I have looked over your valuable paper ever since its publication for a chemical analysis of compositions of the different meats now consumed as food, as well as for matter relating to their nutrative values and the propensities of their fatty matters. I don't suppose there are ten butchers in every hundred who can answer a question relating to these problems correctly.

There are two composition in meats which make all the trouble in summer viz., saccharine or sugar, and egg white.

By killing an animal in a feverish or over-heated condition this saccharine matter will engage in the process of fermentation, and as a result the meat will be tainted, gassy and sour. The same bad result will be produced by salting meat before the animal heat has left the flesh; also by cutting warm beef or by storing beef in tubs or barrels in warm weather. Even in mid-winter this fermentation may occur when the carcass is frozen ontside before the animal heat has time to leave the inside tissues.

Butchers may probably say, "we know all these facts." Still a professional craftsman should not stop there. I claim it is his duty to teach his employers and customers how to prevent meats from becoming gassy, and also show them the cause of the effect.

This sacharine matter by fermenting also destroys all the egg white so valuable in meat tissue, especially when the flesh is to be used for bologna making. It prevents the meat from sticking and is thus worthless for bologna. As a food it is about as bad as poison.

The Rooting of Potatoes.

At the Indianapolis meeting of scientific agriculturists, Prof. Burrell in the course of a paper on "The Rotting of Potatoes," said: "It has long been known that a fungus (Peronospora) is one of the destructive agents in the rotting of potato tubers. Bacteria have been noted as present in the disorganized tissue-masses, but they have rarely been supposed to be active agents in the disorganizing process itself. At least they have not been credited with being the primary cause. Great numbers of bacteria of different kinds have been observed in decaying potatoes, especially in such as become moist and soft, and emitted an offensive odor. An examination of such decaying tubers of the present summer revealed the fact of the presence of bacteria in great numbers, but also showed an absence of anything else to which this decay could be attributed. Further and more critical tests led to the same conclusions. Besides the evidence of direct observation with the best microscopical appliances, cultures were made in different ways to develop into visibility anything and everything having the power of growth in the affected tissues. From all the evidence it appears that a certain species of bacteria was the potential factor in the rots referred to. Separating this particular species by pure cultures conclusively proved that this bacterium, unaided and unattended by anything else whatever, was capable of causing the disagreeable and destructive changes observed, reducing the potatoes to a loathsome mass of ill-scented corruption. This organism would no doubt be identified by many as the bacterium termo. The only remedy suggested is to carefully pick over and examine seed potatoes.

Food Value of Eggs.

There is a very general impression in the minds of most people that all eggs are equally healthful and nutritious. Even when your marketman is very filthy in his habits and conditions, the general remark is made that it is at least safe to buy eggs of him, as much as to say that eggs are cleanly independent of conditions. This is entirely a misapprehension of the facts. The facts in the case are, that the domestic fowl is the most natural scavenger on the farm, not excepting the hog.

In regard to their food it would seem that fowls naturally prefer filth to cleanliness every time. The ordinary hen will leave the best corn and oats for the manure heap. She is never so well fed as to refuse a feast of putrified meat or decayed fish. What is true of her food is entirely true of her drink It makes no difference with the ordinary hen how abundant the supply of pure water may be, she will leave it in disgust for a feast at the sink drain or a mud-puddle. The domestic fowl takes as naturally to filth as the sea fowl does to salt water.

There is no other animal whose stomach communicates so quickly and directly with its products as a hen. A whole litter of eggs in embryo will become impregnated with the quality and character of the contents of the stomach or gizzard in twelve hours, as has been proved by actual tests. Consequently if one would have his eggs clean, and healthful, all filth, whether of food or drink, must be excluded from the poulury yard. An abundance of clean food and pure water must be kept constantly within reach of the fowls.—[Ex]

The Future of Wheat.

In an address before the Miller's Conference at Edinburgh, Scotland, James Rusk advanced the following as his judgment of the future of wheat:

1. That the great decline in wheat values in the past fifteen years has been due to lessened cost of transportation from the exporting countries, to overproduction in the first part of the period in question, and to the very favorable state of the Indian and Russian exchanges.

2. The population has for some time been steadily gaining on wheat production, and that the theory of overproduction no longer holds good.

3. That America is approaching the time when she must considerably increase her wheat acreage, or fall out of the ranks of wheat exporting countries.

4. That the competition of American flour in England next season must perforce be much less acute than in the past season, because of the deficient crop there.

5. That the material recovery in the Indian and Russian exchanges may be expected to assist in raising the platform of wheat values.

6. That Russia and Roumania have taken the first position in the scale of wheat exporters, which is perhaps, a matter for a certain amount of congratulation amongst us, since those countries are not in the habit of forming "rings" and syndicates for fictitiously raising prices.

And, lastly, that the ensuing season is not going to be one of undue abundance, nor of any serious scarcity, so far as wheat is concerned.

Base Ball and Athletic Department.

The California League

GAMES PLAYED AT HOME, OAKLAND, SACRAMENTO AND STOCKTON.

SAN FRANCISCO vs. STOCKTON.

FRIDAY, NOV. 7TH, 1890, AT OAKLAND.

There was a small attendance at the Emery grounds on this day to see the leaders and tail enders play. The Stocktons were without a pitcher and secured the promising young twirler, Joe Leveque, who, with the exception of the first and second innings, pitched excellent ball. Coughlin was in the points for the Friscos and was only touched out safely four times, two hits occurring off him in the first and second innings. The Metropolitans put up a splendid game in the field, but one error being made. The work of the Stocktons in the field was rather streaked, although they made some great plays. Wilson, Hoffman, Pache, Fogarty, Stevens and Hanley all gathered in fine catches. The Stocktons scored one in the first on Selna's safe hit to center, his steal, Cahill's sacrifice and Hoffman's single. They got another and their last in the second. With two out, Fogarty banged a beauty to right field, and the ball bounding over the sheds into the race track gave him a home run. The Friscos made four in the second. Everett beat out his infield hit, took second on Speer's safety to left and on Fogarty's and Armstrong's error scored. Isaacson and Coughlin were hit by s pitched ball and Shea's single scored Speer and Isaacson Steven's hit to third filling the bases and Levy's base on balls forced home Coughlin. In the fifth Levy led off with a double and Isaacson hit safely. Errors by Wilson, Levy and Armstrong allowed both men to score. They added a brace of runs in the seventh. Levy, again first up, hit to Wilson, and on Selna's dropping the ball was safe. Everett got his base on balls. Speer's hit to center, which passed Cahill, gave them the two last runs of the game. Owing to Gagus' keeping the men on the jump the game was finished in the quick time of one hour and twenty minutes. The score:

SAN FRANCISCOS.	AB	R	BH	SB	PO	A	E

SACRAMENTO vs OAKLAND.

FRIDAY, NOV. 7TH, 1890, AT SACRAMENTO.

The Colonels were unable to touch Hoffman in this contest till the eighth inning and failed to get a man further than third base in the game. Cobb was in the points for Oakland and was hit out very lively. His support was poor and this was attributed by many to the changed positions of the players. Lohman was unable to catch, and Dungan went behind the bat, while the blonde back stop guarded the initial in a very loose manner. Dooley was placed at third where he did good work and Shaw played in right. The Senators played brilliant ball throughout, Goodenough, Roberts and McHale doing excellent work in the out field while the infielding of Daly, Reitz, Godar and Stapleton could not be improved on. Bowman caught and threw to bases splendidly. The Senators started in by making three runs and they added one in the fourth, and five more in each the fifth and seventh, effectively shutting out the Colonels by the over whelming score of 14 to 0. Although the game was very one sided the audience was deeply interested and remained till the close having their hopes fully realized by the complete shut out. Pete Meegan umpired very impartially but the Sacramento people thought he overlooked instances where a couple of heavy fines might be warrantably imposed on some of the Oakland players. The score:

SACRAMENTO vs. OAKLAND.

SATURDAY, NOV. 8TH, 1890, AT SACRAMENTO.

This game was a veritable tug of war in which the hits were even and fielding honors close. Shaw was the Oakland pitcher, and although he sent eight men to base on balls, they had no effect whatever in the run getting. He struck out ten batsmen. The Sacramentos had Harper in the box, who pitched another of his steady effective games, allowing but two bases on balls. He received admirable support all round. Lohman was again behind the bat for the Colonels, and his work, especially in throwing was very imperfect. He also had three costly passed balls. Dungan played first, Dooley third and Carsey right field, all doing well. The Senators made two runs in the fourth. Daly reached first on balls. Godar sent out a clean hit to left, and Reitz placed one to Dungan who was so far from his bag that the runner was safe and Daly stole home. Shaw muffed Dungan's throw, Godar reaching third and scoring on a passed ball. In the next inning they made another. Roberts hit safely, went to third on a passed ball, and scored on Stapleton's sacrifice. The Oaklands got their two in the sixth. Carsey made first on Stapleton's muff, Shaw got his base on balls and each advanced a base on Cantillion's sacrifice. Sweeney hit a long fly to Goodenough, Carsey scoring and Shaw crossed the plate on Reitz's low throw of Dungan's hit to first. Brilliant playing prevented either side from scoring after the sixth inning. The score:

SAN FRANCISCO vs. STOCKTON.

SATURDAY, NOV. 8TH, 1890, AT SAN FRANCISCO.

Last Saturday's game was marked by heavy hitting by both teams and numerous and costly errors. John Patrick Cahill officiated in the box for the Gastowns, and his slow balls were landed on heavily, several long shots being secured off him. The Stocktons also touched up Lookabaugh so hard that before the sixth inning was completed, Conghlin was substituted. The tail enders commenced their run, getting in the first when Holliday banged out a beautiful home run to the club house. Hoffman got first on balls, and also tallied on Cahill's hit and Armstrong's sacrifice. In the fifth Fogarty reached first on Ebright's error, stole second and third, and scored on Speer's error. Fudger hit safely, stole second and scored on Shea's error. Holliday got his base on balls, advanced to third on Hoffman's sacrifice, and came home on Cahill's safety to center. In the sixth they made another trio. Armstrong dropped a safe one into left, and scored on Stockwell's two bagger. Fogarty'a double to left scored Stockwell, and a passed ball gave Fogarty the eighth and last run for his side. The home team made three in the third on Lookabaugh being safe on Armstrong's error, Shea's triple, Stevens' sacrifice, Ebright's triple and Hanley's double. They gained six in the fifth. Lookabaugh was given his base on balls. Shea was safe on Armstrong's poor judgment and on the same player's wild throw of Steven's hit, Lookabaugh tallied. Ebright, Hanley and Levy then all hit safely, and this, together with Cahill's error, followed by a wild pitch, allowed five more to tally. In the ninth, the 'Friscos added three more. Everett banged out a home run which was poorly handled; Speer put a single in right scoring on Isaacson's double, and the big first baseman tallied on Stevens' long fly out. The score:

OAKLAND vs. SACRAMENTO.

SUNDAY, NOV. 9TH, 1890, AT SAN FRANCISCO.

An assemblage of fully 10,000 people greeted the Sacramento and Oakland teams last Sunday at the Haight St. grounds. The Senatorial party were accompanied by a big excursion and brass band, and were big favorites in the betting It was expected that it would be a close and exciting contest, but just the opposite proved to be the case. The Oaklands found no difficulty in solving Kilroy's curves, hitting him out heavily from the start, and after he was taken out of the box they administered the same kind of a dose to Hoffman. The blonde twirler lasted but three innings and Reitz was put in, finishing the game with but little better success. The change of the pitchers also caused the other players to shift their positions considerably, and with disastrous results. Cobb was in the box for the Colonels, and pitched steady, effective ball all through, except in the fifth and sixth innings, when he was bunched on rather lively. His support was of a clever character, Lohman handling him well, and the infielders putting up a very strong game. Tip O'Neill did not play, and Fred Lange appeared in his old position for the Oakland team, doing good work. McDonald and Cantillion made some wonderful plays, the latter making one of the greatest catches ever accomplished on the ground, and for which he was heartily applauded. McHale also made a splendid catch of a difficult foul fly. McDonald and Lohman did remarkable work with the bat, each securing four safe hits. Cantillion, Sweeney, Dungan, Dooley and Bowman also did very heavy work. A disagreable feature was Dooley's dirty work in the first inning, that player deliberately running into Stapleton and injuring him so that he had to retire from the game. The score:

SAN FRANCISCO vs. STOCKTON.

SUNDAY, NOV. 9TH, 1890, AT STOCKTON.

The Friscos took their third consecutive game for the week from the Gastowns by defeating them last Sunday at Stockton before a small audience. Lookabaugh and Fudger were the pitchers and both did excellent work, being steady and effective throughout. The Metropolitans put up a strong game behind their box man while the Gastowns went to pieces in the seventh inning, their costly errors causing their defeat. Armstrong and Speer did great work at the receiving end, both throwing out three men in their attempts to steal off them. Features of the game were the fielding of Hanley and Stockwell in center, and Fogarty's, Wilson's and Ebright's infielding. The score:

SAN FRANCISCO.	AB	R	BH	SB	PO	A	E
Shea, 2b	3	1	0	1	2	3	0
Stevens, r f	3	2	2	0	1	0	0

SACRAMENTO vs. OAKLAND.

THURSDAY, NOV. 13TH, 1890, AT SAN FRANCISCO.

The Senatora pulled ont of a tighf hole in the ninth inning of this game. The score waa nine to five against them bnt aome aharp heavy hitting, a conple of bases on halls and the same number of errors, five of their men croaaed tho rubber winning handily. Bowman, Reitz and Stapleton didn't play and their placea were filled by Ward, Cahill and Hoffman reapectively. Dave Creamer of last years Stocktons, and who plsyed thia year with the Reporta and Burlingtons of the amateur league waa at third for the Colonels. He distingnished himself by making a beantiful home rnn, the only one of the game snd a timely single. Cobb and Harner were the pitchers. the honors going to the Senatorial twirler who waa more effective at critical times. The work of both Lohman and Ward behind the bat was of a clever character. Two double plsya participated in by Harper, Ward and Daly and Dungan and McDonald were the fielding features. At the bat Godar, Daly and Creamer did magnificent work. The score:

SACRAMENTO.	AB	R	BH	SB	PO	A	E

THE STANDING OF THE TEAMS.

The peunant now lies betweeu the San Franciacos and Sacramentos, with the odds slightly in favor of the home team capturing it. Oakland cannot finish better than a good third and Stookton will of course carry the target. Every game now played is of the greateat interest, and on thoae played in the early part of the coming week the result hinges.

THE RECORD:—(to November 13th, inclusive).

Professional Pick-Ups.

One only, only one.

Phil Knell ia down in Los Angeles.

One more week and the agony will be over.

Tom Powers is to captain the California colts.

George Van Haltran returned home last Tuesday.

Shaw has asked for hia release from the Oakland team.

Last Sundays crowd was in point of numbers, the second largest of the season.

Billy Farrell and Joe Leveque will alternate in the box in the Honolulu games.

Borchers, as a pitcher in the California League, ia the biggest "froat" of the season.

Tip O'Neill could take a lesson from Lange's methods of receiving slow ground balls.

John Patrick Cahill says he is to going to teach King Kalakua how to pitch a curve ball.

Who will the Colonel get to play third base for him is a qnestion now agitating the cranks.

It is reported that Buck Holliday, of this year's Stocktons, will play with Denver next season.

Jack Huston and Kid Peeplea, of the Spokanes, are now with McCloakey's Fort Worth team.

Mike Tiernan, of the New Yorks, and Shortstop Allen, of the Phillies, were both recently married.

Hapeman, who was one of Stocktons many pitchers this year, is now playing with the Snowflakes of Sacramento.

Since with the Fresnos, Eddie Howell has developed into quite a slugger, and has averaged two hits a game thns far.

It is stated that Captsin Anson has acquired a fortnne of $100,000 as the direct reaults of hia connection with the National game.

Peek-a-boo Veach now guards the initial for the Sacramento Snowflakes. He is also a member of the Fire Department of the Senatorial City.

The California climate don't seem to agree with "Big Bill" Brown, for every winter when he returns he complains of an unaccountable illness.

Harry O'Day will not go with Hoog's team to Honolulu aa he is not yet entirely well and fears the enervating climate would not have a beneficial effect on him.

Although Pop Swett still retains the same boyish appearance aa when he left, he has grown bigger and more solid and now tips the beam at something over 180.

It is doubtful if Will Carsey will play in the California League next year. Carsey has higher aspirations and may be seen with some of the Eastern teams.

George Kelly is playing a great short atop at present. Kelly is one of the best players on the coast if he could overcome his only failing—a fondness for convivial companions.

Ed Daily was the only player fined during the Louisville—Brooklyn series. His offense was remarking thst he thought Umpire Curry was a little mixed aa to what constituted balls and strikes.

Manager Finn would confer a favor on a great many patrons if he would not permit Stevens to coach. While the big right fielder's intentions may be all right, his voice is as raap ing and disagreeable as a *buzz saw* striking a nail.

It is a toss up between Reitz and Everett as to which covers the greatest territory. Both are all over the field bnt the little fellow's cleaner and surer handling of wide hits makes him the favorite with those who are non partisan in their views.

Pete Sweeney has returned looking natural as life. Pete has seen a good deal of base ball this year, having played in St. Louis, St. Paul, Louisville, Athletic and Ft. Worth uniforms. In the few games with the latter team of the Texas League his work was up to the "top notch."

Manager Austin, of the Fresnos, is a hustler, and always has games for his team. On the 22d and 23d the Snowflakes again play in Fresno, and the Allens are booked for the 27th, 29th and 30th. The Champion Santa Rosas will also be accommodated if satisfactory arrangements can be made.

Mr. Banklurk (at the close of the game)—"What do you think of me as a ball-player, Miss Minnie?" Miss Minnie—"I think you'd make a splendid swimmer." Mr. Banklurk—"A swimmer? Why so?" Miss Minnie—"You strike out so beautifully, you know."—Chicago Post.

If the Colonel is looking around the amateurs for a third baseman, what's the matter with Billy Kennedy or Joe Dunphy. Both these youngsters can play the position in a most satisfactory style or, better still, put Tom Buckley on first and Dooley at third, and the team will be stronger than ever.

Jack Dow, who with Billy Noble composed the famous Cleveland (Oskland) team battery, in a recent baseball throwing match, beat Abe Harrison, shortstop of the York, Pa., nine, at College Point grounds, L. I., on October 19th. Dow's throw was 120 yards and Harrison's 124 yards. Dow played this season in New York State League and also with the Long Island City team.

The new Burlingtons since their admission to the league Sept. 7th have done wonderful work, having in two months won seven of eleven games played while their predecessors in five and a half months only won six of nineteen games They took the old teams percentage of 316 and have built it up to 433, but their own percentage of victories shows the very creditable figures of 636, more than equalling that held by the leaders—the Santa Rosas for bona fide winnings.

It was Tim Keefe who about ten days ago said: "Hereafter I shall look out for myself and nobody else. It looks as if it will be a great case of hustle for some of us to get places next season. I shall take the first opportunity that is offered, and I don't intend to wait for somebody to ask me if I am willing." Commenting on this, the Philsdelphia Press says: "This bit of news echoes the sentiments of scores of other players, and as soon as any definite arrangement is made, it is dollars to doughnuts that the managers of the teams will not worry their heads about signing players, oh, no. Players will be as thick as flies around a sugar barrel on a July day."

Fred Lange's appearance at third base last Sunday had a gratifying effect on the major portion of the audience, many of whom remembered with pleasure the excellent games he has put up at that position with the Greenhood & Moran team. There was some little doubt expressed as to whether he could do himself full justice after his long retirement from the game, but he quickly dispelled all doubts by his clever handling and throwing of the ball in the preliminary practice. It would be well if he could be induced to remain in that position till the close of the season, as he is undoubtedly the best eligible player now to be had, and as an infielder is head and shoulders above Tip O'Neill, not to compare them at all as gentlemen.

"What do you think of the Players' League in knuckling to the old League officials after they had purchased the Cincinnati Club, and were practically masters of the situation?" Comiskey was asked in a recent interview in St. Louis:

Said he, in a tone of intense disgust:—"To be frank, I think their action in throwing up the sponge was the kind you would expect from lunkheads of the first water. They had the League in the same position that you have a drowning man when he has gone down for the third and last time. But when they had him down they let him get up and kick the life out of them.

"The Players' League officials, after winning the best fight in the history of the game, threw up the sponge and cried quit. Talcott, of the New Yorks, was the first to weaken, and now all the rest of the capitalists who were in with the play are following in his footsteps."

Among the passengers from Cincinnati was a well-dressed, diamond bedecked, athletic youth, who was recognized as Rhines, the Cincinnati Club's fast pitcher. His one year in the League has been of roses, and he will astonish his friends at Ridgeway, Pa, on his arrival home. "Yes," said Rhines, "they have been coming my way this year. I have $2,100 in my pockets, besides I have all the clothes one could need. Have signed a $3,500 contract with $500 advance."—Exchange.

"Young blood" in baseball got another boom in the grand showing of the Louisville team. Most of the champion Colonels were unknown to fame until they donned the uniforms of the Falls City Club. The team was a very cheap one. In fact, it is no exaggeration to say that the salary list of the Louisville team was the smallest in the American Association. As compared to the money paid the Brooklyn players, it is not a mite. Byrne's men were paid at least double and possibly triple the money for playing ball last season than the Kentucky champions. The grand final is a big boom for Chapman. His record in the Association is on par with Anson's in the League. The Louisvilles boasted forward three great young players in Taylor, Shinnick and Ryan.

If Fresno is represented in the league next season, of which event there is a strong probability, they will not have to negotiate long for one of their batteries as in Howell and Stanley of their present team, they have a pitcher and catcher strong enough to cope successfully against any team in the California League to-day. When here both were considered fine men in their positions but were given no show, as the big league teams were full at the time the managers took favorable cognizance of their worth. Next year it will be different, for their performances with the Fresno team demands that they cannot be overlooked, and we have no hesitancy in stating that they will surely be winners for whatever team is lucky enough to secure their services.

Now the umpire's reign is over,
Take his scepter and his crown;
Bear them to a place of safety
And all gently lay them down.

Take the stones from his coat pockets
And the brick bats from his hair;
Also take the shirt of iron
That he always used to wear.

Take his judgment—you can find it
By searching sure and slow—
Wrap it warmly up in cotton,
That it may have a chance to grow,

The Cincinnati Enquirer says of the catcher's breast protectors:

This most useful piece of baseball paraphernalia had a hard time getting a foothold. The catchers were slow in adopting it and the spectators at first guyed it as baby-play. Clements, the great catcher of the Philadelphia league team, was the first to wear a catcher's protector in a game before a Cincinnati crowd. He was then back-stopping Jersey Bakely, with the Keystone Unions of Philadelphia, in 1884. Considerable fun was made of the protector, and the writer distinctly remembers that it was made the subject of adverse newspaper comment by one of the best baseball authorities in America. Now it is different. A catcher's protector is of as much importance to a back-stop as are his mask and gloves. In other days a visitor to the dressing room of a ball team when the players were getting ready for a game did not need to ask who were the catchers. He could tell them by the black and blue spots that appeared on various parts of their anatomy, the result of hard thumps from surely foul tips. The protector, mask and padded gloves have made the life of a catcher a bed of roses to what it used to be.

We regret to see a player of Charley Dooley's intellectual and apparently gentlemanly calibre stoop to a trick so despicable as the one he was guilty of in last Sunday's game. There was no earthly excuse for his running into Stapleton, as the Sacramento Captain was not in his way, and the kick with his knee into the fielder's loins was as deliberate as it was malicious and cowardly. Manager Robinson and Captain O'Neill may approve of dirty work, but refined audiences of both sexes are repelled by such disgraceful and brutal exhibitions, and will attest their displeasure not in words but in a silent and more forcible manner by a discontinuance of their patronage to the grounds. We have seen second baseman Cantillion hooted and jeered at for simply trying to balk a throw to second, but we ask if that action—reprehensible as it is to an audience paying for and expecting a clean exhibition—merits groans of disapproval, how other can the patrons show a commensurate amount of disgust for a deed that, if occurring on a public thoroughfare, would call for police intervention, but by a complete withdrawal of their financial aid Instead of forcing on a disinterested public the petty dissensions which invariably disturb the equilibrium of the "solid four" at this season of the year, the magnates might employ their time to more profitable advantage in the wholesome and laudable occupation of defining to their degenerate players what constitutes the differences between barbarism and civilization—the brute and the gentleman.

"The restoration which is coming, therefore, will mean bread and butter as well as preserves and velvet for every capable, honest, earnest, temperate ball player in the land, says the New York Sporting Times. But out of this general good will come two necessities.

"First, the bums, drunkards and disturbers must go. The new blood which came in with the opportunity has come to stay. The overrated, the intemperate, the vicious, will have to give way to these new heroes of the diamond, who will now join hands with the old time favorites that have retained their popularity by merit and hard work.

"Seoondly, some of the players who took advantage of the cut throat situation and secured contracts for enormous salaries, much more than clubs can afford to pay and clear expenses, must make some concessions. As it is to every player's advantage that baseball becomes profitable again, and it seems necessary that these players who have their future in view should voluntarily sacrifice a little financially toward helping restore the game. They can rest assured that as soon as the old tide of prosperity sets in again their generosity at this time of need will not be forgotten.

"Salaries will not be scaled below the average which prevailed in 1889. But it would be ruinous to make the war prices of the present year permanent and at the same time unfair to ask the majority of the players to accept a reduction, so that the few who squeezed the magnates successfully last winter might carry away the bulk of the gate receipt

"We trust we have made the part of our address to the players plain. And we warn them that reasonableness on their part in the premises will in the end be most profitable to their interests."

The Amateurs.

The Santa Rosas can now be surely counted the pennant winners, and the Vallejos their closest neighbors. The Reports will remain third bnt it is a toss up between the Fincks and Burlingtons as to wbich team will hold fourth position. The Allens have as we predicted reached the 300 mark which fact shows an immense improvement for the past weeks on their work of the middle of tbe season. The record to date:

Clubs.	Will & Fincks	E. T. Allens	Report	Burlington	Vallejo.	Santa Rosa	Games Won	Games Played	Percentage

Struck out—By Callen 3, by Sprague 5. Left on bases—Santa Rosas 7, Vallejos 6. Passed balls—Pace 3, Farrell 1. Umpire—Donohue. Scorer—Brown.

DAILY REPORTS vs. SANTA ROSAS.

Sunday, Nov. 9th, 1890, at San Francisco.

The Santa Rosas came down last Sunday determined to win this game and succeeded. Tbey bad a remarkably strong team with their stone wall in and cracker jack outfields and their prize battery Callen and Pace in the points. Callen pitched great ball in the beginning of the game but toward the close the Newsies commenced gnaging him, making tbree safe hits off him in the eighth inning. Pace caught him well and threw effectively to bases. Scooney, Hulen, Reilly and Stultz played fine ball in their positions. The mecbanical Monet was in the box for tbe Reports and was bit out lively from the start. His support was weak in some places, Gormley in right making two bad errors, and John Thompson lost bis bead at critical times at sbort, making some stupid and costly blunders. The Reports did not sc re till the fourth. Thompson led off with a nice single to left and on Hulen's wide throw to catch bim napping at first easily made second. On Evatt's long fly which Cook muffed Tbompson scored. They tailed to get any more till the eighth. Hearty led off with a single back of second, but was neatly thrown out at tbe middle bag. Green bit one which went tearing past Callen and Reilly to center, and Monet got to base on balls. McIntyre flew to Gimmell and Reilly fumbled Thompson's grounder, filling the bases. Dunphy cracking two taser to left bronght home Green and Monet. Buckley ended the inning by hitting to Stnlz and being thrown out at first. The Santa Rosas started the ball going at a lively rate in the first inning. Pace smashed out a double to right and Cook was safe on Evatt's error. Reilly banged out another double, Pace and Cook scoring, and on bis attempt to make tbird was thrown ont by Gormley. Hulen then rapped one out to the right field fence and scored on Gimmell's safety to left. They made another trio of runs in the fifth. Pace placed a pretty single between right and center and stole second. Cook singled to left advancing Pace to third. He also stole second. Reilly then hit to Thompson who foolishly threw to second, bnt that bag was vacated and Pace scored leaving Cook and Reilly safe at third and first, and Hulen's single to center scored both. Hulen successfully stole second, but was thiown out at third on Scooney's hit to Tbompson. Scooney also stole second, making the fourth steal for that inning, bnt was caught at home trying to gain the plate on Gimmell's hit, by a splendid tbrow by McIntyre. Gimmell took second on the tbrow in and stole tbird, but Stulz retired the side by striking out. In the sixth, seventb and eighth, they added one each to tbeir long string. Callen in the sixth went to second on Thompson's wild throw to first and came bome on Pace's single. In the next inning, Scooney banged out a double over McIntyre's head and tallied on McCarthy's safe drive to left. In the following inning, a series of errors gave them another and their last run. Hulen was safe on Thompson's fumble, stole second, took third on Gormley dropping Scooney's fly, and his subsequent poor throw allowed the second baseman to score. Dungan of the Oaklands, who umpired fairly well called game at the end of the eighth inning. Tbe score;

Santa Rosas.	AB	R	BH	SB	PO	A	E

VALLEJOS vs. BURLINGTON ROUTE.

Sunday, Nov. 9th, 1890, at Vallejo.

Last Sunday the Burlingtons visited Vallejo with the strongest team that ever played under that name. They had Tom Powers and Patsy Cahill in their ranks in addition to their regular players, Sharp, Kelly, Creamer, Mnlvey, Traynor, Strand and Crowley. But although this team is undoubtedly tbe heaviest hitting one now in the league, they were utterly unable to do anything witb Baltz, who pitched a most wonderful game. Up to the eighth inning it was the finest contest ever seen on the grounds, the fielding being exceptionally o'ever. John Patrick Cabill did good work in the box till the eighth inning, when the Marines landed heavily on his slow curves. In this inning Murdock made a three bagger, clearing the bases. Powers and Kelly played great ball in their positions, and Crowley made a most sensational running catch in center. The scoic:

MORNING GAME.

Vallejos.	AB.	R.	BH.	SB.	PO.	A.	E.
McGuire, s s	4	0	0	1	0	1	0
Farrell, c	3	1	0	0	10	0	1

AFTERNOON GAME.

In the afternoon the same teams played again, the Railroaders turning tbe tables tbis time, winning as easily as the Marines had in the morning. Sprague was put into pitob for tbe "Navies" and was found with greater ease and frequency than his speedy predecessor. Fitzgerald and Mulvey appeared in tbe points for the Railroadera, Fitzgerald doing great box work while Mulvey was apparently ont of practice in tbe catchers position. The Vallejos put up a poor fielding game their infield being full of errors, many of which were very costly; while, outside of their backstop the Railroaders work was of a very clever character. Powers, Cahill, Fitzgerald and Wise did strong service with the stick, John Patrick making a clean home run but he was contented to take but three tags on it. Peek a boo Traynor made some of the greatest catches at first ever witnessed on a ball ground. Al Foreman, an Ex-California League umpire officiated in both games giving every satisfaction. The soore:

Burlingtons.	AB	R	BH	SB	PO	A	E
Cahill, l f	5	2	2	0	2	0	1

Interior Base Ball.

FRESNOS vs. SNOWFLAKES.

Sunday, Nov. 9th, 1890, at Fresno.

Tbe invincible Fresnos got in and added another victory to their long list by defeating the Snowflakes, of Sacramento, last Sunday. It was a splendid game, in which the "raisin growers" excelled in every point. Tbe "pony battery," Howell and Stanley, were again in the points for Fresno, and their work was a repetition of their previous clever performances. But four hits were secured off the little 'un, one of which was a scratchy home run, the ball rolling under the fence. Hapeman pitched for the Sacramento boys witb fair success, allowing only seven hits and retiring eleven on strikes. Peek-a-boo Veach covered first in excellent style. The Fresnos took a lead in the third inning and were never headed afterward. Brittan and Utt officiated as umpires, alternating behind the bat and on bases, and their decisions were very satisfactory. The score:

Fresnos.	AB	R	BH	SB	PO	A	E
Dextraze, 2 b	4	1	2	1	2	3	1
McMahon, c f	3	0	1	1	0	0	0
Dyer, G, s s	4	1	0	1	2	4	0
Cullen, 1 b	5	1	0	1	11	0	0
Pier, l f	4	0	2	1	0	0	0
Stanley, c	4	0	0	0	8	2	1
Dyer H, 3 b	4	0	0	0	3	2	0
Shelly, r f	3	1	0	0	1	0	0
Howell, p	4	2	2	2	0	2	0
Totals	35	6	7	7	27	13	2

Snowflakes.	AB	R	BH	SB	PO	A	E
Warren, s s	3	1	0	0	0	0	2
McDonald, 2 b	3	2	2	0	1	3	2
Campbell, l f	3	0	0	0	1	1	0
Veach, 1 b	4	0	1	0	9	0	2
Dawson, r f	4	0	0	0	0	1	0
Doherty, c	4	0	0	0	11	0	0
Caverly, c f	4	0	1	0	1	0	0
Hapeman, p	4	0	0	0	0	3	0
Denny, 3 b	2	0	0	0	4	2	0
Totals	30	3	4	0	27	8	5

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9
Fresnos	0	0	3	0	0	1	0	1	1— 6
Snowflakes	1	0	0	0	0	0	0	2	0— 3

Earned runs—Fresnos 3, Snowflakes 1. Two base hits—Dextraze, Pier and McDonald. Home run—McDonald. Base on balls—Fresnos 5, Snowflakes 4. Hit by pitched ball—Denny. Pass balls—Doberty 2. Left on bases—Fresnos 7, Snowflakes 5. Struck out—By Hapeman 11, by Howell 8. Time of game—Two hours. Umpires—Brittan and Utt.

Amateur Short Hits.

The Sonoma boys are the victors.

Next week finishes the amateur season.

Tom Kelly no longer plays with Santa Rosa.

Monet is not a snocess against the Santa Rosas.

Hulen played a grand game at second last Sunday.

Fresno vs. Bakersfield at the latter place to morrow.

Leveque will undoubtedly be with the big League next season.

Hulen ought to be watched by the managers. Billy is a "comer."

John Thompson had thirteen chances at short last Sunday accepting nine.

The Sacramento Snowflakes have a player named Denny on third base for them.

The Fresno people hold an exalted opinion of Manager Viae and his Snowflake team.

Farrell, of the Vallejos, is considered by some to be the best catcher in the amateur league.

Since the split-up in the team the Reports have been constantly sliding down the toboggan.

Joe Murdock had his batting eye with him last Sunday, making the most hits for his team in the two games.

Reilly, Creamer, Farrell, Leveque and Sharp are the amateurs with Hoogs' "California Colts" on the Honolulu trip.

Peek-a-boo Traynor is said to be a natural comedian, and had everybody roaring at his funny sayinga and antics in last Sunday's game at Vallejo.

Tom Buckley and Scotty Evatt have been both released at their own request by Manager Keller, and last Sunday they played with the Reports.

The Santa Rosas ran bases like "terrors" last Sunday in the fifth inning, Pace, Cook, Reilly and Hulen each stealing second, and Gimmel third in that inning.

Last Sunday was our first opportunity of seeing Scooney work at the initial, and judging from his performance on this occasion, we put him down as a coming player.

The Santa Rosas evidently thonght right field a safe place to put their long shots last Sunday, as Pace, Reilly and Gimmel each banged doubles to that part of the field, and Hulen smashed ont a triple to tbe same territory.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS.

SUMMARY.

Despite the limited number of entries, the annual amateur championship boxing tournament of the Pacific Coast Amateur Athletic Association was brought to a very successful close on Friday evening of last week. The Olympic and Alpine Clubs held games on Sunday last. The wheelmen are anxiously awaiting the announcement of future events. The amateur oarsmen are sadly disappointed because there will be no races on Thanksgiving Day. The professionals, however, contemplate getting up several match events before Christmas.

THE WHEELMEN.

The invitation party given by the Alameda Bicycle Club at Harmony Hall, Peru street, Alameda, on Wednesday evening, was a grand success. The hall was tastefully decorated for the occasion, and everything went off smoothly and in order. The committees were as follows: Arrangements—W. H. Foster, H. K. Potter, S. A. Burrell, E. W. Bradford, C. C. Hanley, W. H. Hebbard, F. G. White, H. P. Williams, Jr. Reception—J. F. Ives, E. W. Bradford, W. F. Foster, C. M. Culver, W. H. Osborn. Floor Manager—C. C. Hanley. Floor Committee—W. H. Hebbard, H. K. Potter, F. G. White, S. A. Burrell, H. R. Williams Jr.

Several of the Alameda Bicycle Club boys rode over to Haywards for breakfast on Sunday morning.

Capt. Sig. B. Morse, of the American Bicycle Club, made his debut as a sprint runner at the Olympic Club grounds on Sunday afternoon. Handicapper George W. Jordan complimented Mr. Morse on his success, and told him that he might yet attain the speed of an American champion.

Several of the Bay City boys were noticed in Golden Gate Park on Sunday. Their handsome uniforms and shapely limbs were greatly admired by the large number of ladies who visited the park for the purpose of listening to the music.

The Fresno wheelmen are rustling, and they intend adopting a new constitution in the near future in order to facilitate the labors of the Board of Officers.

P. A. Lund, B. C. W., and Mr. Irwin, unattached, took a ride from Sausslito on Sunday last. They visited San Rafael and the surrounding country, and reported the roads to be in fine order.

At San Rafael they came across George Newman of the B. C. W., who finished the trip with them.

The Bay Citys extend a hearty invitation to all touring wheelmen, as well as to the local riders, to visit them at their new club rooms, 234 Van Ness avenue, where they will be warmly received and welcomed.

A. B. White, of the White Cycle Co. of Fort Wayne, Ind., visited the B. C. W. club rooms one evening last week. He intends returning to his home at once.

Edwin Mohrey, B. C. W., and proprietor of the Cyclery at 112 Golden Gate avenue, has gone East on business. He will be absent about a month. It is thought that he will bring back with him the agencies for several new makes of wheels.

The Bay City Wheelmen held a run to the new skating rink in the Mechanics Pavilion on Thursday evening. Several of the boys put on skates and showed that they were not entirely green at the business.

The members of the Oakland Bicycle Club are very active just now, and many new members have lately been added to the roll of membership.

C. N. Laugton and F. W. Ray of the B. C. W., went over to Lime Point on Sunday to find out the condition of the path along the cliff. The Bay Citys are going to have a run and clam bake near there some Sunday in the near future, and after that spend the balance of the day fishing.

A billiard table and piano have been added to the furniture of the new club rooms of the B. C. W. The quarters are now very comfortable and homelike and the members are forming teams for another of their favorite whist tournaments, which together with the match game of billiards between Hodgkins, Elwell, Mohrig and Elliott and the "chess fiends" will make things very refreshing and exciting for the long winter nights.

The plans of the new club house are about completed and work will be commenced early in the spring. Several propositions have been submitted, one on Van Ness Avenue near Fulton St., being particularly desirable.

The inter-club race between the teams of the Orange Wheelmen and the East Orange 'Cyclers came off over the course on the road at East Orange, N. J., Nov. 2. There were four men in each team, the course was five miles long, and the Orangemen won by a score of 22 points to 14 for the East Orange 'Cyclers. Paul Grosch, of the winning team, finished first, in 17m. 28s; C T Coggeshell, same team, second, 17m. 32s.

A fifteen mile road race took place at Bridgeport, Ct., on Oct. 28, eleven riders participating and finishing in the following order and time: S N Lockwood, 1h. 12m. 36s; F F Soule, 1h. 15m. 50s; C W Ellison, 1h. 18m. 47s; G R Fryer, 1h. 19m. 47s; T H Tomlinson, 1h. 20m. 2s.

The Montreal (Can.) Bicycle Club held a road race on Saturday afternoon, Oct. 25, it being the second of a series. The distance was fifteen miles and the race was won by H. O. Mussen, scratch, in 1h. 1m. 30s; D S Lousen, 4m. start, second, by four seconds; A B Kingan, 4m. third, and J W Tatley, 10m, fourth.

THE GAME OF CRICKET.

The Alameda and Burnaby Clubs are keeping up practice and it would take a good outside "eleven" to defeat the eleven of either clubs.

The members of the Pacific Club will probably select grounds on this side of the bay to practice on as many of the members cannot afford time to cross over to the West End grounds at Alameda.

AT THE OARS.

Sunday was a perfect day and many of the North and South end crews were out for practice spins. The Ariel and South End clubs sent out the largest number of boats.

The Lurline Club is becoming active again and several of the members were out in their canoes on Sunday.

The Alameda Boating Club is a growing organization and by next year it will have several fine crews.

The new professional crew of the South End Club held a meeeting in one of the court rooms in the New City Hall on on Tuesday evening. The intentions of the crew are being kept very secret for the present but it is supposed that when the club is ready to back its men a genuine surprise will be in store for the other clubs. Next week we will probably be able to furnish the names of this mysterious crew.

CLUB JOTTINGS.

The Golden Gate Athletic Club has reduced its initiation fee to one dollar. The monthly dues have also been reduced from two dollars to one dollar. Several young men who take an interest in in-door sports have lately joined the club and there is some probability of its being conducted in future as an amateur organization.

If the P. C. A. A. A. intends holding an in-door championship meeting in January the Committee who have the matter in hands should lose no time with their work. The sooner the full particulars are announced the better for the athletes who are likely to take part in the meeting.

It is about time that a new official handicapper was appointed by the P. C. A. A. A. In making the selection the Association should be more than careful. The Athletes of to-day are very hard to please and if a man who is not popular with the boys receives the nomination the chances are that the out-door men will repel. Walter A. Scott of the O. A. C. is about the best man on the Pacific Coast for the office and notwithstanding the untiring efforts of the young man who presides over the "Sporting" Columns of the Daily Report to make him appear unpopular, Mr. Scott would be largely indorsed by his fellow athletes. G W. Jordan was better acquainted with the art of handicapping, perhaps, but there is no man of average ability who cannot learn if he is willing. To appoint a man who is not perfectly familiar with the performances of the out-door athletes would be to do the athletes a serious injury and if our esteemed cotemporary can name some man who is better adapted for the posttion of official handicapper than Captain Walter A. Scott, we will be willing to step down and out.

The members of the Sacramento Athletic Club are getting themselves into trim for future events. Impromptu handicap races are constantly being held and from all accounts this young organization is going to prove itself a thorn in the sides of some of the older clubs.

An athletic club is about to be formed at Stockton. This should be received as good news by the local amateurs for they may be afforded an opportunity to visit the Slough City next year under the same circumstances which they travelled to Sacramento last September.

At a meeting of the Directors of the Olympic Club held last Tuesday evening, it was decided to hold a grand military tournament, consisting of boxing, fencing and wrestling some time in January. The contests will be confined to members of the military posts about San Francisco. Valuable prizes will be awarded. The wrestling tournament has been set down for the third Thursday in January. It was also decided to hold two "Ladies Nights" in January, one an orchestral concert, and the other a camera exhibition of foreign and local landscapes. President W. Greer Harrison is determined that the members will receive good treatment while he is in office, and in conjunction with his fellow directors he is set upon preparing entertainments that will please even the most fastidious.

Last Sunday forenoon several members of the Alpine Amateur Athletic Club exercised at the Bay District Track. There was a good crowd present to see the boys run and walk. The chief event was a quarter of a mile handicap, run. for members of the club. The prizes were to be awarded the winners. The handicaps were: Harry C. Casidy, scratch; G. W. Bishop, 15 yds; H. P. Coleman, 25 yards; George W. Armbruster and Charles Armbruster each 35 yds; Vollmer, 40 yards. The two Armbruster boys at once cut out the pace and were never headed after they had passed Vollmer early in the race. George won by two yards from his brother Charles in 51 2 5 seconds. Coleman was third and Casidy fourth. P. N. Gafney walked 220 yards in 38 2-5 seconds. John D. Garrison gave a fine exhibition of running, covering 440 yds in 56 2 5 seconds. The club will soon hold on all round championship meeting for members only. The results will be determined by points, and the five men earning the largest number of points in all the events will be given prizes. The club quarters at Central Park are now comfortably fitted up and the Secretary is kept constantly busy handing out application blanks to ambitious athletes who are desirous of becoming Alpinites.

There was a good crowd of spectators at the grounds of the Olympic Club on Sunday afternoon to witness the 440 yard run for members of the Club. Ex-Captain George W. Jordan framed the handicaps and the result of his work was: S V Cassady, scratch; J C Kortick 7yd: C A Jelllneck; 13; P Wand, 18: J A Christie, W H Toomy, W J Moore, and Robert McArthur, 22yd each: N L Willisms, 23; A Belan, A G Sheaf, 25; C M Yates, D M Crane, 28: A C Thornton, W D Hoyt, J H Spiro, 30 each; James Jarvis, S B Morse, 35; A J Treat, 40: F G Redding 45.

The first heat was won in 53 seconds by S V Cassady, J C Kortick second, and W H Toomy third. The second heat was won by C A Jellineck in 53 1-5 seconds, with A B Treat second, and R McArthur third. These results entitled Cassady, Kortick, Toomy, Jellineck, Treat and McArthur to run in the final heat with their established handicaps. The final heat was won by Jellineck in 51 2-5 seconds, Cassady being second, McArthur third.

The annual meeting of the Alameda Olympic Club was held on Tuesday evening, when the following officers were elected to serve for the ensuing term: President, W F Chipman; Vice-President, Edward Shaw; Secretary, William J Robinson; Treasurer, Len Hewson; Leader, J E Byler; Directors, Joseph E Blanl, Perham Nahl, Joseph A Leonard, A C Lassen, T C Stoddard, W B Josselyn and C E Elliot.

As a compliment to Bob McCord, the following letter from President W Greer Harrison of the Olympic Club was posted in the gymnasium the day following the boxing tournament:

Robert McCord, Esq.—DEAR SIR:—I have to thank you on behalf of the club for your splendid evidence of pluck and skill last night. We fully recognize the unfairness of having asked you to enter the tournament, worn out and fatigued as you were. But your loyalty to the club and your grand defense of its honor places you, in the estimation of your friends (which means the club), in a far higher position than if you had won. You did win the championship for the club by making it possible for Mr. Satterwhite to take first place. At the first meeting of the Board your services and your club loyalty will be specially recognized.

WILLIAM GREER HARRISON, President.

UNIVERSITY JOTTINGS.

The new tennis courts are now in splendid condition.

Several new lockers have been built in the gymnasium.

The cinder path is in fair condition, and the students are slowly getting themselves into good condition for the coming field day.

It is reported that the championship team of 1891 will be composed mainly of new men, who will well be able to hold their own against the Olympic and Alpine men.

The U C is badly in need of some long distance runners. Perhaps before next day some "dark horses" may spring up.

The first field day of the Amateur Academic Athletic Association, consisting of the Hopkins Academy, Oakland High School, Berkeley Gymnasium, Bowen's Academy and Berkeley High School was held on the University Grounds at Berkeley last Saturday afternoon. About 1800 spectators, many of whom were ladies, were in attendance. The competitors were all young men in their teens and the records made were far above the average. The following is a summary of the results:

Ninety-nine yards run—Final heat: Edwards, B A 1st. Time, 11secs; Mays, B A, 2nd.

One mile walk—Leach, O H S, 1st. Time, 9min; Russ, O H S, 2nd.

Throwing ten lb hammer—Sherman, H A, 1st. Distance, 78ft, 11in; Hoffmann, O H S, 2nd.

219 yards run—Final heat; Porter, B A, 1st. Time, 26 secs; Aiken, O H S, 2nd.

Standing high jump—Edwards, O H S, first; Hight, 4ft 4¾ in; York, O H S, second.

119-yard hurdle—Edwards, O H S, 1st. Time, 21 2-5secs; Hoffman, B A, 2nd.

Partnership race, 100 yds—Knaner and Smith, B A, 1st. Time, 21 3-5 seconds; Guppy and Cook, O H S, 2nd.

879 yard run—Graham H A, 1st. Time, 2min 2 1-5secs; Chapman, O H S, 2nd.

Pole vault—Hofman, O H S, 1st; Hight, 8ft 9⅜in which breaks the University record of 8ft 8⅝inches; Edwards, O H S, 2nd.

Running hop, step and jump—Hofmann, O H S, 1st. Distance 38ft 8in; White, O H S, 2nd.

119 yard run—Mays, O H S, 1st. Time, 13 1-5secs; Aiken, O H S, second,

Putting 12lb. shot—Hofmann, first. Distance 36ft 10in, Hunter second.

Standing broad jump—Smith 1st. Distance 9ft. 5¼in.; Hofmann, 2nd.

High kick—Brunn, O H S, 1st, height, 8ft. 3in; Graham, 2nd.

880 yard run for members under 15 years of age—Ferguson, H A 1st. Time 2min. 44secs; Campbell B A 2nd.

Running broad jump—Hofmann 1st. Distance 18ft. 1½in.; Cook 2nd.

1 mile run—White H A 1st. Time 6min. 13 1-5secs; Smith 2nd.

Running high jump—Patterson 1st. Height 4ft. 10in; Hofmann 2nd.

Tug of war—Hopkin's Academy 1st.

It is thought that owing to business matters Moffet will not be able to train for next years championship games.

RUNNERS, WALKERS, JUMPERS, ETC.

Creagh of the Alpine Club has developed into a good half-mile runner.

Professor Eldridge with the aid of side-boards is now a handsome man. He was at the Bay District Track on Sunday, and as usual, his advice was sought after by the athletes.

The Armbruster Brothers are gaining in speed and will yet make good short distance runners.

Harry Casidy should confine himself to middle and long distance running. As he never practices sprinting he should not enter sprint races.

A. Cooke is now living in Mayfield, Santa Clara Co. He is expecting to meet Horace Coffin in a three mile walk on November 27.

J. D Garrison is entirely out of condition, but by Thanksgiving Day he may be able to hold his own with Casady and Henderson.

The Alpine Club will be well represented at the Olympic Club games on Thanksgiving Day.

Young Foster of the O A C is taking good care of himself and it would not be at all surprising if some day he lowered the American hurdle records.

Jalleneak is scaring all the "quarter" men.

G. W. Hapers says that it takes too much time to train. Slow running is good enough for him.

Douglas B. Crane is holding back until Jordan goes away again. Crane thinks he can get a better handicap from Captain Scott.

Peter McIntyre predicts that the cinder track will not hold all the athletes next year. "It's wonderful" said Pete, "I don't see where they all spring from."

T. J. Walsh intends practicing hand-ball again and when he is in good condition G. F. Dall had better look out for his scalp.

The handball court at the Olympic Club Grounds was crowded on Sunday.

Stutz of the O A C says that he will make a big effort to win the mile and half mile on Nov. 27.

Who will win the mile on Thanksgiving Day—Casidy or Coeley? This will practically end the doubt.

AMATEUR BOXERS.

The annual amateur boxing tournament for the championships of the Pacific Coast began in the Olympic Club gymnasium on Thursday evening, November 6th, and ended the following night. The list of entries was not very large, but the sport was good. If the best boxers in the Olympic Club had entered the tournament, it is very probable that the outsiders would not have had such a picnic. Kitchen, of the Acme Club, would have carried off first prize in the heavy weight class, but that is about the only medal that would have found its way outside the Olympic Club. Various theories had been advanced as to the cause of the absence of so many of the crack boxers. All did not stay out for the same reason.

McCord did not have time to train. Cooley wanted a prize instead of a medal. Green, who is a victim of the nose bleed, was afraid of receiving a blow that would cause him to bleed too freely. Espenosa did not feel like training. Larkin had too much respect for his face, and the balance had just as many more excuses.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR. PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, Room 18, 181 Broadway.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the Breeder and Sportsman be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the Breeder and Sportsman, and not to any member of the staff

San Francisco, Saturday, Nov. 15, 1890.

Homestake 2:14 1-4.

Clark's Horse Review, which is usually very correct in all its statements, has made an excusable blunder in a late issue, mixing two California horses up together, although be it said, they both have the same name. The statement is as follows:

Homestake, the California gelding that recently went two heats in 2:14½, 2:14¼ in a race with Hazel Wilkes, a daughter of Guy Wilkes, was formerly a pacer, and could show miles better than 2;20 at that way of going. At that time, which was two year ago, Homestake was owned by Senator Hearst, but after that gentleman's trainer had become tired of Homestake he was sold to the Pleasanton Farm, and this season Andy McDowell had a chance at him.

A fact that will strike people very forcibly is that Homestake has a double infusion of Hambletonian blood, his dam being by Volunteer, one of the most noted sons of that horse, while his sire, Gibraltar, was by Echo, record 2;37½, a son of Hambletonian. The dam of Echo, like the second dam of Homestake, was of the American star blood, being by Magnolia, a son of American Star, so that in the pedigree of Homestake both the Hambletonian and Star crosses are, in addition to being the principal ones, doubled up at short range. Back of all this comes some thoroughbred blood, the dam of Gibraltar being by the thoroughbred horse Owen Dale. There is hardly enough running blood in sight, however, to leaven the trotting strains that dominate in the pedigree of Homestake, and we shall have to put him down as a trotting bred pacer that was taught to trot.

As will be seen by the above, the editor fancies that the new candidate for trotting honors is Senator Hearst's pacer Homestake 2:16½, and as the name is rather an odd one, it can easily be seen how the mistake has occurred. Speaking of this late wonder which the Pleasanton Stock Farm has developed this year, it may not be out of place to say that Mr. Salisbury owned both the sire and dam of the trotter Homestake, and he and Margaret S are now being worked together as a pole team. It can hardly be hoped that Mr. Salisbury can touch or lower the wonderful record made by Justina and Belle Hamlin, at Independence, Iowa, but we rather fancy that the team will have a chance to show what they can do before the 1st of January comes around.

When a five-year-old, he showed some remarkably fast halves, being able to go the distance in 1:07, but like a great many of the other Volunteers, he failed to come to his miles quickly, and it took a lot of long, slow work to bring him to his present record. Last year he was timed a mile in 2:19, and twenty-five minutes afterwards was brought out to show a fast quarter and the stretch was completed in thirty seconds; timed by six different watches, all of the holders being well known horsemen. It is also claimed that he has pulled a skeleton wagon one-eighth of a mile in 14 seconds. Last year he was started twice, but owing to a bad ankle (the result of a kick), he was distanced in both events. This year he was turned over to Ed Lafferty, trainer for Mr. Hugh Kirkendall, and was by him taken to Helena, Montana, where on the circuit extending from there to Portland, Oregon, Homestake was started in fifteen races and won eleven, making a record of 2.22. After returning to this State, Mr. McDowell had him in charge, starting him five times, and winning first money in each race, in addition to making a record of 2:14¼. Homestake wears a twelve-ounce shoe forward, and three-ounce ones behind, with a pair of quarter boots forward for protection, and shin boots behind. It is to be hoped that Mr. Salisbury will return in time, so that he may be able to give us a taste of what Margaret S. and the big bay gelding can do as a pole team.

Auction Sales of Thoroughbreds.

By reference to the advertising columns it will be seen that Messrs. Bruce and Kidd of Lexington, Ky. will hold several large auction sales of thoroughbreds, commencing on December 5th and extending to the 10th. On the first day there will be sold 37 head, which are owned in the firm of Messrs. J. K. Megibben & Co., which are to be disposed of owing to the death of one of the partners, and the division of the property is necessary. There are eighteen horses at present in training, among which are the well known stake and purse winners, Sportsman, Laura Davidson, Avondale, Eberlee, W. G. Morris, Abilene, Vallera, Birdella N. and Van-a-Car. There are also 12 yearlings and 7 brood mares, among the yearlings being full brothers to Audrain, Goano, Ascalon, Ascoli and Jennie R. There are also full sisters to Lela May and East Lynn. This is an excellent chance to secure tried race horses, and undoubtedly the bidding will be spirited.

Following on the next Saturday, Tuesday and Wednesday December 6th, 9th and 10th, the firm will also sell the entire stud of Mr. Amos G. McCampbell, comprising over forty head of weanlings, yearling, horses in training, stallions and brood mares. There will also be sold some hundred and seventy-five head, consisting of weanlings, yearlings, two, three, four and five-year-olds, stallions and broodmares. Tuesday's sale will consist mainly of yearlings, some seventy odd in number, opening up with the entire lot of Nantura yearlings, including brothers to the renowned Freeland, Sally Burus and Response, sisters to Irish King and Louisa Forrest, and half sisters to Bersau, Test and Hailfellow. Among the other yearlings will be found own brothers to Pride of the Great, Village King, Harrison, Ofalece and Kosciusko Key; sisters to Ollie Benjamin, Mose K., Lee S., Ed. Leonard and Lemoine H.; half brothers to Pauline, Ed. Hopper, Round Dance, Square Dance, Emigraut, Luray and War Whoop; half sister to Amos A., Masterpiece, Pessara, Blackstone, Borderer, Nell Booker, Watch Me and Fontenac. Among the stallions are Wanderer, Bob Miles, Little Ruffin, Lord Clifden, Glenfortune and Minstrel. The brood mares are of high class, seventeen of them dams of winners, and a number of young mares of fashionable breeding and untried in the stud. Space will not permit a description of the various horses and mares, but full details will be found in the catalogues. Sufficient to say that this is the greatest and best offering of thoroughbreds ever placed before the public at auction. For catalogues address this office.

The Friendly Stakes.

Once more the Washington Park Club of Chicago and the Coney Island Jockey Club of Sheepshead Bay, Long Island, have decided to announce the Friendly Stakes, the entries to which will close on December 1st. As will be remembered, this stake was first instituted last year, and when run for at Chicago, two California horses ran first and second, Rinfax winning the first honors. At the second trial held at Sheepshead Bay, Gascon proved victorious, Homer, who ran second at Chicago, not being able to do better than get fourth place. It is a sweepstakes for two-year-olds, foals of 1889. The first run off will take place at the summer meeting of the Washington Park Club, and the second at the autumn meeting of the Coney Island Jockey Club. The entrance is $50 each, with $25 forfeit, and $3,000 is added by each association. Should the same horse win both races, $1,000 additional in plate or money will be given, half by each association. Horses entered at either place incur liability for one forfeit only, and are entitled to start at either or both places. Those starting in the Friendly Stakes at Washington Park are entitled to enter for the Friendly Stakes at the Coney Island Jockey Club without incurring liability for starting at the latter place. At Chicago the distance to be run is five furlongs, while at Coney Island it is three-fourths of a mile. In both instances colts are to carry 118 lbs,, while fillies and geldings are to carry 115. There are many other conditions, which it will be well for all horsemen to read. Nominations may be made either to the clerk of the course of the Coney Island Jockey Club or to J. E. Brewster, Secretary of the Washington Park Club of Chicago.

Kentucky Stallion Stakes.

Among the many new advertisements this week, our readers will find one from E. A. Tipton, Secretary of the Kentucky Trotting Horse Breeders' Association, who announces a $10,000 guaranteed stake for foals of 1890. The caption of the advertisement is Kentucky's Great Stallion Representative Stake, but it is in nowise restricted to Kentucky stallions alone, as entries are asked for from all over the United States. The conditions of the Stake are that stallions shall be nominated on or before December 1, 1890; the entrance fee being $100, and those who have colts by that stallion may name them ten days before the race, which will take place in 1893, and $100 more for starters the night before the race. Some of the advantages that may be named for this rich event is that no colt need be left out, the nomination of the stallion nominates every colt that was foaled in 1890, and no matter who owns the colt it is eligible if the sire is nominated, it also insures the trial of colts, for no man who has a colt eligible can afford to miss educating him when his nomination is paid up to within a few days before a race that is worth $10,000; the nomination of your stallion making your colts eligible as starters. It is also a very cheap purse; as, if a horse has only five colts, it really costs but $20 each to enter in the race; if he has ten it costs but $10 each; if he has twenty it costs but $5 each, and but $2.50 each if he has forty. This purse is guaranteed by the Kentucky Trotting Horse Breeders' Association, and we have no doubt but what there will be a good entry list from this State.

Arab.

In the current number of the Horse Breeder, published in Boston, there appears a long article from the pen of one Peter Benedict, an itineraut writer who, at times, furnishes articles full of vituperation against John H. Wallace, to any paper that will consent to print his abusive screeds. The Horse Breeder has thoughtlessly published the fanatic's latest, in which he speaks of the editor of the Breeder and Sportsman as a cringing vassel of the Arthurton crowd, whatever that may mean, and also says that such cringing, cowardly servility should be exposed. And this all comes because we will not state that the sire of Arab is by Gen. Benton or Electioneer. For that matter any sire but Arthurton will please Peter Benedict and his class, who are everlastiugly railing against the American Turf Register, but at present the Board of Censors say that Arthurton is the sire, and until it is proven otherwise, the bay gelding will have to stand to his credit. We are fully convinced that Mr. Malone is satisfied that a mistake has been made, and only a few days ago he stated that the time was not far distant when he hoped to be able to clear up the matter and prove to the world that Arab was not by Arthurton. Mr. Benedict has gone far out of his course to berate the Breeder and Sportsman, but he should remember what was written about him by Mr. Wallace: "Peter is not a very reliable man in his assertions," and this statement is borne out in his own letter, as he utters two deliberate falsehoods in five lines. At various times we have given all the space that was required, so that both sides might ventilate their testimony, and have always acted impartially in the matter, but because we will not think as Benedict would have us to do, he has opened up his vials of wrath and would like to see us smothered with his billingsgate. Poor Arab! he is much sired and much dammed, and is a source of constant worry to those who, without interest, have tried to solve the mystery of his parentage.

Who Will Head the List?

Some weeks ago we thought it extremely probable that Electioneer would be the fortunate trotting stallion to head the list of those whose progeny would enter the 2:30 list during the present year, but late accounts from the East tend to show that at least two other stallions are so far ahead of him that it will be almost an impossibility for Electioneer to stand better than third. Undoubtedly the palm of honor will go to the old California favorite, Nutwood, now owned by Messrs. Stout Bros. of Dubuque, Iowa. During the present season Nutwood has placed nineteen in the list, of which sixteen are trotters and three pacers, coupled with what the year book shows, this will make him a grand total of forty-four trotters and seven pacers, which is really a wonderful showing for a horse only twenty years of age.

Following closely in the footsteps of Nutwood we find Alcantara, who is reputed to have placed seventeen in the 2:30 list this season, Electioneer following with a total of fourteen. It is just within the bounds of possibility that there may be two or three more of the get of the California stallion that will be added to his present list during the two latter days of this week, and the record meeting, which is to be held at Stockton. As it stands at present, Electioneer has done remarkably well, and we trust that at the end of the season he may stand at least second.

Our Los Angeles Letter.

I met L. J. Rose the other evening. He was very enthusiastic over the prospects of his running stable for the season of 1891. "I think I will have a Western and Eastern string," said the owner of Rosemeade, in answer to the query of your representative. "The first string will be sent to New York. The second stable will be raced in California. They will then be sent to Chicago, and after the Washington Club meeting, will be headed for Sarstogo."

Mr. Rose is of the opinion that he will have a number of speedy two-year-old fillies in his string next year.

"It is remarkable how many good fillies I purchased," said Mr. Rose. Mind, I do not yet know whether I have even one extraordinary filly, but I have secured a well balanced lot to say the least."

Mr. Rose talked quite freely about his horses now in training at the Agricultural Park. He thinks he has four gems in the Reform, Pat Molloy, Darebin and Eolus fillies. The Reform filly has been named Hinda Dwyer. She is ont of a half sister to Spinaway, probably the fastest two-year-old of her year, and is a full sister to Fenelon. Reform is the sire of Reclare and other fast ones, so it is not surprising that Hinda Dwyer is speedy. She was worked three-eighths the other day in 36½ seconds.

The Pat Molloy filly is out of Desolation, the dam of Pennyroyal. The sire of Desolation is Devastation by imported Eclipse.

The dam of the Darebin filly is Altitude by Alarm. John Mackay offered Mr. Rose an advance of $500 on the purchase price soon after the New York sale. The Eolus filly has no less than four crosses of Glencoe.

The best colt to show up thus far is the Longfield colt. His dam is Nonage, who was the best two-year-old of her day, except Miss Woodford. Mr. Rose is also favorably impressed with an Argyle colt out of Jennie C. There is also still another Argyle who has not yet been tried that great things are expected from, but more anon.

THE CHINO TROTTERS.

I visited Chino Ranch last week, and a few notes about one of the leading breeding farms of Southern California should not be amiss. Chino is composed of two Mexican grants formerly known as Santa Ana del Chino, and contained 35,600 acres. In 1881 Richard Gird purchased the Chino Ranch. It is admirably adapted for breeding purposes, and no ranch in this or any other country is better supplied with water. The Chino Narrow Gauge railroad is now in operation, and meets the incoming and outgoing trains at Ontario. This Narrow Gauge runs to the new town of Chino which is distant from Ontario or Pomona about seven miles. The genial Charles Carpenter is foreman of the ranch, and took great pleasure in showing the BREEDER AND SPORTSMAN representative over the immense possessions of Mr. Gird. A new mile track has recently been constructed, and Mr. McGregor, the Chino trainer, is very enthusiastic in praise of the track, and thinks it is not excelled on any ranch in California.

In 1885, Mr. Gird made his first investment in the trotting line by purchasing Albion from the Palo Alto ranch. Albion is a muscular, well rounded bay by General Benton out of Amy by Messenger Duroc. He has a record of 2:26½ made in a third heat and has shown his capability to trot in 2:20. Albion since his advent in Southern California has been bred to Billy Norfolk mares.

Billy Norfolk is thoroughbred. He is by Norfolk and was bred by Theodore Winters. All the Albion fillies have in the past few years been bred to Woolsey and Will Crocker, two stallions purchased at Palo Alto a couple of years ago.

Mr. Gird confidently expects that the Woolsey and Crocker youngsters will be trotters. Why shouldn't they be? There is infusion enough of the thoroughbred blood to suit the greatest advocate of the theory made succ essful by Leland Stanford.

By the way, Mr. Gird is especially fortunate in owning a brother of the world famous Sunol. Woolsey was purchased before Sunol was known to fame. He was worked as a yearling and two year old, and showed quarters in 34 seconds. He will be trained next year for a record. Woolsey is Waxana's first colt, and is a symmetrical bay horse, standing sixteen hands. The first of the get of Woolsey sold at the Palo Alto sale in New York, averaged $1,110, consequently the Chino people have great expectations for the youngsters bred on the ranch. I was also given to understand that Charles Marvin left instructions not to speed two grand looking colts by Woolsey at Palo Alto.

Will Crocker is a powerful and well muscled horse. He is a full brother to Fred Crocker, who once upon a time held the two year old record of the world with a mark of 2:25¼. Will Crocker is the only living stallion by Electioneer out of a St. Clair mare. He was injured when a four year old. By the way, this same Will Crocker is the horse that the Palo Alto people once upon a time expected to be the fastest stallion in the world. Crocker broke down after a sensational trial made at Palo Alto, and Marvin is reported to have expressed the opinion that if he could stand one season's work, that the world's record would be in danger.

I was shown a number of colts and fillies by the Chino stallions. There are twenty Woolsey yearlings on the ranch. Probably the most fashionably bred youngsters on the place is a suckling named Waxetta. She is by Woolsey out of Elmira by Albion. The Crockers are all yearlings. They are certainly a shapely lot. A weanling filly by Crocker out of Queen by Echo, should certainly be a trotter if breeding goes for aught. Queen is the dam of Pink. I should like to mention several other youngsters, but I guess I have already taken up more than my share of space.

QUARTER STRETCH GOSSIP.

Peri has been fired and blistered. Fairy was recently blistered and is now turned out at Rosemeade.

All the Australian mares imported by L. J. Rose, are to be bred to Argyle. In fact, every thoroughbred mare that is not included in the racing string, will be stinted to Argyle.

Charley Durfee is now handling Don Tomas 2:30. The veteran is being prepared for the Coronado meeting.

Ben Hill is now running the Pacific Beach Track at San Diego. It promises to be a lively fight between Coronado and Pacific Beach for patronage.

Dan Murphy, Gambo and Naicho B. are the Los Angeles horses now in training, who will sport silk at the Blood Horse Meeting.

It is reported here that the Santa Anita two year olds will be sent East in February. Mr. Unruh states, however, that they will not be sent East so early in the year.

J. W. Robinson suffered a rather serious loss last week by the death of one of his most fashionably bred fillies. The filly was by Abidene out of Betsey Harr. Redondo, the celebrated Stamboul two-year old, is also ailing.

McGregor, the Chino driver, is away on a three months vacation.

Stamboul, Jr., and Radical were recently sold at one of the big Chicago sales.

J. Willets, the owner of Silkwood, has imported Blackwood Mambrino to Santa Ana from his Kansas ranch. Blackwood Mambrino is the sire of Silkwood. He also imported a carload of standard bred fillies.

Mr. K. D. Wise left Wednesday for Kentucky. He intends to secure one of the best drivers in the East. It will not be surprising if he brings back a carload or two of broodmares.

Billy Gardner, who is training for L. S. Rose, has made many friends down here. He is a very unassuming young man, and appears to be up in his business. DAGWORTH.

Look up the Breeding.

In the last number of Wallace's Monthly there appears a notice that the Year Book of 1890 will appear much earlier than heretofore, and it would seem that there are many horses which have made records this year, and the compiler of the Year Book is not posted on their breeding. Mr. Wallace requests that the owners of the horses mentioned below send him at once their pedigrees, so that the book may appear with all the knowledge obtainable about them. This is not for registration purposes, but simply to give all sires and dams the credit due them. Those owning the following named horses should send on the information at once to J. H. Wallace, 280 Broadway, New York City.

VETERINARY.

Conducted by Wm. F. Egan, M. R. C. V. S., F. E. V. M. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Wm. F. Egan, M. R. C. V. S. 1117 Golden Gate Avenue, San Francisco.

M. H. N.

Please inform me through you valuable paper the necessary method which will benefit my horse with the following complaint: He is about ten years old, and when he was brought to this county was poor and in bad condition; and from his front legs back to his flanks (on his belly) looked as if he had been burned, and scarcely any hair grows there and at times he will break out in pimples (that is, the diseased parts), which are very sore, his hair will be rough and his eyes look dull, and when you first take him from his stall or turn him around, he will groan as if it distressed him. "This is before he warms up" that turning will distress him.

Answer.—Most probably your horse has been blistered for some lung trouble, and the blister used was either repested too often or was so strong that it destroyed the skin of the part, and consequently left a permanent blemish. If that be the case, no application will cause hair to grow there again. A little zinc salve applied to the sores will heal them. Please communicate with us again and say if ulcers have ever appeared on other parts of the body, or if any of the legs have become enlarged. The groaning is probably due to the part without hair being painful.

W. S N.

It is very probable that your mare has an attack of pneumonia, and as you consider her a valuable one, I should advise you to get a qualified veterinary surgeon to attend to her. A cough generally remains a short time after the acute symptoms subside. For general treatment see answer to L. C. in our issue of November 1st.

M C. W.

I have an old horse that has been a good one, but about a year ago he got foundered. Since then he can never go at half the speed that he used to, and rings have formed round his hoofs. I often thought that nerving him would make make him all right again, and a friend of mine confirmed my opinion, when he showed me a horse that I knew to be very lame from ringbone going thoroughly sound. I believe it was your present veterinary surgeon that operated on him, so I would like to have his opinion on mine.

Answer.—I have performed neurotomy successfully on horses lame from ringtone and sidebones, but should not recommend it in chronic laminitis (or founder). It would remove the pain and lameness, but not the inflammation existing there. This inflammation is liable to become so acute, with exercise, as to cause puss (matter) to form inside the hoof, which would result in the hoof coming off, and probably the death of the horse.

Subscriber.

I have a draught mare about sixteen hundred weight that has two large curbs. When worked hard she always goes lame on them. I blistered her three or four different times and gave her six weeks rest each time. It appeared to benefit her a little, but work always brought back the lameness. Now I thought the best thing to do would be to give her easy work for the winter and breed her next spring, and to fire and blister her before putting her out to pasture. A friend of mine told me that the colts she may have will be as bad as she is herself. If that is so, I would not breed her. Please give me your opinion through your valuable paper and oblige.

ANSWER.—Curb, which is a sprain of the Calcaneo Cuboid, Ligament, is not itself hereditary, but the conformation that renders a hock liable to this injury, appears to be often transmitted to the offspring. If your mare has what are generally termed "*curby hocks*," most probably her foals will be formed in the same way, though I have seen several exceptions to this rule.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

J. P. T.

Please publish the pedigree of Ben Wade.

Answer.—By Woodburn, dam Moss Rose by imp. Knight of St. George, 2nd dam imp. Melrose by Melbourne, 3rd dam Clarkia by Muley Moloch, etc.

H. O.

We do not understand that Mr. Starr is going to buy horses while out here, but will take back any that are consigned to parties in the East.

L. J. N,

We do not answer questions by mail. Among horse breeders the terms half brother or half sister applies to foals out of the same dam, but by different horses. It is only among those not posted in the technical terms used, that the words half brother or half sister is made use of in referring to horses by the same sire, but not out of the same dam.

A Carload of Horses for Washington.

Mr. C. F. Robinson, who lately owned a prominent livery stable in Oakland, has sold out, and purchased the Washington stables at Tacoma. Knowing the value of good blood, Mr. Robinson took up with him a carload of well bred trotters, among them being the stallion Decision, who made a record at Red Bluff this year of 2:36, in a fighting race of seven heats. Decision had had but little work or his record would have been much lower, he being fully capable of going well within the 20's. He is by Alexander 490, dam by Werner's Rattler 262, which shows a combination of Geo. M. Patchen blood coupled with that of old Biggart's Rattler, which should make this stallion of more than ordinary value in the stud. Alex. Button, 2:26½, Yolo Maid, 2:12½, Belle Button, 2:20, Tom Ryder, 2:20½, Nellie Patchen, 2:27¼, Reliance, 2:22½, Tommy Dodd, 2:24, Rosa Mack, 2:20¾, Mary Davis, 2:26¼, and many other fast horses, all show the same blood, and Mr. Robinson should do well with Decision in Washington. He has many valuable broodmares also, and as he is well posted in the breeding problem, has our hearty good wishes for his future success.

Darby's Fluid cures Cholera, Scours, Rinderpest, Cattle Plague, Sheep-rot, and foot and mouth diseases.

Grim's Gossip.

Noah Armstrong's great horse Spokane will stand in the stud at Lexington next year.

Dr. Drake, the owner of Early Bird 2:21¼, has left Maine for California and will spend the winter here.

W. R. Allen, the proprietor of the Allen Stock Farm, has presented Ed. Bither with a magnificent gold open face timer.

H. G. Patton, Riverside, had four valuable horses poisoned a short while ago. Strychnine was placed in a trough of water. No punishment would be too great for the person who placed it there.

"Axtell" Williams and M. E. McHenry have dissolved partnership, Mr. Williams purchasing the latter's interest in all the stock previously held in common. Mr. McHenry will it is confidently asserted winter in California.

A matinee race meeting was held at Pacific Beach (San Diego) last Sunday, two trotters constituting the amusement in the first event, while a like number of pacers produced additional sport later on. The first race was won by Dodson's Duchess, while Hellman's Birdie won the pacing contest.

A number of new race tracks are to be built in New Jersey before the opening of next summer's season. Sea Isle City is to have one and the work of grading the track has already been begun. The track will be owned by Charles K. Landis of Philadelphia, who founded both Sea Isle City and Vineland, N. J.

Telegraph operators at the English race tracks have a hard time when an important race is being run. On St. Leger Day, upward of 200 ordinary messages were received and despatched from Doncaster, in addition to press telegrams, which contained 10,000 words. Sixty-five operators handled the mass of work.

The Lakeport Association advertised an extra day for records on November 1st, and among others that started was Patty P. by Richmont. She won her race easily in 2:31¼ and 2:31½, which makes her standard under rule nine. I saw this little mare at Napa, and was satisfied she could do the trick with a little more work, and the above result shows that she had the speed to please her owner.

Among the young stallions that have done well this year is Bay Wilkes, who made a record at Visalia of 2:30 after a very heavy season in the stud. He is by Mambrino Wilkes, dam by Frank Hunter, and has shown speed enough to warrant the belief that he can trot as fast as Balkan or Gus Wilkes, who are both by the same sire.

Sam Gamble fancies that he is a "hoodoo," and firmly declares that he will never visit a track when Stamboul is going to trot again. If Sam does not happen to be present the stallion reduces his record, but if on the contrary Sam puts in an appearance, Stamboul proves to be "just a little off."

According to the recent ruling of the American Turf Congress, the "black lega" of the trotting turf can no longer take up the running turf vocation. "All persons expelled by the American Trotting Association, or the National Trotting Association, for fraud, shall stand ruled off the race courses of the American Turf Congress, during the continuance of such expulsion "

The well known pacing stallion, Roy Wilkes, record 2:08¼, who made a short season during the spring of this year at Pleasanton, is already being advertised in the East, and in the handbills it is stated that he is the fastest, gamest and handsomest stallion that ever lived. After his remarkable work on the eastern tracks this year, it is little wonder that his advertised fee for 1891 is $350.

The Stockton record meeting promises to be a complete success as we have heard of a large number of breeders, who propose taking trotters and pacers to that point for the purpose of giving them records if possible. The action taken by the San Joaquin Valley Agricultural Association Directors was a very thoughtful one, and will tend greatly to enhance the value of those who are fast enough to secure marks, which will place them in the 2:30 list.

Mr. Salisbury of the Pleasanton Stock Farm was expected to return from the East on last Wednesday evening. As yet we have not seen him, so consequently cannot say whether Direct and Margaret S. will start on the last two days of this week or not. Direct has picked up wonderfully since the Napa meeting, and those now at the farm are satisfied that he can knock a big slice off his record.

The horsemen of southern Oregon and the northern portion of California are taking considerable interest at present in a proposed breeders' purse of $500, which will be offered for competition at the next Fair Meeting of the Southern Oregon State Board of Agriculture. This race will be for two year olds, foals of 1889, and as there are many first class stallions and brood mares in the sections mentioned, there no reason why a first class race should not result.

It has been generally stated that Mr. John H. Shultz, the Brooklyn baker, who paid such enormous prices for trotting horses during the past three years, had retired from the track for good, but if rumor is to be believed, the old gentleman is looking about him to procure twenty first class brood mares, who either have records of 2:20 or better or can show that speed. Heretofore he was not successful in the production of phenomenally fast horses and now he has determined to buy the best there is in the land, and start anew.

Among the many theories which are entertained by those who breed trotting horses, is what is known as the "developed sire and dam" idea, and now those who believe in that notion are confident that they have solved the breeding problem, and point with pride to Nelson, 2:10¾, by the developed sire Young Rolfe, 2:21½; Stamboul, 2:11¼, by the developed sire Sultan, 2:24, and Freedom, yearling record 2.29¼, by the developed sire Sable Wilkes, 2:18 at three years.

On and after Feb. 1st, 1891, the owner of any horse trotting or pacing, imported from the United States of America will be required to lodge with the Secretary before entering a certificate of identity, pedigree and record, signed by the Secretary of The National Trotting Association; and if imported from any other country where a proper, constituted ruling association is established, a like certificate will be required, signed by its properly appointed officer. Foreign horses that have trotted in Great Britain on the Union Track previous to Feb. 1st, 1891 are exempt from this requirement.

Last Sunday a large crowd congregated at the Bay District Track to witness a match race for $60 a side between a sorrel horse, which was entered by Mr Harney, and a gray entered by Mr. Leonard. Speculation was rife as to the result, and a considerable amount of money was wagered before the horses were started. The distance was three-eighths of a mile, and the reputed owners rode the horses themselves, Mr. Leonard using no saddle, proved the victor by a length. It is estimated that fully a thousand persons were present.

What Father Bill Daly don't know about the ins and outs of racing, particularly the "ins" for number one, and the "outs" for others, is hardly worth knowing. Hence that he should have claimed the promising two-year colt Rumpus at Linden, is not so surprising as that the owners should not discovered their liability to be claimed under the conditions. The privilege, however, is one seldom used nowadays. Pierre Lorillard lost Exile in this manner, when W. Lakeland claimed the great son of Mortimer, for $2,000, a sum greatly below his subsequent worth.

A well known eastern horseman, who is thoroughly familiar with tracks all over the United States and has seen a large majority of those in California, states in a letter to me that notwithstanding all that has been said about the kite-shaped tracks being from three to five seconds faster than the regulation tracks, that he considers that Terre Haute, Cleveland and Napa are fully the equals in speed of either Independence or Kankakee. He goes on further to say that if the Independence track could be covered with such soil as there is on the Bay District Track, he fancies that Mr. Williams would then have the fastest track in the world.

Mr. Jno. W. Martin, the owner of many valuable trotting horses, has at last moved from his old home in Yolo County to Woodville, Tulare County. Mr. Martin has been prominent for a number of years on the race tracks, comprising the Coast circuit, and we feel sure that he will stir up some life among those who live in the neighborhood where he has gone to reside. In a note to this office Mr. Martin says that the horse interests in Tulare Country are at present in an active condition, and he speaks in the highest terms of the wonderful soil, that for fertility cannot be surpassed in the State. We know that Mr. Martin will keep the readers of the Breeder and Sportsman fully aware of the doings of the horsemen in Tulare County, and we trust to hear from him often.

Mr. H. M. Warden in sending in his subscription for two years in advance, says that the Breeder and Sportsman gives him more satisfaction than any other paper for which he subscribes. He says: "It has taught me many valuable ideas, and I would not be without it for any amount." Like many other writers from various sections of the State, Mr. Warden claims that San Luis Obispo County lacks good experienced trotting horse drivers, good common sense men, and it is a pity that there are not more of them in this State than we already have. With our wonderful climate, wonderful soil and wonderful horses, we have very few wonderful drivers. It would be a good thing for the breeders, if at least a half dozen first class men came to this State from the East.

Mr. W J. Casey of Santa Clara has lately returned from a trip to New York, but managed to find time enough to spend two days at Chicago, while on his return trip, and a visit was made to the great horse show now being held there; Mr. Casey says that Nelson 2:10¾, was the great object of interest. Next to the champion stallion, the spectators mostly fancied a yearling son of Sable Wilkes, who was sold as a weanling last year by W. H. Wilson of Cynthiana, Kentucky, to a Michigan firm. Mr. Casey also states that one of the remarkable things about the horse show is, that not a thoroughbred was to be seen within the enclosure. Having experienced an unexpected snow storm in Chicago, it is only natural that the Santa Clara representative was heartily glad to get back to California once more.

Mr. C. F. Dunbar, who lately purchased the pacer Johnston, is very anxious to meet Hal Pointer next year, and suggests that the bar, which has been placed for the last two seasons against Johnston should be removed, so that the two great pacers may have a chance to test which is the king. However, Mr. Dunbar seems to forget that there are also a few others who might be willing to enter in a free-for-all, even with Johnston as an entry. Just fancy the two already mentioned and Royal Wilkes, B. B., Dallas, and last but not least, are the two Californians, Cricket and Adonis, all coming up for the word at one of the great circuit meetings. It would be enough to draw tens of thousands from all over the United States, and would amply repay a trip from San Francisco to witness it.

A correspondent writing from Lexington to the Kentucky Stock Farm says: "No worse accomodation for newspaper men was ever on a racing or trotting course than the one used by the reporters at the Lexington fair grounds. Both the fair and trotting associations do love to have full reports of their meetings, but neither is willing to build a stand for the reporters. As it is, the newspaper men see nothing, hear nothing and know nothing. The crowd is before, behind and on both sides of him, so that it is utterly impossible to write. By all means build a reporter's stand." The Lexington correspondent should just make one trip round the California Circuit starting at San Jose and with very few exceptions, he will concede that Lexington is not the worst.

Many of our eastern exchanges make note of High Dye reducing the yearling pacing record to 2:41 evidently overlooking the fact that California still stands to the fore with Daisy 2:38½ made in 1886.

Humphrey Sullivan, who used to be caretaker of the stallion Gov. Sprague when that horse had the five-year-old record, was in Chicago the early part of this week, says the Breeders Gazette, being on his way from Kentucky to California with the two year-old stallion J. H. Farley, which he bought in the blue-grass region. Farley is a full brother to Valissa, the sensational three-year-old of the present season, her race record being 2:19. Farley went a mile in 2:32½ not long ago, the last half being done in 1:13, and he should do well in California. He is by Vasco, first dam by Magic, second dam by Clark Chief, third dam by Pilot Jr., which is good enough breeing for any horse. Both his first and second dams are producers, the second dam being the dam of Retta, 2:28¾. Sullivan wanted the three-year-old stallion McGregor Wilkes, that made a record of 2:22¾ this year, but the owner wouldn't take less than $25,000, and that closed the matter.

When the Eastern race goers were watching the horses run at Monmouth Park, it was announced, says the American Sportsman, that the entire stable of Theodore Winters was bought by Brewer Ehret at an expense of $30,000, and that his colors would be floated over the Hell Gate Stable—the name being gathered from his father's brewery on the Sound, opposite Hell Gate. Ehret engaged McLaughlin as jockey, and added to his expensive and important force of stablemen by making a contract with Matt Allen as trainer. The stable won no races, but bills were paid promptly. One day the newspapers announced the arrival from Europe of Mr. Ehret, the brewer. Thereupon it was discovered that the Hell Gate Stable was the creation of the son and the brewer himself had nothing to do with it. When papa returned, however, it was shown with great rapidity and force that a difference of opinion concerning racing existed in the Ehret family. Curtailment of a vigorous nature was the result. The stable has not yet won a race. It no longer exists under its original name, but some of the horses are now running under the name of F. C. McLewee. In racing, however, as in breweries and finance now a days, the hand that signs the checks is the the hand that rules the world. The elder Ehret signs the checks, and to-day there is no Hell Gate Stable.

Well at last Salvator has reached his future home, and John Mackey reports him in the best of form. The Superintendent of the Rancho del Paso says that the reason why Firenzi was not brought along also, was because she can win from $15,000 to $20,000 a year back East and her produce would hardly bring that amount. In the two cars were the following horses and mares: Glidelia, imp. Wind Mill, Prude, Peoria, Pink Cottage, Jewelry, Bonnie Leaf, a mare by Dalnacardoch out of Yorksbire Lass and Bedotte, Salvator, Fresno, Rosette, Bessie June Flora Ban, Bella B., Clay Stockton, an imported filly by Friar Tuck and a colt by Stratford out of Rica, making nineteen head in all. Those who came along were John Mackey, Ralph W. Hall, V. S., James Carrigan, Charles Gillespie, the lad who always rode Salvator in his work and exercise, a boy named Peterson and John Brandon, Salvator's rubber. While the cars were being loaded an incident occurred, which is well worthy of reproduction here, it being taken from the New York Sportsman: "The tiny black boy who has had charge of the mare Jewelry by War Dance, bought at the Fernciffe sale, slipped in from the platform and running up to his pretty pet threw his arms about her neck and drew her shapely head down upon his ill-clad breast. The mare seemed pleased at this mute farewell, and as the little fellow turned his head and looked shamefacedly at us as we watched him in the pathetic attempt he made to smile was drowned in a gush of childish tears. Then with one more caress of the pretty black head he was to see never again the lad turned, and slipping past us, hurried away in the direction of Monmouth Park."

Mr. Wm. R. Allen of the Allen Stock Farm has lately sold to W. A. Sanborn of Sterling, Ill., the yearling, brown colt, Gotha 11, 121 by Mambrino Wilkes 6,083 (son of George Wilkes 519), first dam Lindora Wilkes by Guy Wilkes 2:15½; 2nd dam Rosetta by The Moor 870; 3rd dam Cecelia Clark by Clark Chief 89: 4th to 21st dams thoroughbred. This colt is one that was in Utero when Mr. Allen purchased Lindora Wilkes from the San Mateo Stock Farm. Gotha is a smooth rapid gaited, level headed yearling; a typical Wilkes in color, conformation and gait, and was driven at a late cattle show in Pittsfield, Mass, where he received the first premium.

Mr. W. A. Sanborn is well known throughout the West as a wealthy banker and as the proprietor of the Larchwood Breeding Stud, one of the largest, most select and most successful trotting stock farms in Illinois. Mr. Sanborn was the pioneer of his section in systematically breeding trotters from the best lines of blood, and from a modest commencement some twelve years ago, has seen its establishment grow to its present large and flourishing proportions. The Larchwood stud has sent out many a fast trotter, the best known of which are Brown 2:18¾ at four years, fastest when made, Superior 2:17¼, Williama 2:20½ and Soudan 2:20¾.

Mr. Sanborn for some time has felt the advisability of strengthening his stud with a fresh infusion of fashionable blood. For some time he has been on a "still hunt" for a Wilkes colt and has made several pilgrimages throughout Kentucky and the West in search of one that would "fill his eye," but in the few that he has seen, the price was an effectual bar to a purchase, until he saw Gotha at Allen Farm.

Exhibition Day at Souther Farm.

A new feature, and one deserving recommendation is the exhibiting of horses to be sold before the sale takes place. By exhibiting we do not mean simply having them "on show," but the designation of a day on which all animals to be sold are exhibited to prospective purchasers, giving them an opportunity to see the various horses, their gaits, and actions.

Mr. Gilbert Tompkins, the proprietor of the Souther Farm, near San Leandro, extended such an invitation to all those interested in horses, and judging from the attendance will be amply repaid on sale day for his courtesy and forethought.

The farm is beautifully situated and admirably adapted to the raising of fine horses, and the manner in which the various barns, paddocks, etc., are arranged, show that the genial young manager is an adept when it comes to arranging his farm with an eye to beauty. A fine half-mile track has been built, on which we saw the colts driven and lead. There were so many shown, and some of them very "neat" ones, that we will speak only of those that struck our fancy most. A big black, hooked to a sulky, glided along very smoothly, and was the center of attraction. This one was Gran Moro, a son of Le Grande out of Sunny Slope Belle by The Moor. He is a fine looking, big fellow, and showed a considerable turn of speed.

Jim Linfoot, a son of Figaro, was driven along with Gran Moro, and showed himself very handy. Then came the two year olds, the pick of which is the black colt by Whippleton, dam by Almont Patchen. He is all over a Whippleton, and will make a serviceable horse.

Then came the broodmares. Veronica by Aloona is a grandly turned mare, and should command the attention of horsemen who want a well bred one. She is a grand breeder, as is shown in her daughter Vera by Wildnut, as prsocious a little miss as one would wish to see in a day's travel.

Another much admired was the filly Freda Arnold, who carried away a "little of the sack at Napa during the last meeting.

Owing to the lack of time, our description must be somewhat shortened. Mr. Tompkins desires to say to the public that any offer, even a ten dollar one, will go, as the fifty head to be sold are up to sell without reserve.

Cattle are prevented from taking Epizooty, Pink-eye, etc., by using Darby's Fluid.

California Entries to the Terre Haute Stakes.

From Secretary McKeen we have received a list of tbe entries to the above stake which comprises 543 entries. The following are those made by California Breeders:

Agnew Stock Farm, Hillsdale, b c Hillsdale, by Antinous, dam Nettte Nutwood, by Nutwood.
Clawson, L E., San Francisco, Cal., ch f, Viola Derby by Chas. Derby, dam Ketly mare by Gibraltar.
Goldsmtth, John A., San Mateo, Cal., bl c,—— by Sidney, dam Blonde by Elmo.
Same, bl f,—— by Sidney, dam Miss Crawford, by Bryant W.
Same, bl c,——, by Stmmocoloo, dam Maude, by Norwood.
Lathrop, Ariel, San Francisco, Cal., ch c Fillmore by Palo Alto, dam Miss Gtft by General Benton.
La Siesta Ranch, Meolo Park, Cal., b f,—— by Eros, dam Nettle Nutwood by Nutwood.
Same, b c—— by Eros, dam Morna by Brigadier.
Same, b f, —— by Eros, dam Algonette by Algona.
Same, br c—— by Eros, dam Rosa Bonheur by Irwin Davis.
Same, br f—— by Eros, dam Amaryllis by Grinstead.
Same, b f —— by Eros, dam Nerea Patchen by George M. Patchen, Jr.
Same, b f —— by Eros, dam Fannie by Admiral.
Same, g f —— by Eros, dam Maude by Henry Clay.
Same, b c —— by Eros, dam Nellte by Henry Clay.
Same, b c ——by Eros, dam Lady Santa Claus by Santa Claus.
Same, br c —— by Eros, dam Cyrene by Cyrus R.
Same, br c —— by Eros, dam Lady Alice by Nutwood.
Same, b c —— by Eros, dam Olita by Nutwood.
Same, b c ——by Eros, dam Nerea by John Nelson.
Same, br c —— by Eros, dam Juanita by Dan Voorhees.
Same, br f —— by Eros, dam Hercules Mare, thoroughbred.
Same, b c ——by Eros, dam Flora by Elmo.
Myers, F. D., Oakland, Cal, ch c by Nutwood, dam Nettie H by Richmond, 5790.
Palo Alto Stock Farm, Menlo Park, Cal., Teazle by Electioneer, dam Telle by General Benton,
Same, br f Bell Bird by Electioneer, dam Beautiful Bells by The Moor.
Same, b c Pacolet by Electioneer, dam Dame Winnie by Planet.
Same, b c Lochinvar by Nephew, dam Lorinne by General Benton.
Same, b c Flower Boy by Nephew, dam Wildflower by Electioneer.
Same, b c Worth, by Electioneer, dam Waxana by General Benton.
Same, b c Plover, by Electioneer, dam Penelope by Mohawk Chief.
Same, b c Liston, by Electioneer, dam Lady Ellen by Carr's Mambrino.
Same, b c Maro, by Electioneer, dam Mano by Piedmont.
Same, b f Athena by Electioneer, dam Ashby by General Benton.
Same, b c Lent by Electioneer, dam Lizzie by Wildtdle.
Same, b f Elwina by Electioneer, dam Esther by Express.
Same, b f Hylda by Wildnut, dam Helpmate by Planet.
Same, br c Correct by Palo Alto, dam Lizzie Collins by Stansifer's Woeful.
Same, ch f Jest by Palo Alto, dam Juanita by General Benton.
Same, b c Warwick by Palo Alto, dam Wicket by General Benton.
Same, ch f Ceta by Piedmoot, dam Cecil by General Benton.
Same, b f Lucia by Piedmont, dam Lola by General Benton.
Same, b f Easel by Azmoor, dam Edith Carr by Clark Chief.
Same, b c Sketch by Azmoor, dam Sprite by Belmont 61.
Same, b f Grace by Azmoor, dam Glencora by Mohawk Chief.
Same, b c Clarion by Azmoor, dam Clarabel by Abdallah Star.
Same, b f Siva by Azmoor, dam Sonnet by Bentonian.
Same, b f Rowena by Azmoor, dam Emma Robson by woodburn.
Same, br c Luron by Azmoor, dam Lucy.
Same, b f Violet Girl by Wild Boy, dam Violet by Electioneer.
Same, b f Ethela by Wild Boy, dam Emiline by Electioneer.
Same, ch f Jewel by Palo Alto, dam Jennie Benton by General Benton
Same, b c Fearless by Beverly, dam Floweret by Electioneer.
Same, ch f Avona by Palo Alto, dam Astoria by General Benton.
Pleasanton Stock Farm Company Pleasanton, Cal., b f Margarhita by Director, dam May Day, by Ballard's C. M. Clay, Jr.
Same, br c Titus by Director, dam Belle Echo, by Echo.
Same, br f Judic by Director, dam Roxana by Gibraltar.
Same, bl f Bella Brooks by Director, dam Misforlune by Monroe Chtef.
Same, bl c Frieze by Director, dam Wemple Mare by Hambletonian Jr.
San Mateo Stock Farm, San Mateo, Calif, bl c, by Sable Wilkes, dam Fldelta by Director.
Same, bl f——by Sable Wilkes, dam Allce Clay by Almont.
Samo, bl c——by Sable Wilkes, dam Annie G. by Le Grande
Same, b c——by Sable Wilkes, dam Rosena Wilkes by Guy Wilkes.
Same, b c——by Sable Wilkes, dam Minnie Princess by Nutwood.
Same, b c——by Sable Wilkes, dam Molly Drew by Winthrop.
Same, ch c——by Guy Wilkes, dam Cora by Buccaneer.
Same, b c——by Guy Wilkes, dam Eva by Le Grande.
Same, b c——by Guy Wilkes, dam Rosetta by The Moor.
Same, bl c——by Guy Wilkes, dam Rosalee, by Sultan.
Same, b c——by Guy Wilkes, dam Llodale, by Sultan, Jr.
Same, ch ch——by Guy Wilkes, dam Melrose, by Sultan.
Same, b o Ventura, by Sable Wilkes, dam Venturess, by Athurton.
Same, br f Lucette, by Sable Wilkes, dam Hettie, by Tiltoo Almont
Same, bl c Sablehuret, by Sable Wilkes, dam Gtna Wilkes, by Guy Wilkes.
Same, b o Mogul, by Sable Wilkes, dam Macola, by Le Grande.
Same, bl o —— by Sable Wilkes, dam Huntress, by Arthurton.
Same, br c, —— by Sable Wilkes, dam Glen Ellen by Arthurton.
Same, b c, Marquis Wilkes by Guy Wilkes, dam Ruby by Sultan.
Seme, b f, Grace Wilkes by Guy Wilkes, dam Blanche by Arthurton.
Same, b f, Cecil Wilkes by Guy Wilkes, dam Sable by The Moor.
Same, b f, Princess Wilkes by Guy Wtlkes, dam Margaret by Sultan.
Same b f, Silver Wilkes by Guy Wilkes, dam Sleter by Admiral.
Same, b f, Sabledale by Sable Wilkes. dam Vixen by Nutwood.
Same, b c, —— by Sable Wilkes dam Fleety by Arthurton.
Same, ch c, —— by Guy Wilkes, dam Lady Delmas by Del Sur.
Same, bl c, —— by Guy Wilkes, dam Tabble Roseubanm by Nutwood.
Same, ch c, —— by Guy Wilkes, dam Sweelness by Volunleer.

Same, br f Simmeta by Simmocolon, dam Santa Rita by Sidney.
Williams & Morehouse, Oakland, Cal., b c Montana by Sidney, dam Hattie by Commodore Belmont 4340.

So much proposterous twaddle has been spoken lately at the Church Congress and elsewhere on the subject of betting and gambling that it is positively refreshing, says London Truth, to come across a preacher who can deal with tbe question in a rational manner. It is delightful, therefore, to be able to call attention to a sermon which has just been delivered by the Rev. C. J. Karslake in the Roman Catholic Church at Galashiels. Father Karslake replied with considerable vigor and much good sense to the ridicnlous statements of the speakers at a recent anti-gambling meeting. Betting, he declared, was "contrary to no known law of God, provided that due provision was made for the equality of chance. and when the amount staked was small, and not hurtful to the better or his dependants, there was nothing in the moral law to condemn it. As to gambling, this also applied, provided certain definitions as to equality and honesty were observed."

The Palo Alto Stud.

If there is one horseman in this great world who has not heard of the great breeding stud known as Palo Allo, God have pity on him, for we have none for such an ignorant person. But there are some things connected with Palo Alto which few know about. To the task of informing snch about the early history and incidents of Palo Alto, we now devote ourselves. "Did you ever bear how I became interested in horses?" said the Senator recently. "Well I'll tell you. It was several years ago, and I had been working very hard—so hard, in fact, that my physician said that unless I took a rest I would break down altogether. My business interests were so great and so pressing at that time that I could not think of following this advice. I told my physician that a rest from business was impossible, and that he must prescribe something else. He thought awhile, and then said that the next best thing was to occupy my mind in some other way, and obtain the relief and rest that are to be found in diversion. He suggested driving. I had at that time one pretty good horse, a roadster, and I followed his advice. I quickly became so interested in the animal I possessed that I bought another and a better horse. I drove these and watched them carefully. I soon found myself trying to develope them into something better than they were, and I succeeded so well that I bought others and developed them. Almost before I realized it I had got together a fair stable and was deeply interested in the development of the horse. It was a quick and natural step to breeding, and I made it with enthusiasm.

"In the old days, when we washed gold in the mines, there was a certain sort of dust that could not be separated from the sand except with the use of a magnet. We used to put the magnet in the dirt and the gold would stick to it. In my leisure moments from mining I was wont to amuse myself by experimenting with my magnet. It was the common horse-shoe kind and I would dip it into a heap of iron tacks and keep adding to its burden until the limit of its strength was reached. Then I would strip away the tacks and load up the magnet again. I repeated this again and again until I found that the power of the magnet was seriously impaired. I succeeded in reducing that power to one-third of what it was originally, and I think that I could have destroyed it altogether by simply overtaxing it, although I never experimented that far. When I became interested in the development of the horse I recalled those idle moments with the magnet, and I reasoned that the power of a horse could be destroyed just as readily by overtaxing as that of the magnet. At that time it was the custom in training horses to tax their endurance to the utmost. They were given miles of jogging, and were worked until they were exhausted. The seemed to me to be all wrong. It was just what I had done with my old magnet, and I was convinced that it left the horse with impaired strength and endurance each time it was done The more I thought about the matter the more I became convinced that the proper way to develope the horse was to keep every effort demanded of him well within his powers. He should not be worked until he was exhausted but he should be trained to make one supreme effort when his powers were at their best.

"I applied this theory, and have not only had remarkable success myself, but I have lived to see the whole system of training trotting horses revolutionized. There was a time when a trotter was supposed to be immature until he was nine or ten years old. Now we have three and four-year-olds trotting close down to record time, and even the yearlings are trained. Personally, I am not a little proud of holding the two, three, and four-year-old records, and I attribute that success entirely to the system of training suggested to me by the mining magnet, and inaugurated by me as a relief from business cares.

"From developing the horse by training, it was but another step to developing him by breeding, and my interest in the horse and my love for him became so great that I was impelled to add breeding to training. Now, I have seen that the horse possessed a power analogous to that of the magnet. I reasoned that this was an unintelligent, though active force. Any kind of a horse will trot until he is urged to a point beyond his trotting powers, and then he will break into a gallop. This is true of anything from a Percheron to a thoroughbred. I concluded that if I could develop in the horse the intelligence necessary to make him trot instead of run, I had the problem solved. This had to be done by breeding as well as training, and so I understood the task.

"I bred thoroughbred mares to standard bred trotters that I might get the speed and gameness of the one and the coolness and encurance of the other, and then I bred again with a view to developing the trot as a natural gait. I am satisfied with the progress I have made so far, and am convinced that eventually horses will be bred so that they will prefer trotting to running, and that their greatest speed will be brought out in trotting. In other words, the horse will be so bred that the trot will be his natural gait, and consequently the easiest for him."

On Nov. 4th, the sale of the thoroughbred horses of the Dwyer Brothers of Brooklyn, N. Y., took place at Elizabeth, N. J., and it is safe to say that it was even a more important event than the great closing out sale of Pierre Lorillard a few years ago. The sale was conducted by Col. Bruce, and the attendance was very large, including the leading racing and breeding men. Hanover was knocked down to F. C. O'Reilly for $15,000.

Kingston was started at $7,500, and was gradually run up to $10,000. Phil Dywer then bid $25 000. For a moment there was silence. Then came $26 000 from Jimmie McCormick, which was met by $30,000 from Phil Dwyer. All saw that Mr. Dwyer was bound to have the horse, so they gradually retired. The other sales included Sir John J. E. McDonald, $5,000; Aurania, C. Cornchison $2,700.

Honston. J. E. McDonald, $2,400; Extra Dry, F. C. O'Reilly, $2,800; Blue Dress, Belle Mead Stud, $1,025; Kinsbridge, F. C. O'Reilly, $3,000; Longford, J. E. McDonld, $2,500; Bush Bolt, J. McCormick, $1,750; Brown filly by Enquirer Collosa E. H. Garrison, $2,200; Inspector B, Belle Mead Stnd, $10,000; Meriden, J. H. McCormick, $3,000.

Athletics—Continued.

Considering that so many good men were absent, the boxing entertainment on both nights was remarkably good, and blood flowed even more freely than it did on the occasion of the last tournament. Each of the winners received their medals, which were very neat and valuable, just as soon as they had won them. On the first night about 500 gentlemen sat around the ring and it was evident from the manner in which they applauded the contestants, that the sport was up to their taste. The platform upon which the men boxed, was erected in the center of the gymnasium, and from all points the spectators had a fine view of the contests.

Joseph Lyons of the Alpine Club and Phil Bulo of the Olympic Club were the first pair to face the audience. They represented the bantam weights. The bout was given to Bulo as the Alpine man's heart failed him. Wm. Spillman of the O C and W J Donegan of the Lurline's next made their bow. They also were bantams. So even were the men matched that an extra round had to be ordered. The judges gave the bout to Spellman. M J Lyons of the Alpines and Phil Bulo were matched. The Olympian being the strongest of the two won. The feather weights were next announced and N L Williams, O A C, and G W Bishop, Alpine A A C steped into the ring. Both are new men at the game and Williams was very properly awarded the bout. James Lucy of the Lurline Club and H M Pitman of the O A C boxed only one round, for the latter was knocked out in one short order. Williams was to have met Lucy for the final bout, but the former very judiciously offered to take second prize.

The light weights, W H Dooley of the A A A C and H Gallagher of the L A C amused the audience for a while. Both men are very clever but they entirely disregarded the thoughts of science. The contest was simply a test of physical strength. Dooley was knocked out, but had he been anything of a ring general he might easily have won first prize. These were the only two in the light weight class.

The second meeting opened with W Gallagher of the Acme club and John O'Neil of the Sacramento Athletic Club. The man from the interior was done up in the second round and Gallagher won the first prize, there being but two entries. For the middle weight class appeared Herman Hansen, A A A C and J W Satterwaite, O A C. The Alpine man had never taken any lessons and he was more than pleased to quit in the third. Bob McCord, O A C, and W Johnson, L A C ended their dispute in the fourth round. McCord, who was not in any kind of condition, went to pass in the fourth round and was counted out. He made a grand fight against a good man and his defeat was no disgrace under the circumstances.

Johnson and Satterwaite boxed for the final of the middle weights. The Olympian was awarded the contest.

Bulo and Spillman fought for the prizes in the bantam weight class. The former won. Kitchen, of the Acme Club, had a walk over for first medal in the heavy weight class, as nobody disputed his right to the title. Sullivan, of the Acme Club, defeated Wand of the Olympic Club for the second medal. This bout ended the tournament, which was very exciting from beginning to end. The following is a list of the medal winners:

Bantam-weights — First, Philip Bulo; second, William Spellman.

Feather-weights—First, James Lucy, Lurline Club.

Light-weights—First, H. Gallagher, Lurline Club.

Welter-weights—First, William Gallagher, Acme Club.

Middle-weights—First, J. W. Satterwhite, Olympic Club; second, William Johnson, Sacramento Club.

Heavy weights—First, John Kitchen, Acme Club, and special prize to M. Sullivan, also of the Acme Club.

Among the spectators who wituessed the tournament was Brigadier-General Gibbon, U. S. A. The following gentlemen acted as officers for the occasion:

Judges—V. Stow, H. Bissell and Gaston Ashe.
Timers—H N. Sloper, S. M. Hughes and M. Weed.
Clerk—Eugene Van Court.
Referee—T. F. Scanlan.
Master of ceremonies—J. F. Larkin.

THE GUN.

Duck and Deer Hunting.

The Lakes and Sand Hills of Nebraska—Antelope and Grouse Shooting.

VALENTINE, Nebraska.

EDITOR BREEDER AND SPORTSMAN:—The shooting this fall among the sand hills in the great hunting region west and south of this place has been of a very superior quality. The entire range of country for the distance of more than one hundred and fifty miles to the southwest, all along the north fork of the Loup river and extending to the head waters of the Dismal river into the Black Hills, is perhaps as fine a district for large game, especially deer and antelope, as can be found in the west. The sharp-tail grouse are abundant in the hills. They are, as many of your readers who are acquainted with the birds of the Northwest know, much lighter colored than the pinnated grouse; have not the same appearance about the neck, the latter having pointed neck feathers; the former are also easily distinguished by the feathering of their legs and feet. The pinnated grouse are more of a domestic bird and love the gratuitous and richly prepared feeding grounds presented by the cultivated fields, while the sharp-tail avoids the settlements and are to be found in great numbers only in the more remote districts in such barren wastes of country as the one above referred to. These birds almost invariably when flushed start up with a sharp and noisy cackle, swift of wing and wary of approach, except when found in districts where they remain practically undisturbed for generations.

Hundreds of thousands of acres of these sand hills are seldom touched by man, save the occasional visit of the cowboy, who seldom deigns to notice such small game as a grouse.

They are a beautiful bird, frequently found in flocks of no inconsiderable size, yet more frequently scattered about so that only from one to a half dozen are likely to at once take wing when flushed.

During the latter part of October a party of hunters, of which number I was one, left this point for a cluster of lakes lying about seventy-five miles to the southwest, surrounded for almost that entire distance by the interminable hills of sand, and presenting a veritable aquatic oasis in a practically sandy unoccupied desert. This country has long been used for the purpose of cattle ranges; the soil yielding grass of a good quality, although growing only in small bunches out of a sandy soil, which at times is blown into a thousand fantastic shapes, at the caprice of the winds. The hills are seldom large, but are of a uniform height so that in looking away across the landscape one is led to believe the farther view a level plain, but on approaching it the same interminable billows of sand are noticed, each hill or mound being so like every other that one can well imagine themselves, after a hard day's ride or drive, at the same point from which they started in the morning. The same white colored sand; the same tall, round, jointed spears of bunched grass with seeded tops nodding in the breeze.

Our first camp was made in the hills, just as the crimson and orange hues were flushing the western sky: the last rays of the departing sun turning to gold the feathery clouds which, in broken flocks, rested idly upon the calm sea of the October sky. A few grouse had been shot during the afternoon, upon which, with "camp coffee," we made a hearty supper.

"We will drive, by easy stages, to the lakes, to-morrow" said our guide, "and you may have the opportunity of shooting a goodly number of these birds." And so it proved. I was up with the first streakings of day anxious for some sport. In a short time all the members of our party were astir, and by the time we had arranged our experiments breakfast was announced.

As we were finishing our morning meal, the sun peeped over the hills from behind a low bank of grey cloud which lay along the eastern horizon. Taking my gun and dogs, I started off paralleling, the direction over the hills indicated by our guide as the general direction to the lakes.

I had traveled but a few hundred yards when Rush came to a point and was beautifully backed by Nell.

They presented a splendid picture; their quivering lips and bulging eyes, together with the firm stand they made indicated that the birds were close by. A moment I noticed the scene presented and then came to "ready" and moving up a few steps was almost startled by the whir of wings and music of the birds as a dozen or more of them sprang, with surprising swiftness into the air. A quick pull and as the successive reports rang out on the clear morning air. I was gratified to see the two birds chosen come to a dead stop and fall limp and lifeless to the ground. I let the dogs retrieve one each and as they looked up into my face for the anticipated caress, after laying the birds at my feet, I could but feel how very satisfying is the companionship of such knowing and faithful animals.

As the grouse had shot over the adjoining mound close to the ground, I felt that their flight had been a short one, and gathering up the birds, we moved on. Scarce two hundred yards had been covered, before Nell came to a scent, and with head well up in the air began roading, when suddenly she came to a dead point, with head turned sharply to the left. Rush playing a good second. A step forward and a single bird arose which I missed clean with my first barrel, but stopped beautifully with my second at rather long range.

The firing to my right indicated that the balance of our party were having some fine sport also. The wagons had come to a halt, after leaving camp for a short distance, and I could now hear our guide and the drivers also, shouting lustily for all hands to "Come in." I accordingly did so and found that a consultation was desired as to the best course to pursue for the day.

"You see that the day is going to be cloudy," said our guide. "This will make it a splendid day for duck shooting at the lakes, and I would suggest that we push on and take advantage of it." "You can shoot grouse any day," he added. So we climbed into the wagons and made all haste to reach the lakes, which we did about noon.

As we came into a little valley which opened out from the largest lakes which proved to be about two and one-half or three miles long, by a varying width of a half to three-quarters of a mile, we caught sight of a band of some six or eight antelope, coming out of the hills to the lakes, for the purpose of securing a drink. We tried a long shot at them with our Winchesters, but evidently did no execution, as they quickly scampered "over the hills and far away." The ducks were flying about in flocks of various sizes, and when we came near the border of the lake a large number rose, and separating, flew in either direction settling but a few hundred yards in the lake on either hand.

We hastily partook of luncheon and were away, each one choosing a position for himself along the lake.

The rushes grew to the height of three or four feet all along the border of the lake, fringing them to a depth of several yards. These rushes furnished splendid blinds.

It was found that these rushes had, by successive seasons of growth and decay, formed a floating mat so thick as to almost render wading through it next to an impossibility. This proved to be a serious detriment to the work of our dogs in retrieving birds which fell in the water beyond it.

As soon as the ducks became stirred up, the shooting proved to be as fine as any I ever indulged in. From about 3 o'clock until nightfall the sport resembled slaughter more than sport. I bagged sixty-three ducks during the afternoon and almost all of our party, four in number, did almost equally as well. A few geese and three crane were also brought down.

That night, about our campfire, the peculiar "singles" and marvelous "doubles" were recounted by us each for the entertainment of all. The verdict was unanimous that this locality was deserving of the palm over all grounds for duck shooting off the coasts, which we had ever met with. The next morning we were somewhat slow in arousing ourselves, the exertion of the previous day and our late hours over the camp fire on the previous evening having given us a desire to take a good rest.

It was only after repeated and vigorous notifications that "breakfast wuz aspiliu" from our cook that we were all finally aroused. It is wonderful how well one can sleep after the first day's exertion and excitement has once been enjoyed. I verily believe that such sleep is truly one of the luxuries of life, of which the sportsman is the almost exclusive participant. While we were eating breakfast a single horseman appeared on the brow of the line of hills to the westward, and after scaning us a while came around the lower end of the lake on a swinging gallop and shortly drew rein at our camp. He was seated on a little bay pony, which was half covered by an immense saddle, to the back of which was strapped a roll of blankets, the outer one being of rubber; a hair lariat was coiled and hung upon the horn of the saddle. The stranger was dressed in a thick flannel shirt, over which was a short heavy blouse or jacket, and his corduroy pants were tucked into knee boots, on the heels of which were fastened a mammoth pair of spurs. In his leather belt was a pair of large revolvers as well as a full complement of cartridges. We did not have to wait to be told that before us stood a genuine species of the genus homo, known as a cow boy. We found him to be a genial, gentlemanly fellow, and after he had accepted an invitation to breakfast, we found him to be just the man we were looking for.

He reported having seen a number of deer in his ride from the head waters of the Dismal river, and told us if we would ride about ten or twelve miles to the west we would come to a cow ranch where we could obtain any information of the game in the present district, as the boys there knew every foot of it, adding that if we would come over to his "lay out" we should want for nothing.

Filling my haversack with some prepared breasts of duck and bread and salt, I mounted one of our ponies and struck off to the southwest, determined that I would bring in a deer or antelope.

I rode for some two hours before I caught sight of any thing, save some coyotes and a few sand hill crane. Coming suddenly to the top of one of the little hills, I glanced below to behold a fine bunch of antelope, which seeing me scampered away on the double quick, without giving me the least opportunity for a shot. They ran over a number of hills to one more prominent than those surrounding it and soon were showing their heads here and there along its crest as they paused to take a survey of myself and pony.

I had but little experience in hunting them, but remembering the instructions of our guide, I dropped the lariat from the saddle bow and dismounting left the pony to graze in full sight of the game, first tying a large red handkerchief, which I had brought for the purpose of attracting their curiosity, to the horn of the saddle so it would flutter in the wind. I then took my Winchester and crept away to get a shot at the curious animals while they investigated the strange object. It took me a long time to make the detour so as to come in to the windward of the flock, when I found that they had moved back toward my pony for more than half the distance, and with heads erect were running in a half circle, pausing every now and then to inspect the handana as it fluttered in the breeze. Finally they came well up toward the hill behind the crest of which I was hiding, and I was given a fair shot at not more than one hundred and fifty yards. Much to my surprise, the animal I fired at started off with the flock, although I could see it was hit very hard. In a moment they were out of sight. Pausing to mark the direction they had taken, I returned to my pony as rapidly as possible and was soon spurring on after them. I could see occasional drops of blood along the way they had taken, their tracks in the sand being very plain.

But a few hundred yards from the place where I had shot the antilope, I noticed that one had left the general course, and by examining the tracks was soon convinced by the blood drops here and there, that this was the wounded one. I followed it I should think for a mile, when I caught sight of it standing with its head down, its nose almost touching the ground.

I again left my pony and crept up as near as I could without showing myself, and at long range drew as careful a bead as possible and pressed the trigger. The result was a puff of sand just under the antilope, and the way it jumped and ran away I was loth to believe it had previously been hit at all. But nothing daunted I still pursued, but after spending the remainder of the day trying to get sight of that animal, I at last had to give up the attempt in disgust. Night was now fast coming on, and I found myself with no adequate idea of direction, with a pony well worn out, and I knew not how many weary miles of trackless waste lay between me and camp. I tried to retrace my steps, but darkness came on and I was unable to do so.

That infernal pony had been raised to camp anywhere, and seemed perfectly satisfied to stand stock still when I thought to let it take its own course. After a number of unsuccessful attempts to get it to exercise its horse sense and lead off, I found myself saying with forced calmness: "Well, here's a howdy do; a pretty howdy do," and could but grimly smile at my predicament.

I shouted at the top of my voice, but the sighing of the night winds among the grasses was the only reply. I fired my repeater, several times in rapid succession, and listened in hopes of hearing an answering report, but all to no purpose. I was completely lost.

After wandering about for half the night I concluded to make the best of the situation, and taking the saddle from the pony's back, and using it for a pillow, I rolled myself in my rubber blanket, and fastening the lariat to my rist fell to thinking. After smoking two or three cigars I fell asleep, and when I awoke the sun was just peeping over the hills. It was the most welcome sunrise I had seen in many a day.

Throwing the saddle over my pony I set out in an easterly direction and soon fell into a road which luckily landed me, about 9.30 A. M., at the border of the lake, and soon found my way to camp.

My companions were all out hunting me, but soon returned, when I joined in the laugh over my adventure as freely as any of them. Greenhorns and bird hunters may occasionally kill antelope, but not often, at least I found it so. I had shot one before, and have killed two since, but for sport give me grouse, duck and quail shooting, over a good dog. It is more sport and there is far less danger of becoming lost while engaged in it. The antelope will give a long time to range the hills, if they wait for me to kill them. The boys, I scarcely need say, never tire of telling how I got lost in the hills. TENDERFOOT.

The Law of Trespass.

The questions which "Subscriber" asked us last week, relative to trespass, and the steps which were necessary to be taken by the owner or occupant of land, before he could maintain an action, were doubtless very unsatisfactorially answered, owing to our failure to present the law touching the matter. We shall attempt to answer them again, by quoting the law, if this be found to be an unsatisfactory answer, and we have no doubt but that it will, all we can say is, that the law should be amended, so as to be general in its application:

TRESPASS.—San Francisco County.—Act of March 30, 1872. —Section 1. It shall not be lawful for any person or persons to enter any inclosure belonging to or occupied by another, in the city and county of San Francisco, for the purpose of hunting, or to shoot, kill or destroy any kind of game, without having first obtained permission from the owner or agent of such inclosure.

Sec. 2. Any person who shall violate the provisions of this act shall be deemed guilty of a misdemeanor, and shall be punished upon conviction by a fine of not less than twenty-five dollars nor more than one hundred dollars, or imprisonment in the county jail not to exceed sixty days, or by both such fine and imprisonment, and jurisdiction of such offenses is hereby vested in the Police Judge's Court in said city and county.

Napa County.—Act of March 26, 1872.—Sec. 1. It shall be unlawful for any person to either hunt or fish within any inclosed land in that portion of Napa county lying east of Napa river, without first having obtained the permission of the owner thereof. Any one so offending shall be guilty of a misdemeanor, and upon conviction thereof shall be fined in a sum of not less than fifty dollars nor more than five hundred dollars, or be imprisoned in the county jail not less than twenty days nor more than three months, or be punished by both such fine and imprisonment. The District Attorney shall receive one-half of all fees collected under this act for prosecuting such offenders; the other half shall be paid into the Common School Fund of the county.

Butte County.—Act of March 22, 1872.—Sec. 1. It shall be unlawful for any person to hunt or shoot game within any yard, park, garden or other private inclosure immediately about or within five hundred yards of a dwelling, it being the property of another person, in the county of Butte; and any person who shall hunt or shoot game within such grounds or inclosure shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by fine of not less than ten dollars nor exceeding one hundred dollars.

Sec. 2. Any person guilty of such misdemeanor or offense shall be liable to a prosecution therefor before any Justice of the Peace of the township where such offense is committed, on complaint of the party agrieved or his agent, and in all cases of conviction the costs of the prosecution shall be taxed by the Justice against the defendant, and such costs and fine may be collected as judgments are collected in other actions; and should the defendant neglect or refuse to pay the same, the Justice may imprison such defendant in the county jail of said county until the same is paid, or for a term not exceeding three months. All fines collected under the provisions of this act shall be paid over by the Justice to the County Treasurer of said county, who shall place the same in the County School Fund of the county.

Yolo County.—Act of March 16, 1872.—Sec. 1. It shall be unlawful for any person to hunt or shoot game or discharge firearms within any yard, park, garden, or other private inclosures immediately about a dwelling, the property of another person, in the county of Yolo.

Sec. 2. It shall be unlawful for any person, during the months of June, July, August, September and October of each year, to hunt or shoot game or to discharge firearms of any description, upon any cultivated land in the county of Yolo.

Sec. 3. Any person so offending shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not less than ten dollars nor more than one hundred dollars, or by imprisonment in the county jail for a term not exceeding three months, or by both such fine and imprisonment.

Sec. 4. All fines collected under the provisions of this act shall be paid into the County School Fund of the county of Yolo.

Other Counties.—Act of March 8, 1872, as amended March 30, 1874.—Sec. 1. It shall not be lawful for any person or persons to enter upon any inclosed land belonging to or occupied by another, for the purpose of hunting with dogs, or to shoot, kill, take, or destroy any kind of game, or to enter upon private lands, whether inclosed or not, for the purpose of felling or destroying trees, to extract honey, or other purposes, without first having obtained permission from the owner or agent of such owner or possessor.

Sec. 2. Any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor, and shall be punished upon conviction by a fine of not less than ten (10) dollars nor more than two hundred (200) dollars, or imprisonment in the county jail for a term of thirty days, or by both such fine and imprisonment.

Sec. 3. This act shall apply only to the counties of Alameda, San Mateo, Marin, San Bernardino, San Diego Colusa, Sacramento, Sonoma, Nevada, Humboldt, Los Angeles, Santa Barbara, Contra Costa, San Luis Obispo and Mendocino.

France seems to appreciate the means whereby her tables may be furnished with the choice flesh foods of the world, as evidenced by the following notice of the importation of quail. An exchange says:

"Forty-five thousand live quails were received at Marseilles, France, on the 2d of October, and on the 3d 60,000 more followed. They were all consigned from Alexandria."

Bear and Cougar in Washington.

A newspaper correspondent discourses interestingly of the early days in the now new State of Washington. The reminiscence runs as follows:

Were the cougar and bear numerous and dangerous in the early days of settlement? Plentiful as flies in dog days. Bears were dangerous customers to meet in early spring, and we had to keep a sharp lookout for our sheep, lambs, calves and pigs at that time, otherwise they were very liable to become food for bear and cougar which would very nearly walk into the parlor in search of something dainty to eat. Bruin meddled with no one or anything, and minded his own business other times of the year, especially when plenty of berries were to be had, but let no one who cannot look over the sights of a rifle quickly and certainly undertake to tackle "Black Bob" or "Cinnamon Joe" in a Washington forest, for if he does not kill the first time the fur is bound to fly and his knife must be handy, for he will find plenty of use for it. A bear takes lots of killing, and will carry lots of lead and show plenty of daylight before he goes under. "If you ain't a dead sure shot and can't split his heart every time," as Buck Taylor, Buffalo Bill's big man once said to me, speaking of the grizzly, "you had better vamoose as quick or quicker than circumstances will let you." Cougars are chained lightning you just bet—game as a bull dog, and will fight to a finish every time, especially when wounded. A full-grown cougar is a tough customer for anyone to tackle. In a hand to hand fight, armed with the best of bowie knives, it is only the most agile, powerful and courageous of men that can hope to come out on top. But to our story:

We were sitting at breakfast one Sunday morning discussing the mysterious disappearance of some of our sheep and calves that had vanished the preceding week; a narrow road ran between our house and a pasture field right opposite, in which I had some fine yearlings and cows pasturing. One jet black yearling heifer, in particular, was a great pet, the daughter of our favorite cow, Rosy. My wife looked forward to having her for another standard butter producer with which to supply groceries, etc., for our future use. Money was scarce those days and cows were a valuable acquisition. Suddenly we heard a frightened bellowing as if some animal was in great danger and pain. My wife exclaimed, "Something's at Blackie" (the heifer already mentioned). We sprang to our feet and rushed to the door. A tremendous cougar, maddened by hunger, had seized the poor animal by making one tremendous spring; his teeth were fastened at her throat, his powerful claws holding her helpless in his steel-like grip. I always kept a large, heavy, old-fashioned duck gun—one barrel loaded with fine shot for grouse, etc., the other with buckshot for larger game. I shouted to Mary to bring the gun. Going as close to the animals as I dared, I fired, but in the excitement of the moment, I gave the cougar the small shot, but he was so intoxicated by the warm drink of fresh blood that he never let up (fortunately for me).

Mary, cooler than I, was calling me to go nearer and make sure work. The heifer had fallen by this time and I could just see the back part of the cougar. Going quite close I pulled steadily for the small of his back. The effect was electrical; with a mighty yell he tried to spring on me, but I had broken his back with the heavy charge of buckshot, and I prudently backed away to reload my gun and thus finish him. Mighty slow work to reload those old muzzle-loaders at such a time. I verily believe he would have got away, such was his wondrous vitality, had not old Rosy at this instant broken through the slight brush fence and made directly at him. I could not drive the infuriated cow away, but Mary coaxed her away at last with some food. The cougar measured over eight feet from tip to tip, and weighed nearly 180 pounds. A pretty tough customer to tackle with a shotgun. His hide made a beautiful robe. I wish some of your readers could have felt and seen the iron and steel-like muscles, it would have given them some idea of the terrible strength and activity possessed by these animals.

Hunting Prospects in New Jersey.

Advices from New Jersey present flattering prospects for the sportsmen who may visit that state for a fall outing. A correspondent in the New York Times, writing from Jeffer's Landing on Nov. 1st, has the following to say of the game interests:

"The season for shooting deer, quail, rabbit and pheasant began yesterday, and the hunters, with loaded cartridges and well trained dogs, are ready for the sport. The game was never known to be so abundant as it is this season. The old sportsmen say that the woods throughout South Jersey are extraordinarily well filled with animal life. Large coveys of quail feed daily in the farm yards. The deer are more plentiful here in Atlantic county than ever before, and similar reports come from the counties of Burlington, Cumberland and Ocean. Herds of the deer have been seen within a stone's throw of May's Landing. Uncle Davy McClure, the veteran hunter, who owns the famous inn, "Sportsmen's Retreat," at Doughty's Tavern, says the like was never known before. The woods in the vicinity of his place are literally torn up with deer tracks, and the turf at Cold Spring where the deer drink of the sparkling water, is covered with deer tracks for a mile around.

Sportsmen from New York, Delaware and Philadelphia have chosen sites in the famous Weymouth deer woods, and will camp out during the season in tents and log huts already erected, thus giving the local hunters but little show. These foreign invaders place themselves on the deer stands and remain there all night so as to be sure not to be thwarted by the local sportsmen. In many cases the hounds of the home gunners strike a deer trail and chase the deer within a few yards of the camping hunters, who kill it and drag it to cover and defy any one to touch it. Ben's Bridge, Poll Bridge, Peterson Field, Miry Run and Bottle Run, all noted feeding places of the deer, will be overrun with gunners, and the deer stands will all be taken before the season has advanced three days. The deer hounds have been chained up of late so as to keep the deer tame, and, as they have not been chased or molested in any manner, a large number will doubtless be killed. Senator Gardner of Atlantic City is the owner of eighteen full blooded hounds, and he himself, being a crack shot, will no doubt share with other hunters the honor of bagging several deer.

As nearly all the sportsmen will be after deer, it is quite likely few rabits, quail or pheasant will be killed, as deer shooting always has the preference. Later in the season, however, the quail and rabbits will suffer. The quail are just now as fat as butter, and, owing to the swamps being full of water, are compelled to live on the upland meadows, to feed on acorns and pine browse, and to visit the wheat fields. The season throughout promises to afford better sport than in twenty years."

Eight Brave Men From Fresno.

They Kill Many Things in the Arizona Mountains.

"One of the hunters" contributes to the Fresno Evening Expositor, a duly certified account, of the achievements of a large hunting party which went out from Fresno recently, in search of the roaring lion and the ferocious bear. Growing weary with searching for bear, and evidently having wasted their substance in riotous living, they decide to return home; before going and evidently being somewhat doubtful as to the reception awaiting them, they conclude to slay the fatted calf and make sure of the feast at the safe end of the line.

A record of the things which they did and the things which they omitted to do is found in the record above mentioned, which is as follows:

I promised to give you an account of our trip to Arizona, and will now fulfill the promise briefly. We, Captain C. Chisholm, Major J. Ed. Hughes, Jay Scott, George A. Wilson and Frank Tadlock, left Fresno on the Atlantic & Pacific 5 P. M. train on Saturday the 25th ult., loaded down to the guards with guns, ammunition, etc, principally etc. We journeyed along comfortably, seated in a Pullman car. On our arrival at the Needles we were met by our host, F. T. Berry, general passenger and freight agent of the P. & P. company with headquarters at Albuquerque, N M.

Our next stopping place was at Williams, Arizona, the point at which we were to meet the balance of our company, which consisted of A. E. Crosby, O. W. Strong, J. T. Baraclough, merchants of Albuquerque. With this addition to our party it numbered eleven in all, and a more jolly set of fellows was never seen.

On Monday morning we were met by Dr. Thornton and his son, George Thornton, to whom the party consider themselves under everlasting obligations for the many favors received at their hands. Under the direction of our host and Mr. George Thornton we started by carriage for the Thornton ranch, located about 13 miles south of Williams; here we arrived at 3 P. M., took a look around, imbibed a little, etc., and retired at an early hour, determined to rise early and exterminate all the bears, lions, deer and turkeys in the San Francisco mountains. We carried out our determination, and at daylight not a soul was left in camp. This was kept up during our stay—rising at daybreak and returning by dark.

On the first day two of our party got lost—Messrs. Crosby and Strong. True, they said they were not lost but camped with a neighbor seven miles away, but as they failed to produce any documentary evidence, it was believed that the great bear hunters had discovered the trail of brain and had inadvertently wandered in the wrong direction.

George Wilson declared he would have a bear, dead or alive, and started out to make good the assertion. He returned about noon and reported the discovery of a bear and Indian tracks. He said that he was not afraid to meet any animal of the forest, but that he was engaged in the vineyard business in California, had a family, and his respect for the red man forbade an encounter, and if the boys had no objection he would remain in camp and take charge of the cooking. We all consented, and thereafter George never ventured beyond the eleven hundred acre field.

Jay Scott was the next one to show his prowess, and his preference for tame game. The first to suffer was a beautiful red calf, which he and Mr. Haley assisted by Major Hughes, managed to skin by moonlight. It has never been known, or any good reason given why this calf was killed at that late hour, but it was intimated that the owners of the large herds of cattle in the neighborhood were less watchful at night, and no doubt Mr. Scott had been so informed.

Mr. Berry then gave evidence of his marksmanship. He returned to camp at a late hour one evening and produced an elegant tail which he said he had captured from a silver gray fox. When questioned concerning the whereabouts of the fox, he said that after he shot him all that was left was the tail. As there was really no way the party could disprove this statement, we were compelled to accept Mr. Berry's tale. However, we learned later on that a sheep-man had lost a shepherd dog and offered a small reward for his recovery.

Matt. Cullen was the champion in the way of bringing down the finest and largest game. He killed a large six-point buck deer, which dressed 151 pounds. He next made a murderous assault on a mountain lion, which he wounded, but owing to the thickness of the brush and due respect for the animal, could not produce the body, as he did in the case of the deer.

Messrs. Hughes and Chisholm ranked second as hunters. They brought to the ground three fine deer. Mr. Baraclough captured a plump antelope, and was entitled to more success as he was one of our most earnest hunters. Frank Tadlock, dubbed on this occasion "Badlock", showed that he was a sportsman by bringing to the ground the first wild turkey—not a buzzard, as was insisted on by some.

Fearing that I am using entirely too much space, I will conclude by saying that a pleasanter party never started out than this.

ONE OF THE HUNTERS.

A Huntress in Africa.

Sketches of the remarkable fortitude and endurance of a lady are going the rounds of the press, which show that there is nothing a woman may not do, even to achievements which require the strongest nerves and constitution.

The record of the experience of this lady is as follows:

Emil Holub, an Austrian, arose through poverty and obscurity to the dignity of having his collections as an explorer in Africa placed in the Vienna exposition, and there he met and wooed and, at last, won a daughter of the superintendent of the exhibit. In a week after marriage the pair were off for Africa. Mrs. Holub has a fine physique, and was able to bear all the fatigue of the trip. She carried a gun, and faced many dangers due to the climate and the savagery of central Africa.

There was enough for Mrs. Holub to attend to in the explorers' camp. The old fashioned occupation of mending torn and tattered garments fell to her lot, and at last the ancient and essential duty of marketing and cooking supplies devolved upon her. However, the great distinction of being the first woman to penetrate savage Africa was not belittled by meanness of condition and employment, and Dr. Holub's went on the hunt, and even passed through encounters with the warlike tribes along the route. The trip closed with a perilous and trying retreat, lasting eight months with only such food as could be taken on the way, and without the comforts of their camp utensils, which had been stolen by savages. Mrs. Holub came out equal to the best of the party, three of whom had succumbed to the hardships of the life.

A Hunt Around Plumbago Mountain, Wyoming, 1877.

DENVER, COLO.

EDITOR BREEDER AND SPORTSMAN:—Our party consisted of three persons, besides the driver, who also acted as "chief cook and bottle washer," and as we shall have to refer to each member, we will give their real names: Ed Leamy, well known all over the entire world as a thorough sportsman. Ed was formerly from Syracuse, N. Y., and since the above mentioned period, has hunted in every clime the sun shines on; a magnificent shot with shot-gun and rifle, as Major Talbot, the crack shot of Cheyenne, Wyoming, can well testify, as he lowered the Major's colors rapidly, and removed the wind from his sails entirely. Number two was James McDonald, the famous Lancaster clog and pedestal dancer, thoroughly equipped with a 45 Colt army six-shooter and Winchester 44 caliber, old model. The writer, who was foolish enough and would be so again to-day, should occasion require a rifle, to carry an "old reliable" Sharp's 40 caliber 70 grains of powder shot-gun or rather Creedmore stocked.

We left Cheyenne at 6 o'clock on the morning of the 6th of November, 1877, well prepared to be away at least two weeks. Provisions were well supplied, and Jim had a rather large bottle of snake antidote which he alone had the pleasure of having need of, as will be mentioned later on.

On the evening of the 6th we drew into camp at the foot of Pole Mountain, some eighteen or twenty miles up Crow Creek from Cheyenne. We who have camped on the plains yearly since 65, have not of late years resorted to the raising of a tent for one night's camp, therefore none was raised, but a good supper was soon prepared by our driver, an "old timer" in that country, not a "tenderfoot" by any means.

Early in the morning of the 7th found us on our way to our destination, Mill's Plumbago Mine, or rather Plumbago Mountain (the mine consisted of a hole six feet deep in the side of the mountain). During the day two antelops and six blue grouse fell to the hands of Leamy, and three antelope and two grouse to the writer's share. McDonald, although having splendid opportunities and chance after chance, had nothing to show except an empty cartridge belt.

Along about 5 o'clock in the afternoon, McDonald, taking his gun, strayed away from the wagon, and when we located camp and had supper ready, no "Jamie" came to share. Quickly the conviction came to us that he was lost in the foothills of the Black Hills. Quickly mounting a horse each, Leamy and the writer went in search, taking different directions and firing our revolvers as we went, but to no purpose.

Three o'clock found us again in the saddle in search of our reckless "Tenderfoot" who was found by Leany almost frozen and half starved, as a heavy frost for that region had fallen, and he was without matches to start a fire with. His careless conduct will always be remembered by each of us and I am sure by himself, for a great many years to come, As the country was at that time infested with what is commonly called 'Mountain Lion,' and he said they were screeching and snarling within fifty yards of him all night long a liberal use of his Winchester was required to keep them at a safe distance. Coyotes and the larger mountain wolf were also holding a carousal around him, and putting all things together it was a night long to be remembered by each of us, especially "Jammie" from the only Lancaster, England.

After a magnificent hunt of ten days' duration, we returned to Cheyenne, and as the result of two guns as "Jamie's" didn't count, we had twenty-seven antelope, two deer, eighty-six jack rabbits and sixteeen blue grouse, and sage hens by the score, and also one skunk.

One night about 12 o'clock, as the writer was in the very center of the hand of Morpheus, he was rudely awakened by a most powerful dig in the ribs from Leam's elbow, and to hear a hoarse whisper "some one is in the camp." "Injuns, Doc, Injuns," he excitedly whispered, trembling as if scared half out of his wits.

"Injuns, nothing, you have had the nightmare old man," we replied.

"Nightmare the devil, he replied, "don't you hear them in the cook tent?"

Well there was something there sure—as was soon learned by Leamy using his shot gun to advantage and causing such a smell! Well, we had to strike camp for new grounds, and Leamy remarked that he was always considered a strong man, but now he was so strong that he was positively disagreeable to himself and all the rest.

The twelfth day found us again in Cheyenne, and shortly thereafter Leamy left for the Pacific Coast and McDonald for the east, and the writer for Mexico.

Last March I had the pleasure of talking over old times with Leamy, who has been in foreign climes ever since our hunt, and can assure you we would like to live those days over once again, but they are gone never to return, save in memory's flight.

ALOIN.

A Snow-White Swallow.

Ornithologists in Paris are much interested in the discovery of a rare bird in the shape of a snow-white swallow. This novel specimen of the feathered tribe came to life lately in a nest which was built by the parent bird under the eaves of a glass roof covering a court in the extensive manufactory of a tradesman residing in the district of Grenelle. The white bird was hatched with two black specimens, one of which flew away as soon as it was fledged, whereupon the tradesman, in order to keep the other two, transformed the glass-roofed court into a temporary apiary. Photographs have been taken of the snow-white swallow and will be sent to the leading naturalists of the city, one of whom went to Grenelle in order to study the feathered curiosity. This gentleman was, however too late to see the bird alive. It perished probably because too much care was taken of it, or through fright at the number of people who came to stare at it as a natural curiosity. The dead bird will now be stuffed and sent to the museum of the Botanical Gardens, where there is already a white magpie, which still lives and hops about among its companions, from which it only differs in color.

The following from an eastern journal evidences the fact that our game birds are in demand in the east. It says:

"The Massachusetts Fish and Game Prohibition Association have ordered 300 sharptail grouse, 30 dozen of California mountain quail, and 30 dozen of valley quail, which are to be liberated at suitable points."

It is to be hoped that the present generation of sportsmen will grow grey and enjoy many a seasons sport ere another winter will be known in this State so severe as that of 1889—90. Much of the game, in the upper ranges either perished or was led to take up their abode elsewhere.

Game Districts to the North.

The country along the border line of the British possessions has ever been noted as a most excellent game resort. The present fall seems to be equal as a game season to that of any other period in the history of the country. The following report glesned from the Inland Sentinel, gives some interesting notes of the hunting districts of that section:

"Last month Judge Spinks, of Kamloops, Mr. Price Ellison, of Vernon, and Capt. Tatlow and Messrs. Beasley and Toppin of Vancouver, and McKay, of Capilano, started out on a hunting expedition to Vernon. The party traveled 80 miles to the head of the Kettle river, where one cariboo was killed. A return was then made to Vernon, when the party proceeded to Similkameen, but here no heavy game was secured. While Judge Spinks held court at Rock Creek, the rest of the party camped at Dog Lake. Here Messrs. Beasley and Tatlow got one mountain sheep after considerable skirmishing. A party from Calgary who had been hunting in the vicinity of this lake for months, reported seeing sheep every day, but they only shot one, the whole party being troubled with 'buck fever.'

At Ashnola two days were spent in shooting. At this place Capt. Tatlow came upon a herd of fifty sheep, and succeeded in reducing their number by one.

The party then proceeded via Granite Creek and Nicola to Kamloops, Judge Spinks holding mining courts, county court and courts of revision at Granite Creek and Nicola.

Judge Spinks reports that in the Kettle River country, just visited, there are splendid ranges for horses and sheep not yet taken up. The ranges through Osoyoos are as bad as grasshoppers can make them, but from Pike's mountain to Kamloops the ranges are in splendid condition.

The miners engaged at Rock Creek are hopeful, and are doing all the work they can afford. At Okanagan camp, near Penticton, there are brighter prospects, and it is expected the camp will develop into something very good. At Granite Creek very little is being done, but at Boulder Creek Mr. Hunter reports work brisk, with good results.

The party arrived in town on Monday, the Vancouver contingent leaving for home the following day."

The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, 7s, 6d; postage, 6d extra. Published by Charles Lancaster, 151 New Bond Street London, W

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Fixtures.

BENCH SHOWS.

Northern Illinois Poultry and Pet Stock Association's fifth annual bench show, Rockford, Ill., December 10, 11, 12, 13, 14, 15 and 16. John Teague Secretary Kennel Department.

The Central Indiana Poultry Association's fifth annual bench show, Richmond, Ind., December 10 to 17. J. O. Myers, Secretary.

1891.

The Buckeye Poultry and Pet Stock Association's bench show. Canton, O., December 30 and 31, and January 1, 2 and 3. James Sterling, Secretary.

Michigan State Poultry and Pet Stock Association's twelfth annual bench show, Jackson, Mich., January 7, 8, 9, 10, 11, 12, 13 and 14. S. H. Silfer, Secretary.

Central City Kennel Club's inaugural bench show, Jackson, Mich., January 10, 11, 12, 13, and 14. Dr. E. L. Kimball, Secretary.

South Carolina Poultry and Pet Stock Association's International Exhibition, Charleston S. C., January 13, 14, 15, 16 and 17. Benj. McInnes, Jr., Secretary.

Louisiana Poultry and Pet Stock Association's first annual bench show, New Orleans, La., January 20, 21, 22, 23, 24 and 25. A. E. Shaw' Secretary.

Elmira Poultry and Pet Stock Association's bench show, Elmira, N. Y., January 21, 22, 23, 24, 25 and 26. Carl Hart, Secretary.

South Carolina Kennel Association's inaugural bench show, Greenville, S. C., January 27, 28, 29 and 30. F. F. Capers, Secretary.

Westminster Kennel Club's fifteenth annual bench show, New York, February 24, 25, 26 and 27. James Mortimer, Superintendent.

Maryland Kennel Club's second annual bench show, Baltimore Md., March 3, 4, 5, and 6. W. Stewart. Diffenderffer, Secretary.

Duquesne Kennel Club's inaugural bench show, Pittsburgh, Pa., March 10, 11, 12 and 13. ——, Secretary.

Massachusetts Kennel Club, Lynn, Mass., second annual bench show, March 24, 25, 26 and 27. D. A. Williams, Secretary.

New England Kennel Club's seventh annual bench show, Boston, Mass., March 31, April 1, 2 and 3. E. H. Moore, Secretary.

California Kennel Club's bench show, San Francisco, Cal., April ——, 1892. J. B. Martin, Secretary.

Cleveland Kennel Club's fourth annual bench show, Cleveland, O., April 1, 2, 3 and 4. C. M. Munhall. Secretary.

Mascoutah Kennel Club's third annual bench show, Chicago, Ill., April 8, 9, 10 and 11. G. H. Goodrich, Manager.

FIELD TRIALS.

The National Beagle Club's first field trials, Hyannis, Mass., November 4, 5, 6, 7 and 8. F. W. Chapman, Secretary.

The Robins Island Club's ninth annual field trials, Robins Island, November 7. Walter L. Wellington, Secretary.

Eastern Field Trials Club's twelfth annual field trials, Otterburn Springs, Amelia County, Va., November 17. W. A. Coster, Secretary.

Central Field Trial Club's second annual field trials, Lexington, N. C., December 1. C. H. Odell, Secretary.

Philadelphia Kennel Club's seventh annual trials, December 15, Deatonsville, Va.

1891.

Southern Sportsmen's Association's annual field trial, Lafayette, La., January 13. John K. Renaud, Secretary.

Pacific Kennel Club's eighth annual field trials, January 19, Bakersfield, Cal. H. H Briggs, Secretary.

Southern Field Trial Club's third annual field trials, New Albany, Miss., February 2. T. M. Brumby, Secretary.

COURSING

The Inter-State Coursing Association meeting, Merced, Cal., commencing November 18. J. R. Dickson Secretary.

CLUB MEETINGS.

The American Pet Dog Club's annual meeting at 3:30 P. M., November 12, at No. 129 East 16th street, New York.

The field trial at San Antonio, Texas, which is being prepared for the coming winter, will doubtless prove a most interesting event. There are a number of good dogs scattered about over the State, notably at Dallas, Fort Worth and Galveston, as well as San Antonio and vicinity. Quail are plentiful in that region, and will afford excellent facilities for testing the merits of the dogs.

Bench Shows in 1891.

New York, November 3, 1890.

Editor Breeder and Sportsman:—In accordance with the Rule XXVIII, the following clubs have duly filed their claims at this office for their bench shows in 1891:

South Carolina P. and P. Stock Association, at Charleston, January 13th to 17th.

Louisiana P. and P. Stock Association, at New Orleans, January 20th to 25th.

Westminster Kennel Club, at New York, February 24th to 27th.

Maryland Kennel Club, at Baltimore, March 3d to 6th.

Duquesne Kennel Club, at Pittsburgh, March 10th to 13th.

Cleveland Kennel Club, at Cleveland, April 1st to 4th.

Mascoutah Kennel Club, at Chicago, April 8th to 11th.

Youngstown Kennel Club, at Youngstown, September 1st to 4th.

I beg to advise you that by direction of President Belmont Jr., all claims for show dates filed with the A. K. C., will hereafter be sent by me to the sporting papers for publication in the same, for the purpose of preventing a conflict of dates. Yours truly, A. P. Vredenburgh,

Secretary A. K. C.

Answers to Correspondents.

Admirer, 1106 Clay street, city.

(1) Kindly give me the address of the owner of the cup prize winning dogs at the recent coursing meet at Great Bend, Kansas. (2) Also the address of the Emporia Kennels.

Answer.—(1) Mr. D. C. Luse, Great Bend, Kansas. (2) Emporia, Kansas.

A. L. D., city.

(1) Will you please to give any information you may possess regarding the rough-coated St. Bernard dog Jumbo, owned by Arizona Joe? The dog appeared with him on the stage at the Orpheum last week. Is the dog registered? If so, what is his breeding?

Answer.—Jumbo (A. K. R. 5663), fawn dog, whelped May 2, 1882. Sire—A. Watts' Hector by Hero (Barry—Right), out of Alp by Chang, out of Martyr. Dam—W. E. Sessons' Bess by Marco, out of Alice, both imported by one of Mr. Lorillard's agents.

The Great Coursing Meet at Merced.

The coursing meet at Merced next week has attracted the attention of the whole country to that event. It is conceded to be one of the best arranged and projected affairs yet appearing in this field. That there will be a large gathering at that time at Merced goes without questioning. Already several of the most famous greyhounds that ever chased a rabbit are on the grounds, being daily hardened and prepared for the splendid running which will take place at that time.

Everything is now in readiness, and the preparations seem to be about as complete as it is possible for them to be. There will be doubtless no failure in carrying out one of the most enjoyable events yet known to the public at large in this splendid line of sport.

To see a trained dog stretch away with more speed than the race horse, straining every muscle to overtake the rabbit which, as a rule, on a fair field, with fifty or more yards start, stands about an even chance of getting away, is a sight unequalled in all the tests of fleetness yet devised for the amusement of the fun loving public.

Fox chasing pales into insignificance beside it, and the hounds after deer are as slow coaches to an express train in comparison.

Do not fail to go to Merced if you would witness one of the finest coursing events yet given to the public anywhere on the continent. Remember, the train will leave here on the afternoon of the 17th, and the sport opens on the 18th instant.

The Dog Was Astonished.

A singular electric-wire accident was seen the other day in Boston. The attention of passers-by was attracted by the barking of a Red Irish Setter at an English sparrow, which was perched upon an electric light wire high above the beast's head. The animal had evidently been amusing himself in the fruitless sport of chasing the bird, and when it had taken refuge on high had endeavored to get some consolation out of yelping lustily. The day was windy and the wire swayed to and fro, the sparrow apparently enjoying its swing until in a fatal moment. the tail of the bird came in contact with another wire near by. Then, in the twinkling of an eye, the unlucky sparrow came tumbling down stone dead at the feet of the noisy dog, who was so astonished at this sudden turn of affairs that he didn't offer to pick the creature up, but simply stopped barking and stood staring at his prey in astonishment.

Mr. R. E. Bridge, of San Luis Obispo, made us a pleasant call last Friday.

The Duchess of Wellington had five entries in the deer hound class at Brighton.

Lady Dunlo was among the many visitors of rank at the recent Brighton bench show.

Be kind to your dogs. If there is one species of meanness more contemptible than another, it is being mean to a faithful animal.

Are you going to Merced next week? The train leaves here on the afternoon of the 17th, the meet opens on Tuesday, the 18th. Be on hand.

The question of the proper treatment of dogs of heavy weight, such as the St. Bernard, is one of great interest. It is avered that by proper feeding, and judicious exercise and care, that form, strength of bone and development of muscle, may in a large measure be controlled.

A friendly contest is being arranged between the Beagle breeders of America and England. The question of standard has arisen in this matter and each side are inquiring "What is the best?" And although the Beagle is one of the oldest and best known breed of hounds, yet is the controversy waging and the "best" will have to follow some judge's dictum.

Mr. D. C. Luse has just cause for self congratulation over the fact that his kennel of greyhounds won both prize cups at the Great Bend Coursing Meet. They were at home, thoroughly acclimated and had not to contend with the results of a long train ride. They might have won any way, for they are royal dogs.

Mr. R. D. Williams, of Lexington, Kentucky, and owner with Dr. Van Hummell, of the Rookwood—Landseer Greyhound Kennels at that place, arrived in the city on Tuesday last, and may be found at the Palace. Mr. Williams is the American authority on the greyhound, and is author of the chapter treating of this animal. in the new standard work just being issued on The American Dog by the well known writer, G. O. Shields. He will attend the coursing meet at Merced.

In speaking of the dog and horse, as well as of all the domestic family of animals, we should like to see the word "brute" tabooed, because, by common usage, it conveys a meaning totally at variance with the nature of these intelligent and companionable animals. The word should be reserved, principally, to describe the vicious and depraved feeling which is far more frequently exhibited in man than in any other product of nature. It certainly has no just reference to any animal that is not vicious.

Some of our local sportsmen think that the native dogs stand a good show for winning first at Merced. It seems to be the history of coursing events that a dog must become acclimated before he can run well, but by many this is held to apply only to dogs taken from a lower to a higher altitude. The reverse seems to be in favor of the animals reared in a high altitude, as the lightness of the air serves to increase their lung power, hence their greater speed and endurance.

We are in receipt of a handsomely printed and bound roster of some of the most famous English setters and pointers to be found in the land. It is almost superfluous to say that it bears the imprint and is wholly composed of the mention of dogs in the Elms Kennels at Forest Lake, Minnesota, kept by that well known breeder of English setters, Paul H. Gotzian. A splendid cut of that famous English setter leader, Monk of Furness, adorns its front cover. This is beyond question one of the finest and most perfect dogs living. He heads a long list of dogs to be found within these kennels, all marked for their excellent breeding.

Dr. Q Van Hummel arrived in the city last week With him also came Mr. J. Herbert Watson, bringing with them eight of as fine greyhounds as the country can produce, which will be run at the great coursing meet at Merced, commencing on the 18th instant. Dr. Van Hummel brings Babszoun, Verdure Clad, Norwegian and Nettlefield. Mr. Watson brings Drytime, Witch-hazel and another. It is expected that the sport at Merced will be of a high order, and no lover of genuine coursing can afford to miss this event. It will more than repay any and all who may attend. We trust that there will be a large gathering. The programme prepared is deserving of the attention of every lover of the sport.

The approaching field trials which will be conducted at Bakersfield in January next is more than of usual interest in the circle of the dog fanciers of the coast. Unquestionably one of the most refined and pleasurable class of exhibitions are the field trials. They call out all that is best and most intelligent in that class of dogs where intelligence is, perhaps, more marked than in almost any other breeds. The class entries indicate that there will be better and more varied exhibitions than have heretofore been presented in similar trials.

The puppy class number twenty-six and the derby class is large and composed of some fine dogs. The all-age stake class will also be found to contain some splendid dogs. It would appear, owing, perhaps, to the splendid opportunities here presented for field work, that the pointer and setter class of dogs will always hold an uppermost place in our field sports.

This class of dogs are, as a rule, owned and controlled by true gentlemen who love to witness the manifestations of intelligence in their dogs full as much as bagging the game when in the field. This is as it should be, and is the only method of stimulating and encoursging field sports among gentlemen.

Sacramento and Bakersfield have a number of such, which with the large contingent to be found within this city, are doing much to elevate true sportmanship on the Coast. The field trials will unquestionably prove a success.

The Forest and Stream of Nov. 6th, presents a fine illustration of the rough coated St. Bernard, Lothario, recently imported by Mr. E. B. Sears. This dog is spoken of as being one of the finest importations recently made. Lathario is by Champion Valentine out of Saffron; she by Champion Plinlimmon out of Belladonna, Champion Valentine by Champion Bayard out of Vesta.

One of the striking features shown by the illustration is a splendid head with very small ears. He is a rich orange color, with white nose band and blaze, white chest, forelegs, hind feet and tip of tail, with dense black shadings; stands 31½in. high and weighed when last shown 178 lbs; his skull measures 27in., muzzle 17in., chest 40in, loin 33in., length of body 36in., tip to tip 84in. His winnings in England are second prize, Liverpool, 1889 (Sir Bedivere first); second prize, Manchester, 1889; third prize, Crystal Palace,

1889 (beaten only by Alton and Lord Bute, and winning over Mayor of Leeds, Plinius, Othello, Richard II. and Scout, together with over fifty others); third, open class, and second, novice class, Manchester, 1890, in a class of fifty-five St. Bernards. The English Stock Keeper of Feb. 1, 1889, says of him: "Lothario is also a grand one, great bone, immense size, good body, style and coat; he is a good specimen, as he should be to beat Lord Warwick; always a favorite of ours, his breeding and qualtty should make him valuable for breeders."

ROD.

The Paternity of Fishes.

A lengthy and exhaustive article in the Cornhill Magazine on the subject of "Fish as Fathers" will be of peculiar interests to the male pessimists, inasmuch as in the habits of two of the piscine species he will find encouragement in his gloomy foreboding that the female is fast becoming the dominant sex. There can be no more perfect model of domestic subordination than in the case of the male of the great pipefish of the North Atlantic and British seas. This lophobranch is complacent enough to carry the eggs ejected by his genial spouse in a sub-caudal pouch in which they are hatched. Moreover, the young remain in close proximity to the parent fish, and when danger menaces they take refuge in the same cutaneous receptacle in which they originally had their being. This same solicitous care of its young is common with all the males of the pipefish species As the author of the article remarks, concerning the indifference of the females, "His natural spouse, well satisfied with her own part in having brought the helpless eggs into this world of sorrow, goes off on her own account in the giddy whirl of society, forgetful of the sacred claims of her wriggling offspring upon a mother's heart." It is a well known fact that those fish which produce a great number of eggs, like the cod, for example, are satisfied with depositing and leaving them to their fate; while those that produce only a few ova give them the most earnest protection. An example of this is found in a catfish known as the genius Arius, of Ceylon. The paternal servitude of this species is even more depressing than that of the pipefish. The females lay only a very few ova, but each is about the size of a sparrow's egg. These the males carry about until hatched, loose in their mouths, or rather in an enlargement of their pharynx, somewhat resembling the pelican's pouch. That a motherly instinct in fish is by no means infrequent we have an example in one of the Guiana catfish, which much resemble the Surinam toad in her method of hatching. While the latter carries her eggs in little pits on her back, where the young are hatched and where they remain in a bath of slimey fluid all through the tadpole stage until they emerge into four legged maturity, the former carries her ova on her belly. When the period of incubation is near at hand the lower part of this catfish's body becomes soft and honeycombed with pits. When she deposits her eggs in the river bottom she lies upon them and presses them into the spongy skin where they remain until hatched and the young are able to care for themselves. One of the most remarkable fish spoken of by the writer in the Cornhill Magazine is the hag or borer, which is probably the most sociable of all the species. It is an eel-like, slimey creature, which enters the body of usually cod or mackerel when it proceeds to literally "clean out" its host, until nothing remains but the bones, skin and head.

The ova of the hag are equipped with strands of long, thread-like filaments. At the end of each is a hook, unlike those seen on burrs and other adhesive plants. The egg in floating fastens to a living fish with its hooks, where it remains until hatched, when the young borer makes its way into the body of its victim until it completes its growth. The greatest economist of space of all the piscine species is the silver fish found on the Californian and Mexican coasts. The full-grown female is not above ten inches, while the young are three inches in length at the time of their birth. The fry are packed in the body of the parent as closely as herring in a barrel. Polygamy is rare among fishes; the sole example cited is that of the stickleback; but he is a mild tyrant, for not only does he build the receptacle for his harem, but he guards the eggs until hatched, and provides for the fry until they are able to care for themselves. The highest mechanism in the protection of the eggs of fish finds expression in the ray and shark family. The Port Jackson shark of Australia lays an egg with a sort of leather spiral stairway wound about its exterior. When a hungry fish attempts to seize it it eludes its teeth and dodges screw fashion in the water beyond. There is no getting at this evasive body anywhere; when the feeder thinks he has it, it wriggles away sideways and refuses to give any hold for jaws or palate. The Antarctic chimera relies rather upon pure deception than upon mechanical means for the protection of its eggs. "The shell or case in this instance is prolonged at the edge into a kind of broad wing on either side, so that it exactly resembles one of the large flat leaves of the Antarctic fucus, among which it lurks." This egg is the penultimate effort of protective resemblance. The most mysterious of fish is the eel. Except through microscopic researches, the difference between the male and female is undiscoverable. Never has a single specimen been detected in the act of spawning, nor have any evidences of one containing mature eggs been found.

Are German Carp a Food Fish?

Some time ago the Superintendent of the Census addressed to me some inquiries concerning the German carp, which I received when our Government made its distribution of those fish. I replied in good faith to the best of my poor abillty, but no aoknowledgment has been made of my answer, whereof I conclude that they have been thrown out by the official at whose request they were made. I am confident that they contain information which should not be lost, and therefore inclose them with the blank which called them forth, hoping they may see the light in the columns of your valuable paper, to whose readers I trust I am not altogether a stranger:

In 1878 I placed four carp in a pond one eighth of an acre in extent, which I had prepared especially for their reception at an expense which I cannot now estimate. They grew so rapidly that in five years the pond was too small for them. They were unable to turn around in it; their backs were out of the water and they could get no food but such as I fed them. This consisted principally of cabbage, fed them in summer in its natural state, in colder weather in the form of sauerkraut. This food was suggested by the Teutonic origin of the fish, and they throve finely upon it. The parts in the ice and those exposed above it were frozen perfectly solid, but the fish did not appear to have suffered at all from this, for when they thawed out in the spring they were as lively as ever.

Having attained such a size that it was impossible to keep them longer in the pond, and knowing that the species subsist almost entirely on vegetable food, I turned them out in a pasture with my cows as soon as the grass was started well. It is an interesting fact regarding their readiness to adapt their habits to their situation, that they easily learned, by observing their companions, to keep the flies off by a dexterous switching of the tail. They throve almost as well as when in the pond, but becoming unruly and frequently breaking bounds into meadows, grain fields and neighbors' lands, I was obliged to kill them. The greater portion of the carcasses was sold at a fair price in the nearest market, while I kept a little for my own use.

As "an article of food," I consider the carp quite valuable. For a little goes a great way, indeed quite around a long table, as one mouthful suffices each person, unless he be to the manner of German carp-eating born. I do not consider the experiment as having been profitable on the whole. The Government need not be at the trouble of sending me more carp. Cor.—Forest and Stream.

Many a fine days fishing has been spoiled by a careless selection of tackle. None is good, save the best, and the best is none too good.

The Orville Register says: A gigantic salmon was caught this week in Feather River by Charley Slater at the Golden Feather mine. The fish was five feet long, fourteen inches across and weighed sixty pounds. R. W. Smith made the measurements and the weight is vouched for by O. P. Bowers, both of whom are well known and reliable gentlemen and noted fishermen.

Indian river, Michigan, has among its fish one that no one seems to have found in any other water—a small-mouthed rock bass. The rock bass of the New York lakes is especially remarkable for its enormous mouth and glaring red eyes. The Indian river rock bass has the red eyes and every other marking of the lake rock bass, but its mouth is less than half the size. It is very gamy, and takes the trout fly so readily that it is as great an annoyance to the trout fisherman on Indian River as its big-mouthed relative is to anglers for black bass on Lake Keuka and Seneca Lake.

Some of the experiences of whaling are not pleasant to remember, says a writer in the Philadelphia Times. One especially is impressed upon my memory: I was bow oarsman in a boat fastened to a big sperm whale. The line was going out so fast that the harpooner was pouring water on it, and he turned to me and handed me the cup, saying, "Give me some water." I dipped it overboard and turned to give it to him. To my horror, he was gone; not a man saw him go over, and not a sound did he make. The rope in some way took a turn about his leg, and he was jerked over so quickly that he no doubt never knew what hurt him.

Mr. H. W. Walker is putting up at Baden, about fifteen miles from the city, one of the finest private fishing plants to be found in the whole country. Mr. Walker is blessed with an abundant supply of water, artesian wells furnishing by a constant flow all that he can desire for all purposes, including that of furnishing three good sized lakes, which are being so constructed that the water will pass through all of them, thus insuring a good, healthy condition to the fish. The grounds are to be rendered attractive and beautiful, and from the plans submitted to us for the work, it would appear that no more tasty and beautiful grounds can be found than those of Mr. Walker's when the work is completed.

First Annual Record Meeting

San Joaquin Valley

Agricultural Ass'n

(DISTRICT No. 2, Cal.)

STOCKTON,

November 18 and 19, 1890.

Entries close NOVEMBER 16th for 1, 2, 3 and 4 year olds, and aged horses.

TROTTING.

To Trot in divisions. Contestants in groups of three, or not more than four in each class, to beat 2:30. OPEN TO THE WORLD.

ENTRANCE $10 each in all classes; Payable with Nomination.

PREMIUMS.

First, the Association's Gold Medal.
Second, the Association's Silver Medal.
Third, the Association's Bronze Medal.

Class 1, Yearlings. Class 2, Two-year Olds.
Class 3, Three-year olds.
Class 4, Four-year olds. Class 5, Aged Horses.

All races to rules of the National Association of Trotting Horse Breeders, and the National Trotting Association.

Fastest time in each division beating 2:30 wins first premium, the remaining horses continue to compete for record of 2:30 or better.

Established 1826. Please quote this advertisement.

Washington Park Club, CHICAGO,
Coney Island Jockey Club, Sheepshead Bay, L. I.

1891.

The Friendly Stakes,

To Close DECEMBER 1st., 1890.

A Sweepstakes for two year olds, (Foals of 1889,) to be run at the Summer Meeting of the Washington Park Club, Chicago, and at the Autumn Meeting of the Coney Island Jockey Club at Sheepshead Bay, L. I.; of $50 each, $25 f; $3,000 to be added by each Association. Should the same horse win both races, $1,000 additional in plate or money will be given, half by each Association. Horses entered at either place incur liability for one forfeit only, and are entitled to start at either or both places; those starting for the Friendly Stakes at Washington Park are entitled to start for the Friendly Stakes at the Coney Island Jockey Club without incurring liability for starting at the latter place.

Conditions of the Friendly Stakes to be Run at the Summer Meeting of the Washington Park Club, 1891.

Colts to carry 118 lbs; fillies and geldings, 115 lbs. A winner of any two-year-old stake at Washington Park of the value of $2,500 to carry 5 lbs. additional. Maidens never having run second for a race of the value of $1,000 allowed 7 lbs. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750; and the third $250 of the added money. Five furlongs.

Conditions of the Friendly Stakes to be Run at the Autumn Meeting of the Coney Island Jockey Club, 1891

Colts to carry 118 lbs; fillies and geldings, 115 lbs. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750; and the third $250 of the added money. Winners of a race of the value of $10,000, or of two races of the value of $5,000 each, to carry 10 lbs. extra; of one race of the value of $5,000, or two of the value of $3,000 each, 5 lbs. extra. Non-winners of $1,000 allowed 8 lbs. Three-quarters of a mile.

Note.---The Sweepstakes will be paid over on October 1st, 1891. The added money by each Association immediately after each race.

The value of each of the above races to the winner will probably be about $6,000, *and the only liability is* $25 *for non-starters.*

Nominations to be addressed to

THE CLERK OF THE COURSE, Coney Island Jockey Club, Fifth Ave., cor. 22d St., New York.

Or to J. E. BREWSTER, Secretary, The Washington Park Club, 32 Palmer House, Chicago.

Kentucky's Great Stallion
REPRESENTATIVE STAKE.

-:- ENTRIES CLOSE DECEMBER 1st, 1890. -:-

$10,000

Guaranteed by the Kentucky Trotting Horse Breeders Association.

FOR FOALS OF 1890, colts, fillies and geldings (the get of stallions that may be nominated in this stake), to trot as three-year-olds at FALL MEETING, 1893; mile heats, 3 in 5, in harness. On or before December 1, 1890, the stallions whose get may become eligible to start in 1894 must be nominated, and any stallion, even if dead, that has colts foaled in 1890, is eligible. Ten days prior to race the colts to represent the stallions shall be named, and there may be as many starters by one sire as there are different owners, but no person can be interested in more than one starter. The Association guarantees this stake worth not less than $10,000, except for a walk over, in which case the winner will receive the whole of the amount paid in. The guaranteed amount ($10,000), will be divided: $8,000 to first colt, $1,250 to second, $750 to third. If the stake exceeds $10,000, the whole or excess will go to NOMINATOR of stallion whose colt wins the race. Entrance as follows: $100 to name the stallion December 1, 1890; $50 to name the colt ten days ahead of race in 1893, and $100 the night before the race. Send entries to

N. B. The great $25,000 stake for foals of 1891 will be announced later.

The GREATEST SALE of THOROUGHBREDS EVER HELD in AMERICA

Taking Quality, Numbers, Breeding and Performances.

BRUCE & KIDD'S GREAT COMBINATION SALE

—TO TAKE PLACE ON—

SATURDAY, TUESDAY & WEDNESDAY, December 6, 9 & 10, 1890

At TREACY & WILSON'S STABLE, LEXINGTON, KY.

ON SATURDAY, DECEMBER 6, they will offer the entire stud of Mr. Amos G. McCampbell, comprising forty-one head of weanlings, yearlings, horses in training, stallions and broodmares. Among those in training will be found the great filly Flyaway, Edith L., Eugenia, Rollin Hawley and Grayson, all winners. The stallions are Tom Martin, by Longfellow, dam Athlaric by Gilroy, out of Brenna, granddam of The Bard, etc. He was a capital race horse, and from his breeding and performances should make a good sire. Jim Gore, by Rindoo, dam Katie by imp. Phaeton, won the Harold and Carriage Builders' Stakes at two years old, the Clark and Boulevard Stakes and St. Louis Derby. He is unexceptionally bred. Nick Finzer (own brother to Ripple), by Lishon, dam Maggie Hunter by imp. Australian. He won the Sanford Stakes, one mile, at two years old, in 1:45¼. Longside, by Longfellow, dam imp. Lady Stockwell by Knowsley (son of Stockwell), won the Fairview Handicap at two years old. Among the twenty-six broodmares are some imported ones and the rest native. Mr. McCampbell spared no expense in buying his broodmares, which are one and all rarely bred and generally in foal.

ON TUESDAY AND WEDNESDAY, DECEMBER 9 AND 10, they will offer some hundred and seventy-five head, consisting of weanlings, yearlings, two, three, four and five-year-olds, stallions and broodmares. Tuesday's sale will consist mainly of yearlings, some seventy odd in number, opening up with the entire lot of Nantura yearlings, including brothers to the renowned Freeland, Sally Burns and Response, sisters to Irish King and Louisa Forrest, and half sisters to Persan, Test and Hailfellow. Among the other yearlings will be found own brothers to Pride of the Great, Village King, Harrison Ofalece, and Kosciusko Key; sisters to Ollie Benjamin, Mose K. Lee S., Ed Leonard and Lemoine H.; half brothers to Pauline, Ed Hopper, Round Dance, Square Dance, Emigrant, Lura and War Whoop; half sisters to Amos A., Masterpiece, Pessara, Blackstone, Borderer, Nell Booker, Watch Me and Frontenac. Among the stallions are Wanderer, Bob Miles, Little Ruffin, Lord Clifden, Gleefortune and Minstrel. The broodmares are of high class, seventeen of them dams of winners, and a number of young mares of fashionable breeding and untried in the stud. Space will not permit a description of the various horses and mares, but full details will be found in the catalogue. Sufficient to say that this is the greatest and best offering of thoroughbreds ever placed before the public at auction.

For catalogues address this office or

BRUCE & KIDD, Lexington, Ky.

FOR SALE.

A Bay Gelding,

16¾ hands high; six years old; sired by SULTAN, dam by THE MOOR. Perfectly sound and gentle, and good roadster; would make an elegant barouche horse. Price only $200; not one-third value. Satisfactory reasons given for selling. Address M.,

P. O. Box 395,
Oakland, Cal.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Address,

THE BREEDER & SPORTSMAN,
313 Bush St., San Francisco, Cal.

Catalogues Compiled.

Pedigrees Traced & Tabulated

The undersigned, having had an experience of over five years in work of this kind, is well posted in regard to trotting pedigrees and performances, and will give special attention to compiling catalogues, circulars, advertising cards, tabulating and tracing pedigrees etc. My facilities are unexcelled for doing this sort of work, and parties can arrange with me to do both compiling and printing at reasonable rates. Samples, estimates and references will be furnished parties contemplating having work done. Satisfaction guaranteed.

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,
Santa Clara P. O., Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Gleucoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

KILLIP & CO., Auctioneers,

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. In any ordinary weather the roads are very good, and they are fairly good after the unusually heavy rainfall of the past winter.

All stock sent from San Francisco may be brought over by Garcia's Express, No. 3 Market street, San Francisco. They also have an order box outside of Hawley Bros.' Hardware house on the corner of Market and Beale streets. The express leaves San Francisco on the Creek route boat, which starts at 1:30, but all orders should be in the order box at Market and Beale streets by 10 o'clock, or at the office, No. 3 Market street, by 11 o'clock at the latest. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple or hours in the car

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

THE FIRST

SOUTHER FARM

SALE

WILL BE HELD ON

Thursday, Nov. 20, '90.

At 12 Noon, Sharp.

THIS FARM has been breeding and collecting TROTTING STOCK for over three years, and in that time has never offered anything for sale. It is now greatly overstocked; and the very complete barns, boxstalls and shelters are too crowded to allow for the rapid increase in the business of educating and boarding horses, joined to the demands of the space required for wintering TROTTING and RUNNING HORSES. Consequently, all the young stock, excepting the weanlings and three fillies reserved for broodmares (and two or three that are out of order) will be sold at

PUBLIC AUCTION

On the above date. On the same day will be sold the entire

Souther Farm Collection of Brood Mares,

Among which will be found many well bred and worthy individuals. All will be sold without limit, reserve or by bidding of any sort whatever. This is an unusual opportunity to purchase first-class young stallions and gilt-edged broodmares from producing lines at what they will bring at fair and square auction.

Among the young Stallions that will be offered are:

GRAN MORO, blk c, foaled 1888, by LE GRANDE (sire of Grandee (three years) 2:23½), dam SUNNY SLOPE BELLE (dam of Don Carlos (three years) 2:32), by THE MOOR (sire of dams of Bell Boy (three years) 2:19¼, Hinda Rose (thr e years) 2:19½ etc.; also grandsire of Stamboul, 2:11½). GRAN MORO is sound and fast, and will earn money for somebody.

JIM LINFOOT, blk c, foaled 1888, by FIGARO (son of Whipple's Hambletonian and Emblem (sister to Vollaire, 2:20¼), by Tattler, 2:26); first dam FANNY LINFOOT by ERWIN DAVIS, sire Ed, 2:26, and Carrie F., 2:27¾, and the dam of Florence R., 2:26½. JIM LINFOOT will make a race horse, and is a very handsome young stallion.

There are a number of others, Two-Year-Olds and Yearlings. They will be shown at the Sale.

The following are among the Brood Mares:

VERONICA, b m, foaled 1884, by ALCONA 730 (sire of Flora Belle, 2:25, and grandsire of Silas Skinner, 2:19); first dam FONTANA (dam of Silas Skinner, 2:19, Flora Belle, 2:25); second dam FANNY WILLIAMS (dam of Bay Chieftain, 2:28¼), by ALEXANDER'S ABDALLAH 15.
Sister to FLORA BELLE, 2:25.

ROSALINE, b m, by MAJOR MONO.
ROSALINE is also a good road mare.
Dam of ALPHEUS, 2:27.

EFFIE DEANS, br m, by WHIPPLE'S HAMBLETO[N] ... ams of Dawn, 2:18¾, Elector, 2:21¼, and seven others v[ery] ... r than 2:28).
Dam of GERSTER (pacing) 2:33.

PUSS, ch m, by SKENANDOAH 926 (Kentucky Hunter).
Dam of HAVERLY (pacing) 2:25.
MODJESKA (pacing) 2:31½.
BELLE DAVIS (three years) 2:40.

ROSEBUD, br m, foaled 1884, by GIBRALTAR, 2:22½ (sire of Homestake, 2:14¼); first dam JOHNSON MARE by A. W. RICHMOND, sire of Arrow (pacer) 2:13¼, Richmond Jr., 2:22¼, etc; second dam by CRICHTON (thoroughbred son of Imp. Glencoe and mare by Wagner) sire of dam of ARROW (pacer), 2:13¼, etc.
ROSEBUD showed a mile in her work at Napa in 2:40. She is a fine road mare.

E F Smith Esq. Sacramento

And many ot[hers] ... First-class Breeding and Good Individuality.

There will also be [a few] some Good Roadsters and General Purpose Stock.

Sale Day Thursday, November 20, 1890, beginning positively at Noon.

It is a pleasant drive to the Souther Farm from Oakland, or from San Francisco by the Creek ferry; take county road from Oakland to San Leandro, and turn off at signboard, three-quarters of a mile this side of San Leandro.

On the day of the sale lunch will be served to all at the Farm.

SPECIAL TRAIN ON DAY OF SALE, leaving Foot of Market Street, at 9:30 A. M., and First and Broadway, Oakland, at 10 A. M.

Tickets for the Round Trip on Special Train 50 cents. To be obtained of KILLIP & CO., 22 Montgomery Street, San Francisco, who will furnish Catalogues and all desired information.

To drive to the Farm, take Creek Ferry Boat at about 9 A. M. Lunch will be served to all comers.

BREEDER AND SPORTSMAN

Vol XVII, No 18
No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, NOV. 22, 1890.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

TIME AGAIN THE VICTOR.

Stamboul Fails to Reduce his Record.

Many Good Contests.

The continuation of the Pacific Coast Trotting Horse Breeders' Association Supplemental Meeting was held on Friday last after the BREEDER AND SPORTSMAN went to press so that it was impossible for us to secure a detailed account of the performances at the Bay District Track in time for the last issue.

After the very large attendance at the opening day of the meeting, it was supposed that a fairly good average would be kept up: such, however, was not the case, as on Friday it is barely possible that six hundred persons only were on the grounds. The carriage enclosure was almost deserted, presenting a very marked difference to what it was on the opening day. Sunol was advertised to go against her record of 2:10½, but it would seem that the interest in this wonderful mare was at a low ebb, for even her name failed to attract even a fairly good audience.

There was a complete surprise to the betting talent, however, and many of them will not forget unlucky Friday. Wanda, owned by the La Siesta Ranch, has shown her quality this year. Quality inasmuch as she could usually win one heat or act as a runner up in a fast heat, but no one ever dreamed for a moment that she could win the race, but the manner in which she carried off three straight heats and in first class time, opened the eyes of the betting public to the fact that like dogs, horses all have their one day.

The officers of the Association selected as judges: Hon. F. L Coombs, Napa; Gen. Brown of San Francisco; Count Valensin and F. H. Burke, it being necessary to alternate judges, owing to the fact that two of them had horses in the races. The timers appointed were A. B. Spreckles, M. F. Tarpey and F. B. Baldwin. Owing to the fact that for a day or two previous the winds had abated during the afternoon, Mr. Marvin deemed it expedient to keep Sunol in the stable until the sun was low in the heavens, and as a consequence the racing portion of the programme was commenced prior to the time Sunol was sent to beat her previous performance. The first event announced by the judges was for three-year-olds, the entries being Wildmont and Millie Wilkes. This was really an interesting race, for although the winding up of each heat was exactly the same, still Marvin controlled Wildmont in such a manner that the two looked as though they were trotting as a pole team, and this in both heats as far as the half mile pole, where the Palo Alto driver gave Wildmont his head, Millie Wilkes not having enough speed to win, was easily left behind. The time of the two heats was 2:27¼ and 2:30.

SUMMARY.

Bay District Track, Nov. 14th, purse $100, for trotters.

Palo Alto Stock Farm's b f Wildmont by Piedmont—Wildflower by Electioneer ..... Marvin	1	1	
San Mateo Stock Farm's Millie Wilkes by Guy Wilkes—Rosetta by The Moor ..... Goldsmith	2	2	

Time, 2:27¼, 2:30.

Beaumont, Vincenzo and Bulwer were next started for a special trot for named horses, but the Valensin colors were sadly out of place, and his Buccaneer gelding was badly distanced in the first heat. Beaumont by La Grande was in exceptionally good form, and won handily in three straight heats, the time being 2:25, 2:27¼ and 2:30. Vincenzo showed a great deal of speed, but breaking so repeatedly was easily beaten.

At three o'clock Sunol was brought out to try and see what she could do against time. It had been confidently expected that the wind would lower somewhat, but at three o'clock all hopes in that direction had vanished, and Marvin drove the great daughter of Electioneer up and down the stretch several times to get her warmed up to her work. The fates are evidently against the California horses this year, or they have not the requisite amount of speed, for although urged with whip and voice, she failed to accomplish the allotted task, her time being 2;11¼, three-fourths of a second behind her present record.

Among the horses that went through the northern circuit this year was one named Acrobat, owned by G. C. Vachill, a pacer, who either at Chico or Marysville made a record of 2:24½. Being already within the 2.30 list, he was also driven against the watch, Jas. A. Dustin being the driver selected to try and overcome old Father Time. Sandy Smith, now of the Palo Stable, drove the runner and assisted in helping the side wheeler to knock several seconds from his old record. After scoring once or twice, Dustin nodded for the word, and the first quarter was made in 34½ seconds; the half mile was negotiated in 1:08¾; the three-quarter mile pole was reached in 1:48½, while the mile was completed in the remarkably good time of 2:18¼. Acrobat is a strapping bay stallion by Sterling (son of Egmont) dam Madam Buckner by Tom Hal, second dam by Copperbottom. This breeding alone is enough to warrant pacing speed in almost any animal, and it requires no spirit of prophecy to state that he will before the close of another season, reduce his present record materially.

The final race of the day was between Wanda and Lee, who were both to cart, while Express and Redwood went to sulky. The betting in this race was very spirited, and proved a complete up-set for the betting fraternity, who backed Lee as a favorite, with Redwood a second choice: in $60 pools Wanda sold for $5 and $6, and proved conclusively to the spectators that but few of them were aware how really fast she was, as she won in three straight heats; time, 2:20½, 2;19½, and 2:20¼. The winner has been unfortunate this year to be completely outclassed as in almost all of her races she came against either Hazel Wilkes or Sister V, and has really had no chance to win any of the circuit events.

SUMMARY.

Bay District Track, Nov. 14th. Purse $500 for Named Trotters.

La Siesta Ranch's b m Wanda by Eros—Accident by Elmo .. Vioget	1	1	1
Palo Alto Stock Farm's b g Express by Electioneer—Esther by Express ..... Marvin	2	2	4
McFadyen & Murphy's b s Redwood by Anteeo—by Milton Medium ..... Goldsmith	3	3	2
G. Theuerkauf's ch g Les by General Les—Sister by General Taylor ..... Dustin	4	4	3

Time, 2:20¼, 2:19½, 2:20¼.

LAST DAY.

There was a largely increased attendance on Saturday which had been announced as the last day of the special meeting given by the Trotting Horse Breeders Association, and although public confidence was strong in the belief that Stamboul would go a remarkable mile, yet he failed to come up to the expectation, and Nelson 2:10¾ is still the champion stallion of the world. Palo Alto and Sunol were also exhibited for fast time, but neither of them came up to expectation, although very fast time was made by both of the Palo Alto representatives. There were a large number of horses sent against their present records but with one exception, they all failed in their work. Vida Wilkes, the diminutive daughter of Guy of the same Ilk, could not do better than 2:24. Soudan 2:27½, the property of D. J. Murphy of San Jose, did not come within three and a half seconds of his present record. Redwood 2:21½ was also given a chance to show what he could do, making two tangling breaks, 2:25 was placed opposite his name. Amigo 2:20½ a son of Electioneer, was supposed to be able to beat 2:20 very handily, however, 2:21 was the best he could do.

One of the horses that lowered his record was the big son of Electioneer and Midnight, Electricity 2:24¾, a record which he made at Napa during the last breeders meeting held there. Richard Havey, who has worked him continuously all summer, was up behind the half brother of J. I. C., and succeeded in knocking 2¾ seconds from his records, Electricity going the mile very smoothly in 2:22. It is a pity that this horse has such poor legs, for if he could stand hard work at all, he could surely make a very low record, down in the teens. Elleneer, an Electioneer filly, and Daylight, a daughter of Eros, started in a two-year old race, Elleneer winning with consummate ease in 2:29½ and 2:28¾. The winner is a well put up and a good gaited filly, and should prove a very hard nut to crack in all of the three-year-old contests next year.

For a special purse of $100, Vincenzo, Bulwer and Milly Wilkes had a tussel, although Bulwer had proved such a disappointment on the day previous, he now came out and won in two straight heats, the time being 2:30¼ and 2:26½ This gives Buccaneer another son to his credit in the 2:30 list.

The betting race of the meeting was for a purse of $500 for pacers. The entries being Ned Winslow, Gold Medal, Princess Alice and Hummer. Again there was a disappointment to those who always like the long end in a horse race. Hummer sold for $'0, Princess Alice for $30, Ned Winslow for $8 and Gold Medal for $3. Gold Medal won the first heat in 2:16¾, reducing his record three-quarters of a second; the next two heats were easily negotiated by Ned Winslow, he winning in 2:17 and 2:18½. Owing to darkness this race was postponed until Monday morning, and at the hour appointed about one hundred and fifty persons were present, all of them more or less interested in the pool box. Ned Winslow had the foot of the party and won the fourth and concluding heat of the race in 2:18¼. The result proving a complete downfall for those who fancied that Hummer had a cinch on the race.

SUMMARY.

Bay District Track, Nov. 15th and 17th. Purse $500 for named pacers.

J. L. McCord's blk g Winslow—by Tom Benton—by Dave Hill Jr. ..... Marvin	3	1	1	1
Napa Stock Farm's b g Gold Medal—by Nephew Jr.—Peggy Donohoo ..... Dustin	1	3	4	4
J. Garrity's ch g Hummer—by Sidney—Humming Bird	2	4	2	2
J. Patterson's blk m Princess Alice—by Dexter Prince—by Gen McClellan ..... Kenier	4	2	3	3

Time 2:16¾, 2:17, 2:18½, 2 18¼.

At last the season has come to an end, with the exception of the three days' meeting which will be held at Stockton during the current week, and as Stamboul is the only one of the expected record breakers that will participate, all hopes must be pinned on him. Immediately after the close of the Bay District gathering, the Palo Alto contingent was sent to the farm at Menlo Park, and they have been seen for the last time in public this year. That all California breeders are disappointed, there can be no doubt, for it was confidently expected that the great Pacific Coast State would have fresh leaves added to the laurel wreath which already has decorated the brow of its equine heroes. But it would seem that such is not to be, and 1890 will pass out and only the glory attained in 1889 will remain for our magnificent State —if we except the young giant Freedom, who has eclipsed all former efforts made by yearlings. In his possession Mr. Corbitt may well feel proud, and there should be none to envy him the ownership of the fastest yearling that ever drew breath. Praise must not be forgotten for John A. Goldsmith, to whose great talents the trotting horse interests of California owe much, and likewise to the other noted reinsmen, Marvin, Dustin, McDowell and Havey, who have all given many horses records this year commensurate with their speed. As it stands at present, the following are the fastest records.

TROTTING.

Freedom, yearling	2:29¾
Sunol, two-year-old	2:18
Sunol, three-year-old	2:10½
Sunol, four-year-old	2:10½
Jay-Eye-See, five-year-old	2:10
Maud S., any age or sex	2:08¼
Nelson, stallion	2:10¼
Palo Alto, fastest in a race	2:13

PACING.

Daisy, yearling	2:38
Managsr, two-year-old	2:16½
Yolo Maid, three year-old	2:14
Goldleaf, four-year-old	2:11¼
Adonis, five-year-old	2:11½
Johnston, any age or sex	2:06¼
Roy Wilkes, fastest stallion	2:08¼
Hal Pointer, fastest in a race	2:09¾

This shows that California can claim nine out of sixteen events, truly a good showing.

Senator Hearst's Winnings.

That Senator Hearst, from the Golden State, is enabled to occupy the position of third in the list of our winning owners, is entirely due to the fact that his good three year-old colt, Tournament, the son of the imported Australian sire, Sir Modred, and Plaything, was lucky in being foaled in a year which produced few horses of even average merit, says the N. Y. Spirit of the Times. We do not mean by this to state that Tournament would not have put large sums to his credit in any year, but he was fortunate in meeting with but slight opposition. While, however, he was fortunate in this respect, he was unfortunate in others, for as matters stood, he should have won a much larger sum than even the fine total of $83,305 with which he is credited.

Tournament has been the leading problem of the year, and even now we think that he is a problem which is scarcely yet solved. The man who will affirm that he is prepared to state quite how good a colt he is is a bold man, for while we have seen him winning and beaten, most of his victories have been gained in such hollow style, and some of his defeats have been so unaccountable, that it is hard to summarize his form, and, so to speak, strike an average At the commencement of the season he was certainly very far from being at his best. For instance, what should we have thought at the latter end of the season of seeing Kenwood beat him at even weights at the distance of a mile, as Mr. Walbaum's colt did in the Carlton Stakes at the Gravesend Spring meeting, on the first occasion that Tournament started as a three-year-old Again in the Brooklyn Derby he finished behind Burlington, Torso, Kenwood, King's Own, Lisimony and Padie bah, all at even weights. This certainly was not the colt that won the Jerome, Mosbolu and Hickory Stakes in a common canter at the Morris Park Fall meeting, even if he was defeated at the same meeting when conceding "tons" of weight to his opponents. Even if Tournament be indeed the coward at heart that some still suspect, he is a coward of the most remarkable power, and it takes a horse of absolutely the best quality to reach the limit of his courage at anything like reasonable weights, when he is fit for a hard race,

The other members of the string of 25 that have carried the green and yellow this season have not made by any means an astonishing success. Only two have won over $5,000, these being Rhono and Gloaming, and outside of these two and Almont the showing is very poor. Four horses at the top of the list have won $100,110 between them, and all the remaining 21 have managed to contribute between them is $8,570, six not having earned a penny. But in saying this one exception should be made, inasmuch as Yosemite has since the end of the legitimate season proved himself a colt of really good calibre, and likely to stand very well in his three-year-old form, still it will be seen that his winnings up to Oct. 15th were very small, and he ran a long time before he began to prove his claims to real worth. It is curious in glancing over this list to remember that Ballarat was thought at one time to be the best horse in the stable, yet in thirteen races he has only won $350, and were it not for his victory in the Hudson Stakes at the Gravesend Spring meeting of last year would still be a maiden The following is the full list of the stable's winnings till the end of the New York season.

Horse, Age, Sire and Dam.	Races.	First.	Second.	Third.	Unplaced	Amount Won.
Tournament, b c, 3, by imp. Sir Modred—Plaything	20	7	5	2	5	$83,305 00
Rhono, ch c, 4, by Flood—imp. Rosella	14	4	4	3	3	7,270 00
Gloaming, b f, 3, by imp. Sir Modred—Twilight	13	1	4	2	6	5,040.00
Almont, b c, 4, by Three Cheers Quesilon	17	*4	3	1	9	4,495.00
Imp. Del Mar, ch c, 4, by Somnus—Maid of the Hills	15	3	1	2	10	1,475.00
Miss Belle, b f, 3, by imp. Prince Charlie—Linnet	14	1	1	2	9	1,450.00

Totals	205	24	28	30	127	$108,080 00

*Including dead heat with X.

Tournament's victories include the Realization, Omnibus Choice, Jerome, Mosholu and Hickory Stakes, and the Omnium Handicap; but before winning the first and richest of the series, the Realization, he had suffered defeat on no less than eight occasions, and many were quite prepared to write the big fellow down a fraud. The beat in fact that he had done up to this point was in the Bowling Brook Handicap at Morris Park, when he finished third, carrying 115 lbs., behind Lisimony with 108 lbs. up and his stable mate King Thomas with 102. This in view of the fact that such an astute judge as Mr. Green Morris thought that he had the Realization at his mercy with Lisimony if fate had not been unkind enough to cut that promising colt's career short makes Tournament's form pretty good. Moreover it was public knowledge that his private work had been vastly better than anything he had shown in races, and so it came about that he started a 9 to 5 favorite for the realization.

That he simply squandered his field and came home by himself is now a matter of history, and from that time on although he was beaten by Torso in the Lorillard Stakes and Banquet in the Stockton, he began to make the remarkable record which makes him undoubtedly the best three year old we have seen out in this year of grace. As a matter of fact this does not imply a great deal. With Lisimony dead, with Burlington laid by comparatively early in the campaign, and with Judge Morrow not competing against him, his way was pretty open, and when Tournament did suffer defeat it was from horses of comparatively moderate merit, except when Firenzi and Kingston beat him in the Twin City Handicap and First special respectively. Toward the end of the season he seemed to have had about as much racing as he wanted, and it must be remembered that he had been at it ever since the Gravesend Spring meeting. He was decidedly sore, and, in fact, distinctly lame behind on one or two occasions, and consequently he was more than ever partial to a muddy track. At any time he seems to have been a better horse by a good many pounds in soft going than in hard, and in addition to the fact that he was trying to give away an enormous amount of weight in the Pelham Bay Handicap, over a mile and five furlongs, to some of the best of the poor lot of three year olds we have seen out this year, the fact that the track was hard and fast was against his chances of success.

Of the other horses that have carried Senator Hearst's colors Rhono has made thus far the most creditable record for himself in every way, in fact a most remarkable one for a four year old that started the year a maiden, although the amount of money he has won $7,370 is not very great. His four victories comprise an over night handicap at Monmouth, which he won under a light weight, making the mile in 1:40; the Adirondack Handicap at Saratoga; the Delaware Handicap at Monmouth, and an over night handicap at Sheepshead, in every one of which events he won hands down, defeating good fields. He failed to give Los Angeles 3 lbs. in the Merchants' Stakes at Saratoga, and Tea Trey beat him at a difference of 8 lbs in the older horse's favor in the Monmouth Handicap, but he was so good that Hayward told us that he could work a mile in 1:40 any time he was asked.

Gloaming began the year better than she finished it. The first race she ran this year was when she ran second to Sinaloa II at even weights, and the next was the occasion of her one victory—in the Elms Stakes, when she beat Druidess, Tulla Blackburn, Bibelot, Amazen and Golden Horn. Then, after running third in the Baychester Stakes to Adamant and Granite, and second in the Mermaid Stakes and Monmouth Oaks to Her Highness, she did nothing more of much account, though she got the second money in the Hunter's Stakes, which Sinaloa II. won at the Morris Park Fall meeting. Almont's four victories included a purse at San Francisco, two purses at St. Paul and the Great Western Handicap at Washington Park, Chicago. In the Boulevard Stakes, at Chicago, he ran second to Marion C.

King Thomas has unfortunately done nothing as yet to justify the fact that he fetched the biggest price ever paid in the world for a yearling. He ran second in the Bowling Brook Handicap, as we have already mentioned, and that was all. He has not run since the Realization, but next year may find him at last showing himself to be a racehorse. The fact of his enormous cost has always militated against him; as his trainers have been unwilling to take any liberties with him, and he has in consequence escaped the "dustings" which he, being a big, gross colt, perhaps needs, and which he would have got if he had not cost more than a thousand or two.

The Western section of the stable has not done much, with the exception of Almont, imp. Del Mar won a purse race in the Spring at San Jose, at six furlongs, in the fast time of 1:14½, and was thought good enough to bring on for the Toboggan Slide Handicap, but the company in the east proved too good for him. Subsequently he won two purse races one at Washington Park, the other at St. Paul.

Breeders Take Notice.

The following clipped from a pen of a shrewd business and enterprising man of Lexington, Ky., speaks much in the interest of breeders throughout the land. Let every breeder contribute his quota to his breeder's meeting, whether it is large or small, and thereby keep up the interest and good prices in the best business in the country. The Hoosers must not forget that we this year gave the best meetings that has ever been given, and therefore should contribute largely to our breeder's meetings and stakes.

"The past few weeks have been marked by an uncommonly active horse market in Kentucky. Marcus Daly, the Montana copper miner, has spent nearly $100,000 for well-bred brood mares and youngsters, he being the buyer that was furnishing Brasfield & Tipton with so much money, instead of Monroe Salisbury, as was stated in these dispatches six weeks or more ago. The Beerman Brothers, of Berlin, Germany, have laid out over $20,000, while the other private sales run the total up for October to at least $300,000, and Woodard sold at auction during the breeders' meeting about $65,000 worth. In nearly every instance good prices have been obtained.

There is much solitude, however, about the future prices of the trotter. Hitherto it is obvious that the prices of trotting stock have been out of proportion to its earning capacity upon the track.

These prices have been largely regulated by the demand for breeding purposes. Stallions have brought large prices because they would command large service fees, and thus enable their owners to obtain good returns on their investment. Brood mares have been sold for good prices because their produce by good horses would bring remunerative prices for breeding purposes. It is a plain proposition that this condition of affairs can not last always. When the breeding farms of the country are fully stocked, and this is only a question of time, trotting horses will depreciate unless there is something besides the demand for breeding stock to keep them up. The increasing popularity of trotting races in foreign countries, and the demand necessarily ensuing for breeding stock in these countries, will serve to keep prices up for some time after the home market is fully supplied. But even the foreign demand will necessarily have a limit. The earning capacity of the trotting horse has heretofore not been as great as it is easily capable of being made. While thoroughbred colts and fillies have been commanding immense prices by reason of their engagements in great stakes, the trotting colts and fillies of the country have been sold at figures regulated entirely by their earning capacity in the stud. Unless these prices are to suffer very serious reduction, it will be absolutely necessary to place the trotter upon the same footing as the thoroughbred with reference to his track value. The sooner breeders awaken to this necessity the better. There are already indications that they are not sleeping. Several very large stakes are open to the young things that are now coming on.

Enterprising associations are coming to the front with stakes that are commensurate with the great breeding interest which they are intended to subserve. Breeders who fail to patronize these stakes liberally will be standing in their own light. There is no money that they can invest more profitably. Besides the chance of winning, which is certainly worth something, they in so doing adopt the only means that will keep up the demand for the produce of their farms when the stud farms of the country are fully supplied."

Anteeo and His Offspring.

EDITOR BREEDER AND SPORTSMAN:—The breeding of fine horses is not in the category of "Lost Arts" in Sonoma county, at least in respect to the study wherein it pays tribute to Nature. Anteeo, in the Latin, is to go before. In conformity with the prescript, here in Sonoma "Anteeo" preceded "Dawn." Santa Rosa rose to the horizon of superior breeding in advance of Petaluma. The sons and daughters of the favorite scion of Electioneer and Columbine, nobly mated, are more extent and better prized. The BREEDER AND SPORTSMAN has printed the list within the year. There are no back numbers in the lists of merit. Guerne's Alfred G, McFadyen's Redwood, Capt. Gross' Sunset and Anteup, DeTurk's string of Anteeos, Tupper's Santa Rose, Robert Crane's powerful colt, James Laughlin's fine ones, Ludwig's handsome two-year-olds, and others of the line of Anteeo are the gratifying demonstration. Let me tell you of others. This morning I looked at Mott. Roney's yearling Crownhead by Anteeo, dam Dana by Norfolk—the grand cross of thoroughbred with trotting sire—and a daughter of Redwood by the same dam, foaled last April. They'll do; both of them. Crownhead was foaled March 6, 1889. He resembles the sire; is gentle, docile and easy to handle. He is well put up—fine head, intelligent; excellent barrel, withers and rump almost on a line, strong back, grand shoulders, full loins, admirable legs, springy pasterns, good feet and handsome coat—the hue of the sire. His arm is 15¼ inches, with show of thorough muscle. His action has the promise of speed, but his trials of speeding are yet to come. The filly Edith R. was sired by Redwood, Anteeo's son, with the same dam as Crownhead. She shows the dam's high strung nature—not fractious or ill natured, but high-tempered and spirited. She will require intelligent handling—none of the passionate, careless order will do in her training. She knows too much, and needs a master that will teach her that he is the master by easy and firm methods. Crownhead and Edith R. are not for sale. Mr. Roney intends to rear them and hold them. He has pride in the possession.

In the stables I saw a huge horse, a trifle over 18 hands, adequality proportioned, seven years old, weight 1,500. Of his pedigree or breeding, nothing is known. Mr. Middleton, Matt. Roney's confidential man, traded for him a short time ago, to be used in the daily trade wagon. He has proved valuable in driving about to a surrey—docile, free, and as to power, why, he is as a motor; can pull anything with wheels to it.

When the spring-time comes, I can tell you more of the line of stock of Anteeo and his noted sons. J. O'M.

SANTA ROSA, November 19th.

How to Lay Out a Mile Track.

To lay out a full mile track, select a level field of 42 acres; draw through the center of it a straight line of 440 yards (a quarter of a mile). On each side of this line, and an exact distance of 140 yards two inches from it, draw parallel lines of equal length, so that the space between the two outer lines will be 280 yards, four inches. This being done, a stake should be driven at each end of the center line; a cord should be fastened thereto; extend the cord at right angles for 140 yards two inches, until it touches the end of the outer line, and then describe with the extreme end of the cord an outer curve or semi-circle between the ends of the two outer lines. There will be a continuous outer line, being exactly a mile (1,660 yards) in length, and requiring an enclosure of 46 acres of ground. From this outer line or track set the fence of the course three feet in on the straight sides and curves. In this way an exact mile (as near as may be) is preserved for the actual foot track of all the horses. The first distance post is 60 yards from the judges' stand, the second at 240 yards, and the stand is 60 yards before entering the turn. The track should be graded around the turn like the track of a railroad or circus, the outer portion highest, so that a horse can extend himself at full speed.

What Cures?

Editorial Difference of Opinion on an Important Subject.

What is the force that cures disease; and which is the most convenient apparatus for applying it? How far is the regular physician useful to us because we believe in him, and how far are his pills and powders and tonics only the material representatives of his personal influence on our health? The regular doctors cure; the homœopathic doctors cure; the Hahnemannites cure; and so do the faith cures and the mind cures, and the so-called Christian scientists, and the four-dollar and-a-half advertising itinerants, and the patent medicine men. They all hit, and they all miss, and the great difference—one great difference—in the result is that when the regular doctor loses a patient no one grumbles, and when the irregular doctors lose one the community stands on end and howls.—Rochester Union and Advertiser.

Nature cures, but nature can be aided, hindered or defeated in the curative process. And the Commercial's contention is that it is the part of rational beings to seek and trust the advice of men of good character who have studied the human system and learned, as far as modern science lights the way, how far they can aid nature and how they can best avoid obstructing her.—Buffalo Commercial.

It is not our purpose to consider the evils that result from employing the unscrupulous, the ignorant, charlatans and quacks to prescribe for the maladies that afflict the human family. We simply declare that the physician who knows something is better than the physician who knows nothing, or very little indeed about the structure and the conditions of the human system. Of course "he does not know it all."—Rochester Morning Herald.

I have used Warner's Safe Cure and but for its timely use would have been, I verily believe, in my grave from what the doctors termed Bright's Disease.—D. F. Shriner, senior editor Scioto Gazette, Chillicothe, Ohio, in a letter dated June 30, 1890.

THE FARM.

Foreign Retaliation.

Nelson Morris, of Chicago, who haa exported more live cattle to Enrope than any other man, in a recent letter to Secretary Buak, aaya:

"Laat apring I made arrangements in Belgium as well aa in France, and also in Germany for ahipping live cattle. Had shipped a good many ship loada to Antwerp and Brussela until the German influence got the Belgian goverument to shut them out under pretense of a law of 1883. I am now canght with a ship load of cattle there and one on the ocean.

"The French government has nearly doubled the duty on American cattle, and of course that will shut us ont of France. Thie was done by the government eince my first cargo of cattle landed at Havre this summer. I had intended to ship them beef in the carcaases, aud have such cattle inapected in Chicago by the government inspector, sending the certificate with the beef, but the danger or the French government putting an arbitrary duty againat thia industry aa soon aa started, has prevented me from undertaking thia great enterprise. In France I could make a market for 3,000 cattle weekly had it been safe for me to build places for selling the beef, aud had I known that I would not have been moleated hy the authorities, bnt the danger of their raising the duty to a very high rate before businese began, shut me off before going any further.

"Germany, as well aa Austria has put on an arbitrary duty againat onr canned beef, as the laboring aud middle claaaea were using it to a great extent. This ia a duty eo high as to prevent that class of people bnying it, and none can be sold except a amall amouut which the German armywill take, and for faucy consnmption, a very limited demand.

"There have been vaat amounta of leather ehipped to Germany, but they put on auch an arbitrary duty of late that that cannot be done any more now in a very large way,while the hidea of their own cattle, and also of the South American brands which are in opposition to the American canned meats, and which are run by German capitaliats, come into our country free.

"Now the German goverument has a law requiring the American cattle to be quarantined forty-five days at port of landing. They also have an arbitrary duty against our cattle. This forty-five day quarantine law of theirs has been made for the purpoae of preventing any American cattle coming into Germany, as laat year I shipped a few cattle into Germany, before this law was put into effect. We could compete with Germany had not they put thia law into effect within the laat four mouths, ae we could afford to, if neceasary, pay the higu arbitrary duty.

"Our canned meat trade is hurt very badly by the German capitalists building large industries in South America for canning purposes. They buy the cattle there for $6 and $7 apiece, and now send the hides to America free of duty under the McKinley bill, and every farmer here hae to compete with them and with their $6 cattle for what hides their cattle have on them.

"Your quarantine arrangement against Texae cattle from the fever country has benefitted thia country millions of dollars this year, as your orders have been pretty well lived up to. My hooks show a leas per cent of losa this summer on my live cattle shipments to Europe than any year I waa ever in the buainess, and I have not had one bunch of cattle landed yet with any sign of Texas fever, while laat year I loat cattle by the hundreds, aa the railroad companies and stockyard companies would not carry out your instructions."

By the "quarantine arrangement against Texas cattle" which Mr. Morris mentions in his letter, he undoubtedly refers to the regulations of Secretary Rusk, issued in February laat, for securing the disinfection of cars in which southern cattle had been shipped, and also the separation of southern from northern cattle in the stockyards of the country. These regulations, which have been so successful in preventing Texas fever, can hardly be considered as a quarantine, because they allow Texas cattle to go to market freely, but simply require that they should be unloaded in separate pens, and that the cars in which they had been shipped should be disinfected. This great good has therefore been accomplished without imposing hardship upon the cattle raisere in any section of the country. The department has been informed that whereas insurance rates on export cattle have formerly been about 8 per cent they have the present season been reduced to 4 per cent, and in some cases as low as 3½ per cent. In other words, on every $100 value there has been a saving in insurance of from $4 to $4.50 on account of the diminution of the disease following the enforcement of these regulations. Mr. Morris has also informed Secretary Rusk that American salted ox tongues have been prohibited by Denmark, and that there has been recently a general diapoaition on the part of continental nations to embarrass and prevent the trade in American meats and other animal products.—Las Vegas Stock Grower.

A Chapter on Churns.

Will the time ever come when a patent is not issued every day in the year for some new kind of churn or farm gate? Judging from preaent appearances there are just as many men now as ever in the past who are perfectly confident that they have the best and only perfect churn. Almost every summer strangers move into some otherwise unoccupied store room on the leading street and keep "open house" the long season through. The sole object of interest they have on exhibit is some wonderful churn, and daily cream is turned into butter with lightning like rapidity before the eyes of a gaping crowd. Only a couple of years since parties doing business in this way gave churning exhibitions, and in the presence of two of the highest officials in our State turned cream into butter in two minutes by the watch, and what seems to me a much harder thing to do, they obtained the signatures of these two parties to a statement of the fact, this amounting practically to an endorsement of the churn. Now, it is a fact that these parties turned cream into butter in about two minutes. Was this churn, therefore, an improvement on the ordinary churn?

To test the matter we sent our dairyman down one day and had him purchase a churn without telling the proprietor whom he represented or what was to be done with it. We took a quantity of cream and divided it into two equal parts, by weight, and put one-half into the new claimant and turned the other into our rectangular churn which had been doing service for several years. Both churns were worked according to directions and treated so as to get the best results possible, so far as we knew. What was the outcome? The novelty, which had brought butter in the presence of hundreds in two minutes, now came out minutes behind the other churn, and did not deliver quite as much butter, though probably the difference was accidental. Where was the discrepancy? The whole matter was plain to us when we recollected that the parties operating the churn in the city never churned but two or three quarts of cream, and that they made the paddles go so fast that they beat the little mass of cream into butter in "no time." When the churn was given a reasonable amount of work to do, it did no better, and even not quite so well as a much simpler instrument.

After having looked over many of the new inventions, we have come to the conclusion that we have reached the limit of progress in churns along the present line. Of course new directions are opening up, the butter extractor, for example, but we do not believe there has been a single advance made in the common churn for more than a decade, except in regard to covers, which have been materially improved. The best churn to buy is the simplest; this is a simple box or barrel that turns over and over. In buying a churn of this class, see that it is strongly bound together, so that the falling cream will not pound it to pieces. Next, look to the opening, which should be ample—the larger the better—in order to remove the butter easily and facilitate washing and airing. See that the cover is easily managed and fits closely. Some of the late improvements in the covers of barrel and box churns are the simplest in construction and consequently the lowest in price of any on the market, so that the best is not only the cheapest but also the lowest priced. Avoid all churns with inside fixtures, such as dashers, paddles and scrapers. A churn with these paddles in turns out no more butter and makes it no easier than a revolving churn. They are difficult to wash and keep clean. All churns with paddles require bearings; these grind up the cream into grease and blacken it, often making the butter unsightly. Many of the patents on churns are for devices to aerate the cream. Most of these are simply ridiculous. If we wish to get air through the cream, we can do it most effectually by having it tumble about in a revolving barrel or box.

We are apt to grumble about taxes; there is no tax that rests so heavily upon our shoulders as that laid by ignorance. Every year oily-tongued agents take from our people, from which nothing is given in return, more money than state, county and town taxes combined amount to. One of the most common of these agents is the man with the patent churn.—W. H. Henry, Wisconsin Agricultural Experiment Station, Madison.

Linseed Oil Cake.

A. Z, in the Kansas Farmer, writing about this valuable food, says: "A new article of food for all kinds of live stock is fast coming into general use in the Western States and Territories. A few years ago linseed or flaxseed oil cake was comparatively unknown in the West as a food. It was only to be had at a few of the drug stores and then sold more as a medicine or system-corrector for stock. The reason is very easily seen when it is explained. It is only in the last twenty years that linseed or flaxseed oil mills have been erected in the United States. Formerly, linseed oil was imported from England, consequently the cake remained there and was fed to cattle and all kinds of live stock, and none came to this country, but with the settlement of our great West, the cultivation of flax has increased rapidly and oil mills for the making of linseed oil and oil cake have sprung up in all our Western States. Thus the feeders of stock have oil cake at home. They are fast appreciating that fact, for in the past two or three years oil cake is going into general use as a staple feed all over the West. Thousands of feeders all over Kansas can testify as to its merits as a food. For cattle, hogs, sheep, horses and poultry there is no known food that is its equal for a like quantity, that will produce the same results. Being a concentrated cooked food, it takes less to satisfy the animal. We think feeders cannot afford to do without oil cake. The thrifty stock raiser of England or the keen, sturdy Scotchman would as soon do without his corn, oats or hay as not to have as a daily feed some oil cake. Animals thrive and keep healthy when oil cake is used. Hogs have no cholera. We think, from all the information we gather, it will only be a short time when the export of oil cake to foreign countries from the United States will be a thing of the past. The United States produce annually some twelve million bushels of flaxseed, making four hundred and eighty millions pounds of oil cake. If Europe can afford to buy this cake, which pays transportation charges on five thousand miles of rail and water carriage, certainly it needs no argument for home consumption."

Effect of Electricity on Milk.

It is well known that milk sours rapidly during a thunder storm; so it does in hot, muggy weather. The question has been raised as to whether electricity is the cause of the rapid souring. We think not, says the Mirror and Farmer. But an Italian scientist has been trying the experiment of passing a current of electricity through the milk, and finds that it delays instead of accelerates sonring. Instead of souring in two or three days, the acidulation was held back to six or nine days. On passing a current over the milk, however, the milk soon soured—how soon, we have not seen it stated. He attributed the quicker souring to the presence of more ozone generated by the electricity. If he had added ozone to the milk or given it more oxygen, as we do by aerating it, he would have probably found that it retarded souring. Our theory of milk souring in thundery weather sooner than in clear is that a hot, moist atmosphere is favorable to the rapid development of the bacterium or bacillus that is supposed to cause souring or at least makes its appearance in sour milk. Hence, when cold setting is practised and the milk is kept at a low temperature, and perhaps shut out from the hot, moist air, the presence of thunder storms has little if any apparent effect upon it.

Aerating Milk.

The New York Dairy Commissioner says that milk can be sent further and will be in a better state for use when aerated down to the temperature of the atmosphere than when chilled and sent on ice.

The process is very simple, and consists in allowing the milk to run from one receptacle to another in fine streams, so as to come thoroughly in contact with pure air. It should not be done in the barn or stable, but out of doors where the air is purest. If nothing better is at hand, let it run through an old colander two or three times. A better arrangement is a set of perforated pans one above the other, through which the milk may run in fine streams. It is held that tyrotoxicon poison is generated in cream for the want of proper aeration, and that unaerated milk is the great enemy of infants and the great cause of cholera infantum.

Money in Turkeys.

Mrs. John Bare, wife of our roadmaster, has this year, says the Traver Advocate, as she has for several years past, made a snug little sum by raising turkeys. She raised 200 of the fowls this year and they were as fine a lot of turkeys as we ever saw. They were brought into town Monday, H. Brewatone, the Traver merchant, having purchased a portion of them. They were half-bred Bronze turkeys, large, fat and healthy looking. The average weight of the flock was fifteen pounds, and some of the birds would weigh eighteen and twenty pounds—good weight for turkeys hatched last spring. The price paid by Mr. Brewnatone for those he bought was 15 cents per pound. This would make $2 25 a bird or $450 for the 200. When it is taken into consideration that Mrs. Bare raised these turkeys at small expense at her colony tract just northeast of Traver and tended them besides performing her household duties, that a large amount of alfalfa and fruit was raised on the place at the same time, it is easy to see that she has been well paid for her trouble. In an interview with Mr. Bare, he informed us that any person who understands the business at all, and there is no great amount to learn, can make a specialty of the business and make money. It is an easy way of earning a living, there is always a good demand for the birds in the fall of the year and the expense of raising them is small. He says there is a great deal more money in raising turkeys than in raising chickens, and he knows whereof he speaks.

Pure Bred Cattle.

"It is gratifying to learn," says the London Farmer and Stock Breeder," that foreign demand for British pedigree stock is steadily increasing. South America has lost her appetite for the present, but she is expected speedily to regain it after the financial condition of the country has been settled up. Meanwhile we are having nibbles from other countries, some of which are already beginning to possess themselves of pedigree breeds. Take South Africa. It was our privilege the other day to receive a visit from Dr. Leech, an extensive land owner in Orange Free State—from that country, who has concluded a tour round the world very befitting by taking with him a number of Kerry cattle * * intended more for ornamental than speculative purposes. The Irish breed is hardy, and just about the right height from the ground for the South African farmers taste, but they are too small and too fine to endure the trials and hardships of South African ranch life. What is really wanted to cross with the native stock are strong Short Horns or Herefords."

How To Judge Wool.

An Australian expert gives the following on judging wool on live sheep:— "The finest and softest wool is always on the shoulders of the sheep. An expert in judging sheep always looks at the wool of the shoulders first. Always assuming that the wool to be inspected is really fine, we first examine the shoulders as a part where the finest wool is to be found. This we take as a standard, and compare it with the wool from the ribs, the thigh, the rump and shoulder parts, and the nearer the wool from the various portions of the animal approaches the standard, the better. First we scrutinize the fineness, and if the result is satisfactory we pronounce the fleece in respect to fineness very 'even." Next we scrutinize the length of the staple, and we find that the wool on the ribs, thigh and back, approximates reasonably in length to that of our standard; we again declare the fleece, as regards length of staple, "true and even." We next satisfy ourselves as to the density of the fleece, and we do this by closing the hand upon a portion of the rump and loin wool, (these portions being usually the thinnest and most faulty. If this again gives satisfaction, we designate all the wool 'even to density.' Now to summarize these separate examinations: If the fleece is nearly of equal length on shoulder, rib and back, and density on shoulder and across the loins, we conclude that we have a perfect sheep for producing valuable wool.

A rich New Zealand sheep grower says the mistake American sheep raisers make, is in breeding for wool alone on high priced lands and not paying enough attention to mutton. His own sheep are a cross of Leicester and Lincolnshire on original merino stock. Thus he has wool and mutton both. He ships 2,000 frozen mutton carcasses to England every year from his far Australasian home, which is 1,000 miles southeast of Australia.

During the nineteen months ending with September, the value of the imports of oxen into Great Britain was £7,476,863, against £5,866,691 last year. Of this sum the United States received £5,682,642, and Canada £1,265,715. Of the cows imported the value was £500,058; calves, £216,687; sheep and lambs, £479,258; and pigs, £14 110; total value of live animals imported for food, £8,689,076, against £7,485,685 last year. Of dead meat the value was £15,452,180, against £13,728,278, the increase having been chiefly in fresh beef, hams and fresh mutton. The United States sent beef of the value of £2,684,046, and hams of the value of £2,026,984. The value of butter imported in the nine months was £7,977,558, against £7,694,147; margarine, £2,211,784, against £2,697,911; and cheese, £3,576,151, against £3,256,639 Eggs came to the value of £2,504,629, against £2,309,909.

The following appointments were made for meetings of breeders' associations at Chicago:

Galloway, Grand Pacific, Nov. 13th, 7.30 P. M.
Hereford, Leland, 14th, 8 P. M.
Percheron, Sherman, 18th, 10 A. M.
Red Polled, Grand Pacific, 18th, 10 A. M.
Shropshire, Auditorium, 17th 10 A. M. and 7.30 P. M.
Jersey, Wellington, 19th, 2 P. M.
National Swine Breeders, Sherman, 18th, 2 P. M.
Holstein, Grand Pacific, 18th, 2 P. M.
French Coach, Sherman, 18th, 3 P. M.
Poultry, Exposition Building, 18th, 3 P. M.
Illinois Short Horn, Grand Pacific, 18th, 8 P. M.
Sussex, Leland, 18th, 8 P. M.
Cotswold, Sherman, 18th, 7.30 P. M.
Southdown, Sherman, 18th, 7 30 P. M.
Western Circuit Fair Managers, Sherman, 18th, 8 P. M.
Poland China, Sherman, 19th, 10 A. M.
Devon, Grand Pacific, 19th, 2 P. M.
Duroc Jersey, Clifton, 19th, 7 P. M.
Essex Swine, Sherman, 19th, 7 30 P. M.
American Short Horn, Grand Pacific, 19th, 8 P. M.
Aberdeen Angus, Leland, 20th, 8 P. M.
Victoria Swine, Sherman, 7 30 P. M.

TURF AND TRACK.

Budd Doble will winter at Terra Haute with Axtell, Nancy Hanks, McDoel and a few others.

R. H. Fry, the indomitable English penciller is said to have lost $230,000 on the Cambridgeshire.

Talbot Bros.' imported thoroughbred stallion Prince Leopold by Doncaster from imp Princess, died of hernia last week.

Ruddy Bros., Chicago, purchased at Nashville, for $1800, the big two-year-old Parapet, formerly the property of W. M. Murry.

The old War Dance mare Flora, died at Rancho Del Paso a fortnight ago. She was foaled in 1874 and was in foal to imp. Darebin.

Fleet, the three year old Sidney filly, sold in New York by Mr. Valensin, won first prize in her class at the New York Horse Show.

Mr. G. Conkling, Grassland's Farm, Glen Falls, has bought a five year old mare, by Peter Storey, out of Astraea (dam of John W., 2:24½).

It is stated that James H. Goldsmith received a phenomenally big offer from one of the millionaire trotting horse breeders of Buffalo, N. Y.

Barnes made one mistake in his reported interview in answer to E. J. Baldwin anyhow; he has signed to ride next season for Marcus Daly not J B. Haggin.

W. B. Curtis, Fort Worth, Texas, has purchased from Bradley Bros., Nashville, the four-year-old gelding Consignee by Hyder Ali from America. Price $1,200.

The reason Eon was not offered for sale at the Dwyer sale was because he was the property of R. J. Hancock, Virginia, who leased his racing qualities to the Dwyers.

The old-time trotting horse driver, George Hall, went up on the steamer to Tacoma yesterday with a three-year-old Sidney atallion, the property of Dr. Wintermite.

Michael Dwyer's new colors are light blue jacket maltese cross on back and red cap. Starter Caldwell once used the same colors and E. J. Baldwin had something very much like it, but the cross was in front.

Rumor says Mrs. McGuigan, the wife of William McGuigan, who was ruled off by the Lexington Association will train her own horses, and have a large stable on the circuit next year.

It is reported that Michael Dwyer is now practically sole owner of the Elizabeth race track, having traded his brother Phil all his Brooklyn Jockey Club stock for the Elizabeth track.

On Nov. 6th, for $2 500, I. Shannon, Lexington, Ky., has bought the bay colt Milt. Young, two years, by Jils Johnson, dam Via by Vagabond, of F. B. Harper of the Nantura stud, Kentucky.

It is said that Mr Abington (Baird) will have first and Colonel North— the Nitrate King, second call on Tom Cannon. "Morny Cannon" will ride for Mr. North after his father's stable.

The great race mare Miss Woodford has prematurely foaled twins (both dead) to Sir Modred at Rancho Del Paso. It is a great loss for the mare could hardly help throwing a racehorse to Sir Modred.

John Wilson, Billings, Montana, has purchased from Jas. O. Johnson, Wyoming, the seven-year-old imported stallion Exploit by Exminster out of Zenobia. Mr. Johnson imported Exploit in 1888.

Uncle Alf Estell, who died last week in Reno, was one of the most popular men on California tracks; a straightforward, honest racing man, a good judge of a horse and a perfect encyclopedia on pedigree.

Captain Brown, the Pittsburg turfman, has shipped eleven yearlings from Kentucky to Morris Park. His brood mares, and Troubadour, Sunyeasant and Masterpiece have been sent to the Brownsville farm.

Mr. Miller, Eldorado Stock Farm recently purchased from Mr. Charles E Ford the bay filly Walter Belle, one year old, by St. Bel, out of Virginia, by Smuggler and she out of Wateraprite. The price of the latter was $3,500.

Matt Storn who has been so successful this year on the California Circuit with Mystery, Lurline, Marigold and that steady, reliable gelding Kildare has added several youngsters to his string which he says are very promising.

P. Dornaiech and G. Walters arrived at the Bay District track last Tuesday morning with Naicho B., Dan M. Murphy and Gambo. The Southern contingent speak very highly of Naicho, who is confidently expected to step down the line.

Rosie C by Hambletonian Mambrino 5241, dam by Black Stranger, who obtained a pacing record of 2:22¼ at Tacoma, Washington Territory. has been sent by her new owner, to John A. Goldsmith, who will campaign her next season.

John Madden has sold, for $3 000, to Byron McClelland, the chestnut yearling filly On the Lea, by Onondaga, dam Bonnie Lee. Madden paid $500 for her last Spring, and in August last she won a three-eighths dash in 0:36½, and a quarter dash in 0:22¾.

Frenchmen have been swaggering a good deal of late over their Cambridgeshire victory. They should recollect that Alicante is by the defunct hero Hermit, while her dam Madiera is also English, running second to Petrarch for the Middle Park Plate in 1875.

Woodburn's great stallion Pat Malloy died on the farm at Spring Station, Ky., on the 7th. Pat Malloy was foaled in 1865 at Woodburn. He was by Lexington from Gloriana by American Eclipse. He was a fair race horse; as a sire, Favor was probably the best of his get.

The Klamath County Blooded Horse Association is to have a yearling trot in August 1891, for a purse of $250. The Lakeview Examiner hopes the horses owners and lovers of horses there will imitate the example of the sister counties and organize a racing association.

Managing Director Baldwin has been in town for several days rustling up entries for the Coronado Beach winter meeting, and speaks in enlogistic terms of their track, which is, he says, the equal of any in the State, while for winter work it cannot be surpassed.

John Mackey, the genial Rancho Del Paso superintendent, went down to Kern county this week to select a couple of hundred trotting geldings to be gentled and broken prior to sending East with the yearling trotters. Mr. Mackey expects to send about 350 head on in March.

Dr. Hall who came out with Salvator only tarried a couple of days at Sacramento as he had to return to New York to go to Montana with Marcus Daly's thoroughbreds. The Doctor whose first visit it was to Rancho Del Paso was greatly pleased with the great breeding farm.

Alcantara was awarded first prize at the New York Horse Show over Mambrino King, Prince Regent and others In the two year old stallion class Baron Rose by Stamboul out of Minnehaha, took first prize, Village Farm's Emblem second and the $24,100 colt Voodoo third prize.

Captain Machell's chestnut three-year-old colt Belmont by Beau Brummel from Jessica, ran second in the Cambridgeshire to Alicante, is said to have broken down. Belmont is reported to have been purchased after the Cambridgeshire for Marcus Daly, the Montana Copper Magnate.

Major R. G. Thomas, the well known proprietor of the renowned Kentucky farm Dixiana, has sold the historic home of thoroughbreds to J. S. Coxey, who will breed trotters there in future with Acolyte 2:21 at the head of the stud. Major Thomas will sell out his stock this fall or spring.

The late Wesley P. Balch has been closely connected with the trotter for twenty-five years, being at one time owner of Tom Rolfe, Brignoli 2:29¾ and others, while he bred Young Rolfe 2:21¼, sire of Nelson 2:10¾. Financial difficulties are said to have been the reason for the sad suicide.

The would-be record breakers have departed. Stamboul was taken up to Stockton early this week. and is expected to have another shy at the stallion record; the San Mateo Stock Farm's contingent have gone to the farm, and the others have cleared out, to make way for the thoroughbred brigade.

Capt Machell has for many years been regarded as the Machiavel of the English turf. He presides over one of the most aristocratic English racing stables (Bedford Lodge), but this last season the gallant Captain is said to have run in fifty-three consecutive races without catching the judge's eye.

The two year old filly Gardelia by imported Woodlands from Glidelia by Bonnie Scotland, died from putrid sore throat at Linden Park. The filly ran once unsuccessfully but showed great promise and would have been very valuable as a brood mare, when her racing days were over, and is a great loss to her owner Capt. W. M. Conner.

An English Turf authority says that the well known race horse Belmont, is reported to have been sold privately by Capt Machell to Lord Randolph Churchill. The purchase was, however, effected for Mr. Daly (Marcus Daly), the gentleman who bought Inverness, and Belmont will follow the two-year-old across the water.

A French syndicate of capitalists have secured the option until February 1, 1891, of purchasing Robert Steel's Cedar Park Farm near Germantown, Pa. Their intention is to build a large wooden mill at Pittsville, which will employ no less than 6,000 hands. The Reading railroad will build a branch to the property from Germantown.

W. McCormick who trained El Rio Rey in his two year old career, and last year had charge of Racine will take command of the Winters string on the first of next month. There are few if any, better trainers than McCormick and we hope he will be as successful with the Winters stable in 1891, as he was in 1889 when El Rio Rey was invincible.

Prince Soltykoff has refused a big price for Sheen from Lord Ellesmere. The Cesarwitch winner will go to the stud next season at Kremlin Park His success as a sire should be assured as he has both speed and endurance, while his sire Hampton has for some time past been earning $35,000 per annum. His dam Radiancy is by Tibthorpe from Meteor.

Ed. Corrigan figures at the head of the list of winning owners at West Side Park, Chicago. During the 120 days racing. Corrigan's stable won $16,300, but if taken as a stable the Hankin's Leigh, Kiley confederacy have beaten him for their combined winnings amount to $16,995. The association paid over to owners $250,000 including the entrance money.

A section has been inserted in the new constitution of Massachusetts, prohibiting all kinds of gaming. It closes up all pools rooms, and stops all buying and selling of pools on both running and trotting courses. This is certainly a very severe blow at the horse interest of the State, and one calculated to do the largest source of revenue the State has incalculable injury.

Little Brown Jug, one of the famous trio of pacers which old Tom Hal sired, was sold a few days ago at auction in Brooklin, to close a partnership. He was knocked down at $250, the only bid, but later was sold at private to parties in St John, N. B. Mr. L. Murch of Bangor, Me, who once owned him says he will give $100 for his tail when he turns his "toes up."

Salvator was moved to "the Bottom" last week and now occupies the next box to imported Sir Modred with Darebin on the outside Alongside the burly Australian and handsome shapely New Zealander, the "King of the track" looks a little leggy and tucked up, but when he has had a years rest he should let down and fill out into a grand stallion, for he is a racehorse all over.

When Mr. Nelson drove his namesake down by the colleges, Wednesday morning, says the Spirit of the Hub, the students happened to be just going into the chapel, and the cheer they set up for the horse and his owner made the former dance a little more daintily and the latter doff his hat. A useful lesson in enthusiasm may often be learned from college boys.

Records have been broken twice lately in high jumping. At the Chicago Horse Show, on the 5th, Filemaker, with 160 pounds up, beat the high jumping record of Roseberry, 135 pounds up, and with it the world's record. Filemaker cleared 7 feet 1¼ inches. Roseberry's record was 7 feet 1 inch. The next day Roseberry cleared the bar at 7 feet 1¾ inches, and regained his laurels.

Mr. John A. Morris' son, Hennen Morris, will succeed Mr. W. L. Powers as clerk of the scales at Morris Park next year. Racegoers will regret Mr Powers' retirement, as he was not only a very competent official, but his unfailing courtesy made him universally popular. It is said that young Mr. Morris is to take a very active part in the management of the property next season.

It is singular that with two such artists as Goldsmith and Marvin, the Bay District track could not be got into first class trim. One of our best known horsemen says the reason was that the track has never been cut up deep enough for several years, and consequently is too hard under the top dressing; the gentleman in question says a track should be cut up deep once every year.

An Eastern contemporary says: This has not been a good year for old Michigan horses. Hendryx has not won a race; neither has Junemont. Alcryon is said to be lame, is nearly blind from opthalmia, and is suspended from all National Association tracks. Gene Smith and Thornless have not been heard from, neither has Star Lily. But many fast youngsters have put in an appearance, and will keep up the reputation of the State for producing fast trotters.

The Maryland Jockey Club wound up its affairs on the 11th by selling its clubhouse. A year ago it refused $10,000 for the property, but the sum realized was only $5,200. Charles F. Pitt, Jr., bought it. All the noted horsemen of the country have been entertained in this clubhouse.

The Maryland Agricultural Society, Frank Brown, President, announces that it will give a series of running races in the Spring.

The English Racing Calendar, which appeared in October, besides containing a full report of the last meeting of the Jockey Club, includes the Alterations to Rules of Racing, and adds that the addition to rule 71 will not come into force until October, 1891. The addition reads: "No declaration of forfeit shall be fixed for races to be made for two year-olds, only between the second Tuesday in October, when they are yearlings, and the last Tuesday in March of the following year."

Twenty-seven hundred dollars has been subscribed, says the Independent, towards the formation of a company to build a race track at Glendive, Oregon, and the necessary preparatory work to perfect the organization is in the hands of a competent committee. Twenty-five hundred dollars is assured, and the necessary funds to any reasonable amount will be forthcoming as needed. Surveys of different locations are being made, but the committee will make haste slowly and find the best.

The Dawson County (Montana) Fair and Sales association elected the following officers at the last meeting: President, Henry Helms; vice president, Joel Gleason; secretary, Jas. G. Ramsey; treasurer, Henry Dion; directors, Peter Reynolds, J. B Kelly and S. E. Grindall. The old race track has been selected as the site and arrangements for a lease made. The necessary grading will be done this year unless the weather gets too bad. Three thousand dollars has been subscribed.

George Small has purchased for the Stewart Bros., Moscow, Idaho, the following thoroughbreds from Dr. Mills, Tillamook County, Oregon:

Bonnie Maggie, by imported Bonnie Scotland, dam Eva Shepherd by imp. Sovereign; Queen, by imported Billet, dam Bonnie Maggie; Bonnie Oaks by Nathan Oaks, dam Bonnie Queen; Lucy Long by Nathan Oaks, dam Queen; also the produce of these mares, six in number, by Glen Dudley. Three of them are 2-years-old, two yearlings, and one a weanling.

On Saturday, the 8th, a car load of thoroughbred horses, consisting of Hanover—Milton Young's $20,000 stallion, Inspector B., one of his sisters and three other well bred brood mares, arrived at Lexington. All of them save Hanover went to General Jackson's celebrated Belle Meade Farm in Tennessee. There also came with them the following thoroughbreds for Mr. August Belmont's Nursery Stud in Kentucky, Fides by The Ill Used; Leda by Kingfisher; Semiramis by St. Blaise; Belinda by Kingfisher, and Magnetic by The Ill Used.

Thoroughbred stallions at the New York Show were judged by J. H. Bradford, James R. Keene, J. G. K. Lawrence and Col. S. D Bruce; there were ten entries, six imported horses and four American bred. First prize was awarded to imp. Topgallant, a bay horse by Sterling from Seamark, the property of W. H. Fearing, and second to Bend Or, bay horse by imp. Buckden from Kate Walker, owned by A. J. Cassatt. The premiums for thoroughbred stallions, three years old or over, to be shown to halter or bridle were, first prize, $300, of which amount $100 was presented in plate by Dr. W. Seward Webb; second prize, $100.

A Lexington special says: The most sensational yearling colt yet to show in Kentucky is the chestnut Morrissey, by the Derby winner Fonso, out of May Kennedy, by Fanstus. She was a good race mare herself. A few days ago Morrissey ran a quarter, weight up, in 0:22½, and later surprised even his warmest admirers by doing three-eighths in 0;35½, which is the fastest time at that distance ever made by a yearling in Kentucky. This colt is a Futurity candidate, and is a grand individual in every respect. His owner, B. J. Treacy, now intends entering him in many of the biggest stakes East.

George Starr, Budd Doble's understudy, arrived here last Saturday evening with a car load of horses for California gentlemen. The horses included Mr. Valensin's new celebrated stallion Simmocolon and his highly bred Dictator mare in foal to King Rene; a Nutwood stallion for J. Brown, Los Angeles; C. L. Fair's new purchase J. H. Farley—a brother to Valissa 2:19 at three-years-old; a Red Wilkes stallion for Dr. Wise, Los Angeles, a yearling filly and colt for Hancock Johnson, Los Angeles, and three trotters, a mare and two geldings for J. H. Outhwaite, Los Angeles. Starr will leave for Kentucky next week with a car load of horses for Mr. Green and others, while Charles Reed's recent purchase, the thoroughbred horse imported Cheviot, will be sent on the same cars.

Since he was foaled, By Holly's mule has achieved more newspaper notoriety than almost any other animal of that peculiar breed, and he was bound to be sensational to the last, for one day in the latter part of last week, probably not having heard of Cannte's failure to stop the tide, he pranced down the railroad track at Vallejo, stepping over the ties with a pure, innate trotting gait—neither toe weight nor boot on, a kind of monarch of all he surveyed. Unfortunately a freight train imagined it was entitled to right of way, and the result was that the mule was picked up in fragments. "*De Mortuis nil nisi bonum*" should still hold good, let his pedigree die with him, and hope that his near relatives will not be tainted with the jackass blood which brought him to such an untimely end.

Charles Kerr, proprietor of the Antrim Stock Farm, Bakersfield, was in town several days last week. Mr. Kerr says that his yearlings are being broken and given a little work, but no fast work has been given them, as they show great promise, and he does not believe in hard work this early in the day. Harry Howard, who so successfully handled Hello and other race horses, is in charge of the runners. While Mr. Kerr was here, he made arrangements with Col. Thornton, who will next week send down to the Antrim Stock Farm a dozen brood mares and half a dozen weanlings, and next spring imported Mariner (Oatcake) will probably join the mares at Bakersfield. The arrangement should prove of great benefit to the Colonel's stock, for alfalfa grows luxuriantly, and Mr. Kerr will take the best care possible of them.

Speaking of John A. Goldsmith the Gazette says: "Goldsmith is at the top of the tree in the matter of driving trotters, both colts and aged performers, and he has got there by honest work. His brother James, who is as famous in the East as John is in the West, once said that, strange as it might seem, he never had any real fondness for horses. He was compelled by force of circumstances to be with them all his life, was taught their care by his father, and when he grew to man's estate there was obviously no one else so well fitted to drive the many trotters that came annually from the Walnut Grove farm. That was how James Goldsmith got into the trotting-horse business, and he has attained great eminence by putting into it the methods of a successful man in any line of work. John Goldsmith, on the contrary, was an enthusiast about horses from the time he was a toddler in short clothes, and when he was given a chance to mount a sulky he accepted it with avidity. John's success is the result of genius."

Whether the cold weather on Nov. 12th increased the disobedience of the jockeys at Linden or whether it disagreed with Mr. Caldwell's customary suave temperament will never be chronicled in history, says the Sporting World, but the fact remains that fines were inflicted with an extremely lavish hand. In the first race Clayton, Costello and Stevenson were mulcted of $10 apiece, and in the next event each one of the ten riders had their bank roll depleted of $10.

Of the four jockeys in the third race the sum total of fines stopped at H. Anderson, who forfeited $25 for carrying a pound and a half under weight on Raymond G. This fine was not imposed by Mr. Caldwell. In all $175 was collected from the various lads, of which amount Stevenson, Costello and Clayton contributed $20 each; C. Hill, A. Covington, Heuny, Lamie, Decker and W. Hill $10 each, and H. Anderson $35. Both Littlefield and Morris were relieved from active service for the remainder of the year, when it is to be hoped they will adorn the pigskin with renewed vim and vigor.

Sampson, the great grandsire of imported Messenger, was a horse of remarkable proportions. His dimensions as given by William Pick in his turf Register, Vol, I, page 24, were as follows:

"Sampson was fifteen hands two inches high. From the hair of the hoof to the middle of the pastern joint was four inches; from the fetlock joint to bend of the knee eleven inches, from bend of knee to elbow nineteen inches.

"The girth of his foreleg below the knee at the narrowest part was 8½ inches. The girth of his hind leg at the smallest part was nine inches. These measurements were taken by Lord Rockingham, his owner.

"Sampson was the largest boned blood horse that ever was bred, and the gentleman who communicated the above observes that he has tried a great number since, but has never found one to equal him." The work from which the above was taken was published in 1803, says the Record.

"Wilis Case, living about four miles north of Jonesville, lost one colt and had another badly injured last Friday by running against a barbed wire fence. The jugular vein of one of the colts was cut, and it bled to death." The above item from a State exchange is being repeated with slight variations in many others, says the Michigan Farmer. It is not too much to say that hundreds of colts in this State are each year severely injured by barbed wire, and their value largely reduced, or perhaps they are rendered entirely worthless. It is a big tax to pay for the use of a cheap fence. In a recent visit to Calhoun county, out of a dozen colts examined five were cut up with barbed wire. One had a deep cut in the breast, another had its forelegs all scarred up, and another was scarred from hock to ankle. The old horses soon got to know the danger of fooling around barbed wire, but colts could never be turned into a pasture fenced with it. It is cruel as well as costly. We know of a number of farmers who have paid from $40 to $50 for colts, and had them so badly scarred by barbed wire that it will be impossible to ever realize a fair price for them.

A writer gives the following example of hereditary ugliness: I once had a mare that did not kick or jump, nor was she cross; she was of a very nervous temperament, what is often termed "high strung." She fretted easily, and would soon tire herself out in the mud, or, when attached to an unusually heavy load, she was easily startled. Two of her foals have proved like her, but others have exhibited other bad qualities. One would run away if a rabbit jumped out of the hedge, another would kick at anything that approached it from behind, and kick until the harness or vehicle was broken. It is easy to trace these bad traits to the same supernervousness that characterized the dam. This mare would usually fly back when the hardest pull came, allowing the load to settle in the mud; she was too nervous to pull steadily and long, and one of her foals balks when put to a heavy load. I might multiply examples, but it will be better for the reader to get them from his own experience and observation, as he easily can. Almost every farmer can thus bring up abundant evidence that when the dam has had characteristics, the same or other bad characteristic, will appear in her offspring

Among the green trotters that appeared on the California Circuit this year, the four year old gelding Beaury Mc was right in the front rank and finished up at Sacramento with a record of 2:19¼. He was bred by Mr. McMullen in the San Joaquin Valley, and sold to Messrs. Williams, Union Island; he was by Nephew 1220, out of a mare used in a road team by Mr. McMullen, the team consisting of two mares, one by Alexander, the other by McClellan, and Mr. Williams mistook the two mares. Beauty Mc's dam is by Gen. McClellan 144 out of the thoroughbred mare Esperanza by Ringgold, etc.

A great improvement has been made of late years in having blankets cut to fit properly. There is still room for another improvment in order to have them fit more closely to the body and prevent them from becoming displaced, hanging off the quarters and getting torn. Our experience, says an esteemed writer, is that a couple of flank straps, buckled underneath the belly, is a great assistance to the surcingle in keeping the blanket in its place, and is an effectual prevention of tearing from the blankets getting underneath the hind feet. Horses that stand in the stable a great deal are apt to get sore on the back, from the constant pressure of a tightly buckled surcingle. This can be satisfactorily and effectually prevented, by using straps under the chest buckled in the same way as the flank straps. In fact we think the surcingles can be entirely dispensed with, if this much cheaper and equally satisfactory substitute be used.

Care should always be exercised in having blankets thoroughly dry, as a damp one is worse than useless, and they should be brushed, shaken and beaten occasionally in order to keep them clean.

At the horse show in New York the following gentlemen were selected to act as judges:

Thoroughbreds and Stallions for Getting Hunters—James R. Keene, J. G. K. Lawrence, J. H. Bradford and Col. S. D. Bruce.

Trotters and Roadsters—Dave Bonner, Col. William Edwards, W. B. Dickerman, Dean Sage and Charles H. Kerner.

Clydesdales, Normans and English Shires—George C. Clausen, E. F. Bowditch and John Hope.

Hackneys—W. Burdett-Coutts (afterwards declined) and Francis R. Rives.

Coaching Stallions and Brood Mares—August Belmont, A. J. Cassatt and Col. S. D. Bruce.

Carriage Horses and Cobs and Ponies in Harness—F. K Sturgis, J. R. Roosevelt, G. P. Wetmore and Fred Bronson.

Cobs and Ponies Under Saddle—H. L. Herbert, Thomas Hitchcock, Jr., and J. D Cheever.

Saddle and Police Horses—W. C. Gulliver, George C. Clausen and Colonel George E. Waring.

Hunters—Thomas Hitchcock, Jr., A. Belmont, Jr., John E. Cowdin, H. L Herbert and J. D. Cheever.

The English Jockey Club adopted a rule, at a recent meeting, that the contemplated reform club of Pierre Lorillard and the directors of racing associations East and West would do well to adopt and enforce in this country. The rule reads: "At every meeting advertised in the racing calendar one-half at least of the total amount guaranteed for prizes shall be apportioned to races of a mile and upward."

The subject of distance racing is especially apropos, now that the annual meeting of the Western Turf Congress is at hand, says the Republic. The Congress made a plucky stand against sprinting during the past year, but owners, especially Western owners, the majority of whom run the refuse of the great breeding establishments, refused to support the congress and conveyed their quarter horses to tracks outside the jurisdiction of the congress. Whether the congress will continue the fight is a question that can only be settled at the annual meeting.

The organization of the congress is the only attempt ever made in the West to correct some of the evils of the turf and harmonize the interests of the various jockey clubs. Its dissolution would be regretted by all honest lovers of the turf and would be followed by that go-as-you-please style of conducting affairs now prevalent in the East.

The following announcement is the result of Mr. Lorillard's dinner given recently to leading turfmen:

"After free discussion an agreement was arrived at by which the whole question was referred to a committee consisting of Mr. August Belmont, D. D. Withers, J. G. K. Lawrence. John Hunter, H. DeCourcey Forbes and Pierre Lorillard Jr. To these gentlemen the power was given to fill vacancies and add three members to their committee. A resolution was passed forming a jockey club of the gentlemen there present and such others as had been invited to the dinner, this club to have superior jurisdiction over everything governed by the Rules of Racing, and all cases to be referred to the jockey club for final adjudication.

"Since the date of the dinner the committee has had two meetings, and is now considering the basis to be assumed. The executive committee of the Coney Island Jockey Club has authorized Secretary J. G. K. Lawrence to commit the club to the movement so far as to give the new club authority to continue and execute the Rules of Racing—i. e., give it superior jurisdiction. In the future all entries to the Coney Island Jockey Club's events will be received on the understanding that the nominator is prepared to acknowledge the jurisdiction of the new club and abide by its interpretation of the Rules of Racing."

The new owner of Dixiana is, says the Kentucky Stock Farm, the proprietor of Coxey Stock Farm, Eminence, Ky., and the excellent stud of trotters he has there will be transferred to Dixiana about the first of next February. His brood mares include the fast pacer Emma 2:19¼, by Egbert, besides well bred mares by Blackwood, Almont, Hambletonian 10, Fearnaught, Jr, Onward, Hermes, Woodford, Abdallah, Tom Rogers, McGuire Horse, Almont Clay, Roland, Abdallah Eclipse, Grenadier, Redwood, Dr. Herr, Robert McGregor, etc. Mr. Coxey's premier stallion is Acolyte 2:21. He is by Onward 1411; first dam Lady Alice by Almont; second dam Lady Mambrino by Mambrino Chief; third dam by Grey Eagle. At five years he was the sire of Vatican, two year old record 2:28¾ and his best performers now, when he is six years old, include the following:

Vatican, three-year-old record	2:27¼
Promoter, two-year-old record	2:28
Position, two-year-old trial	2:28¼
Pilgrim, yearling trial (quarter)	0:37½

Mr. Coxey's object in buying Dixiana was to get closer to Lexington, this celebrated farm being located on the Russell Cave Pike, six miles north of the bluegrass capital. It is one of the best improved and most desirable farms for stock raising purposes in Kentucky, and Mr. Coxey is to be congratulated on having secured it.

The following yearlings belonging to the Avondale stable were tried at the West Side track on the 6th. J. J. Carter and J. M. Murphy acted as timers, while Sheridan Clark officiated as starter:

First Race—Three furlongs. Starters: Adalia, ch f, by Jils Johnson dam Ada, 125 pounds, Barnes up; Impress, b c, by Mr. Pickwick, dam Ida K, 120 pounds, Talbot up; Pierre, blk c, by Casino, dam Persis, 120 pounds, J. Steppe up. Adalia won by a head from Impress, Pierre two lengths off. Time, 0:36½.

Second Race—Three furlongs. Starters: Option, ch f, by Glengarry—Ophelia, 127, Overton up, and Koran, b f, by Mr. Pickwick—Kirk, 132, R. Williams, up. Option won in hand by two lengths. Time, 0:37¾.

Third Race—Three furlongs. Starters: Monte Vesi, ch f, by Forester—Mountain Range, 126, Barnes up, and Bracelet, ch f, by Mr. Pickwick—Bradamante, 127, Overton up. Monte Vesi won cleverly by a length. Time, 0:37.

Fourth Race—Three furlongs. Starters: Wicket, b f, by Miser—Wissahickon, 101, C. Harris up; Sumatra, b f, by Saxon—Sorranna, 120, J. Steppe up. Wicket won with ease by two lengths. Time, 0:36¾.

Fifth Race—Three furlongs. Starters: Wildflower, ch f, by Mr. Pickwick—Woodflower, 108, Conn up; Medallion, b f, by Mr. Pickwick—Mary Ann, 125, Talbot up. Wildflower won by a length. Time, 0:38½.

The showing is considered the best average ever made by yearlings belonging to one stable in the West, and all the winners, as well as several of the beaten ones, are Futurity candidates.

Judge Hunt dismissed a suit on November 10th, says 'The Miner', in which a bet on a horse race was involved. The judge thought the time of the court was too valuable to be wasted in such matters, and in rendering his decision said:

"There are about 400 civil matters to be disposed of. The court has been six weeks hearing criminal trials involving personal liberties. There are an infinite number of probate matters constantly requiring attention; there are wills to be heard and surrogate jurisdictions to be exercised; the judge must also devote some time to pinching the ears of coyote skins and signing bounty certificates under the law; there are also numerous insane patients to be tried before the juries the moment the unfortunate victim comes in; there is also the townsite matter, in which the court must hear petitions for deeds to portions of the townsite, of which the judge is the trustee. All these matters are proper and lawfully in the court and consume the entire time of a judge and there is no law which imposes upon the court the duty of deciding whether a race was or was not honestly run, and to hear a lot of witnesses as to the real speed of a losing horse. By common report a horse race in Montana is too often of unsavory notoriety to ask the courts to help parties collect bets made upon their queer results, and unless the supreme court otherwise lays down the law the district court declines to entertain this suit and will order the same dismissed. To sustain my opinion I quote Justice Blake in Hoyt vs Beatrice third Montana, where the supreme court of the territory quotes approvingly from Colorado these words; 'The courts of this territory have enough to do without devoting their time to the solution of questions arising out of idle bets made on dog and cock fights, horse races, the speed of ox trains, the construction of railroads, the number on a dice, or the character of a card that may be turned up. Let the suit be dismissed."

Referring to Messrs. Corrigan and Waldo's new course, the Chicago Interior Ocean says: "Work on the new race track southwest of the city, that in time will be known as the Chicago Jockey Club track, has been so energetically prosecuted recently that the main course is now two-thirds down, and by the end of this week Mr. Corrigan expects it to be completed. As the weather permits, the work of constructing the grand stand, club house, stables, fences, and other appurtenances will be carried on, and by next May the new course will be opened with a first class race meeting.

"The track is the regulation oval mile track. It is of much the same general contour as Washington Park course, and is from 65 to 85 feet wide. Inside of the main track is an exercising track, with a drainage ditch between the two. The training track will be as carefully constructed as the main course, but will be narrower.

"It is the intention to make the buildings and general appointments of the track equal to any in the West. The grand stand will be a double decker, with a seating capacity approximating 10,000. It will face slightly east of south, and with stone foundations, will be constructed of pine lumber supported by iron pillars and girders, and in all essential respects will be a first class piece of track construction. A covered saddling paddock and very extensive covered betting grounds will be especial features.

"Stables for 400 horses will be erected along the western boundary line. These will probably run in a continuous row. A series of large detached stables will be built along the river bank on the south side of the track. In facilities for housing and promoting the welfare of the horses, it is intended to make the new track a model."

The Chicago Horseman referring editorially to the American Horse Show says "We insist that in an American horse horse show English ideas and English fashions should be subordinated to American ideas and American usages. To a small proportion of the residents of New York and Chicago a young society man driving a stub-tailed plug in ridiculous harness, hitched to an absurd and lumbering English vehicle, with a placid and magnificent liveried footman impressively maintaining his dignity on the rear shelf, may be a beautiful and edifying spectacle, but we submit that the average American does not grow wildly enthusiastic over these things." And later on observes: "This year the trotters were scattered apparently all over the building and it was almost an impossibility to see and know just what the exhibit of harness horses was. The space should certainly be so apportioned that each variety or breed would be kept together. The average horseman has more pleasure in inspecting the horses at close range than from the boxes and galleries, and that pleasure is sadly marred when the particular group in which he is interested is scattered."

Having seen many English horse shows I can truthfully say that if the writer visited the Royal, Yorkshire, Islington, and other crack English shows he would find that the society man, footman, etc., mentioned in the first quotation would rarely be in the ring, while with regard to the latter paragraph referring to stabling horses in their respective classes. In all English horse shows he would find that this always done, every horse has a stall assigned to him according to the class he is entered in, and only where a horse is entered in several classes is he not to be found among his fellows. As a matter of fact there is probably no place in the world where a horse show is so ably and well managed as in England.

Base Ball and Athletic Department.

The California League

GAMES PLAYED AT HOME, OAKLAND, SACRAMENTO AND STOCKTON.

SAN FRANCISCO vs. SACRAMENTO.

FRIDAY, NOV. 14TH, 1890, AT OAKLAND.

There was a fair-sized attendance at Emery grounds who witnessed this jng-handled game. The Senators were still handicapped, Stapleton and Reitz not being able to play. John Patrick Cahill at short was a poor substitute for Reitz, and Hoffman, as a first baseman is not "in it" with Stapleton. Kilroy was their pitcher, and his curves were roughly used, fourteen good solid hits being secured. His support was very weak. Coughlin pitched excellent hall for the Friscos although the Sacramentos connected rather freely with him in the first inniug. Rube Levy made a most wonderful one hand running catch, which with the work of Stevens, Roberts, Goodenongh and McHale, constitnted the fielding features. The Friscos gained three runs in the first inning by errors only, and another three in the third by some tall hitting. Errors were responsible for the tally in the eighth, and a base on balls, errors of Cahill and Godar and the safe hits of Stevens, Hanley, Levy and Everett, accounts for their five runs in the ninth. The Senators scored one in the first on Levy's error of Goodenough's fly and Roberts triple. Errors by Hanley and Everett and a sacrifice gave them their second and last run in the third inning. The score:

SAN FRANCISCOS.	AB	R	BH	SB	PO	A	E
Shea, 2 b	5	1	1	0	2	0	0
Stevens, r f	6	1	2	0	1	0	0

Double plays—Coughlin, Speer and Ebright; McHale, Bowman, Godar, Daly and Hoffman. Time of game—1 hour and 50 minutes. Umpire—Al Foreman. Official scorer—J. W. Stapleton.

STOCKTON vs. OAKLAND.

FRIDAY, NOV. 14TH, 1890, AT STOCKTON.

The Stocktons had this game much their own way, hitting Carsey with ease, and were materially aseisted by the Oaklande errors, which occnred at most auspicious moments for the tail enders. Fndger pitched for the Gastowne doing fine work, Dooley and Sweeney being the only Colonels to do much with his curves. Dooley'e hitting was simply tremendous, that player getting a home run and two triples ont of four times up. There were several changes in the make up of both teams. McDonald was on the sick list, and Lohman played short, Dungan doing the back stop work in fine shape. Dooley was placed at third, Cobb in right and Stookwell who was released by Stockton guarded the initial for them. The tail enders were short a player also, and Hickenhotham, an amateur, played in right. Pete Meegan umpired giving general satisfaction. The score:

STOCKTONS.	AB	R	BH	SB	PO	A	E

SAN FRANCISCO vs. SACRAMENTO.

SATURDAY, NOV. 15th, 1890, AT SAN FRANCISCO.

The Sacramento—San Francisco last game of the season at the Haight St grounds was a decidedly poor one. Hoffman was their pitcher and he was hit harder than at any time during the season, the Nets piling up sixteen hits, four of which were donbles and triples. The Senatorial team wse again complete, Stapleton being on first and Reitz at short. The fielding work of the team was defective, several costly errors being made. Lookahaugh pitched fine steady hall for Frisco, keeping the few hits secured off him well scattered. His support was of a ragged character also. Shea was offered fonrteen chances at second, and slipped np on four of them. He with Ebright and Hanley led the hitting. The fielding features were Bowmans catching, and the infielding of Ebright, Everett, Reitz and Stapleton. The score:

SAN FRANCISCOS.	AB	R	BH	SB	PO	A	E

SAN FRANCISCO vs. STOCKTON.

SUNDAY, NOV. 16TH, 1890, AT SAN FRANCISCO.

Stockton had two games with Frisco on this day and the home team had no difficnlty in captnring both. The first one commenced at noon in the presence of some two thonsand persons. It was a decidedly poor game, the tail enders playing like a lot of farmers. The Friscos played with considerable dash and animation, working hard to augment their score in every inning and putting up a strong game in the field. Fudger pitched for Stookton and must be credited with doing good work in the face of the rotten support he received. But six well distributed hits were secured of his delivery. George Kelly, formerly of the Stocktons, played short for them, acquitting himself creditably. Four runs came in for the Mets in the first inning on a base on balls, errors by Pache, Kelly, Holliday and Wilson and Hanley's safe hit. They made two more in the sixth on Everett's scratch hit a passed ball, his steal of third, Speer'e base on balls, an error by Pache and Conghlin's safety to center. Two more came in in the ninth on Hanley's force hit, and Levy's clean home rnn drive. The Stocktons made their first run in the fifth. Selna hit safely, was advanced to second on Isaacson's error and scored on Holliday's safe drive. In the ninth they added two more. Wilson's hit to short was fumbled by Everett, and Kelly sacrificed him to second. Fogarty then hanged him ont a beautiful triple and ecored himself on a passed ball. The score:

SAN FRANCISCOS.	AB.	R.	BH.	SB.	PO.	A.	E.
Shea, 2b	4	1	0	0	1	2	0
Stevens, r f	4	1	0	0	2	0	0

SAN FRANCISCO vs. STOCKTON.

SUNDAY, NOV. 16TH, 1890, AT SAN FRANCISCO.

The second game, which was called twenty minutes after the conclusion of the first, was another miserable contest. The Stocktons piled up errors with the same frequency as the Friscos did hits, and the result was a score of 18 to 1. Chase was their pitcher for seven innings, during which he was hanged ont for eleven safe shots. Selna then took a turn in the box and created much amusement by his awkward movements and the ease with which the Friscos guaged his slow straight balls. Sammy Shaw, who signed to pitch the season out for the home team was in the points for them and distinguished himself by pitching one of his best games of the season. He was unusually steady and managed to keep the hits made off him well scattered. His support from Speer and the remainder of the team was very encouraging. A feature of the game was Kelly'e magnificent catch of Hanley'e hot liner in the first inning on which by a rapid throw to Wilson he completed a pretty double play. The Friscos scored two in the first, three in the second, seven in the fifth, three in the sixth and three in the ninth innings by combinations of hits, bases on balls and rank errors. Stocktons lonely run came in in the third inning on Hoffman's hit, a base on balls, a steal of third and Wilson's single to left. The score:

SACRAMENTO vs. OAKLAND.

SUNDAY, NOV. 16TH, 189?, AT SACRAMENTO.

The Senators easily defeated the Oaklands in their last game together for the season, at Sacramento last Sunday. Harper was in the box and though wild, pitched good ball. Carsey was hit somewhat harder, Goodenough, Bowman and Stapleton each securing some hard cracks off him. Willie Walter Veach played first for the Senators, but showed lack of practice. Godar was unable to play, and Hoffman took his place doing well. Roberts and Goodenough made splendid catches and Stapleton gusr'ed the initial in excellent style.

In the first inning Goodenough went to first on balls, stole second, and scored on Robinson's double. Roberts scored on Bowman's single and C. O'Neill's error, Bowman taking third on the error and scoring on Stapleton's single. In the third inning Roberts went to first on balls, to third on Bowman's double, and scored on Stapleton's sacrifice. Bowman scored on Daly's fly to Sweeney. In the fourth Dooley scored on a force hit, a passed ball and Lohman'e single. In the fifth Goodenough hit safely, and stole second and third. Roberts went to first on balls, stole second, and took third on Dungan's error, Goodenough scoring. Bowman reached first on balls, and scored with Roberts on Veach's error. In the last half Lohman led off with a donbls, and scored on O'Neill's triple. O'Neill scored on a throw to catch Veach at second. In the seventh Sweeney hit safe, stole second, and scored on Dooley's sacrifice and Reitz'e error. In the ninth Harper went to first on balls, third on Goodenough's double, and scored on Dungan's passed hall. Following is the score:

SAN FRANCISCO vs. STOCKTON.

MONDAY, NOV. 17TH, 1890, AT SAN FRANCISCO.

Stockton had one postponed game with San Francisco, and which these teams essayed to play off Mondsy before a small sudience. But it was a most villianous burlesque on the game, and totally disgnsted the few cranks scattered around the bleschers. The Stockton team was incomplete, having no pitcher or right fielder. Dick Belcher, a clever young amateur, was placed in right where he showed up well on fly balls. Two hard hit grounders, however, got away from him. Four of the Gastown players appeared at different intervals in the box, but each met with a terrific cannonading at the hands of the Friscos, excepting Chase, who pitched the two closing innings, allowing but one hit. Selna pitched the three first innings, during which ten runs and nine hits were made. Holliday worked the fourth when six safe shots and two errors were productive of seven runs. Armstrong took his

turn in the fifth, and he retired after two singles, a double and a triple with a sacrifice and an error gave the Mets five more tallies. Every player in the team changed their positions twice or three times. Coughlin pitched for the home teams and was touched out pretty freely. His support was very ordinary. John Sheridan umpired splendidly. Game was happily called at the end of the seventh inning. The score:

STOCKTON vs. OAKLAND.

SATURDAY, NOV. 15TH, 1890, AT STOCKTON.

Although the Stocktons had this game well in hand they lost it in the sixth inning through Chase's wildness. Cobb pitched great ball for Oakland, Fogarty, who made a single and a four cushion shot, being the only one in the team to touch him. The Colonels were short a player, and Walters, an amateur, was placed in right where he slipped upon two hard chances. The runs were made as follows: In the first inning Selna made second on Walters' muff, went to third on a sacrifice and scored on Lohman's error. In the second, Fogarty made a home run drive over the right fielder's head. Lohman also made a home run for Oakland in this inning. In the third the Colonels made two. Dungan who reached first on balls, scored on Dooley's two-bagger. Dooley crossed the rubber on a passed ball and Pache's error. In the fourth the Stocktons made four on Fogarty's hit, Chase's scratch, Selna's base on balls, Walters' error of Holliday's drive and Lohman's error. In the sixth the Stocktons lost the game. Cobb and Walters took first on balls, Walters being forced at second on Cantillion's grounder. Sweeney then flew to Wilson, making two out. Dungan and Dooley were sent to first on balls, which forced Cobb across the plate. Lohman then pushed a hit to short center scoring Cantillion and Dungan, and on Lohman being caught between bases, Dooley stole home. The score:

SAN FRANCISCO vs. OAKLAND.

THURSDAY, NOV. 20TH, 1890, AT SAN FRANCISCO.

The first game of the final series between the San Franciscos and Oaklands was a close and intensely exciting one. But a small crowd was present. Cobb and Shaw were the pitchers, with the honors considerably in favor of the Oakland, who twirls masterly ball. Shaw pitched a fairly good game, but was erratic at times. The Colonels had Carsey at first and Cooley at third, and were considerably weakened by the change. The hitting by both sides was rather light, McDonald doing the best stick work of the day. Frisco scored twice in the first inning on an error, a base on balls, a wild pitch and Ebrights double. The Oakland made a tally in the second on errors by Everett and Isaacson, a wild pitch and McDonald's timely single. In the seventh they made two more. McDonald again hit safely and Carsey took his base on balls. Cobbs drive to right scored McDonald, and Carsey scampered over the plate on Stevens poor throw. They added another brace in the eighth, on Sweeney's scratched hit, a balk, a steal, Dooley's single, a base on balls and a double steal. The Friscos made two in the ninth but lacked one of tying the score. Isaacson reached first on McDonald's poor throw, second on a passed ball and scored on Shaw's double. Stevens was hit by a pitched ball but was forced at second on Ebright's hit, the latter with Shaw advancing a base on a passed ball. Hanley's safe infield hit scored Shaw, but Ebright, in trying to make home also on the same ball, was caught at the plate by McDonald's throw to Lohman. The score:

San Francisco.	AB	R	BH	SB	PO	A	E

THE STANDING OF THE TEAMS.

This week ends the championship season of the California League, and the San Franciscos will most likely be winners. The Sacramentos have still a chance for honors, but it is a very slight one. Oakland plays three more games with 'Frisco (one to-day and two to-morrow), and the Sacramentos have the same number with Stockton. It will require the result of these games to settle the matter for a certainty, although everything looks favorable for the coveted pennant to fly from San Francisco.

THE RECORD:—(to November 17th, inclusive).

Clubs.	Oakland	Sacramento	San Francisco	Stockton	Games Won	Games Played	Percentage
Oakland	....	20	23	29	72	132	.545

Games Lost	60	57	54	93	....	....	....

Summary.	Played	Won	Lost	Percentage
San Francisco	132	78	54	.591
Sacramento	131	74	57	.564
Oakland	132	72	60	.545
Stockton	133	40	93	.300

Professional Pick-Ups.

The last day.

Next year will be a corker.

Carsey is quite a good first baseman.

Phil Knell looks in prime condition.

Holliday and Selna are to go to Denver.

Jerry Denny is wintering in Indianapolis.

Manager Finn is sick in bed with pneumonia.

The players are now all on the anxious bench.

Hyp Perrier now plays center for the Amateur Burlingtons.

The Tacoma Club has a United States Senator for its president.

Mike Kilroy is to spend a week hunting before returning East.

Otto Young is now pitching ball for an amateur team in Santa Ana.

Gagus' political position prevented his umpiring the last few games.

Cantillion is putting up great ball at the middle cushion just now.

Managers Robinson and Harris from their Los Angeles trip Thursday.

It is reported that Goodenough will play with an American Association team next season.

Peek a boo Veach played first base for the Colonels Sunday. Peek says "he's still in the ring."

Jerry Denny, Tom Brown and Ed. Morris are the only California ball players that have not returned.

Jack Sheridan was warmly received when he recommenced his official duties for the League in last Monday's game.

Jim McDonald will wear the Roederer Champagne gold medal for being the most popular player in the league.

It is reported that less than 1300 people saw the last championship game between Brooklyn and Louisville.

Of the Stockton team there are three players that will be in demand next season. They are Wilson, Fogarty and Fudger.

Joe Purcell, one of California's greatest pitchers, departed for the ecclesiastical seminary at Alleghany last Thursday morning.

O'Brien, Purcell, Shaefer, Kappell and McMahon won their suits against the Athletics. The club put in no defense.

James T. Kelly, the clever comedian now playing at the Tivoli Opera House was the manager of the Seattle ball team in 1888.

Jimmy Fogarty's team of all Californians open their series with the California league teams next Thursday (Thanksgiving Day) playing the Oaklands.

Billy Bowman is the latest member of the Senatorial team to be afflicted with the matrimonial fever. Billy is said to be engaged to a charming young and wealthy lady of Sacramento.

The few last games played by the Stockton team here were the worst ever seen in this city. Every game played by the California Amateur League this season was far superior to the Gastown's work in every respect.

Billy Nash, the celebrated third baseman of the Boston team is out here, not on matters of baseball, but to fulfill a matrimonial engagement contracted with an estimable "native daughter" while here last winter.

The Willamette Valley league of next season promises to be a strong organization. It will consist of six and possibly eight teams representing the following cities: Salem, Portland, Astoria, Vancouver, Albany and Oregon City, and maybe Eugene and McMinnville.

Pitcher Parrott, of the Portland (Oregon) Club, is credited with having made the shortest base hit on record. He batted the ball directly downward, and it remained stationary on the home plate. Before either the pitcher or catcher could field the ball he was safely on first.

From present indications it appears that the National League magnates made the mistake of thinking that the Player's League was so anxious for consolidation that they could demand anything. They have widened the breach, as they usually do, and consolidation seems further off than ever.—Pittsburg Commercial Gazette.

Manager Barnes of the Spokanes is at present in Montana negotiating with the Helena and Butte teams, relative to their admission to the North Pacific League. It is quite probable that Port Townsend and Victoria will also be admitted, which with the Montana cities and Spokane, Tacoma, Seattle and Portland teams would make a great league.

The Salem (Or.) Baseball Association has been incorporated with a paid in capital stock of $2,500, of which the following representative young business men of that city are the share holders: George Williams, Jay S. Smith, Ed. Lamport, J J. Dalrymple, Charles Reilly, T. Howard, W. S. Boggs, John Knight, Sherman Thompson and Charles Galberson.

Phil Knell loses no time when he comes home but jumps into a uniform and takes any vacant position (and there's always one waiting for him) in the Will & Finck amateur team, formerly the old Nationals. It was while pitching for this team that Phil attracted the favorable notice of Jim McDonald, the two shortly afterward constituting the famous Greenhood and Moran team battery in 1887.

Every season sees a better class of men entering the ranks of ball players. In former years, when the season was over, ball players, in a great majority of cases, idled away their time till spring came again. Nowadays ball players leave the diamond field to fill responsible positions in important business enterprises; they return to their college classes, and to various employments in which a considerable amount of intelligence and education is necessary.

A base-ball man says: "New York, Brooklyn, and Cincinnati, of the Players' League, will be members of the National League next year, together with consolidated clubs in Cleveland, Pittsburg, and Chicago, and the original league clubs in Boston and Philadelphia. By this arrangement the Players' League clubs in Boston and Philadelphia will be forced into the American Association with Baltimore, Washington, Columbus, St. Louis, Louisville and Indianapolis.

The New York Sun says: The reception tendered to the champions of the National League at the Grand Opera House, Brooklyn, last night by the citizens of Brooklyn, was an attractive and successful affair, and reflected great credit upon the veteran Lip Pike, who was intrusted a great deal with the management of the reception. The stage of the Opera House was decorated with the two champion flags won by the Brooklyn Club in 1889, while a member of the American Association, and this season's bunting emblematic of the National League.

Peter Browning seems to be enjoying himself in Louisville. This is the talk he is giving to the boys down there: "There ain't no telling how these games will come out," says Pete. "All the Brooklyns might get killed in a wreck and then the Louisvilles will have to win; not that I mean that's the only way Pete's old club could win. You see when Pete was here he wasn't nobody, and he had to go away from Kentucky to get recognition from the people. They didn't know Pete any more here. Now Pete comes back here, and every body calls him 'Mr. Browning.' and tell him he's as fine as silk. 'Cause why? 'Cause he led Brothers, Orr, Stovey and Connor and all them big batters, and got an average of .391, see? In 1882 and 1885 Pete was something here, but the papers pulled him down and the people called him 'Red Eye' and 'Distillery Pete,' and hadn't no respect for him. But when he got with good people he got to be good people himself."—Exchange.

The Amateurs.

The Amateur season is ended and the Santa Rosas are the Champions. Vallejo made a gallant struggle, but the lead of the Sonoma boys was too great for them to overcome. The Marines however stand a good second. The Reports at one time the leaders, kept on the down grade for the past two months, and have to be satisfied with third position. Although the new Burlingtons did a sight of winning since their accession to the league they required just one more game won to put them ahead of the Will & Fincks who are fourth. The Allens never got out of their hole and are the target carriers.

ARMY OFFICERS vs. BOHEMIANS.

Saturday, Nov. 15th, 1890, at the Presidio.

A team composed of the army officers stationed at the Presidio played an exciting game with members of the Bohemian Club last Sunday at the new Presidio grounds. The Bohemians were short three players, and a trio of privates were pressed into service who did fine work in the field. In the third inning the officers cracked out a victory, scoring seven runs by hard hitting. But six innings were played, game being then called on account of darkness. It is quite probable that a series of interesting games will take place at these grounds in the near future. The score:

Officers.	AB	R	BH	PO	A	E
Stevens, 2b	5	4	4	1	2	0
Gallup, l f	5	1	2	0	1	1
Merrillat, c	4	2	1	9	3	2

Totals	32	9	10	18	7	7

Earned runs—Bohemians 1. Officers 6. Home runs—Stevens 2; Williams 1. Two-base hits—Small, Pomroy, Morris, Merillat, Carroll. Base on errors—Officers 4. Base on balls—Bobemians 5; Officers 3. Left on bases—Bohemians 4; Officers 2. Struck out—By Small 2, by Ellis 9. Hit by pitcher—Erwin. Passed balls—Carroll 1, Merrillat 2 Wild pitches—Small 1, Ellis 1. Time of game—1 h. 50m. Umpires—Lieutenant Blunt and Dr. Brechemin.

VALLEJO vs. E. T. ALLENS.

Sunday, Nov. 16th, 1890, at Vallejo.

The last game of the season between the Allens and Vallejos took place last Sunday. It was one of the best of the season, the errors being few, while the hitting was sharp and strong. Baltz pitched another fine game, having great speed and command. He struck out eight of the Sports. Young Walcott was in the box for Ketler's team, and though hit for ten safe shots, he managed to keep them pretty well divided. The Marines took a lead of two runs in the second inning and by a costly, wild throw of Deane's in the sixth, which cleared the bases, they tacked on three more to their score, making five. The Allens scored but twice, one run coming in each the fourth and ninth innings. Billings and Farrell both did great work behind the bat, each throwing out three men at bases. The fielding features were Maguire's second base play, Evatt's work at short, and the outfielding of Cooney, Wise and Philpot. McGuire, Murdock, Stanford and Buckley led in hitting. The score:

E. T. Allens.	AB	R	BH	SB	PO	A	E
Broderick, 3 b	4	0	0	0	2	3	3
Evatt, s s	4	0	1	0	3	2	1

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
E. T. Allens	0	0	0	1	0	0	0	0	1	2
Vallejos	0	2	0	0	0	3	0	0	*	5

Earned runs—Vallejos 2. Two base hits—Stanford Wise, McGuire, Buckley. First base on errors—Allens 3, Vallejos 3. First base on called balls—Allens 3. Passed balls—Farrell 1. Double plays—Wise to McGuire, Kelly to McGuire to Smith; Evatt to Buckley. Sacrifice hits—Philpot, Farrell. Left on bases—Allens 8, Vallejos 3. Struck out—Baltz 8, Walcott 6. Time of game—2 hours.

E. & O. E. vs. SANTA CLARA COLLEGE.

Sunday, Nov. 16th, 1890, at Santa Clara.

The E & O E team, (which in full means errors and omissions expected) engaged in an exciting game with the Santa Clara College team at the latter's grounds last Sunday. Dick Belcher, the Amherst College player, pitched for five innings, but owing to an injury to his thumb he left the box in the fifth inning, George Campbell taking his place. Dave Levy of the Fincks caught both men in good style. Enright and Heffron constituted the college battery and did very effective work. The Santa Claras hit the ball heavily and frequently from the start, and to this is their victory attributable. Nealon, Knightly and Campbell did especially strong stick work. The E & O E's ran bases in a superior fashion, having no difficulty in purloining sixteen cushions. The fielding features were the infielding of Flannery, McElroy, Knightly, Pope and Belcher, Boyd's first base play and the work of McDerby and Woolrich in right field. The score:

Santa Clara College.	AB	R	BH	SB	PO	A	E
Flannery, 2b	4	2	2	3	2	2	0
Heffron, c	5	1	0	0	1	1	1
McElroy, 3b	5	2	2	1	2	4	1
Nealon, l f	5	3	4	1	0	0	1
Feklon, 1b	5	3	1	0	10	0	1
Knightly, s s	5	2	4	0	3	2	2
Conway, c f	5	1	2	0	1	0	0
Enright, p	5	2	0	4	4	2	0
McDerby, r f	4	0	0	0	1	0	0
Totals	43	16	15	9	24	11	6

E. & O. E's.	AB	R	BH	SB	PO	A	E
G C'mpb'll, p ss	6	3	3	2	0	1	0
Belcher, p & s s	5	1	1	1	3	2	1
Levy, c	5	0	1	2	5	0	1
J. Campbell, 3b	5	3	1	2	3	1	1
Woolrich, r f	5	1	0	3	1	1	0
Boyd, 1b	5	2	1	2	10	0	0
Pope, 2b	5	1	0	1	4	2	0
Ewing, c f	5	1	1	1	1	0	0
Wilde, l f	5	1	1	2	0	0	0
Totals	46	13	9	16	27	6	4

Earned runs—College 6, San Franciscos 3. Three-base hits—Belcher and Knightly. Two-base hits—Knigbtly 2, Ewing and Conway. Struck out—By Campbell 3, by Belcher 5, by Enright 8. Passed balls—Levy 1, Heffron 3. Wild pitches—Campbell 1, Enright 1. Umpire—Quiney. Scorers—Smith and Barrett. Time of game—2 hours, 10 minutes.

SANTA ROSA vs. BURLINGTON ROUTE.

Sunday, Nov. 6th, 1890, at Santa Rosa.

The Sonoma boys batted Rohan hard, winning easily by a score of 13 to 6. This was their last game of the season, and the Santa Rosas are now the undisputed champions of the Amateur League. Callen pitched fine ball and was splendidly supported. Wilds also caught Rohan in fine shape. The features of the game were the home run drive to the center field fence by Gimmel, and the hard hitting of Scooney, Mulvey, Hulen, Pace, and the fielding of Mulvey in right and Arlett at short. The score:

Santa Rosa, 13; Burlingtons, 6. Earned run—Santa Rosas 1. First base on errors—Santa Rosa 7, Burlingtons 6. First base on called balls—Off Callen 2, off Rohan 3. Home run—Gimmel. Two base hits—Pace, Traynor. Sacrifice hits—Cook, Callen, Wilds, Rohan, Scooney, Gimmel. Struck out—By Rohan 6, by Callen 4. Base hits—Off Callen 8, off Rohan 12. Passed ball—Wilds. Batteries—Callen and Pace for Santa Rosa, Rohan and Wilds for Burlington. Umpire—Al Foreman.

Amateur Short Hits.

Champs—Santa Rosas.

Vallejo finished second.

The Reports hold third place.

Pace is Santa Rosas heaviest hitter.

Billy Gimmel got in a great home run Sunday.

The Young Giants had to be satisfied with rank 4.

The Burlingtons were close on to the Giants, but kept station five.

While the Allens bring up in the rear of the procession, carrying the target.

Al Scooney handles thrown balls with the grace and precision of a veteran.

The Allens and Burlingtons will play to morrow at 11 A. M. at Haight street.

Arlett took Josh Reilly's place at short last Sunday, and played the position well.

Frank Mulvey played great ball in right for the Railroaders Sunday, making four clever put outs and two assists.

Billy Cooney, although batting hard, is not hitting as safely as heretofore. The fielders all play deep for him and as a consequence he is credited with fewer long hits.

The Reports defeated the Will & Fincks in an eight inning game last Sunday morning at the Haight street grounds by a score of 6 to 5. No official tabulated score of the game was kept.

The amateur season just past has developed some very promising "young blood" talent that the magnates would do well to keep their eyes on. While many might appear weak in certain departments, there are others that possess the requisite qualifications that entitles them to a chance with the big leaguers. Santa Rosa can show up at least five good men in their respective positions. They are Gimmel, the left fielder, Reilly, Hulen and Scooney infielders, and catcher Pace. All these men are hard hitters, fine fast base runners and exceptional men in their positions. The Will & Fincks can put forward Charley Tillson, their short stop, who in that position covers as much ground as any man in the league, is a reliable fielder and accurate thrower, a rapid and successful base runner, a very fair hitter and withal a brainey player. Frank Delmas and Joe Leveque, also men of recognized ability of the same team, have already secured engagements with the Salem (Or.) team for next season, and Dave Levy, the catcher, will undoubtedly have a professional berth also. With the team that went to Honolulu were two aspiring players who give promise of holding their end up with California League members. They are George Sharp, the fielder, and Dave Creamer, second baseman, both of whom are hard, earnest and active players. The E T. Allen's first baseman, Tom Buckley, is a player well and favorably known on the California diamond and has few superiors to-day in the league. It is scarcely probable that he will be overlooked when the time for making up the teams comes along.

Billy Kennedy is also a very promising infielder, but lacks experience. Another year in the amateur league will make him eligible for professional consideration. The Burlington team has several good, strong players, among whom is a pitcher who is capable of doing excellent work, and his name is Jack Roban. Strand, Kelly, Mulvey and Traynor, of the same team, with practice, might give evidence of possessing considerable merit. With the Vallejo team is Baltz, the pitcher, and his battery mate Farrell, who have accomplished wonders together this season, and one or both of them might be found to be valuable acquisitions. Altogether there are enough good, young, ambitious players in this league to fill in and do efficient service for the big teams next season.

The Situation in the East.

The Views of George Dickinson, of the New York World, on the Subject.

"The Players' League has been thrown down. As far as it is possible to place the responsibility it rests with Edward B. Talcott, of this city, and Albert L. Johnson of Cleveland. There may be some extenuating circumstances which will in a measure relieve these gentlemen from the onus of the ignominious surrender which the new league has been forced to make, but at this writing they are not known.

"It is barely possible that a few of the Players' League Clubs will continue next season in another organization, but the future of the clubs so ruthlessly deceived—Boston and Philadelphia—rests with the old magnates. While most of the old players who left the old League at the close of the season of 1889 have remained true, although tempted by large offers to desert the Players' League, several of the capitalists have at a crucial moment been found to be what they were inelegantly but aptly described by Captain Charles Comiskey—confidence men. For a year they avowed that there sole object was to do away with the iniquitous practices of the National League in dealing with players.

"Notwithstanding the fact that during the season just closed they lost in the aggregate less than one-fifth of the money sunk by the old league, some of them showed their hypocrisy by opening a line of negotiations with the National League that was sure to result disastrously to their business partners. This was done at a time when the Players' League had the advantage position in the baseball fight Readers of the World are thoroughly acquainted with the events that have happened since the first conference between the two leagues reported exclusively in this newspaper October 9th.

As the situation looked last night, the New York Players' and the National League Clubs have consolidated on a fifty per cent. basis, the club to play hereafter at Brotherhood Park, the capital stock to be $200,000. The Brooklyn Clubs have consolidated on the same basis, the capital stock to be $80,000, the club to play next year at Washington Park and thereafter at Eastern Park. The Pittsburg Clubs have also consolidated on a fifty per cent. basis, the club to play at Exposition Park, with the hero of the National League, J. Palmer O'Neill, as President.

John Addison has sold or will sell the Chicago Players' League Club to A. G. Spalding for a sum between $15,000 and $25,000. This leaves the Boston, Philadelphia and Cleveland Clubs of the Players' League out, where the bleak November winds blow through their whiskers. The first named clubs deserve a better fate."

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS,

SUMMARY.

The majority of the out-door men are in fine condition and some splendid contests will be witnessed on Thanksgiving Day. Last Sunday the members of the Olympic and Alpine Clubs visited their training grounds and spent the greater portion of the day in practicing, starting and sprinting. The grand wrestling tournament which will begin at the Olympic Club rooms on Thursday evening, January 22, 1891, promises to be a big success.

THE WHEELMEN.

A meeting of the American Bicycle Club was held at 2517 Sutter St., on Monday evening last. Several important matters were discussed, and it was decided to hold regular club runs from now on.

The programmes issued by the Alameda Bicycle Club on the occasion of its first invitation ball were exceedingly neat and artistic.

Mr. Little, former President of the Los Angeles Wheelmen, is now occupying the position of the Assistant Floor Manager at the Olympian Club Rink in the Mechanic's Pavilion.

C. Dietle Jr. has become a member of the Bay City Wheelmen.

The Manager of the Olympian Club Rink is thinking about getting up a series of bicycle vs. skates races. Several members of the Bay City Wheelmen and Alameda Bicycle Club would enter the contests, which would prove highly interesting.

According to a new ordinance which went into effect a couple af weeks ago, bicycle riders who visit the Golden Gate Park after dark must have lamps attached to their wheels.

About twenty members of the Bay City wheelmen enjoyed a run to the Olympian Club Rink on Thursday evening of last week. The boys looked very neat in their handsome costumes, and some of them who are expert skaters made quite an impression on the large crowd of people who were present.

Frank Browning and C. N. Langton gave a fine exhibition of fancy and fast skating.

F. W. Pierson, the former Secretary of the Bay City Wheelmen, has taken to his wheel again.

A. C. McKenney, vice-Consul Cal. Division L. A. W. and former President of the Garden City Wheelmen, of San Jose, Cal., has joined the B. C. W.

The Alameda Club boys are thoroughly enjoying themselves. Several parties and club runs are on the list for the near future.

Two of the boys, Will Hebbard and Charley Culver, made their usual Sunday evening trip to San Leandro on Sunday last. Culver was so interested in something sweet that his girl had just whispered in his ear at parting that he forgot that he had a wheel under him. Result—a narrow escape from a sudden death; sore bones; a badly lacerated hand and divers bruises all over his handsome phiz.

The new skating rink is well patronized by the local riders. As a general rule the wheelmen make fine skaters on account of being familiar with the laws governing gravitation.

THE GAME OF CRICKET.

Cricket is gaining in public favor, and the weekly matches are now watched with interest by large crowds of people.

Last Saturday forenoon a match game between the Pacific Club and a team from the English man of war. The Warspite was played at the West End grounds, Alameda. The local team made a better showing than usual but nevertheless the invaders won the game. Sir Robert Arbuthnot did some fine batting for the sailors, his total score being 38. C. E Howell made 37 runs for the Pacific. The umpires were William Robertson and J. Webster. John Theobald was Captain of the Pacific team while Sir Robert Arbuthnot acted in the same capacity for the Warspite men. The following is a summary of the game:—

A meeting of the Alameda Cricket Club was held last evening.

THE AMATEUR WRESTLING TOURNAMENT.

The members of the Olympic Club will be treated to another athletic feast on January next; this time the sport will be in the shape of wrestling. If the entries for the late boxing tournament were few, there is no cause to fear but that the number of entries for the coming wrestling tournament will be very large. The wrestlers are not quite as particular as the boxers, and all the best men on the Pacific Coast will contest for the championships. The following circular has just been issued in conjunction with the tournament:

The Annual Amateur Wrestling Tournament, catch-as-catch-can style, for the championship of the Pacific Coast, for 1891. Commencing Thursday evening, January 22, 1891, to be held in the rooms of the Olympic Club, 120 O'Farrell St., San Francisco, Cal.

Governed by the Pacific Coast Amateur Athletic Association rules, and approved by the Amateur Athletic Union of the United States.

Open only to members of Clubs, and members of Juvenile classes of Clubs, belonging to the Pacific Coast A A A and approved Associations.

Entry blanks, when properly filled out and accompanied by an entrance fee of $1, will be received through the Secretaries of associated clubs, at the office of the Olympic Club, up to and including Thursday evening, Jan. 15th, at 10 o'clock, at which hour the entries close. Entrance fee to be returned to actual competitors.

Entries will be divided as follows: Bantam, not exceeding 115 lbs; Feather, not exceeding 125 lbs; Light, not exceeding 140 lbs; Middle, not exceeding 158 lbs; Heavy, any weight.

Competitors have privilege of entering any class in which they can qualify as to weight.

Gold Medals to winners of first and second places in each class, provided, however, that three or more contest in each class.

In the event of less than three contestants in any class, First Medal only will be awarded.

Each bona fide competitor will be provided with three tickets of admission, which will include two tickets for seconds, who must positively belong to an associated club.

A. C. FORSYTH, Acting Sec'y.

San Francisco, Nov. 14, 1890.

The following rules shall govern the tournament:—

1—Competitors shall weigh in on the evening of commencement of the Tournament (at some hour to be fixed by the Board of Directors), and shall have the privilege of weighing stripped.

2—Competitors shall wrestle in slippers, shoes (without heels), or stocking feet, and shall have their finger nails trimmed short, subject to the approval of the referee.

3—The wrestling pad shall not be less than twenty (20) feet square, and nobody shall be allowed upon the pad except the contestants and the referee.

4—Competitors shall be allowed one second. Said second shall not be allowed to speak to or interfere with the contestants while wrestling; should a second infringe upon this rule, the referee warn said second once, and should he continue, the referee shall have the second removed from the hall. Positively no professionals shall be allowed to act as seconds.

5—The Board of Directors shall appoint a referee and two judges. The referee shall appoint two timekeepers. The decision of the referee shall be final.

6—Choke locks are barred. One arm around the neck is allowed, but using one arm around the throat, and barring with the other arm, in such a manner as to prevent breathing, is considered a choke lock. Whoever resorts to this hold shall lose one fall for the first offense, and upon a repetition he shall forfeit his place in the Tournament.

7—Greasing the body, butting, pulling the hair, biting, gouging, digging fingers in the flesh, clutching by the throat are all fouls, and whoever does any of these shall lose one fall.

8—Accidental fouls shall call for cautions from the referee, and if repeated, the referee shall have the power to declare a fall against the party fouling.

9—Preliminary bouts shall be of one fall. Final bouts shall be best two out of three falls. Where a competitor draws a bye, such competitor shall be bound to wrestle such bye, and with such opponent as the judges of such competition may approve. If such opponent be chosen from among the previously defeated competitors in the class, and he shall be adjudged the winner of the bye, he shall be reinstated and eligible for further contests.

10—Preliminary bouts shall be of twenty (20) minutes duration, and in case a fall is not secured in that time, the contestant that does the most work in said twenty (20) minutes shall be declared winner of the bout. In final bouts the contestants shall wrestle fifteen (15) minutes, and if a fall is not secured in that time, the man who does the most work in said fifteen (15) minutes shall be declared winner of the bout. In case the judges and referee are not able to decide who has done the most work in a bout which has not resulted in a fall, the referee shall allow a rest of three (3) minutes, and shall then continue the contest for ten (10) minutes, and shall be governed as above. Between falls in the finals, ten (10) minutes rest shall be allowed.

11—Both shoulders of the competitor fairly touching the wrestling pad at the same moment of time, and *actually seen by the referee*, shall constitute a fall, whether resulting from a "flying fall" or otherwise.

12—A fall cannot occur if any portion of the person of either competitor extends beyond the exterior limits of the wrestling pad at any time during the bout, and both the competitors do not fully recover the wrestling pad within ten seconds, the referee shall order them to the center of the wrestling pad, and to resume wrestling without regard to the hold or situation thus disturbed.

13—The duties of the referee and judges shall be limited to the conduct of the contests, and shall not in any way extend to the conduct of the Tournament.

14—Contestants having entered for any one class may extend their entry to any other class in advance of their own.

15—The referee shall be empowered to dismiss contestants who, by shirking work, exhibit the fact that they have arrived at an understanding as to the result of the contest—with an agreement to take first and second places without actual contest.

16—In the event of any question arising, not provided for in these rules, the referee shall have full power to decide such question or interpretation of rule.

17—In order that these competitions may be conducted in an orderly manner, it is suggested that the referee should request all persons present to refrain, while a competition is in progress, from any loud expression or demonstration.

CLUB JOTTINGS.

The California Club test case has been decided in favor of the defendants, and pugilism will once more predominate in San Francisco. This is a splendid illustration of money and influence triumphing over virtue.

The coming "Ladies' Night" exhibitions to be given by the Olympic Club promise to be very interesting.

The Alpine Club should make an effort to hold some kind of an entertainment soon. It is now some months since any exhibition was given for the benefit of the indoor members. The club will be a year old next month, and the boys should celebrate the occasion in good style.

RUNNERS, WALKERS, JUMPERS, ETC.

The Alpine Club sprinters took their customary exercise at the Bay District Track last Sunday morning.

Bishop ran one mile in 5:27.

Charley Armbruster made a "hundred" in 11 seconds.

Next Sunday forenoon the Alpine boys will have a one mile handicap run at the Bay District Track. Three prizes will be given the winners. Casidy will be on scratch and his friends will have a good chance to see how he will stand with Cooley on Thursday next in the Olympic Club games.

Professor Zelner of the Olympic Club is a constant visitor at the Olympic Club Rink. He is a very fast as well as graceful skater.

Harry C. Casidy of the Alpine Club is quite a favorite with the ladies of San Leandro. He is generally the lion at all the balls and parties that are given up that way.

The Olympic Club boys were out in full force at their new grounds on Sunday.

Champion Schifferstein acted as starter, and he gave a good many pointers to the new men.

President W. Greer Harrison was also present at the grounds, and he was highly pleased to find so many of the athletes exercising.

There was no regular contest, but several impromptu races were run off. Nearly all the men showed up in good form, and outside athletes will find it a hard job trying to win some of the medals on Thanksgiving Day.

It is too bad that Jim Jarvis cannot spare time to train for a walk on Thursday next. Jarvis has never seen Baird make any of his fast records, and there would be much joy if the two happened to come together in a race. Baird, it is thought, will not enter any more walking races on the coast. He will possibly wait until he strikes a town where the sports admire his style of progression.

The Eureka Turn Verein Hall on Powell Street is being renovated, and will not be used for athletic purposes any more

It is almost a certainty that the Olympic Club will win first place at the championship meeting in 1891. The University Athletic Club has lost some of its best men, and the Alpine Club will stand a good show for second place. Moffet of the U. C. will be missed in the high and long jumps and in the hurdle races. He is going East.

Last week we asked the sporting-writer of an evening paper to name some man who was better adapted for the position of official handicapper than Captain Walter A. Scott of the Olympic Club. The sporting journalist in question failed to comply with our request. The attempt he made to nominate a more efficient man than Mr. Scott was to say, the least brave, but the heroism displayed was not of the kind that generally receives applause.

The BREEDER AND SPORTSMAN is not at all prejudiced, and when we do back at a man, it is because he is worthy of our support. If we thought there were any other athlete more competent to fill the position than Captain Scott, we certainly should have suggested his name. Our contemporary mentioned the names of C. B. Hill, J. J. Theobald and Peter McIntyre as suitable candidates. Mr. Hill was once a very good walker. His spare time now he puts in at the game of cricket. Mr. Theobald is also a cricketer, and he gives all his spare time to that pastime. What qualification has either man to recommend him for the position of handicapper?

A handicapper should always be around where the athletes train, and unless he closely watches their movements, it would be ridiculous to suppose that he could make a fine job of his work. Sometimes an athlete will improve wonderfully in a month, and if he is handicapped on his last performance, a genuine surprise would be in store for all who were interested in his event. As neither Mr. Hill or Mr. Theobald do not closely watch the movements of the runners, *how* can either gentleman be qualified to fill the bill? True, a handicapper might sit at his desk and, with the aid of simple addition, frame his handicaps. He could add or deduct just as the previous performances called for, but in order to do the thing in good shape, a man should be able to discriminate, *i. e.*, to change their past records and put them further back. He cannot do this conscientiously without first having had an opportunity to watch their practice spins. As to Peter McIntyre, we can only say that it would look better to have an amateur to handicap amateurs. We believe such is the custom. That Mr. McIntyre is capable of filling the position we do not doubt, but he is a professional. We could name dozens of amateurs who would make good handicappers, J. D. Garrison, of the Alpine Club, for instance; but as we stated last week, Capt. Scott is a good man. He is constantly around amongst the athletes, and he has a fair knowledge of what each man is doing. The ridiculous assertion that he has not made a good president of the P. C. A. A. A., we will not attempt to criticise. Those who are posted in athletes will understand that the statement was made through prejudice.

I have long used Simmon's Liver Regulator for my horses, cows, sheep and chickens. To my horses I give a teaspoonful of the powder in a mash three times a week. I find it invaluable for Cough, Hide-bound or Pneumonia. Giving it to my game chickens for Cholera, I have not lost one in the last five years. I make this statement that mankind may know Simmon's Liver Regulator as a valuable remedy for the ills of man and beast.—T. G. Bacon, Edgefield, S. C.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, 177—179 BROADWAY.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff

San Francisco, Saturday, Nov. 22, 1890.

Death of Alf. Estill.

Word was received in this city on last Thursday night of the death of ex-sheriff Alf. Estill of Sacramento, he having departed this life at Reno, where he was engaged with Theo. Winters, Esq. Uncle Alf. was well known on the race track throughout California and also in the East, and for the last two years he has acted as superintendent and manager for the racing stable of Mr. Winters.

Mr. Estill was a well known man throughout the State, he having occupied many prominent positions of trust, the first one being with his uncle, Gen, Estill, who early in the 50's had an extensive state prison contract. The deceased lived in Solona County for a number of years, where he acted as Chief Deputy under Paul Shirley, the sheriff of the county. In 1858 Thos. Findley of Nevada, who was then State Treasurer, appointed Mr. Estill his chief deputy. He afterwards was in the Surveyor General's office, which he left to go over into Nevada with the late Jno. D. Winters. Returning sometime afterward to Sacramento he held various positions in the county court house. In 1882 he was elected sheriff of the county.

Alf. Estill was a native of Tennessee, and it is claimed by his friends that he was sixty-four years old at his death. He was the perfect type of a southern gentleman, and was greatly loved by all who had the honor of his acquaintance. For many years his face has been a familiar one at all the prominent turf events throughout this State, and as his memory was of the very best, it was always a source of gratification for any of the old timers to sit down and have Uncle Alf. recite the memorable races of years gone by.

For old friendship's sake, Mr. Winters provided for the last sad rites over the departed, as there were no relatives to take charge of the remains. Poor Uncle Alf., always a bright spirit, generous and cheerful, we shall sadly miss his kindly face when next we visit the State Capitol.

Our Eastern Visitors.

It is with no usual degree of pleasure that we welcome to the State Dr. Q. Van Hummell and Mr. J. H. Watson on their visit in the interests of the splendid and royal sport of coursing. These gentlemen are thoroughly interested in the breeding of the greyhound, and by their action in coming so far to participate in the coursing meet at Merced, they have shown an unusual interest, which all sportsmen will appreciate. Both of these men are thorough gentlemen, and it is to be regretted that their stock, which contains some of the finest blood known to the greyhound fanciers of the world, were from some unaccountable reason, left in the contest for first honors.

Their defeat is probably due to the change of climate, which time alone will remedy. In any event it cannot be attributed to any lack of good breeding in the dogs presented by them. We trust that these gentlemen may on returning to their homes, carry with them such an impression of the fairness and good fellowship of the sportsmen of the coast as will not only insure their return on frequent future occasions, but that others like them may be induced to pay us a visit.

The Pacific Coast Blood Horse Association.

As is probably well known to a large majority of our readers, that the annual fall meeting of the Pacific Coast Blood Horse Association commences to-day; and from the programme which has been arranged, everything warrants the assertion that sport of the very best kind may be expected during the four days' racing. From its inception this Asssociation has always been liberally patronized by the turf going public, who have turned out in large numbers to show approbation for its well conducted meetings. In the character of races advertised, it would be exceedingly difficult to arrange any better field of horses than can be found in the hand book, which has been issued to the public so that one and all might easily understand the ages, colors, pedigrees and owners of all the thoroughbreds that will take part. The annual spring and fall meetings have usually been looked upon as society events, and it is fair to assume that during the coming meeting, with favorable weather, the four hundred of San Francisco will grace the Bay District Track with their presence.

The cards for the opening day show four events, and why they should not prove close and exciting is a hard guess to make. The Introduction Purse of $400 has fourteen probable starters, which may, however, be cut down when the declarations become due,

The Ladies' Stakes are for two year olds, foals of 1888, with an entrance fee of $50 each, the Association adding $400 to the amount paid in. In this event there are still twenty-one entries left, of which several are of high enough quality to successfully compete with anything on the Eastern tracks. Purse No. 3 is also for two year olds, the distance being three-quarters of a mile; and in this race there are seven probable starters, among the number being the well known colt, Sinfax.

The last event of the opening day is entitled the November Stakes, the distauce being one mile and a quarter, and in this there are six entries, all of them so equally matched that it should result in a determined struggle for supremacy.

On the following Tuesday, Thursday and Saturday the meeting will continue, and there is no reason to believe but what the Blood Horse Association will receive as great an amount of patronage as they have in days agone.

The Hollywood Trotting Stock.

It is probably unnecessary to say to the readers of the BREEDER AND SPORTSMAN that the Hollywood Stock Farm is owned by the old veteran, Mr. B. C. Holly of Vallejo, California. Owing to ill health and imperative orders from physicians, the entire plant will be disposed of at public auction on Wednesday, January 7th, commencing at 10.30 o'clock. The Hollywood Farm is situated three miles from Vallejo on the Napa road, the stopping place being called Flosden, and on that day all the trains will stop there for the purpose of allowing visitors easy access to the place of vendue. The stock, a synopsis of which is given in our advertising columns this week, will amply repay perusal by any and all interested in first-class horses. Stallions, brood mares, fillies and colts, including many well known and prominent turf and track celebrities are catalogued, and enough is stated in the synopsis to enable the veriest tyro to thoroughly appreciate the fact that Mr. Holly offers for sale some of the best bred stock which has ever been offered in this State at public auction. Among the well known sires which are represented we find the names of Electioneer, Kentucky Prince, Alcazar, Sidney, Woodnut, Abdallah Wilkes, Albert W. Stamboul, Geo. M. Patchen, Jr., Echo, Mountain Boy, Mount Vernon and others too numerous to mention. Many of the dams are producers, and it will be a very fastidious personage, who will not be able to find something suited to his favorite theory of breeding. It is greatly to be regretted that Mr. Holly has to leave the ranks of the breeding fraternity in this State, as he has been prominently connected with both the trotters and thoroughbreds for many years, but asthma has taken such a firm and permanent hold on the old turfman that his lease of life is really in danger by remaining any longer in the low lands, and hereafter he will become a resident of either Montana or Colorado, where the mountainous air will no doubt be very beneficial to him.

There are also certain terms of credit mentioned in the advertisement, which it would be well for all prospective buyers to read carefully, so that advantage may be taken of the conditions, if such a course is deemed necessary. Full catalogues of the entire stock to be sold will be ready about the 1st of December, and will be sent, when application is made to B. C. Holly, Vallejo, California.

Stamboul 2:11 1-4.

Mr. Goldsmith was not satisfied with the exhibition of speed shown by Stamboul at the Bay District Track, and made no secret of telling his friends that he was satisfied that the great horse could beat his record of 2:11½ if he could strike a favorable track aud a favorable day. Knowing that the Stockton Association had announced a trotting meeting of several days for record purposes mainly, Stamboul was immediately shipped to Stockton after the finish of the Breeders' Meeting in this city, and yesterday afternoon the evening papers announced the fact that Stamboul had trotted a mile in 2:11¼. About an hour and a half afterwards a message was received from Jno. A. Goldsmith, the telegram reading: "Stamboul two seven and a quarter," which naturally lead those who were shown the message to believe that Goldsmith had started him a second time on the same day, and that he had beaten the 2:11¼ by four full seconds. There was only one thing that tended to militate against belief in the telegram sent to this office, seven and eleven sounds so much alike in speech, quite a number thought that the message had been dictated and that a misunderstanding arose in writing the original message. Horsemen naturally said: "Why it is impossible that the horse could have trotted in 2.11¼ at three o'clock, and again in 2:07¼ at four o'clock, it is beyond the bounds of reason." Still horsemen kept coming from all sections, as the report was spread, to learn if such a telegram had really been received and were only satisfied when they read it for themselves. A message was at once sent to the sender, but he was probably out at the track, which is located about two miles from the city proper, and it was only at a late hour that the Western Union Co. very kindly called up the operator there and he was asked to verify the dispatch. His answer was: "The origiual message undoubtedly reads "seven," however, the S is made somewhat in the shape of a capital L, and it may just be possible that it was intended for el in small letters, instead of a capital S, which it looks much more like."

A gentleman who arrived from Stockton on a late train brought down the full particulars of the trial, and then it was learned that 2:11¼ was the correct time. But very few pools were sold, an average one being $10 on Time and $2 on Stamboul. The track, as every one knows, is a fast one, especially for record making, and the Directors had it as perfect as ingenuity could suggest. With a warmer day, it is extremely probable that Stamboul would now be the stallion king of the world; while the day was not absolutely cold, it was not warm enough to bring out the best efforts of the horse. Goldsmith was assisted in his attempt by a runner, who was excellently well driven by the veteran trainer, Harry Whiting. Four or five attempts at scoring were made before Goldsmith was satisfied with the way the trotter was going, but finally he nodded for the word, reaching the quarter in 32 seconds, and the half in 1:03½, which, it must be confessed, was a terrific clip even on such a fast track as Stockton is known to be. The spectators were very enthusiastic, and they were certain that he would beat Nelson's record; however, in coming down the home stretch, the great work in the first part of the heat showed perceptibly on the noble animal and he slowed up considerably, although urged by both the driver and his runner up. The time was finally announced from the stand as 2:11¼, considerable applause following the announcement. Arrangements have already been made for an extra day, and Stamboul will again start at the same place to-day to beat his new record.

A New Purchase.

On last Saturday night the carload of horses under the care of Geo. Starr, arrived at Oakland, among the number being the two-year-old colt J. H. Farly, lately purchased by Humphrey Sullivan for Chas. L. Fair of Grafton. The young stallion is a noble looking fellow, a dapple brown in color, with star and one white hind foot. He stands about 15-3, and will weigh probably in the neighborhood of 1075 pounds. Mr. Sullivan, before purchasing this equine beauty, saw him trot a mile in 2:32, and as he is a full brother to Valissa 2:19, he did not hesitate to pay well up in the thousands to secure what promises to be a first class trotting stallion. The colt was bought from J. R. Bascomb & Son of Shapesburg, Kentucky, and these gentlemen have only had the horse in training since the 20th of August. Mr. Sullivan travelled over quite a number of States trying to get a horse that would satisfy the California public, and it was only after a trip occupying almost two months that he finally secured this son of Vasco. One thing we do not like about him and that is his name. J. H. Farly is undoubtedly a splendid good fellow where he is known, but we would suggest a change of name for the stallion.

Important Notice.

There are now altogether almost one hundred and fifty members of the Pacific Coast Trotting Horse Breeders Association, and each one of these members should consider it a duty to attend the annual meeting, which will be held on Monday evening, December 1, 1890, at the rooms of the Association, 313 Bush street.

As far as the production of cereals is concerned, California has not been particularly fortunate this year, and as a consequence many of the fairs have suffered in attendance, a lack of money keeping many away from their annual outing; still the California horses have done remarkably well both on this coast and in the East, and there need be no fear but what the Breeders Association is now on a firm and permanent basis. The tightness of the money market, it is true, played somewhat sad havoc with the attendance at the Napa meeting, but notwithstanding the smallness of the gate receipts, the Association will show a very nice balance in the treasury. This result has been obtained by close and careful work, and the members should be particularly interested in learning how this favorable result came about. In addition to this notice, each member will receive notice through the mail, so that on the evening of Monday, December 1st, we fully expect to see a large concourse of members from all over the State.

Why Sunol Did Not Lower Her Record.

EDITOR BREEDER AND SPORTSMAN:—Now that the phenomenal Sunol has failed to lower her record, there is amplitude of "oos' why" stated. Let me write the propheoy of one of our vstersn turfmen, commnnicated to me on Tuesday. It was this: "I tell you, and you mark what I say, I have handled a good many horses in my tims—rnnners and trotters—and have driven many a race. I never rode; I am not built that way; never could get down to the weight; but old Merritt and I nsed to train and pick for the monat. Take the English for yonr rule. They have been breeding and training for speed for more thsn a hundred years. Their crack performances are in the openiug spring, whsn every creatnre with blood snd spirit feels the *go* in its natnre. The Derby and Oaks are run in May or in esrly June. Let Marvin—for whom I have the highest admiration—try Snnol in the fnll spring, the season of highest spirit and hest action. She'll still go the mile in less than 2:10, or I'm mistaken. Another thing. Do you notice that this is an uncommon season? Last winter we had unusnal rains and storms; this season is unoommonly dry. Diphtheria in mortals—children and grown people—prevails; typhoid and malarisl fevers are ravagiug the oountry. Epizootic and kindred forms of distemper are distressing horses. The trouble is in the atmosphere. The most sensitive natures, mankind or brnte creation, are most susceptible. Sunol is of the highly sensitive kiud. She csnnot move in such atmosphere as she oan and will in wholesome and invigorating atmosphere. She has failed in three trisls this season siuce her return from the East, and she will fail if tried again. You wait and notice. Marvin and Doble and Johnny Goldsmith are my pick of thorough horsemen for trotters, bnt not one of the three can get out of a trotter the qnality that is not in them, with the seasou sgaiust them. But, mark my words, Sunol will get down below her record within a yesr if things go right. I go everything on her. It is in her; all that is required is the season and the man."

I deem it not essential to add one word. J. O'M.

SANTA ROSA, November 21, '90.

A Disposal Sale.

Among the announcements which appear this week is one from Irvin Ayres, Esq., in which he notifies our readers that he will sell the San Miguel Stock Farm and all the horses which have contributed to its fame. Heading the list of course is the well known stallion Mambrino Wilkes, 6083, sire of Gus Wilkes, 2:22, Alpheus, 2:27, Balkan, 2:29½ (three-years-old), and who has been timed several times in a race in 2:22, Clara P., 2:29½, Bay Wilkes, 2:30, etc.

This stallion is worth a fortune to any first class breeding farm, and is undoubtedly worth many times what he can be bought for.

Balkan, another in the list, is also offered for sale, as is Chaldean, Fanny Fern, Mollie Fern, Annie Laurie, and all the balance of both the old and young stock.

The San Miguel Stock Farm is situated on Walnut Creek, Contra Costa County, and is admirably located for the purposes to which it is now devoted, and prospective purchasers of farms for stock raising purposes could not do better than take a look at the magnificent farm now offered by Col. Ayres. In the near future we will have something more to say about the San Miguel Stock Farm.

Mr. A. E. Wheeler, Preston, Minn., has recently sold to Samuel Seitner and Sons, Disco, Indiana, a black weanling filly by Herod, 2:21½, dam Nancy, by Seth Warner II, grand dam Kitty by Deacon, great granddam Robin by Simonds' Messenger. Price, $200. This filly traces to Justin Morgan thirteen times.

John N. Fuller, Esq., is one of the prominent Directors of the Tacoma Racing Association, and is an ardent believer in good blood in the trotters. For the next few weeks Mr. Fuller will remain in this neighborhood and visit all of the principal stock farms, with the object in view of purchasing some well bred young horses, especially if they can show any speed. We commend this gentleman to the kind consideration of the various breeders whenever he may call.

Answers to Correspondents.

Answers for this department must be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

Who Can Answer.

EDITOR BREEDER AND SPORTSMAN:—Could you possibly inform me through your "answers to correspondents" of the whereabonts of William Simson of Stockton? In 1874 or 1875 he brought down to San Francisco two black mares about 4 or 6 years old, each supposed to have been sired by McCracken's Black Hawk or one of his sons. One of them was bought by my brother-in-law, who turned her over to me, after having been bred in 1884. The produce, a filly, is now the dam of a filly by Alexander Button, entered in your Futurity Stakes of 1893.

I desire very much to clear up the pedigrees a little further, and would greatly appreciate any bit of information or hint in this matter.

W. H. Oakland.

What record did Henry McConn give Arab?

Answer.—2:20½.

W. M. P. Wildflower.

The same question was answered last week.

H. F. Marysville.

Please let me know the pedigree of Cricket.

Answer.—Cricket, pacing record 2:10, by Steinway, dam by Dolphin.

G. W. Mayfield.

Will you please put in your paper in answer to correspondents the age, discription and pedigree of Ida Teazle.

Answer.—We do not know the mare.

H. R. L. Brattleboro, Vt.

I notice Princess Alice by Dexter Prince, dam Mollie by Gen. McClellan, has a mark of 2:16. Can you give me Mollie's full pedigree? Also the breeding of Bessie, the dam of Dexter Prince Jr.

Answer.—Mollie by Gen. McClellan 143, dam by McCracken's Dave Hill, second dam by Kentucky Whip. This is given as the pedigree by Mr. Patterson who owns Princess Alice. We do not know the breeding of Bessie.

W. E. G.

Can you kindly oblige me by giving the pedigree of Major Mono; also the pedigree of Oregon. What is his best time?

Answer.—Major Mono by Pacific (he a son of Nisgars) the dam was a fine large mare whose pedigree was never traced. Oregon by Monday, dam Planetia by Planet, second dam La Henderson by Lexington, third dam Kitty Clark by imp Glencoe. His best time is 1:12¾, for three-quarters of a mile.

Quartz, Australia.

About August 1875 three stallions were imported from California, viz, "George M. Patchen Tertius," a dark chestnut, "San Jose Patchen," a bay and "Union" a gray, supposed to have been bred by a man named Murphy, San Jose, Cal. Can you give their pedigrees? They all came to this country in the same ship.

Give pedigree of "John M. Patchen," a California born.

Answer.—A letter sent to D. J. Murphy of San Jose elicited the following reply;

DEAR SIR:—In reply to yours I would say that in 1875 my father, James Murphy, sold to Lord Lamb of Australia, two sons of George M. Patchen Jr. (31.)

One of them was a round blocky horse about 15¾ hands high, four years old, much the color of Holly's Woodnut from a mare called Prairie Flower sired by Williamson's Belmont, next dam "The McClellen Mare" said to be by Young Diomede.

This horse I afterward understood went to England, his name when sold was Prince Albert. The other horse was a dark chestnut sorrel, very close to seventeen hands high, three years old, high headed and rangy.

His dam was brought from the east (Wisconsin) by Jas. Westherhead now of San Jose. He gave her breeding as being by Imp. North of England and next dam by an Arabian horse. This horse's name while on the ranch was King David. Of the other horse you speak of I know nothing.

Yours Respectfully,

D. J. MURPHY.

The Union referred to was at one time called Sawyer's Messenger. He was by Stockbridge Chief, Jr., dam San Jose Damsel by Easton's David Hill; second dam, "The Quivy Mare." Stockbridge Chief, Jr. 672, was by Stockbridge Chief (son of Black Hawk 5) dam Blue Bonnet by Tom Crowder. We do not know the pedigree of John M. Patchen.

Napa Soda.

As the season of sunshine wanes and the days of cold and rain approach, mild tonics are naturally discarded for the stronger stimulants, and even those who take a friendly glass just for sociability find themselves partaking of intoxicating draughts because custom seems to say they are the proper thing. Consequently, the pure, invigorating and healthful mineral waters which the motherly hand of nature has bestowed upon earth's creatnres in such plenty sre forgotten. The springs do not forget to run, however, and a Napa Soda Lemonade is just as delicious still, just as refreshing and delightful as when the heated aeason was upon us. Owing to its effervescent nature, Napa Soda blends harmoniously with every variety of wines and liquors The soda is also possessed of properties that are invaluable in cases of indigestion and dyspepsia. For a pleasant drink or tonic winter or summer Napa Soda is the prince.

Abalone Spoons.

The fishermen are all enthusiastic over the splendid results obtained from the use of the new lure for fish known as Allen's Abalone Casting and Trolling Spoons. By an ingenious adoption of the most brilliant portions of the iridescent abalone shell, the hitherto matchless sparkle of the young fish is reflected with wonderful reality. Extremely large catches are reported this season with the abalones, when not a suspicion of a "rise" could be obtained with the use of any other spoon. Mr. E T. Allen, of 416 Market street, this city, is the sole manufacturer of the new discovery in the United States, and has protected the novelty from all infringements by a patent. These spoons, which are made of all sizes and shapes, are an indispensable adjunct to every angler's tackle, and no outfit seems complete without a set of them, the smallest of which are strong enough to kill, no matter how large or game the fish may be.

VETERINARY.

Conducted by Wm. F. Egan, M. R. C. V. S., F. E. V, M. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Wm, F. Egan, M. R. C. V. S, 1117 Golden Gate Avenue, San Francisco.

H. S. F.

Would you kindly prescribe in your next issue for my Irish Setter dog, aged between two and three years. About three weeks ago I noticed he had a slight cold and kept getting thinner. I let it run on for about a week and then noticed that his respiration was very quick and labored about 120 to 130 a minute. I then thought he had distemper, so gave Glover's Distemper Cure. First of this week I noticed several ulcers on his eye lids. By application of Glover's Eye Lotion these have entirely disappeared. Kindly give me any information on the subject in your power and greatly oblige.

Answer.—Keep the dog in a warm, comfortable place, and give him no solid food to eat. Let him have beef tea three or four times a day in small quantities, or if he refuses to eat, and is very weak give him the white of an egg broken up with a little milk and a teaspoonful of sherry morning and evening.

Apply soap liniment to his sides and chest daily and communicate with us again.

W. M. B.

I have a horse lame in the hind leg; I can see no reason for it, only a small knot on the inside well back on the bone resembling a flat splint, just below the hock and extends up and down about two inches. When he first starts up, goes short until he gets warmed up, then gets out of it. If you think you understand it enough, please send me treatment.

Answer.—Your horse appears to have a bone spavin. This is a bony enlargement on the inner and lower part of the hock. If the horse be old his chances to get entirely rid of the lameness are less than if he were younger; and the older he is, as a rule, the less successful is the treatment. The actual cautery, followed by a blister and about two month's rest, is about the most successful treatment. This leaves a mark. The application of a strong blister, such as one part of beniodide of mercury to four of lard, and repeated after three weeks, giving altogether six or eight week's rest, is also very successful.

R. T.

I have a yearling colt that has got a large, hard lump on the outside of the hock; he don't go lame on it; one man says it is thoroughpin. What can I do to take it off?

Answer.—From your description it does not appear to be a thoroughpin. A thoroughpin occurs above the point of the hock and in front of the perforans tendon, and it is rather soft to the touch. When pressed with the finger on one side of the limb, it will bulge out with increased prominence on the other side.

What you describe appears to be an exostosis or bony deposit, something similar to a splint. Clip the hair from the part and apply tincture of iodine to it daily, until a scruff or scab appears; then discontinue it for about a week, or until all the scruff has disappeared, when you may repeat the application as before as often as necessary.

FOR SALE.

San Miguel Stock Farm

Mambrino Wilkes, Balkan,

Chaldean, Fanny Fern,

MOLLIE FERN, ANNIE LAURIE,

And each and every Animal belonging to the place, together or separately.

This place is as well adapted to the raising of fine stock as any; has good stables, full mile track (kite shape), etc. The soil is as good as any the sun shines on, whether for raising grain or fruit.

PROOF—Grain sown about the first of April, this year, produced a fine crop.

Walnut Creek, which never fails, runs through the place. There are also a never-failing spring and two wells. Water can be obtained by sinking twenty to twenty-three feet. Apply to

IRVIN AYRES.

30 and 32 Fremont Street, S. F.

For Sale.

The Grey Gelding

JOHNNIE HAYWARDS,

Record 2:26.

Sired by POSCORA HAYWARDS, dam by THE MOOR. First-class road horse; kind and gentle. Has trotted nine heats on the same day in races this year better than 2:30, and a mile in 2:22.

ALSO THE FIVE-YEAR-OLD STALLION

PROSPECT,

(Standard bred),

By PASHA, dam FAWN by BUCCANEER. PROSPECT is a beautiful golden sorrel of splendid style and conformation. Has had no training, but shows evidence of speed, having trotted a mile in 2:38 this year.

For terms and particulars, address this office, or

L. LEVY,

420 Sansome Street, S. F.

For Sale.

Complete Road Outfit,

A FIRST-CLASS

Road Mare,

By Todhunter's RENO, out of a NELSON mare. She is a handsome sorrel in color; kind, gentle and fast; can go all day and show a 2.50 gait on the road. Will be sold at a reasonable price.

Also a new Columbus buggy, harness, robes, blankets, etc. Apply at

FASHION STABLES,

221 Ellis Street, S. F.

Grim's Gossip.

If Axtell, 2:12, was worth $105,000 as a three-year-old, what is Allerton, 2:13¼, rated at as a 4-year-old.

Mr. Sanborn and Mr. McFadyen of Santa Bosa, were in the city during the latter part of last week taking in the races.

Mr. and Mrs. J. H. White, of Sonoma, are at present visiting the breeding farms of Kentucky and will remain away for some time.

"Of all riders on the face of the earth, deliver me from the so called gentleman jock of the day," says Trainer Lloyd of the Santas' Stable.

Jockey Hamilton has signed with Mr. Belmont to continue his engagements with the latter next year. He has gone to St. Louis to spend the winter.

Col. H. I. Thornton has turned out all his gallopers. They will be sent to the ranch of Mr. Kerr in Kern Co., at least such is the Colonel's present intention.

J. J. Evans, of 406 California St., has prepared an extra edition of his stallion service books, and already orders are coming in from all portions of the Pacific Coast.

Frank B. Harper, proprietor of Nantura Stock Farm, Woodford County, retires from the turf and sells his string of thoroughbreds. He will devote his attention entirely to breeding, raising and selling the produce of the great Longfellow, Jils Johnson and imported Rossington.

It is said that in all probability next season will be Fred Barrett's last on the turf. He had to work very hard to keep his weight down, and had to train rigidly in order to ride Alicante in the Cambridgeshire. On retiring from the pigskin he will probably follow in the steps of many others in the profession and become landlord of an hotel.

First class goods always command a ready sale in any market, and this is proven in the fact that Mr. McKerron has lately filled an order for California horse boots to go to Scotland. All over the continent of Europe as well as in South America and Australia, McKerron's boots are recognized as among the best.

George L. Swan, who has charge of Mr. H. I. Thornton's trotter at Sacramento, made a trip to the city last week. He has eight colts in training, three young studs, four fillies and a gelding. The pick of the lot is a colt by Richmond. Swan is very sweet on him and says he shows quarters in 37 and better.

Chas. Kerr was up from Bakersfield last week and speaks in glowing terms of Kern Co. as a home of thoroughbreds, and well he might, he being the fortunate possessor of a couple of Sir Modreds which will in all probability bring fancy prices now that the sons and daughters of the bay Australian are so rapidly coming to the front.

Mrs. M. H. Murdock of this city has gone to Arizona on a visit, but we warrant the lady will not stay away long, as her interest in her Le Grange and Guy Wilkes colts and fillies will naturally act as a load stone to attract her back again. Mrs. Murdock has many fine youngsters and some of them will be seen in track use next year.

R. P. Ashe returned from the East last Sunday, and has since been rusticating on his ranch near Merced. Mr. Ashe will be on hand at the Blood Horse meeting, when the two-year-old filly Zingarella, by El Corrigan from Minnet, will carry the pretty cherry jacket of the Maltese Villa Stables. Geraldine will probably be raced again next season.

Prince Wilkes 2:14¾ is said to be idle this year in his South American home, as he is totally unfit for racing. Senor de la Roelia, who owns him, despairs of ever getting him in form for fast work again. It is a great pity the Prince ever left the United States. He would have made the free-for-all cracks trot some to beat him, with Crit Davis up.

Wesley P. Balch, who has for many years been prominently connected with the trotting turf in Massachusetts, recently committed suicide by shooting himself through the head with a revolver. It is stated that financial difficulties lead to the act. Mr. Balch has for many years been the promoter of sensational trotting events, and it was under his management that the now celebrated Nelson—Alcryon stallion race was held.

Among the horses in training at Sacramento, none attract more attention than the Winter's yearlings which have been carefully broken under the supervision of the veteran trainer John Davis. The pet of the stable is the chestnut half sister (by Hooker) to El Rio Rey, The Emperor of Norfolk, et alia. She is ridden daily by George Evans, while his son rides another Hooker colt alongside.

Poor John H. Wallace is having coals of fire heaped upon his head owing to the new standard stakes which he was instrumental in starting. That they are fraud goes without saying, as all the Associations have discovered that have had anything to do with them. Some other plan will be necessary to satisfy the public, for the new abomination is even worse than the old tin cup affairs.

Ada Declare, 2:26½, a four-year-old filly by Lord Russell, dam Aida (full sister to Dexter, 2:17¼), has been sold by A. J. Alexander, of the Woodburn Farm, to W. R. Allen of Pittsfield, Mass., for $15,000. Kingmont, a weanling bay colt by King Wilkes, dam Mary Bell (dam of Priscilla, 2:29) by Belmont; second dam Mary (dam of Dick Moore, 2:22½), by Monmouth Eclipse, was also purchased by Mr. Allen for $3,000.

There is a well founded report that several gentlemen, among whom are mentioned John Hunter, James Galway and Messrs. Bowie and Campbell, are about leasing Jerome Park for a season of racing next summer. It is proposed to run on alternate days with Monmouth Park during July and August, and to offer good money for the very best horses. A revival of hurdle and steeplechasing is also one of the plans of the proposed management.

The fact should not be lost sight of in estimating the value of Morgan blood that Nelson 2:10¾ carries more of it than of any other known trotting element. His grand dam Kate was sired by Vermont Black Hawk and his sire has only Morgan and pacing blood, as a special inheritance. The pacing mare Pocahontas 2:17½ and the inbred Morgan Draco 2:28½ are his paternal speed progenitors. The same blood elements gave us Strideway, who could beat at his death any contemporaneous stallion.

The meeting of Elizabeth was a phenomenally successful one and it is estimated that the stockholders will have about $100,000 to divide among themselves after the fifteen days' racing. As the association also has fifteen days in the spring, and as the cost of the plant, including the ground, stables, grand stand, race track and everything else was less than $200,000, the profits of the racing in New Jersey must be considered eminently satisfactory.

It is now stated in most of the prominent New York and Kentucky papers that Isaac Murphy, the crack jockey, is still suffering severely from the effects of poison administered to him at Monmouth Park, previous to the Firenzi fiasco. Two prominent New York physicians are said to have stated that he was undoubtedly suffering from the effects of poison on the day after the race, while another physician says that he will probably never fully recover from the effects.

Judge Baskin, of Salt Lake City, has lately purchased ten exceedingly well bred trotting fillies in the East, and before long will have a first class breeding farm in the Mormon Territory. Among the fillies secured by him are two by Nutcracker, two by Jay Bird, two by Williams and two by Combat. This is a fine start for a first class stock farm, and as the judge is well up in everything that appertains to the trotting business, it is to be supposed that he will make a success of his new venture.

Henry Walsh, the well known Palo Alto trainer, arrived at the Bay District last Wednesday with six thoroughbreds by the crack miler Racine; the three year old filly Muta; Tearless, a two year old filly by Wildidle out of imported Teardrop (dam of Brutus and Raindrop.) Rosebud, a two-year old filly by Wildidle from imported Rosetta (dam of Rhona and Conrad); Nero 2, Flood—imp. Queen Bess; and imp. Glimpse, a maiden six year old horse by Foxhall from Fairy Rose (dam of Racine Fairy and Shannon Rose.)

W. H. Wilson, of Cynthiana, Ky., than whom there is no better horse judge in the country, lately declared that Nelson, 2:10¾, is the best trotter that he ever saw, and this is fully carried out by the gentlemen lately back from the East, who one and all declare that the Maine stallion is the best trotting horse that ever lived; and one probably more enthusiastic than the rest says that, bar accident, Nelson will next year make a record of between 2:06 and 2:07.

Owing to the hurry with which the list of horses entered in the Terre Haute Guaranteed Stake was set up last week the following California entries were omitted:

Coombs Bros., Napa City, Cal., b c —— by Director 2:17, dam Lillie Stanley 2:17 by Whippleton.

Harris, Ben E., San Francisco, Cal., bl c, Olo by Leland Stanford, dam Echolo by Echo.

Same, bl f Melville by Jim Mulvenna, dam Frona Freeman by Adventure.

Newman, R. A., Visalia, Cal., h c —— by Strathwray, dam by Bill Arp.

H. K. Moore, of Moscow, Idaho, has an advertisment in the present issue of the Breeder and Sportsman, offering for sale the standard stallion Cadukas 10480. This well bred horse is by Almont Medium 2133, dam Amelia T. by Alcona 730; 2d dam Warwick Maid by Almont Mambrino 761; 3d dam Lady Warwick by Delmonico 110; 4th dam by Cassins M. Clay Jr. 22; 5th dam by Hunt's Commodore, etc. As will be seen, the dam of Cadukas is a full sister to Prince Warwick, who was driven a trial mile at Detroit in 2:18¼. He is only two years old, and already gives promise of much speed. The same gentleman also has Fremont for sale, he being also well bred.

The California papers are enthusiastic over the performances of the three-year-old runner Marigold, that recently went two miles in 3:30½, the fastest time for that distance ever made on the Pacific Coast, says the Breeder's Gazette. But when one looks at the pedigree of Marigold it is easy to see where the run comes from, as she is by Milner, a first class race horse in his day, and out of Katie Pesse, a mare that could go four miles, and was speedy. Katie Pease was taken to California a good many years ago by a party of turf speculators, one of whom is still a resident of Chicago, and if he choose to talk he could tell an interesting story of the trip. Well, let the Chicago speculator tell the first chapter and a second one will be added from this side of the continent.

In conversation a few days ago with Mr. Valensin, he informed us that Simmocolon had returned to his Pleasanton home in the best of fettle and in excellent condition. As is only natural, his proud owner feels much elated over the wonderful success of his stallion on the Eastern Circuit this year, and it is with special pride that he points to the fact that Simmocolon's winnings amount to $8,517 during the season. Under the management of Jas. Goldsmith, the horse had started twelve times, in nine of which he received first money, once second, once third and once fourth. Truly a remarkable showing for a five-year-old horse that has to undergo a hard campaign and meet the best of his class in the country.

I met the irrepressible Dan Dennison of Sacramento on Thursday, and as usual heard all the news of the stable. Hotspur which has carried the Dennison colors to victory many a time and oft, has been sold at a long figure to Mr. Harper of Suisun, and will hereafter run in the name of that gentleman. Dan feels sorry that his pet has gone as there was many a sack of oats to be won yet by the son of Joe Daniels. Young Dan has been under the weather lately having had an attack of Typhoid fever, but has recovered sufficiently to permit of his visiting the track. Princess First will prove a world beater if the authority may be relied on and there are any quantity more of the get of Prince of Norfolk that will be heard from in the near future.

I always like to pick up the Breeders Gazette because there is always lots of good gossip within its pages; however, I have to complain about brother White, whose hobby is that there never was a trotter that had any thoroughbred blood in it; probably this last example is an exaggeration, but it is very annoying to pick up the Gazette and find that "Lanra C., a mare by Electioneer, recently entered the 2:30 list in one of the California meetings. She made a record of 2:27, which shows how the performing trotting blood in the veins of Electioneer overcomes the running blood of imp Buckden". Is it just possible that my Chicago friends have forgotten that Electioneer's blood has not only overcome the running blood of Buckden but has also overcome every other thoroughbred blood, with which he has been mated? Wildidle, Planet, Whips, Lexington, Indorser, imp. Hercules, Inquirer, etc., are noted examples.

The old feud between Mr. J. B. Haggin, best known as the Copper King, and the Dwyer Bros. has received fresh illustration during the present Elizabeth and Linden meetings. The Hagginș, father and son, with all their wealth and social distinction, have never forgiven the Dwyers for the insult consequent upon the race won by Salvator at Mamouth Park last year. They have emphasized this by failing to make any entries at any of the tracks controlled by the Dwyers, but they forced the matter to a greater crisis when they sent their favorite mare Firenzi, to run at Linden and become the star performer of the meeting there. Her presence at Linden was worth thousands of dollars in money and a great deal of prestige to that association. The Elizabeth track, so to speak, is just across the way. But Firenzi did not appear there, nor will any one of the Haggin horses so long as the Dwyers have a penny's worth of interest in the track. So much for one of the turf feuds of the decade.

The first day of the supplemental meeting of the San Joaquin Valley Agricultural Association was last Wednesday, and several races were indulged in, and one or two horses started against the watch. In the first event California Lambert, Lizzie F. and Maud started in a standard stakes, California Lambert making a mark for himself in the first heat of 2:29¼, the others not being able to make 2:20 or better, and after the next two heats were sent to the stable. A match race between Mount Vernon and Chief Thorne was next on the programme, and the latter, although only a two-year-old, managed to win in two straight heats, the time being 2.24 and 2:23¼. Chief Thorne, it may be stated, is a pacer and owned by Mr. Shippee. Lottery Ticket was speeded once around the track, doing fairly well, the time given out being 2:26¾. Moses S., who already has a record of 2:22½, was given a trial, but failed in his attempt to beat his record, as the time was in exactly the same notch as that at present held by him.

Nothing in the ordinary surroundings of a horse can be so injurious as the absence of good ventilation. Any number of horses are kept in places where no ventilation exists, and in many places where ventilators were put in by a well meaning hand one finds them stuffed up with straw and hay. Now, when it is remembered that a horse breathes much stronger than a man, that the exhalations from his skin and elsewhere are so much greater than from any human being, it only stands to reason that ill ventilated stables cannot possibly be preservative of the horse's health any more than a foul smelling room would be of a human being's health. If a stable owner wants to know the atmosphere that his horse breathes, let him be the first man in his stable of a morning, when, unless his power of scent is almost gone, he will often have occasion to be horrified at the air his animals have to breathe. Free ventilation may, at times, have a tendency to cause colts to stare, but that is not half as bad as to undermine the horse's health by making him breathe foul air. Good light is likewise of great importance in the stable. Vegetation will die in a half darkened room; it wants the sun's rays to keep up its vitality; the trees in the forest grow straight, so as to obtain their share of light, and their lower branches die off because the light does not penetrate to them. Is it reasonable to suppose that animal life can be deprived of the vitalizing influences of light with impunity?

For a long time, Prof. Heald, of the Napa Stock Farm, has been trying to find out the breeding of his pacer Gold Medal and finally partial success has crowned his efforts. Investigation proves that the fast sidewheeler is by Donohoo's Nephew Jr., he a son of Nephew out of a mare by Chieftain. The dam of Gold Medal is a mare called Peggy Donohoo, but as yet her breeding is untraced. Last Saturday he paced a mile in 2:16¾ and was very lame at that. If given proper rest he should prove very fast time to come. The following short history will tell what is so far known: Gold Medal 2:16¾ was bred by Henry Ellis, Lathrop, San Joaquin Co., Cal., and was foaled September 25, 1884. He sold him to James Connor, of Lathrop, who took him to Fresno and sold him to A. S. Edgerly, real estate agent. He worked him for sometime in a heavy two seated wagon, hauling his patrons around the country to inspect land. The horse not being sufficiently heavy for his work, he sold him to T. C. White, capitalist and large vineyard owner, at Fresno. In June, 1889, he sold him to E. P. Heald, President of Heald's Business College, of this city. Gold Medal was sired by Nephew Jr., son of Nephew 1220. His dam was Peggy Donahoo, claimed to be by a son of Williamson's Belmont. The breeding of this mare, however, has never been authenticated, no attempts having been made to trace it back. Nepbew Jr.'s dam was Sunflower by Chieftain 721, and his second dam was Fanny (dam of Gold Note 2:25) by Jack Hayes.

The sensational New Jersey Club Case came to a close on the 12th. The New York Times of the 13th says:

One act in Pete DeLacy's farce, now being enacted in the Union County Court here, terminated this evening, when the jury in the New Jersey Jockey Club's case, after having been locked up for thirty hours, came into court and informed Judge Van Syckel that it was utterly impossible for them to agree. The Judge did not relish this at all, and said it was the plain duty of the jurors to bring in a verdict of guilty, as the case was so clear that there was no excuse for their action. The jury had come into court eight hours previously, and told the Judge the same story, but he then refused to discharge them, and sent them back to deliberate longer. There was a subdued murmur of applause as the liberated jurors filed out of court. On their last ballot they stood 7 for conviction and 5 for acquittal During nearly all the time they were out they were practically evenly divided, the votes standing 6 to 6. The result is a great disappointment to the people who are persecuting the race-track association to gratify their personal spite, as they confidently counted on a conviction. The struck juries empaneled to try the cases were looked upon as making assurance doubly sure, the jurors being carefully picked, and every man excluded who it was thought might have any sympathy for the race-track associations or the bookmakers. The animus of the prosecution, however, has been so palable that it is likely to defeat its object, as a reaction in favor of the persecuted parties has already set in among the people who like to see fair play.

The trial of the Linden Park Association was finished this evening, all but charging the jury. This Judge Van Syckel will do in the morning, and another disagreement is confidently predicted.

The trials are costing the County of Union nearly $1,000 per day, which is a heavy burden imposed on the taxpayers to please De Lacy.

The Grand Jury has brought in eighty-one indictments, the largest number reported at any session of the court, and they are not through yet, at least Judge Van Syckel refuses to discharge them.

THE GUN.

Ptarmigan Shooting on Mt. Blanca.

PUEBLO, COLORADO,

EDITOR BREEDER AND SPORTSMAN:—It was during the holiday season of 1888 that I found myself visiting friends at LaJara, Conejos County, Colorado. The weather was exceptionally fine, cold during the nights, but remarkably, and to me, surprisingly pleasant during the day, especially between the hours of nine in the morning and four o'clock in the afternoon. I called on Mr. F. F. Vogle, of La Jara, one of those genial and courteous gentlemen who upon almost all occasions are ready to drop the cares of business and participate in the recreation afforded by rod or gun in season. The beautiful pocket-like valley of San Luis is nestled among the mountains, which rise to a surprising height and regularity all about it, while the valley is almost as level as a floor. It is covered for the most part by a growth of soap weed and other shrubs, which grow in bunches but a few feet apart. We had enjoyed some fine sport, shooting "cotton tails" and jack rabbits, which abound in the valley, the shooting being of the snap shot order, as one could only get a glimpse of the game as they skipped from one bunch of shrubs to the other. It required a quick aim and a steady nerve to bring the rabbits to a halt. After spending some days with my friend, we concluded that we would try our hand at Ptarmigan shooting on the snow peaks of Mount Blanca. This is the highest mountain in Colorado, and its peaks, of which it has several, of almost uniform height, are always covered with snow.

The mountain stands about forty miles east of La Jara although looking at it from that point one unacquainted with the country would naturally judge it to be scarcely ten miles away, so clearly is every feature of the giant presented to the view, with but little or no intervening objects in sight, looking across the level valley to its ponderous base.

Above the timber line to its crest is found the home of the ptarmigan, a bird about the size of a two thirds grown grouse, but more plump and compact, if possible, than the latter named bird. In winter and with but little variation in the male during the season, they are of snow white plumage, in perfect keeping with their home on the glacial mountain peaks. The birds come down below timber line to nest and rear their young, at which time the females take on a grey or dingy coat, which they again shed at the approach of winter and with their broods repair again to the crests of the ranges practically out of sight and for the most part out of danger, for their haunts are almost inaccessible to the hunter.

Well prepared with snow shoes and suitably clad in soft leather hunting boots which extended to the hips, well lined with thick felt and otherwise warmly clad, we prepared to invade their haunts.

It was dusk on the evening of our first day's journey which had been made on foot for the most part from the base of the mountain, that we prepared camp at timber line on one of the many more prominent ridges which lead up the mountain.

Our camping outfit was strapped on a burro, which by strenuous urging we had induced to proceed us, through the two feet, and in some places greater depth of snow, which lay on the mountain side. But for the energy and perseverance of my friend I should have favored turning back, so steep and dangerous was the way. Sometimes in rounding a point we would come to the very verge of a chasm, the gawning depth of which was open for thousands of feet to receive and silence forever by the fall any man or beast that should be so luckless as to make a misstep in the narrow way which we were compelled to follow.

We arrived, as I have stated, at our destination, just as the shadows were creeping up from the valley which was now shrouded in darkness. Looking down from our great height into the valley below, we could see the lights at Fort Garland and at Alamosa twinkling like stars from the solid shrouding of gloom below, while above us still for many hundreds of feet yet gleamed the glacial peaks of the giant mountain.

With a hearty good will we set to work and soon shoveled out a place for our camp and gathering the dry limbs of fir and pine lighted the welcome blaze of our camp fire. The work of unpacking our faithful burro, and preparing supper with coffee of herculean strength, was soon accomplished and we fell to eating with appetites sharpened by the exertion of our mountain climbing and the sharp, clear air which night invariably brings. After supper we worked assiduously for some hours constructing a shelter of pines and firs which would keep out the snow should one fall during our stay, a similar one being constructed for our faithful, if agrivatingly slow companion, the burro.

The supply of wood which we gathered for our campfire would have astonished any one, as it did me, not being accustomed to the requirements of the climate. Time and again was it replenished before we finally rolled ourselves in the rubber blankets provided for the occasion.

"If you should wake up at any time," said my friend Fred, "just heap the wood on the fire." and with this injunction repeated several times, went to sleep.

I could not go to sleep, tired as I was, after my day's tramp, but lay awake, kept so doubtless by the strangeness of the scene. I kept up a good fire until about three o'clock, when I at last fell asleep and slept nicely until morning, owing to the fact that my friend, like a true mountaineer, awoke regularly and replenished the fire.

We were up with the sun, but found that it was too cold to hunt until the sun should moderate the weather. Accordingly, about nine o'clock, we sallied forth up the mountain. After proceeding some distance and well toward the crest of the peak, my friend pointed out a cliff or short ridge running obliquely from our course, and directed me to go there and remain until he should stir up the birds from the opposite direction. "They always fly there after being aroused from other points," he said, and accordingly he turned to the south while I worked my way over to the point indicated. I had been there but a short time when I heard from his direction two faint reports and presently a whir of wings, and by looking sharp caught sight of quite a large flock of the beautiful white birds coming almost directly toward the point where I lay concealed. In an instant they are upon me, in fact all about me, and it is only the rear of the flock at which I secure a shot with the result of only one bird.

I mark the spot on which it has fallen and turn to see what had become of the balance, but they are gone, I knew not whither. Securing my bird I settle myself to waiting again and in a short time am afforded another shot at a single bird, but both barrels are discharged at it with no effect whatever. They are swift of wing and the pure whiteness of the bird against the snow affords a very uncertain object at which to fire. I presently tire of waiting and set out to reach another point still further to my left, but find my way impeded by a gulch which it is impossible to cross. I may have been gone for the better part of an hour, when I return to my first position, and am rewarded by arousing some twenty or more birds from which I secure two fine specimens. Night found me with seven birds, while my more experienced friend had more than twice that number to his credit. However, I was well pleased with my success in this, to me, new and novel sport.

The hunting on the mountain was very hard on a novice, such as I, owing to the peculiar shortness of breath which comes to one, in this high altitude, after very little exertion. Another remarkable fact is that one does not feel the cold to any great extent owing to the dryness of the atmosphere. We hunted with but little difficulty from nine A. M. to four P. M. with but ordinary gloves.

The flesh of the ptarmigan is not first class food being very dark and having a peculiar order which to most palates is not inviting. My companion had the good fortune to kill a fine deer on our second day out.

I have three good specimens of these rare birds stuffed and mounted as a memento of my outing on Mount Blanca.

FELIX.

The Country Club.

Fred Wooster vs. C. Macalester.

The Country Club held a very pleasant meeting at Oakland Trotting Park on Thursday last, the chief attraction being a match at one hundred pigeons per man, between Fred L. Wooster, of the club, and Charles Macalester of Philadelphia. On a former occasion, Wooster beat Macalester by a score of 34 to 33 out of fifty birds. The last match reversed the conditions, Macalester proving an easy victor. Macalester shot a 7½ pound 12 bore Parker hammerless, using forty-five grains of the special American Wood Powder, and one and one-eighth ounces of 8's and 7's.

Wooster shot a 7 pound hammerless Scott, 12 bore, using Schultze Powder. Macalester used his second barrel thirty two times, Wooster sixty-four times. The birds were unusually good and the dog perfect.

After the match, the Country Club shot a dozen birds each, President F. R. Webster and R. B. Woodward tieing on eleven kills. Macalester and Wooster scored ten each.

The match was a merry one, as the Country Club matches always are.

The scores were at 100 birds per man, American Association Rules, except that both stood at 30 yards rise, D. B. Gillette, Referee; F. R. Webster, scorer. For the birds won by C. Macalester.

Book of Game Laws.

A neatly printed volume of something over two hundred pages, entitled "Book of the Game Laws" is on our table. It is issued by the Forest and Stream publishing company, and contains the laws of the several states of the union and Canada relating to game and fish. It will be found of the first importance to all sportsmen. In addition to the laws as they now are, its value is of no inconsiderable moment as an aid to the student of the subject, in preparing any revisions and amendments that may be deemed advisable. The enforcement of the law relating to this matter, has been more uniform and effective in some states than in others, and therefore, such provisions as may have been proven effective where rigorously applied, may serve as sign boards in pointing out the way to the drafting of similar measures applicable to other states.

There can be no question that the game laws of this state should be revised and a law passed that should be uniform in all of its measures to every part of the state. The territory is not so large as to require a different period for the open season in any section. All game mature and is fit for gun and table at the same time, and these positive laws of nature cannot be successfully contravened. The law, as it now stands, requires of the conscientious sportsman a thorough and accurate knowledge of the boundary lines of almost every country in the state. It may be lawful to kill game at a certain date in one county but unlawful at the same date in another.

Game may be lawfully killed in one county but may not be taken into another and sold or eaten. Such provisions are at varience with the popular sense of justice, and work incalculable mischief in the proper and due administration of the laws.

The publishers of this volume are deserving of the thanks of the entire sporting fraternity for its presentation in such available form. Price 50 cents.

The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, **7s, 6d**; postage, **6d** extra. Published by CHARLES LANCASTER, 151 New Bond Street London, W

Duck shooting is reported as being remarkably fine in the usual resorts of this bird across the bay and along the marshes leading toward Sacramento.

Charles Macalester left on Saturday last for his home in Philadelphia. His club shoots on November 27th, and immediately thereafter Macalester goes to Monte Carlo for the matches there.

His visit to California has been greatly enjoyed by those who have come to know him, and he goes away with many good wishes and a world of respect for his superb skill at the traps and in the field.

One of his field scores was 170 quails and 2 deer in a morning at Tejon Ranch. Another was 150 ducks on a morning flight at the Ibis Club, Suisun.

The farmers of Vanderburgh County, Indiana, are said to be taking steps to influence the State Legislature to pass a law prohibiting the killing of quail at any time. The same writer, in Shooting and Fishing, calls attention to the action of the farmers in Fairfield County, in that State, taking steps to poison the rabbits which are over running their farms and doing much damage to trees and shrubs. The moral drawn is that the sportsman has a useful field in which to exercise, as well as one for pleasure and recreation.

Mr. G. P. Wilder, of Kahului, Maui, after spending several weeks along the coast and visiting friends in this city, sailed for his ocean island home on last Saturday. While here he purchased some Homing Antwerps, or messenger pigeons of Mr. Fred E. Magee, the well known breeder of this city. He expects to use them in conveying messages between the various islands of that part of the country. It is also his intention to ship a number of California quail and try their breeding there.

One of the leading interests of the sportsmen of the east is noticed in the revival of rifle and pistol shooting. The object perhaps of all classes of sport is to obtain fresh air and exercise with genial companions, and to this end the diversion afforded by the above method is far from being devoid of merit.

The excitement of the contest and the interest of the sport is enhanced by the presence of ladies, many of whom participate in the matches with almost equal skill to that of their husbands and brothers.

The fatigues of the hunt are avoided and the interest of the participants are hardly less than that of the average hunter in pursuit of game. We trust that those who may be interested in this department will not fail to form a club in their respective localities, these to be united into a State organization, which shall meet at least once a year, or more frequently if desired, to test the skill of the participants for a cup or medal.

ROD.

Fish Commissioners.

The Board of Fish Commissioners met in this city last week, informally. The usual monthly bills were presented and audidted. The monthly report of Chief of Patrol, F. P. Callundan was presented as follows:

To the Honorable, the Board of Fish Commissioners:—

GENTLEMEN:—The report of the Chief of Patrol for October is submitted herewith.

The month has been one of intense activity by reason of calls for service at widely separated points. October 3d, 4th, 5th and 6th were passed at San Jose, Santa Clara and along the Los Gatos River by instructions of Hon. J. Downey Harvey, complaint having been made that giant powder was being used along that stream for destruction of trout. After consultation with Mr. A. W. Ingalshe of San Jose and other prominent citizens of that city, the facts in relation to the matter were learned. The whole of the Los Gatos River from a point five miles above Wrights Station to Alma was then patrolled closely. No persons were detected in the act of blasting fish, but citizens along the stream were informed as to the law and notified that future offences would entail vigorous prosecution.

At Alma a dam belonging to the San Jose Water Company was found, upon which there was no fish ladder. The Superintendent of the Water Company was found and requested to construct a fish ladder at once, which he agreed to do immediately. At the head of the stream a saw mill was found, the sawdust from which was permitted to pass into the Los Gatos. The owners were notified as to the law and, at once, gave assurances that their sawdust would be impounded and burned thereafter.

On October 7th, in company with President Rontier, the Chief of Patrol arrested Fleischman and Levy for having in possession deer skins from which evidence of sex had been removed. The case came up for trial on October 15th, and was continued until November 11th.

On the 14th, accompanied by a deputy, Vallejo and the fishing drifts thereabouts were visited, because complaint had been made that small fish were being marketed there in great quantities. It was found that no fishing of any sort in any great amount was being done either at Vallejo, Benicia, or along the river above or below those points, nor could it be learned that small fish were taken from Vallejo to the market.

Complaint having been made that Eel River and other streams of Humboldt County were being illegally fished, on October 18th Eureka and the surrounding country were visited. Eel River, Mad River and the sloughs and inlets of Humboldt Bay were closely inspected wherever salmon fishing could be done. No violations were found, unless it be that a claim made by the fishermen of Humboldt Bay was unfounded. It is the habit of the fishermen about Humboldt Bay to use nets with six and one-half inch meshes instead of seven and one-half inch meshes as prescribed by law. The Board of Supervisors of Humboldt County have passed an ordinance permitting the use of six and one-half inch meshes and the fishermen claim that under Section 4046 of the Political Code such ordinance is the law paramount as to Humboldt County.

The opinion of your Honorable Board upon the point is requested. The fishermen of Humboldt Bay and vicinity desire to enter a protest against paying further licenses unless a State fish hatchery is located on Eel River, or some other adjacent stream. They claim that large amounts are paid by them into the State treasury yearly in the way of license money and for which they receive no adequate returns and no such recognition as they deem themselves entitled to They claim that the increasing population of Humboldt County and the corresponding increasing demand for salmon and other fish propagated by the State are such as to make it both right and necessary to establish a fish hatchery in their section.

On October 29th, a visit was made to Marysville, to assist in the prosecution of the case of The People vs. Casey. Casey was prosecuted for having in possession fresh salmon out of season. The defense was that the fish had been in his possession for three days and were not fresh. After a jury trial before Judge Garber, the case was submitted to the jury,

which considered it for forty minutes, when they announced that they could not agree, and that they stood eight for conviction and four for acquittal. The case was then dismissed.
Respectfully submitted, F. P. CALLUNDAN,
Chief of Patrol.

The report was accepted and placed on file.
The Board then adjourned, to meet on the first Tuesday in December, at which time the annual reports of the various officers will come up for consideration.

Chief of Patrol, F. P. Callundan, on November 6th arrested Lee Toy, a Chinaman, in the Washington Market for having in his possession striped bass under weight. Lee Toy was let out on bail—$50 cash. When the case was called in Judge Rix's court the celestial did not answer and his bail was forfeited.

The State Fish Commission of Oregon, like those of all new States, where fish culture has been taken up, has just been subjected to the annoyance of exploding the usual groundless charges that the work done by them is of no value to the State. Governor Pennoyer was led to make a personal inspection of the salmon hatcheries of that State, and the result has been a complete vindication of the State Board and its methods of work. It developed, during the investigation, as published in the Oregonian, that the charges originated from a class of poachers and lawless salmon fishers, to who the State Board was objectionable, owing to the fact that the latter insisted that the law regarding the taking of salmon should be observed.

The Origin of Fish Culture in the United States.

A correspondent in a recent issue of Shooting and Fishing submits some extracts from a valuable paper read by Judge Emory D. Potter, member of the Fish Commissioners of Ohio, at the nineteenth annual meeting of the American Fisheries Society. The paper treats of the history of fish culture in America.

He says: "As but few persons now living, beside myself, since the death of the lamented Dr. Garlick, were present at the birth of the first fish artificially produced in America, it may be interesting to the gentlemen of this society to hear some account of the first fish propagated upon this continent.

In the winter of 1853, an account was published in the National Intelligencer, of Washington, of the experiments of two unlettered fishermen, Gehin and Remy, of the Vosges Mountains, in Lorraine, then a province of France, in which they succeeded in the incubation and hatching of a great number of fishes of that region. This account fell under the notice of Dr. Theodotus Garlick of Cleveland, who at once entered into the scheme of making experiments in the artificial propagation of the brook trout, *Salmo fontinalis*.

A few miles from Cleveland was a deep ravine through which passed a small cold stream, fed by several cold springs issuing from the adjacent bank. Across this ravine was thrown a dam, raising a deep pond covering over half an acre of ground. The next thing was to procure the parent fish. An expedition was started to Port Stanley, in Canada, and another to Sault Ste Marie, in Michigan, both of which were successful, procuring in all some fifty trout of good breeding size. These were placed in the pond in June, 1854. A breeding place was levelled off at the head of the pond, covered with gravel. I spent the season in Cleveland, and visited the pond daily with Dr. Garlick and found the fish doing well. About the first of November, on visiting the pond, we discovered two small trout making a spawning bed, and in the course of ten days the bed was covered with fish The next thing was to prepare hatching facilities.

A small cabin was erected, over one of the largest springs, about ten feet square. Six boxes were procured about one foot square. There was over a dozen feet fall from the spring. These boxes were terraced from the spring down, with a spill from one box to the other, guarded by a screen, filled about two-thirds full of fine gravel, and the hatchery was complete. I shall never forget the expression of his countenance as he lifted the first pair of gravid fish from the pool. The usual operation of stripping the fish and fecundating the eggs was performed, and the eggs gently spread over the gravel in box one, and the water was let on. In the same way the boxes were all filled, and the work was done. A padlock was placed on the door, and the doctor was happy. We visited the hatchery often to remove unfecundated eggs, of which very few were found. On visiting the hatchery about the latter part of January the eyes appeared in the eggs, and about the 1st of March, 1854, on visiting the works there lay prone on his side, on his gravelly bed, the first baby fish artificially propagated on this continent. Then followed the hatching, till the boxes were alive with young trout."

As I have said, it is very interesting to hear in detail from an eye witness about this notable event, but an historical event should be historically correct, and it is simply impossible to hatch trout in March, 1854, from parent fish reduced to possession from a wild state in June, 1854, for it seems to be a physical law that one cannot artificially hatch young from mature fish four months previous to the time of catching the parent fish. The paper bears evidence of very hasty proof reading, and it may be from this or it may be that Judge Potter inadvertently used the wrong date in one instance, and thus made a mix of the figures. However this may be, it is to be regretted that the American Fisheries Society should have fathered such a contradiction concerning the origin of the fish culture in America. Dr. Garlick has made this matter of dates very clear in his paper read before the Cleveland Academy of Natural Science (now Kirkland Society of Natural Sciences), on the 17th of February, 1854. In it he says that the trip to Sault Ste Marie was made in August, 1853, and the trip to Port Stanley during the month of September the same year. He got down three lots of trout, about 150 in all, from the "Soo," after losing the first shipment. From Port Stanley the Dr. procured about forty more trout. These fish were all planted in the pond prepared for them, and on the 15th of November was discovered the first evidence that the fish were about to spawn. On the 21st of November, 1853, he spawned the first pair of trout and this is how he described the operation: "I partly filled the earthen vessel with water, and taking the female in my left hand, and making gentle pressure on her abdomen with my right, the eggs were forced into the earthen vessel containing the water; the male was treated in precisely the same manner, forcing the spermatic fluid into the same vessel; the appearance of the eggs was almost instantly changed from their bright golden orange color to a pale transparent yellow; they were then placed in running water with the vessel containing them."

On the 9th of January, 1854, one of the trout eggs was placed under the microscope of Dr. Goadby, then lecturing in Cleveland, and the cells, blood vessels and eyes were perceptible. Jan. 22, 1854, the first young trout was hatched. Dr. Garlick says: "It was very lively in its motions, but could not be considered an expert swimmer." Owing to imperfections in his hatching arrangements, accumulations of sediment destroyed the eggs by hundreds, and he says: "To avoid their further destruction, on the 26th of January we brought the remaining eggs to our office, and placed them in a glass jar and supplied them and the young fish daily with fresh water. In this situation they have remained until the present time, the young fish making their appearance from day to day, the last one rupturing its oval envelope on the 10th of February."

Dr. Garlick gives credit to Prof. Ackley for assistance in his experiments, and, in the beginning of the paper from which I have quoted, he says: "Early in the spring of last year (1853), Prof. H. A. Ackley and myself determined to make the experiment of artificially breeding fish." Prof. Ackley prepared the trout pond, while Dr. Garlick made the several trips for breeding fish. Dr Elisha Sterling, of Cleveland, who was also familiar with Dr. Garlick's experiments, very curiously makes the same slip in giving a date concerning this experiment.

Dr. Sterling presented the writer with a portrait of "Naisd Queen," Dr. Garlick's pet trout, and underneath it wrote: "This is an historic fish; from her womb came the first spawn ever artificially hatched in America. . . . . The Naiad with her mate weighed 1½ lbs. each and were captured in the Sault Ste Marie rapids in 1854." Of course the doctor doctor meant to write 1853, and has said so frequently in other papers. Judge Potter in his paper apologizes for the crudeness of it, owing to illness and the haste in which it was finally prepared; and, no doubt, if his attention were called to the slips of the pen, or carelessness of the proof-reader, he would be glad to have these corrections made in the interest of accuracy. Certainly the American Fisheries Society cannot desire that the transactions of the Society shall perpetuate an error, unexplained, concerning the dates in connection with Dr. Garlick's experiments in fish culture."

BENCH SHOWS.

Northern Illinois Poultry and Pet Stock Association's fifth annual bench show, Rockford, Ill., December 10, 11, 12, 13, 14, 15 and 16. John Teague Secretary Kennel Department.

The Central Indiana Poultry Association's fifth annual bench show, Richmond, Ind., December 10 to 17. J. O. Myers, Secretary.

1891.

The Buckeye Poultry and Pet Stock Association's bench show, Galon, O., December 30 and 31, and January 1, 2 and 3. James Sterling, Secretary.

Michigan State Poultry and Pet Stock Association's twelfth annual bench show, Jackson, Mich., January 7, 8, 9, 10, 11, 12, 13 and 14. S. H. Slifer, Secretary.

Central City Kennel Club's inaugural bench show, Jackson, Mich., January 10, 11, 12, 13, and 14. Dr. E. L. Kimball, Secretary.

South Carolina Poultry and Pet Stock Association's International Exhibition, Charleston S. C., January 13, 14, 15 16 and 17. Benj. McInnes, Jr., Secretary.

Louisiana Poultry and Pet Stock Association's first annual bench show, New Orleans, La., January 20, 21, 22, 23, 24 and 25. A. E. Shaw, Secretary.

Elmira Poultry and Pet Stock Association's bench show, Elmira, N. Y., January 21, 22, 23, 24, 25 and 26. Carl Hart, Secretary.

South Carolina Kennel Association's inaugural bench show, Greenville, S. C., January 27, 28, 29 and 30. F. F. Capers, Secretary.

Westminster Kennel Club's fifteenth annual bench show, New York, February 24, 25, 26 and 27. James Mortimer, Superintendent.

Maryland Kennel Club's second annual bench show, Baltimore Md., March 3, 4, 5, and 6 W. Stewart. Diffenderffer, Secretary.

Duquesne Kennel Club's inaugural bench show, Pittsburgh, Pa., March 10, 11, 12 and 13. ——, Secretary.

Massachusetts Kennel Club, Lynn, Mass., second annual bench show, March 24, 25, 26 and 27. D. A. Williams, Secretary.

New England Kennel Club's seventh annual bench show, Boston, Mass., March 31, April 1, 2 and 3. E. H. Moore, Secretary.

California Kennel Club's bench show, San Francisco, Cal., April ——, 1891. J. B Martin, Secretary.

Cleveland Kennel Club's fourth annual bench show, Cleveland, O., April 1, 2, 3 and 4. C. M. Munhall, Secretary.

Mascoutah Kennel Club's third annual bench show, Chicago, Ill., April 8, 9, 10 and 11. O. H. Goodrich, Manager.

FIELD TRIALS

The National Beagle Club's first field trials, Hyannis, Mass., November 4, 5, 6, 7 and 8. F. W. Chapman, Secretary.

The Robins Island Club's ninth annual field trials, Robins Island, November 7. Walter L. Wellington, Secretary.

Eastern Field Trials Club's twelfth annual field trials, Otterburn Springs, Amelia County, Va., November 17. W. A. Coster, Secretary.

Central Field Trial Club's second annual field trials, Lexington, N. C., December 1. C. H. Odell, Secretary.

Philadelphia Kennel Club's seventh annual trials, December 15, Deatonville, Va.

1891.

Southern Sportsmen's Association's annual field trial, Lafayette, La., January 13. John K. Renaud, Secretary.

Pacific Kennel Club's eighth annual field trials, January 19, Bakersfield, Cal. H. H Briggs, Secretary.

Southern Field Trial Club's third annual field trials, New Albany, Miss., February 2. T. M. Brumby, Secretary.

Whelps.

P. D. Linville's English setter Florine, whelped six pups (4 bitches 2 dogs) by Dan Gladstone.

Mr. Charles Wilson's Fanny by Dan Gladstone threw a litter of nine pups on Oct. 13th, one of which has since died.

Sales.

Mr. J. B. Martin (San Francisco, Cal.) has sold —— Mastiff dog pup by Jackson—Jess, whelped Oct. 3rd, 1890, to Mr. Daniel Everett, San Francisco, Cal.

——Mastiff bitch pup, same litter to J. A. Callender, Los Gatos, Cal.

Mr. Matt Kerr (San Francisco, Cal.) has sold Queenie, pug bitch, fawn with black mask to J. B. Martin, San Francisco, Cal.

Visits.

November 15th.—Mr. E. Cawston's Fox Terrier LASSIE (Laddie ex Oxford Milley) to Mr. C. A. Sumner's BLEMTON VESUVIAN (14,290) (Champ Lucifer ex Blemton Vesta) at Los Angeles

Mr. George Pettis (Tibnion, Cal.) Foxterrier bitch Jess to J. B. Martin's (San Francisco, Cal) Blemton Shiner A. K. C. S. B., 14277, on Nov. 18th, 1890.

CALIFORNIA LEADS IN COURSING.

The Meet at Merced Without a Parallel in the History of American Coursing.

California Carries off the Honors in Every Event, Winning With Ease—All Prizes Remain at Home.

What proved to be one of the finest day's coursing ever witnessed in the whole country was presented by the opening events of the programme of the Inter-state Coursing Meet at Merced on Tuesday last. The conditions were most favorable in every respect for the sport, which was witnessed by a large and enthusiastic gathering.

The weather was perfect, and the best of order was observed by the large concourse of people in attendance. Most of them came in carriages, but many were on horseback, among the number being a good representation of ladies, who by their presence rendered the occasion one of peculiar order and interest. The interest in the event was at a high pitch on Monday evening. Pool selling at Merced was lively until a late hour, and the shekels poured into the pools in a manner which bespoke the interest and faith which the public generally had in their judgment as to what the morrow would prove the best dog. Shortly after sunrise on Tuesday morning, wagons and carriages of every description were seen whirling away toward the coursing grounds, which lie some fifteen miles to the south of the pleasant town of Merced, all filled to their utmost capacity with interested parties.

The grounds were reached and preparations for the sport were completed about ten o'clock, when Mr. J. R. Dickson, slip steward, announced the opening event. This was a course between B. Grogan's brindle dog Wolfe Tone and P. Gallagher's black and white dog Fangh-A-Ballagh. The latter, a young dog, was not in good condition, and the former dog won, after a good dash, with points to spare.

P. Canty's black dog Whip and Tracey's black and white dog May Boy were next run. This hare proved a strong one, and the course was long, Whip winning far in the lead.

James Douglass' Prima Donna and Rookwood Landseer Kennel's Nettlefield, were next put in the slips. A good hare was given them, and this proved a most interesting course, the speed being exceedingly good. Prima Donna took the hare and worked it well, winning by several points.

Next came Rookwood Landseer Kennel's Verdure Clad and John Baker's Fanny. This proved a short course, the dogs running even to the hare when Fanny took it to the fence, making three points before it escaped. Verdure Clad was not given a chance to show what she could do.

The slips were then placed on Rookwood Landseer Kennel's Babazoun and Juanita. They ran quite evenly to the hare, when Juanita took it and worked finely for a long distance, making many points to her credit, when Babazoun come in and killed the hare, but too soon to avail him anything. This was a beautiful course, perhaps the finest of the day.

P. O'Connell's McGinty and W. F. Watson's Hoodoo. The former led to the hare by several lengths, when a crossing hare attracted Hoodoo's attention and diverted his course, leaving the former to have it all his own way.

P. Kelley's El Rio Rey and McInerny's King John. The latter won over a long gruelling course with points to spare.

D. J. Healy's Baby and P. Canty's Play Boy ran a close course the latter winner.

D. Shannon's Sea Shell and Jas. E. Watson's Saturday Night ran a peculiar race. Unfortunately the latter sustained a severe fall early in the race, and the beautiful Sea Shell had it all her own way and work for nearly three miles.

M. A. Howard's Maud Jones and Rookwood Landseer Kennel's Norwegian ran a very close race, the former winning, however, by several points.

J. J. Rademaker's Al Farrow and D. Shannon's El Rey ran a pretty course, the former winning by two points.

John Egan's Maid of Erin and D. J. Healy's Kingston ran a closely contested course, the former winning by a few points.

Ed O'Connell's Snowball and P. Canovan's Examiner ran a most interesting course, the former proving his superiority by several points.

James E. Watson's Brunnette and T. J. Cronin's Dan B, ran one of the most beautiful courses presented, the former winning handsomely. Unfortunately, this beautiful little bitch at once caught sight of another hare and chased it for nearly three miles further, dying from the effects of this continued exertion shortly after being recaptured.

Mr. Tiernan's Catherine Hayes and Ed O'Connell's Susie S ran a long course after a strong hare, the former falling into a pool of water, but recovered herself handsomely and speedily closed the distance of some two hundred yards lost, winning with ease.

Jas. Shanahan's Jim Corbett and J. H. Watson's Waterwich came to the slips. The latter was out of order, and the former won easily.

J. Hough's Dexter and John Egan's Bessie started finely, but the latter unfortunately fell, and the former had it pretty much his own way.

T. J. Cronin's Sam Nash and P. F. Canovan's Freestone ran a grand course, the former doing some very fine work and winning.

T. J. Cronin's Lookout and H. Wormington's Lady in Blue started finely, but the former won with points to spare.

McInerny's Ben and D. J. Healy's Geraldine proved a close match. They ran splendidly, the former winning by a very clean pick up and kill.

McInerny's Misohief's Last and Thos. Hall's Joe McAuliffe ran a beautiful course, the former working the hare in a peculiar manner, running with nose well to the ground and keeping her hind legs well under her body.

J. H. Watson's Dry Time and J. Bryne's Nellie Bly ran a very fast course, but not a long one, Dry Time winning.

Ed O'Connell's Tralee Boy and J. R Dickson's Dandy Jim ran a remarkably swift and long course, the latter winning.

John Eagan's Governor and H. Boyd's Bo-Peep ran a beautiful race, the former leading for some time, when the latter made a go bye and killed the hare too quick to enable her to score up with Governor.

SUMMARY.

MERCED, CAL., October 18th.—THE INTERSTATE COURSING ASSOCIATION—Prizes: first, $500; second, $300; third $100; $20 to each dog winning two courses.

B. Grogan's br d Wolf Tone,	beat	P. Gallagher's blk w d Faugha-Ballagh.

SECOND DAY.

The second day of the Interstate Coursing, Association's meet at Merced opened with a clear sky and a warm, pleasant atmosphere. The crowd in attendance was large, perhaps somewhat increased over that of Tuesday's. Every one was in splendid humor, and the excitement was well wrought up as to the outcome of the day's sport.

The owner of each and every dog in the events of the day were practically sure of being able to distance the field, and as a result pocket the largest cash prize ever given at a coursing event in America. As the results of the day figure out, every man leading dogs to the slips, but one, was surprised, as was most of the crowd. In fact the pools of the previous evening conclusively show that if any one thought Al Farrow would be the prize winner, he wisely kept such knowledge in his own mind where it would serve him nor any one else a good turn. The pools were liberally patronized the previous evening, as well as during the day. The betting on the second day was quite lively in the field. The interest was at its height when Mr. J. R. Dickson, slip steward, called the first dogs to the slip. They were:

FIRST TIES.

WOLFE TONE—WHIP—This was a good course, the dogs leading off well together after a strong hare. Whip gradually drew away and steadily lengthened the distance between himself and competitor, and shortening that between himself and the hare, winning handily.

PRIMA DONNA—FANNY—The former led to the hare, making first and second turns. Fanny then came in for two turns, when Prima Donna took possession of the hare and worked evenly and nicely to a grand finish, winning gracefully.

KING JOHN—PLAY BOY—The former had all the course to himself, winning with points to spare. It was a long, gruelling course.

SEA SHELL—MAUD JONES—The latter led up to the hare some three or four lengths ahead of the little bitch, and taking possession of the hare, worked it all the way, in splendid shape. Sea Shell is a young hitch of great promise, being gamy, but could not compete with her more experienced and matured coursing mate.

AL FARROW—MAID OF ERIN—This match was very fast and close for a time. The former finally took possession of the hare and worked it well over a long course, finally making a clean kill, the bitch coming in at the finish, but too late to do any effective work.

SNOWBALL ran a bye with Bruce, a splendid young dog that showed some fine work over the long course run.

CATHERINE HAYES—JIM CORBETT—The former led up to the hare, running a long course, showing some excellent work, finally killing with credit. At the latter turn Jim Corbett came in but too late to turn the scale.

DEXTER—LOOKOUT—The former did some grand work with but little or no assistance, working his hare in good shape and winning easily.

SAM NASH—BEN—This was a very fast and long course. the former leading up to the hare and making two fine turns, when Ben drew up and it was turn and turn alternately for the dogs for some time, when the former finally rushed up, picking up the hare and making a clean, nice kill and winning with points to spare.

MISCHIEFS' LAST—DRY TIME—The latter led to hare and made a turn, when the former took poasession of the hare and done considerable work. Then the pair came together and done some fine work making for two or more points each, when the hare straightened away and Mischief's Last took the lead tripping it up and killing it nicely and winning the course.

DANDY JIM—GOVERNOR—Governor led to hare and made the first and second turns, when Dandy Jim came in and it was point and point for the contestants for several scores. Governor then gradually drew away leaving Dandy Jim, and working his hare in fine order for some time, when both dogs were together at the kill. Governor won.

SECOND TIES.

WHIP—PRIMA DONNA—The latter led to the hare and scored two or more points, when Whip came in, took possession of the hare and worked a number of points to his credit. Prima Donna in trying to get in sustained a severe fall, Whip then turned the hare to her when she fell again, and Whip finished winning easily.

JUANITA—KING JOHN—This was an exceedingly fast and interesting course. The dogs were slipped to a hare which was in high grass; they deflected to either side but came together, crossing a small ravine, King John leading. He took the hare and made one turn, when Juanita came in and scored, King John took two turns and the bitch scored again, the dog coming in again made a turn and a clean kill, winning after a very pretty contest.

MAUD JONES—AL FARROW—Maud Jones was caught in the slips, giving the dog some eight or ten lengths the start. The bitch, however, drew up and the course commenced in earnest, Al Farrow showing his superiority. The bitch got in one turn when the dog took possession of the hare and killed it, winning with points to spare.

SNOWBALL—CATHERINE HAYES.—This was another notable course. Snowball led from the slips, the bitch pressing him closely. In coming toward a small stream of water the dog made a dash for the hare, missed, and the next instant both dogs were in the water. The hare turned about, both dogs following closely. The bitch then took possession of the hare, and worked it for several points, making a clean kill and winning easily, as Snowball quit 300 yards short of the finish.

DEXTER—SAM NASH,—The former never sighted the hare; the latter led on beautifully, killing after a short run. No course.

MISCHIEF'S LAST—GOVENOR. The latter led beautifully to the hare, the bitch coming in and making a close contest, but the dog secured possession of the hare, worked it finely, finally making a clean kill and winning handily.

THIRD TIES.

WHIP—KING JOHN.—Whip led up to the hare with slight advantage, King John took hare and worked it for several points, Whip coming in on the turn. It was a long grnelling course. Both dogs were in at the finish, King John winning.

DEXTER—SAM NASH.—The latter led up to the hare, took first turn and kept the hare for some distance, the course being straight away, neither dog making any points. Dexter came in on the turn and scored. It was a close finish, Sam Nash winning.

AL FARROW—CATHERINE HAYES,—The former led up to the hare by several lengths, scored point after point, finally making a clean kill, without allowing the bitch to score.

SAM NASH—GOVERNOR —The former led to the hare, making several points. Governor finally quit in disgust and looked at Sam Nash scoring a clean kill some three or four hundred yards further on.

FOURTH TIES.

KING JOHN—AL FARROW.—The latter led by about six lengths to the hare, took possession of it, working it closely over a long swift course, scoring frequently, finally killing it and winning easily.

SAM NASH ran a bye, a sharp course doing all the work and killing.

AL FARROW —SAM NASH —Now came the contest for the final prize between these two noble dogs Sam Nash was well worn, his feet were sore and the peculiarly heavy and swift work he had done had told severely on the noble animal. A long rest was taken, although the day was well spent, but there was not a murmur by any of the assembly; all were in sympathy with fair play. It was painfully evident to all that Sam Nash could not win the honors and money, for he was worn to a noticable degree. The dogs were finally placed in the slips when the good blood of Sam Nash showed itself as the faithful animal picked up for the race with that true grit only known among pure bloods. Al Farrow led to the hare worked it for several points, winding up by a clean kill, thus winning the race and honors above any other dog on the continent for coursing.

SUMMARY.

MERCED, Cal., Nov, 19, 1890.

Summary of ties run off in the great match commenced yesterday.

FIRST TIES.

Whip beat Wolf Tone.
Prima Donna beat Fanny.
Juanita ran a bye.
King John beat Play Boy.
Maud Jones beat Sea Shell.
Al Farrow beat Maid of Erin.
Snowball ran a bye.
Catherine Hayes beat Jim Corbett.
Dexter beat Lookout.
Sam Nash beat Ben.
Miscbief's Last beat Dry Time.
Govenor beat Dandy Jim.

SECOND TIES.

Whip beat Prima Donna.
King John beat Juanita.
Al Farrow beat Maud Jones.
Catherine Hayes beat Snow-ball.
Sam Nash beat Dexter.
Governor beat Miscbief's Last.

THIRD TIES.

King John beat Whip.
Al Farrow beat Catherine Hayes.
Sam Nash beat Governor.

FOURTH TIES.

Al Farrow beat King John.
Sam Nash ran a bye.

FINAL.

Al Farrow beat Sam Nash.

In point of interest and genuine coursing, the events of this meet stands as the high water mark of the sport, not only in California, but on the entire continent. It is spoken of by all of those present who have followed coursing all over the country as being without a parallel in all of their experience.

The grounds were superb, in fact, no improvement could be made in this respect; the hares were plentiful, strong and long winded, giving an opportunity for fully and severely testing the swiftness and endurance of the dogs; the management in all respects was in striking contrast to the meets of the past; in short, it was so perfect as to call forth only words of praise and commendation from all present.

Mr. J. R. Dickson, the genial and courteous Secretary of the Association, did the lion's share, and is responsible for much of the success which attended the meet.

Mr. John Grace, the Judge, did his work so well as to win the universal praise of the competitors and spectators, for the able and efficient manner in which he discharged the duties of that office.

Mr. James R. Wren, slipper, did his work in so uniform and satisfactory a manner as to call forth expressions of admiration from the entire assembly. Men who have coursed on all the most famous grounds of the country pronounce him to be the finest slipper they have ever met with.

All the field officers did their duty promptly, and there was not a hitch at any time in the programme.

Dr. Van Hummell spoke in the highest terms of praise of the meeting and of its excellent management. He intends sending a number of fine dogs to this state, that they may become acclimated. He desires to test fully the qualities of the best strains of blood, under the most favorable conditions in this state.

It is an unsolved problem as to the causes which led to the defeat of the fine dogs entered from the east. The change of climate must have much to do with the result, although the doctor says that he never saw such long and swift courses run in all his previous experience in coursing events. Mr. J. H, Watson, of New York, owner of Dry Time, a beautiful imported fawn bitch, of the very first breeding, winning first course over Nellie Bly, says that the result is a surprise, but cheerfully conceeds the palm to California.

He also is determined to meet us again on the coursing field, and will spare no pains to overcome all known or supposed hindrances which stand in the way of the fine bloods. Mr. F. G Stewart, of Hoosic Falls, N. Y., will remain in California. He is a practical dog man and an enthusiastic devotee of coursing. He will have charge of a number of eastern and imported dogs, and will set out at once to fit them thoroughly for the coursing matches of the future. All of the above named gentlemen are loud in their praise of the thorough manner in which the dogs of California are handled and of their marvelous speed and surprising staying qualities.

THE WINNERS.

AL FARROW, the winner of the first prize, is a large brindle dog weighing 65 pounds, and has remarkable staying qualities. He could repeat his performances most readily with a night's rest. He came through without a scratch. He is by Menlo Chief out of Black Bess; Menlo Chief by Monarch. He was bred by Mr. Cooney, of San Jose.

SAM NASH is a beautiful white and black dog by Chicopee out of Lily of Killarney, and was bred by T. J. Cronin, of this city.

KING JOHN, the winner of the third prize, is a beautiful black and white dog by Irish Spy out of Banshee, she by Templar out of imp Timpete, Templar by Tevis out of imp Teresa by Baconsfield. This dog was bred at Merced.

Juanita. Maud Jones, Prima Donna, Whip, Snowball, Dexter, Governor, Catherine Hayes and Mischief's Last are the dogs winning two courses and getting $20 each.

The open field on which the coursing occurred contains more than 1,000 acres with grass enough to furnish a cover for the thousands of hares found upon it, and it is just the ground for this sport. The long drive of fifteen miles from the city is the only objection that can be brought against it.

OFFICERS.

The officers of the Interstate Coursing Association are as follows:

President, D. Shannon; Vice President, H. Wormington; Treasurer, J. C. Nealon; Secretary, J. R. Dickson.

FIELD OFFICERS.

Judge, John Grace; Slipper, James Wren; Slip Steward, J, R. Dickson; Flag Stewards, Thos. Brady, J. W. Butterworth, P. A. McDonald, Charles Fleming, J. H. Given and M. O'Brien.

The meeting was run under the Occidental Coursing Club's rules.

The consolation stakes are necessarily omitted from this issue, but will appear next week.

The Eastern dog world were suprised that the greyhounds of that section came out second best at Great Bend, Kansas. They may feel better after the coursing trials at Merced, next week, and again they may not.

Mr. A. P. Vredenburgh, Secretary A. K. C., informs us that the Washington City Kennel Club, of Washington, D. C., has filed with the A. K. C. its claim for March 16th to 19th, 1891, for its inaugural bench show.

Mr. M P. McCoon of El Cajon, San Diego County, writes us that the absence of the Spaniel entries in the recent Stockton bench show, representing his kennels, was owing perhaps to the fact that the lovers of this beautiful little animal care more for his qualities as a field dog than for the purposes of show. Mr. McCoon's kennels are represented in many parts of the State, twenty or more of them in and about Stockton.

The American Field and the Forrest and Stream, have placed the coursing men of this coast under obligations to them by the friendly and courteous mention made of the coursing event at Merced which takes place next week under the auspicies of the Inter-State Coursing Association. Mr. J. R. Dickson, the Secretary of the Association, has shown commendable zeal in pushing the arrangements for this splendid project.

At a meeting of the Southern California Kennel Club held at Los Angeles last week, it was decided to co-operate with the California Kennel Club in securing an Eastern judge to come out next spring and act at both bench shows to be given by the above named clubs. The California Kennel Club has suggested Mr. John Davidson of Monroe, Michigan, to act in that capacity, provided he can be secured at that time.

The conditions and outlook for a good show at that time are most favorable. Since the last show held by the Pacific Kennel Club in April 1889, a large number of excellent dogs have been imported to this State, especially among the non sporting classes. Among them may be mentioned Mr. Livingstone, Mr. Colegaris, Mr. Johnson and Mr. Sloss, who have each some splendid Great Danes, the cost of which would astonish all those who are not familiar with the price of good dogs.

In Mastiffs we have some new faces. Mr. Alfred Bouvier and Mr. Gavin McNab and Mr. Israel have each brought out some good ones, which will be benched at the coming show.

In Foxterriers, Count Valensin, Mr. Charles Sumner and Mr. J. B. Martin have each imported a dog, which are far ahead of the dogs heretofore exhibited here.

In Cocker Spaniels a large entry is expected, at least 30 of this breed will be benched. and the recent importations of Dr. A. C. Davenport and Mr. Rennie will come together for the first time.

In bloodhounds, the kennels of Mr. C. H. Kobuke and J. H. Bridge will be represented by some of the grandest specimens of this breed in America, each of these gentlemen being the possessor of dogs that have won prizes on the Eastern show bench. It is a fact worth noticing that a pure bloodhound has never been exhibited in San Francisco, and probably not in this State.

SYNOPSIS
OF THE
Hollywood Trotting Stock,

Property of B. C. HOLLY, Vallejo, Cal.

—TO BE SOLD AT—

PUBLIC AUCTION,

WEDNESDAY, January 7, 1891, commencing at 10:30 o'clock, at

Hollywood Farm,

Situated three miles from Vallejo on the Napa Road. All Trains Stop at Flosden.

NAME.	C'l r and Sex	FOAL'D	SIRE.	DAM.
Election	h s	1884	Electioneer.	Lizzie H, by Whipple's Hambletonian; 2nd dam Lizzie Harris by Comms, he by Green's Bashaw
Mountain Boy	blk s	1882	Kentucky Prince.	Elsie by Messenger Duroc; 2nd dam Green Mountain Maid (the dam of 7 in 2:3[illegible] and of Electioneer, the sire of 69 in the list.)
Kafir	h s	1887	Alcazar, 2:20½.	Flower Girl by Arthurton; 2nd dam Flora (pole record 2 33) by General McClellan
Mart Boorhem	b s	18[illegible]	Sidney, 2:19¼.	Towhead by Echo; 2nd dam by Flaxtail.
Almonition	blk s	1888	Alcona.	Pansy by Cassius M. Clay, Jr., 2nd dam Lady Richelieu by Richelieu.
Hollywood	b s	1889	Woodnut, 2:16½.	Aurelia by Albert W; 2nd dam Pacific Maid by Elmo, sire of Alfred S (2:16).
Wildwood	b s	1889	Woodnut, 2:16½.	Hattie W by Alaska; 2nd dam Sally Coward by May Boy (sire of Controller); 3d dam Young Molly by Young Lodi.
Woodpatch	b c	1889	Woodnut, 2:16½.	Lady Patchen by George M. Patchen, Jr.; 2nd dam by Norwood, 3d dam by Langford.
Captain Drake	ch c	1889	Woodnut, 2 16½	Patti P by Admiral; 2nd dam by Venture.
Lissette	b'km	1885	Abdallah Wilkes.	Musette by Startle (sire of Majolica, 2:15); 2nd dam Becky Sharp by Billy Denton. Stinted to Woodside.
Aurelia	b m	1883	Albert W, 2:20	Pacific Maid by Elmo (sire of Alfred S., 2.16); 2nd dam by David Hill; 3d dam by General Taylor. Stinted to St. Patrick.
Hatlie W	b m	1883	Alaska.	Sally Coward by May Boy; 2nd dam Young Molly by Young Lodi. Stinted to Election.
Pink, 2:23¼	ch m	1882	Inca 2:27.	Dam by Echo; 2nd dam by Rifleman (sire, Colonel Lewis 2:18¾).
Annie Almont	b'km	1886	Elton's Almont.	Madam Nelson by John Nelson. Stinted to Election.
Economy, 2;30	b m	1884	Echo.	Lady Berky by Muldoon; 2nd dam Berky Mare by St. Clair. Stinted to Woodside.
Clara Belle	br m	1883	Alaska.	Doole. Filly by Muldoon; 2nd dam by McCracken's Black Hawk. Stinted to Election.
Flora G, 2:29¼	br m	1882	Altoona.	Dan by Conway's Patchen; 2nd dam by Jack Hawkins.
Violette	gr m	1881	Geo. M. Patchen, Jr.	Viola by Echo; 2nd dam Woodbine by Woodburn. Stinted to Kabr.
Stella	b m	1888	Stamboul, 2:11¼	Lady Fay (dam of Del Fay) by Modoc Chief (thoroughbred).
Lady Patchen	b m	1884	Geo. M. Patchen Jr.	Dam by Norwood; 2d dam by Langford. Stinted to Election.
Victress	b m	1886	Victor.	Dam by Echo. Stinted to George Washington.
Belle	b m	1885	Gus, 2:26½.	By McDonald Chief. Stinted to Redwood.
Phyllis	ch m	1884	Admiral.	Daphne by Whipple's Hambletonian; 2d dam Phœbe Carey by Chieftan. Stinted to Kafir.
Nettie Ward	b m	1880	Echo.	Millie Mare by Goldfinder; 2d dam by Langford. Stinted to Kahr.
Jennie H	gr m	1883	Echo.	Lightfoot (dam of Elmonte, 2:29), by Hubbard; 2d dam Brunette by Rifleman (sire Colonel Lewis, 2:18¾). Stinted to Mountain Boy.
Luna (p)	b m	1885	Dashwood.	Cripper by Echo
Miss Bedonin	b m	1886	Bedouin.	By Milton Medium; 2d dam the dam of Nellie Burns, 2:27.
Mamie W	o f	1889	Wm. Corbitt.	Queen's Filly by A. W. Richmond, sire of Arrow, 2 13¼, Romero, 2:19¾; 2d dam Queen by Ben Wade (thoroughbred).
Vesta	gr f	1889	Woodnut, 2:16½.	Violette by George M. Patchen Jr.; 2d dam Viola by Echo.
Annie S	ch f	1889	Alcona Clay.	By Alcona.
Woodflower	br f	1890	Woodnut, 2:16½.	Dinah by Prompter; 2d dam by The Moor; 3d dam by Williamson's Belmont.
Lady Hill	gr f	1890	Indio.	Nettie Ward by Echo; 2d dam Mills Mare by Goldfinder
Ella S	br f	1890	McDonald Chief.	Phylis by Admirable; 2d dam Daphne by Whipple's Hambletonian.
Panchita	b f	1890	Eclectic.	Patti Patch by Alexander, 2d dam Emma Steitz by Mountain Boy.
Hattie P	ch f	1890	Happy Prince.	Hattie W, by Alaska; 2d dam Sally Coward by May Boy.
Princess	ch f	1890	Happy Prince.	Lady Patchen by George M. Patchen Jr.; 2d dam by Norwood.
Pansy	blk f	1890	Happy Prince.	Violette by George M. Patchen Jr.; 2d dam Viola by Echo.
Carrie	blk f	1890	Happy Prince.	Clara Bell by Alaska; 2d dam Dooly Filly by Muldoon.
Red Oak	b c	1890	Redwood, 2:21¾.	Victress by Victor; 2nd dam by Echo.
Wilson	b c	1890	Happy Prince.	Aurella by Albert W.; 2d dam, Pacific Maid by Elmo.
Mount Holly	blk c	1890	Mountain Boy.	Lisette by Abdallah Wilkes; 2d dam, Musette, by Startle.
Marcus Daly	b c	1890	Woodnut, 2:16½.	Irish Lass by Imp. Kyrle Daly.
Denio	ch g	1890	Mount Vernon.	By Iowa Tuckyha; 2d dam (record 2.23½) by Hambletonian 10.
Irish Lass	br m	1882	Imp. Kyrle Daly.	Daisy Miller by Revolver. Stinted to Mountain Boy.
Ninena	ch m	1881	Jim Brown.	Nannie Hubbard by Hubbard. Stinted to Reveille, (sire of Tycoon.
Why Not	ch m	1886	Three Cheers.	By Joe Hooker, full sister to Fred Collier. Stinted to Prince of Norfolk.
Flosden	ch m	1886	Joe Daniels.	Amanda L. by Shamuon.
Lilly	ch m	1885	Milner.	By Imp. Intruder.
Fusilade's Last	ch m	1885	John W. Norton.	Fusilade by Wardance.
Fusileer	b c	1890	Sid.	Fusilade's Last by John W. Norton.
Sidney	b c	1890	Sid.	Ninena by Jim Brown.
Joslyn	ch c	1889	Hamlet or Ironsides.	Ninena by Jim Brown. (For extended breeding of thoroughbreds see Bruce's American Stud Book.

Announcement.

Owing to ill health, I have fully determined to sell at auction my entire stock of trotters and thoroughbreds. I have been an extensive buyer, both privately and by auction, for the past four years and have endeavored to get the best. Whoever will take the trouble to glance over the column of sires, represented in the sale, and then notice the producing families that support them on the dam's side will see that nearly all the remarkable getters are included.

TERMS OF CREDIT.

While the terms of the sale are cash, responsible buyers may have the privilege of credit for an agreed time, by observing the following conditions: Buyers must furnish satisfactory security, and must, prior to the opening of the sale, notify the owner and obtain his approval, specifying the drawer and endorser of the proposed note. Notes to bear six per cent., and payments to be made at the Vallejo Commercial Bank. In reference to credits, address B. C. Holly, Vallejo, Cal.

For Catalogues, ready about December 1st, address

B. C. HOLLY, Vallejo, Cal.

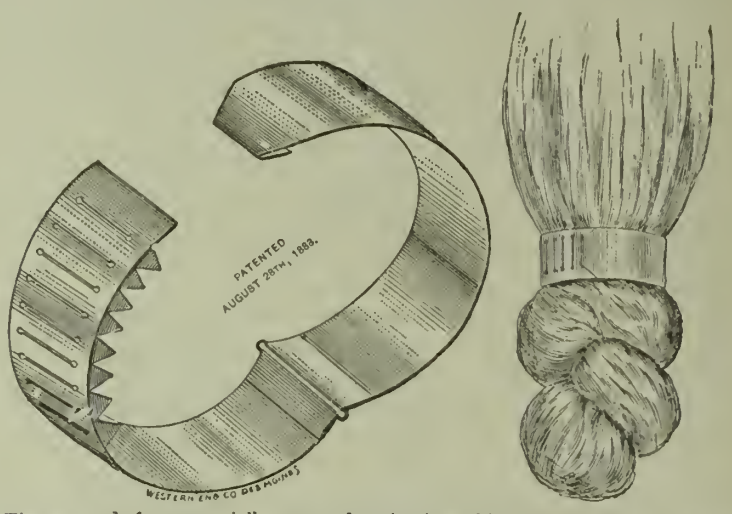
THE
Perfection Horse-Tail Tie.

A Simple Device for Holding the Hair of a Horse's Tail up and Protecting it from the Mud.



These Ties are made from especially prepared spring brass highly polished, or nickel plated, and are all their name implies, "Perfection." Unlike any other Tie or Holder, it does not

Stop the Circulation, Deaden or Cut the Hair, Stretch or Shrink

after being wet, and being a solid metal band is very ornamental.

DIRECTIONS.—Twist or braid the tail part way down and turn it up, either above or below the point of dock—above is preferable—wrap the ends around in opposite directions, letting them meet on top; place teeth over ends and clasp securely.

The only Tie on the market that sells on sight. 50,000 now in use. Endorsed by Horsemen everywhere.

BRASS 25 Cents, Large Size 30 Cents; NICKEL 30 Cents, Large Size 35 Cents.

The GREATEST SALE of THOROUGHBREDS EVER HELD in AMERICA

Taking Quality, Numbers, Breeding and Performances.

BRUCE & KIDD'S GREAT COMBINATION SALE

—TO TAKE PLACE ON—

SATURDAY, TUESDAY & WEDNESDAY, December 6, 9 & 10, 1890

At TREACY & WILSON'S STABLE, LEXINGTON, KY.

ON SATURDAY, DECEMBER 6, they will offer the entire stud of Mr. Amos G. McCampbell, comprising forty-one head of weanlings, yearlings, horses in training, stallions and broodmares. Among those in training will be found the great filly Flyaway, Edith L., Eugenia, Rollin Hawley and Grayson, all winners. The stallions are Tom Martin, by Longfellow, dam Athlaric by Gilroy, out of Breuna, granddam of The Bard, etc. He was a capital race horse, and from his breeding and performances should make a good sire. Jim Gore, by Hindoo, dam Katie by imp. Phaeton, won the Harold and Carriage Builders' Stakes at two years old, the Clark and Boulevard Stakes and St. Louis Derby. He is unexceptionally bred. Nick Finzer (own brother to Ripple), by Lisbon, dam Maggie Hunter by imp. Australian. He won the Sanford Stakes, one mile, at two years old, in 1:45¾. Longside, by Longfellow, dam imp. Lady Stockwell by Knowsley (son of Stockwell), won the Fairview Handicap at two years old. Among the twenty-six broodmares are some imported ones and the rest native. Mr. McCampbell spared no expense in buying his broodmares, which are one and all rarely bred and generally in foal.

ON TUESDAY AND WEDNESDAY, DECEMBER 9 AND 10, they will offer some hundred and seventy-five head, consisting of weanlings, yearlings, two, three, four and five-year-olds, stallions and broodmares. Tuesday's sale will consist mainly of yearlings, some seventy odd in number, opening up with the entire lot of Nantura yearlings, including brothers to the renowned Freeland, Sally Burns and Response, sisters to Irish King and Louisa Forrest, and half sisters to Persan, Test and Hailfellow. Among the other yearlings will be found own brothers to Pride of the Great, Village King, Harrison Ofalece, and Kosciusko Key; sisters to Ollie Benjamin, Mose K., Lee S., Ed Leonard and Lemoine H.; half brothers to Pauline, Ed Hopper, Round Dance, Square Dance, Emigrant, Lurau and War Whoop; half sisters to Amos A., Masterpiece, Pessara, Blackstone, Borderer, Nell Booker, Watch Me and Frontenac. Among the stallions are Wanderer, Bob Miles, Little Ruffin, Lord Clifden, Misfortune and Minstrel. The broodmares are of high class, seventeen of them dams of winners, and a number of young mares of fashionable breeding and untried in the stud. Space will not permit a description of the various horses and mares, but full details will be found in the catalogue. Sufficient to say that this is the greatest and best offering of thoroughbreds ever placed before the public at auction.

For catalogues address this office or

BRUCE & KIDD, Lexington, Ky.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Address,

THE BREEDER & SPORTSMAN,

313 Bush St., San Francisco, Cal.

Catalogues Compiled.

Pedigrees Traced & Tabulated

The undersigned, having had an experience of over five years in work of this kind, is well posted in regard to trotting pedigrees and performances, and will give special attention to compiling catalogues, circulars, advertising cards, tabulating and tracing pedigrees etc. My facilities are unexcelled for doing this sort of work, and parties can arrange with me to do both compiling and printing at reasonable rates. Samples, estimates and references will be furnished parties contemplating having work done. Satisfaction guaranteed.

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,

Santa Clara P. O., Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnehago, son of imp Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

KILLIP & CO., Auctioneers,

22 Montgomery Street S. F., Cal.

For Sale

A FIRST-CLASS

Napa County Farm

—OR—

STOCK RANCH,

800 Acres Improved,

SITUATED TWO AND A HALF MILES FROM NAPA CITY, with good roads leading thereto, a good hard finished house of nine rooms, with all modern improvements, streams running all summer, a great amount of live oak and black oak timber. It lies in a fruit belt, surrounded by fine vineyards and orchards growing upon the same quality of soil, and originally a part of this tract. About one-half hill, and one-half rolling land, but none of it is steep and all easily cultivated, splendidly situated for the breeding of fine horses. Price, $65 per acre. Further particulars given at this office.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. In any ordinary weather the roads are very good, and they are fairly good after the unusually heavy rainfall of the past winter.

All stock sent from San Francisco may be brought over by Garcia's Express, No. 3 Market street, San Francisco. They also have an order box outside of Hawley Bros.' Hardware house on the corner of Market and Beale streets. The express leaves San Francisco on the Creek route boat, which starts at 1:30, but all orders should be in the order box at Market and Beale streets by 10 o'clock, or at the office, No. 3 Market street, by 11 o'clock at the latest. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car.

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Soutber Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

For Sale.

THE STANDARD STALLION

CADUCAS 10,480,

By Almont Medium 2:28½, dam Amelia T., (by Alcona 730), full sister to Prince Warwick 2:16½. Caducas is a handsome two-year old, thoroughly broken, and while he has not been driven for speed as yet, he shows great promise. Also

Washington Park Club, CHICAGO, Coney Island Jockey Club, Sheepshead Bay, L. I.

1891.

The Friendly Stakes,

To Close DECEMBER 1st., 1890.

A Sweepstakes for two year olds, (foals of 1889,) to be run at the Summer Meeting of the Washington Park Club, Chicago, and at the Autumn Meeting of the Coney Island Jockey Club at Sheepshead Bay, L. I; of $50 each, $25 f; $3,000 to be added by each Association. Should the same horse win both races, $1,000 additional in plate or money will be given, half by each Association. Horses entered at either place incur liability for one forfeit only, and are entitled to start at either or both places; those starting for the Friendly Stakes at Washington Park are entitled to start for the Friendly Stakes at the Coney Island Jockey Club without incurring liability for starting at the latter place.

Conditions of the Friendly Stakes to be Run at the Summer Meeting of the Washington Park Club, 1891.

Colts to carry 118 lbs; fillies and geldings, 115 lbs. A winner of any two-year-old stake at Washington Park of the value of $2,500 to carry 5 lbs. additional. Maidens never having run second for a race of the value of $3,000 allowed 7 lbs The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750; and the third $250 of the added money. Five furlongs,

Conditions of the Friendly Stakes to be Run at the Autumn Meeting of the Coney Island Jockey Club. 1891.

Colts to carry 118 lbs; fillies and geldings, 115 lbs. The winner to receive half of the joint subscriptions and $2 000 of the added money; the second $750; and the third $250 of the added money Winners of a race of the value of $10 000, or of two races of the value of $5,000 each, to carry 10 lbs. extra; of one race of the value of $5,000, or two of the value of $3,000 each, 5 lbs. extra. Non-winners of $1,000 allowed 8 lbs. Three-quarters of a mile.

Note.---The Sweepstakes will be paid over on October 1st, 1891. The added money by each Association immediately after each race.

The value of each of the above races to the winner will probably be about $6,000, *and the only liability is* $25 *for non-starters.*

Nominations to be addressed to

THE CLERK OF THE COURSE, Coney Island Jockey Club, Fifth Ave., cor. 22d St., New York.

Or to J. E. BREWSTER, Secretary, The Washington Park Club, 32 Palmer House, Chicago.

Kentucky's Great Stallion

REPRESENTATIVE STAKE.

-:- ENTRIES CLOSE DECEMBER 1st, 1890. -:-

$10,000

Guaranteed by the Kentucky Trotting Horse Breeders Association.

FOR FOALS OF 1890, colts, fillies and geldings (the get of stallions that may be nominated in this stake), to trot as three-year-olds at FALL MEETING, 1893; mile heats, 3 in 5, in harness. On or before December 1, 1890, the stallions whose get may become eligible to start in 1894 must be nominated, and any stallion, even if dead, that has colts foaled in 1891, is eligible. Ten days prior to race the colts to represent the stallions shall be named, and there may be as many starters by one sire as there are different owners, but no person can be interested in more than one starter. The Association guarantees this stake worth not less than $10,000, except for a walk over, in which case the winner will receive the whole of the amount paid in. The guaranteed amount ($10 000), will be divided; $8,000 to first colt, $1,250 to second, $750 to third. If the stake exceeds $10,000, the whole of excess will go to NOMINATOR of stallion whose colt wins the race. Entrance as follows: $100 to name the stallion December 1, 1891; $50 to name the colt ten days ahead of race in 1893, and $100 the night before the race. Send entries to

N. B. The great $25,000 stake for foals of 1891 will be announced later.

THE BLOOD HORSE MEETING.

Last Saturday was as beautiful a day as the Blood Horse Association was ever greeted with, the weather being simply perfect, while the air had none of that rawness, which frequently militates against one's enjoyment when visiting the Bay District Track. Advantage was taken of this by the sport-loving community and almost 2500 persons assembled there to witness the exceedingly good field of runners which had been advertised to inaugurate the initial day of the fall meeting. The balconies and grand stand were graced by a large number of ladies, their elegant costumes lending a brilliancy to the scene that was extremely pleasing to the eye. The judges which had been selected for the day were Messrs. Tarpey, Thornton and Smith, The latter gentleman, however, after the first race gave way to Mr. Thompson, the well known Australian hookmaker; evidently the bookmakers had a good line of what horses were liable to win, for the favorites had handy finishes in each and every event. There were seven of the pencilers on hand prepared to do business with the betting public, in addition to which Messrs. Killip & Co. were kept hard at work in disposing of auction pools. The innovation which was introduced last year of having the horses called by the sound of the bugle was again carried out, and its cheery notes were a decided improvement on the bell, which is now obsolete on all Eastern courses.

The first event had ten starters, Rico owned by ex Senator L. J. Rose occupying the post of distinction as favorite, he selling at $8 to $5 when the books first opened, and afterwards receded to $6 to $5 as his owner passed down the line and backed his entry. Alfaretta for a time was a close second favorite, but as the money went in she gradually receded, and at the finish $5 to $1 could have been got against her. When the horses appeared on the track Henry Walsh was seen as starter and it must be confessed that he kept his temper admirably, considering the trying position in which he was placed. Alfaretta, Jackson and Prince's First were the unruly ones of the lot, although Kildare and King Hooker were entitled to some censure for their bad behavior. After a tedious wait the flag finally fell with Alfaretta and Kildare having a slight advantage. Little Charlie Dennison on Prince's First evidently made up his mind that his light weight would wear the others out, for he at once made play for the lead and at the middle of the lower turn had Prince's First a full length to the good. On rounding into the backstretch this had been increased to two lengths. At the half, however, Rico had closed up a gap and was on even terms with the son of the Prince and from here out, the race was virtually over as Rico came away and on the upper turn was leading by four lengths. Murphy seing that he had the favorite a sure winner, eased up and won in a common canter, King Hooker came in second and Alfaretta third. A complaint, however, was lodged against Clauncy, who rode King Hooker and after a careful consideration of the circumstances connected with the alleged foul, he was set back and Alfaretta given second place, Prince's First being given third. The following is the

SUMMARY.

Introduction purse $400, for three year olds and upwards, $15 from starters. Winners this year of one race at this distauce, when carrying weight for age or more to carry five pounds; of two or more such races, ten pounds extra. Maidens, if three years old, allowed seven pounds; if four years or over, twelve pounds. Starting money divided, 70 per cent. to second and 30 per cent. to third horse. One mile.

L. J. Rose's b g Rico by Shannon—Fanny Lewis, 106.....Murphy 1
T. S. Montgomery's br m Alfaretta by Wildidle—Moudsy, 115 ... . Narvaez 2
Dennison Bros.' ch c Prince's First by Prince of Norfolk—Lizzie Iddie, 102 ..... C. Dennison 3
Also ran: Revolver, 115; Dan M. Murphy, 118; Kildare, 115; Kilgariff, 108; Adelaide, 99; Jackson, 118; King Hooker, 102.
Time, 1:41½

Betting—Auction pools: Field $30, Rico $16. Books: Rico, 8 to 5; Alfaretta, 3; Kildare, Revolver, Jackson, 8 to 1 each; others 15 to 100

The Ladies' Stakes had originally twenty-four entries, of which three had been declared out some time ago. The night before the race all but four were declared to stay in the stable, the quartette of starters being Cheerful and Acclaim, both of which are by Three Cheers, Zingarella, a little filly by Ed. Corrigan, and Tearless by Wildidle. This race was also considered all over but the shouting when the horses came to the post; the best the bookmakers would do against Tearless being $1 to $3. This race had but little in it outside of the favorite. When Frank De Poister, who now acted as starter, dropped the flag, three of them started off nose and nose, Cheerful being away behind; Zingarella and Acclaim tried to cut out the running, but Tearless staid right with them, and when the five eighths pole was reached it was easily seen that Joe Narvaez on the favorite had the race at his mercy and could win whenever he pleased; coming down the stretch to the eye of an ordinary observer it looked like a close race between the Maltese Villa entry and Tearless, but at the draw gate Joe hit his mount just once with the cat gut, and the Palo Alto filly drew away, winning by three-quarters of a length, which might just as well have been a half dozen lengths had the rider so elected.

SUMMARY.

The Ladies' Stakes.—For two-year old fillies (foals of 1888); $50 each: $25 forfeit; or $10 if declared out on January 1, 1890, or $20 if declared out August 1, 1890. All declarations void unless accompanied by the money; with $400 added, second to receive $100, third to save stake. Winners of three stake races to carry five pounds extra. Closed Aug. 15, 1890, with twenty-four entries, of which three declared out. Three-quarters of a mile.

Palo Alto Stock Stock Farm's ch f Tearless, by Wildidle—Teardrop, 107 ..... Narvaez 1
Maltese Villa Stable's ch f Zingarella, by Ed. Corrigan—Minuet, 107 ..... Morton 2
G. H. Kennedy's c f Acclaim, by Three Cheers—Rosette, 107..... ..... Casey 3
Also ran: Cheerful, 107.
Time, 1:14½.

Betting: Auctions: Tearless, $20, field $12. Books: Tearless, 1 to 3; Acclaim, 10 to 1; Zingarella, 10 to 1; Cheerful, 50 to 1.

The third race was for a purse of $400 for two-year-olds, the distance being three fourths of a mile, and although originally a half dozen entries had been made, only three of them came out to face the flag, the trior being Getaway and Power owned by the Lone Stables, while Palo Alto was represented by the Wildidle filly Rosebud. This time the bookies made up their minds that there should be no chance at all for outsiders to win, and the prohibitive price of $1 to $6 was placed on Rosebud, Getaway being quoted at $5 to $1 and Power at $12 to $1. A beautiful start was effected, and the three ran head and head to the beginning of the upper turn, where Power made a little spurt, Rosebud quickly following, leaving Getaway to come away as best he might. Narvaez was again on the Palo Alto entry and never touched his mount with either whip or spur, and won a ridiculously easy race in 1:16, Power securing the second place.

SUMMARY.

Purse of $400 for two-year-olds; $15 each for starters. Winners of any two-year old race this year to carry three pounds; of two such races, five pounds; of three or more twelve pounds extra. Starting money divided. Three-quarters of a mile.

Palo Alto Stock Farm's ch f Rosebud, by Wildidle—Rosetta, 107 ..... Narvaez 1
Lone stable's blk c Power, by Powhattan—Lawn Tennis, 110 ... . Madden 2
Lone stable's b c Getaway, by Argyle—Cutaway, 110..... ....Hart 3
Time, 1:16.

Betting—Auction: Rosebud $50, field $8. Books: Rosebud 1 to 6, Power 8, Getaway 10.

The last race of the day was for the November Stakes, in which there were a half dozen starters, the betting being between Marigold and Odette, the former of which sold at $7 to $5, and the latter $9 to $5. Starter Walsh again took the flag, and very soon had them on the go, Sheridan and Wild Oats making the pace as they passed under the wire for the first time; Marigold was held well in behind, Odette being a good third. At the quarter Wild Oats was the first to show in front, the Santa Barbara representative, Naicho B, being a close follower. Murphy, who had the mount on Odette, passed to the front as the horses went up the backstretch, and was fully a length and a half in the lead of Wild Oats when the half-mile pole was reached; the daughter of Shiloh and Margery from here out was never headed; Mr. Siebenthaler's chestnut colt Sheridan managed to get second place from Hotspur, who was a good third. The following is the

SUMMARY.

The November Stakes—For three-year-olds and upward; $25 each, $15 forfeit, with $400 added; $95 to second, third to save stake. One and a quarter miles.

W. L. Appleby's ch m Odette by Shiloh—Margery, 115 .....Murphy 1
P. Siebenthaler's ch c Sheridan by Young Bazar—Lost Girl, 109..... ..... Hart 2
J. W. Harper's b h Hotspur by Joe Daniels—Sister to J. Douglas, 118 ..... Short 3
Time, 2:08¾.
Natcho B., 115, Marigold, 106, Wild Oats, 118, ran also.

Betting—Auctions: Marigold $30, Odette $16, field $16. Books—Marigold 7 to 5, Odette 9 to 5, Hotspur, Naicho B. 10 to 1 each, Sheridan 20 and Wild Oats 100.

SECOND DAY.

It must be confessed that the outlook for the Blood Horse Association on Monday evening was anything but pleasant, the bad weather which proverbially interferes with the biannual racing meetings of this Association seemed likely to force a postponement, it is true one could hardly say it was raining, but the fog was so thick that it very soon played sad havoc with the track, and even on Tuesday morning the sky was so overcast that there were but few who thought for an instant that racing would take place on that afternoon; however, about 11 o'clock the Directors had notices posted on the various bulletin boards throughout the city, stating that the programme would positively be run off that afternoon, and as a consequence about a thousand or twelve hundred persons were present when the bugle call sounded for the first event. The judges for the day were J. V. Coleman, M. F. Tarpey, Jos Thompson, Dr. Latham and Mr. Smith of Oakland, these gentlemen alternating in the stand as business or pleasure called one or another away. The timers selected were J. A. Dustin, Frank Dickey and M. Kelly, all of whom are adepts in the use of the watch. The programme showed four very good races, yet still, as on the first day, there were supposed to be air-tight cinches in each event, but a slippery track will usually put the very best of the talent wrong, and so it turned out on Tuesday for only two of the four favorites won.

The first race of the day was the selling purse of $400, for three-year-olds and upwards, the distance being three quarter mile heats. The bookmakers were more than usually lavish with their odds in this contest, their cards showing for the first heat Applause $3 to $5, Revolver and Ida Glen $5 to $1 each, Nerva $8, Wild Oats and Jackson $15, Forrester $10, while the much despised Kilgariff could be had at $60 to $1. In the pools Applause was also a strong favorite, selling for $30, Revolver $7 and the field $15; even at these rates the bulk of the betting was done in the auction pools, Mr. Killip's men being kept very busy at work handing out pool tickets to those who were speculatively inclined. There was but little delay at the post, considering the large field, and there were but few breakaways, before Frank Du Poyster let the flag fall. As the horses passed the white flag stationed at the quarter pole, Forrester was a half length to the good, Ida Glen being second, while the balance were well bunched. Glen cut out the running, but was challenged before reaching the half by the favorite, and as the upper turn was reached, he was a clear length to the good. On the middle of the upper turn the positions were: Applause, Ida Glen, Forrester, with the rest strung out. Coming into the homestretch, Applause was seen as a sure winner, with Ida Glen well up for second place, but Ward, on Forrester, made a driving finish and nipped the place just at the wire, Nerva being fourth, Jackson fifth, Revolver sixth, Wild Oats seventh, and Kilgariff distanced. Time, 1:18¾.

The second heat was in most respects a repetition of the first. Another good send off was effected, although Forrester showed in front, before they reached the three-eighths

the favorite was in the lead with Forrester and Revolver fighting head and head for choice of second position; when well into the turn Applause had a commanding lead and the race was virtually over. As they entered the stretch Revolver was leading for second place, but when at the draw gate, Forrester again came with a rush and easily secured second money, Wild Oats being third and Revolver fourth. Time, 1:18¾. The following is the

SUMMARY.

Selling Purse $400, of which $50 to second; for three-year olds and upward. Fixed valuation $1000; three pounds allowed for each 100 less down to $700; then one pound for each 100 down to $301; selling price to be named through the entry box at 5 o'clock in the afternoon the day before the race. Three-quarter mile heats.

W. George's b g Applause by Three Cheers, dam Alice N., 107.. ..... Murphy 1 1
C. Holloway's ch g Forrester by Joe Hooker, dam Mattie C., 97.. ..... Ward 2 2
B. Lane's b g Wild Oats by Wildidle, dam Mary Givens, 104.... ..... Baxter 7 3

Also ran: Revolver, 110; Kilgariff, 100; Ida Glenn, 101; Jackson, 113; Nerva, 101

The Fame Stakes is usually one of the most exciting races of the fall meeting, the distance being a mile and three-quarters, thus bringing out, not only the very best bred horses in the State, but those who have been tried for endurance as well as speed. The annual recurrence of this event had only three starters, although when the stake closed on August 15, 1888, there were twenty-nine entries, of which only ten declared out. This left a very handsome sum for the winner which turned up in Phil. Siebenthaler's chestnut colt Sheridan by Young Bazaar, dam Lost Girl; the other entries were E. S. Paddock's bay filly Adelaide and L. U. Shippee's bay filly Mabel F. The exquisite breeding of the latter as well as the known ability of all the Longfellows to stay over a distance of ground made the Shippee entry a strong favorite, and there were many who placed their money on Mabel F., thinking it was just like finding the odds. However, sad disappointment was in waiting for those who were so confident, as Sheridan proved an easy victor, the Shippee filly throwing her tail up after a mile of ground had been covered. In the auction pools Mabel F. sold for $30, Sheridan $20, and Adelaide $2. The bookmakers offered $3 to $5 against Mabel F.; $6 to $5 against Sheridan, and $20 against $1 Adelaide. The starter had but little trouble in getting the three away on their long journey; the favorite showing in front for about a quarter of a mile, Sheridan being second while Adelaide brought up the rear. Before the upper turn was reached Sheridan had taken the lead and began throwing mud from his hoofs in the face of the favorite; this treatment she did not seem to relish, and Morton, the jockey, took her out from behind the feet of the flying chestnut. It was in the same order that they passed under the wire the first time, Adelaide already showing signs of distress. When the first mile had been completed Mabel F. threw up her tail, and to those familiar with horse racing it was now a settled fact as to how the race would terminate, bar accident. The last three-quarters of a mile was run very easily, Hart using excellent judgment on his mount, feeling assured that he had the race well in hand. His judgment was not amiss, for although Mabel F. was spurred and whipped coming down the stretch, she could not respond, and the Fame Stakes of 1890 were won easily by Sheridan, Mabel F. second with Adelaide forty or fifty lengths in the rear.

The owner of the winner, a very popular horsemen of Sacramento, was kept busy for some time receiving congratulations from his friends, and there was no one but what wished future success to both Mr. Siebenthaler and his grand young colt. The time made although slow, was very good considering the state of the track, yet could have been materially lowered if necessity had required it. The following is the

SUMMARY.

The Fame Stakes, for three-year-olds (foals of 1887); $100 each; $50 forfeit, or $10 if declared out August 1, 1889, or $20 if declared out January 1, 1890, or $30 if declared out August 1, 1890. All declarations void unless accompanied by the money; with $750 added, second to receive $200, third to save stake. Closed August 15, 1890, with 20 entries, of which 10 declared out. One mile and three-quarters.

Time, 3:11¼.

The third race of the day was called the Record Stakes for three-year-olds and upwards, the distance being five-eighths of a mile, and nine horses faced the starter. After the good run made by Rico on Saturday, it was only natural that he should be installed a strong favorite, $2 to $5 and $1 to $2 being the best that the bookmakers would lay against him. Prince's First, Kildare and Gambo were each quoted at $10 to $1, King Hooker $15 to $1, Initiation and Naicho B. being quoted at $20 to $1 each, while Gorget had $30 to $1, and Jack The Ripper $50 to $1 quoted against their names. In the auction pools Rico sold for $75, the field $20 and Gambo $10. It is usually said that different people look with different eyes at the result of a race, and it must be said that from our vision, it looked as though Charlie Dennison on Prince's First absolutely threw the race away by a piece of bad judgment. However, there may be others who think differently, and it is simply a question of opinion as to whether the Dennison entry could have won or not. There was quite a long delay at the post, most of the boys being anxious to get away as soon as possible. When the flag finally fell Gorget was the first to show in front with Kildare a good second, Rico and Prince's First both crawling up as the bunch entered the turn, and as the leaders entered the homestretch the Dennison colors were seen in the lead, Rico being second with Kildare third. As Dennison turned into the homestretch he failed to take advantage of the going, which was best close to the pole, but left an opening through which Murphy on Rico took advantage, and coming down the inside, won by a half length only. If Dennison had kept the inside and made Rico pass to the outside, there can be hardly a question of doubt but what Prince's First would have won the race.

SUMMARY.

The Record Stakes, for three-year-olds and upward, $25 each, $15 forfeit, with $300 added, of which $50 to the second, third to save stakes. Five furlongs.

The last race of the day was a complete downfall for those who always buy the long end in the betting. Henry Walsh's horses are always in such good fix and so generally successful that they are always strong favorites with the betting speculators. Nero and Rosebud of the Palo Alto stable was made strong favorites in the auction pools, selling for $50, while the field sold at alternating prices of $8, $9 and $10. In the books Nero was $3 to $1, Rosebud $3 to $5; Sinfax $5 to $1; Power $10 to $1; Acclaim $20 to $1 and Cheerful $30 to $1. It is somewhat surprising that such extremely strong odds were laid against Cy Mulky's Sinfax, as his reputation this year is of the very best, he not only having carried lumps of weight, but beaten first class horses whenever he was started. Although it was getting rather late, the horses could easily be seen through the glasses, and there was no trouble in being able to distinguish each and every one of the entries. Mr. Thompson, one of the judges, kept the glasses constantly at his eye and saw every move that was made. When the flag fell, Rosebud, the favorite, was almost left at the post, Cheerful being the one to make the running all the way around into the homestretch, Nero being second, Power third and Sinfax fourth. When well down the stretch Sinfax was brought up with a rush, and his nose was seen first under the wire by the judges, Cheerful being beaten by a short head only, Nero third, Power fourth, Acclaim fifth and Rosebud last. Neither of the Palo Alto entries seemed to relish the slippery track, and it was probably due to that that such a bad showing was made by them. The following is the

SUMMARY.

Purse $350, a handicap for two-year-old; $10 each, with $5 declaration; $25 to second, $10 to third. Weights announced on the first day of the meeting; declarations due at 5 P. M. the day before the race. Seven furlongs

THIRD DAY.

The day allotted for the annual giving of thanks is usually one that adds materially to the finances of the Blood Horse Association at their fall meeting, and last Thursday was no exception to that general rule. A perfect day and a good card tended to draw out a large concourse of spectators, who had the pleasure of witnessing four magnificent contests. The bookmakers were kept very busy during the afternoon taking in the money and handing out the small pieces of cardboard which represented the guess of chances of those who were willing to invest; while the auction pools were likewise liberally patronized by the betting fraternity. The pleasure of the day was somewhat marred by an accident which happened in the Autumn Stakes for two year olds; the distance being one mile. Those who were watching the field closely noticed Lodowic stumble, and seemingly fall, the jockey, Morton being thrown from his back, the balance of the riders probably not being aware of any accident, came in with whip and spur, each trying to beat the other to the out-come. The poor lad who had been thrown heavily to the ground did not move, and it was but a minute until hundreds were running up the home stretch to assist the lad if assistance was still available. T. H. Williams and Edwin F. Smith drove up in a carriage and soon had Morton under physician's care. Luckily no bones were broken and it is thought highly probable that the boy will fully recover. Morton is a good faithful rider and his absence will be felt during the balance of the meeting.

The first event on the programme was a handicap sweepstake for 3-year-olds, the distance being one mile and one-eighth. The starters were Raindrop, Marigold, Take Notice and Initiation. Raindrop sold at $6 to $5; Take Notice $8 to $5; Marigold $4 to $1 and Initiation $20 to $1. Word had been passed down the line that Raindrop was in excellent condition, and as a consequence the money of the public flowed in on the Appleby entry. When the flag fell Initiation led away and was first past the wire, Marigold and Raindrop being on even terms, while Take Notice brought up the rear. These relative positions were maintained until the upper turn was reached, when Initiation lost the lead, Take Notice being sent up in front. As they entered the stretch Marigold made play for leadership, but could not make it, Take Notice being in the best of fettle and on his good behavior. Although swerving badly after reaching the upper end of the grand stand, Take Notice won handily by three quarters of a length, Marigold being second, Initiation third and the favorite last. Time, 1:56.

SUMMARY.

Handicap sweepstakes, for three-year-olds; $30 each, $15 forfeit, $10 declaration, with $400 added; $60 to second, third to save stake. Weights announced on the second day of meeting; declarations due at 5 P. M. the day before the race. One mile and an eighth.

The Autumn Stakes had originally thirty-four entries, but of this number only a half dozen came out to face the flag. They were Conrad, who sold in the books at $6 to $5; Sinfax $2 to $1; Tearless $3 to $1; Lodowic $4 to $1; Duke of Milpitas $10 to $1 and Cheerful $20 to $1. The exceedingly good run made by Sinfax on Tuesday last made him a strong factor in the betting, he being considered by many the equal, if not the superior, of Mr. Rose's colt, Conrad, and there was a large contingent who fancied Lodowic from the Shippee stable, probably because his stable companion, Take Notice, had won the first race. Conrad was known to have had a three-quarter trial several days ago in 1:15 with his shoes on, and this knowledge was probably what made him such a strong favorite among the better posted of the betting fraternity. The little Three Cheers filly, Cheerful, cut out the running immediately on the fall of the flag, he being closely followed by Conrad and Mr. Boots' Duke of Milpitas. At the half-mile pole Cheerful was still leading with Conrad hold well in hand in second place; in the turn the Duke made a little spurt and his nose showed in front for a few strides.

Lodowic was coming along nicely, but it was at this point where he stumbled just as Morton was ready to make his run; coming down the stretch the Duke of Milpitas was punished severely, while Conrad came with ridiculous ease, his rider not urging him at all until the drawgate was reached, when a tap of the whip made him bound forward and he won as he pleased, although it is true, by a half length only; Sinfax was third, and Cheerful fourth, the riderless horse, Lodowic bringing up the rear. Time, 1:43¾.

SUMMARY.

The Autumn Stakes—For two-year-olds (foals of 1888); $50 each; $25 forfeit; or $10 if declared out January 1, 1890, or $20 if declared out on August 1, 1890. All declarations void unless accompanied by the money; with $750 added, second to receive $150, third to save stake. Winners of three stake races to carry five pounds extra. One mile

Time, 1:43¾.

The third race of the day was for the selling platers, the purse being $400, the ages being affixed at three-year-olds and upwards, and the distance seven-eighths of a mile. Applause was a strong favorite in the betting, he being considered invincible in that class, and the best the bookmakers would do was $30 to $100 against him; the other entries were Forrester and King Hooker, both of whom were strongly played for place, Wild Oats, Leland, Jackson and Installation having but few friends to support them. For the first quarter of a mile Installation showed well in front, whereupon Applause and Jackson had a ding-dong time keeping together in second place. It was not long, however, before the favorite was leading by half a length, Jackson sticking close to his flank, while Installation had fallen back to third position.

At the head of the stretch Hooker was brought up and rapidly passed Installation, but was unable to reach the two leaders, both of whom were under lash and spur. The winner turned up in Jackson, a $20 to $1 shot, who was but badly supported by those who are always induced to bet in consideration of long odds. It is true the race was won by a short head only, and Applause gave his backers a good run for their money. Installation was third, Forester fourth, King Hooker fifth, Wild Oats sixth and Kilgarif last, although it might be as well to state here that Leland was left at the post. The following is the

SUMMARY.

Selling purse $400; $50 to second. For three year olds and upward. Fixed valuation $1200. Three pounds allowed for each $100 less down to $800; then two pounds for each $100 down to $400. Seven furlongs. Piedmont stable's b h (5) Jackson, by Luke Blackburn Ivy Leaf 109 ..... Madden 1

Time 1:28¼.

The last race of the day was for a purse of $400 for three year olds and upwards, this race being a heat race of five furlongs. Fourteen entries had been made, but of that number only six came to the post, and a great race it proved. When the prices were first announced on the boards of the bookmakers, Rico was prime favorite at 1 to 2, but when a few of the heavy bettors had had their say, the price receded to 1 to 3. Ida Glenn and Kildare were next in choice, but place betting was the extent of the pencillere business against all of them but the favorite, the result being considered a foregone conclusion. Frank Du Poyster was sometime in getting the field away, Gambo causing the lose of time owing to a shoe becoming misplaced.

When the flag flashed, Gambo and Revolver had the best of the send off, the favorite bringing up the tail end. Little by little Rico cut down his field, and it was only at the wire that he nipped Revolver, Ida Glenn having been eased up coming down the stretch. Gambo was third, Ida Glenn fourth, Kildare fifth and Vince distanced. Time, 1:01½.

When the bugle call sounded for the second heat, 1 to 5 was all that could be had against Rico, while any odds were obtainable against the others. The shadows of night were fast falling, but still there was ample light to distinguish each of the horses, and the starter was not long in getting them away, although unfortunately Revolver was left at the post. A hammer and tongs fight ensued, the quartette each making a bid for victory. The hard run of Rico in the first heat evidently had a distressing effect on the Rose entry, for he failed to come up to the expectations of his backers, not being able to finish better than third. The fight was between Kildare and Ida Glenn, and right royally did each battle for the mastery. The decision was in favor of Ida Glenn by a half length only, Gambo finishing a bad fourth. Time, 1:02.

The judges now considered it too dark to run off the deciding heat, and announced that the race be continued to the next racing day (Saturday) at two o'clock. On the race being finished, it was found that Rico had burst a blood vessel in his head.

Grim's Gossip.

Blackwood's Mambrino, the aire of Silkwood, will be seen on the California Circuit next year.

Zingerella has only started twice. At Los Angelea Mystery beat her by a head after a desperate race. Her run Saturday was a very creditable one.

Munroe Salisbury of the Pleasanton Stock Farm is having an artesian well sunk on the place and expects to strike a good flow of water within a few days.

Hyder Ali who was sold by J. B. Haggin to a Montana Syndicate, headed by Noah Armstrong, for $6,000, has been sent over the mountains to his new home.

Mr. Lockhart, of the Lockhaven Stock Farm, Los Angelea county, has secured the Nutwood stallion recently brought to this country by George Starr, for F. E. Browne.

The Whilom King of the Turf, Norfolk, died at Sacramento on Tuesday last, and was buried on Thanksgiving Day. A full history of the horse will be given in our next issue.

Hon. Frank L. Coombs, President of the Pacific Coast Trotting Horse Breeders' Association, started east on Tuesday last and expects to be away about three weeks.

The weights for the running meeting at Coronado Beach Driving Park will be to December 31st inclusive, five pounds less, and after that date ten pounds less, than American Association rules.

John Bray, who was convicted last week of manslaughter for killing James B. Hayes at the race track during the Anaconda races last August, has been sentenced to seven and one-half years in the penitentiary.

When the report of the Breeders Association was given in the BREEDER AND SPORTSMAN, Goldsmith was credited with driving Redwood to his record of 2:21½. This was an error as the son of Anteeo was handled by J. A. Dustin and he is entitled to that honor.

Salvator is now one of the King Bees at the Rancho Del Paso. He has been accorded the stall formerly occupied by Hyder Ali, but does not seem to take favorably to his new quarters. The turf king is far from looking in good condition and at present is off his feed.

The Club House Stand, at the Bay District Track, Saturday was quite a sight, many of the prominent political, legal and social celebrities of the state being conspicuous. Good racing properly conducted, will always draw a first class crowd in this city.

Mr. Valensin has leased the trotting services of the four year old Sidney mare, Samoa, and will prepare her for track use during the early part of the coming year. Now that the Valensin Stock Farm has an experienced trainer and driver, the familiar colors should once more be seen to the front.

B. A. Haggin arrived from New York last week and proceeded at once to the Rancho del Paso to inspect the yearlings to be sold. Young Mr. Haggin, though not as well posted on horse matters as his father, is more of an enthusiast and is a very familiar figure on Eastern race courses.

Cy Mulkey has been forced to suspend training his horse Tim Murphy, owing to an injury received in his last race at Portland, Oregon. Mr. Mulkey had Murphy well entered at the Blood Horse meeting, but the public here will not have a chance to see how fast that son of Kyrle Daly can run.

The card over the stall of Alcantra at the recent New York horse show, read as follows: "The leading aire of the year; the leading sire of his age; record 2:23, the fastest four-year-old record when made; by George Wilkes, the greatest sire in the world; dam Alma Mater, the greatest brood mare of her age, by Mambrino Patchen, the greatest brood mare sire."

One of the bookmakers found that business was lagging on the first day of the Blood Horse Meeting, and to show the public what he was willing to do for them, began shouting "One-hundred to one Kilgariff." Another of the Metaliciens answered back, "I will take that five times;" but the bait was not attractive enough for the outsiders who were perfectly willing to see "dog eat dog."

Charles Marvin started on Tuesday last for New York with the great filly Sunol, he having agreed to turn him over to Mr. Bonner before the 10th of December. Although several attempts might still have been made with the mare to beat his time, it was deemed for the best to let up on her for the year. Sunol goes into winter quarters with a record of 2:10¼ as a four year old, a mark that has never been beaten but twice by horses of any age.

Charley Dennison and young Murphy made a most disgraceful exhibition of bad temper in the Introduction Purse race on Saturday last, and both of them were fined $50 each by the judges Rico and Princess First were almost head and head near the upper turn, when the two jockeys so far forgot themselves as to draw their whips and inflict punishment, one on the other. Both of them should have been ruled off for life.

Mr. Quigg of San Francisco informs the breeders of the State that he has for sale the mare Lady Dexter, foaled 1886 by Dexter Prince, dam Kitty Thorne 2:31, 2nd dam, a daughter of Kimball's Patchen, 3rd dam by Geo. M. Patchen Jr. Now that the get Dexter Prince are showing to the front, this stylish, square gaited trotter should readily find a purchaser.

Will wonders ever cease? It would seem as though the power of endurance and speed in a horse can never be gauged exactly, for the mighty son of Mnaket, Carbine, won the Melbourne Cup on the 4th of the present month, with one hundred and forty-five pounds on his back in the remarkable time of 3:28¼, the distance being two miles. For speed, weight, carrying ability and endurance it is doubtful if the equal of Carbine ever lived.

The powers that be, in the Blood Horse Association, are somewhat lax in allowing such a large number of persons in the saddling paddock. There is no course in the world where such a promiscuous assemblage can be found as there is in the space allowed for the horses at the Bay District Track. Accidents are liable to occur, while spectators are allowed around the heels of high strung thoroughbreds and an ounce of prevention is worth a pound of cure.

Ed Smith, the Los Angeles horseman, has just returned from an Eastern visit. He says that Kentucky will go broke if Nancy Hanks does not beat all comers in the free-for-alls on the grand circuit next season.

Among the stables that have drawn favorable comment from spectators, there is none that can surpass the one owned by Phil Siebenthaler of Sacramento. It is true the stable is small, he only having Sheridan and King Hooker, but the manner in which the horses have been sent to the post reflects credit on Nat Shinnera, who is as well known as a trotting horse trainer as among the "bangtail folks." Nat has done extremely well, and his ability is entitled to due recognition.

The Independence kite shaped track has caused many a record to be lowered this season, and as the same kind of courses are being arranged all over the United States, it seems more than probable that next season will see another downfall in the "fastest time." At Independence a two-year-old pacer made a mark of 2:16½; a pacing stallion got a record of 2:08¼; a gelding went the mile in 2:12½; a four-year old mare reduced her record to 2:12½. a pacing mare is now marked 2:10, and a trotting team is credited with 2:13.

The Rural Spirit says, that during the week R. C. Smith, of Portland, purchased from Hon. E. H. Mix, of Baker City, the stallion J. S. C., record 2:29, by Echo, son of Rysdyk's Hambletonian, dam Vyron, by Geo. M. Patchen Jr., and the 2 year-old colt Electrify, by Elector son of Electioneer, dam by Blacksmith.

Mr. Smith informs the Rural Spirit that he has sent both these trotters out to J. R. Sawyer, at Witch Hazel farm. The price paid has not been made public.

A convincing example of the truth of the proverb "Nothing succeeds like success" is the elegant new tailoring establishment of Charles Lyons just opened to the public at 908 Market Street. The popularity of this enterprising firm has increased so of late that this addition to their already large facilities has been a necessity. The store has been entirely remodeled and is now one of the most complete and tasty on the Coast. The public generally are invited to call and inspect their large stock of new imported fall and winter suitings.

The judges in the stand on Tuesday received information that a rumor was prevalent that Hart, the jockey on Sheridan, was not out to win, so Mr. Tarpey read the lad a short lecture prior to the horses being sent to the starting post. I may not be right in supposing that any wrong was intended, but it was a shame to attribute any suspicion to a lad who has always been considered as honest as the day is long. It may just be possible that some of the parties interested would have been better pleased to see any other jockey up than Hart, as then the winner might not have turned up in Sheridan.

H. A. Thomson, of 19 Bligh street, Sydney, New South Wales, is one of the responsible commission men who buy and sell all sorts of blooded stock, and invariably gives satisfaction. Mr. Thompson is the successor of C. Bruce Lowe, whose services were called into requisition when Mr. Haggin purchased Sir Modred and Darebin, and he stands first-class among the business men and capitalists of Australia. With a thorough knowledge of all the racing families of the Southern continent, he should be a good person to write to, if any of our readers desires to procure Australian horses.

The down town pool rooms of Cartwaight, Palmer & Carter, at Nashville, were worked last week by a gang of sharpers who are of course unknown. Each race run at the West Side park showed the sheets to fill up on the losing side. It made no difference whether the fielders or favorites won, and as a result the rooms were out some $3,000 in one day. It is said someone stood on the dome of the capitol, which is two miles from the track and in view of it, and with a telescope distinguished the colors of the winners as they passed. Then a confederate rushed into the rooms, which are near at hand, and played the lucky horse for a limit.

During the races at Oakland on Thursday, Balkan, the property of Col. Irvin Ayres was worked out, the judges being notified that no time was to be taken. The daily papers state that there were three exhibition heats, but such is not the case. Mr. Hinds had intended to work out in the morning, but a gentleman driver notified him that if he would defer operations until the afternoon that he might have company to work with him. In the afternoon, owing to the racing the gentleman would not exercise his horse and Mr Hinds had to work out by himself the first heat. In each heat the judges were informed that no time must be taken as the colt was not out for a record, but for exercise simply. In proof of this Balkan's fastest first quarter was 39 seconds, while many others were trotted in 34 seconds. It is a pity that such a report was published, as it might have injured the future prospects of the horse. In the second and third heats a single footer was ridden by a boy and kept Balkan company.

Women at the Race Course.

One of the most interesting studies at the races—in fact, one of the most interesting studies anywhere—is, as Sol Smith Russell sings,

Woman, lovely woman.

She comes to the races in all varieties; every class is represented. And she bets—bets in every conceivable way, and often with wonderful luck. Woman seems to be a born gambler. Once the passion is stirred within her, she plays the races with feverish excitement, generally having not the slightest knowledge of the horses, says Dunton's Spirit. She bets on sentiment sometimes because the horse is pretty, and sometimes because of the jockey. Murphy is of course her favorite jockey. She bets on him every time he has a mount. She doesn't care for horses if Murphy is riding. If he loses she is bankrupt. Just as sure as Murphy rides a race and loses it you can safely wager that three-fourths of all the women in club house and grand stand have left money with the bookmakers or in the pools. Other jockeys have admirers among the fair sex, but Murphy is the only name known to them all, and the confidence they have in him is simply sublime. They would back him if he were riding a rocking-horse.

And in regard to their luck! It is often simply phenomenal. Of course they lose a great deal, but often their tips—pure guesses, all of them—are wonderfully correct. A number of young men will certify to this. The writer recalls several instances where they have picked dark horses, but in almost every instance man—worldly wise man—preferred to trust in his own judgment rather than in woman's luck. Foolish man! One young lady was so certain that she had the winner that she told her brother to put every cent he had on it.

"Why, the horse hasn't a ghost of a show," expostulated he.

"I tell you the horse will win," persisted the young lady. "You put up all you have, and if you lose I'll help you through the week."

But he didn't. He knew better. To appease his sister he invested $2 at 6 to 1, and then backed his own judgment for $5. The dark horse won.

Another young lady gave her brother $5, and told him to put it on Come to Taw in the race the Fourth. He didn't like to lose her money for her, so he put it on Havilah. Come to Taw won, and the young man has put in his time explaining ever since.

Women almost invariably lose when favorites win. But when another than the favorite gets under the wire first she seems to be able by intuition to pick the right one out.

But the interesting study of woman at the races is how she bets. She has many different ways. Let us take the club house first.

None of the ladies there are regular patrons of the races. You walk along the balconies day after day and you will see new faces each day. Where one group sat yesterday there is another to-day. It is a constantly changing panorama. The society maids and matrons come only occasionally, often arriving after the first and leaving before the last. Many of them bet and many others do not. The latter have not tried it at all generally, so the passion for gambling is not awakened. But even when it is the club house ladies seem to be less carried away by it than those in the grand stand. The maids are more addicted to betting than the matrons.

And their methods. They are many. Some simply choose their horses, and their escorts back them. In case of a winning, the money is divided; in case of a loss the escort stands it. It is a little on the tout system, except that the lady does not pretend to know anything about the horses. She simply guesses. Some bet on every race; others on only one—generally the stake race. Most of the ladies in the club house, do not bet in this way. It used to be much more common than it is now. It is not at all unlikely that the paterfamilies sat down on it. As a general rule the head of the house does not like to have his daughter under monetary obligations to any one. So it is not uncommon for the young ladies to insist on investing their own money. She may plunge, but ordinarily she does not, She puts in a little at a time—half of her escort's bet, perhaps. Just enough to make the race interesting, for there is no denying that a bet makes all the difference in the world. Standing on the club house balcony during a race one can easily pick out the ladies who have bets on the outcome. They don't talk on society matters after the race is started; in fact, they don't talk at all. They are too interested. Their cheeks flush with excitement as they lean forward and watch the horses; their breath comes quick; they utter little exclamations as their horse gains or loses; and most of all, they know the colors of the different jockeys. They don't have to be told who has won. There is all the difference in the world between the woman who has bet and the woman who hasn't.

The way they choose their horse is another interesting study. They "go in blind" with a vengeance. It is no uncommon thing to hear one say:

"O, look at that pretty horse! See how he holds his head. That's the horse I want."

Then she consults her programme to learn his name.

Sometimes she chooses a horse because his jockey's colors are pretty; sometimes she chooses one because of his name. She has a hundred different ways, and when she has chosen him all the arguments that man can muster won't change her. Perhaps that is the reason for her luck. Man will back his judgment rather than his luck. He will get frightened away by odds. But the odds are never so big that a woman does not think her horse will win.

In the grand stand there are more regular patrons. There are seats there that parties seem so have preempted for the season. They are there every day. But, of course, there are not many of these, but they are principally noticeable during the week when there is a small attendance. Saturdays the clerks bring their best girls out, and the regular patrons are swallowed up in the crowds. These clerks, by the way, generally leave a portion of their salary with the bookmakers, for man's judgment can lose more than woman's luck can make. These young ladies bet on the same principle that those in the club house do, and they do have such good times that Charley or Tom, or whoever he may be, is quite reconciled to the loss he has sustained. When he sees the sparkle in Arabella's eyes and the color in her cheeks, and feels the gentle pressure on his arm as she tells him she has had "such a good time," he is as happy as if he had won on every race. Away with your club house aristocracy! There is no such enjoyment of the races there as there is in the grand stand. The young lady who came out in the tally-ho with a fashionable party knows no such enjoyment as Arabella and Charley got out of their half holiday.

But there are others in the grand stand. There are the wives and children of honest, respectable merchants, and others in the great middle class. They don't bet, but they enjoy the races. It is more or less of a treat to them. They understand that the father or the husband cannot afford to lose money on horse races, and they can find enjoyment enough in watching the crowd and the races. They pick out their horses, though—they "choose" winners just for excitement—and they watch their particular horse with as much interest as though they had hundreds on the race.

One woman there is, however, who seems to have a mania for horse racing. She is there every day, and she bets assiduously. She is posted on horses, too. She was at every race this year at both Washington and the West Side Parks. She is quite a large woman, dresses quietly, and only attracts attention from the regularity of her attendance. She studies her programme constantly, and they do say that she knows the pedigree of every horse on the turf. But this may be an exaggeration. She bets a great deal and in pretty large sums, always having a boy to "put" the bets for her. Yet it is chronicled in racing annals that she has once or twice gone down into the betting sheds to study the odds and place her money herself. This has only happened, however, on occasions when the crowds were small.

Last of all comes still another class of women who frequent the races. They are wild betters, but seldom lose their own money. They dress handsomely, and come almost every day. They sit as much as possible in the front rows, and receive some attention from men about town who have neglected to carry their reputations with them. Others blush and start as they see them, and then hurry on without bowing. And they, poor things, reverse the ordinary rule and never bow until some one bows to them. They know too much. But let them enjoy themselves if they can, and let the fools bet for them if they will. It is little real pleasure that they do get; let them have that unmolested. They are inveterate betters; perhaps it makes them forget—what?"

TURF AND TRACK.

Matt Allen will winter in Wyndham Walden's private stable at Westchester.

Pistachio, the four-year-old brother to Nutwood 2:18¼ will be given a record next season.

Marcus Daly now has about a hundred and fifty thoroughbreds and trotters on his Bitter Root Valley ranch.

W. J. Scoles has sold Sundial, bay horse, 5, by Albert Victor—Time Test, to W. P. Keegan of Louisville for $1,600.

Connsellor, by Onward, the $20,000 stallion, purchased by the Pate Stock Farm Company, has been delivered to the farm.

It is said that Marcus Daly will have a string of horses on the Montana Circuit next season, and will also take in the California State Fair.

The Saratoga racing Association has decided to give no races for less than $1,000 next summer when the new club takes charge of affairs.

Mr. Brasfield, Lexington, last week bought of W. H. Raymond, Belmont Park, Madison County, Montana, a hundred head of standard bred trotters.

Ed. Geers, who so successfully drove Brown Hal 2:12½, McDoel 2:18¾ and Hal Pointer 2:09¾ has been engaged by C. J. Hamlin at a salary of $4,000 a year.

Football seems to be as great a source of gambling in Australia as baseball is here. No bookmaker is said to have had $9,000 in the South Melbourne and Carlton match.

The Directors of the Shasta County Agricultural Association held their annual fall meeting last week, and after paying all outstanding debts, have a few hundred dollars in the treasury.

Matt Feakes has been engaged to assist John Huggins in training Pierre Lorillard's Rancocas stable of horses next season. There will be between fifty and sixty in the string.

The new race track at Hot Springs, Ark., will open in January and racing will be continued there until May. Quite a delegation of horsemen from New York will winter at the Springs and take in the races.

Col. Wood 2:21½ on the 27th reduced the English mile record—2:35 Van Buren Girl, to 2:25, driven by McPhee. He trotted the first heat in 2:29 1-5 and repeated in 2:25. Alexandria Park was the scene of action.

The Linden jockeys and Starter Caldwell had quite an interesting little time over the fines imposed, eventually the Association paid $590 worth of fines, and thus raised Mr. Caldwell's ire and he threatened to resign.

Green B. Morris has sold the four-year-old horse Eric, by Duke of Magenta out of imp. Second Hand (dam of Exile) at private sale to W. B. Jennings for $1,500. The latter will race him next season, and will then send him to the stud.

John Donohue, the well known trotting horseman, has leased the Hanford race track and purposes holding a race meeting there next season. Mr. Donohue has had a great experience among trotters and should make a success of the undertaking.

A remarkable horse race is reported to have taken place in New South Wales recently. Two horses ran five successive dead heats though the jockeys were changed. At the sixth attempt the race was decided, Mr. Clemen's horse winning cleverly.

Australian news states that Bravo last year's Melbourne Cup winner is not dead. It will be recollected that he was taken to India for a Mr. Apear and was stated to have died on his arrival but 'Angur' now says that he has positive news of his welfare.

Dr. W. S. Webb the wealthy New Yorker who imported so many Hackney and Coach horses lately, was highly successful at the late New York show, and is said to have refused $12,000 for his crack hackney stallion Matchless of Londesboro.

The leading prize winners at the New York Horse Show were Harry Hamlin and the Village Farm, they obtaining fourteen firsts and seconds, total value in premiums $2,305. Highland Farm won $985, A. J. Cassatt $600 and Dr. W. S. Webb $600.

George Bayliss is handling Silkwood, the crack Los Angeles pacer. The Southern racing contingent say we have not seen him go anywhere near his best so far, and that 2:13 will be no trick for him next season, some enthusiasts predicting a mark of 2:10 or better.

Sam English, the well known eastern pool seller, says the season just ended has been the best for trotting races he has ever known. He said there had been more money invested and a better quality of horses at all the leading meetings. He predicts a great success for next year.

Col. Sam Bryant, Louisville, has sold to Capt John N. Littrell, of the "Kirkwood" stock farm, near Washington, Ky., his young stallion Charlie Treacy; and Captain Littrell has changed the name of the horse to King Charlie. His pedigree is as follows: By imported Prince Charlie, out of Sister to Joe Daniels, by imported Australtan; second dam by imported Glencoe.

A match race ($100 a side) took place at Petaluma last week between J. P. Rodehavers' Alcona Jr. by Alcona from Madonna, driven by Shaner, and Guy E. Grosse's Sunset by Anteeo, dam by King Phillip, driven by Lawrence; Alcona took the first two heats in 2:33 and 2:29, Sunset the third in 2:32, and Alcona then wound up the race in 2:29¼.

The card over the stall of Alcantara at the New York horse show, read as follows: "The leading sire of the year; the leading sire of his age; record 2:23, the fastest four-year-old record when made; by George Wilkes, the greatest sire in the world; dam, Alma Mater, the greatest brood mare of her age; by Mambrino Patchen, the greatest brood mare sire."

Wilber Field Smith, the well known trotting horseman, was among the interested spectators at the Blood Horse races last Saturday. Wilber, by the way, is getting into the running business himself, having several young thoroughbreds at Sacramento, but he says he is not going to give up the old love and will still be in the ring with a few handy trotters.

Orrin A. Hickok returned from Hot Springs, Arkansas, last week looking a shade thinner but otherwise in good trim. Mr. Hickok will probably have a select stable ready for the East again next Spring, and hopes to have a little better luck. Speaking of the King of trotters, Nelson, Hickok says "he is a good looking horse, and of course as fast as a bullet, but I doubt his standing a hard race with two or three horses anywhere near his speed."

The report gathers strength that several gentlemen, among whom are mentioned Messrs. John Hunter, James Galway, Bowie and Campbell, are about leasing Jerome Park for a season of racing next summer. It is proposed to run on alternate days with Monmouth Park during July and August, and to offer good money for the very best horses. A revival of hurdle and steeplechasing is also one of the plans of the proposed management.

E. B. Smith, Chicago, Ill., has sold to Smith & Reynolds, Los Angeles, Cal., the three-year old brown colt Vincennes, by Red Wilkes, dam by Vindex, son of Blood's Black Hawk. Mr. Smith has purchased from W. P. Ijams, Terre Haute, Ind., the brown gelding Zante, by Jersey Wilkes, dam Topsy, by Coacher, son of Vermont; second dam Matt, by Rolla Seymour; third dam by Golddust. Also from R. Wilson, Nashville, Ind., the bay gelding George C. Clark, by Orion, dam by Blue Vein, son of Blue Bull. George C. Clark has no record, but can trot in 2:25.

On the seventeenth of this month, Mr. Caldwell fined the jockeys who rode in the different races at Linden altogether $610. In the first race six out of seven riders contributed $10 apiece, and in the fourth event nine of the eleven jockeys' conduct were considered sufficiently refractory to warrant their being fined $10 each. In the last race nine riders' behavior seems to have been of such an outrageous nature that they were fined $50 each, the total for the day amounted to $610.

Occasionally the horse training reporter graces his copy with a new flower of speech culled from the squalid back yard of his blighted brain, says the Sydney Bulletin. He gets tired of saying that something strode along freely, or did long, strong work, or indulged in healthy exercise, etc. A Flemington tout announces that "Lady Agnes was noted gyrating smartly," which is intended to explain that the mare had a fast canter around the ordinary track. It doesn't mean that Lady Angua was waltzing.

Banker W. A. Clark, of Butte, and Banker James A. Murray, of Helena, Mont., intend to engage more extensively in the racing business. Mr. Clark is reported to have made some important purchasers of trotters this fall and will have worthy competitors for Marcus Daly's horses, next year. Mr. James A. Murray has often contemplated keeping a stable. If he does, says the Independent, it may be expected that he will be second to none when it comes to having good horses, as Mr. Murray is reported to have said that when he does start in he "will show all these fellows a thing or two."

The Guernsey Mail and Telegraph is evidently not a sporting daily, for the day after the Cesarewitch the following item appeared:

NEWMARKET RACES.

The above race took place to-day, resulting as follows:—

Cesarewitch	1
Sheen	2
Alicante	3
Judith	4

Twenty-two horses ran.

A very wealthy owner of race-horses was recently telling Master says the "Pink Un", that his eldest son cared nothing about racing, and little about hunting. "His sole delight," he said, "is in natural history, on which he is a great authority, and he is frequently consulted by the British Museum." Master mused a little, and then said, "There's some comfort in it. Catching flies doesn't cost much, anyway." "Not cost much!" yelled that parent; "why, he sometimes gives £500 for a rare fly that is not half as big as a good-sized yearling. Not cost much, indeed!" It was then that Master decided on writing to Isaac Aspland, of Wicken-by-Soham, to persevere with his moth farm.

Some interesting observations upon the transmission of color in horses have recently been published by Professor Vickena, of Vienna, Austria. English thoroughbreds, both sire and dam being the same color transmit their color to the offspring in 586 cases out of 1,000. When the parents are different in color that of the mare generally results. Bay is the more frequent color, black the scarcest, and there are only about 190 black mares per 1,000. Two of the same colored Arab horses will give their hue to their off-spring in 36 instances out of 1,000. The Arab is usually white, and 729 times out of 1,000 if the mare is white and the stallion is not the foal will be.

Popular sentiment in the neighborhood of a race course is all in favor of racing. The tracks contribute thousands of dollars to the locality in which they are situated. There are always a thousand or more trainers, drivers and stable hands in and about a race track when a meeting is in progress. These live there entirely, and what they eat and what they drink is invariably bought in the towns or the villages round about. Five hundred or a thousand horses require an enormous amount of hay, oats, corn and straw, and this is purchased from neighboring farmers. Cash is always paid, and the money that comes to the people in this way is more than a certainty.

At Perth last month the Royal Caledonian Hunt Club assisted at the revival of a meeting that has been in abeyance five years. The Royal Caledonian Hunt Club is the oldest racing club in Scotland, having been formed in 1777, and is thus ten years younger than the Gimcrack Club. It originally met for the purpose of a fortnight's hunting. After it had been in existence three or four years a hunters' race was instituted. The hunting part of the programme was continued until well into the present century, when it was discontinued, and the Royal Hunt Club is now a social and sporting institution which honors one of the Scottish meetings with its patronage every year. Unlike the Gimcrack, the Royal Caledonian Hunt Club has kept an accurate record of its proceedings from the commencement, and very interesting reading they must be.

The colt will learn more easily when six months old than when a year old. It can also be controlled more easily. Hence it is wise to handle the colt early. Its early training should not stop at breaking to halter. It should be handled until any part of its body or limbs can be rubbed, until it is accustomed to the bridle, and until it will drive as well as lead. To teach it all this, and to keep it from forgetting what it has learned, is a little trouble, but if the colt is of good stock the trouble is well paid for.

The Melbourne Cup was won easily by three lengths by Hon Donald Wallace's five year old bay horse Carbine (Musket—Mersey) 145; E. E. A. Oatley's five year old black gelding Highborn (Grandmaster—Her Ladyship) 92 lbs. 2nd; J. M. McLaughlin's three year old chestnut colt Correze (Newminster—Ouida) third. Thirty-nine horses started. Time 3:28¼. Dunlop in 1887 ran with 115 lbs. up in 3:28¼, which from a time point of view is the nearest approach to Carbine's great performance which is the heaviest weight ever successfully carried and also is the best time on record.

Palo Alto Stock Farm will send two mares to imported Darebin while Rancho Del Paso will send two to Flambeau. The Palo Alto mares will probably be Fauntine and imported Rosetta. Fauntine is by Flood from imported Flirt (dam of Gorgo and Flambeau) by Hermit from Romping Girl by Wild Dayrell from Gay by Melbourne. As Darebin is by the Peer a son of Melbourne, there will be a double cross of that blood close up and four strains of Touchstone blood. Imported Rosetta (dam of Rhono and Rover) is by Struan out of Elegance by Ely from Nemesis by Newminster, third dam Varsoviana by Ion, fifth dam by Langar from Sister to Cobweb. Struan is by Blair Athol from Terrific by Touchstone, thus giving a double infusion of Touchstone blood in Rosetta, while Darebin has a treble strain of that valuable blood. Ely is out of a mare by Melbourne which will give the produce a double Melbourne cross.

One of the odd sights of the New York horse show, and one that afforded a great deal of amusement to the spectators at various times, was afforded in the arena box stall occupied by one of Mr. Pierre Lorillard's Shetland pony brood mares and her foal. These animals were looked after by a small negro boy, who habitually fell asleep every two hours. After nodding awhile the pickaninny would invariably lie down on the straw in the bottom of the stall, directly under the ponies, and have his nap out. As the darky slept the Shetland mother was very careful not to tread on any part of his body, and the foal tenderly licked the black face of the boy. It was one of the prettiest pictures of the week, and dozens of people watched eagerly every day to catch the lad asleep. He was a rare sleeper and the noise and turmoil of the great show seemed to soothe rather than disturb his slumber.

Talking about "the decision of the stewards being final," a good story is told of the judge at the Sky (India) races some years ago, says the London Sporting Times, when the racing was even more bland and childlike than it is now.

It was a very close finish, and looked like a dead-heat. The worthy judge knew more about cane-planting than about horse racing, and being colour-blind and "dotty" into the bargain, was much exercised in his mind as to the winner. But he was equal to the occasion. As soon as the racing was over the owner of one of the two horses came up to him, and said, "Well, sir, what is your decision?"

"Decision, sir?" bellowed the judge; "dam it all, sir, I find you damned impertinent, sir. Don't you know, sir, that the decision of the judge is final? That is my decision, sir!"

And that was all they ever got out of him.

The Oregon State Board of Agriculture met in annual session Nov. 18 at the office of the secretary. The annual reports of the secretary and treasurer were read and referred to the committee on finance. The financial receipts for the fair of 1890 showed $28,094.08 to have been received from all sources, and $25,043 60 to have been disbursed, leaving a balance on hand of $3,050.48. A committee, consisting of Messrs. Bybee, DeLashmut, and Davidson, was appointed to prepare a programme for the fair of 1891. It was decided to have running and trotting races on alternate days, running one day and trotting the next. The following officers were elected: President, J. T. Apperson; secretary, J. T. Gregg; vice-president, D. H. Looney. A resolution was adopted that it is the sense of the board that the legislature make adequate appropriation for the Oregon exhibit at the World's Fair, and a resolution asking the Southern Pacific Company to run a local train during the fair next year between Salem and the grounds.

The Sydney Bulletin has all along been in favor of legalising the totalisator, and is consequently glad to notice that a formidable opponent like Alfred Joseph has been converted to the same way of thinking. The fact is the totalisator must benefit the large, trustworthy bookmaker. Owners, trainers, and people with good information, and those generally who know something of the game will naturally patronise the bookmaker. Knowing a good thing they will want to invest at a long and fixed price, which they could not, of course, get through the agency of "the infernal machine." The latter will suit the people who take little interest in racing as a sport, but the withdrawal of their custom will ruin the small and shady bookmaker whose competition is so hurtful at present to men like Jacobs and Joe Thompson. The totalistor will never suit the man who makes racing a business, for the latter, when he backs, will want to know how much he has to win or lose. On the other hand, the "tote" will better appease the mere gambling spirit.

For some time past Mr. C. J. Hamlin and other gentlemen who control the Buffalo trotting tracks, have been endeavoring to get New York men of experience in racing matters to take hold of the property and establish running meetings at that point. Arrangements have been perfected with Mr. George H. Engeman, President of the Brighton Association, under whose management spring and fall meetings will be held. The spring meeting will begin about May 15th and continue ten and possibly fifteen days.

The property is right in the heart of the city of Buffalo, and is easily accessible by street cars. The original cost was $540,000. The buildings are very substantial, and there is stabling room on the grounds for 700 horses. The spring meeting will, of course, begin after the close at Clifton, and horsemen at the latter track who desire to attend can transfer their stable via the Erie road with very little inconvenience.

In the Anstralssian list of winning sires for the season 1889 and 1890, Rancho Del Paso's Sir Modred takes 18th position, his progeny having won $15,715 dollars in Anstralia. Darebin is also in the list with four wiuners.

M. W. Stinson, secretary of the Surety Loan and Trust Company of Los Angeles, has been gathering together a large nnmber of well bred trotting mares to ship East in the spring. Amoug his purchsses were several from S. N. Straube, proprietor of the Poplar Grove Breeding Farm, the most notsble being Lizzie Thorne, a three-yesr-old brown filly with a record of 2:41, by Nephew No. 1120; first dam Fannie by Romulus. She is stinted to Junio, 2:22, by Electioneer.

Millie H., a three-year-old brown filly by Clovis 4909; first dam Mattie by Whipple's Hambletonian. Millie H. is stinted to Junio.

Valley View Maid, a yearling bay filly by Clovis 4909; first dam Fiora by Algona.

Maggie M., a weanling filly, dark browu, by Clovis 4909, dam Theodosia by Steinway 1808.

Msggie May, a bay weanling filly by Clovis 4909, dam Mattie, trial 2:34, by Whipple's Hambletonian 725.

Scores of articles are being written about kite-shaped tracks, a good desl of it the rankest kind of rubbish, says the Canadian Sportsman. Some are of the opinion that this "new-fangled idea" should be stamped out, while others express the opiuion that it is a novelty that shouldn't be recognized by either the Nationsl or American Trotting Associatiou. Now all this kiud of talk is twaddle pure and simple. Tbe kite-shsped track has been in nse in Csnada for we doubt not half a centnry, and that shape even now is the popular oue in laying out tracks on the ice. The writer csn jog back over thirty yesrs and recall to memory kite-sbaped tracks at half a dozen different ice meetiugs in Ontario alone. Tbere used to be oue on the ice on Torouta Bay, one at Port Perry, another at Peterboro', one at Trenton, and in fact there were scarcely any other kind in use, and even now in ice rscing there are more of that shape than any other. Their construction on land is simply carryiug out what hss been used in Csnada from a period so far back thst the writer isn't acquainted with any horseman old enougb to remember the winter when they were not.

Regarding the borses of ancient times we sre told in I. Kings, 4.26, etc., thst the chariot horse and the cavalry horse were known by distiuct nsmes. The horses of esrly timcs underweut the severest test before they were esteemed worthy of use as breeders. The young mare was ridden at full speed, 50 or 60 miles, the ride being brought to a close by swimming the mare through a stream. After this trial she is expected to take her food freely, and should she refuse food aud seem distressed, she is rejected as unworthy of use as a breeder. The hoof of a horse in ancient times was one of the important tests of quality. For exsmple: Isa, 6.58, "Their horse's hoofs shall be like a flint." And again: "I will make thy hoofs brass " Again, in derision of the enemies horses, it is said: "Then were their boofs broken by the prancings," referring to the exertions in battle. Every effort was made to breed an enduring hoof; more attention being given to this than iu our day. No less an effort was made regsrding eacb and every useful quality.

It is understood that Hugh Kirkendall contemplates, says tbe Independent, at an early day, stocking one of his son's Three Forks ranches with stock and going into the business more extensively. He already has a fair sized stable, and some of tbe best horses that ever fsced a starter in Montana. His trainer, Ed Lsfferty, arrived from California a few days ago with a carload of blood mares and some younggs'ers. He had a hard trip, as nearly all took sick on the way. On the trip Mr. Kirkeudall lost by death Dians, a yearling by Director, first dam Roxana, by Gibraltar, sec oud dam May Day, the dam of Margaret S. Mr. Kirkendall vallued the colt st $5,000.

The eight mares brought up are in foal to Director and sons of Director. Dr. A. E. Bovett, veterinary surgeon for Marcus Daly's farm, has been attending the sick horses all week. A vsluable mare was in a very critical coudition a few days ago. Sbe was considered at the point of death, but Dr. Bovett has bronght her around all right, and yesterday the mare was greatly lmproved aud will recover. All the horses are suffering with pneumonia.

Two eccentricities in foaling are given by the Australasiau as follows:

Mr. W. R. Virgoe, ot Matbonra, writing from his station, says: "A most extraordinsry thing has happened here in connection with one of the brood mares—The Nymph by Hawtbornden, from Queen of Clnbs by Cossack (winner of the V. A. T. C. Sapling Stakes, 1883) She was bred regularly ever since I bought her from Mr. S. G. Cook, and the last two years sbe hss had a foal to a Welcb pony called Arabi Pasha. She was covered by this pony on the 3d and 12th of September, 1889, and on tbe 12th of August this year (1890) dropped a grey filly foal to him, and on October 6th a grey colt foal. Both foals are exactly alike, and are msrked exactly the ssme. Tbe mare seems very fond of the last foal, and takes great care of it, seeming to prefer it much before the first one, although she allows both to suck her. I never heard of a osse where so long a time iutervened between the births. The above may be of interest to your readers." Tbe following from a New Zealaud paper is even more astonishing:— "A mare owned by Mr. Snodgrass (in foal to Tetford) which dropped twins about three months ago; this morning fosled a second time, dropping a good colt foal which is doing well."

Bookmakers sometimes hsve to pay twice over one winner. A case in point occured in the colonies lately, a Mr. Joseph Harris sued Mr. Alfred William Charles for £55 which he had psid him over Little Nell, who came in first for a rsce rnn at Oakleigh Park in October last. The case was heard before Judge Hamilton in the Connty Court on October 16th, and the evidence showed that the defendant had put £5 on Little Nell at 10 to 1, and she came in first. A protest was entered against her on the ground that she had run at an unregistered meeting, but it was dismissed, and thereupon Harris paid Charles £55, including £5 deposited by the latter. Subseqnently an appeal was lodged with the V. R. C , which tribnnal ordered a rehearsing, at which Little Nell was disqualified, and the race awarded to Veracity, whose backers also received tbeir wagers. Harris then applied to Chsrles for the £55, but he refused to disgorge, hence the action. The defendant's connsel urged that there had been no mistake, and that the contract was illegal. The judge seemed to fall in with this view, and gave a verdict for the defendant. This may be law, but it is not justice.

Monroe Salisbnry, the well known Californian, is a devoted sdmirer of an honest, game, bull dog fighting trotter. He had his eye on Ranchero 2:21½ for some time, and went to Montana to bny the handsome chestnut stalion, but Mr. L S. Hatch got ahead of him and hsd shipped the horse to Missouri the week befor- Mr. Ssliskbnry got to where Ranchero was formerly owned. The Californian determined not to go back empty banded however, hence purchased Mary Eagle, the dam of Ranchero, shipped her to his "Plessanton Stock Farm" and bred her this yesr to Director 2:17. In speaking of his failure to secure the stallion, an Eastern paper says, Mr. Salisbury said to a party of horsemen: "I am sorry I was not a little sooner. He is a pnre gaited trotter, a bnlldog fighter, honest and game to tbe core. A number of esstern parties have recently paid very high prices for Cslifoania bred stsllions, but I would rather have Ranchero than auy of them, even if one did sell for $30,000.

Tbe artful cash metallician—the hoarso vampire witb a bsg and a book, who raises his stentorisn note on the place where the turf is all worn awsy by humsn feet—hss invented a new swindle. When the unhsppy fiat backs a horse this individual collars his money and gives him a ticket, and then, under the old regime, he generally got over a fence and ran till the wind was left behind, and the miserable backer ssw him no more. Now, however, he tries a different plan. When the winner presents his ticket he takes it with a glad smile and feels in his bag for the money. Then he notices something and stops "The flag ain't up yet," he observes affably, handing back the docnment; "come back in a minute." Only the ticket he hsnds back is a differeut one from the ticket he just received, and when the holder presents it again a few seconds lster he rises with indignation written large on his hnge, flat countenance and demands what in thunder this bere gsme is meant for. The proceedings end there. There is no possible redress, and the infursted ticket holder goes awsy and relieves his feelings by a remark that sounds like "—!!!d——?—! But, says the Sydney Bulletin, it is all the relief which the case admits of.

A Louisville special of recent date says:

When duriug the past summer Isaac Murphy, while riding at Monmouth Park, fell from his horse previous to eugsging in a race, and was picked np in an apparently intoxicated condition, rumors flew thick and fast to the effect that he had come npon the course in a drnnken state, snd in consequence had dumped his friends and admirers to the extent of thousands of dollars.

Indignation agsiust Murpby knew no bounds, and he met his accusers with qniet firmuess and asserted that be hsd been poisoned. Few persons credited the jockey's story, but it found credence with several of his staunch supporters, smong whom are some of the most prominent turfmen of the blue-grass region.

A secret investigstiou was instituted, and it has resulted in a full confirmstion of the poisoniug story. From facts gathered at the time, and since convincing proofs have been collected, that go to show how a conspirscy was formed to down Murphy by several persons whose names are withheld. The certificstes of four responsible physicians bave been obtained snd with them other indisputable evidence, proviug beyond a doubt that poison and not liqnor caused Murphy's downfall. This intelligence will create a sensation in turf circles, especially when it is announced thst the guilty persons are to be prosecuted. The developments are awaited with eagerness by the public.

Austrian society has been greatly moved says Truth by the Prince of Wales journeying to Moravia to psss a week with Baron Hirsch. The Baron is the son of a banker in Bavaria. He is now worth above £20,000,000. The foundation of his fortune was a railway contract with the Turkish Government. The story goes that for each kilometer made he was to receive a certain sum. He made the sections of the railwsy which required no expensive engineering work, receiving the stipulsted price. Then he explsined that he could not connect them without a greater amount per kilometer being paid. These were the days when Turkey could borrow, so he obtsined the additionsl price. What between tbis, and being psid in bonds at a heavy discount, and plscing them to advantage among the silly people who believed in Turkish fi nance, he realized many millions by tbe transaction Then he settled in Psris snd took to speculations on the Stock Exchange, wbich owing to his commsnd of money, proved very remunerative. Of late he has kept his money well in hand—bought when others were selling and sold when others were buying. Although snccessful on the Paris Bourse, the Baron was not so successful in getting into Paris society. But into some kind of society he is determined to bny his way. The Boulanger revelatious show that be snbscribed lsrgely to the Orleans conspiracy, and this has won him the patronsge of some of the Orleans Princes. Having been blackmailed by a Paris Club, he bought the club house, thus giviug the members the chance of receiving him among them or being turned ont themselves. Since he has takeu up his residence with us, he has gone on the turf, and has rented huge shootings, which, perhaps, is the snrest means of a rich man to make bis way socially with English society.

The Yakima war was a great deal more to Oregon than even the Blackhawk wsr or any other of the little Indian wars of old to the United States. And finally, when the Indians there were besten and snrrendered their camps and cattle and horses to the whites, the Gensrl of the United Ststes army ordered that, as there was no mesns of taking these borses out of the country, they shonld be killed. They were beautiful horse —spotted—as pied and spotted as Jacob's cattie, and by the ssme poetic touch of natnre. These spotted monntains and dotted heights of snow and lava were as the spotted and the striped sticks which Jacob set up in the water for his cattle to look upon.

The volunteer troops of Oregon were detailed to do this work of destruction, and the thousands of horses were hemmed in on a high plateau which rested against and hung a hundred feet above the rock-bound bank of the Oregon River. Volley after volley was poured in upon the poor brutes, till the men stopped loading and firing from very weariness. Then a splendid black steed came galloping out, and stood right before the men as they drew up their guns to renew the deadly work.

But the splendid audacity of this noble animal, as he stood with nostrils extended and mane like a banner of battle, challenged their admiration too deeply, and they refnsed to fire. At last, as if impatient to die, he galloped up and down the line which shut him and his doomed band in above the river, and gave that wild and desperate death cry which few men ever hear, and, it is said, which a horse never utters but once. And with this cry he dashed tbrongh the remaining horses, and leaping down the precipice into the rocky river, led every one of the faitbful creatnres to instant and glorious destruction.—[Joaquin Miller.]

Carbine, tbe winner of the last Melbourne Cup is by Musket out of imported Mersey by Knowsley from Clemence by Newmiuster from Eulogy by Enclid, etc. Carbine is a five yesr old, and csrried 145 lbs., doing the two miles in 3:28¼; the weight has never before been carried to victory, and the time has never been equalled in the colonies. Last year he ran second with 140lbs. Since he hss been on the turf he has won 27 races, and only rnn unplaced once; ss a two yesr old, he won five races out of five starts; at three years old he won nine, ran second three times, and third once; at four years old he won nine, running second twice, third twice, and once unplsced; at five years old he has won four races. Carbine's races have been won at all distances. viz.. one at five furlongs, four at six, two at seven, four at one mile, four at one and a quarter miles, two at one and a half miles, seven at two miles and three at three miles. The well known Colonisl writer Sterling says of Carbine: "This horse has a beautiful head, a little small for so big a horse, kind and quiet looking, marked with a big stsr, and a fsint streak thence to nostril, a strong but not long neck with a good crest, grest shoulders running right into his bsck and clothed with muscle, while his arms are very powerful, the forelegs standing back nnder him. He is very thick througb the heart aud short in the back, which is immensely powerful, aud he has a grest barrel, is closely coupled, and is very high between tbe hips, where the oroup standing np is almost like a deformity; whilst the hips are square, the quarters are long and droop a little and are wonderful in their muscular developments, his width outside the stifles being hardly credible, while be is filled up with muscle right down to the hocks, his thighs being perfection, and be has rare hocks, his near hind leg is white to the hock. Such a horse to follow I have never seen, being square from his hips to tbe point of his interthighs, aud wider tban most draft stallions.

Referriug to the McGuigan case the N. Y. Times says: "Few, if any, of the historisns touched upon the famous Small Hopes episode as it actnally occnrred, and a brief reference to it is in order. The brown gelding was under the ban before McGuigan had charge of him, for he had competed in a rsce where time was suppressed at Toledo in the fall of 1874. James C. Deyo of Jackson had Small Hopes then, and afterwsrd transferred him to the Hon. Charles Stewart of Kalsmszoo. From this wealthy Michiganer Mc Guigan obtained permission to take the gelding and utilize his racing powers as he pleased, but since he had been expelled along with Deyo it was necessary thst he stsrt under some other name. So it was that the pair went out on a freebooting excursion, ohoosing places some distsnce from where tbe horse had formerly trotted. At Omsha he was entered as Lothsir and defested Randall, the pet of the local turfmen, and later in the seasou of 1875, after doing whst was known as the oil circuit throngh Pennsylvania and Ohio, turned up at Washington. Here he was clipped and rechristened Lapland. In the race at Brightwood Park, then the leading course at the capitsl, were Planter, Jack Draper and Tanner Boy, driven, respectively, by Splan, Crawford and Kelly, otherwise known as the "bull pusher." McGuigan, it seems, hsd sgreed to enter into a combination and Jack Draper was slated to win, but the wily William gave the rest what is known as tbe "double cross," and after a battle of two days secured three heats for Lapland, alias Small Hopes. Then the discomfited plotters set np a cry that the gelding wss a ringer, snd tried to have bets declared off. Somebody who knew the inside advised the judges that the horse's identity had been known to tbe other drivers all the time, and they wisely determined not to disturb the pools.

A few days later McGuigan turned up at Boston with the ssme trotter, but disguised by coloring his white hind leg, and now called Westbrook. It wss another case of the pitcher going once too often to the well, for man and horse were recognized, and McGuigan hsd the full penalty measured out. He came to New York and finally sold Small Hopes to William H. Vanderbilt, who drove him on the road snd found him a snperior pole horse. Hitched with Lady Mac the outlawed trotter msde some fast miles and did good service as a roadster. Mr. Vanderbilt tried to have the stigma removed, but even bis influence was not sufficieu for this, and Small Hopes remained banished from all National Association tracks.

The annusl meeting of the Turf Congress was, according to the reports, a very tame affair. The Washington Park Club, says the Republic, was not represented, but sent a communication denying the rumors that it desired to withdraw. It wss expected that President Green, of the St. Louis Jockey Club, would be called upon to answer a serious violation of the most importsnt rule of the congress—allowing horses of three years old and upwards to start in races less thsn a mile. No sction was taken, however, but the rule was indorsed by the congress. The defense of Green wonld donbtless be that tbe violation did not occur during the regular meeting, and that between the dates assigned to him by the Turf Congress he scrupulously observed the rule.

Tbe fact that the Washington Park Club did not send a representstive indicates that the influential Chicago organizstion is manifesting but little interest in the work of the congress. Knsas City was not represented and was not assigned any dates.

On the motion of Mr. B. C. Bruce rule 103 was amended to read: Rulings of associations not members of the Turf Congress sball not be regarded except in cases of fraud.

These rules knock out the collection of all Eastern forfeits, and the West retaliates against the Eastern clubs for allowing Jockeys Rsy, Stovsll and Hollis to ride on their trscks wben they were ruled off in the West. The East bss for yesrs ignored the West, and now the Turf Congress will ignore the East, and see who csn stand the rscket the longest.

The mile rule was brought up and it provoked a lively debate, the tenor of which went to show that all the clubs were delighted with its operation during the past season, except the Lexington people, and out of deference to them the following amendmeut was msde, which will sffect thst trsck alone:

"There sball be no dash races for horses three years old and upwards at a less distance than one mile, after May 15, 1891."

President Perkins charged the St. Louis Jockey Club with breaking their obligation by giving races at a less distance than a mile at their summer meetings, and suggested to the congress that the club be fined.

Mr. Green claimed that he did not think anything but their regular meeting was held by the rule, but the congress decided otherwise, and the St. Louis Club was let off with a light fine in the shape of a basket of wine.

An agreement was entered into by all the clubs to charge the pool-room correspondents 75 per cent. of tbeir receipts for the privileges of the tracks, and the routine business of the congress was ended.

GAMES PLAYED AT HOME, OAKLAND, SACRAMENTO AND STOCKTON.

SACRAMENTO ve. STOCKTON.

THURSDAY, NOV. 20TH, 1890, AT STOCKTON.

There wae lots of fnn at to-day'e game hetween the Sacramentos and Stocktone. No umpire pnt in an appearance, and Chase and Hoffman were choeen to act hy their reepec tive captaine. Almost from the time the first hall wae pitched the kicking commenced, and was kept np throughont tbe game.

Kilroy and Fndger were the opposing pitchere, and both were hit hard, tbe latter eepecially eo. Bowman and Armstrong rendered their pitchere good support, and threw well to bases. Reitz played a eplendid game at ehort, accepting eight hard chances. Wileon caught three fonls after long rnne, and Goodenongh aleo made a fine rnnning catch.

Kilroy made three hite, one of them heing a home run hit away over Holliday's head.

Selna was etruck hy a pitched ball and may not be ahle to play to-morrow. Three beautiful douhle playe were made, that hy Godar, Daly and Stapleton heing especially noteworthy.

The Senatore took the lead in the second inning and were never headed. They scored one rnn in the firet inning, three in the second, two in the fourth and one in the fifth, two in the sixth, three in the eeventh and two in the ninth, a total of fourteen. Stockton scored one in the second inning, three in the fifth, and four in the seventh, a total of eight. Following ie the score:

SAN FRANCISCO ve. OAKLAND.

FRIDAY, NOV. 21st, 1890, AT OAKLAND.

The last Friday game for the eeason at the Emery grounde was a moet exciting one, and was lost for the Friscos throngh Conghline foolieh hase rnnning in the eight inning. Both pitchere did good service keeping the hite well eeparated. The Friscoe ecored once in the second on Levy's base on halls, hie eteal, Everetts ecratch eingle and a paeeed hall. Isaacson's error of Ehright's throw and Lohman'e triple gave Oakland one in the third. Two more came in for them in the fifth. Sweeny was eafe on Ehright'e fnmble and Dooly gained firet by forcing Dungan. Lohman's long eingle ecored hoth men. The Friscoe evened np in the eixth. Conghlin wae eafe on Cantillion's error, Stevens aingled and hoth ecored on Cantillion, letting Lohman's throw get away from him. A hase on halls, Stevene muff of McDonald'e fly, and Carsey'e scratch hit gave the Oakjande the advantage in the eighth, but the Friecoe made it a tie in the ninth, Hanley sooring on a haee on halls, Levy'a hit and Speer's aacrifice fly ont. Sheridan then called game on acoonnt of darknese. The score:

SACRAMENTO vs. STOCKTON.

FRIDAY, NOV. 21ST, 1890, AT SACRAMENTO.

The Sacramentoe were eent to hase on halls fifteen timee in thie gsme by Chase, and this, together with eleven hits, three of which were home rnne, two triples and one a donhle, gave them little trouhle in winning hands down. Tbe Stocktons played an almost perfect game, hut were nnable to oonnect well with Hoffman, their four rnne heing gained in the eecond inning on four hases on halls and two safe hits. Fogarty retired to right field in the third inning, hie hand heing crippled. Fudger took hie place, doing excellent work. Daly wae but one time at the hat securing his hase on halls on four occasione. He celebrated his only opportunity to hit the ball by banging ont a home run. Reitz and McHale did the heaviest etick work in the game. The score:

SAN FRANCISCO ve. OAKLAND.

SATURDAY, NOV. 22ND, 1890, AT SAN FRANCISCO.

Thie game was a slugging conteet with the fielding brillisnt on one side and miserable on the other, as the score at'ests. Cobb and Lookahaugh were the pitchers. The hits were well bunched off each of them in eeveral innings. The infielding of the Friscos wae particularly poor, no fewer than seven errore heing distrihnted hetween them. At the end of the fifth inning the ecore was a tie, standing seven to seven. The Friscoe made one in the sixth on Shea'e force hit, Steven's single to right and a poor return of the ball to the plate hy Cantillion. In the eame inning the Oaklands beat them ont, securing two rnne. Cantillion eingled off. Sweeney was eafe on Lookahaugh'e ineffective throw of hie hit to catch "Cant" at eecond. Dnngan'e hit forced Sweeney at eecond. On Lohman's beantiful eingle both Cantillion and Dungan tallied. The score:

SACRAMENTO vs. STOCKTON.

SATURDAY, NOV. 22ND, 1890 AT SACRAMENTO.

Poor work by the Stockton infield gave the Senatore an easy victory. The Gastowns and Hickenbotham, an amateur, in the hox for them, and his work was a genuine snrprise. Bnt eix hite were made off him, and two of these were ecratchee. The Senators played superh hall, hnt one error heing made. Harper wae eteady and pitched effectively. Bowman canght him in a very finished manner. The Sacramentos gained their rnns in the third, fourth and seventh inninga on combinations of hite, errors and hases on halle. McHale'a error wae responsible for Pache's run occnring in the third. But seven inninga were played. Mecgan umpired eatisfactorily. The ecore:

SACRAMENTO vs STOCKTON.

SATURDAY, NOV. 22, 1890, AT SACRAMENTO.

The second game, whioh was a postponed one, was commenced after an intermieeion of fifteen minntes, and wae witnessed by the largeet Saturday aseemhlage of the eeason, abont twelve hnndred heing preeent. Hickenbotham was again in the hox, hnt he wae not so effective in this game, heing hatted more frequently and for harder hits. Mike Kilroy was also hit ont hsrd. Both tesme did lively stick work, which prodnced five earned rnns each in the beginning of the gsme, and at the end of the seventh inning the score wae 8 to 7 in avor of the Senatore. It was then thonght advieable to pnt in Harper to pitch. Hie work wae excellent. In the ninth inning, with bnt one out and two men on bases, Fudger hit sharply to Daly, who fielded the hall to Reitz at eecond, forcing a rnnner, and Reitz then hy a rapid throw, pnt the ball in Stapleton's hande, completing a double play and ending the game. Goodenongh wae nnahle to play, and Hoffman filled hie place acceptably in center. The score:

SAN FRANCISCO vs. OAKLAND.

SUNDAY, NOV. 23RD, 1890, AT OAKLAND.

The game at the Emery grounde last Sunday morning wae easily won hy the Oaklande for the reason that Van Haltren who officiated as nmpire made them a preeent of it. Conghlin was in the box for Frieco snd yonng Carsey for Oakland. Both were hit heavily. Coughlin enffered eeverely hy the deal the umpire gave him, and after Dooley was allowed two haees on a hit indisputably foul which ecored a runner, the Frisco man lost all heart and asked to be taken ont of the hox. Finn however kept him to hie work. Speer canght a magnificent game and threw etrongly to hasee. The fielding wae generally good. To enable the teams to catch the train for the afternoon game the Friscos did not play their half of the ninth and the score reverted to the eighth inninge. The acore:

SAN FRANCISCO vs. OAKLAND.

SUNDAY, NOV. 23RD, 1890, AT SAN FRANCISCO.

The last game of the season was a tame, spiritless affair. Shaw was wild and sent six men to bases on called balls, besides making three disastrous pitches, and Cohb was unfortunate for his side hitting six of the Friscos. Both catchers, Speer and Lohman rendered fine service behind the bat. The hitting was strong and well bunched at times, while the work in the field was little better than ordinary. Fred Carroll of Pittsburg umpired, doing fairly well. His decisions on balls and strikes were often erroneous. The Oaklands started off at a fast pace in the first inning, scoring three men on two bases on balls, a scratch hit an error by Shea and a wild pitch. In the next two hits, a base on balls, and a sacrifice gave them another. The Friscos evened up with them in the second run but by bunching four hits and a sacrifice in the seventh, the Colonels took a lead Finn's men were never able to overtake. Fully 10,000 persons witnessed the game. The score:

SACRAMENTO vs. STOCKTON.

SUNDAY, NOV. 23RD, 1890, AT SACRAMENTO.

There was another big attendance at this game which commenced at noon. It proved to be an exciting struggle and the Senators claim it would have been easily their game if Meegan had not shown favoritism to the Stocktons. Chase and Armstrong and Hoffman and Bowman were the batteries. Both Chase and Hoffman pitched steady effective ball allowing but three hits each. The work of the catchers was splendid, and the same may be said of the support of the fielders. No runs were scored till the eighth inning. In that inning Bowman took his base on balls, stole second, went to third on a wild pitch and second on McHales triple. For Stockton Wilson was safe on Reitz's error, went to second on Fogarty's single and third on Pache's hit. Two men were out when Holliday went to the bat. He hit a ball outside the foul line of left field but did not run on it. Meegan surprised everyone by declaring it fair and both runners scored. The crowd threatened to mob Meegan who was locked up in the ticket office and shortly afterward conveyed in a carriage to the depot. The score:

SACRAMENTO vs. STOCKTON.

SUNDAY, NOV. 23RD, 1890, AT SACRAMENTO.

The second game was called at 2:15. Chase tried to pitch thia game also, but had to give up in the fourth inning, his arm being weakened. Hickenhothan replaced him. The amateur was hatted around for seven hits, of which three were long home runs and one a triple. Harper was in the box for the Senators, and did masterly service. He allowed seven hits which were well distributed, struck out six, and allowed but two bases on balls. The Senators played an almost errorless game, while the few errors of the Gastowns were not very costly. In the first inning Goodenough made a two-hagger, reached third on a sacrifice and scored on a throw to catch Bowman at second. In the third, Harper went to first on balls, to second on Goodenough's single, and they both advanced a base on a wild pitch. Stapleton also took his base on balls. Harper and Goodenough scored on Daly's single. In the sixth McHale and Godar drove out home runs by long hits to left field. Holliday alao made a home run hit over Roberts' head. In the seventh Roberts made the circuit on the longest hit ever made in Sacramento. Bowman drove out a double, and acored on Stapleton's sacrifice and McHales single. Clay Chipman umpired and his work was almost perfect. The score:

ALL CALIFORNIANS vs OAKLANDS.

THURSDAY, NOV. 27TH 1890, AT SAN FRANCISCO.

The old time favorites, gathered together in the ranks of the All California team, were given a right royal reception when they came on the Haight St. grounds Thursday arrayed in nine distinctly different uniforms to do battle with the Oaklands. An immense crowd was in attendance, the bleachers being packed while the grand stand was comfortably filled. The game was an interesting and exciting performance from start to finish, and the Colonels showed up remarkably well against their formidable adversaries. There was plenty of strong hitting in the game, in which both teams divided honors. Phil Knell, the south paw, occupied the box for the All Californians, and although his work was good, his former associates displayed a lively familiarity with his curves. Bill Brown, the New York's back stop, received his delivery excellently. Carsey pitched for the Colonels, and after the first inning his work, considering the team facing him, was of a high order. Lohman gave him good support at the receiving end, but the work of the fielders was often deficient. Particular features were catches of a sensational order made by Fogarty and Charley O'Neill. Sweeney and Dungan also did some fine work in the field. The Californians started off lively, making four hits and as many runs in the first inning. They tacked on another in the fourth, when the Oaklands also made three, tying the score in the following inning. In the seventh, the Colonels forged ahead two, but by rocky fielding in the eighth, coupled with a brace of hits, they allowed the visitors five runs. In the ninth, however, hits by Carsey, Dungan, Lohman and McDonald, a base on balls, and Smalley's error gave them four runs, which again evened up the score. The Californias made the necessary run in their half, Hardie leading off with a double, Smalley sacrificing, and Dooley's error of Sweeney's hits allowing the Boston catcher to score. Van Haltran, McDonald, Smalley and Carroll did powerful work at the bat. Gagus' decisions were frequently disputed by Fogarty, Van Haltran and Carroll. The score:

THE STANDING OF THE TEAMS.

The championship season was supposed to end last Sunday, but the fact that the games of that day tied the San Franciscos and Sacramentos for first place, necessitated a series of games to be played off. The 'Friscos and Senators each have won 79 of 137 games played, with a percentage of victories of 576. The deciding game will be played in the near future, a full account of which will be published in our next issue.

THE CORRECT RECORD:—(to November 23d, inclusive).

CLUBS.	Oakland	Sacramento	San Francisco	Stockton	Games Won	Games Played	Percentage
Oakland	....	20	27	29	76	136	.558
Sacramento	24	....	17	38	79	137	.576
San Francisco	21	26	....	32	79	137	.576
Stockton	15	12	14	....	41	140	.292
Games Lost	60	58	58	99	275	....	....

SUMMARY.	Played	Won	Lost	Percentage
San Francisco	137	79	58	.576
Sacramento	137	79	58	.576
Oakland	136	76	60	.558
Stockton	140	41	99	.292

The question of championship was very muddled last Sunday, and which state of affairs reflecta discreditably on the league officers. That two different schednles, one calling for fifty games between Sacramento and Stockton and the other forty-nine were published as "official schedulea" is gross negligence. It is to be hoped that next season will be free from a repetition of such deplorable mistakes,

Professional Pick-Ups.

"Who are the champions" has been the cry all week.

The wind up of the season was not a very brilliant one.

Manager Finn, though not thoroughly convalescent is around again.

The Colonels visit Vallejo to-morrow to play the amateur team of that place.

Lou Baltz of the Vallejos will pitch some of the games of the Allen—Fresno series.

Milt Whitehead and Dave Creaner are having lots of sport shooting on the San Joaquin.

The "idol of the kindergarten", Rube Levy, returned to his trade, shoe fitting, last Monday.

Chase has sent more men to base on balls in a single game than any other pitcher in the league.

Joe Werrick, late of the Baltimores and St. Pauls, will play second base for Denver next season.

Robinson says that Tip O'Neill, Cantillion, Dooley and Sweeney will remain Colonels next year.

Pitcher Lookahaugh returned to his home in Indiana last Monday and McCarthy departed Wednesday.

Kilroy leaves shortly for his home in Philadelphia. Godar will accompany him as far as Cincinnati.

Billy Bowman, the big Sacramento backstop, will be married to a wealthy Sacramento lady next month.

If the weather remains fine Fogarty's team of California star favorites will have a prosperous engagement.

The kids say that the fire in the kindergarten last Sunday was started to burn up the Friscos old delapidated uniforms.

In a private letter from Fresno, it is stated that there is no definite understanding as to whether that city will be in the league or not next year.

Pop Swett will catch Van Haltren for the All Californias in to-morrows game, and Coughlin and Speer will form the battery for the San Franciscos.

The Santa Rosas and Fresnos play three games, Dec. 6 and 7th, (one Saturday and two Sunday) to determine the amateur championship of the State.

Manager Harris is said to have a surprise in store for the base ball public. Hen will have the best team to represent San Jose that can be had for money.

The ball players are seemingly none too anxious to join Hellman's winter league. The cause of their indifference in the matter is that there is little remuneration in sight for their services.

A firm in Fresno presented Matt Stanley with a $5 hat last Sunday for making his home run. Matt was also the recipient of a shower of silver after making the circuit by enthusiastic raisin growers.

Bssides Howell and Stanley, Dextraze will prohably be found with Fresno'a big league team next year. He has made a big impression by his clever work at the bat, in the field and on the paths.

Rube Levy won the diamond medal for being the most popular player in the league. It was thought that McDonald would be the lucky man, as he had a big lead for the past month, but the majority of votes cast Sunday were for Rube, and were sufficient to give him the prize.

The National League men gained another point in the baseball fight yesterday when they purchased the Chicago Brotherhood Club. Al Spalding gave $10,000 in cash and a fifteen thousand dollar interest in his club for the team. This practically ends all chances of another fight. With the New York, Brooklyn, Pittsburg and Chicago Brotherhood teams in their grasp the League people have control of the situation, and the baseball war that has been raging for a year is a thing of the past.

The directors of the league met last Wednesday night to settle the championship affair. On examination of the schedules it was found that the Sacramentos were tied with the San Franciscos for first place, and to decide the supremacy a series of three games will be played off as provided in the by laws of the league. There was considerable discussion as to what grounds the decisive games should be played on, Enright claiming they should be played to free gates in Sacramento. The Stockton grounds were finally agreed on and the dates the 28th and 29th of the present month.

The Players' League will meet at Pittshurg on next Tuesday, and it will doubtless be the last acene in the sorry history of that ill advised organization. Other conferences may be called, but the events of the past month have weakened its cause beyond hopes of resurrection. The failure of Chicago to meet the financial obligations to the players, and the short sighted policy which has led the Cincinnati players to doubt the stability of the new organization, are incidents not calculated to improve the rating of the league in the eyes of the public. Even the Pittsburg nomads with all their wanderings can make no such complaint of delayed and unpaid salaries as Chicago and Cincinnati's revised orphans. Pittsburg, the weakest club in the League list, paid up every cent of its obligations. That fact alone would aid the parent body if the revolutionists panted for more war. The ball players themselves are convinced that the League will live as long as the game itself does. It is the public that demands a cessation of hostilities, and New York and Brooklyn have sensibly responded to the call. In one of these cities the League had the "best of it" and in the other story was reversed. And "the best of it" meant deficits for both! The war drove the grand army of ball cranks in those cities to the race tracks. With the return of those cities to the old faith of "one club one flag," what is left for the others? Cincinnati with its sympathies inclined toward the League will seeLeague ball. The Cleveland Brethren lost a fortune this year and had the short end of the battle there. There is no reason to expect better things if the strife is renewed. Philadelphia was so weak in the middle of last season that a special meeting had to be called to bolster it up.—Times Star.

The Amateurs.

BURLINGTONS vs E. T. ALLENS.

SUNDAY, NOV. 23RD, 1890, AT SAN FRANCISCO.

Last Sunday morning the Burlington Routes and Allens plsyed au exhibition game st the Haight street grounds, in which the Railroaders were essy victors. Rohan pitched for the Burlingtons, sud as usual kept his oppouents guessing at a lively rate. Bnt five hits were msde off him, while he struck out eleven men and did not give a single base on balls. Evatt started in to pitch, and was tonched up lively, it being necessary to substitute young Walcott, who was an improvement. The snpport rendered by the Allens wss of a miserable character, fourteen bsd errors being distributed between the plsyers' offered chances. On the other hand, the Rail. roaders gave Rohsn very encouraging support, Mnlvey catching in fine form, while the infield, with the exceptiou of Traynor, played perfectly. Callihsn, Mulvey and Buckley led at the bst, esch msking some fine hits. The score:

VALLEJOS vs. J. L. CAHILLS.

SUNDAY, NOV. 23RD, 1890 AT VALLEJO.

The J. L. Cahill team which was formerly known as the Francis Valentines visited Vallejo last Sunday aud treated the cranka and team of that place to a genuine surprise party. This tesm being an ontsider has not received much attention from the local press but if their game with the Marines can be taken as an indicstion of their abilities, they csn certainly claim a high place among the prominent amateur teama of the State. They tackled one of the strongest teama of the Amateur league and according to all accounts, were it not for the favoritism of the umpire to the home team, they would have won the game on their merits. Cullen and Scott are a strong battery and kept the heavy hitting Marinea down to six hits. Their infield is also a clever one, Lippert, Mertes and Powell being very promising men. In hitting they will compare favorably with any team in the league. Sprague and Smith and Bsltz and Farrell constituted the batteries for Vallejo in this game. Both catches rendered splendid snpport. A return game will be played in the near future. The Cahills will most likely make application to the league for membership next aeason. The score:

Cahills.	AB	R	BH	SB	PO	A	E
Kenny, c f	5	1	1	0	0	0	0
Lippett, 1 b	5	0	2	2	10	0	1
Black, 1 f	5	0	1	0	1	0	0
Scott, c	5	3	1	1	3	2	0
Mertes, 2 b	4	1	1	0	5	4	1
Burke, r f	3	0	0	0	1	0	0
Cullen, p	2	1	0	0	0	1	0
Phelan, s s	4	0	0	0	1	4	3
B. Powell, 3 b	4	1	0	0	2	2	1
Totals	35	7	5	3	24	13	5

Vallejos.	AB	R	BH	SB	PO	A	E
McGuire, 1 b	4	0	0	0	6	0	1
Farrell, s s & c	4	2	2	0	4	1	0
Hughes, 2 b	3	2	0	0	4	2	0
Wise, l f	4	0	0	0	0	0	0
Murdock, 3 b	4	2	2	0	1	2	1
Stanford, r f	4	2	0	0	0	1	2
Smith, c & l b	3	0	0	0	11	3	0
Balez, c f & p	4	0	0	0	1	0	0
Sprague, p & c f	3	0	2	0	1	0	0
Totals	33	8	6	0	27	9	4

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
Cahills	0	1	1	1	2	1	0	1	0	—7
Vallejos	4	0	0	0	2	2	0	0	*	—8

Three base hits—Farrell, Mertes, Kenny. Two base hit—Murdock. First base on errors—Vallejos 5, Cahills 3. First base on oalled balls—Vallejos 5, Cahills 4. Left on bases—Vallejos 7, Cahills 5. Struck out—Sprague 7, Balez 5, Cullen 2. Hit by pitched ball—Smith, Phelan, Scott. Wild pitch—Sprague 1. Sacrifice hits—McGuire, Stanford, Mertes, Cullen. Passed balls—Smith 2, Farrell 1. Time of game—2 hours, 10 minntes. Umpire—Kelly.

Interior Base Ball.

FRESNO vs. SNOWFLAKES.

SUNDAY, NOV. 23RD, 1890, AT FRESNO.

The Fresnos had no difficulty in wiuning this game from the Sacramento Snowflakes battery, Hapeman, Boyne and Shanahan at will. Howell pitched superb ball for the raisin growers allowing but six hits and retiriug twice as many on strikea. Stanley canght him in excellent style and kept base rnnners hugging the cushions closely. The Fresno team played a good fielding game throughout. In the first inning safe hits by McMahon, Cullen and Stanley, Hugh Dwyer's double snd an error by shortstop Dawson gave them four rnns. The Flakes scored three with first on Shanahan bsing hit by a pitched ball, Doherty'a safety, Boncher's two bsgger and a wild throw. After that the Friscos walked away from their opponenta. The features of the game was Stanley's magnificent home run drive, the longest ever made on the gronnds, the base rnnning of Dextraze and the general fielding of the home team. Bouchers, late of the Spokanes and Sacramentos, played first base for the Snowflakes. The score:

Freenos.	AB	R	BH	SB	PO	A	E
Dextraze, 2b	7	2	2	3	2	4	1
McMahon, c f	6	2	1	2	2	0	0
G. Dyer, s s	5	3	2	3	1	2	0
Cullen, 1b	5	3	1	1	6	0	1
Pier, l f	5	2	3	1	0	0	0
Stanley, c	5	4	2	1	13	1	0
H. Dyer, 3b	5	1	1	1	2	2	1
Sheney, r f	4	2	2	1	0	0	1
Howell, p	5	2	1	1	1	2	0
Totals	47	21	15	13	27	11	4

SCORE BY INNINGS.

	1	2	3	4	5	6	7	8	9	
Freeno	4	2	1	1	5	0	2	3	3	—21
Snowflakes	3	0	0	0	2	0	1	0	0	— 5

Earned runs—Fresno 2, Snowflakes 1. Two bsse hits—Pier, Dyer, Borchers. Home rnn—Stanley. Base on bal's—Fresno 4, Snowflskes 1. Hit by pitched balls—Fresno 3, Snowflakes 1. Passed balls—Snowflakes 4. Left on bsses—Fresno 7, Snowflakes 5. Struck out—By Howell 12, Shanahan, Hapeman, Boyne 4. Time of gsme—2 honrs and 15 minutes. Scorer—Sims.

Amateur Short Hits.

The Fresno tesm is slmost invincible.

Crowley of the Railroads, is a fine base runner.

First basc msn Lippert of the Cahills, is quite a sticker.

Nearly all the Vallejo team are provided with positions in the Navy Yard.

Grace says he will have snother strong team to represent Santa Rosa uext sesson.

Manager Keller held the book in the Burlingtou—Allen game last Sunday morning.

A game between the Will & Fincks sud Santa Rosas for $100 a side is being talked of.

Frsnk Delmas Joe Leveque and Billy Cooney will play with the Willamette Valley League next season.

The Ætnas of Snisnn will probably bc in the Amateur League next season. They have made a splendid record this sesaon.

The Santa Rosas defeated the B. Liddle's last Sunday by a score of 9 to 6. The game was very loosely contested by both teams.

A telegraphic despatch says that Matt Stanley made the longest home run hit ever secured on the Fresno grounds last Sunday.

Both St. Mary's and Santa Clara Colleges are represented from their intermediate to their classic departmeuts by strong teams.

If the averages were compiled it is almost a cerlainty that they would show a percentage of fewer runs earned off Baltz than any other pitcher in the league.

Kennedy was somewhat off in his fielding last Sunday, which was nudoubtedly due to his lame leg. Iu condition, Billy can hold his end up with the best of them.

To-morrow the Oaklands will play the Vallejos. Baltz will not be with the team as he is going to Fresno, but Cobb will probably twirl for the Msrines against his own team.

Cap McGuire of the Marines, is becoming an all rounder. Tom has played behind the bat, third, second, and first bases and short stop in generally good fashion for the team this year.

The amateurs are anxiously waiting the scores of the Honolnlu games, being much interested in the doings of their confrerea who are with the Californias, Riley, Sharp, Creamer, Leveque and Farrell.

A hard fought twelve inning game wss played at San Mateo last Satnrday between teams composed of University and San Matthew's Hall students. In the last inning McLaine struck ont three men in succession and Freeman retired the third man on strikes with the bases full. The score was 6 to 5.

There will he many new faces in the amateur leagne next season which will be caused by vacancies created by the big league drawing on some of the best amateur talent for recruits. Many players who were eligible and anxious to be seen in the amatenr ranks during the season just closed were unable to secure berths on account of the teams being crowded with ex-professional talent. Clicqueism has also had much to do toward preventing sspiring and capable youngster'a chances to be seen, but next year it is to be hoped that the league will be conducted on broader and more business-like principles. Favoritism in managers is invariably productive of dissensious, and while managers may lean more to some players than others on account of friendly or other relations, this spirit should never predominate over that which is for the best interests of the team's success.

Although the E. T. Allen team finished last in the championship race, which may be ascribed to a variety of mitigating circumstances, the team can lay claim to ho champions in a most laudable respect, which cannot be governed by the computation of figures. In the composing of his team Manager Paul Keller not only secured players of high individual playing merit, but was particular that they were gentlemen in the truest sense of the word as well, and everywhere that this team has played this season the Allens made a most favorable impression, being warmly welcomed on all return visits. Manager Keller is certainly entitled to highest praise for his pluck and devotion to the league under adverse circumstances, his conscientionsness and honesty in all matters of business, and the refined standard of msnners which always characterized his team'a contests.

Three of the former players of the Csliforuia Amateur League will appear with Fogarty's sll California team in their series at the Haight St. grounds. They are Phill Knell, Bill Smalley and Pop Swett, all now way up in the profession.

Peek-a-boo Traynor, the gigantic, rollicking first baseman of the Burlington team, is nothing if not original. Peek and his quaint and amusing doings have often been the subject of "round the table" yarns by his fellow players, bnt here's one that bears repetition.

Not many moons ago, Peek and his chum Tank Kelly bosrded one of the cable cars going from the gronnds toward the ferries. The Burlington's had won a game that day, and as Peek and Kel always celebrate a victory in a manner most congenial to their tastes, it is to be presumed that they were the possesso.s of qnite a comfortable "big steam jag" They had lingered qnite long round the terminons "joints," and it was dark when they took front seats on the dnmmy. The car had gone abont half way to Msrket St. when Traynor objected to the way the head light was pointed and thought it should be turned toward the gripmsn so that he might hsve more light to manipulate his grip with. He accordingly proceeded to adjust the light to his own fancy, bnt was ordered to desist by the angry gripman. Considerable talk was exchanged between the two, the company employee finally remarking that he would hsve both the players put off the car.

"Do that," said Traynor, "and I'll be 'boss of the road:' I'll tie you up sure if you get gay with me."

The gripman and conductor, by their combined efforts, succeeded in dislodging the precious pair, who offered littte resistance.

A happy thonght then struck Peek. "Lets camp, Kel." "All right," replied the willing short stop, and before the car had a chance to stsrt, both squatted on the track with their uniform bags beside them and their hats in their hands, full masters of the situation.

The car men were paralyzed, bnt were as powerless to do anything. Soon following cars came along till there was quite a blocksde. The blue-coated "bell punchers" and "gripies" held a consultation, and although they out-numbered the "tossers of the sphere" four to one, they very wisely refrained from attempting sny violence, knowing full well that their craninms might be mistaken by the "willow wielders," for "high straight balls right over the plate" and "put out" by the first baseman on the short stops assist" would be the result.

At last a compromise was effected with Traynor, the dictator. "Take off your caps and bow to the president and vice-president of the road and give us seats in the Pullman, and we'll remove the obstruction," was his command. There was no other alternative for the exasperated men but to comply, and the cars then proceeded down the line.

Red Armstrong's Girl.

The Royal Bengal Tiger of the Stockton Team Is the Victim of a Practical Joker.

[From the Stockton Mail].

Baseball Catcher Armstrong was at his nsual "stamping ground"—Byrnes & Vinet's cigar store—this afternoou, when the telephone bell rang and a feminine voice asked of Joseph Vinet, who answered the ring, whether Mr. Armstrong wss there.

Armstrong wss called up and he answered the fair one. She said something to him and he replied:

"Don't talk over the telephone. There's a lot of fellows in here and I can't talk to you privately. I'll come over there," and straightway the bassball player picked up his cane and started away.

Two seconds after he hsd disappeared, Mr. Vinet was jingling the telephone bell. When the answering ring came he said:

"Hello! Is that you?"

"Yes," replied the feminine voice.

"Well, this is me—Armatrong. Those fellows are all gone now, and I can talk to you from here. What is it you want?"

"Oh, nothing," came the auswer; "only you won't fail to be there, will you?"

"Oh, no."

"If you don't kesp your date I'll never speak to you again."

"Well," said Mr. Vinet, cruelly, "I wouldn't care much."

"*What?*" came a feminine gasp over the wire.

"I say my other girl would be tickled if you *would* stop speaking to me. Stand back from the telephone—you've been eating onions or garlic-sausage, or——

"Oh, now, Reddy, yon precious duck, don't talk to me that way! I know you're joking, but——"

"Well, now, I guess I ain't joking," said Vinet, with considerable firmness. "I guess that new girl I've got is abont the smoothest piece of furniture that this town holds. If you think you're in it any more, why——"

"Oh, Reddy," sobbed the voice over the wire, "you couldn't be so cruel as to——"

"Cruel" said the cigar man with a atage villain's sneer. "You ought to hear about my record in Texas. I've got three wives down there now, and my track is strewn with broken and bleeding hearts—just as the path of the lightning is strewn with seared and broken trees—as the track of the cyclone is——"

"Reddy, don't try to be poetical when I'm auffering so, I——"

"Oh, you make me tired," aaid the wicked cigar man, as he hung the transmitter up and refussd to pay any attention to the ringing that immediately commenced.

And all this time the innocent baseball player was making for the place where his adored one was. Half an hour later he limped into the cigar store with one of his ears bitten off, a large part of the hair jerked out of his head, one eye closed, his nose and face scratched as if a tom-cat had danced the can-can on them, and his cravat hanging down the back of his neck, He sank down into a seat with a sigh and gazed moodily and aimlessly ont of the door.

"Good gracious!" exclaimed the cigar man, while the rest of the boys gazed in well feigned astonishment; "what in the world's the matter, Red?"

The baseball catcher looked up sadly and simply said:

"I tried to stop a runaway gravel train down on the avenue and the cowcatcher stepped on me."

"He is in the asylum now," and he will never know what caused his girl to be waiting for him with a bread roller and an untamed mastiff when he called on her.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS.

SUMMARY.

The amateur athletes were never more acttve than they are at the present time. Several in and out-door exhibitions are announced for the fnture, and the sport-loving public will have no csuse to grumble about the lack of attractions during the coming winter. The proposed military tournament is quite an innovation in athletics on the Pacific Coast, and the day is not far off when our local clubs will be able to provide as good entertainmenta for their members as the New York or Manhattan Athletic Clubs of New York City. The army of wheelmen is rapidly increasing in California, and the California Division L. A. W. will soon be on a level with the leading Eastern divisions.

THE WHEELMEN.

The gentle shower on Tuesday morning last was regarded as a blessing by the cyclers.

Last Sunday Fred White, Walter Foater, Frank Howlet. Harry Potter and Harry Williams, all of the Alameda Bicycle Club, took a run in the direction of Lake Chabot. Potter and Williams were taken with crampa in their lega and in consequence were unable to reach the Lake. Their three companions, however, rode as far aa ths lake, and on their arrival home were none the worse of their journey.

Eugene Williams, Seg. B. Morse and C. Brewster of the American Bicycle Club enjoyed a moonlight ride to San Jose on Saturday evening. They left this city at 6 o'clock and arrived at the Garden City shortly after 10. On Sunday, in company with aome of the Garden City wheelmen, they rode around the suburbs of San Jose. They got back to San Francisco late on Sunday night.

Next Wednesday night the members of the Alameda Bicycle Club will visit the Olympian Skating Rink in full uniform.

Several road maps are being prepared for the use of the members of the Bay City wheelmen. Some of the maps will be twelve feet square and will contain an inexhaustible amount of information.

Several of the Bay City boys are scouring the country districts in quest of a good road over which to hold their next run which will probably take place in a couple of weeks.

Half a dozen members of the Bay City wheelmen road to San Jose by moonlight on Saturday night.

There does not seem to be much activity amongst the members of the Oakland Club just now. It is strange that auch good material ahould remain in oblivion.

F. C. Boyle and Will Foster of the Alameda Bicycle Club took a run through the Park on Sunday, returning home by way of the Presidio.

The regular monthly meeting of the Alameda Bicycle Club was held last Monday night at the club rooms. Several very important matters were discussed, and after the meeting was over the boys started in to have a good time in general.

Next year the roads between Oakland and San Jose will be watered regularly, and the wheelmen will no longer have any cause to be afraid of the dust.

Captain Sanford Plummer and First Lieutenant Hammer of the Bay City Wheelmen started from San Rafael on Sunday last with the intention of wheeling to Petaluma. When about five miles on the road to Navato, Plummer broke the neck of his machine. With the aid of a piece of wire the break was soon mended and the men continued on their journey. They reported the roads in very poor condition. In several places the roads had recently been "repaired."

The Alameda Bicycle Club will hold a grand hare and hound chase from their club rooms, 1417 Railroad Avenue, Alameda, to-morrow forenoon. The contestants will breakfast at Haywards.

THE GAME OF CRICKET.

The Alamedas are still in the lead, and they find no difficulty in defeating all comers.

Saturday afternoon the Pacific Club again suffered defeat at the hands of the Alameda Club. Four of the Alameda Club's representatives found no difficulty in outscoring eleven of the Pacifics. The following are the figures:

ALAMEDA

Hood, c. Hill, b. Banner	59
Vernon, b. Banner	1
Smith, not out	37
Newton, not out	0
Byes	2
Leg byes	1
Total	100

Webster, Warren, Bryan, Johnstone and Caldwell did not bat.

PACIFIC.

Adam, b. Newton	5
Hill, c. Smith, b. Newton	2
A Theobald, c. Newton, b. Warren	0
Howell, c. Webster, b. Newton	3
Ward, b. Warren	0
J. Theobald, b Newton	3
Pegram, b. Newton	0
Welse, c. Warren, b. Johnstone	6
O'Donnell, c. and b. Newton	3
Banner, b. Newton	0
Hanson, not out	1
Byes	2
Total	30

The Alameda Cricket Club defeated the Burnaby team on Saturday by a acore of 174 to 55

AT THE OARS.

Several sculls were noticed on the bay on Sunday.

Two membera of the Lurline Club went over in their canoes to Tiburon.

The new crew of the South End Club have not been able to practice for the past week or so, as one of the crew is very sick with pneumonia.

Several crews from San Francisco rowed over to Sansalito and Tiburon on Sunday.

A very important meeting of the Pacific Coast Rowing Association will be held at Irish American Hall on the evening of December 13th. Arrangements will be made for the holding of a grand regatta on Washington's Birthday. It is expected that there will be a large attendance of delegates from the different associate clubs.

The membera of the Alameda Rowing Club are very active at present, and the membership of the club is rapidly increasing. Theae oarsmen from across the water mean bnsiness, and at the next regatta more than one Alsmeda crew will be heard from at the finish.

The Lurline Club appears to be coming to the front again, and the chances now are very favorable that the club will out-live ita difficultiea.

It ia almost a foregone conclusion that an International regatta will be held in California before long.

SKATING.

The Olympian Club Rink at the Mechanic's Pavilion is a great success, and the floor is crowded nightly. It is very amusing to watch the antics of the skaters as they fly around the track. It is almost imposaible for a person to sit and watch the performers without catching the fever. The pavilion haa only been rented for a term of five months, but at the end of that time it is almoat a certainty that Mr. Ridgely will make arrangementa with the directora of the Mechanic's Institute for a renewal of hia lease.

Many of the old-time experts may be seen on the floor every evening.

Novices who made their first appearance as akaters when the rink firat opened, are now quite expert, and the "green horns" are few and far between.

The rink is largely patronized by the amateur athletea.

The young ladiea need not be in the least bashful about visiting the pavilion alone, for the several gentlemanly floor managers will look after their interests.

RUNNERS, WALKERS, JUMPERS, ETC.

Next week a full account of the Olympic Club games, which took place on Thanksgiving Day, will be published in these columns.

Sunday last was a busy day at the Olympic Club grounds The Bay District track was in bad condition, and the Alpine Athletic Club boys exercised on the Olympic cinder path.

Sprinter Crane haa become a boxer.

Frank Cooley did not take part in the games on Thursday on account of the death of his father. He will retire from the athletic world for the present.

Bantam Green is becoming very scientific, and if he enters the next boxing tournament, one of the medals will adorn his breast.

C. M. Yates has resumed practice as a walker.

McArthur has donned his running shoes again, and there is no telling where he will stop.

The mile handicap run for members of the Alpine Club, did not take place last Sunday, as the track was too heavy and rough.

The University men are not paying much attention to training. They will hold a field-day on December 6th, and the probabilities are that most of the medals will be won by outsiders. The students appesr to be losing heart, and it is very doubtful if the Berkeley team will even make aa good a showing in the future as they have done in the past. The programme for their coming field-day will be as follows:

One-hundred yard maiden race; 100-yard race, closed to U. C.; 120-yard race; 220-yard hurdle; 120-yard race; 120-yard hurdle; 440 yards, half mile; one-mile walk; 100-yard three-legged race (class teams); running broad jump; hop, step and jump; running high jump; pole vaulting; putting shot; throwing hammer and relay tug of war for class teams.

George D Baird, the ex-champion amateur walker gave an interesting lecture on "Ten Yesr's Progress of Athletics," in the parlor of the Olympic Club on Tuesday evening last.

George Bishop of the Alpine Club does not appear to be satisfied with the result of his recent contest with Newton L. Williams at the Olpmpic Club's boxing tournament, and he states that he would dearly like to meet Mr. Williams again. The Bishop has been informed that Mr. Williams has been boasting to his friends, especially hia lady friends, that he had "an easy thing" in Bishop. Mr. Bishop states his willingneas to meet the Olympian at any time in the rooms of the Alpine Club for a trophy of valne or just for "the fun of the thing."

The new wigwam wss crowded with people on last Saturday evening who paid their entrsnce fee for the purpose of seeing Joe Acton (the demon) and Evan Lewis (the strangler) wrestle. The agreement was that Lewis should throw Acton twice within one hour. William Atwood was chosen referee. "The strangler" failed to fulfill his task, and Acton was declared the winner. Lewis downed his man once in 35 minutes, but when the 60 minutes had expired the second fall had not been gained. Acton, who is much smaller than Lewis made a splendid showing, and consequently proved himself to be the champion wrestler of his weight in the world. A return match will probably be arranged.

Alf. King of the Alpine Club recently distinguished himself as an amateur detective by capturing a foreigner who tried to cheat the firm which he represents out of sixty dollars.

In the Eastern clubs each of the N. G. military companies have athletic clubs connected with them, and there is no reason why the N. G. C. companies should not follow their example.

Civil Service Athletic clubs are all the rage in England and Ireland. We would like to see some ambitious government employee in this city make an effort to organize an Athletic Club in connection with the Post office and Custom House.

The athletics do not appear to be satisfied with the Thanksgiving Day medals which have been on view in Shrien's window on Montgomery Street for the past week. In shape the medals are similar to the large souveniers which are awarded to the competitors in the last field day of the Olympic club.

Polo is now all the rage in the East. Several new Polo clubs have been organized, and the game is extensively practiced.

Wednesday evening waa "boxing night" at the Olympic Club, and a large crowd of visitors were in attendance to witness the exhibitions which were unusually exciting and interesting.

It is thought that the female atudents at Berkeley will be asked to pay the athletic assessment of $1.50. As the ladies enjoy the field days, there is no reason why they should not willingly help the athletes out.

TWO RECORDS BROKEN.

The membera of the Olympic Club were out in full force at their new gronnds on Sunday morning to watch the progress of their brother athletes who were preparing themselves for the Thanksgiving Day games. Steve V. Casady ran an exhibition of 250 yards and he made the distance in 27 seconds, which lowers the Pacific Coast record of 28 seconds. He ran in splendid form and experts who witnessed the run say that he will yet hold an American record.

In the club handicap run of half a mile Bob McArthur fairly electrified the spectators by covering the distance in 2 min 5 secs, which lowers the coast record of 2 min 5¾ secs. H. M. Collins 40 yds., C. Toomey 40 yds., J. Sullivan 30 yards and M. Tromboni 30 yds. also started. McArthur was the scratch man. Toomey could easily have won the race but when the time keepers saw that McArthur was going to lower the record they asked him to stop and allow McArthur to finish first that they might catch his correct time. Toomey finished second and Collins third.

CLUB JOTTINGS.

The Alpine Club will probably give an entertainment next month.

The Alpine's rooms at Central Park are very comfortable and the boys are very regular in their attendance on class nights. A field day will shortly be held. Several new members have recently been added to the roll. An election of officers for 1891 will be held next month.

The athletic class of the Alameda Olympic Club drills every Tuesday and Friday evenings now in preparation for the coming entertainment to be given in the Park Opera House on Friday evening, December 12th.

The Sacramento Athlectic Club is now well on the road to success. Several good athletes are identified with the club and it is thought that not a few of the members will be heard from in some of the coming tournaments.

A meeting of the Pacific Coast Amateur Athletic Association was held in the parlor of the Olympic Club on Tuesday evening. W. A. Scott presided. The following delegates were in attendance: Swift and Schwartz of the Lurline Club; Moody of the Alpine Club; Lawlor and Gilhuly of the Olympic Club. The Olympic Club was granted permission to hold a gymnastic tournament to commence on February 19th in the club's gymnasium. Some of the events will be decided at the out-door grounds. The contests will be conferred to associate members of the P. C. A. A. A. The following records were passed upon: A. S. Henderson, 50-yard run, 5¾ seconds. S. V. Casady, 250-yard run, 27 Seconds. S. McArthur, half mile run, 2 minutes 5 seconds. Messrs. Mansfield, Roble, Klein and Loye were accepted as delegates from the Sacramento Athletic Club to the Association.

It was decided to hold the in-door championship games in the Mechanics Pavillion on the evening of the 24th of April. The following is the programme:

Seventy-five-yard run, 300-yard run, two-mile walk, standing-broad jump, standing-high jump, pole vault for distance, tug-of-war, putting 24-pound shot, 200-yard hurdle race, 10 flights, 2 feet 6 inches.

An embroidered silk banner will be presented to the club winning the greatest number of points, and a silk banner will be also awarded to the tug-of-war team that comes out victorious in the rope pull.

The following notice has been mailed to all the members of the Olympic Club:

The Directors have much pleasure in announcing to the Club, that, with the hearty co operation and approval of Brigadier-General John Gibbon, commanding the Division of the Pacific, and the officers under his command, arrangementa have been made for a Grand Tournament, under the auspices of the Club, in the Club's Gymnasium. The Tournament will consist of:

Boxing, in the several weights.
Wrestling, in the several weights.
Broadsword and Foil Practice.
Bayonet Drill and General Exercises.

The last two events will be given on ladies' nights, and a military band will be present. The Boxing and Wrestling will probably occupy several nights, and will be confined to the military, acting under our rules and regulations.

The above events will be carried out early in the new year.

For the Board of Directors.

A. C. FORSYTH, Acting Secretary.

The Olympic Club will hold a "ladies night" at the club rooms on the evening of December 11. The wrestling tournament will begin January 22, and on February 9, the general gymnastic tournament for the Coast championship will open. Several other important events will follow. It is expected that the building scheme will be pushed forward at once.

JOTTINGS FROM ALL OVER.

The New York Athletic Club and Boston Athletic Association have entered into an agreement to engage in yearly competitions, to consist of the usual running, walking, jumping and weight throwing events, as likewise baseball, football, and lacrosse. It is proposed to hold the competitions in New York and Boston already.

Joe F. Donoghue, the champion amateur skater, was well received upon his arrival at Christiania, Norway, by the members of the local skating organizations, prominent among them being Axel Paulsen, who has visited this country upon several occasions, engaging in competitions and exhibitions in different parts of the country. When Donoghue penned the letter from which this information was obtained there was no ice to be had anywhere in that vicinity, but a supply was expected within a short period.

After having closed a successful Summer season with his water combination Paul Boyton has organized a land combination for the Winter season. He has received a number of superior rowing bicycles from England, and proposes to give a series of regattas on dry land in the different leading cities throughout the country, commencing at the Coliseum, Omaha, Neb., Nov. 21. He has his old friend, Wallace Ross, associated with him, as during the Summer, Ed. Hanlan, John Teemer, Jake Gaudaur, Fred Plaiated, John Largan, and perhaps two or three others will take part. Several of the men named, at least, are proficient in the working of the machines, and, with better bicycles and better management than marked their first introduction into this country, some years ago, there is excellent reason to anticipate a successful campaign.

The New York Swimming Club held their annual meeting a few days ago at which the following officers were elected: President, Herman Brann; first vice president, Charles Renner; second vice president, J. J. McDermott; treasurer, Burt Rounds; captain, J. Schlisinger; first lieutenant, Emil Ama; second lieutenant, G. R. Manchester.

A cablegram from Sidney, N. S. W., states that John McLean, who some time ago won a match from Neil Matterson, defeated James Stansbury on the regular Paramatta River course, Nov. 17. The telegram does not give any particulars regarding amount of stakes, etc. The winner is evidently a "coming man" in the waters of Australia.

ATHLETIC, GYMNASTIC, FENCING AND SPARING GOODS. Only house that can furnish latest improvements. Send 4cts. stamp for catalogue to manufacturer, J. R. Judd, 101-105 W. 36 St., New York City.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, 177—179 BROADWAY.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff

San Francisco, Saturday, Nov. 29, 1890.

The Proposed New Track.

For months past there has been considerable agitation going on in this city relative to the prospects for a new race track. The proper amount of space has been allotted to the subject in the BREEDER AND SPORTSMAN, for it is a well known fact in this office that the matter would be carried through if the proper grounds could be secured, for the new enterprise. Mr. Thompson, of Melbourne, Australia, a partner of Mr. A. Josephs, who was in this city some two months ago, is at present here, and we can state on authority that an offer has been made for an eligible site, and it may just be possible that before this issue reaches our readers that the necessary amount of land will have been purchased for the new track. A great many sites have been looked at, but in almost every instance exorbitant sums have been asked for them, the owners considering that a firm who had plenty of money would of necessity be compelled to pay long prices for just such a place as would suit them. However, neither Mr. Thompson or Mr. Josephs came here for the purpose of throwing their money away, and the matter simply rests as to whether they can purchase the necessary amount of ground at what would be considered by real estate men, a fair valuation. There can be no doubt but what San Francisco is sadly in need of a race track, especially in view of the fact that the present one will most assuredly be cut up before many months have passed, and preliminary surveys have already been made for the purpose of cutting through streets and laying off lots, and the BREEDER AND SPORTSMAN has been informed on the very best of authority that there will be no race meetings held on the present Bay District Track after this winter.

With the present one cut up, it becomes an absolute necessity that the metropolis of the western coast should have a race track complete in all its details, and no one is better able to fit up a course that will be acceptable to the patrons of the turf in this city than is Mr. Thompson, the projector of the enterprise. A man of unlimited wealth, he has the means at his command to fit up a track that will be a credit alike to himself and to the city, and we feel confident that if he carries out his present plans to erect such a place as he has at present in contemplation, that the sport-loving public of San Francisco will give him all the support necessary to make the affair a monetary success. In addition to this Mr. Thompson wishes to have the co-operation of all breeders throughout the West, as he feels assured that he can have sales on this coast, the equal of any held in New York City, if those who raise the young stock will only stand in with him. An energetic, enterprising, pushing man like Mr. Thompson is almost sure of success, and if he secures the ground that he is after, the BREEDER AND SPORTSMAN wishes him good luck in his undertaking.

The Hearst Stable.

There are very few persons who have any idea of the large amount of money invested in any one of the large racing stables, which is confined exclusively to thorobreds. While it is true that one horse may be purchased for a very small amount, and be the means of winning almost a fortune for his owner, still there are but few who are satisfied with having a small number of horses in training, and as a consequence, launch out into what seems like needless extravagance in procuring choice and well bred animals. The Dwyer Bros., Mr. Haggin, the Morrises, Mr. Belmont, Senator Hearst and many others might be cited as paying exorbitant prices for yearlings and two-year-olds; they being willing to take the chances that proven blood lines can and will produce first-class race horses.

While it is not definitely settled, still it need not surprise our readers if within a very short time the announcement is made that Senator Hearst, whose name has been connected for some years with the American turf, should cause the notification to be made that he will sell off at public auction all of his horses at present in training in the East. As the Senator himself says that the amount of money invested is too much altogether for the returns which have accrued to the stable, and while he has been fairly successful with a few of his horses, notably Tournament, still the large sum of money, which is lying idle is too much altogether for the small amount of pleasure which is received from an occasional "win." If such a conclusion is finally arrived at, the Senator will reserve only three of his horses; the first being Tournament, who will be kept for stallion use on the breeding farm, and the two fillies, Gloaming by Sir Modred, out of Twilight, and Everglade by Iroquois out of imp. Agenoria. There can be no question but what the turf men of the United States will be extremely sorry to lose the green and yellow colors from the turf; still, one can hardly wonder at the Senator's decision when it is considered how very unfortunate he has been until within the past three months. The breeders of the country will also lose a prominent patron, as the familiar figure of the Senator, or his representative, has been present at every large sale of thoroughbreds throughout the East for the past three years. We sincerely trust that Senator Hearst may finally conclude not to dispose of his stable, and we hope to see his colors racing to victory for many years to come.

A Horse Show.

The horse shows which have been held in New York and Chicago for the past two years have been more than successful, good management having made the exhibitions in each of the cities financial successes. For the past few years it has been customary to hold local stallion shows in this State at various points where the breeding interests are largest, but as yet no one has broached the subject of having a State Horse Exhibition. The Breeders' Association have proven beyond a doubt that they can carry on a successful trotting exhibition without any outside aid, and it might not be a bad idea for the directors of that association to talk this matter up and see whether they cannot have an annual show such as has just been given in the East. Undoubtedly it leads to great competition, and the very best horses from all over the country have been shown in the prize ring, and just why such an exhibition should not be a success in this State is more than one can fathom. There are in this State to-day, horses the equal of any in the country, and to have a chance to witness all the great sires of California in one building, would tempt the horse-loving public from all points to witness such a show, and we firmly believe the affair would be a financial success.

The Stockton Record Meeting.

Stamboul fails to Reduce the Record.

Stamboul failed in his attempt at Stockton on Saturday last to lower his present record of 2:11¼, which was made at the same place on the Thursday previous. There was a large attendance at the Race Track and it was fully expected by many that owing to the favorable conditions the now noted stallion had more than an average chance to perform the task allotted. The Judges in the stand were L. U. Shippee, B. F. Langford and Chas. E. Needham. The timers being Jno. C. Shelly, David Young, Jas. Thompson and Frank Hatch.

About twenty minutes to two o'clock Stamboul was brought out on the track, and on his appearance was greeted with a round of applause. After a warming-up mile Goldsmith brought him out a second time but made several scores with him before he finally nodded for the word. After reaching the first quarter in 33 seconds, the horse made a break, and Goldsmith immediately eased up on him, coming in very slowly; the stallion was then taken to the stable, and Chief Thorne a two year old pacing colt owned by L. U. Shippee was brought out to try and reduce his record. On Tuesday he made a fast mile in the really good time of 2:23½ and accomplished it so easily that it was considered almost a certainty that he could lower it materially; he did not disappoint his admirers as the mile was compassed in 2:20½, making him the second fastest two year old pacer in the world. The only horse of his age, which has ever beaten that time at the pace being Manager owned by the Stout Bros. of Dubuque, Iowa, he having a record of 2:16½. Prior to this year the record was held by Ed Rosewater, who in 1888 paced a mile in 2:20¾.

Stamboul was again brought out, Harry Whiting driving a teaser; the first quarter was reached in 33 seconds, and the half in 1:06. At this point it must be said that he was not trotting with the freedom which he did on the Thursday previous, yet still he was going fast enough to make at least a few believe that the record was in danger, however, 2:13¼ was the best he could do.

Lottery Ticket, who is owned by Messrs. Funk Bros. of Farmington was then sent in an attempt to beat his record of 2:26¾. Goldsmith handled him with great excellence, and knocked a second and three quarters from his former time, the mile being made in 2:25.

Mt. Vernon owned by Mr. McCloud of Stockton was given two trials in endeavors to lower his present record of 2:21. In each of the trials he made exactly the same time, 2:24 leaving his record as it is at present.

Moses S, which Mr. Shippee considers one of the fastest horses that he ever raised was also sent to beat his record of 2:19½ which was made on Thursday, but his former fast mile evidently militated against another trial made so soon, for 2:20 was the best he could do.

California Lambert, another stallion owned by Mr. Shippee was sent to reduce his record of 2:29¼, and accomplished his task, making the mile in 2:27.

A match race had been arranged between two mares called Chloe and Maud. Chloe had no difficulty in taking the first heat in 2:33¼ while Maud took the second and third heats in 2:34¾ and 2:40.

The Association has determined to give another meeting to-day (November 29th) at which Stamboul will be given another chance to lower his record.

Our Australian Letter.

SYDNEY, N. S. Wales, Oct. 2, 1890.

EDITOR BREEDER AND SPORTSMAN:—Since my last letter Megaphone, the colt which ran so well at the Randwick Spring Meeting, changed hands at the consideration of 3,000 guineas, his new owner being Mr. D. S. Wallace, the possessor of Champion Carbine. The Victoria Amateur Turf Club Spring Meeting held annually at Caulfield, near Melbourne, opened on Saturday, October 11th, and as I have before told you, the Caulfield meeting is looked upon with great interest by Australian sportsmen, as giving "a line" to the better things sampled later on at the Melbourne Cup Meeting at Flemington. For the Caulfield Stakes, the first race on the card, a mile and a furlong, Megaphone with 7 stone 11 lb. was looked upon as a certainty, and his starting price was 5 to 2 on, but the bookmakers did not care much about laying the horse even at that price. However, they might have laid against the colt with perfect safety, as he showed none of his Sydney brilliancy and failed to run into a place. The winner turned up in The Admiral, a three-year-old by Richmond from Footstep, who carried 8 stone 4 lb, and was ridden by Tom Hales, who rode so many of the late Hon. Jas. White's cracks to victory. Gresford, another three-year-old by the ever dangerous sire The Drummer, was second, and Loyalstone, four years old, by Precious Stone from Loyal Peeress, was third. The Great Foal Stakes half mile for two-year-olds, was won by Lord Hopetoun, a colt by Neckersgat from Promise. Lady Betty, Wm. Cooper's mare, now running so well in England, in 1887, ran a dead heat with Consequence for this race. In the Caulfield Guineas Plunger Brodribb's gelding Titan was elected favorite at 6 to 4, notwithstanding his ignominious defeat in the Sydney Derby. The Guineas is a mile spin for three-year-olds. Titan, however, never showed prominently, and Annesley won rather easily from Beverley. Both colts are by that sterling sire Neckersgat, whose daughter Maddelina won the Guineas in 1886. The last race of the day the Toorak Handicap added another bracket to the fame of the much lamented Musket, whose daughter Precedence, from Maid of Honor, won rather comfortably from Crown Jewel. On the second day the principal event of the meeting, the Caulfield Cup, was run off, when twenty-three aspirants weighed out. The winner showed up in the 14 to 1 chance Vengeance, who was not thought much of by the general public, but Mr. Blackwood, his owner, knew the metal he was composed of, and netted from the books the respectable sum of £20,000. Vengeance is a five-year-old by Newminster from Vindex, and he ran the mile and a half with 6st. 13lb. in 3min. 38sec. Loyalstone, by Precious Stone from Loyal Peerless, ran Vengeance to a head, and Enue, by Twist King from Lorik, was a couple of lengths away third. All through the meeting there was a total collapse of the favorites, and the "Books" must have reaped a rich harvest, but they, of course, say no, as it appears to be part and parcel of their "profession" to cry a poor mouth. "Plunger" Brodribb must have added another nail to his coffin, as he went down heavily on the stable horses Megaphone and Titan.

Now that the Caulfield reunion is a thing of the past, attention is given to the biggest meeting of Australia, that of the Victoria Racing Club, which begins next Saturday, so that before this reaches you the Melbourne Derby and Cup of 1890 will be a matter of history. George Adams of Tattersall's Hotel, Sydney, has three sweeps on the Cup, as per usual, £50,000, £25,000 and £10,000, out of which he will net £8,500 on commission. The winner of last year's £50,000 was a miner named Duggan, and his win was not altogether an unmixed blessing, for he threw over his best girl, and she went for him for breach of promise of marriage and obtained judgment for heavy damages.

One would think after Titan's downfall on the Sydney Derby and Caulfield Gnineas his name would fall out of the Melbourne Derby betting, but strange to say Brodribb still supports him, and it looks very much as if the original purchase money of 4,600 gnineas will be a very small proportion of the cost of the gelding to his remarkably "fresh" owner. For the Derby, Gatling, Mr. Gannon's colt by Nordenfeldt from Petroeluse, has been doing excellent work on the training track, but Mr. Gannon's luck alone ought to be sufficient to spoil the colt's chance. Gibraltar, the winner of the Sydney Derby, has had the ill luck to bruise his heel, and at present the most backed horses are The Admiral, Gatling and Anuesley. For the Melbourne Cup Vengeance has come into prominence by his win of the Caulfield Cup, but seeing that Loyalstone ran him all out, and Vengeance will have to carry a 14 pound penalty for his win, I cannot see how he can be expected to beat Loyalstone with the extra impost. Melos is another horse that the public fancy, in my opinion, without reason, as he meets Carbine, who is in the best of health, on worse terms than when he has hitherto finished behind the Maori giant. There are so many good ones in the Cup, and so many who have only been out for an airing for a long time past with the object of a *coup* in the big event, that it scarcely seems a human performance to pick the winner. However, I pin my faith to Carbine, as I do not think even 10 stone 5 lb. will hold the champion back, given of course the weather is fine and he has not to hump it through the mire. Muriel, a mare by Kingsborough from Washed Ashore, has been doing some wonderful work, and her people expect her to run very prominently.

Yesterday was the date fixed for the final acceptance for Melbourne, and out of the one hundred and forty-nine subscribers, forty-two have paid up. There were no prominent withdrawals with the exception of Marvel, who is nothing if not a mysterious horse. He was certainly a wonderful two year old, but fate placed him in very queer hands, and a Jockey Club enquiry led up to a big turf scandal and the disqualification of the horse and all connected with him. Marvel's disqualification has been removed, and he is now owned by a wealthy Sydney sportsman. The horse was reported to be doing wonderful work for the Caulfield Cup, but he was withdrawn at the eleventh hour, and now he is cut out of the Melbourne Cup. Marvel seems likely to be a mysterious horse to the end of the chapter.

Lovers of the horse in Australia have had good news in the fact that Mrs. White does not intend to break up the Kirkham Stud, which was worked up to such a great pitch by the late Hon. James White. The Australasian has published some interesting statistics as to the amount won last season by the progeny of the various Australian sires, from which it is seen that the Kirkham sire Chester heads the list with £17,872, whilst Musket comes very close up with £16,667, of which £7,145 was won in Australia and £9,522 in New Zealand. The unbeaten Grand Flaneur scores £7,535, Newminster £5,867, Grandmaster £4,546, Glorions £3,365, and Maribyrnong £1,535. Your Sir Modred, who had such small chance of distinguishing himself at the stud in Australia, is credited with the handsome sum of £3,143 for two winners of six races. His son, Sir William, still remains in the Melbourne Cup, but his cruel and ridiculous impost of 8 st. 11 lb. must be too great to allow of his running prominently.

"THE JUNGLE."

Clip Your Horses.

This is the time of the year when the question of clipping horses is more or less discussed. The adherents for the custom are certainly in the great majority, but there are those who are in doubt regarding the expediency of depriving a horse of his coat just at the approach of cold weather. Only last week the writer was asked his opinion of the practice by one who had only recently become a horse owner. This question has been touched upon in this column before. Inasmuch as it was made one of the topics for discussion—although it was not brought up—at the late convention of the American Humane Association, it may not be amiss to state the ground the delegate from this section would have taken before the convention, had the matter come up. That the custom has its very strong adherents, and that it is practiced by men of whom it can be said the horse has no better friends, is unquestioned. They contend that the experiment has proven that under certain conditions a horse is healthier and more comfortable without his coat in winter than with it. On the other hand, as before remarked, it is urged that nature has provided the horse with a warm covering for cold weather, and that by a beneficial arrangement he is relieved of it when the weather becomes warm, and that it is cruelty to deprive him of it when he most needs it.

Since the experiment has been thoroughly tested with the class of horses whose work causes them to perspire freely in cold weather, no argument has yet been produced convincing enough to satisfy those who have adopted it under these conditions, that clipping is other than a judicious and humane arrangement. The man who leaves his clipped horse unblanketed in the cold air should be arrested. It is very rarely done; but it is infinitely worse to leave a horse standing in the cold air with his coat on and wet with perspiration than to leave one standing clipped and dry. The cold air is not half so penetrating to a clipped horse as to one with his coat on and wet. The sensation of cold air on a damp body may be understood by a person getting out of a bath-tub in a cold room. The chill penetrates to the very marrow. Furthermore, a horse taken into a stall with his coat wet will remain so for a long time unless he is rubbed dry, which process would occupy two hours. A clipped horse, if wet, can be rubbed dry in twenty minutes, and if the time cannot be spared he will dry under a blanket, which a horse with his coat on will not do, but if blanketed will stand and steam for hours. Again, a horse with a heavy coat of hair, put into the stall wet, at night, has been known to come out of the stable in the morning with the ends of the hair dry while next to the skin it was wet and cold. Can anything more uncomfortable be conceived of, than a mass of wet, cold hair clinging to the body for several hours? Will any one presume to say that such a state of things is either comfortable or healthy?

Horses, whose work in the winter induces violent exercise which makes them sweat profusely, should be clipped as necessary to their health and comfort. This applies to roadsters which are driven daily for pleasure, and which are likely to take a gait that, with their coats on, would soon cause them to lather. The experiment has been thoroughly tested, and men who own horses valued at thousands of dollars would not clip them unless they believed they were better for it. If the horses were liable to disease or sudden death through the custom, owners would about as soon set their houses on fire as to do it. All this, or something very much like it, has been said in this column before, but owing to an apparently increased interest in the matter it is published again.—Newark Sunday Call.

Washington Park Entries.

The following are the entries from California for the Washington Park meetings of 1891 and 1892:

The Hyde Park Stakes, $5,000.—A sweepstakes for two-year-olds (foals of 1889); $150 each, $50 forfeit, or only $10 if declared out on or before February 1st, or $25 by April 1, 1891. All declarations void unless accompanied with the money, with $5,000 added, the second to receive $1,000, and the third $500 out of the stakes. A winner of any stake race of the value of $1,500 to carry three pounds; of $2,500, five pounds extra. Maidens allowed five pounds. 134 nominations. Three-quarters of a mile.

Simmons Liver Regulator has never failed to relieve Constipation of the Bowels.

So easy in its action, harmless and effectual in relieving is Simmons Liver Regulator.

Simmons Liver Regulator has never been known to fail to cure Sick Headache.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

D. B.

Please let me know the breeding of the sire and dam of Margery, dam of Tyooon.

Answer.—By Error, dam Gentle Annie by Monte, second dam Fannie Campbell by imp Glencoe, third dam Cub by Medoc, etc. Error by Belmont, dam Liz Givens by imp. Langford.

J. L. L.

You must surely have been misinformed as Jack Malone was by Lexington, foaled in 1858, and the Jim Brown that is best known to fame in this state, was not foaled until 1878. This Jim Brown is by Foster dam Flush by Hiawatha and was bred by W. L. Pritchard.

J. M. G.

We cannot find any horse with the name you have given, that has run in this state for the past ten years. Who owned him and in what year did he run?

Quartz.

Has the gelding J. H. any record? If so what is it, where and when made, and under what name?

Answer—We have no information that J. H. has any record whatever, and are not aware that he ever started under any other name. He was formerly owned (and may be at present) by A. Boucher of Woodland, Yolo County.

DISPOSAL SALE.

TOGETHER OR SEPARATELY.

Mambrino Wilkes 6083

Sire of Five in the 2:30 List.

BALKAN (3-year old Record 2:29 1-2.) 8848

(Separately timed in three different races in 2:22, and can show now a much faster rate of speed.)

FANNY FERN (dam of Balkan, 2:29 1-2,

Mollie Drew, 2:27, Fred Arnold, 2:33½. Onyx (trial 2:40), etc., with nine of her immediate offspring. Freedom, yearling record 2:29¼, descends on the dam's side, from Fanny Fern through Mollie Drew.

FANCY (the dam of Gus Wilkes, 2:22.)

ANNIE LAURIE (2:30 at 3 years old.)

And a few other choice broodmares, standard and registered, with their progeny.

ALSO

The San Miguel Stock Farm.

This place is as well adapted to the raising of fine stock as any; has good stables, full mile track (kite shape), etc. The soil is as good as any the sun shines on, whether for raising grain or fruit.

PROOF—Grain sown about the first of April, this year, produced a fine crop.

Walnut Creek, which never fails, runs through the place. There are also a never-failing spring and two wells. Water can be obtained by sinking twenty to twenty-three feet. Apply to

IRVIN AYRES.

30 and 32 Fremont Street, S. F.

FOR SALE.

LADY DEXTER.

SORREL MARE. FOALED 1886.

Sired by Dexter Prince,

Son of Kentucky Prince, sire of Guy, 2:10¾; 1st dam Kitty Thorne, 2:31, by Whipple's Hambletonian; 2d dam a daughter of Kimball's Patchen; 3d dam by Geo. M. Patchen Jr.

LADY DEXTER is a stylish, square trotter. Is now trotting in 2:28. Can be seen at Bay District track.

THE FARM.

A Milking Machine.

The Apparatus a Scotchman Has Devised—How It Works.

Three or four miles' pleasant drive from the town of Kilmarnock, one of the centers of the dairying interests of Ayrshire, is the dairy farm of Haining Mains, on the estate of the Duke of Portland. "Here for some time past," says the London Times, "a milking machine, invented by William Murchland, sanitary engineer of Kilmarnock, has been in operation, the tenant of the farm, David Shaw, having afforded every facility. There is nothing connected with the ordinary work of a dairy farm which is more troublesome and more laborious than the operation of milking cows by hand. On a cold winter morning, when each operator has to milk a dozen or more cows by the dim light of a lantern, the work is especially severe. Moreover, the necessity often arises of finding more employment during the day for more hands perhaps, than would be otherwise retained in order to secure a sufficient number for milking, as this operation has usually to be completed within a certain time. Many schemes have been devised for the automatic mechanical milking of cows.

"One after another they have been tried, found wanting and discarded. In some of them the barbarous practice of forcing a tube in the teat of the cow has been resorted to, with the result that the animals subjected to this treatment have been permanently injured, even to the extent of being unable to retain their milk. In most of them the milk has been withdrawn on the pneumatic principle by reducing the pressure within the milk-bag below that of the normal atmospheric pressure outside it. This, indeed, is the principle underlying the Murchland milking machine, with, however, the difference that, whereas in all previous attempts the apparatus has only been applicable to one cow at a time, by means of the new machine any number of cows can be milked simultaneously.

"The apparatus, as installed at Haining Mains, is of a very simple character. An ordinary iron pipe, one inch in diameter, is carried around the cowhouse at a convenient height above the shoulders of the cows. It communicates with a hand-pump, whereby the air is drawn from the pipe, a circular tank connected with a shallow well of water serving as a regulator of the vacuum. From the iron pipe project connections, one opposite the space between every pair of animals, each connection being furnished with a stop cock. To any one of these connections is fitted a length of India rubber tubing, the other end being attached to a nozzle near the top of the milk pail, which is of special construction. The pail is cylindrical in form, with a truncated conical top. Its opening, which is four inches wide, is closed by means of a thick glass disk, which rests inside flush with the outer rim of the pail, supported by a thick rubber band, held in place by a projecting ledge underneath. On one side of the shoulder of the pail is the nozzle which has been referred to, and on the opposite side are four similar nozzles, all of which are like the small connections upon the iron pipe. The solitary nozzle is for attachment to the long flexible tube from the iron pipe; the other four are for short lengths of tubing connected in their turn with specially constructed teat cups, each of which receives a teat of the cow under operation. The cups, like the pail, are made of tinned iron, and each one is provided with a tap or stop-cock. The milk-pail has, in addition to its handle, a couple of hooks, by means of which it is suspended a little in front of the cow's udder, a broad band of girthing being laid across the animal's loins for the purpose.

"The modus operandi is very simple. When all is ready the pump is worked by a lad and the air is thus exhausted from the iron pipe. Then a pail, with its teat-cups attached, is adjusted under the cow, the long tube is joined to one of the connections overhead, the stop-cock is opened, and a partial vacuum is established within the pail. Next one of the teat cups is moistened and placed so as to embrace a teat; the stop-cock of the cup is then opened, the teat is thus brought under the influence of the vacuum and the great external atmospheric pressure at once causes the milk to begin to flow. After all four teat-cups have thus been adjusted four jets of milk can be seen flowing into the can immediately beneath the glass cover. In from eight to ten minutes the cow is milked 'dry,' and the stop-cock of the connection on the iron-pipe being turned off, the long India rubber tube is detached from the pail, thus destroying the vacuum. The pail with its teat-cups is taken away, the milk is poured out and the apparatus is ready for another cow.

"The animals submit very quietly to this novel method of milking, and after the first time they appear to be scarcely conscious that they are being deprived of their milk. The apparatus, indeed, promises to relieve cows of much of the distress which, under existing circumstances, seems inevitable. Its use will obviate the excruciating pain that animals with chapped or swollen teats must necessarily suffer when milked by hand. Moreover, its employment will insure much greater cleanliness in the operation of milking, a benefit of at least as much importance to the consumer as to the producer.

"It will be apparent from the description that has been given that the number of cows which can be milked simultaneously must depend upon the number of pails, with their accessory teat cups, which are available. One attendant can conveniently keep half a dozen cows going—that is, if there are half a dozen pails. By the time the adjustment has been made for the sixth cow the first cow will have about finished milking, and her pail can be taken for the seventh cow, and so on. To maintain the vacuum a few strokes at the pump occasionally are sufficient.

"A full description of the apparatus, with detailed drawings, is given in the quarterly journal of the Royal Agricultural Society. Though the machine has been in operation at Haining Mains since February, it has not yet been brought prominently before the public on account of the fact that the inventor is desirous of first making it as perfect as possible. Nevertheless, a significant tribute to its value and its capabilities has already been afforded in the circumstance that it has aroused the hostility and the dislike of the local milkmaids, who are not slow to recognize in the success of the Murchland milking machine the necessity of seeking some fresh outlet for their labor."

Simmons Liver Regulator has never been known to fail to cure Dyspepsia.

Perfectly sure, perfectly pure, perfectly harmless is Simmons Liver Regulator.

English Methods of Butter Making.

American dairymen, while holding views based on their own experience, yet should be interested in successful methods of butter making in England. The following instructions for making good butter have been prepared by Mr. W. Smith of the Carse of Gowrie Creamery Company, Dundee, especially for farmers who are not possessed of separators or other machinery necessary for the more advanced method of dairy practice, and are published in the London Agricultural Gazette:

To make good butter from cows fed on grass: 1. Milk the cows cleanly and clean. 2. Strain the milk through a fine sieve or clean cloth, and set in clean dishes as soon as it is milked. When early cream is required for table use or sweet cream butter, scald the dishes, set the hot milk in the hot dishes, and ten minutes after set the dishes in cold water (running if possible), skim in six hours, and churn at once. 3. For sour cream butter skim at twenty-four hours, collecting two days cream in one jar, and churn the third day. Be sure all the cream you churn at one time has been mixed for twelve hours before churning. 4. Have the cream at a temperature of 58 degrees before it is put into the churn, raise or lower the temperature by plunging the cream jar into hot or cold water, stirring the cream. 5. Drive the cream about sixty revolutions per minute, ventilating several times during the first five minutes. 6. Watch carefully for the cream "breaking," and stop churning when you see butter like peas or wheat; strain off the buttermilk with a sieve, and for fresh butter, wash with cold water in the churn until the water comes off as clear as it goes in, and make up into any shape with butter beaters. 7. When salting, use no water, remove the butter to a butter worker or tub right out of the buttermilk, and while it is at churning temperature. Ascertain the weight of butter and weigh your salt (say half an ounce to the pound), work in the salt with a roller or butter-beaters, and cover it up with a cloth for twenty-four hours, re-work the whole lump together and pack into jars firmly, and never expose it again until it is to be consumed. The quantity of salt may vary from a quarter to three-quarters of an ounce to the pound. 8. The hands should never touch the butter.

To make good butter from cows fed on turnips and straw: 1. Set the milk the same as for early cream, in hot dishes and cold water. 2. Skim at twelve hours, and scald the cream by plunging the jar in boiling water, and keep stirring until it reaches 150 deg. Then put the jar in cold water and reduce the temperature to 60 deg. Collect and churn two days cream together, never put fresh and gathered cream together at churning time, and churn at 60 deg. Butter made in this way should be entirely free from the taste of turnips. 3. In washing for fresh butter sales, in the winter time when the water is nearly at freezing point, heat the water to 50 deg, and wash and make up the butter at that temperature. For salting use no water, and mix the salt with the butter at the churning temperature. 4. For packing butter; Pack close with a hard-wood beater, so as no air can get in, putting one churning above another until the crock or tub is filled, and after the butter has clung so as to leave an open space all around the crock or tub, fill the space with salted brine, and fix it up air tight. 5. The hands should never touch the butter.

Cayuga Ducks.

Farmers and fanciers who can raise ducks advantageously would find much in their favor by choosing some of the large breeds if they embark in duck culture. It must be confessed that the American people are not fond of domestic aquatic fowls, partly on account of domestic turkey, and partly on account of the abundance of wild ducks in market. The beginner in duck culture would not be disappointed in the Rouen, Aylesbury or Pekin ducks, if he preferred them to the Cayuga. The first is a French breed, the second an English, the third a Chinese and the Cayuga an American. In the matter of color, the Rouen is parti-colored, the Aylesbury pure white, the Pekin creamy white and the Cayuga black.

The market quotations show that ducks have kept quite a uniform price for several years, and a steady demand has ruled. There is no question about ducks being profitable, if bred purposely for market, and suitable accommodations for their culture at hand. They can be raised without a large body of water, but more or less is essential to success. A pond or creek furnishes a bathing place, besides aquatic vegetation and animal matter which ducks enjoy and relish. The necessity of some water, even a puddle hole, is shown during breeding season by the preference of the birds for a spot filled with water to mate in. They will seek a puddle for that purpose if it can be found on their run.

Although the Cayuga duck is an American breed, large and splendid for the table, it is not so popular as the Pekin. The color has much to do with it in the way of looks, as well as in the sale of the feathers, still many fanciers take to the Cayuga just on account of color, it being so odd in domestic ducks. The Cayuga is still in a state of development, and there is every promise that it will in time reach the Rouen in size. The breed originated on the historic shores of Lake Cayuga, and is supposed to be a cross from the Labrador or Du Clair and the common duck. The white ring around the neck of the early bred Cayugas has led to the belief that the Rouen or Du Clair was a factor in the breed, the latter being very much like the Cayugas in size and type; the most prominent difference being a white curve or bow over the eye, and a greenish velvety finish to the feathers, which are sooty black in color.

The weight of Cayuga ducks is from six to eight pounds when in prime condition. Good judges pronounce their flesh savory and sweet and equal to the other large varieties in this respect. The plumage of the drake is rich and glossy when exposed to the sun, bringing out the metallic lustre of green, with a blending of purple, on the back and wings. The head is small and slender; eyes, dark hazel; bill, black or dark color; back, long and broad; breast, full and deep; body, long, round and plump; wings long; tail, feathers hard and stiff, with the characteristic curl belonging to all varieties of the mallard species; shanks, black or dark slate black preferred.

With all their good qualities the Cayugas are not as popular as the breeds already mentioned. The Pekin takes the lead, owing to their prolificacy. It is certain that they are far ahead of the others in the production of eggs and also early laying. The advantages claimed for the Cayuga breed are the ease of keeping them in thrift with medium quantities of food and the somewhat gamey flavor of their flesh. They are a valuable bird to those who like black ducks; the color of their plumage is the only objection to their general cultivation.

Potatoes for Cattle.

The value of potatoes as food for cattle is variously estimated by those who have had any practical experience in this line. Despite the fact that potatoes are considered chiefly a laxative food, and withal indigestible, they certainly perform an important function in fattening cattle. At this time of the year the small potatoes gathered direct from the fields will be found available for food for the pigs and milch cows. When fed to the former they are cooked, and given raw to the latter. Raw potatoes are certainly indigestible when fed to animals whole, or even when chopped up into more or less small pieces. The hard chunks are swallowed before the cows can properly masticate them, and they enter into the stomach in indigestible condition. But this all may be overcome so that they will prove of great value in fattening steers, oxen, milch cows and swine. The potatoes, especially the very small ones, should not be cut up, but crushed by a mallet or other heavy instrument. This will prevent the animals from choking themselves, and also aid them in their digestion.

Crushed potatoes, mixed with a little meal and salt, make a good ration for fattening animals. Roots of other kinds may be indigestible when fed raw just as they come from the field; but by the complete withdrawal of all roots from the feed of the animals a notable decrease in the amount of milk will be seen in the case of milch cows, and of fat in the case of steers, pigs and oxen. There are certain constituent elements in the roots which the grains and other food material fail to supply in sufficient quantity. This may be understood by the voracious way in which cattle devour roots when fed to them after a long period of abstinence from them. In the summer time apples act somewhat in a similar way, and a withdrawal of them from the animals will certainly be followed by a complete change in their system.

As to the fattening qualities of potatoes I have been convinced that when properly crushed and fed with meal and salt they prove excellent. When potatoes are cheap no other food can produce as good results for the outlay. Pigs fed on cooked potatoes have been prepared for market in as short a time as if fed on the exclusive pig diets now so generally recommended. Steers have taken on fat faster when a liberal supply of potatoes was fed them than those which were denied the roots. The wide difference of opinion in regard to the feeding of raw potatoes to farm stock must be due largely to the methods and quantity of feeding. Too many begin a change of food suddenly, and a diet of potatoes given without accustoming the animals to the change would very likely produce colic, and act as a strong laxative. A surfeit of potatoes, apples or grain will also cause colic. Raw potatoes given whole, or in large pieces, are difficult of digestion. But when the change is made gradual, and not a surfeit given, and the potatoes are thoroughly crushed, they will not only prove beneficial to the animals, but they will tend to increase the milk and fat. A small quantity of the roots fed each day with a little grain and salt will show good results almost immediately.—E. P. Smith, in Am. Cul.

Variation in Milk to Customers.

The Cornell University Experiment Station has tested a question, and given the results in Bulletin XX, which would naturally be of much interest to all town residents who purchase milk, and to all dealers who deliver milk. The assertion has been published, apparently on good authority, that in peddling milk the customers who are first served, and who get their supplies from the top of the can, receive more than their share of the cream which has risen to the top, and the last, served from the bottom, get only skim-milk—only one-half as rich as the first. The chemists of the station have made a very thorough examination of this question. A member of the station accompanied the milkman, and took twelve samples for analysis, and afterwards repeated a part. The result was, with very slight and accidental variations, that where milk is peddled by dipping from the can, and where no stirring is done except by the motion of the wagon and raising the dipper, substantial justice is done to all the patrons, and all receive alike their share of the richness of the milk. The trial appears to have been a very complete one, each test being made on a different milk route under three different milkmen.

A Doctor's Confession.

He Doesn't Take Much Medicine And Advises the Reporter Not To.

"Humbug? Of course it is. The so-called science of medicine is a humbug and has been from the time of Hippocrates to the present. Why the biggest crank in the Indian tribes is the medicine man."

"Very frank was the admission, especially so when it came from one of the biggest young physicians in the city, one whose practice is among the thousands, though he has been graduated but a few years," says the Buffalo Courier. "Very cozy was his office too, with its cheerful grate fire, its Queen Anne furniture, and its many lounges and easy chairs. He stirred the fire lazily, lighted a fresh cigar and went on"

"Take the perscriptions laid down in the books and what do you find? Poisons mainly, and nauseating stuffs that would make a healthy man an invalid. Why in the world science should go to poisons for its remedies I cannot tell, nor can I find any one who can."

"How does the doctor know the effect of his medicine?' he asked. "He calls, prescribes, and goes away. The only way to judge would be to stand over the bed and watch the patient. This cannot be done, So, really, I don't know how he is to tell what good or hurt he does. Sometime ago, you remember, the Boston Globe sent out a reporter with a stated set of symptoms. He went to eleven prominent physicians and brought back eleven different perscriptions. This just shows how much evidence there is in medicine."

There are local diseases of various characters for which nature provides remedies. They may not be included in the regular physicians' list, perhaps, because of their simplicity, but the evidence of their curative power is beyond dispute. Kidney disease is cured by Warner's Safe Cure, a strictly herbal remedy. Thousands of persons, every year, write as does H. J. Gardiner, of Pontiac, R. I., August 7, 1890.

"A few years ago I suffered more than 'probably ever will be known outside of myself, with kidney and liver complaint. It is the old story—I visited doctor after doctor, but to no avail. I was at Newport, and Dr. Blackman recommended Warner's Safe Cure. I commenced the use of it, and found relief immediately. Altogether I took three bottles, and I truthfully state that it cured me."

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Fixtures.

Southern Field Trial Club's third annual field trials, New Albany, Miss., February 2. T. M. Brumby, Secretary.

COURSING AT MERCED.—Concluded.

The Contest for the Consolation Stakes Closed the Meet Last Thursday.

Splendid Coursing Continued During the Entire Day. Preparations For Next Year's Meet Now Under Consideration.

The first meet under the auspices of the Interstate Coursing Association was brought to a close last Thursday. The three day's sport was all and even more than the projectors of the meeting could have hoped for. Everybody connected with the Association is elated over the success which attended their effort. By the perfect management of this grand event, coursing has been placed on a higher plain than it has occupied for some time on the coast. This is as it should be. If future meets are conducted by the gentlemen managing this event, nothing that is narrow and contemptable can come in to mar the pleasure of this royal sport.

The meet was open to the world as all future events, conducted by this Association will be; to have them otherwise would be to mar the pleasures of these occasions, and measure the honors won by a limit which would destroy their worth.

The third day's sport, like those preceeding it, was unmarred by murmurs or dissatisfactions of any nature. The weather, like that of the preceeding days was perfection itself.

In the Consolation Stakes there were twenty entries at $5 each. The money was divided into four purses of $95, $45, $20 and $20.

The events of the day were determined by the run of the following courses:

BABAZOUN—NELLIE BLY—This pair were slipped to an unusually strong and fleet hare, Nellie Bly leading to the hare by about three lengths. The hare stretched away on a long course, the hounds making several exchanges, finally killing, Nellie Bly winning.

JOE MCAULIFFE—MAID OF ERIN—The latter led to the hare by a length, and took first turn; several exchanges followed, when the first mentioned hound took the hare and won.

NORWEGIAN—GERALDINE—The latter named hound led to the hare by a length and made first turn, Norwegian going wide. Geraldine took possession, and after exchanging in a long course, the bitch holed the hare.

BO-PEEP—EXAMINER—Examiner led to the hare by several lengths and helped himself to first and second turns. The bitch then got in on his turn, and Examiner came in for another turn. Bo-Peep then rushed in and drove the hare for some considerable distance over a straight course, making a handsome kill, but too soon to wips out Examiner's credits, his work early in the course serving him well and winning.

WOLF TONE—JIM CORBETT—Jim Corbett led to the hare, took possession of hare, and worked it well, killing on a straight course and winning by eight points to ciphers for his competitor.

MAY BOY—EL RIO REY—This course was much the same as the last one above given, El Rio Rey doing all the work and winning by ten points.

FAUGH-A-BALLAGH—DAN B—Dan B was unsighted. The former got on line of the hare but before scoring Dan B closed up and secured three turns and killed, winning handsomely.

FANNY—FREESTONE—This proved a most exciting and beautiful race. It was warmly contested, being give and take for several points. In the run up Freestone led by two lengths, and made three turns. Fanny then came in and worked the hare for a turn and killed. It was a fine race, Freestone winning.

BESSIE—DRY TIME—In this event Dry Time led by three lengths to the hare and made two turns. Bessie then came in for two turns. Dry Time then took the hare and killed, winning after a very swift and sharply contested course.

LADY-IN-BLUE—EL REY—The latter led to hare and kept possession. Ran a long course to finish, making several points.

FIRST TIES.

NELLIE BLY—JOE MCAULIFFE.—The former led by three lengths and took a turn, keeping possessions she killed and won easily.

EXAMINER—GERALDINE.—Geraldine led to the hare by two lengths and made two points. Examiner came in and killed making two points, the latter winning.

EL RIO REY—JIM CORBETT.—Jim Corbett led by three lengths to the hare, took possession and made three turns, when El Rio Bey came in, took turn and kept possession of hare holing same, El Rio Rey winning.

FREESTONE—DAN B.—The latter made the run up and turned, the hare taking it to ravine, where both hounds plunged into the water, coming ont and running evenly to hare, when Freestone took it, making three points, Dan B. then coming in for a point. Then Freestone made two points and killed, winning the course.

DRY TIME—EL REY.—Dry Time led up to hare and taking possession worked it handsomely for five points, keeping possession of hare and winning,

SECOND TIES.

NELLIE BLY—EXAMINER.—Examiner led to the hare by two lengths and made two turns. Nellie Bly then came in took possession of hare and made four points. Examiner came in at finish, Nellie Bly winning.

EL RIO REY—FREESTONE.—The former led to the hare by two lengths and made five points. Freestone then came in for three turns. El Rio Rey then took possession of hare, and killing, won the course.

Dry Time ran a bye.

THIRD TIES.

NELLIE BLY—DRY TIME.—Dry Time was unsighted. Nellie Bly took possession of the hare making two turns. Dry Time then came in for one turn, Nellie Bly taking the next; Dry Time finishing course, but too soon to win.

El Rio Rey ran a bye.

FINAL.

NELLIE BLY—EL RIO REY.—This was a very fast course. Nellie Bly led to the hare and made two turns, when El Rio Rey came in for one turn. Both hounds then plunged into the water which lay in their course, coming out together, but the bitch took the hare and won the final course of the day.

SUMMARY.

MERCED, Cal., Nov. 20, '90.—Consolation Stakes—For all dogs not winning two courses in the preceding events of this meet. Entrance $5. Purses—first, $95; second, $45; third, $20; fourth, $20.

Nellie Bly beat Babazoun.
Joe McAuliffe beat Maid of Erin.
Geraldine beat Norwegian.
Examiner beat Bo-Peep.
Jim Corbett beat Wolf Tone.
El Rio Rey beat May Boy.
Dan B. beat Faugh-A-Ballaugh.
Freestone beat Fanny.
Dry Time beat Bessie.
El Rey beat Lady In Blue.

FIRST TIES.

Nellie Bly beat Joe McAuliffe.
Examiner beat Geraldine.
El Rio Rey beat Jim Corbett.
Freestone beat Dan B.
Dry Time beat El Rey.

SECOND TIES.

Nellie Bly beat Examiner.
El Rio Rey beat Freestone.
Dry Time ran a bye.

THIRD TIES.

Nellie Bly beat Dry Time.
El Rio Rey ran a bye.

FINAL.

Nellie Bly beat El Rio Rey.

Nellie Bly, the winner of first money in this stake, is a beautiful little hound of wonderful speed, and the true grit always to be found in the pure bloods. Mr. J. Byrne is the owner of this splendid animal, and feels justly proud over the record she has made in this meet. El Rio Rey, the winner of second money in this stake, is owned by Mr. P. Kelly, of this city. Throughout the meet this hound showed excellent quality.

Examiner, owned by Mr. P. Canovan during the meet, was sold on the last day to Mr. R. A. Frink, of San Jose, ran well and proved himself a dog of much promise.

THE EASTERN DOGS.

Of these splendid animals Dry Time, owned by Mr. J. H. Watson and winner of third money in the Consolation Stakes, was perhaps in the best condition. She ran several remarkably swift courses and in almost every instance proved more than a match for her competitors in first work, but probably owing to the lack of being acclimated she did not hold out so well in a long course, but in all cases she exhibited that true grit which is the bases of hope for a wonderful future on the coursing field.

Dr. Van Hummell's Babazoun and Norwegian are dogs of the first merit and breeding. Much the same comment might be made on their condition and running as that of Dry Time, with the addition that the first mentioned of this royal pair of hounds was really in no condition whatever to enter the course. Both of these gentlemen may be said to have the interests of the sport at heart in a remarkable degree, evidenced by their continued stand in the course when defeat was all but a foregone conclusion. They are all well satified with the reception accorded them, and future meets of the association will find them present and eager for the contest. But few men in the country have done so much to elevate and forward the cause of coursing as Dr. Van Hummell.

Of the local dogs none received greater sympathy than J. Shea's beautiful Juanita. After running a severe course on the first day she ran a bye, but received no assistance whatever from her mate in what proved to be one of the longest courses of the entire meet. At its finish a fresh hare was started and she ran it down and as a result was all but entirely disabled. She is a splendid hound and under like conditions in coursing would undoubtedly stand well toward the front with the winners.

It is not always the winners that are the best dogs, for instance: one pair of dogs may be slipped to a remarkably strong and vigorous hare which may lead them a chase for three miles or more, thus severely testing their endurance, while the next course may be led by an inferior hare which might be killed quickly, thus saving the wind of the dogs.

A number of favorable courses will thus save the strength of the dogs getting them for succeeding courses. In this coursing meet a number of good dogs were singularly unfortunate, while others were equally fortunate. It will thus be seen that in subsequent meets the order of the courses might be reversed, thus reversing the position of the dogs.

Meeting of the A. K. C. Advisory Committee.

Held Saturday, Nov. 1, 1890.

Present—August Belmont, Jr., Thomas H. Terry, James L. Anthony.

The following matters referred to this committee, with power to act, by the Executive Committee of the American Kennel Club, as per resolution at the meeting of September 25, 1890, were submitted by the Secretary, and acted upon:

James Watson vs. Rochester Kennel Club. } *Appeal in matter reserve numbers.*

Resolved, That in the opinion of this committee, reserve numbers should be given in all cases, but in the case of the Collie special at Rochester in 1889, the judge having left the show, between the hours of four and five o'clock, on the first day of said show (Tuesday), and the request from Mr. Watson for a reserve number not having been received by the Club until the fourth day of said show (Friday), that it was not within the power of the Club to accede to the said request.

Dr. M. H. Cryer vs. Cincinnati Kennel Club. } *Appeal from decision in Pug Special.*

Ordered, That the action of the committee of the Cincinnati Kennel Club in not sustaining the protest of Dr. Cryer, against the award for the special offered at Cincinnati in June, 1890, for the "best kennel of four pugs, entered and owned by one exhibitor," is hereby overruled, and that the said special prize be, and is hereby, awarded to Dr. H. M. Cryer, in accordance with the telegram of June 10, 1890, sent to said clob by Mr. James Mortimer, the judge of the Pug classes at said show.

Mrs. F. Smyth vs. Cincinnati Kennel Club. } *In violation of Club Rules I, IX, X.*

Ordered, That the charges be forwarded to the Secretary of the Ciocinnati Kennel Club, with the request that he furnish this committee with such testimony and explanation as might be in his power, in defense of the action of his club in connection with the charges.

T. Jacobs vs. E. M Oldham } *Charges of misconduct in connection with Dogs*

Ordered, That the Secretary be hereby directed to inform Mr. Oldham that this committee is in possession of all of the evidence in behalf of Mr. Jacobs (through his attorney) in connection with the charges preferred against him, and that said Oldham be given thirty (30) days from this date, within which to furnish evidence in refutation of that now before this committee, in default of which he is disqualified. In the meantime no transfer of the spaniels Newton Abbot Lady II, No. 12,380, or Newton Abbot Lord, No. 12 381, will be recognized by the American Kennel Club.

Max Wenzel vs. Westminster Kennel Club. } *Appeal in matter of Setter Special.*

WHEREAS, At the show of 1890 a special prize was offered by a friend of the club, for the "best Setter with a Field Trial record," and, the English Setter "Roger," and the Irish Setters "Chief" and "Tim" were presented for competition, and,

WHEREAS, The committee of the show ruled that "Chief" could not compete, as he had already been beaten in the Challenge Class by "Tim," and,

WHEREAS, The late decision of the American Kennel Club in defining what should constitute a Field Trial record, made "Tim" ineligible to compete for such a Special, while "Chief" was eligible, by reason of having won first in an open stake for puppies, at the Eastern Field Trial Club trials, and,

WHEREAS, This committee could not undertake to determine what the result of a competition between "Roger" and "Chief" would have been under the judge officiating at said competition, it was, therefore,

Ordered, That there had been no competition for the said Special for the "best Setter with a Field Trial record," and the Westminister Kennel Club be directed to return the prize to the donor.

American Kennel Club vs Maryland Kennel Club. } *Discipline.*

Ordered, That the Maryland Kennel Club be, and is, hereby granted fifteen (15) days from this date, to withdraw its vote of July 10, 1890, whereby it censured the American Kennel Club, for acting according to its constitutional rights, and to apologize for said action, in default of which said Club and its officers, holding office at the time of said meeting shall stand suspended, subject to any further action in the premises, by the American Kennel Club or its executive Committee.

Louisiana Poultry and Pet Stock Ass'n vs. Georgia Poultry and Pet Stock Ass'n. } *Conflict of show dates.*

Ordered, That unless the Georgia Association can furnish this Club with the written consent of the Louisiana Association permitting the first named Association to hold its show upon the same date, as claimed by the latter, that the rule applying to such a case will be enforced, and the Georgia Association will be suspended, provided it insists upon, and does hold its show upon the dates already claimed by, and awarded to, the Louisiana Association.

Recommendation of Stud Book Committee } *In matter of Gazette registration.*

Ordered, That on and after January 1, 1891, all *Gazette* entries shall be known as "Listed," and shall be published each month in the *American Kennel Gazette*, under that heading, in contradistinction to Stud Book entries, which shall be known as and published under the heading "Registered."

The proposition made by Spratt Patent (America), to furnish all American Kennel Club blanks, was accepted for the year 1891.

The appropriation for all salaries of persons in the employ of the Club, for the year 1891, was made, based on the total expenditures of last year.

The secretary reported a balance in the bank of $2 075 02, with no debts due at this date.

Adjourned. A. P. VREDENBURGH, Sec'y.

Howls by Aloin.

How about the despised pointer now? Does not Haywood—Lonsdale dogs prove what we have claimed these many years, *i. e.*, that the pointer is simply grand anywhere you place him on the beach or in the field. The gentleman's dog from "Tip to Tip."

Speaking of field trials, why don't Messrs. Washington *et. al.* give us more field work of any description than at present? Come, gentlemen, get down to business, and not so much bombast about champ. this or champ. that, or best bitch or best dog. What we want from the Irish setter kennel men is more work and real merit—field, I mean, and not so much gush and, I may add, slush as various assertion simply is not proof. Enter your crack Irish setters in the reputable field trials, no matter if they are not evenly placed, and thus give us something for the "Faith that is in you."

'Tis rumored that something in the line of the very best strain of pointers—one of recognized ability among the cracks both on the bench and in the field—in fact one with a reputation on both sides the pond will shortly locate not many miles from Denver, Col. "So mote it be."

Glad to see Mr. Jones on the side where it is impossible for certain parties to claim that his bird dogs are related to "aheep dogs." We knew you would come "sooner or later." Allow me to extend the hand of fellowship.

Wm. Dingle of Denver, Colorado, Dame Rumor says, is willing to back his two month old litter of Setter (English) pups against any other similar litter, age and conditions being the same, for any amount, from a glass of soda to a hottle of Mums.

It is whispered that the Continental Kennel Club will have their second annual bench show follow the Chicago's date

I am informed that Messrs. Bulled-Miner of Devon, Eng., and Muskegon, Mich., U. S. A., will shortly import a few of their famous strain of bench and field trial winners. "Devonshire Nero," "Devonshire Lady," "Devonshire Sall," Devonshire Jack, and others of this strain of pointers—winners in England 88—89 "English Club Trials." This with the Haywood—Lonsdale famous kennels is, as it should be. Now Mr. English Setter, look to your laurels.

The Gordon Setter men are working in the right direction, i. e., giving field trials, and will thus endeavor to show the public that they really have what they have always claimed, the very best breed of bird dogs. Well, success to you, is the wish of

ALOIN.

Dogs for Japan.

On Thursday last, Mr. A B. Truman sent two dogs to Japan. They were a pointer dog Runty by name, whelped July 9, 1890, liver and white flecked and by Rush T.—Patti Croxteth T.

The other was an Irish red setter, Noreen T., whelped June 1 1890, by Mike T.—Lady Elcho T.

Both were sent to Count Toda at Tokio, and will undoubtedly be heard from both as bench winners and field dogs.

The Irish setter is an animal of the rarest excellence all over. In head she is of the pure Irish type, lean, long and angular. Her form otherwise is only that of a youngster, but her color and quality are such as to justify the belief that even that wonderfully perfect setter, Lady Elcho T., is likely to have a close competitor in future.

The pointer, Reinty, is a dog of the highest quality, and especially good in couplings, legs, feet and character. He will be a smallish dog, but of great beauty.

Count Toda is a nobleman whose estates furnish the finest of quail, snipe, woodcock and duck shooting, and as the Count is a fine shot and an enthusiastic sportsman, he will make the most of his superb dogs.

Mr. Truman has already done very much to build up kennel interests, and his last exploit is a movement toward a market for fine dogs which is practically unlimited.

A Dog's Remarkable Sagacity.

The following story is recounted in the Newcastle Chronicle in connection with the terrible colliery explosion at Seaham: It is well known that many bodies of the poor fellows who met their death in the sad catastrophe at Seaham lay in the pit so long before they could be recovered as to be almost past recognition when, at last, they were brought to the surface. Under these circumstances it is not surprising that mistakes should have been made as to the identity of some of the bodies. This was the case, in one instance at least; and to the house of one of the deceased the wrong body was taken, the poor fellow's friends believing for a time, that they were in possession of his actual remains. But there was one member of the household who could not be deceived. This was a Newfoundland dog, belonging to the father of the deceased Knowing that the body which lay in the house was not that of his master, the devoted animal exhibited the utmost anger, barking incessantly, until the object of his displeasure was removed. But when, after some delay, the right body was taken to the house, the faithful dog received it with every token of recognition and delight, and thus, as the woman of the house said, "owned it at once." The affectionate creature then took up his station beside the coffin of the dead miner, which he could not be persuaded to leave, until it was removed from the house.

Massachusetts Kennel Club's Show

NEW YORK.

EDITOR BREEDER AND SPORTSMAN, SAN FRANCISCO, CAL.—DEAR SIR: The Massachusetts Kennel Club, Lynn, Mass. has filled its claim for March 24th to 27th, 1891, for its second bench show. The Cleveland Kennel Club has courteously withdrawn its former claim for April 1st to 4th, and has changed its dates to April 14th to 17th, 1891. By this action the New England Kennel Club is entitled to its claim for March 31st to April 3d, 1891.

A. P. VREDENBURGH, Sec't'y.

Mr. T J. Topham, of Madeira, informs us that the coursing men of that place will urge its advantages as a site for the next annual meet.

The Bulled—Miner Kennel, we learn, will soon be removed from Muskegon, Michigan, to Sunnyside, Virginia. After December 10th their address will be Blackstone, Virginia.

By the concurrent action of the Southern California Kennel Club and the California Kennel Club, in the matter of the coming bench shows to be held by them in April next good shows are assured. Let the bench men wake up and put forward their best endeavors.

We sincerely trust that Mr. F. G. Stewart of Hoosick Fall, N. Y., may complete his arrangements to remain in the State as his presence would be a large factor in forwarding the the sport of coursing.

Mr. J. H. Bridge has just sent us some photographs of the splendid young English blood hounds, among the very few pure bloods in the state, from his Santa Clara Kennels. We may present a cut of these charming beauties to our readers later on.

The National Beagle Club trials just run at Salem N. H., was an event full of interest to all Beagle men. The report appearing in the Forest and Stream of the 13th inst., is full of interest to Beagle fanciers and shows that the sport in this line is full of interest.

Mr. John Grace, who did the arduous work of Judge for the full three days, at Merced riding each and every course, earned a place in the minds of all present, not soon to be forgotten. The same may be said of the work of James Wren, the slipper.

The genial landlord of the El Capitan at Merced has the thanks and gratitude of the large number of coursing men who made his hostelry their home during the meet, for the excellent lunches which he sent out with which to regale them on the field.

The attendence of the ladies at the coursing match at Merced last week, did much to preserve the order and decorum for which that event has become so noted. Once let the ladies fully understand that our coursing meets are conducted in such a manner as to render their presence entirely fitting and appropriate, and they will be eager to attend. At the next annual meet we hope to see a larger number of ladies present.

The voice of the coursing men, goes up as one man to continue Mr. J. R Dickson, the admirable slip steward in that position for the future. In short it is the unanimous wish, expressed on every side, to have the same management which made this course so pre-eminently successful, continued, for with these gentlemen at the head, the public are doubly assured that fairness and honesty will be maintained, without which success cannot be secured.

Captain W. C Nelson, who acted as one of the Judges, at the field trials in this State last year, has recently spent considerable time in the southern portion of the State. He is a devoted friend of the setter and field dogs generally. We learn through him that Mr. H. T. Payne, of Los Angeles, has recently purchased a splendid English setter from Mr. Charles Tucker, of Stanton, Tenn. The pup, which Mr. Payne, is expecting to arrive soon is by Gladstone out of Ruby II. This will add another beauty in the setter class, for the spring bench shows.

Some men are in no sense fit to take charge of dogs at a coursing meet. It is the business of a good handler to be in at the death, as near as a good horse can carry him, in order to secure and care for his dog. In this respect much could be learned by observing the work of Dr. Van Hummell and Mr. F. G. Stewart.

The riding of these gentlemen created much of favorable comment. Most of our local men were attentive to their dogs, and took the best of care of them, while the absence of reasonable care caused all of the disasters to the dogs which occurred.

We regret exceedingly the death of Brunette, one of the finest hounds on the course. This little bitch was the property Mr. James E. Watson of Berkley, who had imported her at great cost, but unfortunately could not be present, else the disaster had not occurred, for he is a thorough sportsman and would have given his dog the best of care.

The future is bright for the coursing interests of this Association. Already steps have been taken to inaugurate the coursing meet of next year on a much larger and grander scale than ever before.

It will be open to the world and such inducements will be held out as will warrant every coursing man in America to attend. The full announcement of the matter pertaining thereto will appear from time to time in these columns.

The American Field of last week, presents a fine portrait of the great Dane Ivanhoe (E. 26026). Thia dog was bred by Mr. Renry Sawtell, being by Cedric the Saxon (E. 15205) out of Challymead Queen (E. 19127). Our above mentioned contemporary says of him:

"The sire was the biggest and one of the best dogs ever seen in England, and his death, at the hand of a dastard poisoner, was a serious loss to English breeders, to whom the tragic death of Challymead Queen, recently chronicled here, was also a great blow. Ivanhoe is a worthy son of thia illustrious pair, and although he has some slight faults they are such as will probably disappear as he matures. In fact he has made up considerably since his portrait was sketched some six months ago. He is a tiger brindle, and his colored portrait which appeared in an early issue of the Canine World, is one of the most remarkable dog pictures ever published. He was born May 30, 1887, and made his *debut* at Warwick the following year, winning easily in the puppy class. At the Alexandra Palace in February, 1889, he secured first and cup in novice class, and his later wins include first and cup, Manchester, first and cup, Chelmeford and first Leeds. His most notable win was at the Kennel Club show, in April last, when he took first in open class (in which he beat Zota and Earl of Warwick) and the 50 guinea cup for the best Great Dane dog in the show, beating Boy and Matador. He also won first and special at Brighton. He is one of the best specimens of the breed now on the English bench, and will show American breeders, better than any amount of writing, the type for which the English Great Dane Club is breeding. He is owned by Mr. E. H. Adcock of Mount Adon Park, Dulwich, and is a model guard and companion. Mrs. Adcock is the founder of the Ladies' Branch of the Great Dane Club, recently mentioned in these notes. Ivanhoe's measurements, carefully taken, are as follows:

Height at shoulder, 33 inches; girth of brisket, 42 inches; girth of skull, 23 inches; girth of muzzle (midway), 13 inches; length of head to occiput, 12½ inches; girth of forearm (one inch below elbow), 11½ inches; total length from tip of nose to tip of tail, 84½ inches; weight 170 pounds.

THE GUN.

Black Hills Begad Sir.

DENVER, COL.

EDITOR BREEDER AND SPORTSMAN:—Three miles due north from what at one time was the outpost of Cheyenne, Wyoming, lies a small body of muddy water called Sloan's Lake. Around this lake on all sides might be seen small tents, large tents, "A" tents, wall tents, and tents of all kinds, sizes and colors. What means this conglomeration? the reader will ask. Simply "Pilgrims" to the Black Hills. Time, May, 1876. In front of each tent the blue smoke is slowly curling heavenwards, and all is bustle and stir. What means all this babble of voices? Men may be seen pulling up tent pins; others packing away picks, shovels, sluice forks, curious cradle-like boxes, etc. It means that to-day is the day set for the move to Fort Laramie, one hundred and six miles due north at the confluence of the North Platte and Laramie Rivers. Six o'clock sharp when the first team pulls out slowly and turns into the road leading to Fort D. A. Russell, followed by twelve other wagons, all covered nicely with snow white canvas. Slowly the caravan moves along up the gentle grade past the Government Post, and the "boys in blue," onward to the north, this time with the motto on many a wagon cover, "Black Hills Begad Sir" Let us pause a moment and allow the teams to pass by, and as they do so to make a few observations concerning the queer assembly. First, there is an old gray-haired man, surely he is at least seventy years of age, and by his side sits a youth scarcely eighteen years of age—a veritable May and December. Men from Iowa, Nebraska, Kansas and Missouri and "Tenderfeet" from everywhere compose the crowd. Some are armed with muzzle loading squirrel rifles, others have old fashioned shotguns, others have Ballards and Sharps' "Old Reliables" and a few, needle guns. What means this mad rush? Gold, gold has been discovered in the "Black Hills," and they are going there to pack it up in gunny sacks and bring it away, and at the same time kill a few Indians if needs be, and whatever else may fall in their way. Eighteen miles north of Cheyenne is Swartz'a Ranch on Pole Creek. There we camp for the night; fires are built, supper cooked, tents raised, "horses staked," and everything made comfortable for the night.

After supper pipes and tobacco are produced, and in front of the glowing camp fires we rehearse over what we will do when we "strike it rich," and of the loved ones at home in the distant States, who will be made happy by our safe return.

Arthur is homesick and does not talk; soon he produces an old mouth harp and such sweet music as he produces for us at that time, far better than a "Thomas" or "Gilmore's" band, Home Sweet Home, with all the variations set all of our party, which consisted of six men to thinking, and conversation ceased. Each was busy with his own thoughts. Presently a yawn from Billy followed by the same from others, told us that the day's journey against a Wyoming zephyr was very tiresome, and that nature required rest and sleep. "Say boys" said I, "let's roll up," we must move early to-morrow morning and I will get up by daylight and go down among the willows on the creek below here and try and kill a good mess of "cotton tails" for a breakfast stew. Morning came, and such a morning. Only those who have camped on Wyoming soil can tell. Hastily snatching my double barrel and placing in my canvas coat pocket a dozen or more shells, I hastened down the banks of the creek among the willows. "Snap" went a dry branch as I stepped on it, a white streak and a shadow flew down the path. "What the deuce is that?" I soon see it is only a little "bunny." "Bang." A clever miss is scored, I hadn't touch a hair (hare).

Steady, my boy, your reputation is at stake. The boys are watching you, you have followed" all along, how you could shoot, if you only had the chance. Steady there, "bang" and a nice fat "Bunny" lies struggling and gasping. Shame on you, to destroy life thus. But no time for moralizing now, the boys at camp are hungry for rabbit stew, and your skill with the gun must be upheld. Bang, another one, and then a third. Soon my hands are full, and with six nice fat rabbits, I return to camp where the game is rapidly cleaned and cooked, and such a dish! it is fit for a prince, so think we hungry men whose appetites have been sharpened by the bracing mountan air.

Breakfast over, horses are saddled, teams are hitched to the wagons, and "Black Hills begad, sir" are once more on the move for our next camping place, some twelve or fifteen miles away, and known as "Horse Creek," where we arrive about 2 P. M. without an accident of any sort whatever. During the march here, on either side of the road, from a half to a few miles away, could be seen small bands of from five to twenty antelope, wild as the "old Harry," and the ground as level as a floor, with no chance to secure a "juicy steak." I soon discovered that the antelope do not become alarmed so readily at a horse, or a man on horseback, and resolved to have a shot or know the reason why. So mounting my saddle pony (purchased from Major Glafke of Cheyenne), I strike forth soundly, guyed by the boys.

Over the pommel of the saddle bows a Winchester Moddle '73; Magazine full of cartridges and a strong determination to secure one of those "sheet ends" at all hazards. After a rather long detour and many a severe disappointment and a great deal of crawling after first staking my pony, I found myself within one hundred yards of a band of twenty antelope. Quickly raising to my feet, and as they rapidly scamper away my Winchester seems to belch forth a constant stream of fire; one of the beautiful creatures is seen to sink to the earth. I am soon by its side and drawing my hunting knife draw the life current away in crimson streams. Quickly skinning out the hind quarters or hams, the rest is left for food for the coyotes, and securing the pony I am soon in the camp on Horse creek.

After feasting to our hearts content, we wrap ourselves in our blankets and are soon sound asleep, for to morrow we have determined to make the "Chugwater" a long and hard drive. "Chugwater," called "Chug" for short, is very near the Arapahoe and Sioux Indian trail, and the ranchmen had just had a scare and lost some horses which had been stolen by the Indians. We anticipated having some lively times ahead before we should reach our destination, which was some three hundred and fifty miles yet. If this is not too tiresome to your many readers, I may be induced to tell you in my poor way, of our trials, hardships and lively times experienced on the journey. "*Black Hills begad, sir.*"

YAMADAVA.

The Art of Shooting.

By Charles Lancaster, gunmaker. Second edition now ready. An illustrated treatise on the art of shooting, with extracts from the best authorities, containing full-page explanatory illustrations, sketched from instantaneous and other photographs. Price, 7s, 6d; postage, 6d extra. Published by CHARLES LANCASTER, 151 New Bond Street London, W.

Japanese Pheasants for Yolo County.

From the Woodland Mail, of recent date, we are pleaaed to learn that the Hon. Joseph Craig received by Wells, Fargo & Co.'s expreas, four Japanese pheasants, which were eent him by the State Game Commissioners. The birds came from Oregon, and the flock consists of a male and three females.

Mr. Craig sent the beautiful creatures out to the Stephen's ranch yesterday, where they were liberated in the brush that grows on the banks of Cache Creek.

Mr. Craig is authority for the statement that any one who shoots or kills the pheasants placed on Cache Creek, will be prosecuted and punished to the fullest extent of the law.

Any individual who would be penurious and mean enough to destroy the first stock of Japanese pheasants should be flogged at the whipping post, for if the Game Commissioners see that the game placed in Yolo county is killed they will discontinue sending game to our citizens to stock forests with.

The Japanese pheasants are somewhat similar to a turkey as they multiply very rapidly, and run in flocks.

They have a beautiful plumage and their flesh is said to exceed that of the quail in delicacy and richness of flavor. They are a very tame bird.

In the Eastern States the trapping of pheasants is a favorite sport during the winter. The birds are trapped and the younger ones turned loose, while the older ones are used for food.

It is seldom that a hunter ever shoots at a pheasant in the Eastern country, and as a result of this precaution, the birds become very tame and are easily trapped, affording the chance of liberating the young members, thus allowing the birds to multiply rapidly, thus maintaining large flocks of birds.

Mr. Phil Daly, will shoot a match with Mr. U. S. Canon, on the return of the latter from Europe.

A slight rain would be of advantage to the working of the field dogs, but otherwise the fields present unequaled facilities.

We learn that Major A. G. Courtney, representing the Lefever Arms Company is expected to arrive shortly in the city.

Mr. S. A. Tucker, the well known agent of Parker Bros, has been attending the shooting tournaments at Kansas City, St Louis and Dubuque, and will go to Minneapolis and St. Paul.

The English papers are still wondering whether Buffalo Bill and Dr. Carver really break glass balls with a rifle ball as claimed, or whether the feat is not accomplished by shooting shot though using a rifle and rifle shells.

The Garfield Gun Club, and the Auburn Park Club of Chicago, the Shelton Gun Club of Shelton, Nebraska, and the Standard Gun Club of Baltimore, Md, celebrated Thanksgiving by a shooting tournament on their respective grounds.

The Shooting Times records the fact that the Prince of of Wales is a genial gentleman when shooting in the field as well as elsewhere. He is said to be better than the average shot, but has no extraordinary skill. He thoroughly enjoys the sport, and allows nothing to mar the pleasure of the day.

Canada is showing remarkable narrowness in not allowing American sportsmen to shoot over the border. How would our Canadian friends relish a dose of their own medicine. But come to reflect, it is not the sportsmen of our northern neighbor that are at the bottom of this matter, true sportsmen are above such petty meanness.

The present month, in California, presents the most beautiful weather for field sports. Every stream, lake and marsh is filled with ducks, while the fields in many places are fairly swarming with geese and brant. Many fine bags are being made day after day by our sportsmen. The shooting grounds along the streams toward the southern part of the state, are being patronized with the most satisfactory results.

It was a graceful and pleasing act in Mr. J. A. R. Elliott, at the recent banquet which followed the match between the Kansas City and Chicago teams, to take Mr. M. J. Eich by the arm and introduce him to Capt. McGee, Master of Ceremonies, as the winner of the diamond medal, when these gentlemen had tied on the score for the medal. Mr. Elliott's waiver of all claim to the medal and the presentation of it to Mr Eich will not soon be forgotten by all true sportsmen.

We are pleased to learn that it is highly probable that a match will shortly be arranged between Mr. Charles Macalister of Philadelphia, who recently spent some weeks in this city and vicinity, and Mr. J. A. R. Elliott of Kansas City. These gentlemen are each crack shots, and the entire sporting fraternity will be highly interested in the outcome of this match, should the arrangements be consumated.

Both men are spoken of in terms of admiration by those who have seen them shoot. Each have friends all over the country. Mr. Macalister's shooting during his recent visit here won the sportsmen of the coast, as few men have succeeded in doing.

The action of the State Sportsmen's Association regarding proposed change of the game laws should not be overlooked by our next legislature. It is a matter of no inconsiderable importance to the interests of the State at large that this matter should receive the earnest and careful attention of our law makers. It is too painfully true, that to command the attention of the average legislator that there shall be some influence or in political parlance some "baggage" that may be delivered, but on a question of such universal importance no such question should arise. Every man who has the good of the State at heart should not require any extra persuasion to lead him to vote for a bill which would carry out the best interests of the public regarding such matters. All work done on this subject is done for the good of the whole people, and no bill will be asked by the sportsmen of the State, that will contain in any of its features aught that is not in harmony with the best interests of the public. We trust that the sportsmen of each and every assembly district will at once begin working on their respective assemblymen to the end that the bill recommended may be crystalized into a law, that shall prove effective for the object intended, namely, the protection af the game and fish interests of the State. Now is the time to begin work; do not put it off until the legislature convenes.

ROD.

Salmon Fishing.

O veteran angler! ancient friend,
Again thy graphic page displays
The wonders of the natural world,
The grandeur of the forest-ways.
The sylvan glories of the wood,
Where drooping branches hem the stream;
Those sweeping currents, shaded now,
Now flashing with a sudden gleam.
'Tis his delight to track the brook
That laughs and prattles down the mead
To lure the spangled, springing trout,
Or pickerel darting from the weed;
He loves, too, by the wood-girt lake,
For dusky bass to cast the line,
Or by salt billows of the shore,
To whirl the bluefish from the brine;
Or far out in profoundest deeps,
To drop for sea-bass baited lure,
Or by thy green shores, Florida,
The channel-bass prize to secure;
Or sturdily the great rod swing
For tarpon, the fam'd Silver King.

But nobler, regal trophy crowns,
With laurel wreath the angler's brow,
Who swings the rod and casts the line,
Where swift Canadian rivers flow;
Where royal Restigouche pours out,
Its grand, majestic sweep of tide;
Or where Saint Lawrence Gulf receives,
Its tributaries, deep and wide,
Or where Aroostook dashes free
To the tide-waters of the sea;
Or where New Brunswick like a gem,
Soars upward from the encircling brine,
Studded with sparkling brooks and lakes,
Encrown'd by forest-wilds of pine;
There anglers find a joy supreme,
By boiling river, rushing stream.

By wind-swept cliff and jutting bar,
Where circling eddies swirl and wheel,
He sees the mighty salmon spring,
He hears the music of his reel;
He contemplates with strange delight,
Those rivers riotous and deep;
Some dash to sea in headlong way,
Some sinuous loiter as they sweep.
Some upward leap in creamy foam,
Some plunge and tumble in abyss,
Some flow past with a murmuring note,
Or lion's roar, or serpent's hiss;
But ever 'mid the spume and spray,
The lordly salmon speed their way!

ISAAC McLELLAN.

A Fishing Trip Down the Kalamazoo.

KALAMAZOO, Mich.

EDITOR BREEDER AND SPORTSMAN:—On the twenty-ninth day of June, 1889, three of us decided on a trip on the river. To think was to act, and so the next morning found us on our way, but the objective point of embarkation was way up the river and not at the usual place. It has been the custom to start here, float down as far as agreeable and return on the cars at our leisure; in this case we decided to reverse the order of our course by starting out in style on the fast train East on the Michigan Central and then float back home in our canvass boats and lure the festive small-mouth on the way.

It was an early hour in the forenoon of the 30th, that we reached Marshall, about thirty-five miles distant by rail and all of twice that by water, and after taking on an extra jug of duffle, etc., etc., set up our boats, and tumbled in. Away we went for a mile or two propelled by strong and ready muscles and backed by light hearts and pleasing prospects, and then we decided to fish and our tackle was quickly put in shape. Our flotilla was summed up in two king canvass boats, in one of which ye chronicler was stowed in the stern sheets with Harve Diver rod in hand in the bow; George Thomas cruised above in the little twelve foot thirty-pounder.

This river is one of the grandest streams for the small-mouth bass in the country at proper seasons, and if an angler is so fortunate as to strike it at a time when the fish are hitting one can have as good sport as is to be enjoyed anywhere in America. Tackle should be used that is admissible for regulation bass fishing, and with this I will guarantee that with a fair degree of skill in one's 'get up, no one will have cause to complain of time spent below Marshall as far as Battle Creek on the glorious Kalamazoo. Our style of lure is a large spoon with small hooks, and this on a good pole in good hands is a first-class temptation to the wily bass. Skittering, as it is called, is the best form of working your spoon and is done to greatest advantage with a not too pliable pole; one, say of eight to twelve ounces with which you can make a vigorous cast if necessary. Sometimes not over six yards of line was unreeled when the boats were passing through small channels and more line was inadmissible, but usually twelve to fifteen yards was handled. The spoon is alternately cast from side to side of the boat, or quartering, or directly in ahead, generally meeting with surest response when water is not over two feet deep—but some of our best prizes were received from deep water pools and eddies where the spoon was allowed to sink well beneath the surface.

Thomas was generally well ahead of the big boat and therefore had the choice of the fishing, from which fact he maintained the best record on the cruise, catching by far the largest string. He was obliged to yield the chaplet to our boat on weight, one that Diver caught, clearing by three ounces, the four pound eight ounce gudgeon that he wanted to bank the wealth of the Rothchilds on. The bass that we caught and saved during the day averaged about two and a half pounds, and a fine lot they were, but our hopes of making them available were small, as will be seen by reference to our hard luck.

Our only means of preserving the bass we caught was to string them on behind the boat, where we could keep them alive if not too badly mutilated by the hooks. The weather was so warm that a fish would spoil in a couple of hours if brought into the boat, and we were anxious to save some trophies of our skill for home exhibition. At a time we were whirling around a sharp, deep bend of the river, and when Harve was playing a large bass, we ran over a barbed wire stretched across the stream, and of course our elegant string of fish passed under the wire and immediately parted company with the stern of the boat, and they were all lost. It was about evening and time for making camp, and so we pulled up to shore, heaping maledictions on the heads of all farmers who stretch wires across the river.* The remaining string of fish from George's boat we secured to the bank after removing a few for our supper, and we hoped to find them alive in the morning. We then raised our tent, prepared our evening meal and retired, having accomplished about twenty miles of our journey and caught sixty pounds of fish, all small-mouth black bass. It was not very pleasing to think that of this fine catch, only about twenty pounds of fish remained.

In the morning we found that the turtles had visited our string of fish during the night and about destroyed the lot; three or four of the best ones were alone represented by the heads left on the cord, while all had been picked at and torn, and of the nine fine fish left on the string the night before, only two were available for cooking, so badly mutilated were they by the big river turtles. After an early breakfast we again took to the boats, resolved to be more careful with future catches.

We succeeded admirably in our efforts and were actually surfeited with black boss fishing by 10 o'clock, at which time we took a long rest on shore at a pleasant place in a grove, where we found several bird's nests; among others one of the yellow throated Vireo *Lanivireo flavifrons*, the eggs of which are rarely found, although the birds are abundant. We passed a dam where an admiring crowd examined our grand catch, and decided, soon after passing this little hamlet, that as it was impossible to reach home that night, the fishing being good, and we anxious to enjoy it, that we would sell our fish at the next stopping place and not let them spoil, as they surely would if kept over night. There followed two hours of cloudy weather, and in that time it is safe to say that there was not at any time five consecutive minutes passed when a fish was not struck by some one of our party. The fish were mostly light, and although they averaged lower than with first day's sport, they amply made up for the lack in weight by their game qualities. It seemed to matter very little whether we floated in mid-stream or under the over hanging boughs near the banks, as the fish would bite anywhere, and seemed very numerous.

Passing a deep eddy George would hook one and floating on with his prize, would yell back where we were to cast as we come by, and almost every time we would secure one or two from the same pool or eddy. On the whole, it is safe to say that the water, from a foot to eighteen inches deep along the edges of the river and where it was not over rapid, yielded the best returns. In such situations and at the sides of logs half submerged where the reflection made it possible to view the bottom, it was our fortune to witness the pursuit and capture of the shining lure by the gamey, active fish. The full performance was distictly seen three times, and the writer never before comprehended the impetuosity of the mad rush of Mr. Smallmouth as he literally hems toward the lure.

Three spoons were lost during the two days, two of which were carried off by monster bass and one by snagging, but all were lost through carelessness in striking too quickly and too strongly. We threw back over twenty bass during the day's float which weighed from a half to a pound and a half, and calculated to keep nothing below a pound and a half. After a time it became monotonous, catching them so easily and we tried experiments with them. When a three pounder would get well hooked, pressure would be made in the direction we wanted him to tow the boat as we floated down stream and it was found that with proper guiding the strong fish could quickly take our canvas boat containing two persons to either side we wished, and one large fellow drew the boat thrice across the river before he was used up.

Arriving at Battle Creek we sold our fish to a market man for three cents a pound and the receipts were three dollars and sixty-six cents, about all of which we spent in looking around the city. Among other things, we purchased an additional frying pan, of a capacity to accommodate three hungry men; we also laid in a supply of insect dope prepared according to the celebrated receipt of the lamented and honored Nesmuk. Dropping down the river a couple of miles below the city, we made camp for the night and tried our new frying pan. Talk of appetites; it is not necessary to refer to a hungry sailor, a starving Indian or a cowboy of the lone star State. If you want to comprehend the capacity of a party of hunters and fishers for a big meal you must see them eat it, and I am satisfied that you uns fetched up in ther city and not much away from hum can't realize haow we uns can eat, nor good lord! how we did eat that night.

Six o'clock in the morning found us once more on the placid Kalamazoo floating with the current, while spat, spat, sounded the spoons on either side of the boats as they struck the water in efforts to lure *micropterus* No use however in trying to fish just below a city and after trying for several miles we desisted. This is almost universally the case with streams, in Michigan at least; wherever there are cities and villages the fish are pretty well caught out; in addition to the angling hordes of small boys in the immediate vicinity, there are the sewers and other pollution also incident to dense population. In this case a paper will, with the resulting chemical polution and refuse undoubtedly had much to do with the falling off. After an hour's float we again caught an occasional fish but did not find them plentiful during the remainder of the trip. Finally we reached home thoroughly disgusted with ourselves for having sold our big catch of the day before. We had nothing to show when we reached home excepting a few small bass, and no amount of arguing would convince our impertinent questioners and friends that we had caught over two hundred pounds on the trip.

It recalled to my mind the time we went hunting and shot a nice deer the first day out, which we sold, and then never saw another during our stay. To those contemplating a trip down the Kalamazoo River, I should advise the fishing from Marshall to Butte Creek, and then take the cars for home.

ANTILOPA.

*It must not be concluded that we are in the habit of selling our fish and game. We never allow fish to spoil on our hands and would gladly have given our catch to friends had we reached home in time. The persistent market hunters we do not respect, but the man who wantonly destroys and makes no use of captured fish and game we abhor.

*The next trip we take we will be prepared for obstructions of this kind, and will quickly cut all wires. No person has a right to obstruct a river large enough for steamers by stretching anything across it, even if one owns the land on each side.

Captain W. C. Nelson says that one of the finest fishing resorts in the state for trout during the past season was Glenbrook, in Lake County. It is one of those charming mountain resorts, so secluded that the trend of travel passes it by—just such a place as a devotee of the rod will relish when next season opens up. Let our disciples of Walton make a note of it for future reference.

Imported Greyhounds for Sale

I offer for sale litter brother and sister to Lord McPherson, Lady Barton and Lady in Black, dividers of the American Field Cup Stake; also six and eighteen month puppies, all of Trales—Dick's Darling, and closely bred to FULERTON, twice Waterloo Cup winner. I have the best coursing Greyhounds in America. Pedigrees sent on application.

AMERICAN COURSING KENNELS,

D. C. LUSE, Prop'r., Great Bend, Kan.

SYNOPSIS

OF THE

Hollywood Trotting Stock,

Property of B. C. HOLLY, Vallejo, Cal.

—TO BE SOLD AT—

PUBLIC AUCTION,

WEDNESDAY, January 7, 1891, commencing at 10:30 o'clock, at

Hollywood Farm,

Situated three miles from Vallejo on the Napa Road. All Trains Stop at Flosden.

NAME.	Color and Sex	Foaled	SIRE.	DAM.

Announcement.

Owing to ill health, I have fully determined to sell at auction my entire stock of trotters and thorough breds. I have been an extensive buyer, both privately and by auction, for the past four years and have endeavored to get the best. Whoever will take the trouble to glance over the column of sires, represented in the sale, and then notice the producing families that support them on the dam's side will see that nearly all the remarkable getters are included.

TERMS OF CREDIT.

While the terms of the sale are cash, responsible buyers may have the privilege of credit for an agreed time, by observing the following conditions: Buyers must furnish satisfactory security, and must, prior to the opening of the sale, notify the owner and obtain his approval, specifying the drawer and endorser of the proposed note. Notes to bear six per cent., and payments to be made at the Vallejo Commercial Bank. In reference to credits, address B. C. Holly, Vallejo, Cal.

For Catalogues, ready about December 1st, address

B. C. HOLLY, Vallejo, Cal.

WOLLPERT & SCHWERDT,

INDIANAPOLIS

FURNITURE COMPANY,

750 Mission Street,

Between 3d and 4th Streets, SAN FRANCISCO.

Demuth Brothers,

89 Walker Street, New York,

ESTABLISHED 1852.

Manufacturers of Artificial Glass Eyes, for Stuffed Birds, Animals, Fish, and Furriers,

Glass Shades and Fish Globes,

All sizes and shapes for the protection of stuffed birds, flowers, wax fruit, etc. The attention of manufacturers, dealers, taxidermists and collectors is invited to our manufactnrs of these goods. Information and catalogue free by mail. All kinds of glass work done to order, Homeopathic vials. Every kind of Glass GAUGE FACING AND CYLINDERS for Brewers, Distillers, and machinery made to order, including Scientific Glassware of every description. The oldest and best firm on the continent manufacturing Artificial Eyes and Glass Shades. Glass Factory on Newtown Creek, near Penny Bridge, Brooklyn, E. D., N. Y.

The L. C. SMITH

HAMMERLESS GUN.

In two matches shot in San Francisco, Cal., between Martines Chick, of San Diego, Cal., and J. L. Brewer, of New Jersey, at 100 live birds a side, London Gun Club rules, Mr. Chick made the remarkable score of 95 kills out of each 100 shot at, making a total of 190 kills out of 200, using an L. C. Smith 12-gauge, 7¾-lb. gun. The following are the scores:

FIRST MATCH, JUNE 1, 1890.

—OF THE—

Pacific Coast

Trotting Horse Breeders

ASSOCIATION,

Will be held at the rooms of the Association, 313 BUSH STREET, San Francisco,

Monday Evening, December 1st, 1890,

at eight o'clock for the election of three Directors, and the transaction of such other business as may be presented.

F. L. COOMBS, President.

JAS. P. KERR, Secretary.

FOR SALE.

San Miguel Stock Farm

Mambrino Wilkes, Balkan, Chaldean, Fanny Fern, MOLLIE FERN, ANNIE LAURIE,

And each and every Animal belonging to the place, together or separately.

This place is as well adapted to the raising of fine stock as any; has good stables, full mile track (kite shape), etc. The soil is as good as any the sun shines on, whether for raising grain or fruit.

PROOF—Grain sown about the first of April, this year, produced a fine crop.

Walnut Creek, which never fails, runs through the place. There are also a never-failing spring and two wells. Water can be obtained by sinking twenty to twenty-three feet. Apply to

IRVIN AYRES.

The GREATEST SALE of THOROUGHBREDS EVER HELD in AMERICA

Taking Quality, Numbers, Breeding and Performances.

BRUCE & KIDD'S GREAT COMBINATION SALE

—TO TAKE PLACE ON—

SATURDAY, TUESDAY & WEDNESDAY, December 6, 9 & 10, 1890

At TREACY & WILSON'S STABLE, LEXINGTON, KY.

ON SATURDAY, DECEMBER 6, they will offer the entire stud of Mr. Amos G. McCampbell, comprising forty-one head of weanlings, yearlings, horses in training, stallions and broodmares. Among those in training will be found the great filly Flyaway, Edith L., Engenia, Rollin Hawley and Grayson, all winners. The stallions are Tom Martin, by Longfellow, dam Athlaric by Gilroy, out of Brenna, granddam of The Bard, etc. He was a capital race horse, and from his breeding and performances should make a good sire. Jim Gore, by Hindoo, dam Katie by imp. Phaeton, won the Harold and Carriage Builders' Stakes at two years old, the Clark and Boulevard Stakes and St. Louis Derby. He is unexceptionally bred. Nick Finzer (own brother to Ripple), by Lisbon, dam Maggie Hunter by imp. Australian. He won the Sanford Stakes, one mile, at two years old, in 1:45¾. Longside, by Longfellow, dam imp. Lady Stockwell by Knowsley (son of Stockwell), won the Fairview Handicap at two years old. Among the twenty-six broodmares are some imported ones and the rest native. Mr. McCampbell spared no expense in buying his broodmares, which are one and all rarely bred and generally in foal.

ON TUESDAY AND WEDNESDAY, DECEMBER 9 AND 10, they will offer some hundred and seventy-five head, consisting of weanlings, yearlings, two, three, four and five-year-olds, stallions and broodmares. Tuesday's sale will consist mainly of yearlings, some seventy odd in number, opening up with the entire lot of Nantura yearlings, including brothers to the renowned Freeland, Sally Burns and Response, sisters to Irish King and Louisa Forrest, and half sisters to Persan, Test and Hailfellow. Among the other yearlings will be found own brothers to Pride of the Great, Village King, Harrison Ofalece, and Kosciusko Key; sisters to Ollie Benjamin, Mose K. Lee S., Ed Leonard and Lemoine H.; half brothers to Pauline, Ed Hopper, Round Dance, Square Dance, Emigrant, Lurav and War Whoop; half sisters to Amos A., Masterpiece, Pessara, Blackstone, Borderer, Nell Booker, Watch Me and Frontenac. Among the stallions are Wanderer, Bob Miles, Little Ruffin, Lord Clifden, Glenfortune and Minstrel. The broodmares are of high class, seventeen of them dams of winners, and a number of young mares of fashionable breeding and untried in the stud. Space will not permit a description of the various horses and mares, but full details will be found in the catalogue. Sufficient to say that this is the greatest and best offering of thoroughbreds ever placed before the public at auction.

For catalogues address this office or

BRUCE & KIDD, Lexington, Ky.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50,

Address,

THE BREEDER & SPORTSMAN,

313 Bush St., San Francisco, Cal.

Catalogues Compiled,

Pedigrees Traced & Tabulated

The undersigned, having had an experience of over five years in work of this kind, is well posted in regard to trotting pedigrees and performances, and will give special attention to compiling catalogues, circulars, advertising cards, tabulating and tracing pedigrees, etc. My facilities are unexcelled for doing this sort of work, and parties can arrange with me to do both compiling and printing at reasonable rates. Samples, estimates and references will be furnished parties contemplating having work done. Satisfaction guaranteed.

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,

Santa Clara P. O., Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp. Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 30 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle.	4th dam by Whip.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro, and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. The roads are very good.

All stock sent from San Francisco may be brought over by Express, which leaves San Francisco on the Creek route boat. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple or hours in the car

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance, ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

Washington Park Club, CHICAGO,

Coney Island Jockey Club, Sheepshead Bay, L. I.

1891.

The Friendly Stakes,

To Close DECEMBER 1st., 1890.

A Sweepstakes for two year olds, (foals of 1889,) to be run at the Summer Meeting of the Washington Park Club, Chicago, and at the Autumn Meeting of the Coney Island Jockey Club at Sheepshead Bay, L. I; of $50 each, $25 f; $3,000 to be added by each Association. Should the same horse win both races, $1,000 additional in plate or money will be given, half by each Association. Horses entered at either place incur liability for one forfeit only, and are entitled to start at either or both places; those starting for the Friendly Stakes at Washington Park are entitled to start for the Friendly Stakes at the Coney Island Jockey Club without incurring liability for starting at the latter place.

Conditions of the Friendly Stakes to be Run at the Summer Meeting of the Washington Park Club, 1891.

Colts to carry 118 lbs; fillies and geldings, 115 lbs. A winner of any two-year-old stake at Washington Park of the value of $2,500 to carry 5 lbs. additional. Maidens never having run second for a race of the value of $3,000 allowed 7 lbs. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750; and the third $250 of the added money. Five furlongs,

Conditions of the Friendly Stakes to be Run at the Autumn Meeting of the Coney Island Jockey Club, 1891.

Colts to carry 118 lbs; fillies and geldings, 115 lbs. The winner to receive half of the joint subscriptions and $2,000 of the added money; the second $750; and the third $250 of the added money. Winners of a race of the value of $10,000, or of two races of the value of $6,000 each, to carry 10 lbs. extra; of one race of the value of $5,000, or two of the value of $3,000 each, 5 lbs. extra. Non-winners of $1,000 allowed 8 lbs. Three-quarters of a mile.

Note.---The Sweepstakes will be paid over on October 1st, 1891. The added money by each Association immediately after each race.

The value of each of the above races to the winner will probably be about $6,000, *and the only liability is* $25 *for non-starters.*

Coney Island Jockey Club,
Fifth Ave., cor. 22d St., New York.

Or to **J. E. BREWSTER**, Secretary,
The Washington Park Club.
32 Palmer House, Chicago.

Kentucky's Great Stallion

REPRESENTATIVE STAKE.

-:- ENTRIES CLOSE DECEMBER 1st, 1890. -:-

$10,000

Guaranteed by the Kentucky Trotting Horse Breeders Association.

FOR FOALS OF 1891, colts, fillies and geldings (the get of stallions that may be nominated in this stake), to trot as three-year-olds at FALL MEETING, 1893; mile heats, 3 in 5, in harness. On or before December 1, 1890, the stallions whose get may become eligible to start in 1893 must be nominated, and any stallion, even if dead, that has colts foaled in 1891, is eligible. Ten days prior to race the colts to represent the stallions shall be named, and there may be as many starters by one sire as there are different owners, but no person can be interested in more than one starter. The Association guarantees this stake worth not less than $10,000, except for a walk-over, in which case the winner will receive the whole of the amount paid in. The guaranteed amount ($10,000), will be divided; $8,000 to first colt, $1,250 to second, $750 to third. If the stake exceeds $10,000, the whole of excess will go to NOMINATOR of stallion whose colt wins the race. Entrance as follows: $100 to name the stallion December 1, 1890; $50 to name the colt ten days ahead of race in 1893, and $100 the night before the race. Send entries to

N. B. The great $25,000 stake for foals of 1891 will be announced later.

Vol. XVII. No 21
No. 313 BUSH STREET.

SAN FRANCISCO, SATURDAY, DEC. 6, 1890.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

NORFOLK by Lexington, dam Novice by Imported Glencoe, Died November 25th, 1890.

We present to our readers this week an excellent likeness of Norfolk which was taken but a few years ago, and which was a counterfeit presentment of him even up to the day of his death, which occurred on Tuesday, November 25th. While it may be news to many of the latter day patrons of the turf, many of our readers will remember when Norfolk was first brought to this State. Mr. Theo. Winters had had a favorite mare beaten by a horse owned by Mr. Bryan, and fully determined that he would go East and procure the very best horse that money could buy to gratify a feeling of piqne, as he wished very strongly to defeat Mr. Bryan's great colt, Lodi. A trip was taken, and at the Laclede races in 1864, he saw for the first time the noble stallion, which has since made the name of Theodore Winters a household word in the home of every lover of the thoroughbred. It was at the second day of the meeting that a sweepstakes for three-year-olds was run, each being weighted at ninety-six pounds. There were six starters, two of whom we distinctly remember, one being R. A. Alexander's Norfolk, and the other Zeb Ward's Tipperary by Ringgold, the names of the other four being forgotten. Norfolk won in two straight heats, the time being 1:46¼ and 1:47. Prior to the Laclede races a book had been opened at Dr. Underwood's headquarters at Lexington on what was called the Patterson Derby, the favorites being Arcola and Kentucky, both of whom were listed at $8 to $1. The doctor laid $10 to $1 against what was known as the Alexander "lot," which included Asteroid, Norfolk, Nannie Butler and other. Immediately after the three-year-old race which has already been spoken of, Norfolk jumped into the favorite's place in the Lexington book,

and considerable money was laid on him to win the first derby ever run in the United States.

Immediately after the race the colt was booght hy Mr. Winters and George Rice took charge of him and shipped him to Patterson, where on the 7th of Jnne a great array of thoroughbrede had been congregated for what was called the spring meeting of the Passaio Association. In the meantime Norfolk had gone back in the betting owing to a rumor that the colt had been rnled off, and Mr. Hnnter's colt, Kentncky, was a etrong favorite, having shown great speed in his work. The race took place on a Tuesday and it was as clear and pleasant ae the most fastidious could have wished for. The Erie Railroad had all they could do to transport the immense crowd of turf patrons who wished to see the great race, it being estimated that fnlly 12,000 persons were present to see the event rnn off. This number inclnded prominent tnrf representatives from all parts of the United States, as the sensational event was really a contest as hetween the East and the West, or to be more explicit, it was really Kentucky against New York. The track was far from being good, owing to raine which had recently fallen, and althongh it could not be called mnddy, wae very slow and precluded the idea of fast time being made. After the opening event, which was a race of mile heats, the horses were called up for the race of the day, and the following is a report from a local paper of the following day:

"After this race the Derby candidates were brought ont and the excitement ran high. In the reports concerning the condition of Norfolk, alluded to above, Jas. L Eoff had been the most prominent circnlator, and went so far as to persuade certain persons that he had the management of Norfolk, would not start him, etc. After, however, he had succeeded in getting a big het of $6,000 to $2,000 against Norfolk from the late John Morissey, he threw off all disguise, and, as the colt was found to be all right, he at once became a hot favorite, eelling in Dr. Underwood's pools prior to the race, for $1,150, Tipperary $600, Kentucky $400, Morris' pair $250, and the field $230. Twenty starters were saddled, P. C. Pnsh'e Lurline, by Knight of St. George, 97 lbs; Bowie & Hall's Velvet, by the same sire, 97 lhs; Dr. Weldon's Charlotte F., by Scythian, 97 lbs; Capt. Moore's Brother to Jack Malone, by Lexington, 100 lhs; James S. Watson's Patti, by imported Eclipse, and Relief by Riggold, each 97 lhs; Frank Morris' two fillies by imported Eclipse, same weight; John Hnnter's Kentucky, by Lexington, 100 lbs; Mr. Ackerman's Eagle, by Vandal, 100 pounds; Zeb Ward'e Tipperary, by Ringgold, 100 lbs; and R. A. Alexander's Norfolk, by Lexington, 100 lhe. The favorite was ridden hy J. Lewis, and looked full of life and fire as he was being saddled. Norfolk wae a hay colt, standing 15.3, with three white feet and a peculiar blaze. Of good length, he was a very taking horse in appearance, and his powerfnl propelling power behind was very noticeahle when extended. Kentucky had Kilpatrick in the saddle, and while fnlly as mnch a race horse in appearance, he was evidently not in as forward condition as Norfolk, on whom old Ansel had expended all of his well known training ability with good resnlts, as anyone could see by looking at the colt. Tipperary, a bigger horse than either, over 16 hands high, looked rather too finely drawn, almost, hnt his big frame, not yet fnlly developed, wae reeponsible for mnch of this impression, as the colt ran well in the race. Abe was his pilot. Eagle, a big slashing chestnnt, looked the picture of a racer, and Pincns had him in prime order. Mr. Sherrod soon had the lot in hand at the half-mile pole, and after very little delay they were sent off to a straggling start, Norfolk moving off mnch the quickest of any, so that in the first qnarter of a mile he was several lengths away, and going like a scared deer. Kentucky was next, Velvet third, the others in a hnnch, with Tipperary in a pocket, and by the time the etand was reached Norfolk was at least eight lengths in front, and getting away at every jnmp. On the tnrn Abe pnlled Tipperary to the ontside, and passing the leaders like a shot, including Kentucky, on the backstretch, he went on after Norfolk, who was hy this time a dozen lengths away. The rest of the race was a procession, and as "Tip" could not close the gap any, Norfolk was eased, and the last half of the race was elow, Norfolk winning hy ten lengths, Tipperary half a dozen lengthe from Eagle, who beat Kentncky a head in the last few strides. Time, 2:46¼; first mile in 1:47. The Kentncky party came in for many congratnlations on the race which was worth $2,600 to the winner. The conspirators, J. L. Eoff and Charles Marsh, were, however, the objects of much censure, and the following day the associatian took cognizance of the matter by formally rnling off Eoff, censnring Marsh, and restraining the horse Norfolk from starting at Paterson until fnrther notice."

* * * * *

"As regards the rnling off of Eoff and the snspending of the colt Norfolk, a great many coneidered that the action was rather hastily taken, and hardly warranted by the charges as ect forth. Thongh accused of conspiracy, no one was evidenced as a party to the alleged collnsion, and the charges should have been a trifle more definite. Norfolk really started, was run to win, and did win, and cnrrent report ascribed the somewhat prematnre action of the committee to the plaintive lamentations of the fleeced bookmakers, of whom the most prominent was the gentlemen mentioned in the foregoing as laying Eoff a large bet."

The story of the sale of Norfolk has become almost historical, and yet will bear repeating once more. On the afternoon of the day on which Norfolk won his first race, Mr. Winters, Mr. Eoff and others carefully inspected the horse while he was being cooled ont. Approaching Mr. Alexander, the owner of the colt, Mr. Winters asked his price and was told $15,000; without more ado the Californian said he would take the horse and promised to meet Mr. Alexander the following morning at his hotel to pay him the money. When the party arrived to pay over the money, Mr. Alexander said he was very eorry, bnt he would have to raise his price on the horse, which made Mr, Winters very angry as he considered that Norfolk belonged to him, having purchased him the night before. Eoff wae inclined to be better natnred, and pulling Mr. Winters by the eleeve, said: "Wait a minute and we'll hear what he wants for him." Mr. Alexander then explained that when langhed at for paying $15,000 for Lexington, he stated that before many years he would sell one of his colts for more money than had been paid for the old horse. "Therefore," said Mr. Alexander, "I shall have to oharge you $15 001." Eoff langhingly tnrned to Mr. Winters and said: "So that the sale shall not he broken off, I will pay the $1 and you pay the $15,000," which was immediately done.

After the memorable race at Patterson, Norfolk was shipped on the 13th of Jnly, there being a half dozen in the party all together who came out with the horse, among the number heing Richard Havey, who ie now one of the trainers in the trotting department at Palo Alto. Havey had ridden an entry in the Derby, and after its concluaion was hired hy Mr. Wintere to come to thie coast. The voyage was a very had one, and there were many on board who fancied they would never see land again. Thirty-two days were consumed on the trip, Norfolk landing in tolerably fair condition.

Sometime after the return of Mr. Winters to California, two match races were arranged hetween he and Mr. Bryan, Mr. Bryan naming Lodi and Mr. Winters naming Norfolk. The races was made for $1,000 a side each, and J. M. Daniele, who was the superintendent of the Ocean Honee Race Course, added $2,500 to oach of the events, the first of which was to be two mile heats, while the second one wae to he three-mile heats. The races were announced to take place on Tuesday and Satnrday. May 23d and 27th, 1865; the intervening days being filled up with an excellent programme of running events. There was a strong feeling existing between the friends of Bryan and Winters; so mnch eo, in fact, that people traveled from all over the State to witness the contests for superiority.

On the first day the old Ocean House Course was crowded to its ntmost capacity. Mr. Winters having gone out in the early morning, left his wife and family to follow along later in the day. When Mrs. Winters appeared at the entrance, the gatekeepers made her pay for admission, notwithstanding the fact that she announced who ehe was. After the sensational race of the day, which terminated in victory for Norfolk, Mrs. Winters told her husband of what had happoned, and he immediately withdrew his horses and attendants from the track and paid forfeit to Mr. Bryan on the second race, feeling mnch incensed at the actions of the officials in denying his family free entrance. Shortly afterwards a fresh match was arranged at three miles and repeat, the race taking place later in the year at Sacramento. Again wae Norfolk victorions, and Mr. Bryan threw up the sponge, acknowledging the snpremacy of the Kentncky-hred colt This was the last appearance of Norfolk in any race, Mr. Winters relegating him to the stnd. What his snccesses have heen is so well known to our readers that it does not need recapitolation, enffice it to eay that his happiest nick wae with Marion, daughter of Malcolm, ehe having produced to his cover the following horses, many of whom have been known throughout the length and breadth of the land for their wonderful speed and great endurance. 1877, hay filly sold and eent to Oregon; 1878, Dnke of Norfolk; 1879, Duchess nf Norfolk; 1881, Prince of Norfolk; 1883, King of Norfolk; 1884, Queen of Norfolk; 1885, Emperor of Norfolk; 1886, Czar of Norfolk; 1887, El Rio Rey; 1888 Rey del Rey.

The pedigree of the deceased horse is hercwith given:

Norfolk hy Lexington.
First dam Novice hy Imp. Glenooe.
Secoud dam Chloe Anderson by Rodolph.
Third dam Belle Anderson by William of Transport.
Fourth dam Bntterfly by Sumpter.
Fifth dam hy imp. Buzzard.
Sixth dam by Dandridge's Fearnought.
Seventh dam by imp. Janus, etc.

To Lead a Colt Side of a Cart.

Pnt a halter on the colt and halter break it. Harness a gentle horse in a cart. Procnre a slender stick like a broom handle—(the spront of a willow, locnst, or elm, is as good) abont 4½ feet long; nse it as a jockey etick. Fasten one end with a thong of bnck-skin to the colt'e halter at the chin. Make the other end fast to the center of the breast plate of the harness. Then fasten a long strap or cord to the halter at the chin, and tie the end back so that it will hold the colt ahout abreast of the horse. The jockey stick will hold the colt off from the horse abont four feet. The strap will hold him from going in front. Start the horee off in a walk. If the colt fails to come up to place touch him np with a whip. In five minntes the colt will trot along side of the horse, more or lese agreeable to yon as he is well or otherwise broken to halter or as he likes the company of the horse. Yon can tnrn either way without danger. After you have tried it you will say it is the easiest, safest and most sensible way to lead a colt, that ever was thought of. You can fasten the jockey stick to the shaft where it goes through the strap if yon prefer. Then your stick wonld answer if fonr feet long.

"Pro Publico."

THE BLOOD HORSE MEETING.

Sinfax Wins A Remarkable Race.

Nero Shows Splendid Form.

Satnrday last saw the wind up of the fall meeting of the Pacific Coast Blood Horse Association, and a right royal ending it was to fonr good day's racing. The weather wae splendid, the track was good, the attendance wae large, and in fact everything condoced to make it a day of pleasnre to those who were present.

The first event on the oard wae a continued race of five-eighths heats, one of which had heen won hy Rico on Thursday while the others had heen won hyIda Glenn. Neither in the anction pools or in the books was there very mnch business done, although the very liberal odds of $4 to $1 were posted up against Ida Glen, the hookmakers offering $25 against $100 on Rico's chances. The two horses occasioned but little delay at the starting post, Frank Du Poyster being able to get them off in splendid style; nose and nose they ran together for the entire distance down to the draw gate where Rico drew ahead and won handily, his time being 1:01. It may be well to state here that on the Thnrsday previons when the race was postponed that Rico bnrst a small blood vessel in the head, and it was to this that the loss of the second heat was attributed. There can he no question of donht bnt what if the race had been run on the same evening, Ida Glenn wonld have beaten the Rose colt. As it was, however, the two intervening days gave him ample time to rest and brought him out fit to race for a man's life.

The first race on the regular programme was for a purse of $400 for two year olds, the distance being fifteen-sixteenths of a mile. The entries were Nero and Rosebud of the Palo Alto stable; Sir Walter of the Elmwood stable; Conrad, the property of L. J. Rose; Cheerfnl, owned by the Fashion Stables, and Power, belonging to the Lone Stable. In the poole Nero and Rosebnd sold as a stable for $75; Conrad brought $25 and the field $12. Nero started in the books at $6 to $5, but was gradually beat down to $4 to $5, Conrad being listed at $3 to $1, while Sir Walter conld be had at $100 to $3. A few minutes before the race Henry Walsh said that Nero was one of the best colts that had ever been raised at Palo Alto, and that he ie a good one there can he no doubt, as when the flag fell he immediately took the lead and romped home the easiest kind of a winner, folly ten lengths ahead of the second horse, in the fairly good time of 1:35¼. The following is the

SUMMARY.

Purse $400, handicap for two year-olds. fifteen-sixteenths of a mile.
Palo Alto Stock Farm's b c Nero by Flood—Queen Bess, 108 ..... Narvaez 1
Elmwood Stable's br c Sir Walter by Nathan Coombs—Bessie, 90 (carried 5 pounds over) ..... Eavins 2
L. J. Rose's b c Conrad by Flood—Goula, 115 ..... Murphy 3
Also ran: Cheerful, 100; Power, 90; Rosebud 107.
Time, 1:35¼.

The second event on the card was the Vestal Stakes for three-year-old fillies, the Association adding $500. Muta was a very pronounced favorite in the books, selling for $2 to $5, while Mabel F. sold at $2 to $1 and Adelaide $30 to $1. Muta and Mabel F. were head and head all the way aronnd, but when within abont fifty yards of the wire Mnta was given her head and won easily by two lengths, Mabel heing hard whipped at the finish.

Tommy Morton, the jockey who received a severe fall on Lodowic on Thnrsday was able to be ont and accept the mounts on the Shippee stable, although his hand was badly swollen from the effects of a sprain. Adelaide was last, there being fnlly thirty lengths between her and the second filly. Time, 2:11¼.

SUMMARY.

The Vestal Stakes, for 3-year-old fillies (foals of 1887); $25 each, p. p., with $500 added, second to receive $100, third to save stake; closed August 15, 1888, with twenty one entries, of which five delared out. One mile and a quarter.
Palo Alto Stock Farm's ch f Muta, by Wildidle—Mutiny, 115 ..... Narvaez 1
L. U. Shippee's b f Mabel F., by Longfellow—Carrie Phillips, 115 ..... Morton 2
E. S. Paddock's b f Adelaide, by Grinstead—Victoria, 110 ..... Howson 3
Time, 2:11¼.

Probably one of the best races ever seen on the Pacific Coast and certainly one of the best ever made in the world hy a two-year-old, occnrred in the Holiday Handicap, the entrance fee being $50, the association adding $750 more. The etarters for this event were L. U. Shippee's Picnic, W. L. Appleby's Odette and Raindrop, C. Mnlkey's Sinfax; Mr. Harper's Hotspur, J. J. Dolan's Revolver, Elmwood Stable'e Nabeau and Matt Storn's Marigold. All sorts of prices were laid on the hooks, an average being Odette $8 to $5, Hotspnr $3 to $1, Sinfax $6 to $1, Picnic $10 to $1, and the others from $10 to $30 to $1. Mr. Appleby has been so extremely fortnnate with his stable this year, that the betting fraternity were not loth to put their money in on Odette, notwithstanding the fact that ehe carried the heaviest weight of the lot, 120 pounds. Considerable delay was occasioned at the post, there being a half dozen false scores before starter Du Poyster finally sent them on their jonrney. Ae the flag fell, Jackson was the first to ehow in front, with Revolver and Hotspnr close together in second position, the halance were bunched with, if any difference, Odette and Picnic in the rear; as they passed the stand for the first time, Jackson was still leading, and he remained in that position nntil a half mile had been oompleted. Turning into the hackstretch there was a scnrrying among the jockeys to secnre good places, Applehy on Odette bringing the favorite np gradnally bnt surely. At the three-quarter mile pole Jackson was still in front, with Odette a good eecond, the Shippee colors showing up in third position; Sinfax, who had little Dick Ward on his back, was ridden to orders and had kept well out of the

ruck, taking the middle of the track all the way around. As the bunch turned into the homestretch the Mulkey colors could be seen, separate and distinct by themselves, the little fellow faithfully carrying out his instructions: all came in with whip and spur, making a glorious sight gallopi g down the straight. As the drawgate was reached, Odette, Picnic and Sinfax were almost nose and nose; the light weighted two-year-old won the race by a head only, Picnic being second and Odette third. Time, 2:07½.

When it is taken into consideration that Sinfax is only two years old, the run made by him must be acknowledged as marvelous in the extreme, and unless we are very much mistaken Mr. Mulkey will have as a three year old one of the best horses in the country. The following is the

SUMMARY.

The Holiday Handicap.—For all ages; $50 each, $25 forfeit, $15 declaration, with $750 added; $100 to second, $50 to third. Weights announced on the third day of the meeting; declarations due at 5 o'clock in the afternoon the day before the race. One and a quarter miles.

C. Mulkey's b c (2) Sinfax, by Wildidle-Fostress, 90.....Ward 1
L. U. Shippee's br m (4) Picnic, by Mr Pickwick Countess, 105 .....Morton 2
W. L. Appleby's ch m (4) Odette, by Shiloh-Margary 120..Appleby 3

Also ran: Hotspur, 108, Revolver, 105, Raindrop, 102, Jackson, 110, Nabeau, 100, Marigold, 109.

Time, 2:07½.

An Owners' Handicap came next on the cerd and was pro lific of much guessing, there being a half dozen starters, the favorite turning up in Alfaretta, although Naicho B. was strongly backed by the southern contingent. Little Dick Ward, who had ridden Sinfax to victory in the former race, now had the mount on Naicho B., and from the manner in which he had ridden Sinfax there were many who were willing to back the mount of the little light weight. When the flag fell Naicho B. cut out the running, closely followed by Ida Glenn and Getaway. On the backstretch the positions of the second and third horses were reversed, Getaway making a drive for the leader but without effect. Coming down the stretch Murphy made a spurt with Alfaretta, but the best he could do was to secure second place. Naicho B. winning handily by two lengths, Evans on Initiation being third. Time, 1:42¼.

SUMMARY.

Purse $400, of which $50 to second, $25 to third; an owners' handicap for horses that have started and not won at this meeting. Weights to be named through the entry box at the time of declaring, 5 o'clock on the afternoon before the race. One mile.

J. F. Foster's ch g, 4, Naicho B. byWanderer, dam Flower Girl, 88.. .....Ward 1
T. S. Montgomery's b m, 4, Alfaretta by Wildidle, dam by Monday, 1 0 .....Murphy 2
Elmwood Stable's b f, 3, Initiation by Inauguration, dam Brown Maria, 93.....Lewis 3

Time, 1:42¼.

Also ran: Kildare, 83; Ida Glenn, 80; Getaway, 90.

The Consolation purse of seven-eighths of a mile had Kilgariff, Acclaim, Wild Oats, Forrester, Nerva, Vinco, King Hooker and Gambo as starters. Starter Du Poyster was not quite as successful in this event as he had been during the balance of the week, for when the flag fell Gambo was fully three lengths in the lead and running easy. There was no chance for the tail-enders to catch the Santa Barbara representative, however, and he won by just about the same length as he received advantage in the start. Nerva was second with Kilgariff and Forrester so close together that if there had been any third money, the owners would probably have had to divide it.

When His Ship Came in.

Harvey Warde Peck.

When our ships come in from sea,
With sails unfurled and spreading wide;
What will they bring to you and me
When anchor is cast at eventide?
Some will be laden with joy, perchance,
Some will be burdened with sorrow;
Alas! could we foretell at a glance,
How changed would be our to-morrow!

There'll come a day to you and me,
When we'll watch and wait no more;
When eyes become too dimmed to see
The distant sky or e'en the shore!
Joy and sorrow will be as one,
For the world will then be akin;
Our trouble on earth will just be done—
When our laggard ships come in!

I write the foregoing verse because I am reminded of the expression Joe always used. He was a quiet fellow, was Joe, and if one were to ask him why he did not do a certain thing, he was wont to reply:

"I will, sir, when my ship comes in!"

Now Joe had a father. I have reason to suspect that Joe was not particularly proud of his paternal parent—but one cannot help their ancestry; sometimes their ancestry does not even help them! The father was not much to look at, and people who knew him best gravely asserted that his dishonesty was beyond comparison, and they gave up hunting for his equel in that respect. Some verses, written years ago by S. Conant Foster, would, with slight change, describe him fairly well:

"No he has no education,
And his beauty took vacation
'Bout the time of his creation,
So to speak;
And upon mature reflection,
Taking each distinct bisection,
I've decided his complexion's
Rather weak.

Though in disposition simple,
On his bearded chin a dimple,
Yet he boasts a chronic pimple
On his beak;
And his voice is not reliant,
For at times it is defiant,
And at times it is a pliant
Little squeak."

There was more of the same, but this is enough to show the general tenor.

His name was Ike Condon. His boast was that nobody on earth was related to him with the exception of his own immediate family, comprising a wife and three sons. No one ever disputed Ike in this respect, for relationship with him would have been equal to social ostracism. He was rather small in stature; had small blue eyes, which usually twinkled good-humoredly, and was invariably dirty. His wife cut his hair—after a recipe of her own—he mended his own boots, and constant work kept his finger nails from growing too long. His age was a problem—he might have been fifty. He might also have been 75. There was no way of determining.

But he had one bright and shining quality. He could beat any man trading horses that ever lived! He could gear up a $50 horse and make him look worth $250. At least he could come nearer doing it than any other man I ever met. His mendacity was so great, during the last years of his life, that he has been known to buy a horse for $40; keep him thirty days; call in the same man he bought him of; strip off a couple of blankets from the horse; Jab him with a sharp stick, to make him look "pert", (as he termed it) and finally after extolling the qualities of the animal to the very skies, offer to sell him to the man for $200—at the same time remarking that his family were so fond of the horse that he could hardly force himself to let him go. At this juncture tears always filled his eyes.

I made Condon a study, for the lack of better employment, and I accounted for everything about him excepting the tears. How he accomplished this feat was for a long time more than I could fathom. Finally, quite by accident, I found out.

Whenever the proper time arrived, and he wished to make things effective, he placed a chili pepper in his mouth—which will make anybody weep, more or less, principally more.

Condon and his family lived in a well fitted traveling wagon. Here they slept, with rare exceptions, nine months of the year, and here all their earthly possessions were stored. The wagon was a remarkably good one and the team that pulled it would have made any farmer happy. Following this conveyance, as it journeyed through the country, was generally a motley of horses and mules. Sometimes some of these animals were hitched to vehicles of questionable merit, which were traded off at the first opportunity.

Condon claimed he could start out in the spring with a saddle horse and wind up the season with a pack train.

I believe he could.

But how he managed it has always been to me an impenetrable mystery.

It is not so much with the elder Condon that I wish to deal, however, as his second son, Joe. I have given a brief history of the father that the after deeds and accomplishments of his son may be the more appreciated and admired.

Joe Condon was what the world calls a nice fellow. Everybody spoke well of Joe. He was honest, reasonably smart, and never disagreed with anybody. These traits always make a man popular. Joe was known to have prevented many a trade his father had about consummated when he knew the stranger was being victimized too badly. This occasioned the old man much annoyance, which he was not slow to show. He cursed Joe roundly many times, but Joe only laughed. In reality Condon thought more of Joe than either of his other sons.

Condon traveled over the northern part of this State for several years and occasionally made a flying trip to San Francisco. In his day and generation Ike picked up several broken down trotters, which he patched up—at which process he was an adept—and managed to win several races in out of the way places, landing sometimes quite a bit of money, when, in fact, the ruralists thought they had an easy thing. On these occasions Joe always drove and his superior ability and judgment was due the victory on more than one country track. Ben, the oldest son, essayed to drive one race. His failure was so complete that his father, in speaking of the matter to friend, said:

"Ben's a right good boy. He kin judge a muel better'n I kin myself, but as fer drivin' a trottin' hoss—why! he can't even drive sheep through a gap."

From that time on Joe drove and Ben traded mules.

After all, it was a sort of easy, roving life they led. They journeyed from place to place—now a country hamlet, and then a wayside inn—loitering as long as business was reasonably brisk and the opportunity of turning an honest (?) dollar apparent.

One afternoon in September, 1882, I was standing in the door way of a country tavern in Mendocino Co. It was one of those old fashioned hostelries that are fast fading away, and are now no longer found without considerable search. It was a curious little town with narrow crooked streets. On the principal thoroughfare locust trees outlined the street, having been planted about five feet from the walls of the houses, which rose in one story grandeur from the inner edge of the sidewalk. They had grown to immense size, their skeleton arms being interlocked. The sidewalks were hard ground, swept clean. The day had been warm for autumn. As I stood in the door way the sun was sinking behind the western hills. The inhabitants were sitting on the sidewalks under the trees, some of them with their chairs tilted; their hats over their noses, their eyes peering out beneath the brim at the setting sun. Two or three teams were hitched to the trees; the horses were drowsing, the occasional swing of their tails being the only thing about them that denoted life. Of business there seemed none. Everything and everybody might have been a realistic exhibition of wax works. It was a perfect autumn day—in a perfectly primitive country town.

As the last glimmering rays of the god of day fell athwart the moss grown roofs and filtered through the spreading branches of the locust trees, Ike Condon, the redoubtable Isaac himself, drove up the quiet street. As it happened he had never visited the town before, and the residents awoke from their Rip Van Winkle doze with a start and the sudden consciousness that something new had come to town.

As Condon and his cavalcade drew up in the road way, the men on the sidewalk arose solemnly, adjusted their hats, wiggled themselves a little (so that their trousers would not appear over five inches too short) and went out too greet him. Some of them, without even addressing the Condon party, at once began to pry open the mouths and systematically feel the legs of every horse in the gang, the while making remarks which they considered conclusive.

The average country horseman is a wise man. While on his favorite topic, he constantly wears the expression of countenance which plainly says "Solomon, I have surpassed thee."

But Condon was used to this. He answered all questions good-naturedly and before sundown of the next day had made some trades, that, sometime afterwards, caused the men he left behind him sincere regret.

The most notable feature of his visit, however, was the race he made with a resident of the town. This affair caused Condon's photograph to hang on Memory's Wall for many a day. I will call the resident Jones as he may still live there. If I mentioned his real name he might send me a challenge to fight him. There have been just as good men as he named Jones, so the name will not disgrace him.

Jones was a great horseman. To be sure nobody ever heard about him outside his own town, but the people of his sleepy village heard of him many a time and oft, and they marvelled that Jones should know so much. In point of fact, what he did not know about horses and horsey things in general would fill a large volume. What he did know he carried with him, much as an Indian does his wardrobe—all on the inside. Like the latter it would not bear much investigation. Then again, his carrying capacity was small! Nevertheless Jones had high aspirations. He had heard when a boy at school the well worn aphorism "aim at the clouds." This was presumably about the only event in his schoolastic career that he could recall in after life.

Jones had a horse that he had obtained in Portland, Oregon, from a man by the name of Andrew Bryant. This horse had a record of 2:31¼ and could trot a mile at that time in about 2:45. To see Jones drive this horse at his best clip was worth going 700 miles to witness. The wild yells he gave utterance to on these occasions would have frozen the blood of the Comache brave and caused him to draw his blanket close about him. The inhabitants, though, looked upon these exhibitions with secret admiration. They believed, with Jones, that Jupiter (the horse) was the fastest animal upon earth, and Jones one of the greatest drivers. If ever they had read of faster time being made than Jupiter could show, they had forgotten the circumstances, and anyway, it would not have shaken their allegiance to Jupiter. The Musselman, in spite of every obstacle, believes firmly that "Allah is Allah, and Mehomet is his prophet!" So these people believed that Jupiter was Jupiter and Jones was his prophet.

This suited Jones and Jupiter both.

Previous to Condon's arrival, Jones had made two races with some neighboring horsemen, and his horse had won them both. Thus his townsmen were firmly convinced that he was invincible.

The manner in which the race came about was as follows:

During Jones' peregrinations among Condon's horses, he found a rather dilapidated bay gelding tied behind the big wagon. The horse had been fired with a feathering iron and the scars were plainly visible. Then the legs had "filled" until they were almost round. This awakened Jones' curiosity, and he asked Condon many questions about the horse, among others what the horse was good for, anyway? Condon replied that the horse had some speed and was a good road horse. At last Jones bantered him for a race, and with much apparent reluctance Condon consented to a match for $200 a side, half mile heats. The race was trotted over a straight half-mile course that had been built for runners years ago.

I went to the race. The residents bet all they had. Of course Condon's horse won easy enough. Jones kicked very hard, alleging that his horse was "up agin St. Julien."

The race cast a certain amount of gloom over the community for a month or more. Jones' lamentations were louder than those of the Arab sheik, before his tent in the desert, upon the death of his favorite mare.

This was the first race I ever saw Joe Condon drive. His natural ability as a driver was very apparent, even behind a skate. I said to him after the last heat:

"You ought to get a good horse to work on, Joe!"

He was absent-mindedly watching Jones, who was vociferously explaining to a small group just how it all came about. He smiled as he answered:

"I will—when my ship comes in!"

The Condon Sr. gathered in his skekels and general assortment of stuff he had won on the race and departed, followed by the maledictions of the crowd.

* * * * * * *

In the spring of 1883, a gentleman named Cameron sent a drove of horses from Oregon to this State. With the band were several colts of all ages. Most of the horses were half wild, having been raised on the range. There were a few very good mares, however, with the band. One of these mares foaled a good looking bay filly while on the way, and just this side the Oregon line the little one became too footsore to go further. The two drivers, seeking only their own comfort, left the little foal by the roadside and, despite the dam's protests, drove her on with the band, camping for the night many miles away.

The Condons' came over the road the next day and Joe found the youngster. He searched in vain for a mother and at last concluded the colt had been lost. He half pushed and half carried his prize to the spot where the wagons were drawn up and where the family were partaking of cold lunch.

They all laughed, excepting the father, when Joe said he was going to raise the colt in case he found no owner. The old man, whose pursuit of the nimble nickle was constant and unobtrusive, assured Joe that "the plagaey thing 'ud cost more'n it ever'd come to." Joe gave little heed to this, but bought cow's milk from the farmers *en route* and fed the filly liberally.

For a week the three sons picked up the filly bodily and put her in one of the wagons whenever a move was made, after which she was able to travel.

Joe inquired, conscientiously, along the road, but of course found no owner of the filly.

* * * * *

The month of June 1886 was ushered in with buds and balls and roses. The young lady of society recited Jean Ingelow's "When Sparrows Build" and the budding prima donna rendered "That day in June." All nature smiled.

In a town about 60 miles from San Francisco there occurred a three-year-old race that has passed into equine history as one of the great events. It was a match for $1,000 a side, mile heats 3 in 5, the loser to get 25 per cent of the gate money. The entries were two, and only two, but they made a great contest. People came from all over the state to witness the race, and they went away satisfied. About 40 per cent of the attendance was from San Francisco. The event reminded me strongly of the Alexander—Button—Romero race that took place at Santa Rosain 1881. It was anybody's race up to the last fifty yards of the fourth heat. The entries and summary were as follows:

SUMMARY.

Joe Condon's b f Accident.....Condon 1 1 2 1
J. L. Bronson's g c Wayward .....Neil 2 2 1 2

Time, 2:32½, 2:31 2:30½. 2:27¼.

This was the little foal that Joe found near the Oregon line!

The contigent from the metropolis hacked the grey colt, as if he were a sure thing, while the country folks piled up their cash on the filly. It was the best betting race I have ever seen in the country. The only reason every one present didn't bet more than they did was because they did not have any more money and couldn't get it! The result of this race caused the final defalcation of a man quite well known in this State.

Just before this race took place, Joe Condon had ascertained the facts in the case regarding the ownership of the little filly. It was a hard struggle for him for some time, but at last he made up his mind to do the right thing. He wrote to Mr. Cameron, detailed everything, his manner of finding the colt; the way he reared her, not even keeping back the speed she had. When he posted the letter his heart sank, for, aside from the value of the mare, she was very dear to Joe. Luckily, Cameron was a man of wealth, and moreover, was endowed with good judgment and considerable generosity. Appreciating the amount of labor Joe had spent upon the mare, he wrote to him, commending his integrity in the highest terms, and wound up by presenting him with any interest he might retain in her. A very graceful act..

To-day, Joe is a trainer for an Eastern stock farm, and is highly esteemed by all who know him, and their name is legion.

Only his name isn't Condon!
Nor his first name Joe!
Nor the filly's name Accident!
But his ship came in!
At last!

TURF AND TRACK.

Filemaker, 7 ft. 2½, is again the champion high jumper.

Ab. Stemler left with the Shippee stable for Sacramento last Tuesday.

C. H. Nelson will campaign Dictator Chief in addition to Nelson next season.

Sidney Ashe will take the two-year-old colt Judge Terry down to Coronado for the Winter re-union.

Mr. Ben Johnson, the new owner of Pancoast, says that the great stallion has already twenty-two mares booked to him.

Phil Siebenthaler and Matt Storn left for Sacramento on Tuesday afternoon with their horses; they will winter at Agricultural Park.

Imported St. Blaise heads the list of winning sires this year. Potomac, $78,650, was the principal contributor to the $163,060 won by St. Blaise's sons and daughters.

J. B. Haggin's imported Sir Modred stands second on the list of winning sires. Tournament, whose winnings are just $5 short of $100,000, heads the list of his produce.

Jack, the gray gelding who last year wintered at Fresno, will this year winter in Kentucky under Crit Davis' charge. General Turner will winter his horses at Philadelphia.

B. C. Holly soon made a profit on Zingerella, for half an hour after he purchased her for $1,000 at auction, he sold her at an advance of $100 to M. A. Foster, Los Angeles.

The Terra Haute Trotting Association is in a very flourishing state and the grounds are being improved and beautified, while every thing else is being done to ensure a lasting success.

Dunton's Spirit of the Turf, in its issue of the 27th, has as a frontispiece the tabulated pedigree of the crack yearling Freedom 2:29¾, under the head line of "Blood That Trots Early.

The Palo Alto two year old Nero won his race last Saturday in clever style while Muta in a hood and with her ears stuffed always held Mabel F safe in the Vestal Stakes the race being very slow.

Navidad, the four-year-old gelding taken East by Marvin and sold to John Splan, was turned out at Lexington the other day; he is expected to be an important factor in the 2:23 class next season.

The Fresno race track is said to be in grand trim. Frank Wickersham, by the way, is still the king of the track with his green horse Aleck, who can any time make a trip round the track in 2:24 or better.

Yuri, bay colt, two years old, by Lord Russell, dam Yolande, by Belmont H, dam Young Portia, by Mambrino Chief, has been sold by the Woodburn Farm to W. K. Pruden, Lansing, Mich., for a big price.

W. H. Wilson, Cynthiana, has purchased from Messrs. Smith and Reynolds, Los Angeles, the black stallion Del Moor, foaled 1882, by Del Sur, dam Georgiana, dam of La Grange 2:23½, by Overland, Son of Bald Chief.

G. Watter's Gambo, P. Dornslech's Dan M. Murphy and Naicho B., H. D Miller's Ida Glenn and M. A. Foster's Zingarella went to Los Angeles last Monday and will go from from there to Coronado for the winter meeting.

It will be remembered that R. S. Veech, Indian Hill, Kentucky, sent twenty mares to Axtell last Spring seventeen of them are known to be in foal, and two mares at the same farm but owned by other parties are also in foal to Axtell.

The Santa Clara Valley Agricultural Society have ploughed up their track and are reclaying it. It is confidently asserted that they have discovered the best top dressing on earth, and that next season the San Jose track will be the equal of any in America.

There will be great opportunity to purchased some grandly bred brood mares at the Belmont sale, if it takes place, for the late proprietor spared neiher time or money and succeeded in gathering together a splendid collection of imported and native mares.

It is said that the famous pacer Little Brown Jug, 2:11¾, who was sold a few weeks ago for $250 and shipped to St. Johns, New Brunswick, was there seized by the customs authorities for undervaluation, being declared to have been purchased for $100.

Several of the racing contigent, who took in the Reno and Carson races after the State Fair observed Sir Walter's good running behind Black Bart, and made a good winning on Sir Walter last Saturday, the principal winner was By Holly who was $400 ahead on the race.

Niagara, the well known race horse, has at last broken down. He was a great weight carrier and won many good races on the Eastern track. He is a full brother to the erratic Jackson who astonished his friends the other day by beating Applause after a hard race.

The new race track built at Modesto by the Stanislaus Stock Breeders' Association is getting into good trim, and several horsemen have signified their intention of wintering there, prominent among them being W. M. Houser, the well known Stockton trainer and driver.

George Starr left last Thursday morning for Louisville, Kentucky, with a car load of weanlings, and three mares from the San Mateo Stock Farm and also took imported Cheviot on the car. James Kerrigan who went along with Cheviot will take him from Louisville to Fairview, Gallatin, Tennessee,

Sternberg, the crack Kentucky three-year old trotter, sold for $450 as a yearling, and this was considered a good price at that time for a colt by a horse that was practically untried in the stud. An offer of $15,000 was recently refused for him. He ought to give the four-year-old stallion record a close rub next season.

D. A. Harris, the owner of the jumper Filemaker, is desirous of matching his horse against Moorehouse & Pepper's mare, Maud. Harris says he will match the old horse against Moorehouse & Pepper's entire stable, including Roseberry, for $1,000 a side and two thirds of the gate receipts, in any place in the United States.

Moss Ross recently purchased by Mr. Valensin, arrived at the Valensin Stock Farm last week. She is a grandly bred three year old filly by Anteeo 2:16½, dam by Nutwood 2:18¾, grand dam by Bell Alta from a Taylor mare. The filly who was second in the Occident Stake at Sacramento will be bred to Sidney and given a record next season.

The Nashville Jockey Club is a paying investment. The track cost something like $5,000 to construct, a great deal of filling being necessary, and the land about the same amount of money. G W. White, the president, and C. H. Gillock, the secretary, are the controlling stockholders, and such has been the rise in real estate that the land would to-day sell for $600,000.

George Starr says that Axtell, the King, is sound as a bell. He had a slight enlargement just above the ankle on his fore-leg, but it has entirely disappeared and he was never lame on it, his hocks which are by many people said to be very curby, are said by Mr. Starr to be nothing of the kind, the side bone being rather prominent, but otherwise his legs are particularly clean.

The chestnut colt Auburndale foaled 1887, by Harry O'Fallon, dam Little Nell, by King Lear, granddam Finance, by Leamington, recently won the City Council Stake at the Peralville course, City of Mexico, Mexico. Auburndale was bred by Engleman & Fields and sold to Mr. Hamilton, Mt. Sterling, Ky., who presented him to his friend Lic Francisco, Alfara, Mexico.

A. Stemler, last Saturday, purchased from R. P. Ashe the seven year old chestnut mare, Minnet, by Norfolk from Neapolitan by War Dance grand dam Eliza Davis by imported Knight of St. George out of imported Melrose. $1000 was the price paid for the well bred mare who is the dam of Zingerella, her second foal. She was bred to imported Mariner but is not thought to be in foal.

W. Forsyth has purchased from S. N. Straube two highly bred trotting fillies, viz, Elise, a two year-old bay filly by Clovis 4909, from Ida Davis by Belnor; Elise won the Straube stakes and the Visalia stakes this year. Poplar Girl, a bay yearling by Clovis, from Ella by Red Cloud. Price for the two is reported to be $2,000.

The Shah of Persia has started a race course at Teheran. His majesty is himself senior steward, keeper of the match book, clerk of the course and scales, judge and handicapper. Whenever he has a bet he places two guards with drawn scimitars besides the bookmaker. The Shah won't take less than 20 to 1 about anything and the layer invariably pays out whatever wins.

Dr. F. E. Corrigan, Quindaro Stud, Louisville, Ky., has purchased from R. W. McClelland, Westport, Ky., the chestnut filly, foaled 1889, by Vigil, dam Christina, by King Alfonso; and sold to R Tucker, Louisville, Ky., the bay yearling filly by Little Ruffin, dam Florence D. by Longfellow, and the bay yearling filly by Little Ruffin, dam Fanny Willoughby by Ten Broeck.

W. L. Appleby left for Los Angeles this week with Raindrop, Odette, Conrad and Rico. With the exception of Raindrop the horses were very successful at the Blood Horse meeting and they will winter at Los Angeles. Raindrop will run at Coronado this winter and will probably be bred in the spring to Argyle. Appleby, who has been the most successful trainer on the Pacific Coast last season, will go east next year in charge of the Rose stable.

Mayor Nolan, who in conjunction with J. Campbell has been the proprietor of the Beverwyck Stable, has sold his interest to the latter, so that Campbell is now the sole owner. The reason for this dissolution is on account of Mayor Nolan going abroad, and as his absence will be a protracted one, he considered it best not to be hampered with the responsibility of having such a large string of horses.

An epidemic has spread among the horses in town says the Sacramento Record Union, and so rapidly as to cause considerable alarm. The disease is similar to nasal catarrh, which, if allowed to run, sometimes results in glanders, and compels the owner to kill the afflicted animal.

It is thought the disease was made epidemic through drivers allowing their horses to drink at different watering troughs about town. Nearly all the Buffalo Brewing Company's valuable horses are affected, besides many other delivery horses.

Jackson I. Case was presented with three great mares by his father, J. I. Case, of Racine, Wis, recently, the occasion being young Mr. Case's birthday. The mares were Mr. Salisbury's old favorite, Echora, 2:23¾ (dam of Direct, 2:18¼), by Echo, in foal to Phallas, 2:13¾; Victoria Sprague by Gov. Sprague, 2:20½, in foal to the same sire, and Gulnare by Princeps, dam a sister to Huntress, 2:20¾, in foal to Guy Wilkes, 2:15½.

Corporation papers of the Arab, Anglo-Arab and Clay Stock Farm have been filed in the Queens County Clerk's office, at Jamaica. The capital stock is $75,000, divided into 150 shares at $500 each, and the object of the organization, which is for fifty years, is the breeding and selling of horses of the Arab, Anglo-Arab and Clay breeds. The stock farm will be at Oyster Bay, and Messrs. Randolph Huntington, Louis V. Bell, Edward F. Baker Francis H. Weeks and Oliver L. Jones are named as Trustees for the first year.

The new rules passed by the American Turf Congress are:

Rule 41. The collection of forfeits shall be limited to those issued by members of the Turf Congress in stakes run upon their respective courses.

Rule 42. When a forfeit order has been lodged for collection against a starter and withdrawn before the race, it shall no longer be collectable through the secretary of any course.

Rule 106 was amended to read: "Rulings of associations not members of the Turf Congress, shall not be regarded, except in cases of fraud.

Through a representative in Nashville, D. T. Pulsifer, the owner of Tenny, has been negotiating for the purchase of the three year-old, Guido, who recently won the Dallas (Texas) Derby, and has shown winning form of high order in Nashville. The price asked, however,—$10,000—has prevented the colt thus far from changing hands. He is by Double Cross, a son of Malcom, the sire of the dam of El Rio Rey, from Aurora by Thad Stevens, and as a two-year-old was a creditable winner, and also ran two good seconds to the crack Racine.

A week ago last Thursday, Sunol left Palo Alto en route for New York, but by the time she got to San Jose a telegram was sent on to stop her, and after spending Thursday and Friday in that picturesque town, she returned to Palo Alto. It seems that Senator Stanford had telegraphed to Mr. Bonner several times, receiving no answer, and that consequently Marvin started out with her. Mr. Bonner, however, had decided to let her stay in California, and the telegram arrived on Wednesday night, but was not delivered until after Marvin's departure.

One of the features of the late Blood Horse meeting was the great mile and a quarter, run by Sinfax, the two-year-old being admirably ridden by little Dick Ward, who just got him to the front on the post. Too much praise cannot be given to Mulkey for the grand trim in which he brought his two-year-old to the post, and the feat is all the greater when one recollects that previous to his last race he had run sixteen times and travelled all through Montana, winning in all fourteen races this year, and going into winter quarters with as clean legs as any horse in America.

N. I. Baldwin, the energetic and popular secretary of the Fresno Fair Ground's Association, resigned his position, his other business duties requiring all his attention, and at a meeting of the Directors last Saturday, a very efficient substitute was nominated in J. M. Reuck, who was unanimously elected. Mr. Reuck, who is very popular with all visitors to Fresno, has for some time been secretary of the Driving Park Club, is also the editor and propriator of the Fresno Turf, and being favorably known by all horsemen who visit Fresno as one of the most courteous, considerate gentleman in the horse business, he should prove to be the right man in the right place.

George H. Engeman, President of the Brighton Beach and Clifton Racing Associations, has leased the track of the Buffalo, N. Y., Driving Park Association, and will give two running meetings over that track next season. The first meeting will be in June, and be of ten days duration, while the second will be during the last half of Septsmber, and will be of the same duration as the first. Mr. Engeman has been identified with the running turf for many years, and was the first to introduce the now popular winter racing in the vicinity of New York. He will be assisted in the management of the Buffalo meetings by his secretary, A. H. Battersby, a very popular young racing manager of the East.

The annual meeting of the Trotting Breeders' Association was held in Lexington last week. A majority of the members were present. The reports of the President and Secretary showed the association to be in a prosperous condition. The association is out of debt and has $8046 80 to its credit. The election of officers resulted as follows: President, P. P. Johnston; vice-President, H. C. McDowell; second vice-President, R. G. Stone. Directors, R, S. Strader, W. J. Brasfield, R. P. Todhunter, E.W Shanklin and T. C. Anglin. Mr. E. A Tipton was re-elected Secretary for a term of three years. The association decided to give a Futurity Stake, the stake to be $25,000.

Santa Anita Stables have, during the last two years, experienced a good deal of hard luck. Broodmares which cannot be replaced have died; race horses have broken down and others died, but still the few remaining ones did yeoman service, and none better than Sinaloa II., who won seven high class races out of eleven this season; the three-year-old filly is a half sister to the famous Lucky B, and is wintering at Morris Park with the rest of the Santa Anita horses. Last Tuesday a telegram was received that she was down with lung fever, which will probably end her racing career even if life is saved, for it is hardly ever a horse that has had that complaint is any good for racing purposes.

The work on the improvements to the Saratoga track is being pushed forward as rapidly as possible. The new land which was purchased of ex-Mayor Nolan has been added, and the track will be widened all the way round, especially at the turns. The straightaway is to be widened and lengthened so that the two-year-old races will be run on a straight track. The buildings which are to be erected will all be very great improvements over the old ones. The grand stand which is to be built on the site of the present field stand will be large and roomy. A cozy club house is to be put up and the betting ring will be a substantial structure. A paddock is to be added to the track. All these improvements will be made in time for the opening of races next July.

Last Saturday, at the Bay District track, Messrs. Killip & Chase sold at auction the following thoroughbred horses, the property of R. P. Ashe: Garnett, a two-year-old chestnut gelding by Big Sandy, out of Termagant by imp. Great Tom, bought by A. Y. Stephenson for $60; a yearling colt by Ed Corrigan from Lilly Ashe, bought by Mr. Chase for $110; Fanny D., a sixteen-year-old sister to Cousin Peggy, dam of Geraldine, in foal to Alta, was bought by A. T. Bennett, for $200; Lilly Ashe, a twelve-year-old mare by Joe Daniels, from Reveille by Woodburn, sold to Stone & Co. for $85; Zingarella, a good looking chestnut filly two years old by Ed Corrigan, from Minnet, was purchased by B. C. Holly for $1,000. She is a racy looking chestnut, having started twice this year and only beaten a head each time, by Tearless at the late Blood Horse meeting, and by Mystery at Los Angeles.

Somebody has been interviewing Isaac Murphy at Lexington, and in the course of a conversation the noted jockey is quoted as follows: "Probably the hardest horse I ever rode," says Isaac, "was old Lucky B Many times have I ridden him when I fairly screamed with pain from the strong pull he had with his head. He was strong enough to almost pull the arms of a man from the socket. Whom do I think was the best horse that I ever rode?" Well, that is a hard question to answer. When you look over the list of such ones as Salvator, Kingston, Firenzi, Emperor of Norfolk, Freeland, Modesty, Leonatus and Falsetto, it would be hard to tell. Probably Salvator would head the list. Why, he has carried me so fast that it almost took my breath away. Then there was Leonatus, whom no one knew how fast he could go, and Emperor of Norfolk who was the king of his time."

E. H. Donglass, Grand View Farm, Franklin, Tenn., has purchased, from Lamasney Bros., the hay horse Rowland, foaled 1868, by Shannon, dam Riglin hy imported Glengarry, out of Rigmarole by imported Australian, out of Rescue by Berthune ont of Alice Carneal, the dam of Lexington. Rowland will be put in the stud.

Senator Hearst last week told me that he proposed weeding out a lot of his horses in training, bnt at present he has no intention of giving up racing. The Senator has had a little lnck lately in his racing ventnres, and being one of the most popular racing man in America as well as one of the most liberal; it is to be hoped he will adhere to his determination.

Young Phil Dwyer will in future superintend the horses of his father's string. The training for the two brothers, now that they have dissolved partnership, will be assigned to Hardy Campbell and Ed. McGarry. Frank McCabe, it is understood, will train a few horses for himself. He has been greatly instrumental in the success of the red and blue sash, and few men have more friends and admirers.

The Guttenburg track was the pioneer of winter racing in New Jersey, opening in 1885 with about one hundred horses as material, a grand stand that crammed, only held about 600 people, no hookmakers and other arrangements correspondingly primitive. Now 700 horses on the grounds, a stand accommodating 5,000 persons, and one hundred hookmakers applying for stands, attest the progress made in five years.

While the late August Belmont in recent years had taken great pride in Raceland, Prince Royal and Potomac, he, it is said, probably cared more for his two famous mares, Sultana and Olitipa, than any animals he ever owned. The latter was the only racer who ever ran half a mile on a circular track as fast as 0:47¾, which she recorded at Saratoga in 1873, and two years after ran in that memorable dead heat race between Springbok and Preakness for the Saratoga Cnp, together with Grinstead, Rutherford and Aaron Pennington, the best cup field of the last 20 yeare.

R. Havey, the well known trotting horse driver, has severed hie connection with Palo Alto. Havey took charge of the Palo Alto trotting department when Marvin went East, and with a small stable, being only present at three or four of the meetings; he gave all hut one of his horses records, the best known ones being Electricity 2:22, Susette 2:23¼, Coral, three year old, 2:25, Ladywell 2:25, and Lanra C. 2:29¼. A very good showing for any one, and Mr. Havey proved several times that he was the neer of snyone in the snlky. It was understood that when he went to Palo Alto that his engagement was to last nntil Marvin's return, hut at Mr. Lathrop's request he stayed up to the present time, as Marvin was expected to go East with Sunol. We suppose that now the erstwhile rider of Norfolk will he in still greater demand, and already several prominent breeders and owners in the southern portion of the State have made overtures to him, but at present he has made no arrangements for next season

The Napoleons of turf finances, says an Exchange speaking of bookmakers, have various ways of manipulating the market. Many of them own or control horses, and their management of these is quite as shrewd as is their method of buelness in the ring. Many peop'e think thst by watching the odds in particular books they can ascertain stable policy with regard to certain horses. Sometimes it may be possible to do so, but oftener by following snch a course one is liable to get the worst of it. In other words, it is almost impossible to tell when a smart penciller is laying legitimate odds and when he is bluffing. They are the shrewdest man—agers of race horses on the turf. They torm combinations employ certain jockeys and certain trainers. Whatever their plan may be, it is pursued until the pnblic gets on. Then the scheme is dropped and another one devised. Meanwhile the public keeps on following the old lead, while the bookies gently murmur to themselves; "It used to be the caper, but it don't go now.

Some of the causes brought before the turf congress reminds us of some of the cases in Judge Gaslin's court some years ago, says Dunton's Spirit. These were three important cases—one of a murderer, one of an embezzler. and one of a harmless looking youth accused of stealing a pony. The evidence in the case of the murderer was explicit. There was no doubt of his guilt, but the jury, after being out for a few minutes, reported that there was no canse for action. The Judge looked astonished and disgusted, bnt dismissed the prisoner as in duty bonnd. The next was that of the embezzler. The evidence was equally clear in this, but another verdict of not guilty was brought in. The Judge's disgust deepened as he polled the jury and dismissed the defendant. When the boy's case came it was shown quite clearly that the prosecution was malicions, and that there was no cause for accnsation, bnt the jury, almost without leaving the box, declared him gnilty. This capped the climax, and the indignation of the Judge rose to fever heat. Turning to the jury he thnndered: "Gentlemen, you have turned a cold blooded murderer and a guilty embezzler loose npon the oommunity. I shall follow the precedent yon have set and turn loose an innocent horse thief. Young man, you can go!" And the youth went. We have a similar instance before one of the board of appeals in our mind.

That well known Montana weekly the Rocky Mountain Husbandman says: A destructive disease having appeared among the horses on East Smith river, we wrote a note to Dr. Christie inquiring ahont it, and he replied as follows:

"On the 17th of this month I was sent for to attend a stallion belonging to Stubbs & Wheeler, Lake Creek, supposed to be choked. On arrival at the place, about eight miles from the Springs, before I saw the patient I heard a noise proceeding from the stable dne to stertorous breathing. I said at once that we had not an ordinary case of ohoking to deal with. When I saw the animal with its head extended and saliva flowing from the mouth, also a discharge from the nose and eyes, and œdema of the depending parts of the head and had the greatest difficnlty in performing the act of respiration, I at once inserted a tracheotomy tube which gave relief in fifteen or twenty minutes. I ordered the animal isolated. Returning on the 19th I tonnd the animal much improved, but finding four more affected advised same treattreatment for all of them and at last accounts all were getting well. They say they have lost several horses from the same disease, but never knew what to do for it. They also state there are a great many on the ranges affected the same way. The name of the disease is Œdematous Laryngitis—inflammation of the throat."

Allie Wilkes, 2:24½, bay stallion, eight years old, by Red Wilkes, dam Alex. by Allie West, son of Almont, has been purchased by W. C. France & Co. of Stanhope Brothers, Kinsman, Ohio, for $20,000. He will he placed in the stud.

Sunol, by Electioneer, was 3 years, 6 months and 24 days old when she made her record of 2:10½ Axtell, by William L. was 3 years, 6 months and 10 days old when he made his record of 2:12. Lillian Wilkes, hy Gny Wilkes, was 3 years, 5 months and 21 days old when she made her record of 2:17¾. Sahle Wilkes, by Guy Wilkes, was 3 years, 8 months and 5 days old when he made his record of 2.18. Allerton, by Jay Bird, was 3 years, 4 months and 7 days old when he made his record of 2:18¼. Fanst, by Florida, was 3 years, 3 months and 5 days old when he made his record of 2:18¼. Bell Boy by Electioneer, was 3 years, 8 months and 7 days old when he made his record of 2:19½. Hinda Rose, by Electioneer, was 3 years, 7 months and 27 days old when she made her record of 2:19½. Patron, by Pancoast, was 6 years, 1 mouth and 1 day old when he made his record of 2:14¼ Houri, by Onward, was 6 years, 5 months and 16 days old when she made her record of 2:17. Don Pizarro, by Gambetta, was 3 years, 2 months and 20 days old when he made his record of 2:14¾. The great yearling, Freedom, hy Sahle Wilkes, 2:18, was 1 year, 6 months and 16 days old when he made his yearling record of 2:29¾. Norlaine was 1 year. 9 months and 27 days old when she made her yearling record of 2:31½,

An old subscriber of the Canadian Sportsman has written to that paper asking whether there ever was a *thoroughbred* horse in Canada that gave evidence of being able to trot a mile in four minntes. The editor of that well known sporting jonrnal says: Now a qnestion of that kind is somewhat difficult to answer in a satisfactory manner because I cannot produce any official proof that any thoroughbred horse in Canada ever did trot a mile in that time. If any bet has been made on the matter it should be drawn on account of the difficulty alluded to, but I have no hesitation in telling my old time friend that I remember a thoronghbred horse bred and owned for many years in Ontario that could not only beat four minutes but could dust three minutes, I allude to the bay stallion Rathowen, that not only won the Dominion Plate at Whitby in 1871, but aleo won many other good races on the flat. Along with the late Billy Bookless, who at one time had an interest in the horse, I held the watch on him when he trotted an indifferent mile track in 3:20 and a year or two after he had been taken over to Buffalo, he trotted the track there in close to 2:50. He had the best trotting action of any thoronghbred horse I ever saw.

Mr. Caldwell will probably never again drop the starter's flag at the Linden Park track. Angered by the action of Mr. Appleby on the 17th in paying the fines imposed on the jockeys, he the next day failed to appear at the track and carry out his contract to start the racers dnring the meeting of the Linden Park Blood Horse Association. This left the latter in a very embarrassing position for a time, but William Lakeland, who is acting as the starter at the Clifton track, was on the grounds, and his services were at once secured. He filled the gap in a thoronghly satisfactory manner, getting all the fields off in good shape.

Mr. Caldwell's action called for a vast amount of pretty severe criticism because he had not carried out his engagement with the association, and incidentally with the public, who had expected him to start. While he was undoubtedly right in his stand taken at first, that the unruly urchins who call themselves jockeys should have been compelled to pay their own fines, his position later seems to be wrong in that he disappointed the club and the public, for he still had a remedy in his hands. He could have started and could have punished disobedient boys hy imposing very heavy fines or by suspending them, which course would have prevented them from riding at either Guttenberg or Clifton until the fines were paid or the order of suspension removed.

The pedigree of McDoel, the great Missouri campaigner of the past season, has been buried in obscurity, but a Western exchange has the following interesting facts about the horse: A number of years ago Gov. Norman J. Colman, at one of his public sales of trotting horses, sold to Elijah Hawkins of Hannibal, Me., a chestnut stallion three years by Abdallah Jr. (5,720) son of Alexander's Abdallah, the sire of Goldsmith Maid. The dam of this young chestnut stallion was a mare that Gov. Colman used for road purposes, that could trot in about three minutes, a very pleasant driver, and said to be by a horse of Morgan blood. The mare was reported to have come from Iowa, and was sold in the St. Louis market. All efforts to learn of her breeding proved unavailing. A gentleman by the name of McDoel, who was then living at Quincy, Ill , had a mare and, talking with Mr. Hawkins, concluded to send her down to his farm at Hannibal and breed her to the chestnut stallion he had purchased of Gov. Colman. She was bred to him, and Mr. McDoel afterwards removed to Sedalia, taking his mare, which proved to be in foal, with him. It is this foal, by the Hawkins horse, that was first called Ssdalia Boy, and whose name was afterwards changed to McDoel, after the man who bred him. Abdallah Jr. (5720), who sired the Hawkins horse, has two in the 2:30 list. But very few of his get has been in the hands of trainers, hut that he imparted speed and gameness all who know his stock admit. The dam of McDoel was bred this year to a son of Onward.

Bnt few peonle are aware to what extent a horse can be patched up. There is a horse in Connecticut that has but one ear, and yet persons noticing him would never remark it without a critical examination. Such, however, is the fact, and although two ears appear there, one is artificial, the other natural. Some three years ago some rascal cropped off one of the ears while the horse was in the stable over night. An ear the same shape and size was taken from a dead horse and sewed on the bridle. This makes the horse look all right in harness. May Temple is almost minus hsir on her candal extremity, and a handsome switch is worn, which makes May quite presentable. There are tricks practiced hy copers, by which old horses can be made to appear young. By the means of a file the teeth of an aged horse can he made to resemble those of a five year old; the cavity in the tooth, which disappears with age, can be imitated hy burning with red-hot iron. The hollows which are very pronounced over the eyes of an old horse can be punctured and blown up so that the depression is almost obliterated. There are certain stimnlants known to the experienced jockey, which, if given to a horse, will render him for a short time full of fire and spirit. A gentleman purchased a horse in New York which had been fixed up by what is known to the police and sporting fraternity as a "coper." All the tricks to conceal defects and give the horse a youthful appearance had been practiced, and the gentleman thonght he beheld a spirited and fiery charger of elegant carriage. The horse became exhausted, and before reaching home he fell down and died on the road.

Mike Kelly left for the Ashe ranch near Merced this week and will he bnsy for a couple of months breaking and weeding out the coming two year olds, of which there are eight on the ranch. The stahle will go to Los Angeles in the latter part of January or early in February. Kelly says the track on the Maltese Villa Farm is one of the hest in the State for working colts. It is a mile track and has a straight run of three furlongs. The yearlings are the best lot ever seen on the famous farm, while Geraldine is looking as well as she ever did in her life and will race again next season.

Every one who has the trne interests of racing at heart rejoices to hear of those who attempt to win by dishonest methods being brought to justice, bat the golden maxim that the innocent should not suffer for the guilty holds here as all through our social economy. When C. H. Nelson of Maine got into trouble over the race for the Balch Stallion Stakes at Boston and was suspended from National Association tracks it followed that all the horses he then owned fell under the han. For this reason the trotter Nelson had to make his records this season on grounds not under the jurisdiction of the National Association. The New York Times says:

Besides his own horses Mr. Nelson has had a mare hired by him, but now owned hy W. F. Redmond of New York. She is called Medora, and is a sister of Aubine, who made a good campaign last year, and proved to be very fast to pole when mated with Lady Wellington. Mr. Redmond purchased Medora some time before Nelson got into trouble, with the agreement that the mare should remain in the hands of the latter for development. During this season she was handled by Nelson's trainer and started in a stake race at Boston dnring the New England Breeders' meeting. After that she was sent West with the Nelson Stable, and at Terre Haute got a record of 2:22¾. Being under no obsrge himself, Mr. Redmond had no hestitation in making engagements for his mare on National tracks, and contemplated putting her in all of the classes at the Lexington meeting, but changed his mind. Since the season for trotting ended he has been notified by the Secretary of the National Association to answer to the charge of aiding C. H Nelson to start a horse on a course under the control of that body, and the Board of Review, which meets here in a few weeks, will probably consider the case.

Mr. Redmond is a stock broker, with an unstained business reputation, and has recently been made Treasurer of the National Association of Trotting Horse Breeders. It was generally known that he owned Medora prior to Nelson's suspension, and the attempt to connect him with the latter in a conspiracy to evade the laws of trotting smacks largely of petty persecution. The Nelson-Alcryon case is practically undecided, and the suspension of the principals was a preliminary matter designed to keep the accused off National tracks for the time. This is punishment enough, as it means the loss of thousands of dollars to both Nelson and Noble. When the latter purchased the fast mare Ripple last Fall and started her on American Association tracks in his own name, the snbsequent attempt to get her in the Grand Circuit was properly and promptly frustrated. The case of Mr. Redmond's mare Medora is very different, and could not have been instigated for the sole purpose of keeping the trotting turf "free from gnile."

The N. Y. Tribune, reviewing the past racing season in the East, says: The lessons of the racing season just closed are many. Let us profit by them. Experience teaches. Since April 14th we have seen an amazing lot of mismanagement, dne, principally, to two causes:

First, the jockey clubs are making too much money. They have been coddled to death, as it were, and in consequence thereof are inclined to put on airs. They are so much better, in their own estimation, than the people who support them, that they have become arrogant, dictatorial and higoted. It is with them a most alarming case of big-head. They are for themselves first, last and all the time, and the public be d—d.

Secondly, all racing officials are under the spell of a foolish conservatism not in keeping with the progress of American enterprise. They are weak in the knees and have no backbone. Fraud, with a big F, has stalked boldly through the metropolitan circuit, because there was no man to take it by the throat, no one with the pluck to tackle it high, or tackle it low, nothing to prevent it making touch-downs by the score.

Right here a word about Col. M. Lewis Clarke's methods. They seem to be peculiarly his own. All the racing world knows how often he has been changing jockeys at Nashville, and the same world approves all that he has done. Sticklers contend that he exceeds his authority, but their opinion is chaff in the wind of popular report. While in New York recently Col. Clarke explained his methods. He said to the writer:

"One day at the Louisville track it was intimated to me that a job was on foot in a certain race; so I began quietly feeling around to see who was in it and who was putting it up. I could learn nothing definite, however, that could implicate either owner, trainer or jockey. But I was determined to have that race honestly won. Everything looked all right until the first breakaway. Then I could see that some of the jockeys did not want to get off. Well, I had all of them ride back to the judges' stand and draw up in line, facing me, and after looking savagely at them for a few minutes, I said; "I know all about the job in this race, and I intend to stop it. I won't point out the guilty ones, because I want to give you a chance. Listen to me! If every mother's son of you is not ready and whipping and spurring like the deuce, I'll rule you off the track for the rest of your natural lives. Do you understand? Now go to the post and he sure you get away in front, the last one of you.' The race was one of the finest ever run over the track, and I honestly believe that the best won."

A taste of this policy in the East would be relished by all who take an interest in the welfare of the turf. Let us hope that the Gulf breeze that sweeps over New Orleans will fill Colonel Simmons with a new zeal and put a ramrod in his back.

The season has developed some horses of note, bnt no jockeys have come to the front to startle the world. Garrison has retired from the saddle to conduct a stable of his own. McLaughlin has ridden but seldom. Lambley—by the way, how is that boy's name spelled? They say L-a-m-h-l-e y is wrong. Well, a rose by another name would smell as sweet. Lambley has improved much and is the coming jockey. He has acquired the art of getting away and has done some clever finishes, but lacks the patience to wait. H. S. H. Prince William Cathartic Daly, in whose school and under whose strap Lambley was brought up, taught him to die in front, and the boy is slow to learn how to depart from that teaching. But he will be with McLaughlin next year and that is evidently a liberal education in jockeyship.

THE FARM.

Merits of Dishorning—Weighing Food.

It seems to he the fate of most reforms to be obliged to encounter the opposition of the public at large, and dishorning of cattle is going through the same process that other reforms have met. I believe that I speak advisedly when I call dishorning a reform, for I am in hearty sympathy with Mr. Haaff's declaration: "The horns must go." I confess that I did oppose it at first, but that was when I looked at the subject in the abstract, and had no practical experience or knowledge of it. It did not take long to convert me when I examined herds of dishorned cattle and heard the testimony of the owners.

I met last winter at the Pennsylvania State Dairy Association a Jersey breeder who had strongly opposed dishorning, but on a western trip he saw many train loads of cattle, and it was the case invariably when a train stopped that the cattle with horns were fighting and horning each other, and the men in charge of them were kept busy prodding them, and every car of horned cattle was in a turmoil without an exception, while the cars loaded with dishorned cattle were as quiet as one could imagine. This gentleman purchased a disnorning outfit, came home and took the horns off from his herd. During the past summer I visited a dairy of thirty-five cows all dishorned, and the owner was enthusiastic in praise of the plan. There have been stories published about cattle dying and their heads rotting from the effects of dishorning, and it is quite probably that these are true, for if the horns are cut off in the heat of summer and no precautions taken, I should expect the flies to blow them and the heads of the cattle to get maggoty, but it is the testimony of hundreds of intelligent farmers that they have seen no evil effect from dishorning, that their cattle did not lose a feed or the cows shrink in their milk after the operation.

But if farmers wish to get rid of the horns and will begin with the calf, they can do it without any cutting at all, as a single application of crude potash over the spot where the horns can be felt under the skin when the calf is three or four weeks old will kill them entirely. I have done this with a liquid preparation of potash, sent out by the Western Rural of Chicago, and found it effectual, but I am told by others that a stick of crude potash rubbed on the spot till the hair is well saturated with it is just as effectual, and in either case it does not cost more than a cent a horn to kill them. If the stick potash will answer, as I have no doubt it will, I would much prefer to use it, as there is some danger of the liquid running down the sides of the head, and should it get into the eye it would put it out. I came very near ruining the first calf I operated on, as by a sudden jerk of the head it caused me to spill a little of the mixture on the side of its head, missing the eye but a half inch, and it took a strip of skin off an inch or more wide down past the eye. The best way to manage with the stick potash is to get astride the calf, wet the hair over the embryo horn and rub on the potash until it takes effect, and the job is done, and the horn will never show. I have been surprised to find that when a calf is dishorned or even a cow, if the horns are cut close enough so as to heal over and leave no stub, that the head takes the shape of a natural mooly.

It seems to be quite feasible to get rid of the horns by breeding them off. Several of my neighbors have found that by using a polled bull very few of the calves had any horns, and by the second generation none; and I have one neighbor who has established a herd of polled Jerseys by starting with a polled cow, the second and third generations still remaining hornless. There is a much better implement for disbonning than the saw, but I cannot tell where it is for sale. It was exhibited at Meadville, Pa., last spring, when the State Dairy met there. With it the cutting is done on the principle of hedge shears, only their are four knives, one on every side of the horn, and a very strong leverage, so that the largest bull's horn can be cut off in a second The operation is not only very much quicker done, but it is asserted that there is much less bleeding.

One point in the feeding of cattle that I wish some of your readers would experiment on a little this winter is the weight of food necessary to keep an animal gaining or a cow at a full flow of milk. I have done some weighing of food and it seems to me that the German rules of feeding call for more food than is necessary. I have not the data at hand to show how much weight of food it is said a thousand pound animal requires, and I cannot recall it now, but some experiments of my own show that ten pounds of good hay or bright corn fodder, with less than ten pounds of bran and meal a day, will keep a horse or steer of 1,000 pounds weight in fine condition. I will try and do some more weighing this winter and will report if I find out anything of interest.—Waldo F. Brown, in County Gentlemen.

A Great Industry.

The American Analyst says that there are $2,000,500,000 invested in the dairy business of this country. That amount is almost double the money invested in banking and commercial industries. It is estimated that it requires 15,000,000 cows to supply the demand for milk and its products in the United States. To feed these cows 60,000,000 acres of land are under cultivation. The agricultural and dairy machinery and implements are worth $200,000. The men employed in the business number 750 000, and the horses over 1,000,000 There are over 12,000,000 horses, all told. The cows and horses consume annually 30,000,000 tons of hay and nearly 90,000,000 bushels of cornmeal, about the same amount of oatmeal, 275,000,000 bushels of oats, 2,000,000 bushels of bran and 30,000,000 bushels of corn, to say nothing of the brewery grains, roots and other questionable feed of various kinds that are used to a great extent. It costs $45,000,000 to feed these cows and horses. The average price paid to the laborer necessary in the dairy business is, probably, $20 per month, amounting to $180,000,000 a year. The average cow yields about 450 gallons of milk a year, which gives a total product of 6,750,000,000. Twelve cents a gallon is a fair price to estimate the value of the milk, at a total return to the dairy farmers of $810,000,000, if they sold all their milk as milk. But fifty per cent. of the milk is made into cheese and butter. It takes about twenty seven pounds of milk to make one pound of butter and about ten pounds to make one of cheese. There is the same amount of nutritive albuminoids in eight and one-half pounds of milk that there is in one pound of beef. A fat steer furnishes fifty per cent. of boneless beef, but it would require 24,000,000 steers, weighing 1,500 pounds each, to produce the same amount of nutrition that the annual milk product does.

Chinese Methods in Agriculture.

We are to-day confronted in America with a serious shrinkage in farm values, and in the East especially with the abandonment of these lands, since they produce no longer satisfactory material results. It is just here that the despised Chinaman offers a valuable lesson with a suggestion which we would do well to heed. We seem to have been induced to prodigality almost from the very start by the comparative richness of our American soil. Where the earth had to be scratched in preparation for a crop, and artificial stimulants were altogether unknown, we forgot in part our common heritage of hard and persistent labor, and fondly imagined that the land would never, or only at some remote period, "run out" in productiveness. As a result the natural exhaustion of the soil resultant from constant employment drives us to sheer despair, and the older farms are deserted for others which in turn must share an identical fate. We do little for the land's improvement. Its exhaustion is the fact forced upon us, and we flee rather than face the problem. But the Chinaman does nothing of the sort. In his native country he would be deprived of his farm or his garden if he refused to cultivate it, and instead of abandoning his possessions, which would prove, indeed, suicidal there, with the crowded conditions of population, he sets himself to the work of making the most of what he has. Everything of possible use in fertilization is scrupulously saved, every rice stalk is planted as seed and replanted by hand in water; rain water is held universally in ponds or in holes for purposes of irrigation, and in these reservoirs fish are invariably grown.

Where human labor is vastly cheap and cattle and beasts of burden are considered costly carriers and producers, it is natural that human labor should be employed for almost everything. It is said that there are practically no plant weeds visible in the most thickly populated parts of the empire; since there is no room for them, and since they are destroyed in a country which examines even the roots of plants to remove or kill insects or grubs. All sorts of methods to induce the rich growth of plants are employed, and fertilizers are applied to the roots of plants directly rather than at the surface of the ground, where evaporation and diffusion would result in waste. This seems peculiar to farmers in America, where the total loss from sheer wastefulness in the course of a year is something upon which a Celestial would look with woe; but it is only the extreme economy which the American agriculturist needs to learn. Indeed, this same principle of economy has become a distinctive feature of our higher grade farms, and the most advanced farmer will be found rendering available material and space which the old time farmer would let go to waste. It is an unpleasant spectacle which the Chinese agriculturist presents in his means and methods without question, but is scarcely less pleasant than that of some short sighted American farmers, whose improvident habits and heritage carry them to the other extreme.—Providence Journal.

The Pig Pen.

Hog cholera, like most if not all other contagious and infectious diseases, is caused by a microbe known as bacillus; and the same is true of the allied disease known as swine plague, which is caused by a bacillus closely resembling that which produces hog cholera. It was not until about 1885, that Prof. Salmon, chief of the U. S. bureau of animal industry, discovered what he named the hog cholera bacillus. His discovery has since been repeatedly confirmed by others. A little later he found the swine plague bacillus. This differs in size and growth, when cultivated artificially, from the cholera bacillus. Dr. L. Russell, of the Maine experiment station, has found this further difference between the two—that the cholera bacillus will live in a temperature that destroys the plague bacillus, and that the continued temperature of 137 degrees for ten minutes will kill both. Both are transmissible by inoculation, and the length of time required for the disease thus transmitted to kill the hog depends upon the amount of virus introduced. The bacillus multiplies in the large intestines principally, but is also found in the blood and other parts of the body before death. The most prominent symptoms, of disease, says Dr, Knsaell, "are a loss of appetite, considerable elevation of temperature, constipation followed before death by very fluid discharges. In some acute cases there is little diarrhœa before death; in other cases it is a marked symptom for some days. Death may occur within two or three days of the time the first symptoms are noticed, or it may occur after three or four weeks. Usually the skin on the under side of the neck, thorax, abdomen and on the inner side of the thigh presents a bright red appearance before the death of the animal." The diseased bodies should be utterly destroyed or buried so deep that there is no possibility for the bacillus to come to the surface. The quarters occupied by such hogs should be carefully disinfected and left vacant for at least six months. As a preventive, hogs bought and introduced on the farm should be kept by themselves for at least four to six weeks. "There is no evidence to show that hog cholera ever develops in a place where it has not been brought by affected hogs or some of the diseased products of affected hogs. And such a thing as a permanently infected locality is probably unknown, although the hog cholera bacilli will live and multiply in the waste food and wet places about the pens where sick hogs are kept, and will even live in dry earth for two or three months sometimes." But there is no question but that filth is favorable to its propagation. It is supposed to have been brought from Europe about 50 years ago.—Montana Stock Journal.

Alfalfa Mutton.

In nearly all the lands west of the 100th meridian, says the Sheep Breeder and Wool Grower, the pasture is much depreciated in value below its condition thirty-five years ago, when it was overrun by millions of buffalo. The seeds of the grasses and forage plants, it is true, are trampled in by stock, and especially by sheep, and in soils not too sandy they are thus defended from the drying and freezing they would otherwise suffer; and the finely distributed sheep manure enriches the land; but on the other hand, close herding and cropping do undoubtedly tear out very considerable amount of grass by the roots. In Colorado, perhaps more than any other State except California, irrigation and cultivation of forage crops, chiefly alfalfa, have been presented to supplement the failing natural resources. "Alfalfa mutton" has a local reputation almost as distinctive as the turnip-fed chops of Dorset. The first chapter in the great mid-continental sheep history was bunch-grass, and that is forever ended; the second chapter will be alfalfa.

Early Maturity Mutton.

The old theory that prime mutton can only be had from three and four-year-old wethers has been exploded. Indeed, two-year-olds now are rare. Yearlings seem to be growing more numerous every year and are becoming the staple mutton of the country, notwithstanding it was once thought that sheep could not be put in first class order at that age. Everybody goes in for early maturity, and probably it is only by so doing that mutton making can be made to pay, excepting, of course, in the case of old ewes, which make up a proportion of the fat sheep killed every year, and which may, under certain circumstances, leave a good profit for fattening. Nothing is more certain than that the age at which sheep can be fattened is being constantly lessened. During recent years the fat stock clubs have been compelled to entirely recast their prize lists. Classes of lambs have been instituted and they have become the leading feature among the sheep classes. These illustrations of early maturity are too strong logic for old style feeders, who hold to the opinion that an animal must have completed its growth of frame before it can be properly fattened. Alternate fatting and starving will no longer pay in the process of making a certain weight of meat from a certain quantity of food, and the system of carrying on animals to a certain age on merely sustenance diet before commencing to fatten them, is also proven to be unprofitable feeding. These methods may be pursued in the case of course, ill-bred sheep that are slow to fatten, but they will not suit improved breeds that lay on flesh early, and with food so adjusted meet the wants of nature that there shall be no check in growth from birth to maturity. It has been alleged that a sheep aged two years yields a greater or heavier quantity of flesh than a sheep one year old, but this is a fallacy. It is now ascertained that a sheep from its birth till one year old makes as much flesh as one double that age, provided the sheep be fed carefully, plentifully and methodically—that is to say, that there be no stoppages in the rations,—Sheep Breeder of Scotland.

How Milk is Made.

Prof. Robertson, of Ontario, Canada, gives the following explanation of the mystery of the formation of milk:

All the milk of cows is made in a most mysterious way. The elaboration is effected in two glands called the udder. You can take one from the other without rupturing the remaining one; there is no organic or distinct division between the two quarters of each gland. The milk in the gland elaborated from the blood, a physiological process imperfectly understood. That being so, it becomes necessary for every dairyman so to treat, feed, water and shelter his cow that she will have wholesome, vigorous blood coursing in her veins. The blood from which the milk is formed enters the glands by two large arteries. Alongside the arteries runs a large vein and nervous cord. Numerous ducts rise from the milk cisterns at the top of the teats; they spread through the whole structure of the udder. A small portion of the blood exudes or percolates through the membrane that lines these ducts and becomes milk.

Beginning from the bottom of the teat, there is an opening which stays closed without any effort on the part of the animal, therefore the milk does not leak. If this muscle relaxes the milk will drop out. At the top of the teat there is another valve over which the cow exercises some control. She can close it and hold the milk above the valve; then a man may ring all he likes and get nothing while the cow holds up her milk. When the cow has this valve closed, it is mainly owing to undue excitement. When the cow is much excited the lack of nervous equilibrium will make her close this valve and shut off the milk flow

There are a great many tiny cells on the inside of the ultimate follicles of the milk ducts. They are so small that if you measure a row of them not one inch in length, you will find 3,000 or 5,000 of them. They each grow a bud; that bud grows larger and larger until it becomes a globule, and these globules constitute the fat of the milk. These tiny globules drop and trickle down inside these milk tubes and come down with the rest of the milk. The last milk is richer than the first. Some men consider it to be an honest transaction to give the factorymen the first fruits of the cow and to keep the last quart for the coffee.

As the milk is thus directly supplied from the blood, everything that influences the blood injuriously influences the milk in the same way. Hence the necessity of pure food and above all pure water. Scarcely less important is pure air. How is it possible for cows kept in filthy stables with insufficient ventilation to furnish milk fit for either adults or children?

Mutton Lamb and Lamb.

A paragraph is now going the rounds of the agricultural press to the following effect:

"The popular taste now is for lamb mutton. No bill of fare, they tell me, ever says mutton, but its "lamb." This gives me a notion that we should try to produce what people want. Another reason is we can make lamb at about half the cost we can mutton. It takes only half as much food for a maintenance ration for a lamb as for a sheep, and as the gain all comes after the support of the animal is provided for, it is plain we can reach the point for gain in a lamb at much less cost than in a sheep. There is no doubt of this. If then, we can make growth in a lamb at less cost, and much more rapidly than in old sheep, we should put our feed before lambs."

Now, in the ordinary use of the term lamb we mean an animal under the age of ninety days, one produced in the early part of winter and of that age as soon as anything green grows out of the ground in early spring, hence "lamb and mint sauce" means a well developed carcass having a live weight of from 70 to 100 pounds when the mint is peeping out of the ground. Here is the dish relished and luxuriated in the very early season, by the foremost breeders of mutton in the world, the English, and it is a dish which is becoming more and more popular every year the world over where mutton sheep are bred.

Lamb of the age referred to in the floating paragraph is an American abreviation of the English custom and amounts to about the same as plum pudding and roast beef on the Fourth of July. If one wants lamb he wants it when it is of the age we speak of and at the time he can get the necessary adjuncts to go with it, if he wishes roast pig it is about the same. Mutton is not lamb any more than pork is roast pig.

I use Simmons Liver Regulator for my stock, horses and mules; it is the best medicine I know of. In case of colic in stock it will save them if given in time. Recommend it.—R. V. Cox, Haddock's Sta., M. & A. R. R.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Fixtures.

BENCH SHOWS.

Northern Illinois Poultry and Pet Stock Association's fifth annual bench show, Rockford, Ill., December 10, 11, 12, 13, 14, 15 and 16. John Teague Secretary Kennel Department.

The Central Indiana Poultry Association's fifth annual bench show, Richmond, Ind., December 10 to 17. J. O. Myers, Secretary.

1891.

The Buckeye Poultry and Pet Stock Association's bench show. Canton, O., December 30 and 31, and January 1, 2 and 3. James Sterling, Secretary.

Michigan State Poultry and Pet Stock Association's twelfth annual benoh show, Jackson, Mich., January 7, 8, 9, 10, 11, 12, 13 and 14. S. H. Slifer, Secretary.

Central City Kennel Club's inaugural bench show, Jackson, Mich., January 10, 11, 12, 13, and 14. Dr. E. L. Kimball, Secretary.

South Carolina Poultry and Pet Stock Association's International Exhibition, Charleston S. C., January 13, 14, 15, 16 and 17. Benj. McInnes, Jr., Secretary.

Louisiana Poultry and Pet Stock Association's first annual bench show, New Orleans, La., January 20, 21, 22, 23, 24 and 25. A. E. Shaw Secretary.

Elmira Poultry and Pet Stock Association's bench show, Elmira, N. Y., January 21, 22, 23, 24, 25 and 26. Carl Hart, Secretary.

South Carolina Kennel Association's inaugural bench show, Greenville, S. C., January 27, 28, 29 and 30. F. F. Capers, Secretary.

Westminster Kennel Club's fifteenth annual bench show, New York, February 24, 25, 26 and 27. James Mortimer, Superintendent.

Maryland Kennel Club's second annual bench show, Baltimore Md., March 3, 4, 5, and 6. W. Stewart. Diffenderffer, Secretary.

Duquesne Kennel Club's inaugural bench show, Pittsburgh, Pa., March 10, 11, 12 and 13. ——, Secretary.

Massachusetts Kennel Club, Lynn, Mass., second annual bench show, March 24, 25, 26 and 27. D. A. Williams, Secretary.

New England Kennel Club's seventh annual bench show, Boston, Mass., March 31, April 1, 2 and 3. E. H. Moore, Secretary.

California Kennel Club's bench show, San Francisco, Cal., April ——, 1891. J. B. Martin, Secretary.

Cleveland Kennel Club's fourth annual bench show, Cleveland, O., April 1, 2, 3 and 4. C. M. Munhall, Secretary.

Mascoutah Kennel Club's third annual bench show, Chicago, Ill., April 8, 9, 10 and 11. G. H. Goodrich, Manager.

FIELD TRIALS.

Philadelphia Kennel Club's seventh annual trials, December 15, Deatonsville, Va.

1891.

Southern Sportsmen's Association's annual field trial, Lafayette, La., January 13. John K. Renaud, Secretary.

Pacific Kennel Club's eighth annual field trials, January 19, Bakersfield, Cal. H. H Briggs, Secretary.

Southern Field Trial Club's third annual field trials, New Albany, Miss., February 2. T. M. Brumby, Secretary.

Visits.

Mr. M. Kerr's Fanny, foxterrier bitch, to J. B. Martin's (San Francisco, Cal.) Blemton Shiner (Champion Blemton Rubicon—Blemton Brilliant) on Nov. 24, 1890.

Sales.

J. B. Martin, San Francisco, Cal., has sold: Foxterrier dog puppy Foxey (Regent Vox—Blemton Saffron) out of Jessie to P. E. Mendoza, Stockton, Cal.

Thos. J. Ballantine, Peoria, Illinois, has sold La Veta (Champion Kash—Fair Inez), fawn with black muzzle pug bitch in whelp to Lord Clover (Champion Loris—Nellie) to J. B. Martin, San Francisco, Cal.

Whelps.

Mr. C. A. Sumner's Foxterrier Bonnie Bess 18080 (Warren Jim ex Warren Forment) whelped one dog and two bitches to his Blemton Vesuvian 14290 (Champion Lucifer ex Blemton Vesta), at Los Angeles, November 25th.

Champion Gladstone is Dead.

The following letter will be read by all sporting men with regret. The owner of the grand old dog says:

Friday, November 20th, as the sun was sinking in a cloudless sky, old Gladstone walked into the front yard and lay down, as was his custom, basking in the evening sun; in an hour a man went to bring him in the house for the night and found him dead. So peacefully did his life ebb away, without a struggle, no one supposed him dead. His appetite was good to the last: there was no shriveling from old age, not a callous growth so usual in dogs of his age. His hearing failed about a year ago, and cataracts formed over each eye causing almost blindness, otherwise he looked the perfect dog he was even in death.

The day he died the air was crisp, the leaves browned by recent frosts, the cover just killed inviting one to taste the field after Bob White. Many, many such days has the writer followed the noble old dog on just such a day, the happiest of his life, as he saw him leap field after field, and made point after point with the graces none but he possessed in comparing the style of others; his was left out, a class unto itself. His rapid circles when in quest of game were like the eagle swoops, so rapid; his eyes dilated with enthusiasm when in the field, showing his intensity of purpose, his wonderful endurance, never yet equaled. It was a fitting day to end the life of such a grand dog. Only a short time ago the agent of one of the principal museums came to me and offered me quite a sum for Gladstone. When he told me his mission I remarked, I feared Gladstone had not many months to live, but he should die a natural death and in the hands of one he had served so long and faithfully.

I was fortunate in getting a gentleman, who has been a taxidermist, to prepare him for sending away to the best taxidermist I know of for mounting.

I have preserved the last quail, snipe, woodcock and chicken he pointed and had them mounted. He will, when mounted, be the central figure of the group. Ah, what pleasure they will recall. P. H. Bryson.

Memphis, Nov. 21, 1890.

The king of bird-dogs the world over was Champion Gladstone. He had no equals. He was one of those remarkable productions which nature, for some unaccountable reason, occasionally lends to all of her species. In the equine world there has been but one Maud S; in the elephantine world but one Jumbo; in the intellectual arena but one Webster, so in the canine world, there has been but one Gladstone.

The sportsman who has been deprived of the pleasure of seeing Gladstone in the field has been deprived of the grandest sight which has ever been presented to the sporting world. To describe him would be almost impossible. He stood alone, towering so far above all other dogs, as to render comparisons impossible and utterly useless.

He made his first public appearance at Hampton, Iowa in 1877. In the following November he appeared in the field trials, at Nashville, Tennessee. In speaking of his death the American Field closes a fine review of his life and character as follows:

"Such a dog no one had seen; such a dog no one had believed possible; and the opinion was expressed and went forth that no one on the grounds had seen such a dog before, and they were all men of experience and owners of good dogs. We were vindicated; we had not said such a foolish thing as believed to be at the time; and Gladstone's fame was spread far and near, and as he grew in years he grew in fame until by universal consent he was the uncrowned king of field dogs, and men of experience ceased to rate other dogs by him, so far ahead was he of everything else.

The greatness a dog achieves brings for it the same bitter strife that greatness brings for a man, and Gladstone was an illustration of this. Never did a dog engender so much hatred. There are three positions in life, imbecility, mediocrity, superiority. The first excites pity, the second excites nothing, the third excites envy and its offspring hatred. Gladstone proved this.

Gladstone's various races are so much a matter of history that it is not necessary to go into them. The following is his list of winnings: Bench shows: First in open class, special for the best English setter and special for the best setter of any strain, St. Louis, 1878; champion and special for the best setter of any strain, Boston, 1878; champion and special for the best imported setter, any strain, and special for best setter, Baltimore, 1878. Field trials: First, Puppy Stake, Nashville, 1877, and third with Dog Whip, Brace Stakes, same meeting; second with Lincoln, Brace Stakes, Nashville, 1878; first, Eastern Field Trials, All-Age Stake, 1880.

Had we owned Gladstone, we could not have thought more highly of him than we did. In closing our remarks on his death, the question is, shall we ever see his duplicate? No man can predict with a certainty what will or what will not be; everything is possible, but this hardly probable. If however, the world should ever see such a field dog again it must be from the loins of the grand old champion's descendants.

Al Farrow.

We present herewith the portrait of the greyhound Al Farrow, winner of the great $500 stake, given by the Inter-State Coursing Association at their grand Meet at Merced, California, on the 18th, 19th and 20th of last month.

This now famous dog won the first money and honors in a 48 dog entry, in which was presented the cream of the greyhound family of the entire country.

Of this phenomenal coursing dog but little is known that would indicate his right to the title of King of the Course, save the fact as demonstrated at the above Meet that he possesses power and endurance in a degree hitherto undemonstrated by the greyhound family.

The pedigree of this dog, as far as we have been able to learn, is as follows:

AL FARROW { Sire "Black Bart"..... { G. Sire "Menlo Chief." / G. Dam ——
Dam "Black Bess"..... { G. Sire "Monarch." / G. Dam ——

He was whelped in March, 1888, and was bred by Mr. Cooney, of San Jose.

He is the winner of a large number of first class prizes in former courses run in this State. He is a deep orange brindle, with dark shadings, stands 26 inches high, and weighs 65lbs.; his skull measures 15in.; nose, 5in; chest 28½in.; loin, 21½in.; body, 25in.; tip to tip, 61in.

While in the above mentioned meet this dog did not have the peculiarly heavy work of some others, yet he won, and won easily, and it would not be at all surprising to any of the gentlemen who witnessed his marvelous work there to see him make grand efforts to still remain at the head of the course in future contests.

We learn that the noted fielder, Spring, the winner of the last of the Western Field Trials, died recently at West Point, Miss. He was owned by Mr. R. M. Hutchins, of Galveston, Texas.

One of the most earnest fanciers of the canine race in this city is Mr. J. B. Lewis of 409 Bryant St. He is the owner of some fine pointers and in the past has possessed some remarkably fine dogs. The headquarters of the California Kennel Club is at his real estate office, 436 Montgomery St. This organization will hold its regular annual meeting for the election of officers for the ensuing year on next Tuesday evening at the last above mentioned number.

The attention of all kennel men is called to the advertisement of dog medicines by Mr. E. T. Allen, 416 Market St., this city, which appears in this issue. He presents a remedy for all the ills of the dog family.

The field trials at Bakersfield which will open on the 19th of January, bid fair to exceed in interest all those of the past. The southern part of the State will be represented more fully than ever before. Advises from that section indicate a lively interest in this event.

Not the least annoyance to the dog fanciers of the old world; is the contemptible dog thief, who is ever alert to seize and make off with good dogs of any class.

The Stock-Keeper, of recent date, gives an account of a rascal who stole a young ladies pug while she was out walking with it, and is now doing hard labor, for three months in Maidstone, Gaol, for the theft.

It is gratifying to notice the effect which the grand coursing meet at Merced has had in greyhound circles throughout the State. It is evident that new faces will appear in the future coursing meets without the loss of any of the old ones.

Several new dogs are in training, and it will be no matter of surprise to the initiated to see much of surpassing interest manifested in the coursing meets of the future.

The proposed Thanksgiving meet of the Occidental Coursing Club was postponed until New Year's day. This action was taken by reason of the fact that this event, at the time originally proposed, followed the Merced meet too closely to allow many of the dogs that had taken part in that event, to be placed in form for the Occidental meet. All will be well by the coming of the new year, and some good sport may be expected at that time.

The judges in the Eastern Field Trials were Messrs. Simon C. Bradley, Greenfield, Conn; Thomas Johnson, Winnipeg, Manitoba, and W. W. Titus, Mount Pelis, Miss.

In champion stakes Gath's Mark won.

For the Lorillard medals: in dogs, O. W. Donner's Roi D'Or won; in bitches, F. R Hitchcock's Annie F. The trials were quite largely attended and the interest was of the first nature from opening to finish.

The famous St. Bernard, Prince Battenberg, K. C. S. B. 20,837, is dead. It was this dog that beat Plinlimmon at the Birmingham Show some three years ago. Of this splendid animal *The Stock Keeper* at that time wrote:

"Our personal opinion, as distinguished from what our reporters may have said on different occasions, is not unknown to the St. Bernard world. In spite of the learned minds arrayed against us, we conscientiously upheld Mr. Betterton's judgment at Birmingham when he yielded to type and character in putting the lovely Prince Battenberg over the giant Plinlimmon. For canine beauty we know no dog so worshipful as Prince Battenberg."

Mr. James Watson of Berkeley has now in transit from Liverpool a brace of setters than which no finer dogs can be found in the entire country. Mr. Watson has imported perhaps more good dogs than any other one man in the West. He now has in his kennels one of the finest Foxterrier bitches in the West, Gip by name, and she is a beauty. He has been singularly unlucky with a number of his dogs, especially Black Joe, as fine a pointer as the State ever knew, that was accidentally drowned, and Brunette, the splendid little greyhound that died from over-exertion after a swift wild chase, in addition to a long gruelling course which she won at Merced. The many friends of Mr. Watson will sincerely wish that success may attend these new and splendid dogs which he is now bringing out.

The second act in the comedy wherein Mr. C. J. Peshall was indicted by the Grand Jury for criminal libel, says the Turf, Field and Farm, on affidavits made by A. P. Vredenburg, Secretary of the American Kennel Club, and Messrs. Anthony and Wilmerding, was enacted at the Court of General Sessions, Part I, Thursday, Nov. 20th. Mr. Peshall was on hand ready to go on with the case, but the complainants pleaded for time. Mr. Peshall arose and severely denounced the methods adopted by the complainants, and demurred against delay. Judge Fitzgerald, from the bench, presiding, in reply, stated that, Mr. Peshall being ready, he might apply for a dismissal. Mr. Peshall's answer was that he did not wish the case dismissed, but wanted it tried on its merits. The date for act three is set for the December term, and will be the first case on the calendar Monday, Dec, 1st.

We had the pleasure last week of viewing Mr. Gavin McNab's "Ingleside Crown Prince," a marvelously developed pup of the mastiff family. This splendid animal was purchased recently by the above named gentlemen from Mr. Moore of Massachusetts. His pedigree in part is as follows:

Ingleside Crown Prince, A. K. R. S. B. 17503. Whelped April 10, 1890.
- Sire, Illford Chancellor..... { G Sire, Champ. Illford Caution..... { G. G. Sire, Champ. Crown Prince 10544 / G. G. Dam, Illford Claudia.
  G. Dam, Brenda Scudia..... { G. G. Sire, Turk. / G. G. Dam, Brenda.
- Dam, Madge Minting..... { G. Sire, Champ. Minting..... { G. G. Sire, Maximilian. / G. G. Dam, Chambrian Princess.
  G. Dam, Bess, A. K. R. 2977..... { G. G. Sire, Major. / G. G. Dam, Mollie, (Imported).

It will be noticed that this dog is only but little past his half year date; he is beautifully proportioned, and tips the scales at 135 pounds. Should he continue a uniform development, he will undoubtedly prove one of the most wonderful dogs in the entire country.

All those interested in the mastiff family should not fail to see this handsome representation. Mr. Moore pronounces him the finest specimen he has ever sent out to the world.

THE GUN.

Wild Goose Shooting.

BURLINGTON, Iowa.

EDITOR BREEDER AND SPORTSMAN:—It was during the latter part of March, 1884, that in company with my old friend and hunting companion Andrew, that I started from Iowa to enjoy a few days wild fowl shooting on the plains of Nebraska. We found, on consulting friends at Omaha, that one of the most favorable resorts of that State lay along the Platte river, distance some hundred and twenty-five miles from the city above named. Our arrangements were soon completed. In these matters my friend and I chose to differ. He, with many others who have hunted the wild goose, insisted that the best shot to use in hunting this bird should at least be No. 3 or B B, but my experience had been, and for that matter, still continues to be in favor of shot not larger than No. 6.

I have always prefered, since having some considerable experience in wild goose shooting in the West, a charge of 4½ drachms of powder and 1¼ oz. of No. 6 shot. These fired from a ten gauge close-shooting gun I have found to be far preferable to any other charge.

We were but a short time in reaching our destination, which was Clark's Station, on the Union Pacific Railroad. We arrived there after dusk, but found in the landlord of the comfortable little hostelry of the village a man who was well acquainted with the country, a fact which served us a good turn, as it enabled us to prepare for a hunt on the coming morning.

'Geese are very abundant," he answered in reply to our query, "but you'll be better shots than most of our gunners here, if you get any of them. "They fly so wild during the day that it is almost impossible to reach them. Over the river to the south they alight in the fields by the thousands, but you might as well attempt to catch them by throwing salt on their tails, as to get near enough to shoot them with a shot gun."

We learned that the village at which we were stopping was about a mile north of the Platte river, which is a broad, shallow stream, having numerous small islands and sand bars all along its course. We also learned that most of the cultivated fields of this vicinity lay south of the river and distant from it about a half mile or more, the intervening space being filled with a row of sand hills or bluffs. The north side of the river where we were, is bottom land, filled with sloughs and ponds and given over to grass culture.

We engaged the landlord to drive us south of the river the following morning at the early hour of 3 o'clock, to which proposition he at first demurred, but we pursuaded him finally to take us at that hour and soon after retired. To be sure and not miss the early shooting I secured a small metallic alarm clock and setting it for the hour of 3 A. M. retired after placing it near the head of my bed. It seemed to me to be but a remarkably short space of time after going to bed, that I found myself standing on the floor, while that same clock continued such a clatter, as it seemed to me would awaken every one in the house. It did not however, for I was compelled to belabor Andrew's door for some minutes, which was next to mine, before I elicited from him the faintest signs of life. We were but a few moments in reaching the office below, and were agreeably surprised to find a warm fire to welcome us as we threw open the hall door.

A moment more and the landlord appeared and invited us to the dining room where we were regaled with a cup of strong coffee, which he had hastily prepared. In a few moments we were all stowed away in his light wagon and were being wheeled away toward the river.

Our party consisted of the landlord as driver and guide, my friend Andrew, myself and my old and well tried Pointer —Sport.

"What use will that dog be to you?" asked the landlord; "he can't find the geese for you; they don't lie in the grass, at least, not until they are dead." We informed him that if he would wait awhile until the morning flight began and then bring us back as far as the river, we would show him of what service a good dog could be in goose hunting. Such being our plan, and after listening to our eulogy on old Sport's qualities, he took a lively anticipatory interest in the matter. The wind was blowing freshly in our faces, and the sky was so cloudy that not a star could be seen.

"We are almost certain to have a storm, perhaps a light fall of snow," said our landlord. All the better, I replied; it will make the shooting much more favorable.

"Well, I don't relish the experience of being out in a snow-storm," said Andrew, "and I can't see the sense of being out so early anyway." If you will wait, you will see that it is all for the best, we replied, but our assurance had no visible effect on my usually talkative companion, for he relapsed into the silence which had marked his demeanor all the morning.

"The geese will fly through these ravines between the bluffs," said the landlord; my neighbor is one of the best hunters in the country, and he always chooses these places, in which to conceal himself and shoot them as they fly over."

This settled it for Andrew, and he would not listen to my advice, but followed the landlord's suggestion by getting out and choosing one of these runways of the birds.

I went on for nearly one-half mile further and chose a corn field open and level and free from any obstruction, save the corn stalks which were yet standing in the field, these even being somewhat scant as the fields had been run over by the cattle.

"Queer place that to hide from the geese," said the landlord, "Why, man, they'll see you a mile off and wont come near you, especially with that dog frisking about," and with this he drove his team back to the shelter of the bluffs and I was left alone with Sport as my only companion.

I set to work and gathered a few corn stalks and laid them over my person carelessly, bending down a bunch of them so that they slanted over me as I lay flat on my rubber blanket, having on my straw colored rubber coat and hunting boots of the same color

It was not light enough to see when I heard a whir of wings and the garrulous voicing of a flock of ducks as they circled above me. As the gray light of the morning came on, the soft feathery flakes of snow came whirling along on each gust of wind which had now become quite strong. Then up from the direction of the river, came the welcome music of the birds, and soon over the bluff to my right I discerned a flock of the large Canadian geese coming toward me. On they came, and as they posed almost directly over me I arose to a sitting posture and had easy shooting, two of the great birds dropping dead at the crack of my double barrel.

Old Sport was off like a flash and had returned the first bird and was out after the second one, when, as I was watching him I saw him drop to the ground; turning I saw another flock approaching from the quartering angle to the right. On they came with that apparently slow, yet really swift motion which marks their flight. In another instant I had two more birds to ground.

It would have done any true sportsman's heart good to have witnessed the surprising intelligence of old Sport. He could see an approaching flock of birds as quickly as I, and frequently he was first to see them, and by his actions in secreting himself and a low whine direct my attention to their approach. It was now snowing quite freely, and the field was fairly alive with geese and brant. The latter are always somewhat later in their flight, and are much more noisy. The flight from the river occupied perhaps upwards of an hour before the birds had become comparatively settled on their feeding grounds. The flight had all but passed when I saw the landlord with Andrew approaching with the team from the bluffs. I walked out to the road, carrying four birds, to meet them, leaving the rest in the field.

"I told you so," they both began in a breath; "you have only four birds while we have five, and judging from the shooting we heard you have fired about five shots for every goose."

"Your shot were too small," began Andrew, in a half apologetic tone; "you see B B's are about the right thing for geese"

"Why don't your dog come in?" asked the landlord, as he observed old Sport out in the field, where he remained guarding the remainder of my game.

Suppose we go out after him. "Not much," said the landlord, 'let him walk; you don't catch me driving around to pick up a dog!" I persuaded him to drive out, and you can imagine the surprise of each of my friends as they saw the pile of geese and brant over which he was standing guard.

"Seventeen!" they ejaculated, as we threw them into the wagon. "Good heavens, man, where did you get them all?" they inquired. They just came to me because I was in the right place, I replied.

"Well, let's be going," said the landlord.

One moment please, I replied, and at my bidding old Sport started off at a lively pace. Reaching the edge of the cornfield he sped into the grass of the prairie leading to the bluff, and was soon chasing a wing tipped goose, which he soon secured and came dragging toward us.

Another detour, this time into the corn field, and he secured another one which he found some 400 yards away quite dead.

Now, I said, we will drive a little to the right of the road in returning and, if I mistake not, we will get another, and so it proved.

"I would never have believed it," said Andrew, "how did you get such shooting?"

Easily enough, I replied. Don't you remember that the landlord here told us that this corn field was the nearest one by nearly half a mile to the bluff. Well, don't you see the birds all make for the fields and in crossing to reach the farther and larger fields, not only approach this one direct, but also from either hand, crossing it diagonally and thus increasing my opportunities for shots.

Again, your position was such that the birds coming up from the valley could see the ones you shot at deflect from their course when you fired as well as to hear the report of your gun, and hence gave you a wide birth, and you were not given another shot until a new flight had come on.

As it was still quite early, we concluded to return to town as the birds had not thought of returning to the river yet, and would not until about 10 o'clock. By that hour we had breakfasted and returned to the river. Securing an old skiff, we selected a point above the large open sand bar where the birds were wont to light and spend the night as well as the midday hours.

My friend was disposed to cut some brush and erect a blind and it was only after my threat to leave him and select a point farther down the stream for myself that he gave over the idea.

I then went back and secured two barrels which we soon sunk in the sand so that we could stand in them and by crouching down would be almost entirely out of sight, This ruse proved most successful. The geese began coming in shortly. The Canada geese would come in circles lower and lower finally flying along over the center of the stream, coming quite near us as a rule, and affording easy shooting.

The brant would come back high in the air until almost directly over their lighting place and then would begin that swift and irregular darting motion, as each one of the flock would take a shoot for himself to reach the resting place

These presented some hard shots, while swiftly falling or flying in a downward and slanting direction. The most difficult ones we found to be those coming towards us. As a result of our days shoot, we had all told 77 geese and brant with a few ducks. This method of ambush on the river bars is not I am persuaded but little used and I am satisfied is one of the most satisfactory methods yet devised for capturing the wild goose. HONK.

Elliott Retains the Cup.

On the 24th of last month. Mr. J. A. R. Elliott, of Kansas City, defeated Mr. W. W. Crosby in a match for the American Field champion's cup. It was expected that Crosby would run Elliot a close match, but the results proved such premonitions to have been ill founded as Elliott won the contest with ease.

Three men have assayed to wrest the cup from Elliott since he won it by defeating W. C. Beck, at Indianapolis, thus securing the trophy. The former contestants were Mr. S. Gay, of Terre Haute, and James E. Hagerty, of St. Louis. The contest in the last match is shown by the score given below.

The conditions were:

Fifty live birds, $50 a side, London Gun Club rules, which specifies 12-gauge guns, 30 yards rise.

Elliott..... 2 x 2 1 2 2 2 2 2 1 2 2 2 2 2 2 2 0 1 2 2 1 1 1 2 1
2 2 1 1 2 1 2 1 1 2 2 2 2 2 2 2 2 2 1 2* 1 2 1 1—48

Crosby..... 2 1 2 1 x 0 1 2 1 1 2 2 1 2 0 0 1 0 0 *2 1 * 1
0 1 1 2 1 0 2 2 1 2 2 2 1 3 2 1 1 1 0 1 2 2 2 0—39

The figure 2 denotes killed with second barrel; the asterick dead out of bounds.

Advices from Fresno, Madera and vicinities about these active centers, inform us that the wild goose shooting has been fair, while duck shooting has been the one leading interest and object of the active sportsmen. The uplands seem to be favored with a large number of Curlew, and some fine shooting has been enjoyed at these splendid game birds. In no section of the country can a greater variety of fine game be brought to ground than in this State, a fact which we trust our sportsmen fully appreciate and will by every laudable means seek to perpetuate.

Swan Shooting on the Columbia River.

Many are the sportsmen who can tell of the variety of the game they have killed, from moose to Long Island chippies. Comparatively few, however, have, it is safe to say, enjoyed such rare sport as Mr. Thomas G. Farrell describes in an interesting article in Outing, for December, under the above title. He says:

"As these birds breed in the Arctic, they leave the United States early in the spring. Upon the approach of cold weather in the high latitudes, they once more band themselves together and hie themselves toward the sunny south. If a person happens to be near one of their winter resorts on the Columbia River about November 1, he will probably hear their not unmusical voices high in the air. Here they remain the entire winter. Probably the chief attraction of this region for these huge birds is the presence in many lakes and sloughs of the aquatic plant known as the "wapato." The roots of the plant terminate in a number of bulbs about the size of an Italian chestnut. These bulbs are very much sought after by the greedy swan and equally greedy canvass back, which two birds possess to a greater degree than any other member of the duck family the faculty of uprooting them.

State Sportsmen, Attention!

We sincerely trust that no effort will be spared by the sporting organizations of the State, as well as the sporting men individually, to combine and present an unbroken front at the coming session of the legislature, to the end that the game interests may be fully and effectively presented to our lawmakers Let nothing be left to be done at the last moment, but to present the full force of the sporting interests of the State, as the voice of one man, in this all important matter.

It must be remembered that nothing can be done save by active and aggressive work. Every member of the legislature is taken up, so to speak, with some special measure which he desires to see become a law; his attention can only be secured by repeated personal appeals to this issue by those who are heartily and thoroughly in earnest in the matter. Let all of the sportsmen unite to this end. It is essential that some one or more parties should be on hand to champion the cause of the proposed game law. Money will be needed to be expended in defraying the necessary expenses of these envoys. What is being done to this end? A little timely action will be of the first importance to our cause. Let it not go by default.

The attention of sportsmen is called to the excellent house of Clabrough, Golcher & Co., 630 and 632 Montgomery street, this city. They handle sporting goods of every description and of the very best quality, at low prices.

The Winnemucca Silver State says: Humboldt lake is literally alive with water fowl. There are thousands of ducks, mostly of canvassback and mallard varieties, along the shore, beside a good sprinkling of geese, swans and pelicans.

During the past week there has been unusually fine shooting in Mendocino County. Large numbers of our gunners have returned from hunting excursions in that region, more than satisfied with the fine bags of quail secured.

Since the cloudy days have come on, the birds lay better and the dogs have a more favorable opportunity to do their work well.

Mr. Charles Macalester, the clever sportsman who visited this vicinity recently, is lond in his praise of California's shooting grounds, as well as the generosity and warm heartedness of our sportsmen. A thorough gentlemen, courteously received and entertained, is the very best advertisement a State or organization can send out to the world.

New York sportsmen are making a strong and determined fight to have a law passed which shall prohibit the hounding of deer altogether. At a meeting of the New York Commission for the codification of the game and fish laws of the State, held at Albany November 19th, a large number of sportsmen appeared and argued in favor of such action, while others preferred that the open period, which permits hounding, should only be shortened. All agreed that a a clause would be beneficial which would prohibit the killing of deer in the water, to which they resort when closely pressed by the hounds.

From a private letter from our old time friend, Mr. R. C. Moore, written from Corpus Christi, Texas, we extract the following on turkey hunting near that place:

"We started out last week with the view of spending some days in the fields. The weather was pleasant and every surrounding most favorable. After making some fine turns for quail, which in this vicinity are quite plentiful, we decided to try our hand at turkey shooting. Early on the following morning we set out, and before day we found ourselves some three miles from the ranch where we had been stopping. The morning was peculiarly fitting for the sport; the air was bracing, and but the faintest breeze was blowing from the gulf. We, four of us being in the party, stationed ourselves about in the timber, where one of our party said that we would be sure to find the birds. I had selected a station apart from my friends, and perhaps some 500 yards distant from them. It was now becoming quite light. I had listened for some moments when I heard the music of an old gobbler off to my left some distance. This, one of my companions succeeded in killing a few moments later. I changed my position to the further side of the ridge, and succeeded in calling up a fine hen, which I killed at long range. This ended our shooting at that place, and we betook ourselves to quail shooting with the dogs. It may not be such 'royal sport,' but to my mind it is much more pleasurable."

ROD.

Fish Protection at San Diego.

The citizens of San Diego are becoming interested in the protection of the fish near that city, and have recently held meetings for the purpose of protecting the fish interests in that vicinity. The San Diegan of recent date has this to say on the subject:

"There is a widespread interest manifested in the move being made by James Edward Friend to organize a Protective Fish Association in San Diego.

In canvassing the matter the San Diegan finds that the scheme proposed strikes the popular chord, It only needed a leader to insure success, and to night's gathering will represent lawyers, doctors, business men, retired capitalists and lovers of sport generally. The papers of the city, daily, weekly and monthly, are cordially invited to send representatives, so that the power of the press may be brought to bear.

As Cap Friend says: "This matter is more important than most persons would suppose. The depletion of San Diego bay by allowing Chinamen to destroy the small fish and in catching the larger ones, means a time when we will have none left to propagate the species. As a rule, these pan fish run in schools of hundreds of thousands in number. The heathens watch for these schools and capture at times almost an entire school. They drag the catch on to the beach, pick out what they can dry and sell and leave the rest to perish.

"What we want is not only the law enforced as it now stands, but a new law that will prohibit seining in San Diego bay altogether. An association, such as I hope to see this one made, will exert a great influence in that direction."

This is a move in the right direction, and we sincerely trust that other sections of the state will fall into line until every important point will have an organized body, whose business it will be to assist the public officers in their efforts to have the laws enforced. By agitation alone may the defects of our present laws be shown, and a better law enacted in its stead.

A few determined men, working in harmony to this end, will not fail in accomplishing great good.

Laws as They are Made.

The ease with which the statutes of this State are wiped ont, is evidenced by the following action of the Board of Supervisors of Tehama County. It is done with as much ease as you would brush a fly off your nose. They legislate as follows, in order to protect the fish interests within that county:

ORDINANCE NO. 17 OF TEHAMA COUNTY, CALIFORNIA, RELATING TO FISHING.

The Board of Supervisors of the county of Tehama do ordain as follows:

Section 1. For the purpose of catching shad or salmon or any other fish, in the public waters of this State, within this county, the size of the meshes in nets and seines shall be four inches in length when drawn closely together and measured inside the knot, or of some greater size, provided that from the time this ordinance takes effect and to and until the first day of December 1890, it shall be lawful to fish with and use seines and nets and meshes of which shall be three inches in size.

Section 2. Any person who shall, for the purpose of catching shad or salmon or any other fish, in any public waters of this State within this country, fish with or use any seine or net, the meshes of which, when drawn closely together and measured inside the knot, are less than four inches, is guilty of a misdemeanor, and upon conviction shall be fined not less than fifty dollars nor more than two hundred dollars, or by imprisonment in the county jail not to exceed two hundred days, or by both such fine and imprisonment.

Section 3. This ordinance before taking effect shall be published for one week in the Red Bluff Daily News, and shall take effect on the 27th day of October, 1890.

Passed and approved by the Board of Supervisors of the county of Tehama, State of California, this 10th day of October, 1890, by the following vote: Ayes, Supervisors Hugh Mooney, J. C. Turner, M. R Hook and H. Kraft.

In witness whereof I have hereunto set my hand as Chairman of the Board of Supervisors of Tehama County, California, and caused the same to be attested by the Clerk of said Board, this 10th day of October, 1890.

G. W. EATON,
Chairman of Board of Supervisors.
Attest: W. R. HALL,
Clerk of said Board.

The above ordinance is but the logical and necessary result of the miserable provisions now on our statute books relative to the assumed protection of game and fish. Sec. 634 of the Penal Code provides that the meshes of a net or sein shall not be less than seven and a half inches. Then comes Sec. 4046 of the Political Code which provides that the Supervisors may pass ordinances "to make regulations for the protection of game, fish and shell fish. When such regulations are made relating to game and fish, the laws of the State for the protection thereof are suspended in said county." The difficulty lies in the fact that our State law is so constructed as to be of little or no value for the purpose intended. If the position of the Tehama Board be legally correct, and we cannot think for a moment that it is, then where would this power end? That the effect of the above quoted ordinance is a deadly blow at the fish interests of that county, no one can question. But as we have before said, the fault lies in the general law, which, to the detriment of all good law, delegates to the board of the several counties the power, which justly inheres only in the legislature itself—that of enacting laws. The remedy, and there is but one that will prove effective, is to wipe out the old statute touching this question, and enact a new law in its stead which shall be uniform in its application, and in no sense to give to the county boards any power whatever to alter or amend any of its provisions.

In the death of Francis Endicott, which occurred on the 14th of last month at New York City, the angling fraternity looses one of its most gifted representatives. He wielded a ready pen; much that was admirable for brightness and wit appeared in Porter's Spirit of the Times over the cognomen "Ted Grayson"; he was for some time angling editor of Outing Magazine and recent President of the National Rod and Reel Association.

A Colossal Aquarium.

The following account of the joint action of the United States and State Fish Commissioners of the Union, assembled in joint convention at Chicago recently, is taken from the American Field. It outlines a plan which will give to the world's fair one of its most interesting and valuable exhibits. Perhaps no more favorable opportunity will ever be presented to impress upon the public mind the importance of fish culture. It will prove a public educator on the question of the first force and importance. Of this meeting, our esteemed contemporary reports the following action taken:

The United States and State fish commissioners, assembled in Chicago last week for the purpose of determining the nature of the exhibits and the amount of space needed for the same, during the World's Columbian Exposition in that city, have practically agreed upon an unparalleled fish exhibit.

Three plans were proposed, and constituted the discussion of the last meeting. One was whether the States should each give a separate exhibit; but this was concluded to be too expensive. Another scheme proposed was a collective exhibit of all the States, but this did not seem to meet general approval. The general opinion was that an aquarian exhibit of all the States, each exhibit retaining the identity of its State, under one building adjoined to the Government building, would be the most economical.

Secretary Butterworth made a few remarks, in which he brought out the importance of the fish hatcheries. He said that Congress ought to make a large appropriation for an exhibit of this kind and that as a member of the Government, he will help the project along as much as he can. The following resolution was introduced by Mr. S. P. Bartlett, and was carried unanimously:

Resolved, That a committee of the Commission be appointed by the chair to make a proper statement of the needs of the United States and various commissions in making a fish exhibit, and asking sufficient appropriation to make an exhibit commensurate with the occasion.

The space asked by the Commissioners represents an area of 120,000 square feet to be occupied by the three departments of the exhibit. The first department is to be under the direct charge of Capt. J. W. Collius of the United States Fish Commission, and the second department to contain the exhibits of the separate States and to be under their separate control. In addition, it is intended to exhibit all manner of things relating to fish, this exhibit to be perfected by the United States and State Commissions in every detail.

The most important matter settled was the selection of a committee consisting of Capt. Collins, United States Fish Commission; Mr Whittaker, of the Michigan Commission; William H. Bowman, of the New York Commission; E. B. Hodge, of New Hampshire and W. L. May, of Nebraska, to prepare and present to Congress a memorial setting forth the desire of the commissioners for a large and suitable building for the State exhibits. These exhibits shall be of a permanent order, as the Commission, in case Congress sees fit to provide a suitable aquarium, intends to present the exhibits to the city of Chicago. Thus will be placed in Chicago for all time the finest aquarium, perhaps, in the world. The only return asked for the commissioners' gift will be the expense of keeping the same while owned by the city.

The final settlement of all questions before the Commission will take place in Detroit Thursday, December 4th.

Salmon in Yellow Stone Park.

The United States Fish Commission has successfully carried out its plan to stock the waters of the Yellowstone National Park with salmon.

The result of their labors is evidenced by the deposit of 24 012 lake front in Shoshone Lake; 12,013 lake trout and 3,850 Loch Leven trout were placed in Lewis Lake; 7,875 brook trout were placed in the West Fork of Gardiner River; 9,800 Van Behr trout were placed in Nez Perces Creek, while 10,000 white fish were placed in the Yellowstone River above the falls.

The fish were all in good healthy condition, mostly yearlings.

The total number introduced was 70,400, and it is expected that these will soon supply the waters well with fish. Food is announced as being found in abundance in all of these waters for salmon and other conditions are believed to be most favorable for their sustenance and development.

Salmon Culture in Oregon.

The culture of the salmon is receiving much attention from the Oregon authorities. The Seattle Press has this to record of their work of recent date:

"The spawning season at the Clacamas salmon hatchery has closed. The outlook at the beginning of the season was rather discouraging. high water having swept out the rock put in to stop the fish, allowing all the early run, which was very large, to go up the river. Nevertheless 5,859,000 eggs have been secured, about 90 per cent of which will arrive at the proper stages for being put into the river.

The first eggs taken were sent to the hatchery at Warrendale, in the Columbia, and a lot of these are hatched and will be put in the river in about three weeks. The number of eggs taken last season by Superintendent Livingstone was only 4,500,000.

Flax or silk lines may be oiled advantageously, not so with cotton, as oil or grease of any nature quickly rots them.

Green Lake, Maine, has been stocked with 15,000 Loch Leven trout, 15,000 land locked salmon and 5,000 Alpine trout, by the United States Fish Commission.

Fishing in the bay is fine at almost any point. Splendid catches of perch, rock cod and smelt are being taken daily. It is rather tame sport, however, yet it serves to pass the time in the absence of better.

The Dixon Tribune says: Mr. J. M. Bassford, Jr., of Vacaville, is prominently mentioned as a suitable man to be appointed Fish Commissioner." The appointment would meet with universal favor. There is no more thoroughly qualified gentleman in the State for that position. He would have the fish and game interests at heart. A more ardent Waltonian cannot be found on the coast.

Mr. F. P. Callundan, Chief of Patrol of the Fish Commission, returned the fore part of the week, from a trip through Marin and Mendocino counties. He reports the streams of those districts very low and everything quiet. He found quail in great abundance, and says that there can be no better shooting grounds in the country than those furnished by the above mentioned districts.

Rainbow trout were introduced into Colorado waters some years ago, and their growth has been surprising. They thrive in a wonderful manner and are multiplying rapidly. Splendid specimens of 5 lbs. and even of greater size have been taken there this season.

To dress a hemp or flax line so as to render it waterproof and at the same time prevent it from kinking, let it lie for two or three days in a mixture of linseed oil, 12 parts; gold size, 2 parts; and varnish, 3 parts. Then take it out of the mixture and stretch it out to dry, carefully rubbing out all the superfluous oil. Repeat this operation two or three times and your line will be in first class condition.

Cotton lines should be subjected to a treatment of the following mixture: A tablespoonful of Brunswick black to a quarter pint of turpentine or naptha, in order to render them stiff enough to work well, as they are too pliable and light in their natural state. The mixture should be heated by placing in a vessel and the latter placed in boiling water.

We would again speak of the importance of our readers putting away their rods and lines in good condition; remember that if this is not done properly, that next spring will find you in a worse condition than if you had neither rod or line. Oil, rub dry and place carefully away, touching your hooks with oil, but being careful that the gut is not touched with the oil or you will ruin it.

The miserable heathen whom Mr. Callundan arrested recently for having striped bass in his possession of less weight than 8 lbs., which is the minimum weight of this species, which may be lawfully taken in the waters of this State, forfeited the $50 put up for his appearance. It is to be hoped that any future detection of violators of the law in this regard may be even more severely punished.

These market fishermen, most of whom are Chinese and Italian, are quite sly in evading the provisions of the statute, but as a close watch is now kept over the markets of the city, and as the authorities are aware of the past practices of these sharpers, in shipping illegal catches to the interior towns, it is presumable that future violations of this nature will be few and far between.

The season about closing, says the Forest and Stream, has been notable for success in collecting eggs of White fish by the United States Fish Commission, especially in Lake Michigan. The Alpena station, with a capacity of 45,000,000 eggs, is full, and eggs will be sent by messenger from there to the new station at Duluth, Minnesota. At the Put-in-Bay station, in Lake Erie, about 500 jars, holding 150,000 eggs each, have been filled. The station of the Ohio Commission at Sandusky is being filled by the U. S. Commission with eggs from the vicinity of Toledo and Port Clinton. After the eggs are carried far enough forward to bear shipment, many of them will be divided among State Commissioners who have already applied for them; the distribution will include New York, Wisconsin and some other States having suitable waters. It is evident that whitefish are abundant and that artificial propagation of this species is bringing the desired results.

There can be but little question of the fact that the best fly for use in one locality, will not prove the best in another section of the country. For instance, the insects on which the fish of Florida feed are largely different from those found in California, and those of this State in turn are different from those of Michigan.

The true sportsman will not fish with bait of any nature, but will confine himself to artificial flies. If these latter are made to correspond to the insects upon which the fish of a given locality feed, the catch of the angler using them will, no doubt, be noticably increased.

A close study of this question, and repeated experiments in this direction, has long since demonstrated its entire practicability and worth. It would therefore seem wise in the angling fraternity generally to encourage the manufacture of flies copied after the insects found in the regions where they desire to follow the sport.

Mr. Warner, the wholesale tackle maker of Redditch, tells me, says the Fishing Gazette, that he has made several rods ringed on both sides, and that they answer extremely well, the rods keeping very straight. The idea, I need hardly point out, is that by using the rod sometimes on one side and sometimes on the other, it is kept straight far longer than if used in the ordinary way. Messrs. Foster, of Ashbourne, have, I believe, also fitted rods in this way, their peculiar reels, which are let into the butts of the rod, working in very well with the novel arrangement of ring. The top ring is a difficulty, which is got over by using a Bickerdyke ring. Two top rings, one for each side of the rod, could not possibly be arranged. The winch fittings have to take a winch on either side of the rod, and as to that there is no difficulty. The best form of the Weeger fittings is the same all round, while for the ordinary flat rings a slot cut at the back of the rod is all that is necessary. The idea seems a good one, particularly for wooden rods, but the arrangement would look clumsy if large upright rings were used. Irish anglers, who are particular about their rods keeping straight, almost invariably fix the winch on the rod the reverse way to that followed by English anglers. Immediately they hook a fish they turn the reel up and do the playing on the back of the rod, on which if there is plenty of rings the line for the most part rests. A rod is certainly less strained if used in this way than if the fish is played in the English fashion.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, 177—179 BROADWAY.

Advertising Rates

Per Square (half inch)	
One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff

San Francisco, Saturday, Dec. 6, 1890.

The Pacific Coast Trotting Horse Breeders' Association.

On December 1st the annual meeting of the P. C. T. H. B. A. was held at the rooms of the Association, 313 Bush St., twenty members being present and responding to the roll call.

Owing to the absence of Hon. F. L. Coombs, President of the Association, the chair was occupied by vice-President F. H. Burke. After the meeting had been called to order, the assistant Secretary read the following letter, which had been forwarded by the President.

NAPA, Nov. 24th, 1890,

TO THE MEMBERS OF THE P. C. T. H. B. A.,

GENTLEMEN:—A business engagement in the city of New York precludes the possibility of my attendance upon the annual meeting of your Association. The Secretary will submit a report showing all the receipts and expenditures of the Association for the past year. While it cannot be said that it has made money, yet it stands to-day upon a good financial basis, which demonstrates that even under adverse circumstances it has been a success. The Association it seems to me can in the future be a factor of much good. The giving of large purses is an encouragement to breeders, and a strict and honest administration of the laws regulating racing events will encourage people about to engage in the enterprise of raising stock. I would recommend that a committee be appointed for the purpose of framing a bill to be presented to the next Legislature which, in the event of its becoming a law, would enable the members of the Association to form themselves into a corporation. Where there is a mutual benefit there should be a joint liability and the formation of a corporation fixing a liability upon the members. I think the present law upon that question, inadequate to meet the purposes of this Association.

Very respectfully yours,

F. L. COOMBS, President.

The President's letter having been placed on the table for the time being, the Secretary's report was then read, which is as follows:

SECRETARY'S REPORT.

MR. PRESIDENT AND GENTLEMEN:—At a meeting of the Board of Directors held on January 15th last, it was decided to hold but one racing meeting of this Association this year, and proposals were solicited from the Track Associations in the following places: San Francisco, Oakland, Sacramento, Stockton, Santa Rosa, San Jose, Los Angeles, Petaluma and Napa.

Bids were received from the Bay District Association and the Napa Agricultural Society.

The Bay District Association offering the use of their track for $500, or with the wheel privilege for $1,000, reserving the hotel and shed privileges, and requiring this Association to put the track in order at their own expense.

The Napa Agricultural Society offering to put their track in condition and keep the track and grounds in condition and give this Association all privileges free, besides guaranteeing a special train each day from San Francisco, with the fare for round trip $2.

The bid from the Napa Agricultural Society was accepted, and the meeting held on that track seven days, from Oct. 11th to 18th. The meeting will long be a memorable one on account of the wonderful performance of the yearling Freedom, who trotted a mile in 2:29¾, being the first yearling to enter the list, and beating by 1¾ seconds the yearling record of the world previously held by Norlain.

The members of the Association who were present also had the pleasure of seeing Homestake trot two consecutive heats in a race in 2:14¼ and 2:14¼, which are the fastest two consecutive heats ever made in a contest on this coast.

Stamboul also lowered his record made last year of 2:12¼ to 2:11½, and there were many other speed contests which are worthy of notice.

The following is a report of the moneys received and expended by this Association:

RECEIPTS.

Entrance to purses and stakes	$11,015	
Membership fees	850	
Annual dues	1,065	
Pool privilege	1,575.80	
Other privileges	1,144 00

		$ 584 00
		$ 2,234.63

The present net cash on hand belonging to the General Fund of this Association is $1,478.63.

Respectfully submitted,

JAS. P. KERR, Secretary.

A report was then read from Captain N. T. Smith, Treasurer of the Association, and the funds in the treasury were found to agree with the report read by the Secretary.

The President then announced that new business was in order, whereupon the floor was taken by Jos. Cairn Simpson of Oakland. Mr. Simpson read a long communication to the Association in which he stated that no fault whatever could be found with the work performed by the Secretary and assistant Secretary, but that he considered that the single sheet posters which had been issued were not what they might have been, and that the picture in the center of the poster was enough to make laughing stock of the members. He also said that the $775 charged by the Secretary for room rent and work performed since the 1st of January last, was very extravagant, and that he would agree to furnish rooms and a Secretary to perform the work for the sum of $300 per annum. Upon Mr. Simpson's taking his seat, Mr. Page stated to the society that the reading of Mr. Simpson's communication was altogether out of place, but attention being called to the fact that there is no printed order of business in the By-laws of the Association, a motion was made by Mr. Simpson, seconded by Mr. Kerr, that Mr. Simpson's communication be referred to the Board of Directors.

On motion of Mr. Loeber, which was duly seconded the letter from President Coombs was taken up, and a committee appointed for incorporation, the chair naming the following gentlemen as said committee: Col. H. I Thornton, Hon. W. W. Stow and F. L Coombs.

The next business taken up was the election of three members to act on the Board of Directors, and on motion of Mr. Tompkins, the Secretary was instructed to cast a ballot of the Association for the re-election of F. W. Loeber, M. Salisbury and W. S Hobart.

Mr. Loeber moved, which was duly seconded that the sense of the meeting be that there shall be an adjourned meeting of the Association three months hence for the purpose of amending Section I, Article II, so as to enlarge the Board of Directors to fifteen instead of eleven, and also at the election of the additional members of the Board that it be understood that they will classify themselves according to their judgment and pleasure under the provisions of the constitution.

On Tuesday the meeting adjourned with the understanding that the members shall meet again on March 4th, 1891.

On Tuesday, Dec. 2nd, a Directors' Meeting was held, there being present F. H. Burke, G. Valensin, M. Salisbury, A. T. Hatch, Wilfred Page, Irvin Ayres and F. W. Loeber.

On motion by Mr. Hatch, seconded by Mr. Ayres, the Secretary was instructed to cast a ballot for the Board for the re-election of the President, first and second Vice Presidents.

On motion of Mr. Page, Capt. N. T. Smith was re-elected Treasurer for the ensuing year.

The Board then went into a committee of the whole for the purpose of visiting the rooms which had been offered to the Association by Mr. Simpson, and to take into consideration his proposition of furnishing rooms and a competent man for Secretary. On returning from visiting the rooms which had been mentioned, the Board went into executive session, and on motion of Mr. Ayres, seconded by Mr. Loeber, a resolution was passed offering Mr. Kerr a salary of $750 per annum for his services as Secretary, and rent of the rooms heretofore occupied by the Association. The motion being put and carried, Mr. Kerr was called to have the proposition put to him, which he refused. Mr. Loeber then moved that the resolution be amended to read $900 per annum, which motion was put and carried, and Mr. Kerr elected Secretary for the coming year.

The report as given above will, we are sure, be satisfactory to all the members of the Association, many of whom were afraid that owing to the limited attendance, at the race meeting at Napa, that an assessment would have to be levied. However, it will be seen that there is about as much money on hand for a balance this year as there was last, and as undoubtedly the next trotting meeting of the Association will be held in or around San Francisco, it is but fair to assume that at the end of next season, there will be a much larger balance to the credit of the Association than there is for the year 1890.

The above statements are enough to prove that the organization is on a good, sound, financial basis and, has bright prospects before it.

Death of R. B. Cockrill.

On last Monday morning word was received in this city that R B. Cockrill, the well known horseman, of Monterey County, had been killed the evening before, but as no further information was obtained we had to await the news from our Salinas correspondent, and from him we learn that Mr. Cockrill had been somewhat under the weather for at least a month or more, yet still was able to be out and around looking after his business interests. On Monday, in conjunction with several others, he was on the Arroyo Seco ranch below Solidad, engaged in branding a lot of cattle, and late in the afternoon, while riding rapidly to head off some of the stock, he was seen to fall, together with the horse which he was riding; it seemed but a moment until the horse was up and on his feet trotting off. As Mr. Cockrill did not make an appearance, those at hand ran to his assistance and found him breathing his last, there being blood gushing from both his ears and nostrils. It seemed to be the general impression that the horse stumbled and fell, throwing "Bruce," and that in arising, the deceased was kicked in the back of the head. The remains were taken to Salinas, but in deference to the wishes of his family, no autopsy was held, and consequently it will never be known for certain what was the immediate cause of death. "Bruce" Cockrill was well known throughout the State, he having owned quite a number of running horses, prominent among the number being Daisy D. The deceased was born in Missouri and lived for many years in the neighborhood of Santa Rosa, prior to his removal to Monterey County. He was unmarried and in his forty-seventh year. He leaves a mother, brothers and sisters, all of whom are almost distracted by the untimely death of the son and brother.

Death of Electioneer.

On Wednesday evening the sad news was rumored about town that Electioneer was dead, and on making inquiries at headquarters the rumor was found to be only too true. For several months the greatest sire of trotters that ever graced the Pacific Coast, and probably one of the greatest that ever lived in the world, has been badly afflicted with sciatica, and although every meaus known to veterinary science has been used in his behalf, all endeavors proved futile and Electioneer is no more.

Trusting to memory alone and without the authorities to assist us, we would say that he has over sixty in the 2:30 list, with still a considerable number at Palo Alto, which will be handled in the future, to try and place his name at the head of the trotting sires of the country. This year fifteen or sixteen have been placed to his credit, and it is more than likely that even a larger number will be trained to enter the charmed circle in 1891. He was foaled in 1868, at Mr. Backman's Stony Ford Farm, in New York State, and was purchased by Senator Stanford in 1877. After being brought to California it was some time before his great worth and early speed producing proclivities were discovered, and at the day of his death he stood in the eyes of the breeders throughout the United States as the greatest producer of early speed that this country has ever seen.

The records that have been made by his get in their two-year-old form, in their three year-old form, and in their four-year-old form stand without a precedent in our trotting horse history, and for years to come the fame of Electioneer will stand as a bright and shining mark for all owners of trotting stallions to try and beat. There have been some who have seen fit to decry the blood of this great stallion as being one that did not train on, although almost everyone is willing to confess that for early maturity, his foals could not be beaten; however, there are no grounds for such a belief as has been amply demonstrated in the cases of Sunol, Palo Alto, Bell Boy, Sphinx, Suisun, Hindoo Rose, Palo Alto Belle, Manzanita, Antevolo, Anteeo, and many others that might be mentioned. As has been stated in the Palo Alto catalogue, Electioneer's is a family of early maturity but not early decay.

We shall take occasion uext week to refer more fully to what Electioneer has done for the trotting horse industries of the Pacific Coast.

Stamboul 2:11.

W. S. Hobart of this city may well be congratulated on the success which attended his horse Stamboul on Saturday last at Stockton, as on that day he succeeded in lowering his record, making a mile in the good time of 2:11. On Wednesday eveniug of last week Mr. Goldsmith came dowu from Stockton and went to San Mateo Stock Farm, where he wished to handle some colts on the following day. While driving a yearling by Sable Wilkes, a chain bit which was being used, gave way and Mr. Goldsmith was precipitated from the sulky, incurring iujuries which prevented his going back to Stockton to drive him again on the following Saturday. Mr. Sam Gamble, Superintendent of Mr. Hobart's Stock Farm, was immediately notified, and after paying Mr. Goldsmith a visit, started immediately for this city and secured the services of the old time reinsman, Orriu Hickok, to pilot Stamboul on the day set for the trial. There was uot a very large crowd in attendance, but the enthusiasm displayed by those present amply made up for the lack in uumbers. After several preliminary jogs which were necessary to warm the horse up, and everything being in readiness, Hickok nodded for the word and was sent off for the mile in which he was destined to break the stallion record of the coast. Instead of coming down close to the pole, Hickok was fully a dozen o fifteen feet out toward the middle of the track, taking that position, as he afterwards said, for the purpose of being able to make a better turn after leaving the wire. The horse was rated excellently, going the first quarter in 33 seconds and to the half mile pole in 1:05½. At the half mile pole Willis Parker had been stationed to signify to Hickok how fast he was going, the driver not carrying a watch himself. As he came to the pole, Hickok called, "How fast?" aud Parker answered, "1:05," the fractiou Hickok did not hear, and called again, Parker shouting "1:05½." This of itself took some time, and it is not to be wondered at that the third quarter was not negotiated in less than 33¾ seconds. On the third quarter Hickok called for Whiting, who was driving the runner, to come up, but Whiting misunderstood his instructions and kept behind, so the horse was simply going on his own courage and not receiving as much advantage as he might have had if the runner had been close to him. Turning into the homestretch, Stamboul came with the speed of the wind, and the last quarter was negotiated in 31¾ seconds, although there were many who timed the last quarter separately in 31½. The timers, John C. Shelly, James Thompson and D. Young, sent the announcement up to the judges; time, 2:11. When Hickok dismounted from the sulky he was warmly congratulated on the magnificent feat, but looking up to the blackboard on which the time had been announced, he said, "It is a — pity that he couldn't have knocked off another quarter of a second." In conversation with Mr. Hickok, he stated that having witnessed Nelson in several of his performances this year, he was satisfied in his own mind that Stamboul was the greatest stallion that ever stood on iron, and that he felt assured with another week of good weather the Maine champion would have to lower his colors. Of course it is only problematical now what time could have been made by Stamboul, as the rain of the last few days has taken away any chance that he might have had, as no more trials will be given the son of Sultan this year. Mr. Hickok is also authority for the statement that Stamboul can beat Nelson any mark in the road, that he is a truer trotter, aud finishes his miles in much better shape than does Nelson. Two years in succession has Stamboul been robbed of prospective trials by the elements, and it can only be hoped that next year he will have "better luck."

On the same day Chief Thorne, a two year old pacer, owned by L. U. Shippee, was sent a mile to beat his record of 2:20½. The game young stallion was at his best, and notwithstanding that he made a bad break, owing to interfering with one of his boots, he settled nicely and finished in 2:20, lowering his record by half a second.

Mount Vernon, Princess Alice aud Moses S. were also driven exhibition miles.

Tehama County's Fish Laws.

Elsewhere in this issue will he found a copy of an ordinance passed by the Board of Supervisors of Tehama County, relative to the taking of fish in the waters of that county. It is a striking example of the inefficiency of the present fish and game laws of this state.

No one for a moment will presume that the legislature in passing the law, intended to clothe the County Boards with power to nulify the effect, and utterly destroy the provisions of the law as passed, whenever they chose to do so. The most liberal construction that can be reasonably placed upon such delegated power, is that it should be used and exercised only in the direction of strengthening the law in its purpose to protect the fish and game, save, possibly, the well defined purpose of controlling within reasonable limits, the term of the open season, in which game and fish may be lawfully taken. However the matter may be determined, as to the extent of legislative functions sought to be invested in County Boards by the State law, as it stands, there is no escaping the conclusion, that such provisions are in the highest sense subversive of public justice, as it presents the law on the subject in a manner so diversified as to render its euforcement extremely problematical if not absolutely abortive.

In the ordinance referred to, the Board change the size of the meshes in seins which may be used in the waters of that county, from seven and one-half inches, as stipulated by the State law, to four and one-half inches, and for a given period, to that of three inches. It will be seen that this action will permit all but the entire destruction of the fishing interests of that county.

This action, we sincerely trust, will serve the good purpose at last, of calling the attention of all interested in this matter to the utter inefficiency of the present law, and will thus open up the way for the enactment of such a law by the coming legislature, as will adequately protect the game and fish interests of the State, and be made to apply to each and every section thereof in a uniform manner.

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegrapb.

A. C.

We are inclined to the belief that the pedigree you send in is a bogus one. There is no such animal mentioned in any of the authorities, and moreover we do not know a son of Speculation named Faulkingham. The gentleman mentioned at one time had a stallion called Effingham.

T. C.

I have a gelding seven years old. He has been used steady since a three-year-old and has run many races. He has always been in good health and sound in every way, but very early last spring he was turned to pasture, and was out in a snow storm. He run out until late in July. When he was taken up he was in fine condition apparently, but when he was galloped he made quite a noise in his throat in breathing, the glands appear to be enlarged some. In running his best he can go about six hundred yards and then he will almost choke down. Please advise me what to do to help him.

Answer.—Has he got a discharge from the nostrils? Do the enlarged glands appear hard or soft on pressing them with the fingers? Do they appear to adhere to the bone, or movable to any great extent? Has the horse a cough in the stable, or does he cough when exercised?

S. J. S. R.

Will you please give the pedigree of California Dexter? The horse stood near Marysville in 1873-74, and later near Nape, I think. He was said to be of Hambletonian decent.

Answer,—By Whipples Hambletonian, dam Kate Leslie, said to be by Grey Messenger, (a horse that was also called Great Wes').

T. C.

What is the pedigree and age of Poscora Hayward; also the age and weight of Nelson.

Answer.—Poscore Hayward foaled in 1874, by Billy Hayward 439, dam Poscora Maid by Leonard's Poscora, second dam Scotty by Horner's Black Hawk.

Nelson is eight years old, we do not know his weight.

VETERINARY.

Conducted by Wm. F. Egan, M. R. C. V. S., F. E. V, M. S.

Subscribers to this paper can have advice through this column in all cases of sick or injured horses or cattle by sending an explicit description of the case. Applicants will send their name and address that they may be identified. Questions requiring answers by mail should be accompanied by two dollars, and addressed to Wm, F. Egan, M. R. C. V. S. 1117 Golden Gate Avenue, San Francisco.

Snbscriber.

Dear sir:—I have a trotting mare five years old which is in foal. She is a chronic scourer. She has been troubled that way for the last year. She is apparently sound every other way and does not scour until she is driven about a mile or so. Would you please suggest a remedy for the above in the columns of your valuable paper. Also is the foal likely to be affected.

Answer.—Chronic diarrhœa may be the result of various causes, such as indigestion, faulty food, conformation, nervousness or drinking before exercise.

When it is caused by indigestion, the horse is almost continually grinding his teeth, and has a depraved appetite. His mouth has a sour smell. Sometimes a cough accompanies it, and he has a staring coat. Some food appears to contain something irritating to the stomach and bowels, thereby causing scouring, such as sour hay.

Again, a horse that has a very long body and especially if he has a great space between the point of the hip and the last rib is likely to scour after much exertion.

But what appears to affect your mare most is either nervousness or getting water immediately before work. Give her very little water in the morning and none immediately before work and take her easy for the first mile or two. You might also try feeding her with crushed oats with a little dry bran through it. If this has not a beneficial effect, communicate with us again.

C. H.

I have a five year old colt that can go very fast in harness. He got his off hind leg swollen about a month ago, and now his off fore leg is getting large and two or three sores are breaking out on it.

Please say what is best to do for him.

Answer.—Your colt appears to be getting farcy.

Get some qualified veterinary surgeon to examine him, and do not let him drink or mix with other horses until you do so.

T. B.

Do wolf teeth do any harm to a horse? I have a horse that pulls very hard on the bit, and appears to be always frightened about his mouth. A friend of mine tells me that this is caused by wolf teeth, and that I should knock them out with a chisel and hammer. Please advise me what to do in your next issue.

Answer.—Wolf teeth often irritate the gums, and ought to be removed, but not by knocking them out, which always breaks them, leaving the root behind. Get them removed with forceps, without breaking them it possible.

C. H.

I have a five year old colt that was castrated when a yearling with the canstic clamps. When I took him in to break about two years ago, he had a small enlargement like a testicle on the left side of the scrotum, Since then it has been getting gradually larger up to the present. It is now so large that it interferes with him in walking, and is very sore. What can be done to relieve him?

Answer.—Your colt has got scirrhous cord. Get a qualified veterinary surgeon to remove it. The longer you neglect it, the worse it will get.

W. P. T.

I have a seven-year-old road horse that can go in about 2:45. He has been off his feed for the last four or five months. I got his teeth fixed, but that did not appear to do him any good. Again a traveling dentist told me that he had a bad tooth and that he could fix him so that he would never be troubled with it again if I would give him $10, to be paid in advance, but which he guaranteed to return if I was not thoroughly satisfied that he was cured. He cast the horse and removed the tooth in pieces. Part of the root of the tooth still remains, which he said no man could remove, but that it would never trouble him again. He advised me to feed him on soft food for a week, and that then he could eat anything. At the end of the week the horse was as bad as ever, and the dentist had disappeared. Now the jaw over the tooth is enlarged, and the horse is worse than ever. Could you recommend anything that will relieve him, as I I feel sorry for the way the poor fellow is suffering?

Answer.—Get a good, practical veterinary dentist or a qualified veterinary surgeon to remove the roots by trephining. This is about the only effectual way to remove the root.

A Good Recommendation.

SAN FRANCISCO, CAL., OCT. 29TH, 1890.

MESSRS LEWRENCE WILLIAMS & CO., CLEVELAND, OHIO — GENTLEMEN:—Having recognized the value of your Gombault's Caustic Balsam, from a sample which we procured some months ago, we beg leave to tender you our earnest recommendation of your goods.

The Balsam gave so much satisfaction in the treatment of our horses, that we have several times endeavored to purchase it for troubles which it so easily remedies, but found that it was not established in our market, so we were compelled to content ourselves with less satisfactory medicine.

Yours Truly, C. B. RODE & Co.

All wholesale druggists, also J. O'Kane keep it in stock.

For grubs in horses Simmons Liver Regulator is the best remedy I have found; it has saved many horses and mules for me. Use my name as you wish in praise of the Regulator.—W. A. Cheery, Macon, Ga.

Grim's Gossip.

Jae. Goldsmith, brother of John of the same ilk, has driven in 103 races this season, and to his credit be it said, has won more than half of them.

One of our Eastern exchanges very aptly illustrates the new standard trotting stake as a measure by which "the 2:30 list may be entered by a side door."

Rustica is a young brood mare by Rustic, and is herself in foal to Day Dawn, a son of Dawn 2:18¾. This mare will be sold very cheap and those desiring further particulars can receive full information by addressing this office.

The Valensin Stock Farm has purchased from Charles Green, of this city, a two-year-old filly by Junio, 2:22, dam Sultan Queen by Sultan, 2:24; second dam (the dam of Emma G. 2:27½) by Whipple's Hambletonian 725; third dam Alice Mandeville, 2:34, etc.

As will be seen in the advertising columns, W. Quigg of San Francisco offers for sale the four year old sorrel mare Lady Dexter by Dexter Prince, dam Kitty Thorne 2:31, by Whipple's Hambletonian. Lady Dexter at present is showing better than 2:30, and should be sought for by those who require a stylish and square trotter.

On Thanksgiving afternoon quite a number of persons congregated at the Sacramento track to witness a trotting race between Jno. Kertley's Billy the Kid, Walter Mastin's Black Rock, Worth Ober's Prince and C. F. Taylor's Dexter. The first heat was won by Billy the Kid in 2:46. Black Rock taking the second and third heats in 2:45 and 2:46.

Jno. Donohoo, who is better known throughout the State as "Whispering Johnny', has undertaken the management of the Hanford race course, and will also handle horses there for any who may require his services. Johnny has three or four good ones of his own, and as he is well known as a reliable man, he should do well at his new quarters.

A prominent Eastern breeder has sent to Palo Alto two brood mares which are to be bred to Electricity 2:22. The first of these is by Brown Wilkes 2:21¾, dam Effie by Pilot Jr., and the other is Effie by Pilot Jr. This breeding is more in the form of an experiment to see what the result will be by securing a double infusion of Pilot Jr. blood.

A young mare by Elect, dam by Silverthreads, and a weanling colt out of her are offered for sale in this issue by W. M. Murry, Sacramento. The advertiser claims that for individual merit the two animals mentioned are rarely equalled. Any further particulars desired may be obtained by addressing Mr. Murry whose address is given elsewhere.

Probably one of the hardest things to procure in San Francisco is a well matched team of horses and whenever a nice pair is seen on the road, purchasers are always found in plenty for them. In the advertising columns will be found the announcement that a beautiful pair of young blacks, perfectly sound and gentle, of good size and well bred are for sale and can be had at a reasonable price. The horses can be seen at the Park Driving Stables, corner of Baker and Grove Streets, near the entrance to Golden Gate Park.

It seems but yesterday when I offered $2000 for Guido in his two-year-old form, but was a few minutes too late, as Cy Mulkey had just bought him, paying a good round sum for the son of Double Cross. From the manner in which he has been running since his advent on the Eastern turf there are many who would like to purchase him, and now comes the word that D. T. Pulsifer, the owner of Tenny, is willing to pay $10,000 for the California horse. Messrs. Babb & Perkins who now own Guido may possibly dispose of him before another week rolls around.

Are there any of our readers who can give the California history of a horse called Chloroform, which was imported into this State many years ago? This is the same horse that was at one time known by the sobriquet of "Poche," on account of his extremely meagre tail. He was owned by Mr. Murphy, of San Jose, once, and it was while his property that he obtained the Spanish nick-name. We want to know who brought him to this country, and what pedigree was given for the horse on his arrival. An Australian correspondent has sent a pedigree which tallies somewhat with what was once given for Chloroform.

I never see fine racing horses that I am not uncomfortable at not being one of them. Races would be far finer if horses had their entire management. The only beasts connected with the turf stand on two legs, and it is sad to see horses keep such inferior company. It is well that Americans are becoming interested in raising fine stock, though horses be "unstable" property. Would it not be a great gain to our republic if equal attention were paid to the rearing of men and women? It is a pity that genus homo does not keep pace with genus equus. Fifty-five thousand dollars is offered for a stallion. How insignificant man is in the presence of these figures. He can be bought for much less—when bought at all.—Kate Field's Washington.

Last Wednesday afternoon I had the pleasure of meeting Mr. Peter Kellogg of New York, who is better known to the readers of turf journals as "Hark Comstock." Probably a little more grey than when last seen in New York, but still with the same vim and energy, and just as enthusiastic over the thoroughbred blood in the trotter as he was a decade of years ago. Peter will have but a very short time to stop on this coast, as his business demands an almost immediate return to New York. In the seven or eight days which have been allotted for the visit, trips will be made to Palo Alto, San Mateo and Pleasanton, for the purpose of being able to write more knowingly and understandingly about the youngsters, which are now cropping up at the principal breeding farms in the State.

What a killing the boys did make on Sinfax in the mile and a quarter race run last Saturday. Those who had watched the two year old closely in his work were satisfied that with any kind of a showing, he ought to be able to down his field; and right merrily did the gold and silver roll into the pool box, and up against the bookmakers handed in by those who knew what the Wildidle colt could do. Mr. Mulkey has one of the best two year olds of the year, and if he does not turn out a world beater next season, I shall be sadly disappointed. There is some talk now of instituting a new stake to be run off at the spring meeting of the Association next year, each contributor to put in $500, and the Association will be asked to add a generous amount to the stake. Palo Alto stable, L. U. Shippee, The Undine stable, Mulkey and several others are willing to make entries, and if the matter becomes an accomplished fact, a sensational race may be expected in 1891.

Mr. Fuller of Tacoma, Washington, who has purchased a number of well bred trotting horses in this neighborhood lately, has bought from Mr. Ashby of Oakland, the two year old colt Hungate, by Ashland Almont 3481 dam a thoroughbred mare. Mr. Ashby has a number of well bred trotters which he is willing to take any reasonable price for and bargains may be secured from him at all times.

Since the season first opened Nelson has trotted seven miles in public; the first being at Bangor, Maine, time 2:15¼; Kankakee 2:12 and 2:11½; Rushville 2:11¾; Terre Haute 2:11½; Cambridge City 2:10¾ and Richmond 2:14½. This makes a total average of 2:12 and eleven-twenty-eighths for each mile that he has shown in public. Stamboul has been seen ten different times, the first time at Fresno, where he made 2:13; Napa 2:13½; Napa 2:11½; Bay District Track 2:13; 2:13; 2.13½; and 2:13; Stockton 2:11½; 2:13½; 2:11. This makes an average of 2:12 and eleven-twentieths for the California horse which, while it is the infinitesimal fraction of a second slower than Nelson's time, is really a better average when it is considered that he has trotted three times more than did the Maine horse.

On Thanksgiving Day quite a large crowd assembled at Agricultural Park, Petaluma, to witness the race between Jim Duffy, driven by C Northrup, Fox, who was handled by Ed Tobin, Joe Rooney by Ike Button, Maggie by W. Frost, Letter B by Lee Shaner, and Plough Boy, who was looked after by Dan McGovern. Letter B was favorite in the pools, selling for $5, while Joe Rooney brought $2 and the field $2. The first heat was taken by Letter B in 2:59½; the second, third and fourth heats being won by Plough Boy in 2:38, 2:39 and 2:42. By the way, who is Plough Boy? Between the heats of the race Alcona Jr. was started to beat his record of 2:29, but failed in the attempt, the trials showing 2:37, 2:29¾ and 2:29½.

The State Agricultural Society announces in this issue the closing of entries for the Occident Stakes to be trotted in 1893 for trotting foals of 1890. The entrance fee is $100, of which $10 must accompany the nomination; $15 has to be paid on January 1, 1892; $25 on January 1, 1893 and $50 thirty days before the race. The Occident Cup, the value of which is $400, is added by the Association. The conditions are: mile heats best three in five to harness, the winner to receive the cup and six-tenths of the money paid in; the second colt to receive three tenths and the third one-tenth; there must be five to enter and three to start. All of the other conditions are governed by the National Trotting Association Rules. This has always been a very important event, and it is more than likely will receive as many entries this year as it has done in the past. Entries close January 1, 1891.

J. I. Case, of Racine Wis., recently sold his one-third interest in the Glen View Stock Farm Company, of Louisville Ky., to S. H. Wheeler, of Chicago, who now holds two-thirds interest in this magnificent property. Mr. Case having such a large interest in the business of breeding the light harness horse, felt it necessary to concentrate his interests, and consequently made this sale, and shipped from Glen View to Hickory Grove Farm, Phallas, and thirty-six head of brood mares, weanling colts and fillies, and hereafter his interests will be entirely directed to the advancement of Hickory Grove Farm. He has also sold to Glen View Farm, the black weanling filly Decora, by Director 2:17, dam Echora 2:23½ by Echo, 2nd dam by Jack Hawkins, son of Boston—price $3000. This filly is a full sister to Direct, 2:18¼, and a grand individual.

A few days ago I received from Mr. Corbett the rubber bit which gave way when Mr. Goldsmith came so near losing his life last week at the San Mateo Stock Farm. It was a very fortunate thing for Goldsmith that he was not killed, as the outer rubber covering of the chain had been worn so much that space was left for the saliva to rust the chain, and from usage, had parted in the inside, the metal portion showing that it had been rusted for a long time. While these bits are highly thought of by many prominent drivers throughout the county, still it would be well for all persons using them to make up their minds that twelve months at the outside is the longest limit that they should be kept in use. Some of the California drivers will not use them at all, owing to the fear that an accident might happen just such as occurred to Mr. Goldsmith, yet still there are others who claim they could not get on without them.

The Gentlemen's Driving Association, held a meeting at the Oakland Park on Thanksgiving Day afternoon, for the purpose of winding up the season, which has been prolific of much sport to those who were members of the organization. The first race on the programme was for the 2:30 class of pacers, the entries being Oheron, Sam and Haviland. Sam won the first heat, although they were all very uneteady, in 2:25, Oheron being second and Haviland third. Haviland won the second heat in 2:27; Sam won the third and fourth in 2:26 and 2;27. The second race was for named horses, the entries being Flora, Eva B, and Yoland. Eva B. won the first heat in 2:32½, although Flora ultimately won the race, her best time being 2:32. The third and concluding race of the afternoon was for trotters, best two in three, the entries being Abdallah, Tom and Dan P. Abdallah won the race in 2:50 and 2:46, Dan P. taking the second heat. During the intermission Mr. Hinde worked out Balkan three heats, although his part of the exhibition was not on the programme.

O. K. Lockhart, of Lockhaven Stock Farm, Los Angeles County, writes: In answer to my adv. in your paper I received some thirty replies, and finally purchased Ashwood 5411, foaled in 1886, bred by B. J. Treacy. Ashland Park, Lexington, Ky., sired by Nutwood 600, 2:18¾, dam, Flora Abdallah (dam of Katie Middleton 2:23); 2nd dam, Betty Brooks (granddam of Bonner Boy 2:25½ by Edwards, son of Bell's Copperbottom); 3rd dam by Bean's Slasher; 4th dam by Buzzard, thoroughbred.

Ashwood is a rich chestnut, no white except small star, stands 15.1, and when grown will weigh 1000 pounds. He is a long, bodied, heavily muscled horse, with the best of legs and feet, clean bony head, good neck, heavy mane and tail, and a model in disposition, gait and style. Sam Caton writes: "I saw him go a mile in 2:28¼, and think him a sure '20 performer when older."

His dam was one of the fastest of Abdallah's get and always won a blue ribbon at the Kentucky Fairs. She can be put in the great blood-mare list at any time as a producer, and her daughter Katie Middleton, 2:23, is the dam of Heckothrift 2:24.

The breeding on capacity of his female relatives leads me to believe that Ashwood bred to the standard mares at Lockhaven by Bonnie McGregor 2:13½, Alcazar 2:20¾, Monroe Chief 2:18¼, Del Sur 2:24, Wooleey, Echo and other prepotent strains may be prolific of at least fair roadsters if not trotters.

In conversation with Mr. Valensin a few days ago, he gave the following list of moneys won by Simmocolon 2:19, during the year 1890. First money at Dundee Park $250; third money at Albany in the Clay Stake $250; first money at Mystic Park $250; first money at Hartford $300; first money at Point Breeze Park, Philadelphia $300; first money at Pittsburg $500; first money at Cleveland $1000; second money at Buffalo $500; fourth money at Rochester $1000; first money at Hartford $1500; first and fourth moneys at Springfield $1135; first and fourth moneys at Lexington $1532, making a grand total for the season, $8,517 This is truly a remarkable showing for a five-year-old stallion, and we hope he may be able to show as much money to the good in 1891, as he does this year.

The California State Veterinary Medical Association will hold its regular annual meeting at the Capitol Hotel, Sacramento, on Wednesday, Dec. 10th, 1890. Veterinary surgeons from all over the State are particularly requested to attend as business of vital importance to the profession will be transacted. This Association is really one of the most important in the State to all horse breeders and cattlemen, and should receive the support of all who are directly interested in qualified practioners looking after ailing stock. There are many persons throughout the State to-day practicing as veterinarians, who have never seen the inside of a college, and it is for the purpose of mutual protection that this Association was organized. Among its members are many enthusiastic gentlemen, who wish to place the Association on an even higher plan than it is at present, and it is necessary for the carrying out of their present intentions that all properly qualified graduates shall join the organization. It is to be hoped that this State society will have representatives present at their annual meeting from all sections of the State.

Mr. Lot D. Slocum of this city has sold to the Valensin Stock Farm the handsome filly Moss Rose, who took second money in the Stanford Stakes at Sacramento this year. She is by Antseo, dam Luella by Nutwood, and the breeding is enough to warrant the belief that her progeny should be sure enough trotters. There are two other foals out of the same mare, one of which Mr. Slocum still owns; he is called Don Lot, and has already given indications of being very fast; this colt is now in the hands of Lee Shaner of Petaluma, who has been handling him for a month or two; the other one is a filly owned by De Turk & McGraw of Santa Rosa. She is called Myrtle, and has received some training, although not enough to put her in the 30 list. Next year she will be entered in the Stake Races throughout the circuit and much is expected of her. Mr. Slocum has also leased for another year to the Valensin Farm, the Nutwood mare Marian, her dam being Daisy by General McClellan 144, the next dam being the thoroughbred mare Esperanza. Daisy the dam of Marian is also the dam of Beauty Mc., who easily went into the 2:20 list in the California circuit this year.

On Monday and Tuesday of this week the Directors of the Blood Horse Association partially investigated the chargee which had been made by a daily paper against Joe Narvaez, relative to the race run on Tuesday of last week. Owing to orders received from the management of the paper in question, the reporter did not appear at the Monday meeting, but on Tuesday put in an appearance and pleaded the baby act, by stating that what he wrote was opinions that he had heard expressed on the track, thus showing that he himself was not capable of judging whether the race was run on its merits or not. In answer to the question as to whether he was in the habit of betting on the races which he was sent to report, his answer was in the affirmative, thus clearly showing the animus underlying the report as published. Having given the names of several parties as authority for his statements, the Board adjourned to meet on Monday next, and in the meantime the parties whose names have been used will be asked to appear before the Board and state whether they ever made the remarks that are attributed to them.

One of the best arguments we have recently heard against the kite-shaped tracks is the following from Waterville, Me., says the Terre Haute Express. At a meeting called by the citizens to raise money to build a track, Hod Nelson, owner and driver of the great Nelson 2:10¾, put his name to the paper for $15,000, with the condition that the track should be the old style, saying that he had driven over both and he did not have any faith in the kite-shaped lasting after the newness had worn off.

Since the return of Mr. Hickok he has also suggested an idea that will in all probability do away with the kite-shaped track. Mr. Campau, President of one of the tracks on the "Big Circuit," asked Hickok's advice as to the advisability of building a kite track, and Mr. Hickok's answer is the feeling of many: "You want to build a kite-shaped track here at the beginning of the circuit and get a mark for my horses that they can never make again; no, Mr. Campau, I shall simply keep away from your kite-shaped track and enter on the regulation courses, where my horses will have a chance to fight in the class with which they really belong."

Andy McDowell has not been enjoying the best of health since his advent into Montana; however, by letter, I learn, that he has much improved and that already he has commenced to work on a lot of good colts. He rather chides me for having given John Goldsmith the credit of having more winning mounts than any other driver in California, and I was correct in my assertion for now that Andy has left the State, I did not figure him as being a California driver. It might not be out of place to state, however, that during the present season Andy has won twelve races with Cricket, six with Margaret S, two with Katie S., five with Homestake, one with Gold Medal and one with Vic. H, and at the same time while back East he also drove the Canadian stallion Alvin, who, after he had lost two heats, won the next three in 2:17¼, 2:18¼ and 2:19½; figuring this up it gives Mr. McDowell the same number of wins as is accredited to Mr. Goldsmith. Andy says that after having made a careful examination of the various horses in the Daly string, he has selected several of them that are good enough to bet on. Lord Byron is looking fine and is being jogged from seven to nine miles a day. Prodigal is also spoken of very highly and Andy feels assured that he will have a very fast green one in the son of Pancost. The sensational colt Mascot, of which so much has been said and written, is reported as being as sound as a dollar, and next year he will be driven for a record. Another colt, which is a stranger to Californians, named Deputy, who at present has a record of 2:42, Andy very much fancies and thinks he can get a very low record with him. There is a young filly on the ranch which Andy has evidently fallen in love with, he does not mention her name but says she is another Margaret S. He gives her breeding as being by Director, out of Belle Evans; second dam by Echo. He also states that Yolo Maid will be bred next season to Lord Byron.

Exhibition Games.

PROFESSIONAL AND AMATEUR.

Played at Home and on Interior Diamonds.

SAN FRANCISCO vs. VALLEJOS.

THURSDAY, NOV. 27TH, 1890, AT VALLEJO.

The Amateur Vallejos were no match for the slugging pennant winners and were easily defeated. The Marines took a lead at the start but the Mets by some very connected hitting and loose fielding of their opponents made five runs in the fourth after which they had a walk over. Conghlin and Shaw officiated in the box for the Friscos and Sprague for the Marines. The fielding of the professionals was of a high order while the work of the amateurs did not approsch their usual standard. The score:

Sacrifice hits—Shaw, Hanley, Wise. Wild pitches—Conghlin 2. Passed balls—Farrell 3, Speer 1. Umpire—Kelley.

FRESNO vs. E. T. ALLENS.

THURSDAY, NOV. 27TH, 1890, AT FRESNO.

The Allens first game with the "raisin growers" was well played before the largest assemblage an the grounds of the season. A few fielding and battery errors which were costly in conjunction with light but timely hitting and splendid base running gave Fresno the victory. Both pitchers did phenomenal work allowing but three hits to esch side while Baltz struck out eighteen men and little Howell retired thirteen. They were well supported by Billings and Stanley at the receiving end. The score:

FRESNO vs. E. T. ALLENS.

SATURDAY, NOV. 29TH, 1890, AT FRESNO.

This game, which was hotly contested throughout, was won by the Allens in the ninth inning. Pier and Shelly formed a strong battery against the "Sports," who only made three hits. Philpot and Billings did the box work for the Allens, with Strand supporting well at the receiving end. Baltz put up a magnificent game at first. Conley umpired satisfactorily. The score:

SAN FRANCISCOS vs ALL CALIFORNIAS.

SUNDAY, NOV. 30TH 1890 AT SAN FRANCISCO.

The California League champions grestly surprised Fogarty's all star combination and some seven thousand spectators by defeating the graduated Golden State talent in an intensely exciting game, by the score of 6 to 4. Sammy Shaw pitched remarkable ball for the Mets, having splendid command of his serpentine curves, which kept his heavy hitting opponents guessing all through. His support generally was excellent. Van Haltren and Swett were the battery for the All Californias. Van was rather unsteady, and men sent to bases by his battery errors were in several instances batted home. The stick work of Ebright was a feature, as were catches by Levy, Long, Sweeney and Van Haltren, a stop and throw by Shaw, and magnificent double plays accomplished by Everett, Isaacson and Ebright, Sweeney and Carroll, and Long and Swett. Gagus umpired, doing well, but his decisions did not please several of the Eastern stars, who vigorously kicked, much to the smusement of the audience. The score.

SANTA ROSAS vs. J. L CAHILLS.

SUNDAY, NOV. 30TH, 1890, AT SANTA ROSA.

The champions of the amateur league won this game by hitting Cullen hard and ssfely in the third inning. The general fielding was good, but the Cahills were overmatched in team stick work. The score:

FRESNO vs. E. T ALLENS.

SUNDAY, NOV. 30TH 1890 AT FRESNO.

A large crowd witnessed the last and deciding game of the series of three played by the above teams. The Fresnos put up an errorless fielding game, while the Allens were weak at short. Howell pitched another masterly game with Stanley rendering him admirable support. Baltz was also very effective. Hoffman, of the Stocktons, played with the Fresnos, and "old man" Dallas did good work at second for the Allens. There was considersble kicking in the game at the umpire's decisions, participated in by both sides. The score.

Left on bases—Fresnos, 10; Allens, 6. Wild pitches—Howell, 1; Baltz, 3. Struck out—By Baltz, 9; by Howell, 8. Time of game—One hour and forty-five minutes. Umpire—Conley.

OAKLAND vs. VALLEJOS.

SUNDAY, NOV. 30TH, 1890, AT VALLEJO.

The Oaklands visited Vallejo Sundsy, and made a big mistake in thinking that they could plsy carelessly snd win whenever they pleased. The Marines took every advsntage of the loose hsttery work of Cobb and Lohman, hitting Cobb frequently and hard and rnnning bases at will, which permitted their keeping an even pace with their formidable adversaries all through. In the ninth, by this work they scored two runs, winning handily. Sprague pitched good ball for the Vallejos, receiving encouraging support generally, and particularly from Farrell, Wilson and Maguire. Lee's decisions were questioned by the visitors, but were in all cases substsntiated by the rules. The score:

VALLEJOS.	AB	R	BH	SB	PO	A	E	OAKLANDS.	AB	R	BH	SB	PO	A	E
McGuire, s s	4	0	1	2	2	3	1	Cantillion, 2 b	5	0	0	0	1	0	0

THE CALIFORNIA LEAGUE.

THE STANDING OF THE TEAMS.

By the Sacramentos forfeiting two games to the San Franciscos last week the latter gained the disputed championship The following table shows the correct record at the termination of the season:

CLUBS.	Oakland	Sacramento	San Francisco	Stockton	Games Won	Games Played	Percentage
Oakland	....	20	27	29	76	136	.558
Sacramento	24	....	17	38	79	139	.568
San Francisco	21	28	....	32	81	139	.582
Stockton	15	12	14	....	41	140	.292
Games Lost	60	60	58	99	....	....	....

SUMMARY.	Played	Won	Lost	Percentage
San Francisco	139	81	58	.582
Sacramento	139	79	60	.568
Oakland	136	76	60	.558
Stockton	140	41	99	.292

Jack Fogarty, Cobb snd Lohman have departed for Los Angeles.

Its high time that the base ball averages of the California League were being computed.

It is rumored that John M. Ward is to csptain and play shortstop with the Pittsburg team next season.

Jack Wilson lent the Vallejos valuable sssistance in their games against the champions and ex-champions.

The M. J. Flavins have a cracking good pitcher in Frank Loughran, formerly of the Greenhoods and Pioneers.

Kilroy and Godar of the Sacramentos have returned East, the pitcher to his home in Philadelphia and the third baseman to Cincinnati.

The termination of the All California—San Francisco, and Oaklsnd—Vallejo games last Sunday, produced quite a sensation among the cranks.

Weather permitting, the San Franciscos will play the All Californias Saturday, and the Oaklands will give Fogarty's Stars another rub Sundsy.

Sonny Hoffman is now playing suort for the Friscos. Hoffman, Brittan and Detraze of this team were all players in the North Western League this season.

Everett demonstrated the fact last Sunday that he is a weak man against a "south paw" pitcher. Being a left handed batsman he very properly changed his position in the box batting right handed, but his wielding of the wagon tongue was very unsuccessful. Van Haltren struck him out three times in succession.

Red Armstrong by his underhand methods caused himself to be greatly disliked by the members of the Stockton team on the dishandment of which some of them avowed they wouldn't play on the same team with him again for the salary of Anson and others leaving town completely ignored him not even bidding him good-bye. Armstrong is a good ball plsyer but if he expects to succeed and have the good will of his fel'ow players he will find it necessary to shake his "stool pigeon" proclivities.

The home of President C. L. Gage of the California Amateur League was visited by the Angel of Death last week, who robbed him of his youngest child, a bright, intelligent boy of three years. Gage was devotedly attached to the little fellow who was a happy counter part of himself, and is almost broken hearted. In conversation with the writer, with his voice choked with emotion he pathetically said, "I have lost the brightest spark of my existence" In his affliction Mr. Gage has the heartfelt sympathies of his numberless friends in the base ball profession.

Matt Devine, our Sacramento correspondent, writes that "the Ssramento team for next year will be composed of the ssme men as were on this season's team with the exception of Godar, Roberts and Daly, whose places are to he filled by equslly as capsble players." Such men as Roberts, Godar and Daly are a scarce commodity in the baseball market, and the Sacramento management should appreciate that fact, and if possible hold the Senatorial tesm of favorites intact for another year.—Eo.

Pitcher Baltz should be found with one of the professional teams next season. His work with the Vallejos and Allens this year has been little short of marvellous.

The following to the manager of J. L. Cahill team is self explanatory:

OAKLAND, Dec. 2, '90.

BASEBALL EDITOR BREEDER AND SPORTSMAN:—Seeing through the medium of your valuable paper tuat the Cahill's are plsying good ball, and as Mr. Block said some few weeks since he would like to play the Burlington Club as soon as season was over, and having waited anxiously and vainly for a challenge, and not knowing his address, I would like through BREEDER AND SPORTSMAN'S columns, to let him know we are ready to play his team for $50 to $100 a side, or any amount satisfactory to him. Will be ressdy to post a forfeit in your hands at any time. Hoping to hear from him through the BREEDER AND SPORTSMAN, I remain,

Yours, etc., WILLIAM SMITH,

Manager Burlington B. B. Club, 5th and Washington, Oakland, Cal.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS.

SUMMARY.

From an athletic standpoint the Thanksgiving Day out door meeting of the Olympic Club was a pronounced success The attendance was somewhat limited and in consequence the treasury of the Club was not benefited any by the sum of money collected for tickets of admission. The Winter has fairly set in and for the next few months the rain is liable to interfere with the regular out door practice of the amateurs. The gymnasium athletes are losing no time in preparing themselves for the coming in-door entertainments. The cricket season is over and the oarsmen, not having anything particular in view will shortly begin to abandon their shells until the cold and wet weather is over.

THE GAME OF CRICKET.

The Cricket Clubs have decided to stop practice for the present. A big boom is expected in the Spring, when, it is expected, that the present army of cricketers will be largely reinforced. The clubs will probably have to look out for new grounds next year for the chances are that the West End grounds at Alameda will not be to let when the players meet again.

The Alameda and Burnabey Clubs held meetings on Thursday and Friday evenings respectively but as we had already gone to press the summaries of the proceedings must te held over until next week.

THE WHEEL.

On Thanksgiving Day Golden Gate Park was crowded with wheelmen.

C. M. Culver of the Alameda Bicycle Club is confined to his room in consequence of having contracted a severe cold.

The recent downpour will greatly improve our roads which have lately been "repaired."

The hare and hounds chase which was to have taken place on Sunday last under the auspices of the Alameda Bicycle Club has been postponed in consequence of some of the leading members having been unavoidably prevented from attending.

The wheelmen were disappointed because the Olympic Club did not include a bicycle race on its Thanksgiving Day programme.

Several of the Bay City Wheelmen intend forming themselves into an orchestra for the amusement of their fellow club men during the long winter nights. The orchestra will be composed of guitars, mandolins, banjos, piano and flutes. The gentle notes of the band will prove a great consolation to the scientific members who nightly rack their brains over the chess board, while the music cannot fail to help to steady the hands of the young men who intend entering the billiard tournament.

The most prominent members of the orchestra will be Messrs. Thompson, Sperry, Plummer, Laugton and Stevenson. The band will be composed of about twelve instruments.

Elwell Still practices riding, and is often seen in Golden Gate Park. It would not be at all surprising if he appeared on the racing path again next year.

Messrs. Stevenson Doane, Langhton and Wetmore of the Bay City Wheelmen rode down to San Jose on Saturday evening.

They report the roads, especially on the Alameda side, to be in poor condition.

Mohri of the Bay City Wheelmen has returned from the East. During his absence he visited several of the Eastern clubs, and he brought back some new ideas which will be of great benefit to his club.

On invitation of the management, the Bay City Wheelmen held a club run to the skating rink Thursday evening to witness the exhibition of W. S. Maltby, the champion trick cyclist of the world.

FOOTBALL.

The University football players seem to be losing interest in the game. They are not giving much of their time to practice this season, and of course they cannot expect to earn as much glory as usual.

A series of football games was begun at Central Park last Saturday afternoon. The first game was between the San Franciscos and Oaklands. The grounds were in bad condition and there was no lack of dust.

The Oaklands had to appoint substitutes in place of some of their best men who failed to show up at the appointed time. The teams were made up as follows:

San Franciscos—Right end, Wellington; right tackle, Frick; center guard. Sullivan; center rush, F. Howard; left guard, M. Taylor; left tackle, Rotanzi; left end, Sherrid, quarter-back, Hittel; half-backs, Robin and Taylor; full-back; S. Howard.

Oaklands—Full-back, W. Hall; half-back, C. P. Morse; quarter back, G. W. C. Blethan; center rush, C. Myrick; left guard, W. Ransone; left tackle, C. H. Jones; quarter-back, E Pomeroy; right end, J. Hough; half-back, W. Foote; right tackle, H. Nedderman.

The Oaklands were captained by E. Pomeroy. Hittel was captain of the San Franciscos. J. Chetwood was selected for the position of umpire and E. S. Grisby acted as referee. There was some good playing on both sides, but the match would have been much more interesting had the Oakland's men showed up. The game was won by the San Franciscos with a score of 32 to nothing for the Oaklands.

Thirty thousand people attended the great Yale—Princeton foot-ball game, which was played on Thanksgiving Day. Three hundred people would be considered a big crowd at a a San Francisco game.

AT THE OARS.

Creagh, Terrell, Larkey and Farrell of the Ariele rowed over in a barge from Long Bridge to witness the regatta.

Steve, Flanders, Tank and George Phelan of the Ariel Club were also present in their shell.

The good wife of Billy Growney presented that sculler with a bouncing baby girl a few days ago.

The professionel single scull race which was to have taken place on Thanksgiving Day fell through for lack of entries.

CLUB JOTTINGS.

Great preparations are being made for the "Ladies' Night" exhibition of the Olympic Club, which will take place on Thursday evening next. The musical programme will be quite an innovation.

The officers of the Olympic Club held a meeting on Tuesday evening, when Vice-President E. A. Rix related some of his experiences in the East. Mr. Rix is of the opinion that when the club moves to its own building the Eastern athletic organizations will begin to look upon the Olympic Club of San Francisco as an institution of much importance. He thinks that the American championship games will be held in this city before long.

The following officers were elected by the Reliance Athletic Club of Oakland at the annual meeting on Monday evening last: R. M. Fitgerald, President; J. H. Ames, Vice President; J. W. Tompkins, A. H. Pope, F. Bush, S. G. S. Dunbar and P. H. Remillard, Directors. The club will shortly move to new quarters. A ladies' night will be given before long. The club is in a good financial condition.

Arrangements are now being made to extend the out door grounds of the Olympic Club with a view of establishing a lawn tennis court, which will be the largest in the state when finished.

A billiard tournament will be held in the Olympic Club rooms next month.

The Acme Athletic Club of Oakland will hold an in-door exhibition shortly.

The Fall field day of the University Athletic Club will be held on the campus at Berkeley this afternoon. We are inclined to think that the outside entries will be rather limited owing to the fact that the meeting has not been properly advertized. From the way in which the programme reads many of the athletes are in doubt as to how many of the events are open. The athletic committee should be more particular in future and forward full particulars to the secretaries of the different associate clubs of the P C A A C.

On December 20th the Alpine Amateur Athletic Club will have been in existence one year and on that date the first annual meeting will be held at the club rooms, No 5 Eighth street. An election of officers will be held and many important matters relative to the future interests of the club will be thoroughly discussed. There are now more than 150 names on the membership roll and there is no reason why the club should not continue to gain in popularity. The annual meeting will no doubt be well attended as the nomination of officers will be regarded with great interest by all the members. If capable officers are chosen the future success of the club is assured, but if on the other hand indifferent officers are elected the orgsnization will continue a labor under difficulties.

RUNNERS, WALKERS, JUMPERS, ETC.

S. V. Casady and Eugene Van Court have been appointed delegates to represent the Olympic Athletic Club at the meeting of the P. C. A. A. A.

The Olymyic Musical Club is attracting much attention and many of the Club's sprinters have just discovered that, with careful training, they might make new records by running up to high C.

We are in receipt of a copy of The Olympian for December. Mr. J. P. Bean has enlarged his paper and the present number is a decided improvement in every way over the first issues.

Several of the Alpine members are in favor of holding a short athletic meeting on Christmas Day, at the Bay District track. The Directors will probably come to some conclusion in the matter at their meeting on Tuesday evening next.

The Alpine Club boys were unable to hold their mile run at the Bay District Track last Sunday morning, owing to the rough condition of the course. Several of the members stripped, however, and took mild exercise.

Jarvis is attending to Yates and that youngster is liable to make a good record next year.

John Theobald gave an exhibition of sprint walking at the Olympic Club grounds on Sunday last. Mr. Theobald is entirely out of practice and his gait was very unlike his gait of five or six years ago.

The lady who pinned the medals on the breasts of the winners at the Olympic Grounds on Thanksgiving Day should have been presented with a special gold medal. In walking back and forward to the medal table she did more work than any of the athletes whose names appeared on the programme.

A Successful Field-Day.

Well Managed Olympic Club Sports—Foster Makes a Great Record.

About 800 people attended the Fall handicap games of the Olympic Club, which were held at the new grounds, south of the Golden Gate Park on Thanksgiving Day. For the first time in the history of amateur athletics on the Pacific Coast the different events were decided at the times set for them on the programme, and as a proof of how diligent the game officials were, the last event was called four minutes ahead of time.

To Captain Walter A. Scott and Handicapper George W. Jordan may be attributed the great regularity with which every detail of the meeting was carried through. The handicapping, except in the one mile walk, was very creditable, and the condition of the track and grounds in general was all that could be desired. The official announcer did not fulfill his duties, and those who were not well up in the working of the score board found much difficulty in keeping track of the winners.

The weather was all that audience or contestant could wish for, in fact, a more perfect day could not have been picked out. While the club did not lose, it certainly did not gain any in the money line. There was no excuse for such a small attendance, and those who were present at the first invitation field-day and who failed to patronize on Thanksgiving Day, showed very poor taste in remaining away. Since the club is willing to give occasional invitation field-days and exhibitions, the sport-loving public who are fortunate enough to secure tickets of admission to those free entertainments, should be more than willing to step up with their half dollars when the club sees fit to charge an entrance fee.

The games began promptly at 1:15 o'clock, and were concluded at 3:15.

The mile walk brought out Jarvis, Cook, Yates, Clarke, Landmann and Supple. Jarvis won at scratch, but as he was entirely out of condition, he had no show whatever to win. He walked in good style for a couple of laps, but after that he began to weaken, and on the last lap he stopped, completely used up. Jarvis was the only man in the lot that walked fair throughout the race. Yates, who had won first medal, has improved wonderfully in the last couple of years and with careful handling he may yet get down to championship form. His style is very good, but on more than one occasion he bent his knees, a fault which he should try to remedy. Clark and Supple are both novices. Both men should have been ruled out early in the race, as they did not walk according to the rules that govern heel and toe. Cook was all out of condition, and he made a poor showing in comparison with some of his previous performances. At certain periods of the race his style was very faulty, and the judge was fully justified in ruling him out. Good men should never risk their reputation by entering a handicap race untrained, and both Cook and Jarvis did wrong in starting at all.

The pole vault was rather interesting and the winner, H. C. Head, of the U. C, is a promising young vaulter. S. V. Casady ran a grand race for the Hammersmith medal and his time on the six lap track is nearly equal to the coast record on a straight course. The 100-yard open handicap was well contested, Morse, Gawne, Mahoney and Jellenek especially distinguishing themselves.

The half mile run for O. A. C. members brought out Espanosa and Toomey. McArthur, the record holder, did not start as he had his eye on the mile record. Both men ran fine and made splendid time. Espanosa from scratch made the distance in 2:6½, which proves that he is one of the best men at this distance on the Pacific Coast.

The wrestling and boxing bouts were spirited and the exhibitions were loudly applauded by the spectators. The run for O. A. C. juveniles caused much merriment. The winner, S. E. Holmes, is a very clever young sprinter, and in time may prove to be a good runner. The open 440 yards run was watched with much interest, as Garrieon and Casady were amongst the starters. The former wes not trained and the latter was unable to overcome the heavy handicaps, so the race fell to Morse, with Mahoney a good second.

The shot putting event was very tame, as none of the contestants was powerful enough to put the ball over 32 feet. In the two hurdle races Foster easily proved his superiority over his opponents. He lowered the Pacific Coast records in both cases, and judging from the easy manner in which he ran he stands an excellent chance of changing the American records on some future occasion. The mile run was a picnic for McArthur. Casady, of the Alpine Club, ran himself out. Had Casady remained behind McArthur he would have made a better showing.

Casady trains too hard, and as a general rule on the day of a race he is more or less stale. He is made of good stuff and with judicious training should hold his own with any runner on the coast.

The exhibition three-quarter of a mile walk by G. D. Baird was a farce, and the directors of the O. A. C. should make it their business to see that Mr. Baird is not allowed to make a show of the club again. Baird did not make an effort to walk and every man, woman and child on the grounds were aware of that fact. The run to the top of Mt. Olympus was a very exciting contest, and the result was awaited with bated breath. Toomey had a big advantage over Casady. The Olympian had traveled up and down the mountain several times, and he was quite familiar with the ins and outs of the trail, while Casady began the ascent as a perfect stranger. By clearing 20ft 3in in the long jump Foster surprised every body present, himself in particular. He will probably win that event at next year's championship meeting, in addition to the two hurdle events. The following is a summary of the results:

One mile walk, handicap—World's Amateur record, 6 minutes 29 3 5 seconds, F. P. Murry, New York, Oct. 27, 1883; Pacific Coast Amateur Record.7 minutes 8 seconds, Jas. Jervis, O A C. San Francisco, May 30, 1890.

J. Jervis, O A C, scratch. Albert Cooke, A A A C, 90 yards, C. F. Landman, O A C, 200 yards, H. A. Massey, A A A C, 200 yards, C. J. Armbruster, A A A C, 200 yards, G. W. Armbruster, A A A C, 200 yards, J. F. Clark, A A A C, 200 yards, H. L. Fabry, O A C, 200 yards, C. M. Yates, Jr., O A C, 150 yards. Cavid Supple, L A C, 200; won by Yates, time 7 minutes 3½ seconds; second, Supple.

Pole vault, open handicap—World's Amateur record, 11 feet 7 inches, E. L. Stone, England, June 2. 1888; Pacific Coast Amateur record, 9 feet 4½ inches, J. Purcell, O A C, San Francisco, May 30, 1890.

Arthur Keller, O A C, scratch. H. C. Head, U C 4 inches· won by Head, hight 8 feet 6 inches; second, Keele, height 8 feet 6 inches.

440 yard scratch, for the Hammersmith medal, O A C members. Present holder, S. V. Casady.

S. V. Casady 1st. Time 52½ seconds.

100 yard run, open handicap—World's Amateur record, 9 4-5 seconds, J. Owen, Jr., Washington, Oct. 11, 1890; Pacific Coast Amateur record, 10 seconds, R. S. Haley, O A C, Oakland, Sept. 23d, 1882; V. E. Schifferstein, O A C, Oakland, June 9th, 1888.

Trial heats—Winner of each heat to run in final, and second men to run a heat, winner of which to run in final.

First heat—C. A. Jellinek, O A C, 4 yards, R. C. Mays, A A A C, 9 yards, C. R. Morse, U C, 10 yards, A. B. Nelson, O A C, 10 yards.

Second heat—J. C. Kortick, O A C, 5½ yards, Andrew Mahoney, A A A C, 8½ yards, G. W. Bishop, A A A C, 10 yards, H. P. Coleman, A A A C, 10 yards; won by Morse, time 10 1-5 seconds, second Jellenek; won by Mahony, time 10¾ seconds; second, Kortick.

Third heat—N L Williams, O A C, 9 yds; A G Sheath, O A C, 7 yds; C J Armburster, A A A C, 10 yds; H H Gawne, 7 yds. Won by Armburster. Time, 10 4 5 secs. Second, Gawne.

220 yards run, O A C.—(For members of the O A C who have never competed in an open race.) Fred Schmidt, J. Frank McDonald. Won by Schmidt. Time, 26 sec.

100 yard run—Trial heat for second men. Winner to run in final heat. Won by Jelleneak. Time, 10½secs.

One-half mile run, O A C, handicap. World's Amateur Record, 1 minute 54 2-5secs, F J K Cross, England, March 9, 1888. Pacific Coast Amateur Record, 2min. 5secs., R Mac Arthur, O A C, S. F, Nov 23. 1890. R MicArthur, scratch; M L Espinosa, scratch; W H Toomy, 40yds; H M Collins, 50 yds. Won by Toomy. Time, 2 min. 5 secs. Second, Espinosa.

Wrestling, catch as-catch-can —E Gros, O A C and R Y Cole, O A C; G H Wigmore, O A C and J S J Otto, C A C.

100 yard run—Final heat. Won by Morse. Time, 10 2 5 secs. Second, Gawne.

220 yards run, handicap for members of the O A C Juvenile Class. Juvenile record, 28 secs. Sargent E. Holmes, Oct. 25, 1890. Won by S. E. Holmes. Time, 27 3-5 secs. Second, A Landsburg.

440-yard run, open handicap —World's amateur record, 47½sec,. Wendell Baker, Cambridge, Mass., July 1, 1886. Pacific Coast amateur record, 50 3-5sec, J T Belcher, O A C. J D Garrison, A A A C scratch; S V Casady, O A C, scratch;

C A Jelleneak, O A C, 7 yards; J C Kortick, O A C, 15 yards. Andrew Mahoney, A A AC , 27 yards; George W Armbruster, A A A C, 28 yards; C R Morse, U C. 30 yards; C W Bishop, A A A C, 35 yards; A B Nelson, O A C, 35 yards; A Choynski, A A A C, 35 yards. Won by Morse; time, 51¼sec.; Mahoney second, Kortick third.

Putting 16lb. shot, O A C Handicap.—World's amateur record, Geo. R Gray, 46ft. 2½in., Sept. 20, 1890. Pacific Coast amateur record, J Purcell, O A C, 38ft. 7in., Oakland, July 28, 1888. A G Sheath, scratch; E R Hewston, 2ft.; F G O'Kane, 4ft. Won by Hewston: distance, 31ft. 1½in ; O'Kane second; distance, 27ft. 6in.

120 yaad hurdle race, open handicap —World's amateur record, 16 seconds. Pacific Coast amateur record, 18 3 5seconds, J Purcell, O A C, San Francisco, May 30, 1890. F F Foster, O A C, scratch; Arthur Keller, O A C, 15 yards; A G Sheath, O A C, 12 yards. Won by Foster; time, 17 seconds; Sheath second.

One mile run, open handicap.—World's amateur record, 4min 18 2-5sec , W G George, England, June 21, 1888 Pacific Coast amateur record, 4min. 43 1-5sec., P McIntyre, O A C. R McArthur, O A C, scratch; H C Casidy, A A A C, 15 yards; J D Garrison, A A A C, 60 yards; Jesse D Burks, U C, 60 yards; Sol Choynski, A A A C, 80 yards; E P Moody, A A A C, 90 yards; Albert Cooke, A A A C, 100 yards; Wm. F Vollmer, A A A C, 100 yards; H M Collins, O A C, 10 yards; H A Massey, A A A C, 125 yards; Ambrose Snow O A C, 125 yards. Won by McArthur, time, 4min. 44 3-5 sec ; Choynski second.

Three-quarter mile exhibition walk.—Geo. D. Baird, Amateur Champion of America 1883 and 1885. Time 4 min. 36 secs.

Boxing three rounds.—Julian L. Waller O A C, Geo. F. Green O A C, F. Schmidt O A C, E. A. Donahoo O A C.

220 yard hurdle race, O A C handicap. World's Amateur Record, 25¼ secs. J. P. Lee, Harvard, May 31st, 1890. Pacific Coast Amateur Record, 29 sec., F. F. Foster, O A C, Oct. 25, 1890. F. F. Foster, O A C scratch, A. G. Sheath, O A C 16 yards, M. L. Espinosa, O A C, 18 yards, N. L. Williams O A C 20 yards. Won by Foster; Time 28 1-5 secs. Second, Espinosa.

The value of this stake in 1893, exclusive of cup, was $1,535.

CHRIS. GREEN, President.

EDWIN F. SMITH, Secretary.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

Announcement.

Owing to ill health, I have fully determined to sell at auction my entire stock of trotters and thoroughbreds. I have been an extensive buyer, both privately and by auction, for the past four years, and have endeavored to get the best. Whoever will take the trouble to glance over the column of sires, represented in the sale, and then notice the producing families that support them on the dam's side will see that nearly all the remarkable getters are included.

TERMS OF CREDIT.

While the terms of the sale are cash, responsible buyers may have the privilege of credit for an agreed time, by observing the following conditions: Buyers must furnish satisfactory security, and must, prior to the opening of the sale, notify the owner and obtain his approval, specifying the drawer and endorser of the proposed note. Notes to bear six per cent., and payments to be made at the Vallejo Commercial Bank. In refereuce to credits, address B. C. Holly, Vallejo, Cal.

For Catalogues, ready about December 1st, address

B. C. HOLLY, Vallejo, Cal.

Poplar Grove Breeding FARM.

Standard-bred Trotters, Colts and Fillies.

The get of CLOVIS, 4909; PASHA, 2039; APEX, 2935.

For Sale.

Address S. N. STRAUBE, Poplar Grove Breeding Farm,

Fresno, Cal.

Inspection by intending purchasers invited, and information by mail.

SOUTHER FARM

P. O. Box 208. San Leandro, Cal.

1½ miles northeast of San Leandro; 8 miles southeast of Oakland. Turn off county road between above places at "Stanley Road," ¾ mile north of San Leandro.

Horses boarded at all times in any manner desired. Best of care but no responsibility for accidents. Colts broken and handled for the road or track. Terms reasonable.

Glen Fortune,	Jester D,	El Benton,	Figaro,
By Electioneer 125.	By Almont 33.	By Electioneer 125.	Hambletonian 725
1st dam Glenne by Messenger Duroc 106.	1st dam Hortense by Messenger Duroc 106.	1st dam Nellie Benton by General Benton 1755.	1st dam Emblem (sister to Voltaire, 2:20¾) by Tattler 300.
2d dam Glenella by Woodward's Star, son of Seely's American Star.	2d dam Nelly McDonald (thoroughbred) by Colossus, son of imp. Sovereign.	2d dam Norma (dam of Norval, 2:17½) by Norman 25.	2d dam Young Portia (dam of Voltaire, 2:20¾, Childe Harold, two-mile record, 5:04, etc.) by Mambrino Chief II.

	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle.	4th dam by Whip.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro, and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. The roads are very good.

All stock sent from San Francisco may be brought over by Express, which leaves San Francisco on the Creek route boat. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car.

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance, ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

For Sale.

THE STANDARD STALLION

CADUCAS 10,480,

By Almont Medium 2:28½, dam Amelia T., (by Alcona 730), full sister to Prince Warwick 2:16¼. Caducas is a handsome two-year-old, thoroughly broken, and while he has not been driven for speed as yet, he shows great promise. Also

FREMONT,

By Lemont, dam Crest by Clark Chief.

For further particulars address,

By Todhunter's RENO, out of a NELSON mare. She is a handsome sorrel in color; kind, gentle and fast; can go all day and show a 2:50 gait on the road. Will be sold at a reasonable price.

Also a new Columbus buggy, harness, robes, blankets, etc. Apply at

FASHION STABLES,

224 Ellis Street, S. F.

For Sale

A FIRST-CLASS

Napa County Farm

—OR—

STOCK RANCH,

800 Acres Improved,

SITUATED TWO AND A HALF MILES FROM NAPA CITY, with good roads leading thereto, a good hard finished house of nine rooms, with all modern improvements, streams running all summer, a great amount of live oak and black oak timber. It lies in a fruit belt, surrounded by fine vineyards and orchards growing upon the same quality of soil, and originally a part of this tract. About one-half hill, and one-half rolling land, but none of it is steep and all easily cultivated, splendidly situated for the breeding of fine horses. Price, $65 per acre. Further particulars given at this office.

BREEDER AND SPORTSMAN,

313 Bush St.

For Sale.

The Grey Gelding

JOHNNIE HAYWARDS,

Record 2:26.

Sired by POSCORA HAYWARDS, dam by THE MOOR. First-class road horse; kind and gentle. Has trotted nine heats on the same day in races this year better than 2:30, and a mile in 2:22.

ALSO THE FIVE-YEAR-OLD STALLION

PROSPECT,

(Standard bred),

By PASHA, dam FAWN by BUCCANEER. PROSPECT is a beautiful golden sorrel of splendid style and conformation. Has had no training, but shows evidence of speed, having trotted a mile in 2:38 this year.

For terms and particulars, address this office, or

L. LEVY,

420 Sansome Street, S. F.

Car Room.

THE UNDERSIGNED, now on his way to California, will return East with a Car Load of Horses, and will have room in the car for a few extra horses. A rare chance for anyone intending to ship East. Address

GEO. STARR,

Care WM. CORBITT.

San Mateo, Cal.

Trotting Stallion for Sale

We are authorized to offer at private sale

THE TROTTING STALLION

Brocken,

Five years old; color, brown; 16.2 hands; bred by Capt. A. J. Hutchinson; sired

By A. W Richmond,

(sire of RICHMOND JR., ROMERO, ARROW, the DAM OF ANTEEO, and ANTEVOLO and other noted horses); 1st dam Maid of the Mist, by Norfolk; 2d dam Eva Coombs, by Billy Cheatham; 3d dam Ruby by Winnebago, son of imp. Glencoe.

BROCKEN is thoroughly broken, but has never been driven for speed. He can trot a 40 gait now with ease. His pedigree shows rare breeding, combining trotting blood with the most fashionable strains of thoroughbred. It includes crosses to Lexington and Glencoe with a double cross to Boston. For good, stout blood, this pedigree cannot be excelled. For terms, apply to

KILLIP & CO., Auctioneers,

22 Montgomery Street S., F., Cal.

For Sale

A HALF BROTHER TO

ALMONT PATCHEN,

(2:15, trial 2:13 3-4).

JUANITO JR. is a beautiful bright bay, black points, with no white, foaled 1886. As a colt he has given much more promise than did Almont Patchen at the same age. Instead of being a pacer, he is a good square trotter, with every indication of great speed, and is so gentle and kind, that a lady can drive him. The owner's only reason for selling him is that business calls him away from this section of the State. He will be sold at a reasonable figure This is a splendid opportunity for a gentleman to secure a first-class trotter at a very low figure.

The pedigree of Juanito Jr. is by Juanito (sire of Almont Patchen), dam Nettie Moore by Old Tom Moore. For further particulars, address

JUANITO JR.,

Santa Clara P. O., Cal.

COLIC AND GRUBS.

I have used Simmons' Liver Regulator in Colic and Grubs with my mules and horses, giving them about half a bottle at a time, and have not lost one that I gave it to. You can recommend it to every one who has stock as the best medicine known for all complaints that horseflesh is heir to.

E. T. TAYLOR, Ag't for Grangers of Ga

FOR CHICKENS.

In using Simmons' Liver Regulator (Powder) with my chickens for Cholera, I take and mix it with the dough and feed it to them once a day. By this treatment I have never lost a single chicken in the last five years from either Chicken Cholera or Gapes.

T. G. BACON, Edgefield, S. C.

HOG CHOLERA.

A reliable gentleman who raises every year about one hundred head of hogs told me he never lost one from Cholera, although the disease had often appeared among his herd. His remedy is Simmons' Liver Regulator given in drenching—about double that given to a man. I give this information for the benefit of those whose hogs may be attacked with Cholera.—PROF. F. P. HOPGOOD, OXFORD, N. C.

SIMMONS LIVER REGULATOR

is so conveniently given. The Powder mixed with the feed will be eaten by horses, cattle hogs, and chickens readily, while the Liquid (prepared) is easily given as a drench.

Pure English Bloodhounds.

—:o:—

The first genuine English bloodhound pups seen on this coast are now offered for sale. Both parents imported from Brough's famous kennels in England; pedigree includes over twenty champions, besides the celebrated COUNTESS, the model for Landseer's "Sleeping Hound." The English bloodhound is the kindest of pets and most intelligent of companions. In tracking lost or stolen stock, his instinct is unerring. His noble appearance is shown in the bronzes at Shreves', and art-photographs at Vickery's. Send stamp for descriptive circular and 25 cents for photograph.

SANTA CLARA KENNELS,
Santa Clara, Cal.

FOR SALE.

Al Farrow

The winner of the first grand prize in Interstate Coursing Meet of 1890, $500 stake at Merced, Cal., in a 48 dog entry. In this meet he contested with the swiftest and grandest coursing dogs not only in California, but of the entire country as well. He came through without a scratch, and could easily have repeated the course again with a night's rest. It was conceded by all present that this was the most severe coursing meet ever witnessed on the continent, course after course being from 3 to 4 miles in length. Dr. Q. Van Hummell, of Kansas City, Mr. J. H. Watson, of New York, Mr. F. G. Stewart, of Hoosick Falls, N. Y., and Mr. J. R. Dickson, of California, all men of extensive coursing experience, pronounce his feats here displayed as being the most wonderful on record.

I hold Al Farrow at $500. He is by imp. Black Bart out of imp. Black Bess; his sire by Menlo Chief; his dam by Monereb. For futher description see this and last two week's numbers of this paper.

FIVE DOLLARS A YEAR

FAMOUS COLONIAL SIRES.

No. 1.—Sir Hercules.

Cap-a-Pie was an English horse got by The Colonel, who ran a dead heat with Cadland for the Derby of 1828, and subsequently beat him for the St. Leger of the same year. His dam was a sister to Cactus by Sultan—Duchess of York by Waxy—Moses' dam by Gohanna. Cap-a-Pie was imported into New South Wales in 1839.

The only horse of permanent and enduring fame gotten by Cap-a-Pie was the brown horse Sir Hercules, whose dam was an imported mare called Paraguay, by the Irish horse Sir Hercules (sire of Faugh-a-Ballagh and Birdcatcher), who was by Whalebone, out of Peri by Waneerer. [Peri was the dam of Commodore Stockton's horse Langford by Starch, who figures in many of the earlier California pedigrees.] Paraguay died shortly after her importation to the colonies, and left nothing of note except Sir Hercules, who subseqnently became famous as the sire of The Barb, Yattendon and Barbarian, the last named horse being own brother to the first. He was inferior to him as a performer, but superior to him as a sire. Still it must be remembered that The Barb was, like Lexington and Gleucoe, a "female liner," and, while none of his sons were of any value as sires, his daughters bred well to nearly every sire with which they were mated.

The Barb's dam was Young Gulnare by Doctor, out of Old Gulnare by Gohanna, and he was sold as a two-year-old (there being no two-year old races in the colonies at that time) to Mr. John Tait, keeper of a public house at Homebush, about thirty miles from Sydney. Tait was a very good sort of man, and gained most of his popularity from having disarmed and thrashed a noted highwayman who had made trouble in his house one afternoon. It must be understood by the reader that, in the colonies, the winter months are June, July and August, while September, October and November are the vernal months. This, it will readily be seen, brings the Derby and other spring races in one year, and the St. Leger in the year following. Hence it was that Grand Flaneur won the Sydney Derby and Melbourne Derby of 1880, and the A. J. C. St. Leger and V. R. C. St. Leger of 1881. It is for this reason that colonial-bred horses date their ages from August.

The Barb met a very clever colt called Fishhook, a son of Fisherman, but he beat him every time they met at weight for age. The Barb was built unlike every other horse seen in the colonies, before or since. The venerable William Gosper, of Windsor, described him to me as being only a trifle over fifteen hands and two inches in height, and the strongest horse he ever beheld. His head was plain, although indicating the greatest gameness, while his neck was too short to be blood-like. His depth of shoulder and amplitude of girth, however, were something that bordered on the marvellous. "The biggest 'orse through the 'art that I ever saw," said Mr. Gosper. He was a pony-built horse essentially, and could run equally well on good or muddy tracks. He carried weight like a glutton, and really seemed to do his best when weighed from 126 to 130 pounds. He won the Sydney Derby in October, and literally romped through that at Melbourne. In the Melbourne Cup of the same year, he got a bad start and was "pocketed" in a large field. Both St. Legers fell to him as though he were their heir-at-law.

In his four-year old form he won the Melbourne Cup, and thus placed Mr. Tait in a prosperous condition. In this race he carried 119 pounds, and won away off. In the Sydney Cup of the same year (two miles) he carried 122 pounds, and made a holy show of his field. He now blossomed out into the greatest handicap horse of his day, and no distance seemed too long for him, no weight too heavy. His greatest victory, however, was in the Sydney Cup of 1863, when he carried 148 pounds and won cleverly. After that he was so heavily handicapped that victory was impossible, although he won a race of seven furlongs at six years old, carrying 152 pounds.

Yattendon was out of Cassandra by Tros, an English stallion got by Priam out of Ally by Partisan, and imported to New South Wales in 1839. He inherited none of the Priam architecture, however, but was a great, lengthy, brown horse, an immense body set upon strong, short legs, with short cannon-bones and broad, flat hocks. He never made any very fast time, but won all his victories cleverly. When beaten, it was always by horses to which he was conceding from 14 to 20 pounds weight. He was the first horse that ever won the Sydney Cup, two miles, which he won by twenty lengths in 3:40, at that time the fastest record made south of the equator. On his retirement to the stud, his excellence as a sire soon became apparent, as the performers followed one another in rapid succession. Chester, Roodee and Monmouth all were bred at Yattendon by Mr. Cox, from the imported mare Lady Chester by Stockwell. From Luna by Lord of the Hills, he got that very consistent performer Gudarz, winner of the Geelong Cup and other valuable handicaps. Gudarz only ran unplaced twice in seventeen starts. Sweet William, out of the imported mare Lady Hooton, was bred at Tocal by Frank Reynolds, and was a high class horse, though he lost several races that he should have won. Chester won the Derby on Saturday and the Melbourne Cup on the following Tuesday, and another son of Yattendon, Grand Flaneur, was destined to repeat the same great feat. I must refer to this equine wonder later on.

Barbarian, brother to The Barb, outbred "the conquering black demon," as he was called, and yet he never got anything that was really first chop. His son, Zulu, won the Melbourne Cup in a very fast race, but he only had 90 pounds on him, so that the victory did not add any laurels to the brows of Barbarian. As a performer, Barbarian did not begin to compare with his brother, although he was justly entitled to be rated as a useful horse. In color he was a beautiful brown, with superb quarters, although a trifle light in the back and loins.

The curious feature of this family of highly bred horses is, that there is only one sire in each generation until Yattendon is passed. There could be no worse failure in England than The Colonel, the sire of Cap-a-pie, and yet he was deemed a very high-class race horse. He got nothing of note, but Cap-a-Pie and he, in turn, got only one sire, Sir Hercules. The latter got many performers, but only one sire, Yattendon. From Yattendon the lines begin to diverge. Chester heads the list of his sons, but there are Grand Flaneur, Roodee, Albury, Monmouth, Sweet William, Clieveden, and a half dozen other patrician performers. Besides these, all the Yattendon mares have bred well, but evince a disposition to nick better with Stockwell blood than with anything else.

It may seem evident that a horse which gets but one sire, does not defray the cost of his importation from England to a country 19,000 miles away, as Australia was at that time. But looking at the case through a pair of unprejudiced spectacles, we realize that if there had been no Cap-a-Pie, there would have been no Sir Hercules, and without Sir Hercules there could have been no Yattendon. That Yattendon is, up to date, the greatest of all native Australian stallions, no intelligent student of turf history can doubt. He was a typical Australian thoroughbred horse, built upon just such lines as our best and strongest turf horses of eighty years ago.

The truth is that in-breeding, which the Australians have for the most part avoided, has intensified the quality of our thoroughbreds while constantly deteriorating their substance. Just see how our horses are inbred to Diomed. Peel, owned at Palo Alto, has fifteen crosses of Diomed, and there are a dozen mares at Del Paso that have from ten to twelve. At Santa Anita the mares have plenty of rich blood, but they all have more or less Boston blood in them, and Boston was inbred to Diomed, while Lexington had five crosses of Diomed. Judge then, what a blunder it is to breed such mares to a horse bred like the Emperor of Norfolk. If men will use Lexington horses as sires, they should be mated only with imported mares.

HIDALGO.

PRINCESS AND GLENCOE CHIEF.

Recollections of a Great Trot More Than Thirty Years Ago.

"Yes," growled old Forty-nine, as he leaned back in his arm chair at the Palace a few nights ago, "they breed mighty fast horses now-a-days in this State, but they dont have any such races as they used to have up to '65. Just think of the races we used to have at two-mile heats, to say nothing of the five-mile and ten-mile dashes that they used to have at every State Fair. I shall never forget the two races between Princess and Glencoe Chief in March, 1859, if I should live to twice my present age."

"How much money were they for and what were the distances?" asked our reporter.

"They were to be on consecutive days, both at ten miles. In the first one Princess was to pull a wagon and the gray horse was to go in harness. In the second one both were to go to wagons. Eoff made these races with E. T. Pease, a Front Street flour merchant, long since dead. He was the moneyed man in the firm of Alton, Welsh and Co. The two races were made for $2,500 a side, but Pease got a proposition from Eoff to throw the first race provided Pease would give him $4,000 after the race was over. Pease agreed to do this, and Teackle, who then owned the mare, was tickled to death when Eoff came and told him to bet them all he could lift, and he would drive the race out on them. Teackle told him to throw the race if he wanted to, but Eoff said the way to make the most money ont of it was to drive it out. So Teakle told him to go ahead, but he added he would kill him if he didn't win it. Then the betting began, fast and furious, I tell you."

"Did much money change hands on the race?" queried our man.

"Well, I should smile," said the old timer, as he stroked his long gray beard, "Teackle met Charley Hosmer at Porter & Collins' place on Commercial Street, and they put up $100 each to bind a bet of $5,000, for which the coin was to be in Collins' hands next day at noon. He then bet Al Whipple $2,500 even and bet Pease $5,000 the same way. On the next day at noon, Pease met Teackle there and they put up the coin for all the bets, and Pease bet him $3,000 more. Teackle insisted on the money being taken to the track—he was probably afraid of an injunction, so Collins took it all out and they carried it up into the stand."

"What track was it trotted over?"

"Over the old Pioneer course, kept by George Treat," said the oracle. "George was just married then and lived up stairs over the bar-room. The crowd began to flock out there about 1 o'clock, and the old Crim & Bowman omnibusses was all there was to carry the bulk of the crowd at a dollar per head each way. Seats in a hack were worth $2 50 each, and $5 for the round trip. The judges were Fred Kohler, S. H. Meeker and Col. Jack Gambrill on the first day, but on the second day Tom Merry served in Colonel Jack's place. The timers were James P. Rynders, Alfred J. Ellis and John N. Harris. John P. Shear was betting on Princess without being aware of what was going on; and Eckert of Maryville offered to bet $300 on the mare. Wad Porter snapped him up too quick. John Cooks came out first with the old reliable grey horse, and Eoff came afterwards with the mare. After he had warmed her up a few times, he turned her over to his groom, Johnny Rogers, and came up in the stand. He said his mare fretted if she was scored too often, so he would

thank the judges to let her off at the first trial if he was anywhere within two lengths of the grey horse."

"Well, did he get off at the first attempt?" asked our man.

"Yes, he got off about a length and a half behind, and as he got the word he gave the "cluck" to the mare and away she flew past the horse, like he had been anchored in the middle of the track. Once in a while Eoff would let the old grey horse get up on his wheel and then she would shoot away on her own accord. He drove the race with slack lines nearly all the way, and when they came into the stretch, Pease ran up the stretch and said, 'Jim, you're in the tenth mile and Eoff said it was only the ninth.' He had agreed to let the horse pass him in the tenth mile, so after they had gone under the wire, he let Glencoe Chief pass him and go on for an eleventh mile, which did not count of course. Crooks led about five lengths to the wire and got down, believing he had won the race. No sooner was the decision given than Teackle and his father-in-law, old man Sparrow, went up into the stand and carted the bullion off in a hack, with three armed men, to whom they paid five dollars apiece."

"Teackle stood up the stretch about 120 yards above the judges' stand, with a long drab overcoat on and a white silk handkerchief tied around his neck, all through the race. Both his hands were thrust into his overcoat pocket and he was as pale as death itself. He had a long-barrelled dwelling pistol in each hand and stood ready to shoot Eoff, if ever Glencoe had headed Princess in the race. His fears were groundless, however, as Eoff had every dollar he could scrape together bet upon Princess. She looked more like a thoroughbred that day, than anything I ever saw hitched either to wagon or sulky."

"The time was 29:10¾, and she was never urged a foot of the way. On the following day she beat Glencoe Chief, even rigged to wagons, in 29:16¾, and I considered it the better performance of the two because there was a high wind blowing at the time. Princess went the entire distance with the lines lying on her back, and never was extended in any part of the race. She was shortly afterwards taken East, and her races with Flora Temple are part of the turf history of the country. Did you not tell me the other day that she was the dam of Happy Medium?"

"I did tell you so," replied the reporter.

"Well, I never heard of her producing anything else, but Happy Medium was a great stallion and had 51 trotters and 3 pacers in the 2:30 list. His daughters are breeding very well likewise. But it is just as I tell you, the only races we now have are three-in-five, and two-mile horses are as scarce as hens' teeth."

"Don't you think such races are very cruel and injurious to horses?" asked the reporter.

"No, not to a really good and game horse," said the old trainer. "Such horses as Bill Seward could trot a half dozen ten mile races in a year and then not be any the worse for it. We have no such horses now-a-days. The 2:30 list captures everything, and there is nothing looked for beyond speed." And he went off growling to himself over the degeneracy of the times.

Permanency of the Wilkes Blood.

Riding on the avenue one day in 1864 with the late E. W. Teackle, behind a very fast chestnut gelding, a man and a horse suddenly flashed past us as though we were standing still. He was in a light road wagon, drawn by a rat-tailed brown stallion, with very heavy quarters.

"For Heaven's sake, what horse is that?" we gasped out.

"That's Eph Simmons' stud" replied Mr. Teackle, "they call him Robert Fillingham."

This horse was afterwards called George Wilkes. He was the greatest wagon trotter of his day, and as a breeding horse, he was probably the greatest transmitter of speed in America. He was not only a getter of trotters but a sire of sires likewise. He has 63 in the 2:30 list, while his sons are putting them in at a rate almost incredible. Alcantara has 33, of which he put in 21 this year. Red Wilkes has 36, of which 11 entered the list this year; and Onward has 29 Also three more entered the list whose dams were by Red Wilkes.

In addition to this, William L, by George Wilkes out of Guy Wilkes' dam, has Axtell with the three year old record of 2:12. His son Jay Bird has Allerton, with the four year old record of 2:13½. Has any other family shown as much pace? Like Brutus, we "pause for a reply."

George Wilkes got trotters in all shapes, as well as all sizes. Lumps was a pony 14¾ hands high, while Wilton was a horse of the same type and barely 15 hands high. On the other hand Guy Wilkes and Mambrino Wilkes are both large and rangy horses but they are breeders of the highest quality and natural transmitters of speed. Lumps has been taken down into Maine, where he is pronounced the *ne plus ultra* of trotting sires and the highest hopes are formed of his progeny.

The most remarkable thing about George Wilkes is that he was nine years old before he ever covered a mare and eleven before he made a public season. His sire, Rysdyk's Hambletonian, covered sixty odd mares at four years old and eighty at five. It is not risking much to venture the opinion that Rysdyk's had covered more mares by the time he was twelve years old than George Wilkes covered in his whole life.

The success of his sons in the stud is such as to warrant the belief that George Wilkes is destined to hold as prominent a place in the trotters' temple of fame as Glencoe, Touchstone or Irish Birdcatcher hold among the runners. They all show great speed, coupled with great gameness and a high order of ability to pull weight. And if wagon races were as much in vogue now as twenty years ago, we believe they would surpass all other families in ability to pull four wheels. When Lumps was in his prime on the track, his owners, although his record was no better than 2:21, frequently offered to match him to go to wagons against horses having records of 2:18 and met with no response.

In this connection, we shall always regret that Guy Wilkes was never sent out to beat the wagon record. He was built just right for it, and being a very strong horse in the loins and back, was well calculated to have set a mark that would have endured for years, if not forever. His great freedom of action and frictionless gait, go far to confirm our estimate of his abilities as a weight-puller, in addition to which he was a horse that always exhibited the highest courage and gameness.

One of the Wilkes family, of which we have great expectations, is Allerton, who holds the record at four years old. We are more sanguine of his success than of Axtell's for the reason that he is a larger and better built horse, in addition to having better legs. We believe that Mr. Williams knew what he was about when he sold Axtell and retained Allerton. After you get below 2:20 the speed of the individual is a secondary consideration. The great question then is accuracy of form. In this respect the choice would fall upon Allerton over Axtell, four times out of five.

Kentucky has been doubly fortunate, in not only securing the services of George Wilkes but in retaining so many of his sons. As for his daughters, we know of none for sale. A man might as well go to England to buy daughters of Blair Athol or Hermit. Wilkes blood will be worth its weight in gold as the years go by. Just as he outclassed all the road horses in New York, he likewise outranked all the track trotters when it came to a wagon race, and outbred every other sire of his era when he came to be mated with the royally bred matrons of Kentucky. The fame of George Wilkes only grows brighter through the midst of receding years and the garlands of laurels that encircle his name, still seems to glow with perennial beauty. He lives in history and made a large portion of that history himself.

Our Tennessee Letter.

GALLATIN, TENN., Dec. 11, 1890.

EDITOR BREEDER AND SPORTSMAN:—For several years I have been looking forward to the day when some Trotting Association would open large stakes, and one that would favorably compare with those for the runners. For a long time one could see that the big stakes were growing in popularity with horsemen and the public, but it did seem that the different associations were backward in offering them. The Balch stallion race was considered a great event, as was the Horseman Challenge Foal Stakes the past season, but they were insignificant when compared to stakes offered for the runners. The Lexington, Ky., Trotting Association has done the right thing by offering a purse of $25,000 the first horse to receive $15,000.

The trotting horse is of more value than the runners, and just why a good one should not win as much as a runner, no one can tell. It is a well known fact that there is not enough money hung up in America by the Trotting Associations to pay for the training of all the trotters. No one can doubt this who has the least idea of the expenses of training and campaigning a stable of trotters. It is the small purses and and stakes offered that causes two-thirds of the jobbery and "ringing" on the trotting tracks of the country. Owners know they cannot campaign a stable of horses on their winnings alone, and those who follow it as a business will resort to "ways that are dark and tricks that are vain." Men of millions who breed and trot their horses for pleasure are different, I suppose, but the average owners and trainers always have an eye to turning a penny. The result is a horse is pulled until he starts at a long price in the betting. He is then "cut loose" on the unsuspecting public, and two or three on the "inside" carry away the pool box. This is robbery of the worst kind, but horse owners, as a general thing, do not look at it in this light, and they consider it a legitimate way of buying winter oats and to make other ends meet.

On the running turf it is the same, but, considering the larger number of runners, not to such an extent as it is practiced by the trotters. If trotting associations will not strive to make their meetings such paying ones to the association, and will liberally increase the purses, the Board of Appeals will find much less jobbery and trickery from owners and trainers to call their attention.

That some comparison may be made between the running and trotting turf, I have compiled the following table of winners of $1,000, and upwards in purses the past season. In this table we find only nine winners of $5,000, while that of the runners contains one hundred and fourteen. Margaret S. heads the list of winners with $12,020, while in the table published last week of the runners it will be seen that thirty-eight different horses won more money than did the largest winner on the trotting turf, and that Potomac and Tournament won nearly as much as did all the horses in the following table:

Not long since a writer in the BREEDER AND SPORTSMAN predicted that the future record breakers would come from undeveloped sires and dams. The performances of Freedom, Nelson, Manager and Adonis this past season indicates otherwise, and the following table shows conclusively that developed sires are far outshining the undeveloped stallions. Of the 68 horses in the list, 26 were by or out of developed horses, and these 26 won $74,949, or an average of $2,883, while the horses from undeveloped strains made an average of $2,272. The largest winner, Margaret S, was sired by a horse with a record of 2:17. When it is known that there are probably six representatives of undeveloped sires and dams to one from record sires, the table should convince the breed-from-undeveloped-sires-and-dams theorists that their persistent hobby is ungrounded and without foundation.

The table follows:

NAME. SIRE. DAM.	Starts.	First.	Second.	Third.	Won.
Abbie V., 2:26¾, Aberdeen—by Pearing	17	2	5	7	$ 1,810

KENNESAW.

Stock From Winnipeg.

WINNIPEG, DEC. 8TH, 1890.

EDITOR BREEDER AND SPORTSMAN:—I promised to send you the pedigrees of some of our horses which we have shipped from here to Fresno, California. I will give you some of the best, as it would take too much time and space to give them all in full. Our Mr. Paulin and family have moved out to Fresno. We have sold off here all the stock that we did not think it would pay to take across. Our brood mares are fine individuals, some of them very choicely bred. Our stallion Reviresco, is a bay, sixteen hands high, weighs 1205 lbs., and was sired by Hermes 548, record 2:27½. Hermes by Harold, sire of Maud S., 2:08¾. First dam Bessie Turner, dam of Oliver K., 2:16¼; Bessie Turner by Virginius, thoroughbred son of Lexington.

PANJABI, bay colt, sired by Patron, record 2;14½. First dam Nora Wilkes by Lyle Wilkes 4658; second dam Allie G. by Bowman's Clark Chief; third dam Lucy Lee, dam of Franks 2:25½, by Alexander's Norman 25; fourth dam Jenny Lind by Woodpecker.

BELL RUSSELL, bay filly sired by Brown Wilkes 2040, record 2:21¾. First dam Policy by Harold 413; second dam Parepa, record 2:36½, by Delmonica 110, sire of Darby 2:16¼; third dam by Pitot Jr., sire of the dams of Maud S. 2:08¾ and Jay Eye See 2:10. Bell Russel trotted a mile as a two-year-old in 2:45, and is a full sister to Hall's Bell, three-year-old record 2:32½, over a half-mile track.

SEYMOUR BELL, chestnut mare, sired by Nugget 1398, record 2:26¼. First dam Fanny Monroe by Jim Monroe, sire of Monroe Chief 2:18¼ and Kitty Bates 2:19.

MISTRESS MONACO, bay mare sired by Monaco 1862, full brother to Wedgewood 692. First dam Flora Hill by Case's Dave Hill 858; second dam by Irwin's Tuckaboe.

NENETZIN, brown filly sired by Connaught 2432, record 2:24. First dam Lidda Brigand by Brigand 1812; second dam by Sleepy John, son of Nottingham's Norman; third dam by Capt. Beauford, son of Lexington; fourth dam Fanny Williams by imported Gray Eagle.

CHOLULAN, brown filly by Connaught 2432. First dam Hepsy by Hermes 548; second dam Gipsey by Volunteer 55, sire of St. Julien 2:11¼; besides a lot of mares and fillies by Brown Wilkes, Nugget, Sharper and our own horse Reviresco. Yours respectfully,

J. H. CHAMBERS.

The high prices paid for thoroughbred yearlings bid fair to be rivalled by trotting-bred youngsters. A suckling brother to Almont Wilkes was but eight days old when an offer of $1,000 for him was refused. Almont Wilkes' record is 2:19¾, but he is deemed capable of going much lower. The day is not far off when trotting yearlings will sell for more money than thoroughbreds, because there are so many rich men who prefer to invest in trotting stock.

Stamboul, 2:11.

The King goes into Winter Quarters.

Within a quarter second of the world's record and made on a regulation track, Stamboul retires from the turf with a prestige such as no horse ever before enjoyed west of the Rocky Mountains. Every intelligent horseman knows well enough that if there were such a thing as a kite track in California, the record of the great horse would be nearer 2:08 than 2:11. Our pride in him lies not alone in the fact that he is a grand performer but that he has likewise shown himself to be a very prepotent sire and of a very high class of horses. Mascot was a higher-formed horse than two-thirds of the thoroughbred colts to be found on the eastern running tracks, while the yearling out of Minnehaha has been pronounced by competent judges to be the perfection of combined strength and quality.

If any man doubts what we say, let him go to Kentucky and see some of the little spider-legged stallions that are standing there as high as $150 for the season; and then let him come back and critically examine three native Californians—Stamboul, Palo Alto and Sable Wilkes—and he will see that the Golden State suffers none by comparison with any other portion of Uncle Sam's farm.

Stamboul differs from other horses in more than one respect. No other horse of the same turn of speed ever had as much size; and no other horse of the same size ever had as much style and quality. To a hardy constitution he adds good temper and the appetite of a lion. When Sultan was sold to go East, people lamented that we were losing the most valuable out cross stallion that had ever seen California, but Mr. Rose told them he would never have parted with him, if he had not had two of his sons that could beat him, the best day he ever saw. They scarcely believed him then but they all believe it now.

And just why Mr. Rose should ever have sold Stamboul is not altogether clear. He had recently sold the Sunny Slope property for a long price and paid off all his debt, so it could not have been merely for the want of money. Had he kept him till now and sent him to Kentucky to stand, Stamboul certainly could have earned as much every year as Mr. Hobart paid for him. Surely no man who is any judge of a horse would hesitate between a curby-hocked little ram-cat like Axtell and a grand, big horse like Stamboul, whose contour is handsome enough for a thoroughbred, and whose legs are shapely enough for a Derby winner. Of course, the price was a liberal one, and had the horse died Mr. Rose's property, there would always have been those to censure him for an error in judgment.

Again, it has always been a mystery to us why Mr. Hobart was ever allowed to become the purchaser of Stamboul. The Senator at Palo Alto was on excellent terms with the Master of Rosemeade. They had been rivals in breeding, but their rivalry had always been one marked by the highest order of courtesy, and unstained by any of those childish jealousies which so often make rich men and big men appear absolutely ridiculous. The old war governor had bought Beautiful Bells and named her first foal after Mr. Rose's daughter. Mr. Rose had also made, at one time and another, extensive purchases of Senator Stanford. In a word, they were as good friends as men could be between whom there was no consanguinity nor business partnership.

It goes without saying that had Senator Stanford desired to purchase Stamboul, Mr. Hobart could not have touched him. And just why he should have permitted a rival establishment to set up within a few miles of his place, and secure at its very inauguration, a horse so well fitted to succeed the great Electioneer, is something that passes our comprehension.

From Beautiful Bells, a mare bred very much like Stamboul, the great Electioneer got the highest priced stallion ever sold at auction in America, the famous Bell Boy 2:19¼ to say nothing of Hinda Rose 2:19¾ at 3 yrs., St. Bel 2:24½ and Palo Alto Belle 2:22½ at three years old; and others of nearly equal merit. Why should not the rule work both ways and Stamboul get great performers from the daughters of Electioneer? For more than three years it had been known that the sturdy little son of Green Mountain Maid was a doomed horse; that he had a disease which is incurable in horses and generally so in men; and that when it reaches the heart, death is inevitable. Hence we shall always wonder why the door was left unbarred by allowing any one else to purchase Stamboul.

If we owned him we should fear no rivalry from any horse in this State, except it might be Sable Wilkes, who has the same royal blood of the Moor in his veins. Sable Wilkes breeds so much bone and so much substance that he is always to be looked upon as a dangerous rival. Good as Guy Wilkes has shown himself, both as performer and procreator, there is a fixed belief that his son will outbreed him in the near future if he has not done so already. We repeat that the owner of Stamboul has more reason to fear the rivalry of Sable Wilkes than any other stallion now standing in California. So the big brown horse goes back to San Mateo, to roll over in his bed of golden straw and ruminate upon the forthcoming joys of his hours of ease in the harem. He has toiled hard against the old man with the hour-glass and scythe, and has fairly earned his approaching hours of *dolce far niente*. When they beat his time of 2:11 on a circular track, then it will be time enough to hitch him up again and send him out to smash the records. Till then, the breeding interests of the State need his services where they will do the most good.

Work Horses in Europe.

Written for the BREEDER AND SPORTSMAN.

A new Anglo American Company, with head center at Namur, is to be formed for the breeding, rearing and exportation of Belgian Percheron horses. Belgium exports annually 20,000 horses, proof that they are in demand, and that horse breeding pays. Indeed, the Belgian horse is easily reared; its development is precocious, so that it can be put to work when two years old; it is easily acclimated, has a calm temperment, and lives long. The Belgian horses of to-day, are truly colossal, as compared with their ancestors, and it is difficult to believe that at one time they had Oriental and Arab blood in their veins. This they inherited from crossings with the Limousin breed, the latter being a derivative from the Moorish horses. The Crusade horses did the rest. These Oriental traits can be detected in the Ardennais variety of the Belgian race. Formerly the Belgian or Flemish horses were appreciated for saddle purposes; now they are bred for heavy draught work alone.

Attention has only been given within the last fifty years, to developing and maintainig a distinct Flemish race of horses. The Government then commenced selections from native stallions, and allowed no mare to be served till the veterinary surgeons had reported upon their aptitude for reproduction. The Belgian race is divided into two varieties, the lowland, or true Flemish, and the highland, or Ardennais. The latter variety is the more highly prized; it has still a dash of the old Oriental blood in its veins; it is relatively a light animal, although thick, short and medium sized. The head is expressive; the jaws and neck broad; the latter is rather short, and is covered with a heavy mane. It displays much energy and vivacity; is capable of supporting great fatigue, and makes a very suitable artillery, van or buss horse. The best specimens of this breed come from the provinces of Liege and Namur; in a word, from southern Belgium and the Luxembourg. A sub-variety of the Ardennais, is the Condrusien, being better fed and cared, it is preferred for van work, and the Germans purchase them extensively as Percheron or Normand horses.

The true Flemish horse, such as it is to be met with in England, for dray work is very large, heavy and flabby. The head is long, but it may sometimes be so diminutive as to be out of all proportion with the rest of the body. The eyes are small, the shoulders broad and strong, the neck arched, and the mane, long, bushy, and falling on both sides of the neck, forming a double mane. The croup is wide and well fleshed. The shoulders are straight, and the chest wide, and well covered with muscle. The forelegs and fetlocks have something to be desired. The tail is invariably cut short. The Flemish horse lacks energy; its air is heavy. It is only suited for heavy draught purposes. The coat is generally roan brown, or mottled grey colored. A few facts to note; not much importance is attached to rearing the colt on pasture lands; they are next to stall feed, and court yards, gardens, etc., are their only exercise grounds. But great importance is attached to have the foals suckle pending four or six months. In summer, grass or clover is given them as much as they can eat; in winter, hay, straw, and plenty of oats. The Ardennais colts are not so highly fed, furze, constitutes their chief food; but well cared and better nourished, the Ardennais could be turned into a breed of excellent, all round horses.

The Dwyer Stable.

The comparatively small winnings of the Dwyer Bros. on the turf the past season brings out with vivid coloring the fact that sisters and brothers to great race horses are not often good performers themselves, says an exchange. The Dwyer Bros. started no less than thirty-four horses during the past season, of which seventeen were full brothers or sisters to noted performers, and four were out of mares that have produced first-class horses. Only fourteen of the thirty-four horses started won money this year, which left twenty high-priced colts and fillies that are dependent upon the winnings of better horses for their keep. The following table gives the purchase price and the total winnings on the turf of the brothers and sisters to renowned horses that the stable staried in 1890:

Name.	Brother or Sister to	Cost.	Winnings.
Eon	Eole	$12,000	$18,930
Aurania	Fremont	4,100	15,200
Houston	Hanover	8,200	2,135
Longford	Longstreet	2,800	970
Kinghridge	Kingston	5,800	700
Extra Dry	Dry Monopole	2,000	400
Flatbush	Firenzi	3,000	350
Blacklock	Sir Dixon	4,000	100
Blue Dress	Miss Ford	1,400	.....
Last King	Punster	1,700	.....
Red Dress	Lizzie Dwyer	1,400	.....
Baldwin	Miss Ford	3,500	.....
Baychester	Young Luke	1,200	.....
Hardwork	Portland	2,600	.....
Seminole	Jim Gore	1,800	.....
Westchester	Fordham	1,000	.....
Hempstead	Buddhist	2,100	.....
Totals		$58,600	$38,785

If the price paid for Eon was $12'000, as it is said to have been, the above table shows the Dwyer Bros. to be $19,815 out on the 17 horses bought on account of being brother or sister to a good race horse. The brothers, however, are not out of pocket all the money paid for the above named horses, for at their breaking up sale Kingbridge sold for $3,000, Extra Dry for $2,800, Aurania for $2,700, Longford for $2,600, Houston for $2.400, Blue Dress for $1,025, Red Dress for $850, Westchester for $700, Baychester for $500, Hempstead for $400, Flatbush for $325, and Last King for $125. Total, $21,125, with Eon, Blacklock, Hardwork and Seminole not in the list. With the first cost of the above horses at $58 600 and the winnings at $38,785, and the total of the sale at $21,125, the balance of profit will be found $1,310, with the value of Eon, Blacklock, Hardwork and Seminole added. Taking into account the cost of rearing and training, together with the forfeits and starting money paid in stakes not won, the value of the four horses not sold will have to run high in the thousands to make the outgo and the income balance. The above are not the most striking examples of brothers and sisters to great horses proving failures, as King Thomas, brother to Ban Fox and King Fox, for whom Senator Hearst paid $39,000, has never won a race nor has Rey del Rey, the much talked of brother to El Rio Rey, who was priced at $25,000, and finally sold for a sum close to that amount.

There never was a stable trained in America that contained as many full brothers and sisters to great horses as that of the Dwyer Bros. during the past season, and the comparatively poor showing they made suggests the fact that all good race horses do not come from families with a reputation. As an illustration, the two year old colt Palestine, sold as a yearling for $500, and, though sick half the season, he won no less than $7,735, while Dundee, who sold for $525, earned $5,705. Neither of the two colts last named won any big stakes, but with all that they have placed a good margin of profit to their owners, considering their first cost.

The Nelson Confession.

The following is the confession made by Mr. Nelson in his case before the National Trotting Association:

I, Charles H. Nelson, of Waterville, Me., made the following brief statements regarding the facts: The race was appointed to occur on the track of the Beacon Park, near Boston, Sept. 18, 1889, for a purse of $10,000, which, according to the conditions, was to be awarded in four premiums, consisting of $5 000 to the winning horse, $2,500 to the second horse, $1,500 to the third horse, and $1,000 to the fourth horse. It was announced to be a trotting race at mile heats, best three in five, to be governed by the rules of the National Trotting Association. Owing to a heavy rainstorm and continuous wet weather, the race was postponed until Monday, Sept. 23rd, when it took place over a heavy track. My stallion Nelson competed, with myself as his driver, and the race was decided and the premiums were awarded by the judges according to the following

SUMMARY.

Beacon Park, Sept. 23rd.—W. P. Balch Stake, $10,000; 2:19 class; stallions;

Nelson, b h by Young Rolfe (C. H. Nelson)	1	1	1
Alcryon, gr h by Alcyone (F. L. Noble)	2	2	5
Pilot Knox, br h by Black Pilot (J. H. May)	3	4	2
Junemont, ch c by Tremont (J. Carey)	4	3	3
Granby, h h by Princeps (J. P. Salter)	5	5	4

Time 2:18½, 2:17¼, 2:18¾.

While the time in which the heats were performed was slower than the previous record of each of the two leading horses, it was really very fast when the unfavorable condition of the track was taken into consideration. This was manifest because, in a race between fast pacing horses, in the free for-all class, over the same track during the same afternoon, the time was slower than their previous records by a greater difference than appeared upon a similar comparison applied to the stallion race. Among the owners of the nominated horses and by the turfmen present at and before the race it was generally conceded that the contest for first place would really occur between the stallions Nelson and Alcryon owing to their recognized superiority over their competitors.

In this connection it is but fair I should state that these two horses had competed at Hartford, Conn., in an important race about three weeks before, when Nelson won the first heat in 2:14¼, but was beaten by Alcryon in the three succeeding heats, owing to the bad driving of Nelson. The result of that race created with myself and among my friends a desire for Nelson to win the then approaching stallion race for the glory and renown that would attend such a victory. I believed that my horse was able to win the race bar accident. It was under these circumstances that, on the night preceding the said stallion race, I was approached by Frank L. Noble, the reported owner of Alcryon, who made overtures for me to prearrange with him as to the performance and result of the race. He proposed in substance to divide with me the winnings of our horses, with an agreement that whichever of the two became first winner of two heats should be assisted by the other to win the concluding heat.

I refused to enter into such an arrangement. I told him I thought my horse would win the race in three straight heats. The next day, and within two hours of the race, I learned that Budd Doble, whom I had engaged to drive my horse in said race, was unable to fulfill his contract. I then attempted to secure John Splan to drive my horse. Splan refused. He (Splan) afterward informed me that he had been paid $500 not to drive my horse. Unable to secure a trustworthy driver I decided to drive the horse myself, although I was twenty-nine and a half pounds heavier than the regulation weight, which, coupled with a heavy track, was a heavy handicap.

This was a matter of serious concern to my friends and myself. A most intimate friend with whom I was interested in many business transactions was approached by an associate of Noble's, who influenced him to promise that in case the race was awarded to Nelson the stakes would be given to Noble. I was informed of this immediately after the race. My friend was influenced by a desire to protect my horse from combinations and accidents, and thus promote his chances of winning the race, which would benefit the horse by enhancing his reputation, and that would gratify me more than the mere stake money.

I am sure my friend had no other motive. Neither of us had a dollar wagered on the race, either directly or indirectly. The race was won by Nelson, and the promise made by my friend was complied with. Noble got the money won by Nelson, as well as the second money won by Alcryon. Despite the conditions cited above, I believe that Nelson won on his merits and it was not in the power of Alcryon to beat him.

CHARLES H. NELSON.

The Foretop.

The following very sensible communication has been received from an occasional correspondent:

"In harnessing horses, it is very seldom that any attention is paid to the manner in which the foretop is left under the check straps which come down to the bits across the face of the horse. Horses that are in training, as a general rule, have this little lock of hair carefully cut off close to the poll back to an imaginary line drawn from one ear to the other. Many horse owners take special pride in seeing the foretop left on, and do not care to follow the example set by horse trainers, and sometimes—especially if it should be heavy and long—it becomes a source of annoyance. The hair is drawn to one side and left to brush the animal's eye; it works in a bunch and gets tangled in the overdraw; it draws the blinkers or blinds crooked, and the more it annoys the horse the worse the difficulty becomes. This can all be avoided by using a little care. When bridling the animal, before putting the bit or bits in the month, take the forelock in the right hand and draw it *back behind the ear* on the side the mane lies; the crown piece will hold it securely in place and not a hair will be destroyed. All the straps will move freely, the bridle and blinkers will be perfectly straight, and, best of all, the animal's head will be comfortable and free."

TURF AND TRACK.

Green Morris recently purchased for $2,000 the yearling filly Ellen Witherspoon, own sister to Irish King, winner of the American Stallion Stakes at Louisville.

The Montana bred gelding, Deer Lodge, has been sold to H. Bondy, owner of Ben Harrison, for $800. He is by Regent (son of Ronnie Scotland) out of Lillie Langtry.

The guaranteed value of the Brooklyn Handicap is hereafter to be $20 000, and the Suburban is to be increased to $15,000. These races are steadily increasing in value.

Hugh Penny is one of the coming jocks at the eastern tracks. On the 8th inst. he rode four winners—Brussels, Tom Daly, Ethel S. and Capulin—and was twice second.

Minuet by Norfolk, from Neapolitan by War Dance, has been delivered to Mr. Shippee's ranch near Stockton by her late owner, R. P. Ashe. The mare is stated not to be in foal.

T. Loates heads the list of English winning jockeys for 1890, having won 119 races out of 661 months. He comes from a long line of skillful jockeys, and is the Archer of today.

Tournament's first victory this year was in the Realization States at Coney Island, the ninth race in which he started. For all that, he won twice as much as any other horse of his age during the season.

Charles Schwartz, the owner of Oliver K. 2:16½, has been appointed a member of the Board of Review of the National Trotting Association, in place of Arthur J. Caton, who was elected but declined to serve.

One of the two-year-olds of next year is one of St. Blaise's get, called St. Florian, out of Fenfollet by Kingfisher. He is reported to have done, as a yearling, a half mile in 51 seconds on a shady track at Babylon.

J. M. McClelland, father of Byron and Wallace McClelland, the well known trainers of Lexington, Ky., died at that place on the 6th inst., aged 74 years. He was in good health till within a few days of his death.

The forty-one yearlings on J. B. Prather's farm in Missouri, the get of Faustus and Voltigeur, are claimed by the veteran trainer, "Uncle Jim" Gray, to be the finest lot of youngsters ever produced on that farm.

John Cassidy has the speedy grey pacing mare by Steinway at the Bay District track, and has also a four-year old grey gelding, a full brother to her also, belonging to Mr. Jesse Potter; he shows a great trotting gait.

The new Cumberland Park Course at Nashville is to have two tracks, one oval and the other a kite-shape. This will give owners of race horses a chance to see which they prefer to run upon. The trotting men will use it of course.

Robert McGregor 2:17¼, has been brought back from Kentucky and located at Glen's Falls, New York, where his service fee will be $500 for the ensuing season. A really good trotting stallion is a fortune to any man, rich or poor.

The Bay District track is on its last legs; the club house is closed up, the fences are rapidly falling down, and ere long the track will be washed away by the rains; where the new track will be located is not yet decided, and is probably as far off as ever.

Green B. Morris recently purchased an own brother to Troubadour for $10,000, on which he made a large number of valuable engagements. Now the youngster has an enlarged hock and Mr. Morris feels that the iron has entered into his soul.

The Sire Brothers are anxious to sell both Harry Wilkes and Rosaline Wilkes. We do not see much use for anybody in purchasing the gelding, but Rosaline is desirable as a broodmare and would make a great addition to the harem of Stamboul or Palo Alto.

C. H Nelson, owner of the famous trotting stallion of the same name, informs his friends in Maine that he not only refused $100,000 for Nelson while in New York, but that he offered to bet $5,000 to $10,000 that Nelson could beat any trotting horse in the world.

Fred Taral, the popular jockey, will probably ride in the colors of M. F Dwyer next year, while Tony Hamilton is likely to ride for Phil Dwyer, as the Belmont stable is to be sold at auction within a few days. Hamilton is a great favorite with all the Californians.

Cope Stinson, trotting horse trainer and driver, has been employed by Miller & Sibley of Franklin, Pa., at a salary of $5,000 a year. He hails from Brantford, Canada, where he has always borne an excellent reputation. He must be a good man to command such a salary.

The Jacksonville Times complains that Sunday races in the vicinity of that town are becoming altogether too frequent. The Times is right about it. There are six days in the week to run or trot horses, and there are other ways to put in Sunday besides going to church.

Instead of being by Ben Franklin Jr, the sensational two-year old at Portland turns out to be by Jim Patterson, a son of Adirondack 719; and his dam by Henry Clay. He was bred by Judge Beal, of Kalama, Wash., but we do not know of any horse named Henry Clay in that vicinity.

Gambetta Wilkes is not to be lost sight of in the compilation of this year's records. He is but nine years old, and not only has a record of 2:26 himself but has actually five representatives in the 2:30 list this year. There are not half a dozen as precocious sires in all America as Gambetta Wilkes.

Charles Green has retired from the management of the St. Louis track, much to the delight of the horsemen of that section, with whom he was never popular. Now that he has got out of the concern, we look for it to prosper. There are men in the association competent to handle its affairs without offending everybody.

John McDonald, owner of Chaos and Torso, has sent them to Cape Charles, Va., to rest up for the winter. These horses were bred by W. L. Scott, who raced them very successfully as two-year-olds. This year they did not do so well, although Torso performed a little the better of the two.

The 26th of February is Mulkey's lucky day. Sinfax was foaled on that day, while on February 26th, 18— Cy Mulkey was born. When Mr. Mulkey first went up to Montana with Sinfax, he was objected to as a three-year-old, and the telegraph had to be used before the Montanans would believe he was only two.

Covington has signed articles to ride for Green B. Morris next year. Marty Bergin has not yet signed with anybody, and his experience with the Beaverwyck stable will teach him to be a little careful how he engages himself in the future.

Speaking of the dead hero, Electioneer, the Turf, Field and Farm says: "Up to this date fourteen of the get of Electioneer have obtained records of 2:20 and better. Under this test, and it is a good one, he stands higher than any horse that ever lived."

They had races up at Burns' Valley, near Clear Lake, last Sunday, a flat race and a two hurdle races, each half a mile. Billie the Kid won the flat race and the second hurdle race, while the first hurdle race was won by R. Anderson's ch h Swift. There was a good attendance and everything passed off pleasantly.

Hiram Corey, of Salinas, is one of the select stockbreeders of that section. He has recently gone into the breeding of draft horses as well as trotters, and last week he made an extensive purchase of two-year-old Suffolk—Punch horses from Theodore Skilman, of Petaluma, who has shipped the consignment to Salinas already.

Milton Young, who owns Onondaga and several other good ones, is a sharp man at a bargain. A few days ago at Lexington, he bought the imported stallion, John Barleycorn, for $625. He is a brown horse, eight years old, and got by John Davis out of Arista. He sold him in less than a week to J. D. Patton, of St. Louis, for $3,000.

The Nantura yearlings were sold at auction last week and brought an average of $920 per head, there being 13 head sold for $11,970. The highest price paid was for the chestnut colt Ronald, by imp. Rossington out of a mare by Longfellow, who went to W. H. Cheppu for $2,525. A brother to Freeland was sold to Ed. Corrigan for $2,000.

Many a good horse has been ruined for the want of a competent trainer. It is so easy to find good drivers, and so hard to find patient, painstaking trainers who are competent to handle high-lifed and ambitious horses. It was his patience that enabled Hiram Woodruff to conquer the flighty Rosamond and make her one of the great campaigners of her day.

Jim Gore, one of the sensational three year olds of 1887, was sold at auction for $1500 last week. He is by Hindoo out of Katie by imp. Phaeton, and a magnificent horse till you get below his knees. Had he possessed good forelegs he would have been as famous a performer as his half brother, Hanover. His yearling sister is now owned by Hon. L. J. Rose of Los Angeles.

The value of land may have something to do with the removal of Messrs. Carhart, Hacker & Co. from White Plains, N. Y. to Southern California. Land is worth from $800 to $1,500 per acre in Westchester County, while in Los Angeles county it can be had for less than one-fifth of that sum, and, in a general way, a good deal better land. It will not pay to pasture horses on lands worth over $150 per acre.

T. H. Williams and Ira Randell, who raced in the East last year as the Undine Stable, have dissolved partnership, Mr. Randell taking the two-year-olds Oscar and Homer, while Mr. Williams retained Rinfax, Glenlevit and the yearlings by Falsetto from the sister to Springbok. The latter was left sick at Ogden, when the stable returned to California, but is in good health again and will be brought along at the first opportunity.

The *Horseman* is authority for the statement that H. Ridgway Griffith, Secretary of the Gloucester Club, has started for San Francisco to superintend the laying off of the new track which Joseph Thompson has "promised to present to the city of San Francisco." We are amused at the last portion of the above sentence. We have always known Mr. Thompson as a man who never fails to do what he agrees to do, and we never yet heard of his making quite so rash a promise as this.

The latest accession to the ranks of the breeders in this State is the New York firm of Carhart & Hacker, whose superintendent is Mr. Kieslich. They have purchased a stud farm at Burbank, Los Angeles County, and have already removed a portion of their stock thither. They have now two stallions and some eighty odd mares, and will still make further additions to their stock from time to time as the exigencies of the case may demand.

Doctor Herr bred Lady Thorn and Mambrino Patchen; Charles Backman bred Electioneer and Messenger Duroc; L. J. Rose bred Sultan and Stamboul; J. I. Case bred Phallas and Brown; and Mr. Salisbury bred Direct and Margaret S. How many breeders are there who breed two really great horses in a life time, especially two great sires? We breed racehorses every year, but we breed sires two or three times in a century.

W. S Lawson, of the brokerage firm of Donnell & Lawson, New York, has started a breeding farm near Parkville on Long Island. He has the stallion Pannis by Pancoast out of the mare Mattie Graham by Harold. As sire and dam have each a record of 2:21½, both trotters of pure gait, this horse ought to breed well. Among the mares are Misrinda by General Benton and Fanny Leland by Leland out of Fanny Clay.

We hear that Mr. Winters is to have a racing rival in Nevada. It is The Washoe Valley Stock Farm of which Major W. Thompson is president. Several valuable mares have been from time to time picked up for the farm and a grandly bred stallion with four Touchstone crosses has been procured. He is Nee Ban by imported King Ban out of Macaroona, by imported Macaroon, from Nina by Kentucky, from imported Non Pareille by Kingston.

Dr. C. W. Aby, superintendent of the Gnenoc Stud Farm, was in attendance at the thoroughbred sales at Lexington last week, and purchased the ch h Glen Fortune by Prince Charlie or Glenelg, out of Misfortune by Gilroy. The horse is five years old. Reine d'Or, own sister to Chaos, six years old, was sold for $2,000, the purchaser being Thomas McDowell, of Lexington. We regret that Mr. Gebhard did not secure this mare for California.

The new track of the Stanislaus Stockholders Association at Modesto is said to be a fine place to work horses, and there are now about thirty at work there, notwithstanding the track is not yet fenced and the stalls are incomplete. A movement is on foot to have two days' racing, to commence on Christmas day. Modesto is in the center of a thriving stock-growing section, and there is no reason why the track should not pay well if properly managed.

A country visitor from the northern end of the State has been visiting all the high grade stock farms on each side of the bay, and expresses his belief that Sable Wilkes is one of the coming sires of the continent. "He breeds action—so do other horses, for that matter. But he also produces big bone and lots of substance. You see some families of horses that are good for the track and nothing else. Sable Wilkes' colts will all be valuable on the road, for their legs and feet are simply perfect."

The Saratoga racing club have secured for next season the services of Col. B. D. Woodruff of New Orleans, as presiding judge. He served in the same capacity at the Chicago West Side Park last summer and gave general satisfaction. There is no reason why the presiding judge should not be a salaried officer in America, as well as in England or Australia. It is an important service, demanding great vigilance and the highest order of personal integrity, for which reasons it should be well compensated.

The American trotters in Germany are giving good accounts of themselves. Gracie B. won a race of two miles and an eighth in 5:35½ in harness, and Capt. George won at a mile and three-quarters to saddle, making it at the rate of 5:42 to a mile. When are we to see a trotting or pacing race in saddle, such as they used to have thirty years ago? What joy it was to see Eoff, Charley Shear and old Charley Ellis in the saddle. We have faster horses, but the races do not excite us as much as then.

One of the public spirited men of Mendocino County is Dr. Geo. W. Stout, of Ukiah City. He has a genuine sportsman's love for a good horse, and does not regard one as a mere engine for coining money. The Doctor has been in the city during the greater part of the past week, during which time he has made several suburban jaunts to the larger breeding farms. He will purchase a trotting stallion of approved blood, to be taken to Ukiah Valley for breeding purposes, and he richly deserves to be rewarded for his enterprise.

Gorgo, the black daughter of Isonomy and imported Flirt by Hermit, is now at the Palo Alto farm. Although she has not won many races, yet her two victories in 1889 gave some indication of her true form. At the New York Jockey Club meeting, carrying 119 lbs. in a five furlong sprint, she beat Reporter 117, Geraldine 119 and Oregon 117 in 1:01¼, while at the fall meeting she won a mile and an eighth from Dunboyne, Strideaway and Bronzomarte in '56. Now that Electioneer is dead she will probably be bred to a thoroughbred.

Andy McDowell is said by his friends to be shaping up some rare youngsters, and a few of the campaigners on the Daly ranch in Montana. He speaks in exceptionally glowing terms of the Guy Wilkes—Manon youngsters, the two-year-old chestnut filly having already trotted a mile in handy style in 2:34, while the black yearling stepped a quarter in forty seconds with little or no handling. It is also hinted that there is a phenomenal green pacer being worked to knock the shine out of Cricket and the other cracks, including Yolo Maid.

The great value of American stakes are beginning to attract the attention of European breeders. A wealthy German breeder named Charles Lauer, who owns the well known stallion Gabriel, has shipped all his equine possessions to Kentucky and will locate near Lexington. There is as much money in winning one Futurity Stake as in any eight races run in Germany, to say nothing of the Realization and the Junior Champion. Add the these the rich prizes run for at Morris Park, and it will be seen that if a man has really high grade horses he will win as much in one season in America as he would win in five years in Germany.

Capt. E. H. Douglass, of Tennessee, has purchased from Nick Becker, of Kentucky, the bay mare Cora Fisher, by Hyder Ali, out of Griselda by imp Intruder It will be seen that this mare is very closely related to Spokane, the great three year old of last year. She will be bred shortly to Boulevard, son of Bonnie Scotland. The bay filly by imp. Pizarro, out of Maud L by Bertram was also purchased by Mr. Douglass at the same time. Her third dam is imp. Faverdale by The Palmer, dam of the famous Faverdale colt by Sensation, which was by many deemed equal to Proctor Knott and Salvator in 1888.

A fast two year old trotter has come to light near Portland, trained by the veteran Smiley, who drove trotters here along in the fifties. He was sold for $800 last week to E. J. Jeffrey, ex-sheriff of Multnomah County, Oregon, and "Jeff" is very apt to get "value received" when he buys a horse. He was sired by Ben Franklin, Jr, a horse taken to Oregon, from San Mateo by a man named John Cowdell in 1879 He was got by Israel Larook's Ben Franklin, the horse that beat Shenandoah and Fly-by-Night at Sacramento in 1867. This is the first thing that we have heard of Ben Franklin, Jr., since he left The Dalles, where he was kept until 1883.

Jack Garrity has among his string at the Bay District track a three-year-old brother and a two-year-old half sister to his pacer Hummer 2:18½. The two-year-old is a handsome chestnut, with a beautiful silver mane and tail, and has already paced a quarter in 35 seconds, to a light cart. She is by Valensin. The three-year-old is a pacing stallion, chestnut, with as handsome a mane and tail as the fitly; he has just returned from the Souther Farm, and his condition speaks volumes for the care given horses at Mr. Tompkins' farm. Mr. Garrity's favorite is a black weanling by Gossiper 2:24½, out of his pacing mare Sunrise, who was given a record of 2:27 by her owner this year.

There may be some chance in the future for a restoration of the trotting stallion Nelson, and perhaps of his owner also, to the tracks, but there is none whatever for the reinstatement of Frank L. Noble, the owner of Alcryon. His manner is so defiant and so totally different from the tone of humble pie which pervades the "last dying speech and confession" of Mr. Nelson, that it is safe to say Frank Noble will never again start a horse in a trotting race. He is a smart, shrewd, grasping fellow, very fond of money, and evidently not over particular as to how he gets it. But the stern logic of events goes to prove that he "monkeyed with the buzz-saw" just once too often.

John McConnell, the irrepressible buster, goes down to Vallejo to-day to assist in shaping up the Hollywood colts and mares for the sale in January.

W. B. Todhunter last week purchased from Colonel Thornton a yearling gelding by imported Mariner (Oatcake) out of Aurora, the dam of Guido.

The stallion Happy Russell 2:21½, will still remain at Poplar Grove, having been purchased by an agent of Mr. Emory for $10,030. The horse is greatly admired by good judges, and is thought likely to prove a valuable stock-getter.

Electrotype by Electioneer, out of Addie (the dam of Woodnut and Manon) is to be sold at auction at Lexington, on the same day as Anteeo. He has no public record, but trotted a trial in 2:26 before leaving California.

Parolina, winner of the second race at Guttenberg, on Wednesday of last week, paid $106 50 for each $2 invested in the mutuals, which is a little better than 53 to 1. Nickajack's rate is still the best, 244 to 1, and is not likely to be beaten.

F. S. Gorton, of Chicago, who recently started a trotting horse farm about twenty-five miles from that city, owns that game filly Monette, which trots faster and acts better every time that she comes out for a race. He also owns a full brother to our great California filly, Margaret S.

The young stallion Vitello, owned by Judson Clark of Elmira, N. Y., was bred in Indiana, but foaled in New York. His record is 2:16¾ at five years old, and he is justly regarded as one of the dangerous horses of the next year's campaign. His dam has already produced four 2:30 performers.

The San Jose contingent to Coronado for the winter meeting left last Saturday. Charles T. Boots took down five viz., Nabeau, Vinco, Nerva, Initiation and Sir Walter. Dan Hennessy had Sidney Ashe's pair, the two year old Judge Terry and the three year old Partisan colt, while Westley George sent down Applause.

Too many farmers have an idea a colt can be wintered in the yard and exist on what the other stock leaves; in fact, they seem to pride themselves on the cheapness with which they can get a colt through the winter. This is a grave mistake and in a measure accounts for the great number of worthless horses among the farmers. The first winter is the time a colt should have the greatest care and attention.

It is astonishing how unanimous the three great drivers, O. A. Hickok, J. A. Goldsmith and R. C. Holly are in their opinion of the great pacer Yolo Maid. Hickok says she can go round the first turn to the quarter pole faster than any pacer on earth, not even barring Johnson while Goldsmith and Holly, when discussing pacers and enlarging on the good points and speed of some of their pet horses, always bar the Maid.

The standard bred stallion Master King No. 11,055 is to be sold at executor's sale in Baltimore next Monday by order of the Probate Court. He is by Mambrino King out of Myrtle by Almont Jr. sire of Belle Hamlin. He was bred by C. J. Hamlin, of Buffalo, and is a desirable acquisition to any stock farm. He is two years old and in perfect health.

Phallamont, by Phallas, out of Maud Butler by Almont, is one of the young sires that is making a reputation for himself without the aid of newspapers. He is but nine years old and already has put four trotters in the 2.30 list. Almont leads all sires in the matter of producing dams for 1890 and it does seem as this was the best of all the female lives, at least, so far as heard from. Phallamont is actually outbreeding his sire who is one of the famous horses of the continent.

Anteeo is pronounced by the Western Sportsman to be the most desirable son of the dead hero Electioneer. It says that "his book filled at Lexington in 1889, within five days, with sixty better mares than any stallion ever served before in one season, and he turned away forty applicants in addition to the above." This is a history of which California breeders should be proud, and we shall expect to hear of his bringing a phenomenal price at auction, as he is only eleven years old.

The Pacific Coast Blood Horse Association will hold their Members' Annual Meeting early in January. Owing to business engagements, Mr. Lathrop has expressed his determination to resign all active part in the Association, and a new President will have to be elected. Whom it will be no one seems to know. James V. Coleman, M. F. Tarpey and H. I. Thornton have all been suggested, and any one of these gentlemen would fill the position acceptably.

One of the best young horses seen for some time is a big bay two year old stallion which John Williams is breaking at Rancho Del Paso. Although hardly bridlewise he shows such extreme speed that there is no telling where he will go. Uncle John who has handled and driven as many trotters as most people, says he can show a two minute gait, and several reliable Sacramentans timed the big colt a quarter in 0:30½. He is by Cornelius 11,335 out of a sister to Ha Ha 2:24¼. Cornelius is by Nutwood from Jennie G by Echo out of Jennie Noyes, the dam of Gus 2:26¼.

Salvator is evidently enjoying his new quarters at Rancho Del Paso and has already gained sixty or seventy pounds in weight since his arrival; last week he turned the scale at an even thousand. Mr. Mackey says that the first mare bred to him will probably be Miss Woodford. She slipped two foals about nine weeks ago by Sir Modred with the double infusion of Glenoce blood backed up by the fashionable Voltigeur strain and a grand racing pedigree on both sides, the result of this union should be a race horse sure, whether he takes after sire or dam.

The bay colt Doctor Nave, 3 years, by Prince Charlie out of Crescent by imp Australian, was sold at auction on the 26th inst. at Lexington, for $3 000. Eugene Leigh was the purchaser. At the same sale Heron by Harry O'Fallon out of Virginia B by Buckden, was purchased by W. H. Cheppu for $10,000. Penn P, who was a good two year old but indifferent last year as a performer was sold to J M. Isola for $1850. Milton Young bought the bay mare Despina, by King Alfonso out of Dolly Morgan by Revenue, for $1,000 Laurette by Alarm out of imp Essayez by Cremone was sold for $1,500 to L. H. Theobald, of New York.

E. S. Larabie, the well known Montana trotting and racing man, is the owner of a grand bay weanling by imported Sir Modred out of Christine—the dam of Montana Regent. The colt is a good boy, marked almost like his sire, and can not help racing if looks and breeding are good for anything.

Mr. Salisbury, of the Pleasanton Stock Farm, will be one of the few men who will see the old year out without regret. He has had a remarkably successful year of it with Cricket, Margaret S. and Homestake. The latter horse is liable to become one of the bright stars of the grand circuit next year, and has already become the source of many inquiries at the East. His sire, the game and resolute old Gibraltar, should be rescued from his obscurity over in Nevada and brought to some stud farm in California, where his opportunities will be equal to his merits. The best horses of his day had cause to regret the gameness of old Gibraltar; and something of this trait seems to have descended to his stalwart son.

The old English legend that no horse could win in the Middle Park Plate as a two-year-old and then win the Epsom next year, had a correlevant at Melbourne, in Australia, where a superstition prevailed that no colt could win the Derby that had won the Marihyrnong Plate as a two-year-old. Melton shattered the Middle Park superstition to flinders in 1885; and now Mr. S. G. Cook's br o The Admiral by Richmond, has broken the Australian legend by winning the V. R C. Derby from Gatling and Titan, after having won the Marihyrnong Plate of last year from Proh Pndor and sixteen others. The Msribyrnong Plate was founded in 1864, and this is the first time its winner has won the Derby.

Maryland was formerly known as the cradle of the gallopers, in the days of Ridgely, Duval, Hall and Bowie, but now the people of that section are beginning to turn their attention to the breeding of trotters and with good results. Within the past three years no less than sixteen standard bred trotting stallions have been taken into Frederick county alone. As a result of this, several home bred trotters have gained good records, Estellina getting a mark of 2:33 as a three year old. Currito took down his first race in 2:40 without being extended and is regarded as a very promising colt. Several other good looking youngsters will make their appearance in the Spring and standard bred horses will soon be as plenty as blackberries.

Palestine, by Powhattan—Cachucha, was one of the best two-year-olds in the West, and was recently sold by auction at Lexington to close a partnership between Landman and Byron McClelland. He is a large colt, a capital weight carrier, and is a prominent winter candidate for the Kentucky Derby. He brought $13 000. At the same sale, Sportsman, by Warwick, and Bridella by Springbok, each brought $3,000, Vallera by Springbok $4 500, and Julia May, a yearling, $2,350. It was the closing out sale of the Megibben properties, at which 42 head sold for $49,615, being an average of $1,210 per head. There were 9 broodmares, 17 yearlings and 15 trained horses sold. Capt. P. C. Kidd acted as auctioneer.

In the great Representative Stallion Stakes to be trotted at Lexington in 1893 by foals of 1870, we find the following California sires nominated: Steinway, by the Cook Stock Farm; Stamboul, by Samuel Gamble; Eros, by the Siestar Farm; Simmocolon and Sidney, by the Valensin Farm; Guy Wilkes and Sable Wilkes, by Mr. William Corbitt of San Mateo; Director, by Pleasanton Stock Farm; and Piedmont, Electioneer, Nephew, Palo Alto, Electricity and Azmoor by the Palo Alto Farm. This makes fourteen nominations in all from California, and there is no good reason why there should not have been twenty. There are many good sires in this State whose owners lack confidence to enter into so large a stake as this, not realizing that so valuable an engagement would readily double the value of their colts.

It is always a pleasure to see young blood joining the ranks of racing men. The latest addition is J. W. Harper, Suisun, who has for several years been well known as one of the prominent visitors at the field trials and other dog festivals. Mr. Harper, shortly before the Blood Horse meeting, purchased the well known four-year-old Hotspur from Dan Dennison, and a fortnight ago he purchased from E. Watkins, Sacramento, a bay yearling filly by General Harding from Doo by Uncle Vic, a grey yearling colt by imported Midlothian from Helen Scratch, and the broodmare Eliza by Norfolk out of Mary Wade by Woodburn. These, with several youngsters which Mr. Harper has, should give a good account of themselves, and we hope the genial owner will make a good start in the Spring.

Mr. L. H. Davis, the owner of Roy Wilkes, writing to the New York Sportsman, says very fitly that "the excellence of Almont Patchen is always brought to the front about the opening of the stud season, although I do not know of any match that he ever made." This is a good thing very well said, but there are a good many other stallions, trotters as well as sidewheelers, to which it applies with nearly equal force. When the season is over and the stallions go into training for the circuit, their owners are as dumb as church mice; but when the breeding season comes around, they are willing to go against anything but Stamboul or Palo Alto. Many of these stallions are for sale and liberal commissions will be paid to keep them from getting into a race.

Santa Anita Stock Farm has, during the past few years, suffered many severe losses, owing to the death of many of their best broodmares, and it has been generally conceded that it was owing to bad management. Some few months ago Mr. Baldwin decided to change his men and placed B. B. Woods, the Los Angeles trotting horseman, in charge of the breeding department, since which time only two deaths have occurred, viz, a suckling colt by The Emperor from Savanna, and the four year old bay mare Opal by Gano from Ophir by Baywood. There are at present twelve thoroughbred weanlings on the ranch, viz., by Rutherford a chestnut filly from Clara D, a chestnut colt from Jennie B, a bay colt from Ophir, and a bay colt from Rosebud, by The Emperor, a bay colt from Experiment, a chestnut filly from Anita, and a bay filly from Paola; by Volante, a bay colt from Blossom and a bay colt from Dolly L; by Verano, a chestnut colt from Josie C and a bay filly from Miss Ford, and a bay filly by Gano from Belinda. There are fourteen yearlings being broken and worked on the track; the best work so far has been by the colt by Gano from Maggie Emerson—Lucky B's dam, while the Gano—Jennie B filly shows next best, and a filly by Gano from Josie C gives great promise. The outlook for next year's foals is much better as the eight mares sent to imported Cheviot are all thought to be in foal, among them being Santa Anita, the dam of Gano and Santa Anita Belle, a sister to Gano; Miss Ford, Experiment (the dam of Silver Cloud and Elcho), Blossom and Ophir are not in foal.

Gamaleon, by Gambetta Wilkes, out of Lady Pepper by Onward, is the first three-year-old by that sire to drop into the 2:30 list. Here is a double infusion of the Wilkes blood that is making itself felt on the tracks. Lady Pepper's dam was Fanny Robinson, 2:20¼, by Blood Chief, out of the Vance mare by Alexander's Norman.

W. M. Murry has engaged Willie Madden to ride for him in 1891, and has the following horses in training at the Sacramento track: colt 2 years, by Three Cheers, out of Dairy Maid; Aristocrat, 2 yrs., by Flood, out of Cuba (Argyle's dam) by imp. Australian; yearling colt Peer, by Joe Hooker, out of Clara L; yearling filly by Wildidle, dam by Monday, owned by J. D. Carr of Salinas; 2 year old colt by Argyle, out of imp. mare Ontaway; also 2 year old colt Power, out of Lawn Tennis. Mr. Murry states he will campaign through the Western circuit with the above stable, leaving Sacramento for Lexington about the first of April. His colts are all in good health and in fine condition to begin their preparatory work. Mr. Murry has made the Eastern trip twice before and therefore knows pretty well what quality of horses he will have to meet between Lexington and Chicago.

McDoel, 'the old plow-horse", as he was called throughout the western circuit this year, was originally called Sedalia Boy, on account of his having been foaled near Sedalia, Mo., the property of W. H. Rhodes. A correspondent of the Stock Farm writes that Mr. Rhodes sold him to Mr. Oglesby of Kansas City, who changed his name to McDoel, out of compliment to a personal friend. He was got by the "Waters Horse", a stallion bred near Smithton Mo,, and got by Highland Chief out of a mare by Greenback. McDoel's career through the western circuit shows him to have been a horse of great speed and gameness. He not only got a record of 2:15½, but he campaigned in the very hottest crowd of trotters that could be found. Highland Chief was by Diamond, son of Denmark, out of a Mambrino Chief mare. There have been but few better campaigners in America, in any year.

The steamer Alameda, which sailed hence for Sydney on Sunday last with the emaciated Morse in command as naval, carried out three trotters, two of which are owned by Philip Archibald, the well known San Francisco bookmaker. One is a bay mare by Cubit, full brother to Cyclone, sire of that wonderful two year old Doctor Sparks; and her dam was Imogene by Todhunter's Mambrino. Brown mare by Alaska (son of Electioneer) dam by Bismarck, son of Dave Hill, Jr. The third one is a gelding called Bulwer and is being taken down for Mr. Foster of Sydney. He is by Buccaneer, his dam by Blackhird 402. John Green, the well known driver and trainer, accompanied the horses. "Belfast Spider" was also a passenger by the same steamer. It is said that a party went down to attend the Sylvia Park sale and purchase the great Nordenfelt, but if so he kept his tracks pretty well covered up.

Albert Cooper, trainer of the Hearst stable, denies that the Senator has any idea of purchasing Potomac at the forthcoming Belmont sale. He says the colt Yosemite, in the Hearst stable, is a horse that is rapidly improving, and will give a good account of himself next season. Yosemite is by Hyder Ali, out of Nellie Collier, and was bred at the Rancho del Paso. We feel a genuine interest in a California bred colt bearing the name of America's grandest waterfall, and would like to see him win every time that he is saddled, but, all the same, we have no idea that he will be able to beat either Russell or Stratbmeath, much less the great Potomac. However, the colts that win the futurity have not trained on up to date. Proctor Knott could barely beat Spokane with the latter penalized, in the Sheridan Stakes, after being beaten three times consecutively by Spokane; and when he met Salvator and Longstreet at Monmouth he was easily bowled over. The second Futurity winner was Chaos by Rayon d'Or, but he certainly never made anything of a showing during the season which has just closed. So it may be that Yosemite will upset Potomac next year. Who knows?

There is a nice muddle over a race trotted at Portland, Oregon, on the 11th of last September, six starters contesting the race. J. Hastings' mare Clara L won the first heat, the next three being won by Homestake. The latter horse was driven by Ed Lafferty, who was also in the employ of Hugh Kirkendall, of Montana. Kirkendall also started his bay mare Lady Maxim. Thomas H. Tongue, of Hillsboro, Oregon, had his mare Kitty Ham in the race and she was placed fourth by the judges; and he made complaint to the National Board of Appeals to the effect that the same man Kirkendall was controlling two horses, Homestake and Lady Maxim, in the same race. On the 5th inst. a telegram came out from New York that the money won by Homestake and Lady Maxim was to be divided between the third and fourth horses—Lady Maxim and Kitty Ham. Secretary Gunsl, of the Portland Club, is not yet in receipt of the official findings from Secretary Moss, of the National Association, but thinks that the official notification will be in effect, that the $700 paid to Homestake must be refunded and given to Clara L; and that the $200 paid Clara L must be put back into the treasury and divided between Kitty Ham and Lady Beach, who were placed fourth and fifth by the judges. Tongue is a lawyer by profession and a stock-raiser for amusement. He is a good up-hill fighter and left no point uncovered in this contest. He certainly does deserve credit for his pertinacity.

Apropos of thoroughbred stallions, Mr. L. U. Shippee, of Stockton, is a man who will have a choice lot from which to select, in a year or so. There is Take Notice, a racehorse at all distances, as far as tried, got by Prince Charlie, out of Nota Bene by Glenelg, her dam, Notice, own sister to Norfolk. Here is a double cross of Stockwell blood, one through Prince Charlie and Blair Athol, and the other through Glenelg who was by Citadel, a son of Stockwell. Then comes Fellowcharm, by Longfellow, out of Trinket by Great Tom, her dam Bobinet by Brown Dick, the best son of Margrave. This is a royally bred colt with Sovereign and Glencoe as third and fourth remove. Next is Major Ban, by King Ban, out of Hearsay by Australian. Fourth is Ludowic by Longfellow, out of Carrie Phillips by Pat Maloy, her dam Florita by Enquirer. This a beautifully bred colt likewise, and very hard indeed it will be to choose between them. However, as the Prince Charlie blood is in great demand everywhere, we shall expect Take Notice to become the premier of the quartette; and as Salvator is to be kept a private stallion at Del Paso, the services of Take Notice are liable to be largely in demand. Mr. Shippee's mares are all of high class, hence he is liable to become a potent factor in running matters as well as on the trotting tracks. Longfellow has already shown that he is a male line horse, and hence either Ludowic or Followcharm is certain to prove a good sire. Major Ban, however, is the most substantial horse of the lot, and looks like an Australian bred horse rather than an American. Such legs are seen under a horse about once in a year, and we look for him to found a virtually new family of horses.

THE KENNEL.

Dog owners are requested to send for publication the earliest possible notices of whelps, sales, names claimed, presentations and deaths, in their kennels, in all instances writing plainly names of sire and dam and of grandparents, colors, dates and breed.

Fixtures.

BENCH SHOWS.

1891.

The Buckeye Poultry and Pet Stock Association's bench show. Canton, O., December 30 and 31, and January 1, 2 and 3. James Sterling, Secretary.

Michigan State Poultry and Pet Stock Association's twelfth annual bench show, Jackson, Mich., January 7, 8, 9, 10, 11, 12, 13 and 14. S. H. Slifer, Secretary.

Central City Kennel Club's inaugural bench show, Jackson, Mich., January 10, 11, 12, 13, and 14. Dr. E. L. Kimball, Secretary.

South Carolina Poultry and Pet Stock Association's International Exhibition, Charleston, S. C., January 13, 14, 15, 16 and 17. Benj. Mo. Innes, Jr., Secretary.

Louisiana Poultry and Pet Stock Association's first annual bench show, New Orleans, La., January 20, 21, 22, 23, 24 and 25. A. E. Shaw, Secretary.

Elmira Poultry and Pet Stock Association's bench show, Elmira, N. Y., January 21, 22, 23, 24, 25 and 26. Carl Hart, Secretary.

South Carolina Kennel Association's inaugural bench show, Greenville, S. C., January 27, 28, 29 and 30. F. F. Capers, Secretary.

Westminster Kennel Club's fifteenth annual bench show, New York, February 24, 25, 26 and 27. James Mortimer, Superintendent.

Maryland Kennel Club's second annual bench show, Baltimore Md., March 3, 4, 5, and 6. W. Stewart. Diffenderffer, Secretary.

Duquesne Kennel Club's inaugural bench show, Pittsburgh, Pa., March 10, 11, 12 and 13. ——, Secretary.

Massachusetts Kennel Club, Lynn, Mass, second annual bench show, March 24, 25, 26 and 27. D. A. Williams, Secretary.

New England Kennel Club's seventh annual bench show, Boston, Mass., March 31, April 1, 2 and 3. E. H. Moore, Secretary.

California Kennel Club's bench show, San Francisco, Cal., April ——, 1891. J. B. Martin, Secretary.

Cleveland Kennel Club's fourth annual bench show, Cleveland, O., April 1, 2, 3 and 4. C. M. Munhall. Secretary.

Mascoutah Kennel Club's third annual bench show, Chicago, Ill., April 8, 9, 10 and 11. G. H. Goodrich, Manager.

FIELD TRIALS.

1891.

Southern Sportsmen's Association's annual field trial, Lafayette, La., January 13. John K. Renaud, Secretary.

Pacific Kennel Club's eighth annual field trials, January 19, Bakersfield, Cal. H. H Briggs, Secretary.

Southern Field Trial Club's third annual field trials, New Albany, Miss., February 2. T. M. Brumby, Secretary.

My Greyhound's Pedigree.

[Written for the BREEDER AND SPORTSMAN.]

Should you ask me whence my dog is?
Whence he came and of his parents,
Of his grandsires and relations,
Of his ancient royal family,
For unnumbered generations?
I should answer, I should tell you,
That I know not, that I care not,
Only this do I know of him,
That he chased the hare and caught it,
Out ran all that came against him,
Was most fleet of all the greyhounds,
Won the royal prize at coursing,
What more would you now ask of him?

Any one should know his breeding.
From his lithe well shapen body,
And the grace of every movement,
In the clearness of his vision
They should read of his ancestors,
They were "Fleetwing," "Eaglefeathers,"
"Antelope" and "Gazelle-catchers."

We are for the most part gentle,
Mild and meek and inoffensive,
But these facts we now state plainly,
And if at them you take umbrage,
If this pedigree you like not,
"Put it in your pipe and smoke it."
And forget not in your slumbers,
That he is the King of coursing,
Took his hare and worked it grandly,
Beating your dogs well nigh pointless,
So that they were scarcely "in it."

COURSER.

Howls By Aloin.

The Continental Kennel Club of Denver have decided on holding a spring show, and have selected dates in April, 15th to 18th inclusive. They should have a large entry as Denver is a first class show town.

Dr. J. M. Norman, who has held the office of President since the club's inception, has given way to another, and as the genial Doctor's place will be hard to fill, we doubt the advisability of the club's move in this direction. He should have been retained at the head.

"Dogwhip," in Sports Afield, seems to think that all the credentials a man needs now-a-days is the right to add a title to his name. This may be the "proper caper" in Canada, but will require something more in the land of the "stars and stripes."

I spoke a few weeks ago of something extra fine in the pointer line about to locate in Denver. The deal is now closed, and "Devonshire Myrtle," from the famous English kennel of Bulled-Miner, Witheridge, Eng., and Muskegon, Mich., has been purchased by Dr. A. DeMonco, of the above mentioned city, at a good, stiff price. The Doctor can well be proud of his purchase, as from what I can learn, she is a beauty in the field and on the bench. This is Western progress.

I am informed that Mr. Van Hummel will have a try again in California. Well, he will find "Foeman worthy of his steel. Come right along, Doctor, and bring your friends.

I claim that the western part of the United States—that is, the climate is conducive to speed in the canines as well as the equines. Just remember Spokane, the wonderful horse, and At Farrow, the Western surprise, and keep your eyes open for a wonder from the West in the field trials. "Ah, there!"

Is it not about time for the Irish setter men to start up abusing one another again? We have had some few weeks of a lull. Come, gents, get all the free advertising you can. Don't you see you are allowing a few issues of the prominent papers to slip by without your champions being mentioned, or have you about exhausted your supply of adjectives?

I hope next year to see Field Trials resumed west of the Mississippi River, say Iowa, Nebraska or Kansas. Dogs are plenty, birds abundant, and I don't see any valid reason why Field Trials there should not be a great success.

I am informed that the following is of benefit in distemper. Primary stage: Specific Tincture veratrum vir. Gtts XX. Specific Tincture Bryonia Albs. Gtts X. Water, four ounces.—Mix. Keep pups in a warm room with small quantities of tar burning continually, and give a teaspoonful of the above every hour. The above dose is for pups three months old or under. ALOIN.

The Golden West Club at Newark.

The initial meet of the Golden West Coursing Club took place at Newark on last Sunday. The entries for this occasion numbered twenty and contained some of the best dogs on the coast. The attendance was large and enthusiastic. The grounds were in excellent condition, and the dogs for the most part in splendid coursing condition. One of the noticeable features of the meet was the unusually fine and fleet hares furnished. These, with scarce an exception, led the hounds a merry chase, and furnished first class sport in each and every course.

Mr. John Grace gave the contestants and spectators excellent satisfaction as judge, it being demonstrated by his prompt decisions that only merit was considered by him in reaching his decisions.

The winner and runner up, being Chicopee Lass and Whip, are each well known dogs, and on this occasion, by their splendid work, added still further to the records which they each already possessed, as being greyhounds of the first quality.

Woodside, Mission Girl, Catherine Hayes, Nellie Bly, Lily Hynes and Lady Hynes are also worthy of special mention for the admirable way in which they ran.

The hares were so fleet and so well up in the art of dodging that in many of the most lively courses they succeeded in making their escape from their relentless pursuers. In the third round Nelly Bly and Whip gave a grand exhibition. Seldom has anything like it been observed on the coursing grounds of the West. The work of Slip Steward Halpin was eminently satisfactory, as was also that of all other officers on the field.

SUMMARY.

THE GOLDEN WEST COURSING CLUB, Newark, Cal., December 14, 1890 —President, Mr. James Cox; vice-President, Mr. P. A. Merril; Secretary, Mr. Eugene Geary; Recording Secretary, Mr. Thomas Brennan; Field Stewards, Messrs. Carroll, Edwards, O'Connell; Slip Steward, Mr. W. Halpin; Judge, Mr. John Grace; Slipper, James Wren; Flag Steward, T. T; Brady. Nominations $5 each. Winner, $30; second, $20. third, $15; fourth, $7.50; fifth, $7.50. Twenty subscribers.

1.

J. Byrn's Nelly Bly—beat—J. J. Malloy's Exile.
Thomas Brannon's (N. S.) Maid of Noe Valley—beat—J. Sullivan's Fenian Boy.
M. Tiernan's Catherine Hayes—beat—M. Hynes' Lily Hynes.
A. Merrill's Whip—beat—P. Brown's Limerick Lass.
R. Corcoran's Lily Ryan—beat—D. Garvey's Irish Jim.
T. Alman's (N. S.) Chicopee Lass—beat—M. Tiernan's Glen Fame.
T. Cox's Woodside—beat—J. J. Edmond's Shannahan.
M. Hynes' Lady Haynes—beat—P. D. Nolan's Dark Rustick.
J. McCormack's Tipperary Girl—beat—E. Geary's Lookout.
D. Garvey's Mission Girl—beat—J. J. Edmond's Soldier Boy.

II.

Nelly Bly—beat—Maid of Noe Valley.
Whip—beat—Catherine Hayes.
Chicopee Lass—beat—Lady Ryan.
Woodside—beat—Lady Hynes.
Mission Girl—beat—Tipperary Girl.

III.

Whip—beat—Nellie Bly.
Chicopee Lass—beat—Woodside.
Mission Girl ran a bye.

IV.

Whip—beat—Mission Girl.
Chicopee Lass ran a bye.

FINAL.

Chicopee Lass beat Whip and won the stake, $30; Whip took $20, Mission Girl $15 and Nelly Bly and Woodside $7.50 each.

Meeting of the California Kennel Club.

The California Kennel Club met at the office of Mr. J. B. Lewis & Son, 416 Montgomery Street at eight o'clock last Wednesday evening. After transacting the routine work of the evening the election of officers for the ensuing year came up for the action of the meeting. The election resulted in the choice of the following named gentlemen as officers of the club. Hon. J. B. Lewis, President; Henry L. Miller, first Vice President; Rhody Ringrose, second Vice President; John De Vaull, Treasurer; H. P. Bennie, Secretary.

After due consideration, and in accordance with the action of the meeting, a committee consisting of three members of the club were duly chosen consisting of A. B. Truman, J. B. Martin and H. P. Rennie, whose duty it will be to recommend names for the executive committee and report at the next meeting of the Club.

The dates claimed for holding the bench show are, April 28th, 29th, 30th, and May 1st and 2nd. The Judge selected, and all ready engaged for the same, is honest John Davidson, of Munroe, Michigan. The following is a number of the Bench shows and field trials that he has judged this year.

Bench shows judged at Bay City, Michigan; Augusta, Georgia; New York City, New York; Chicago, Illinois; Youngstown, Ohio, Boston, Massachusetts; Toronto, Canada; Buffalo, New York; and London, Canada.
and London, Canada.

He also judged the horse shows for 1890 at Detroit, Michigan and Youngstown, Ohio.

He has the reputation of being one of the best Judges of horses and dogs in the world. The California Kennel Club in securing his services has no doubt secured the best Judge that could be found in the United States for this purpose and it is certain that the show will be a success.

Denver's Bench Show.

From Our Special Correspondent.

A meeting of the Continental Kennel Club was held at the office of Dr. J. M. Norman, on Fifteenth street, Thursday afternoon, Dec. 11th.

There were present twenty members, with President Norman in the chair.

The advisability of holding a show on the dates claimed in February was discussed at some length, and by a motion of Mr. McDonald, was changed to April 15, 16, 17 and 18, subject to the approval of the American Kennel Club, following close on the heels of the Mascontah Kennel Club's show at Chicago, on April 8, 9, 10 and 11.

It is surmised that a show held on the above dates will catch all the entries from the big Eastern shows, and Denver will in 1891 have a show second to none in the land, as regards number of entries and quality and breed of dogs.

The annual election of officers resulted in the election of Dr. A. DeMonco, president; Bert Cassidy, vice president; F. W. Rand, secretary; Seamore Warren, treasurer. Board of Directors: Dr. J. M. Norman, William Dingle, L. K. Dewien, Claude King, G. G. Liebhardt.

Mr. Weifert of Long Island, New York, was elected delegate for the club to the convention of the American Kennel Club, to be held in New York this month.

Under the present management, the citizens of Denver may look forward to one of the greatest shows ever held in the United States.

The Massachusetts Kennel Club hold their annual bench show at Lynn, Mass., March 24—27, 1891.

The annual election of officers of the National Beagle Club will be held at the Quincy House, Boston, Mass., January 2, 1891, at 7 P. M.

Mr. L. L. Campbell, of this city, has in training a number of dogs that give great promise of becoming splendid workers. They are all of the Irish and English setter class.

The affairs of the American Kennel Club seems to have had their run. Will some one please to throw some other bone into the ring?

The famous English setter bitch Dashing Novice is dead. She won when but one year old, the first American Derby and the first Pennsylvania Derby.

If "Aloin" will not come at us with blood in his eye for gleaning the impression that his reference to "fog horns" last week was directed toward coursing instead of field trials, we will promise to read his copy more carefully in the future, before indulging in comments thereon.

Richard Gardner of Oakland has just returned from a few days' quail hunting. He reports quail exceedingly plentiful. Mr. Gardner speaks in glowing terms of his cocker spaniel "Belle Stubbs," and says it is wonderful the amount of work and hardship such a small animal will endure. "Belle" only weighs 23 pounds and is liver and white in color.

We hope Brother Payne will endeavor to send some of his high class English Setters to San Francisco in '91. Then, again, Mr. Benchley has some pointers of the rarest excellence that should be shown, Kan-koo, by Rush T. ex Patti Croxteth, is an unusually fine show dog. He was bred by A. B. Truman of this city.

Dalmatian or coach dogs of good blood seem to be very scarce in California. At the Pacific Kennel Club show in 1889, not a single entry was made. In the Eastern States specimens of the rarest excellence can daily be seen following a carriage. As an excellent stable dog they are hard to beat, and it is a wonder that they are not more sought after in California.

Mr. W. H. Shorkley, of Candelaria, Nevada, has purchased from H. P. Rennie, proprietor of the California Spaniel Kennels, Oakland, the solid liver Cocker Spaniel dog, "Rex." This dog's sire is the noted prize winner "Giffee," winner of first prizes at Cincinnati, Ohio, and San Francisco and Los Angeles in 1889. Mr. Shockley writes that after hunting him on quail, he did very well, having never been hunted before his arrival in Nevada.

Mr. James E. Watson, of East Berkeley, recently had another black pointer bitch shipped to him from Mr. Pape, New-Castle-on-Tyne, England. Mr. Pape bred old black Joe, winner of the Field Trials Stake at Bakersfield in 1888, In a letter recently sent Mr. Watson, Mr. Pape describes the one just shipped as a "well built, large boned dog, with a good nose." From the way Mr. Watson is importing black pointers, it is quite evident he is bound to place another addition to his laurels.

Mr. Bassford, of Suisun, Cal, the owner of the largest pack of Beagle hounds on the Pacific Coast, has a rival in Mr. H. W. M. Sandbach, of Alameda. Both of these gentlemen have good specimens in their respective kennels. Mr. Bassford's Bannerman Jr. A. R K. 9893, winner of first prize in 1886, and special for best Beagle in the show in 1888 and 1889, is a handsome little fellow and a game worker in the field. Mr. Bassford has nearly twenty of these musical little hunters who make an interesting sight when after game. Mr. Sandbach also has a number of good ones, Bobbie, winner at San Francisco, in 1889, probably being his best.

We learn that Mr. T. H. Allen, of 1022 Green Street, this city, has a fine brace of mastiff puppies. They are Duke of Wellington, bred by E. H Moore, Melrose, Mass., A. K C. S B. 17364 and is by Ex. Ben Lomond out of Saffron, whelped February 26, 1890, and Tomah, A. K. C. S B. 18522 bred by American St. Bernard Kennel, Tomah, Wis., by ex Mascott Bernard, out of Merchant Princess, whelped August 17, 1890.

They are spoken of as being very fine and exceedingly promising puppies. We shall have occasion to refer to them again more fully.

That genial all round sport, P. D. Linville, owner of the English setter bitch "Florine" is very jubilant over the litter of youngsters by "Don Gladstone" out of "Florine". A friend of "Lips" recently asked him what he was going to do with all of them, whereupon he was answered as follows: "Oh, I have some relatives living up the country, and I intend sending up to them enough fencing to enclose an acre or so and place "Florine" and the youngsters inside. You know even the best expert can't tell how pups turn out and I will keep them all till I am sure of owning the choice ones of the lot. I will then place them in the hands of a trainer and run them in the Field Trial of 1892, and you may depend they will keep somebody's dogs moving to keep in sight." We sincerely hope Mr. Linville will succeed in raising the litter. The English setter interests on the coast cannot afford to loose them.

Mr. H. P. Rennie, the newly elected secretary of the California Kennel Club is an ardent fancier of the spaniel and doubtless these beautiful little dogs will receive their full share of attention by the club. With Mr. J. B. Lewis, in the chair, and the work of such an active man as Mr. A. B. Truman, the club will show the effect invariably following good earnest work. Now that the preliminary work for the coming bench show has been accomplished and the services of an excellent and thoroughly experienced judge secured, there is no reason why the forth coming show should not eclipse all former efforts in this direction. The many splendid dogs, newly imported, accounts of which have from time to time appeared in these columns will materially add to the previous list of excellent dogs owned on the coast. The coming bench show will be a success. No lover of the dog should fail to make a note of the dates published elsewhere in this issue.

THE GUN.

An Outing on Snake River, Idaho.

SALT LAKE, UTAH.

EDITOR BREEDER AND SPORTSMAN:—It was toward the close of an early October afternoon in 1878, that with a companion I found myself in one of the narrow valleys of the mountains of Idaho, through which coursed a beautiful stream which emptied into the head waters of Snake River. In the upper region of the last mentioned stream there was at the time of which I write, an abundance of large game, and from the nature and general formation of the country of that section, I doubt not that an abundance of bear, deer and elk may still be found there. The streams in this portion of the mountains were for the most part skirted with a dense growth of bushes of various kinds, forming almost perfect shelter and hiding for the deer which almost invariably would be found in these secluded retreats. The sport of deer hunting with us was the principal feature of our visit, and owing to the peculiar nature of the grounds at this time of the year, we were puzzled not a little to achieve any degree of success. When one chose to act as his own beater, which was the plan first adopted, or rather that of still hunting, the results were most provoking. To get within a very few feet of your game, and then hear it bound away without being permitted to see "hide or hair of it", is enough to try ones temper, and when this same performance is repeated over and over again, one is justly entitled to be "righteously indignant", as an old deacon friend of mine used to put it, and for my part I am free to admit that I exhausted my entire vocabulary of "cuss words", and then felt that I could not do the subject justice. My friend and companion, Dr. Logan, of Indianapolis, had the reputation of being a good, and more than a fairly successful still hunter for deer, but he, too, failed to conquer the obstacles presented. He was not long, however, in arriving at the conclusion that the only way to secure any game was to have the deer routed out of their cover, and to shoot them on the run, but alas, we had no dogs. The gentleman on whom we had depended to be our guide and also to furnish dogs and equipments, such as his experience in the country would suggest, had at the last moment failed us, but we were determined to have our outing anyway, so here we were.

By taking turns in beating the cover along the creek, we succeeded finally in securing some fine sport, and as a result of our second day's work we had two fine deer. But the work was hard, and to one of us constantly not attended with much sport.

On the third morning we had started across a ridge or spur of the range of mountains with the view of beating a small stream which lay in that direction. It was quite early in the morning, the sun being but fairly up when we reached the farther side of the ridge or divide. We were walking along but a few yards apart, keeping a sharp lookout for whatever of game might be sprung. We paused for a moment to take our hearings when the clear and distinct, yet distant bark of a dog was borne to our ears from along the ridge to our right.

We heard the movement of swiftly flying feet among the leaves, and each quickly and quietly took to a convenient tree to await developments. We had not long to wait until we caught sight of two deer running at full speed almost directly toward us.

The leader was an old buck with a magnificent set of antlers, which he held proudly aloft as he dashed along the upper side of the ridge through the open timber. He came directly toward us, and but for my over anxiety would doubtless have passed within a few feet of the tree behind which I was standing, but as I raised my gun his quick eye caught sight of the motion and he turned as if to cross the ridge when I fired both barrels, heavily charged with buck shot, at his broad side at a distance of about sixty yards. I could see that he was staggered from the effect of the shot, yet he kept on at a smart pace, when the doctor's 44 Colts rifle rang out two clear shots in quick succession, and not only did the buck at which I had fired make a bound and fall lifeless, but on turning to the left I found that my companion had stopped the other deer, which proved to be a fine yearling, with his second shot, thus making as fine a double as one could well imagine,

The deer were quickly bled and hung to convenient trees. While performing this task, a young man approached carrying an unusually long muzzle loading rifle, and at his heels trotted about as "ornery" a looking dog as one could find in a month's search.

"'Pears to me like you fellers got my deer?" was his first expression.

"Well—now, really, I didn't know they were tame," the Doctor replied, "for it seemed to me like they were running away just as if they were wild and didn't belong specially to anyone."

"You know what I mean," the young man answered, "and that is that my dog here put 'em up, or you'd never have got 'em."

We cheerfully acknowledged that fact, and offered him any compromise he might think proper, finally letting him have all the venison he wanted.

"I shouldn't care a fig about it," he concluded, "only I'm getting short of ammunition, and won't be able to get any more for some time."

On this gentle hint we generously furnished him with powder from our can, and was rewarded by his offering to hunt with his dog for us during the day, which offer we accepted with some misgivings, thinking that so unprepossessing a looking cur could not be of much use, but in this we were sadly mistaken. That same dingy little scrub had been raised and educated to hunt deer, and he had learned his lesson well. No dog could ever be held in more perfect command than his master exercised over him.

At the command "Turn 'em out" given by his master, he would turn out any game from a cotton-tail to a black-tail that chanced to be in the cover.

The hunting that day proved hard, and our shooting still worse for while three more shots were presented we failed to secure any more game. The last game started was a splendid young buck and I hit it hard but at too long a range to bring it down. It was near night and in addition to this fact I fell into the creek in trying to cross it while attempting to follow the wounded deer. Owing to this misfortune we returned to camp and after a hearty supper our young friend bid us good-night, promising to be on hand early next morning. True to his promise he showed up before we had finished our breakfast and we soon started out.

"Now I'll show you that this dog of mine," he said "can track that wounded deer just as well as any hound you ever saw." And he did. After a course of half a mile or more by aid of the dog we found the young buck quite dead.

Being unused to the hard tramping in the mountains, I remained in camp, after we had succeeded in removing this deer to the large tree in front of the tent. Doctor Logan, in company with the young man went out again and it was late at night when they returned.

They were exceedingly tired, and the way they partook of the broiled venison, which I had prepared for them, showed that an appetite whetted by such a day's exertion, was not over particular as to the methods employed in the preparation of a meal. More than once did I replace the frying pan over the fire, filled with steak cut from the deer which hung from the branches of the tree near our tent, and as often was it emptied.

At length they were satisfied and our pipes were lit and I was ready to hear of their day's work. "We started a deer," said the Doctor, "about two miles up the creek, and the way it fooled us was somewhat peculiar. The dog would run well for a time, but would soon become lost. I could see every way of escape up the creek for some distance, but there were two or three ravines leading off from the creek which were well covered with a dense growth. That deer made two or three turns, doubling back to the stream each time, but I only caught sight of it on two occasions and then at too great a distance to risk a shot, and it finally outwitted us entirely.

"On one of its runs it came very near me, but the brush was so thick that I could not see it, although I heard it plainly. We then left the stream and worked up over the ridge to an open glade, where we succeeded in killing these two fine specimens of mountain grouse. They are the first I have ever killed, and I am consequently well satisfied."

They were beauties, one of them weighing nearly six pounds, the other some two pounds less.

We struck camp next day, and I must say that a more satisfactory hunt has seldom fallen to my lot. T. D. WILSON.

A Cruise on a Mountain Sea.

Of all summer climes, tempting the lover of woodcraft to a delightful outing, give me the Blue Mountains of Oregon. They have such great tall pines and so little undergrowth. The deer are mostly mule deer, the finest venison that ever broiled over coals, and the grouse are the most toothsome of all white meat game. Then the trout of that region surpass all others in gameness at the fly and firmness in the pan. Last of all the dry climate and the cool nights make the "Blue Ridge" of Oregon the finest country in the world for an August outing.

Baker City lies in the fertile Powder River valley, and is about 280 miles east of Portland, and in no other section of America can as great a change of climate be found in traveling the same distance. It is an old mining town whose placers are long since exhausted, but new discoveries of quartz in that vicinity have kept the place up, till it has daily papers, electric lights and all other fixtures of a mature civilization. Around it rise the rugged peaks of the Blue Mountains, crowned with minarets of tapering pines and tamaracks. South of Baker City, to be reached only by forty-eight miles of a very rough road, lies Olive Lake, the loveliest and loneliest sheet of water that a hunter ever beheld. There are two roads leading to the lake, one from Baker City on the north, and the other from Canyon City on the south. These roads unite at about six miles from the lake, leading through a rocky and precipitous canyon.

We camped at a small spring ten miles from the lake on the evening of our first day out of Baker City, four as tired men as ever you saw—Dan, Charley, Tony and Tom. While the latter personage got the camp equipage unpacked, the other three took shot-guns and started out through the woods in search of game. They were moderately successful, securing seven grouse, of which four were laid on the coals and broiled for supper. The dishes were washed, the tobacco and pipes pulled out, and then came two hours of "yarns" about the fire till the wayfarers became drowsy, and lay down with the twinkling stars smiling on them as they slept.

The quartette arose at daylight, and after a breakfast of grouse stewed with onions and potatoes, with some corn bread and coffee, hitched up the horses and toiled along over the rocky road that led to the lake. The August sun came down hot upon them, and Dan and Charley alighted from the vehicle to pick whortleberries with which the road was fringed. The team toiled slowly along, and the two gleaners were never out of sight. It was nearly 11 o'clock when they came upon a huge bank of the last winter's snow, which had been hidden from the sun by a dense growth of alders. Tom alighted from the wagon, and into this snow bank he put a demijohn of New England rum, another of Bourbon whisky and a ten gallon keg of lager beer. By this time Dan and Charley had caught up with the team and rode on the wagon till one man said, "Ah!" and the rest said, "Oh!" The long-sought lake was reached.

It lies nestled in a punch bowl or extinct crater of some forgotten volcano, about 6,250 feet above the level of tide water. The lake is from 650 to 800 feet deep, and is covered with ice from October till the middle of June. Its waters were so cold that we never dared bath in it. Here the nights were so cool even in August that our blankets were covered with white frost every morning, and the climate was so dry that our guns never offered to rust. That's the sort of climate to knock the malaria out of you.

Calm and unruffled as the sky above it, Olive Lake mirrors every tree and every cloud. It is merely an inverted view of the creation. The lake is a trifle more than three-quarters of a mile in length by about half a mile in width. High and precipitous walls of basalt encompass it on every side but the west, where there is a small and shelving beach about wide enough for forty people to camp in comfort. There were probably never half that number there at once. Out of the west end of the lake runs a small creek which expands in a meadow about two miles below, and makes a quagmire at all seasons of the year. In this quagmire the mallard and sprigtail have their nests, and as soon as the flappers are fledged, come to the crystal waters of the lake for their morning bath. Here too, the male snipe gyrates in mid-air in June, while his sober little mate sits upon her nest with four little blue eggs in it; and the man who hears the drumming noise he makes while parading himself before his partner and imagines that it is being done by some pheasant in the adjacent brush, is badly mistaken. The jack-snipe is complete master of the trick himself.

"I'm agoin' a-fishing while Tony gets dinner," said Dan. "Me, too," said Charley. "Come along, Tom, get your pole." And they jumped into a light skiff that was moored to an alder bush near by.

"You won't get a bite and you might as well lay down and take it easy. These fish never bite till after 4 in the afternoon, and you will have the labor for your pains," growled the old pilot. "Come here and start me a good fire in a hole in the ground, I want to make a venison pie for Tony."

But Charley and Dan were obdurate. They pulled out into the lake and began fly-casting. At the end of an hour they were out on the bank again, growling like two young bears. Meanwhile Tom had rolled out a paste in which he had used bacon grease for shortening; and, having filled his pan with some strips of delicious venison and a few fresh mushrooms they had picked up at the last night's camp, he planted the iron Dutch oven in a hole in the ground and set the pie to bake.

"Where's the eggs and rum?" asked Dan.

"Out there in the snow-heap," replied Tony. "You go and bring me six eggs, too."

Dan brought in ten eggs, six of which he handed to Tony. With the other four he beat up a most delectable compound of eggs, milk and New England rum, seasoned with a toss of Bourbon Whiskey, which he churned into a foam and then cried out:

"More food for the ravens, fellers, here's your bitters."

Four tin cups flashed in the air, followed by such remarks as

"Here's pretty good luck."

"Here's all the hair off your head."

"Long life to you and health to enjoy it."

"Bretheren, long may you endure."

And down went the egg-nog. Was there ever a backwoods mixer like little Dan?

Dinner came next. Deer's liver with bacon broiled, followed by venison pie and boiled potatoes, graham biscuits and a good cup of tea. The dishes being washed up and put away, all four men lay down for a nap. When old Tom woke up, he was alone. He looked about the camp and the fishing rods were all there, but the guns were gone. A few moments later heard two shots ringing out from the meadow two miles west of camp. It was nearly 4 o'clock and the old pilot stretched himself with a dull yawn. He picked up a leather case from which he drew the joints of a split-bamboo rod and put them altogether. Reeving his line through the guides, he put on four flies—a black gnat, coachman, gray palmer and professor. He then got into one of the skiffs and paddled around the edge of the lake till he found an old raft of logs, upon which he stepped nimbly and left the skiff to drift towards his starting point. Then seating himself on a big "chunk" in the middle of the raft, he began to cast about him.

The small, silvery trout of that crystal lake came darting up to the fly as you have seen stars fall on a dark but cloudless night. Sometimes he would hook three at a cast, very often two and once he hooked four, but two of them wriggled off before he could land them. His cheeks glowed with boyish fire at the rare sport, but his arms began to tire and he saw the sun sink out of sight behind those high mountains, leaving the broad sky a canopy of fretted gold. It was half past five, and in ninety-five minutes he taken seventy-eight trout, varying from eight to twelve inches. His arms ached and he paddled the raft slowly to shore.

Arriving at camp, he built up a brisk fire of "mountain mahogany" and set down to clean fish. He had gutted them all and covered them up in the snowbank when a cry of "Woohoo!" attracted his attention and in came Dan with nine "flapper" ducks.

"Make me a cock tail, old man," he said. "I've had an awful tramp for these. How many do you want cleaned for supper?"

"Three of them and hang the other six up where the bears cannot reach them:"

"Woohoo" broke the forest stillness again. This time it was Tony, with seven fat, young grouse. He picked four of them for the broiler and was about to lay them over the coals when Tom said "Hold on, Tony, the fish first, you know."

"Fish?" Who's got any fish?" cried both in the same breath. The old man picked up a pan and showed them seventy-five odd trout all ready for the pan. In less than a moment, both men, tired as they were, had leaped into their skiffs and were out into the lake, casting away for dear life. They came in at Tom's call to supper, Dan having 22 and Tony 26. But all this time, where was Charley?

The shadows began to deepen along the lake. The plashing of the beavers, coming out for their evening's sport, could be distinctly heard. The three men concluded not to spoil a good feed, so they set a supper for Charley and put it into the Dutch oven to keep warm. This done they sat down to a hunter's feast of fried trout, stewed duck with olives, broiled grouse and baked potatoes.

"I'd know the crack of that rifle five miles off," said Dan, as he helped himself to a second dish of berries and milk, "and I haven't heard it all day long."

The other two men sat in silence till Tony said: "He may have struck another party of hunters and concluded to stay all night."

"Never," said Dan, "he wouldn't worry the rest of the gang like that." Eight o'clock came, and the moon rose in all her glory. Nine o'clock came, and three anxious looking men knocked the ashes out of their pipes as Tony spread out their blankets upon mattrasses of pine boughs. Not a word was spoken—their anxiety was too deep.

Suddenly it came, the cherry cry of the missing hunter, "Woohoo," and their hearts leaped for joy.

"Gimme anything you've got, old man. I can eat a wild bull, horns and all."

"But where have you been and what have you done," asked Tony.

"Don't talk to me—I've killed the boss—not another word—I've got the daddy of all of 'em hangin' up on the tree—it'll take horses to bring him into camp—nuf sed."

Fried trout, stewed duck, corn bread and grouse all disappeared before the voracious Charley, who devoured them with the appetite of a paper mill. But he steadfastly refused to tell what it was he had killed, and before 10 o'clock the quartette were all sound asleep.

After breakfast next morning, Dan stayed in camp and put in the morning in repairs to the wagon which had been severely used upon that rough road. Tom and Tony took a pack horse and accompanied Charlie about six miles into a dense forest on the mountain side, and there, what do you suppose he had hung up by the gambrel joints, but a "big horn" or mountain sheep. If you want fine meat for camp, kill one of these big fellows. It may not be so easy a job as you think for. I am nearly sixty years of age and have killed hundreds of deer, to say nothing of elk and antelope. But I have my first mountain sheep to kill yet.

The hunters remained there nine days, during which time Charley killed 2 elk, 2 bears and 1 big horn. Tom and Tony each killed 4 deer, while Dan killed 5 deer and a 'year'ling bear. A smoke-house was improvised and the venison hams smoked to the Queen's taste. They packed over 1200 trout in snow and grass and took them back to Canyon City.

A leaden, wintry sky hangs over the crowded city where I write this; and the soh of the rain will soon be heard as the yule-log burns on the Christmas hearth. But as I look upon my rod-case hanging over the mantelpiece, my heart goes back to the peerless summer skies of Eastern Oregon and I seem to inhale the odor of the soughing pines once more. The old quartette is scattered apart, probably never to be reunited on earth. Dan is hard at work at his forge and Tony is quietly getting rich at his little country store. Charley,

the last I heard of him, was prospecting for gold in northern Montana; and I am sitting here in the twilight of life's autumn, wondering if I shall ever again see days so surpassingly fair. HIDALGO.

Habits and Haunts of Aquatic Birds.

Owing, perhaps, to a lack of rain, the duck, brant and goose shooting has been far below the average on the coast this fall, although the recent change in the weather has rendered it much better. These migratory birds seek the fields where the conditions are most favorable to them. They require the tender roots and grasses upon which to feed, which requires a reasonable amount of rain to produce. The fact that this has been the cause of an absence of the usually fine shooting enjoyed here, is evidenced by the information which comes from the gulf region which is to the effect that these birds were never found in greater numbers than now in all southern waters. During a remarkably dry season in the intermediate section of the county, it is found that all aquatic birds enlarge the scope of their habitat, and during the winter months are found to increase their journey southward to where water and food supply may be found. Climate is agreeable, but a proper food supply is an essential which they search for until obtained, when their usual feeding grounds are found wanting in quality and quantity.

In conformity with this view, we find that the usually fine duck grounds of the Dakotas and Washington, are yielding but scant returns to the fowlers this fall. It is not a scarcity of the duck crop, but the failure must be attributed to a lack of rain and a consequent lack of suitable foods which usually grow in the marshes and lakes. Nebraska and Kansas comes to the front with the same complaint as to the lack of good duck shooting. But there is seldom a loss in this regard without a corresponding compensation and in all of the intermediate States we find the account of an abundance of upland birds. In all cases quail are reported plentiful in these districts, dry weather, in the absence of prairie fires, being conducive to their breeding and development. Chickens and grouse are doing correspondingly well under the same conditions. The nimrods would do well to note the character of the season and choose their hunting grounds in accordance with these conditions. The facts noted in Ohio, Indiana and Illinois are the same this season, and we believe that it is an invariable rule, being governed by the season and the habits and wants of the birds.

The Wily Jack Snipe.

The snipe shooting at the Pleasanton marshes is reported as being exceedingly fine just now. Last week Mr. Thomas Norris spent the portion of a day there with the result of bagging some two dozen fine birds. He reports that there are thousands of these excellent game birds on those grounds. A pleasant day, with a good dog and gun, spent in that region would be a boon not quickly forgotten by any lover of true sport, for there is an unusual degree of satisfaction in stopping the spiral flight of a Jack snipe.

Let no man boast of his power with the gun until he is capable of making "doubles" on these most difficult of wing shots. The bird is fairly in position with your gun, and you confidently press the trigger, but the instant you do so you are aware that your shot will be useless—the bird has twisted out of its former course.

Perhaps it is a cool windy day; the birds are wild and continue to worry you by getting up wild and darting away before your dog can point them out. The dog becomes worried and disgusted with the fruitless work in the mud and water and you have long since become far more so. Then you had best quit and go home. There are days when snipe shooting is a pleasure and a comfort; days when the birds lay well to the dog and present some of the finest shooting known to the field. Such days are usually warm and pleasant, although the wind may be blowing smartly.

The Spaniel is to my mind, a most excellent dog for such work. My shooting over them under such conditions has been frequently attended with the very best results.

We understand that the Pleasanton marshes are remarkably fine grounds and that for years they have presented the very best snipe shooting imaginable. The pleasure to be derived from bagging a dozen or more of these toothsome table birds is scarcely equalled by any other species of sport with dog and gun.

The greatest fault which most sportsmen have to overcome in snipe shooting is the tendency, which the flight of the bird encourages, of being in too great a hurry. One should either shoot him on his first flight from cover, or wait until he ceases his rapid spiral curves and settles into the steady straight away which he usually takes if flying far.

The duck shooting about Suisun is reported as being very fine. It will doubtless continue so until another change in the weather. Every gunner in that section, and those of our sportsmen who have visited that point, have reported that the shooting is excellent.

A number of fine bags of ducks have been made by parties from the city near Byron, on the Sacramento river. Every one who enjoys the sport is on the alert to get away from the city just now for a day's shooting.

Missouri comes to the front with a determination to put an end to hounding deer. It seems like the voice of sportsmen all over the country favor laws to this effect. There can be but little doubt but that the game interests of the country would be better protected if the work of the hounds were confined to chasing the wolf and fox.

To insure good success take a ten bore gun, have your shells loaded with 4½ drachms of powder, two wads, 1¼ oz. of No. 6 shot one wad, and have them well crimped. If marsh or bay shooting provide yourself with a boat, and a good spaniel retriever, one which you can lift into the boat without danger of upsetting it, and whose coat will not flood you with water after retrieving, and you will enjoy the sport.

We see the unsportsman-like practice of indulging in club matches, where the hunters of a certain region are divided into squads and vie with each other in bagging the most game, the losing side to pay for a banquet at the close of the hunt for the entire party, is still tolerated at some points. The practice should cease. It has no element of true sportsmanship in it, and encourages the wanton destruction of game.

ROD.

The Proposed Game and Fish Law.

SACRAMENTO, Dec. 9, 1890.

EDITOR BREEDER AND SPORTSMAN:—I would like to express my views in your valuable paper in regard to the bill to be presented to the next Legislature by the State Sportsmen's Association for the better protection of the game and fish interests of this State. Having been an employee of the present Fish Commission, and having traveled all over the State in my official capacity, I can speak knowingly of the want of more stringent laws for the preservation of our fish and game. The Fish Commission as now constituted, is a non-salaried office. They have a small fund to employ assistants which has been mostly used in the fish interest, and only recently has there been much attention paid to the game interests. There have been a few prosecutions of persons arrested for having female deer skins in their possession, but very few of them were convicted. The present Fish Commission has done very good work as far as their time and the funds at their disposal would allow, but the amount allowed them is too small to enable them to look after everything that comes under their charge. I visited Eel River in Humboldt County, and, from conversations with the fishermen there, found out that they were using seine nets and were taking salmon by the ton and selling them for two and three cents per pound. My visit was made in the month of August, and their fishing season does not open until October, and as my allowance was limited, of course I could not do much at that time of the year.

At the suggestions of several well known citizens of Eureka, Humboldt County, I presented the name of Mr. H. T. Smith of Eureka, as a fit person to be appointed a Deputy Fish Commissioner for that locality, Mr. Smith being an ardent sportsman, and was willing to give his spare time in looking after the fish and game interests. He was appointed as deputy without any compensation, and I have since learned he made an excellent officer, but here is where the laws are not as they should be. In asking men to do the work without any compensation, it is hard to get good and reliable men to fill these positions without pay. That is why I favor the State Sportsmen's proposed laws by appointing men under the proposed new law and paying them a good salary and a liberal allowance for expenses incurred in prosecuting offenders, and selecting men for the positions who are thoroughly posted on the game laws—good, reliable, sober men, irrespective of politics; then will the new laws be a success. Three or four good men can traverse this State and in a short time bring all the offenders to justice.

In all my prosecutions I had hard work to convict, as my time was limited, and in most places I found that the officials cared very little about enforcing the game laws, and most all the fishermen had a political pull.

The present laws require that an offender be taken before the nearest Justice of the Peace, and that always happened to be where he lived, and it was next to an impossibility to secure a conviction. If the laws were so that an offender could be taken outside his own dunghill, convictions might be more plentiful. During the season of 1888, the Fish Commissioners had a patrol boat manned by a crew of six men and they did excellent work among the salmon fishermen on the Sacramento River. These fishermen are mostly Swedes and Italians, and they are constantly violating the fish laws and defying the authorities. They fish all Saturday night and Sunday, while the law-abiding fishermen are obeying the law. They are a hard class to deal with, and if one of them gets caught he generally goes before a Justice of the Peace and pleads guilty, and is let off with the minimum fine of $50 which is nothing at all as he will do the same thing over and escape detection for a good while again. One boat can make enough during Saturday night and Sunday eve to pay the fine twice over. The fine for this offense should be increased to $250 for the minimum and the same amount should be mentioned for killing deer. With these strict laws and fines enforced it would be found in a short time our fish and game would be more plentiful.

I hope that you and all true sportsmen will use their best endeavors to have the State Sportsman's Bill passed this winter.

M. COFFEY,
Secretary Forester Gun Club.

The Izaak Walton Angling Society.

The following account of the above named society is taken from the Fishing Gazette, and will be of interest to all anglers.

The Izaak Walton Angling Society was founded on Oct. 19, 1874, at the old King John's Head, Mansfield Street, Kingsland Road, N E., and in a ospital room the meetings are still held at that comfortable hostelry. From the commencement the members have been steadfast and true in upholding the objects for which the club was formed—*i. e.* the promotion of social intercourse and friendship among anglers, the cultivation of angling by honorable and fair means, and the inculcation of kindly emulation among the members by the holding of regular meetings for the display of fish captured by rod and line.

One of the first things that attracted my attention when I entered the meeting-room was the really creditable collection of preserved specimen fish hung upon the walls. I congratulate the society upon having one of the best shows in the district. It is worth the while of any angler to call and inspect them. Among the more prominent cases I noticed two very handsome perch, taken by Mr. F. A. Hawthorne, at Sewardstone, 3½lb. and 3lb.

The same gentleman has three other perch from the Thames, 3lb., 2½lb., and 2lb.; he also has a fine chub from the Ouse, 4lb.; a tench from Broxbourne, 3lb; a bream from the Ouse, 4½lb.; and four pike, 10lb., 13lb., 11lb. and 14lb. Mr. F. Porter is big on bream, with six specimens, 6lb., 5½lb, 5lb., 5lb., 4½lb. and 4½lb., all from Waltham, and all taken the same day. Mr. A. C. Bedford has a pretty Prussian carp, from Romford, 3lb 12 oz, a very handsome chub from Chertsey, 6lb. 8oz., (good on ye, Bedford!), and a pike from Chelmsford, 8½lb. Mr. G. Riches shows two bream from the Ouse, united weights 8lb., and a chub caught the same day, 4lb. Mr. G. Manning has a roach from Amberley, 2lb. 2 z., and a tench from the Lea. Mr. C. Hayward shows two pike from the Avon, united weight 22½lb., and two bream from the Ouse, 4lb. each. The same gentleman has a nice chub of 4lb. from the Medway. Mr. W. H. Mecham has a chub of 4lb. from Chingford, and three bream. Mr. B. Crook shows a capital perch of 2½lb. from Broxbourne. Mr. J. Dodd, a grayling from the Avon, and Mr. R. Perrin a capital roach from the Stour, 2lb. 2oz. I may mention Mr. F. Goodwin has three good roach in the taxidermist's hands, which will shortly be hung in the room. The whole of the specimens were taken from the bank; the members are debarred from weighing in fish from punts or boats. The specimens are admirably preserved and mounted, and are kept beautifully clean and tidy.

The ordinary business of the society is transacted on Wednesday evenings between the hours of 9 and 11:30. The Thames standard is adopted for the gross weight competitions, but two-thirds of the prizes are allotted to specimen fish. The total number of members is ninety, and average attendance, twenty-five. The Secretary tells me it is very seldom ever the slightest misunderstanding arises among the members. The prizes are given in coin, but received in value; the reason for giving them in coin is to allow the different winners to purchase any article that is most suitable for them. There were one hundred and eighty-three special and annual prizes competed for and won by the members during the season 1889-90. From the commencement of this season up to the present time seventy-six special prizes have been offered, including twenty-two special Christmas prizes, in addition to the large number of annual prizes.

The White Fish—Coregonus Albus.

In replying to some queries of a correspondent as to the nature, scientific name and worth of the American White fish as a food and game fish, the Turf, Field and Farm makes use of the following language:

We cannot be content with giving curt, categorical answers to the queries of our correspondent; we are too proud of our gastronomic treasure, the corogonus albus, to neglect the opportunity to say a few words in its commendation. This delicious fish enjoys the rare distinction to rank with the turkey, the canvas-back duck and the diamond back terrapin among those edible luxuries belonging exclusively to the continent of North America, and it is to be found indigenous in no other part of the globe. Its gustatory excellence is such that our most distinguished gourmets, such as Roosevelt, Hutchinson, Cygnus, Page McCarty and the late Sam Ward are to this day in doubt whether it is not superior in delicacy of flavor even to a freshly run Kennebec salmon. Unfortunately it is not a game or sportsman's fish; it is a dainty feeder and a shy biter, if it bites at all. It would defy the skill of Brother Harris, of the American Angler, even if he were to cast for it with one of Charley Imbrie's most deceptive flies, but the disappointed fisherman will be more than compensated by the sapid succulence and exquisite flavor of its flesh; but to enjoy this in its utmost excellence the epicure must go to the great lakes on our northern border in preference to Lake Superior, where it is taken in nets, and occasionally attains to the weight of ten pounds The white fish like the shad lives but a few moments after it is taken from the water, and like the shad, it should be cooked as soon as possible after capture, and that in the simplest manner. Like the imperial canvasback and the terrapin, it stands upon its own unriveled merits and needs no condiments. The small fry which our correspondent fails to classify are probably the young of the white fish, in which case we heartily congratulate the Acclimation Society of Canterbury, on the acquisition of one of the foremost piscatory luxuries known to the world.

A capitalist of New York estimates that there are £600,000 expended annually by Americans, as rent for fishing grounds and moors in Scotland. There is nothing like being "in the swim".

Mr. F. P. Callundan, Chief of Patrol State Board of Fish Commissioners, took a trip during the week, visiting the principal fishing points along the Sacramento river in the interests of the commission.

The fishing for the past week has not been up to the average of the week previous. The grilse fishing along the water front has not entirely ceased, but the yield is not so good as that of a couple of weeks ago. But there are some people who will fish at all seasons of the year, and at every opportunity. It matters little to them as to the character of fish caught, just so it is fishing. Many such fishermen continue to fret the waters with their lines, and to judge from the number of them still engaged in the sport their efforts must be attended with more or less success.

A correspondent of the Fishing Gazette gives the following account of a visit to the Woolwich Club rooms: "The Woolwich Brothers have a very decent collection of preserved specimen fish. Among them I noticed some capital roach taken by Mr. Hazel; Mr. Pearson has a good roach-bream from Dagenham Lake, 1lb. 12oz.; a capital chub of 5½ lbs, from White House, Lea Bridge, taken by Mr. Pearman; the same gentleman has a barbel of 7¾ lbs. from the same place; a chub from Goring, 2 lbs., Mr C. Jones; three bream from the Medway, 3 lbs, 2½ lbs. and 2¼ lbs., Mr. Bridges; perch from Dagenham Lake, 2 lbs., Mr. Hicks; some roach from Lea, Mr. Bridges; and some from the Victoria Docks, averaging 1lb. 12 oz. each, taken also by Mr. Bridges; a carp from Wicham Pond, 2½ lbs., Mr Hicks; and a tench, 3 lbs, same gentleman; a very pretty carp of 6½ lbs., taken by Mr. Cregan; and a pike of 17 lbs., taken by Mr. Reed, completes the collection.

Like all club men, some of these anglers have had their red-letter days and amusing adventures. I note that in July, 1875, Messrs. Hicks, Merrick, Bridges, Saunders and C. Bowmont caught in the Victoria Graving Docks, 14¾lb. of perch with live shrimps. In August, 1877, Mr. Hicks caught a dace from the Ravensbourne, at Lewisham-road, Southend, Bromley; length, 16in.; weight, 1lb. 2½oz. In 1884, Mr. Watkins had a perch from Dagenham Lake, 3lb 6½oz. In 1885, Mr. Hart met with a curious experience. Fishing with gentles he hooked a small perch, before he had time to land his catch, a larger perch rushed forward, seized the small one, and fairly swallowed it; he paid the penalty, though, for Mr. Hart succeeded in landing the two. Not the least amusing catch is that made by Mr. White in 1884; he, fishing with Mr. Grimwood, hooked and played a fair monster, as he thought. After a deal of excitement, and the exhibition of great skill and *finesse* on the part of the piscator, he successfully brought to bank—an old gingham! It is a positive fact that he "played his catch" for one and a half hours! A short time back Mr. Howcroft had seventeen pike and two dozen good roach in two days at Swindon.

Grim's Gossip.

It is rumored that the fee of Eros will be $250 next season.

Capt. A. B. Anderson, San Gabriel, Los Angeles, is reported to have sent an agent East to purchase a string of thoroughbreds.

Ferguson, by George Wilkes, got but thirteen foals in all, and four of them entered the 2:30 list this year, three trotters and one pacer. Few horses can make any better showing.

Mr. Salisbury and J. H. Neal, the Secretary of the Pleasanton Stock Farm, are at present doing the driving on the farm, and are said to have straightened out some exceptionally good youngsters.

There are but four stallions nine years old which have four 2:30 trotters to their credit. These are Phallamont, Sydney, Pilot Medium, and last but not least, Lord Russell, own brother to Maud S.

John Mackey, Rancho Del Paso's superintendent, who was in town last week, said that he had received a telegram from James Kerrigan, stating that imported Cheviot had arrived all safe at Fairview Farm, Tennessee, on the 11th.

Hereafter all fixed events of the Kentucky Trotting Horse Breeders' Association will close on March 1st instead of January 1st, and all purses shall be divided —60 per cent. to first, 25 to second and 15 to third, thus abolishing fourth moneys.

One of the largest horses on the American trotting tracks is St. Valentine, 2:20, his weight being 1,400 pounds. He is by Westwood, son of Blackwood, and his dam is by American Clay. There's the sort of a stallion from which to breed or the coach.

W. L. Donathan will take up the youngsters from Senator Hearst's San Simeon ranch and work them on the San Jose track this winter. The track on the Pleasanton ranch is not in a very advanced state, and will probably not be ready for work until next fall.

There is a strong probability that the Pleasanton Stock Farm will ship at least two mares to the harem of Nelson, 2:10¾, in the early spring, as Mr. Salisbury is desirous of securing some of that kind of blood to mingle with that of Director.

A splendid opportunity is offered this week for a good man to secure a permanent place where a great deal of money may be made. The Directors of the Napa Association ask for proposals from those who may wish to lease the association grounds for two years, to send in bids to A. H. Conkling, Secretary of the Board.

The oldest mare in America is said to be owned by Daniel Heacock, who lives near Cambridge City, Iowa. She is 46 years old and was purchased by him during the Mexican war Mr. Heacock keeps her at work on his farm every day, and she enjoys, apparently, the best of health.

The Montana colt Vice Regent, bred by Kohrs & Beilenberg, of Deer Lodge, was drowned on the sunken steamer City of Baton Rouge, on the Mississippi river last week. He was owned by Brown & Lawson, of Memphis.

George Leavitt, of Boston, offered $15,000 for Sternberg, 2:26, at two years old, but it was refused. Sternberg is by Wilkes Boy, 2:24½, out of Fanny Allen by Black Allen. He is owned by George St. Clair, of Lexington, who is evidently of the opinion that he has another Axtell or Allerton.

Mr. Wieland, of brewery fame, has purchased from Mr. T. J. Ludwig, of Santa Rosa, an exquisitely matched team of bay geldings, which he will drive on the road. They are over seventeen hands each and perfectly gaited. Both of these horses were sired by Alexander Button, out of mares that were half sisters.

Budd Doble says that California is the best place to winter horses that are tired and jaded after a hard campaign. But Mr. Doble adds that while California agrees with some horses, there are others with whom it does not. He is wintering his horses at Terre Haute, the home of Senator Voorhees, the "tall Sycamore of the Wabash."

By Holly is very much pleased to think that Andy McDowell has fallen in love with the Director—Belle Evans filly that he has sold to Mr. Daly. She was in foal to Woodnut when Mr. Holly sold her to the Copper King, and the produce is a chestnut filly, which Mr. Holly has purchased since from Mr. Daly.

Belvedere, own brother to Sir Dixon, is offered for sale on private terms in Kentucky. His dam was Jaconet, sister to Iroquois, winner of the Epsom Derby. There is the horse to cross upon the Norfolk and Monday mares in this State, and it is a great pity that some of our breeders do not buy him.

Wm. Murray of the Cook Stock Farm, paid a visit to the Hollywood Farm last week and took Charles Derby 2:20 home. The stallion was looking as fine as silk, and his appearance puts one very much in mind of Stamboul. Mr. Holly is confident that if Derby is given the same amount of handling that Stamboul has had, that Derby will be able to trot a mile in 2:11.

On his return from New York to his home in Maine, C. H. Nelson said that while in New York he refused an offer of $100,000 for the stallion Nelson. He also said that in the presence of a number of moneyed horsemen, he offered to bet $5,000 to $10,000 that his horse could beat in a match race any trotting horse that stands in the world.

Eddie P., the five year old pacer, was worked on a farm as an ordinary work horse till the past season. He recently paced a half-mile in 1:03 at Fleetwood, and is regarded as a coming rival to Johnston. Eddie P. is by Montezuma, son of Alcantara, out of Dave by Peacemaker. His speed is evidently a matter of inheritance.

We notice in Wallace's Monthly that an error has crept into Col. Irvin Ayres' advertisement, by which it is made to appear that he is offering Freedom 2:29¾ for sale. Mr. I. Ayres made no such offer. What he did advertise for sale was Fanny Fern, by Jack Hawkins, from whom Freedom is descended, through her daughter Mollie Drew. Those who are acquainted with Col. Ayres know very well that this is a mistake and that he is too much of a gentleman to offer other men's horses for sale without authorization.

James Corcoran, trainer and driver for Mr. Crabb of the To-Kalon Stock Farm was in the city on Thursday, and reports all the trotters in good condition. Eight of them are being handled, and several show promise of speed. Keepsake, owned by sheriff Boggs of Lake county, is at To-Kalon and has improved wonderfully in his actions, being now willing to go in company, something he would not do last season.

L D Goldberg, owner of the ringer, Dick Organ, who trotted all last season through the Western circuit as Black Frank, has been expelled for life, together with Dick Organ. His trainer, Garrity, not being proven to be aware of the fraud, was not punished by the Board. The two horses were so much alike that when they were put side by side, none but the initiated could tell them apart. When it came to having the horse examined, Goldberg would show up Black Frank. When the race came off, Dick Organ represented Frank by proxy. I am glad that this man Goldberg is punished, and only hope that others of his stripe will be treated with the same severity.

There are many farmers who desire to buy a good serviceable stallion, yet feel that that they cannot afford to pay the princely prices asked for those with long pedigrees, and consequently go without. This week a gentleman offers for sale the handsome bay horse Hancock by Barney's Hambletonian (son of Whipple's Hambletonian 725) dam by Williamson's Belmont. As this horse can show a mile better than 2:40 without any training he should prove a prize for some one, especially as he can be bought for the small sum of $500.

At the late sale of trotters at Souther Farm, Mr. Salisbury purchased the brown mare Rosebud foaled 1884 by Gibraltar 2:22½ dam by A. W. Richmond for $840. It was his intention to breed her to Director, but since her arrival at the Farm she has shown such a fast way of going that instead of being bred, Rosebud will be given the necessary preparations for a season's campaign. In the same stable, will also be seen next year, the filly Evangeline 2:28¾ by Director which was considered one of the best two year olds in Kentucky during the past year.

I see that the BREEDER AND SPORTSMAN confidently asserts the superiority of John Goldsmith as a reinsman, as compared with James H., but accords our Eastern favorite the palm whilst discussing training abilities. I am sorry the question has ever been agitated. Each is a valued friend of mine, and I like to think of them simply as "Johnny" and "Jim" pleasant, congenial traveling companions, capable, industrious and popular drivers, and good fitters, with no allusion to their respective merits.—Horse World.

Alcantara blood is coming into great demand since that young sire achieved his unparalled feat of putting twenty-one representatives into the 2.30 list in one season. The latest investment is that of Mr. J. D. Yeomans, of Glencoe, Iowa, who has recently purchased the brown stallion Parker by Alcantara, out of a mare by Blackstone, son of Hambletonian. Mr. Yeomans is evidently one of those men who believes in keeping up with the procession. He has a number of mares by Mohican 608.

Dr. L. Herr, of Lexington Ky., who is justly entitled to be regarded as the patriarch of the trotting turf in the Blue Grass State, is lying dangerously ill at his home, and his recovery is deemed a matter of doubt. As the breeder of three such noted horses as Lady Thorn, Mambrino Patchen and Mambrino King, he will always occupy a prominent position in the trotting history of America. He must have passed the great boundary line of three score and ten, and the chances for his recovery are doubtful. His biography would be a very pleasant and useful bit of reading.

The Directors of the Modesto Association are going to have a grand opening for their new track on Christmas Day, and the sport will also be continued on the 26th. Subscriptions have been taken up among the business men of Modesto, and liberal purses have been offered for both runners and trotters, who may participate in the sport. One of the innovations resorted to by the Board is the fact that the public is invited to attend on both days without money and without price, there being a free gate so those who attend may see what has already been done by the energetic members of the Association.

A case came up in the courts of New York State last week, under the provisions of the recently enacted statute which prohibits the publication of a false pedigree of a horse for purposes of gain. D. A. Hill, of Sidney, a well known horseman, had been indicted for a misdemeanor in advertising an alleged false and fraudulent pedigree of his stallion, King Richard. The specification in the indictment was that Hill had given the horse a registry number to which he was not entitled. The defendant's counsel argued that the giving of a wrong registry number did not constitute the offense contemplated by the statue. The court so ruled and quashed the indictment.

A letter from a friend in Tacoma tells me that never before in the history of Washington has there been so much attention paid to the breeding of good horses, both trotters and thoroughbreds, as there is at present. The Association at that point are doing an immense amount of work on their grounds and deserve much praise for what they have already accomplished. The track was originally laid out on a heavily timbered piece of ground, and it became necessary to remove all the trees within the center of the track. They have had an unlimited amount of clearing to do, yet still when it is completed, my Tacoma friend assures me that it will be the best track west of the Rocky Mountains. At present there are quite a number of horses at work there, and more are expected shortly after the beginning of the year.

In 1881 Mr. Haggin started his breeding operations at the Rancho Del Paso with some twenty mares and the stallion Longfield as the sire. Now he has the largest breeding farm in America, with 15 stallions and 228 broodmares embracing the very cream of English and American racing blood. Among his stallions are the tried sires, Sir Modred, Darebin, Kyrle Daly, Warwick, Milner, Joe Daniels and John Happy; and the high class racehorses, Salvator, Hidalgo, Ben Ali and Tyrant, all winners of valuable sweepstakes. In the purchase of such broodmares as Miss Woodford, Glidelia, Maud Hampton, Agenoria and the like, Mr. Haggin has made the cost a secondary consideration. His maxim is "They come high but we must have them." Here after Mr. Haggin will have no horses trained but will devote himself exclusively to breeding.

The conundrum which is going the rounds of the Eastern press is, Was Boston (sire of Lexington) a pacer? The question seems to be a ridiculous one, as his thighs did not droop like those of a pacer. We could sooner suspect Racine of being one and a fast one at that. Boston was the sire of one horse who would have been a fast trotter had he been properly handled. His name was Pataskala and he was out of a thoroughbred mare by Industry. He trotted in 2:41 to wagon at Columbus, Ohio, some time in 1858, and would have made not only a great trotter, but a valuable sire also, had he been in proper hands. He must have died at an early age, as we do not remember to have seen his name in any trotting pedigree. Perhaps some of these Eastern wiseacres will now credit Pataskala's merits to the pacing blood in Boston.

Electioneer was a horse that always seemed to have something in reserve. Hinda Rose was the first to put the three year old record below 2:20. When Sable Wilkes and Axtell both cut under it, Sunol came out and saved the honors for the big ranch where the tall pine grows. Then Bonita cut down the four year old record to 2:18¾, but Elvira cut it down to 2:18½. Then out came Manzanita and lowered it to 2:16. Then Hinda Rose's yearling record was for a long time the best till Sadie D. knocked the black out of it. Norlaine then came out, a grand-daughter of Electioneer and dropped it down to 2:31½. Add to this the fact that Palo Alto's 2:13 is the fastest heat ever trotted in a race, and you will see why it is doubtful if money will replace Electioneer.

The Terre Haute Express says that Jack, 2:12¼, "The Grey Ghost" has been sold to Malcom J. Forbes, of Boston, Mass., and will hereafter be used on the road. The sale probably closes the turf career of one of the most remarkable horses in history. Born of lowly parentage he has by sheer force of merit won his way to that galaxy of turf heroes, which memory will always hold dear. His sire, the crippled Pilot Medium, has for his dam the old time Pilot Jr., trotting mare Tackey, 2:26, and who threw speed to all kind of horses, but the sire being Happy Medium, a horse having the reputation of siring soft performers, the breeding of Pilot Medium was considered so ultra-fashionable that he was sold for $250 and yet such was the irony of fate that it was reserved for this despised and neglected sire to be coupled with the no account mare Carrie Russell, not bigger than a $10 bill, which could have bought her, and prove that the blood of Happy Medium could produce other than curs. Jack is a most peculiar horse At no time does he possess those cyclonic bursts of speed common to some trotters, but rate him the first quarter in 33½ seconds, and in each following quarter there need be but little deviation. He is game to the core; ever ready to fight out a losing battle with that same bull dog determination as a winning. However, with all his inherent qualities, it is doubtful if he would have ever reached eminence, had he fallen into hands other than those of Doble. It needed the skill and brain of a master to direct and bring his powers to a winning form, and still more to maintain them. Of all the cracker-jacks he was without doubt the hardest to prepare and keep up. He was gross to excess, as his care taker once said, "can keep fat on the lining of his stall." While he never took a lame step in his life, his feet required much attention. Being a hard horse to balance he would require a certain balance to-day, another to-morrow, but when he was right where was there one that could beat or outlast him? With his retirement from the turf the memory of the once despised Happy Medium does not sink out sight, for does it not live in the unbeaten Nancy Hanks, a race mare every inch.

Speaking of the Board of Review connected with the National Trotting Association, the New York Sun says:

It is an exceptional occurrence for a Pacific district member to attend the New York seasions so that Mr. Coombs, who made the long journey across the continent, attracted particular attention. He is of quiet manner, with a thoughtful face and thoroughly in love with the sport that has grown so popular in his section. He is a breeder in a modest way for California, and owns the Salvador farm, located very close to the fast mile track at Napa. The most famous of his trotters is Little Stanley, a brown mare, 9 years old, by Whippleton, a stallion of Hambletonian blood, bred in California. Lilly Stanley was first handled by John A. Goldsmith, and afterward by Orrin Hickok. During the season of 1888 she made a brilliant campaign, beating many good horses, and in a heat won from the crack stallion Woodnut, placed her record at 2:17½. Her best race was one of six heats against a good field, where she came to the front after the third, and trotting the fifth in 2:19 outlasted her opponents and carried off first honors. Since then Lilly Stanley has been bred to Director, having a colt by him, and is again in foal to the greatest campaigning sire of his day. The pedigree of her dam, Dolly McMann, whom Mr. Coombs also owns, can not be established, though he feels pretty sure that she was got by Mambrino Patchen, the famous sire of producing dams. Lilly Stanley's performance entitles her dam to standard rank, and Mr. Coomba now breeds the old mare to Stamboul the champion of the Pacific Slope. It was at Napa that Sunol trotted in several of her fastest miles, and there Palo Alto made his record of 2:12¼ last year. The most notable mile this season was that trotted by the yearling colt Freedom in 2:29¾. Mr. Coomba was one of the official timers, and says that the sight of the wonderful trotter coming down the home stretch at a 2:19 gait was one to stir the pulse of every horseman who saw it. Freedom made the last quarter in 34¾ seconds, and Mr. Coombs says that as Goldsmith tapped him with the whip, the sturdy youngster laid his ears back and responded to the call like an old campaigner. His record has attracted much attention to his sire, Sable Wilkes, whose first crop of foals are but a year old, but show speed at first handling. Mr. Coombs considers that Sable Wilkes is the coming sire of California, as he represents the improved Wilkes strain, which is crossed with the Moor, and in the second maternal line with Mambrino Pilot, who combines the blood of Mambrino Chief with that of Pilot Jr. The Napa lawyer considers that the strong breeding of Sable Wilkes, coupled with his individual quality, insures him success in the stud, for he has a record of 2:18 at three years, which stood as the best till Axtell lowered it, and has a very rapid action which he transmits to his offspring. Regarding Sunol, Mr. Coombs, who, like all his countrymen, takes great pride in the fleet young mare, is of the opinion that she has been in training so constantly since she was first handled, that she needs a let up, and general reconstruction. He says she was too finely drawn when she returned from her Eastern tour, but he thinks with a rest that she will do great things yet.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*

STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, 177—179 BROADWAY.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.

Advertisements running six months are entitled to 10 per cent discount.

Those running twelve months are entitled to 20 per cent. discount.

Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.

Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff

San Francisco, Saturday, Dec. 20, 1890.

The Occident Stake.

Owners of well bred colts cannot afford to lose sight of the fact that on January 1st entries will close for the Occident Stake of 1893. $100 is the sum that must be paid for starters, but the installment plan is used in this stake, and when nominations are made only $10 have to be sent with the entry; $15 more have to be paid on January 1st, 1892, while $25 are necessary to be paid on January 1st, 1893, and $50 thirty days before the race. As is well known, the State Agricultural Society adds the Occident Cup, the value of which is $400, to the winner. The conditions are mile heats, best three in five, to harness, the first colt to receive the cup and six-tenths of the stake, the second colt three-tenths, and the third colt one-tenth. Five have to enter and three to start; all other conditions of the stake being regulated by the National Trotting Association rules. It must also be borne in mind that a subscriber to this stake is not liable for the whole entrance money, as payments not made upon the dates designated, simply forfeits all previous payments made and releases the nominator from all further liability. This race has been held annually for quite a number of years, and is looked forward to as one of the principal events of the trotting circuit. Our readers should bear in mind that entries close on January 1st next,

The Holly Sale.

For several weeks there has been advertised a synopsis of the stock that will be sold by B. C. Holly of Flosden, three miles from Vallejo on Wednesday, January 7th, 1891. The advertisement has drawn a great deal of attention to the exceedingly fine stock, which Mr. Holly will dispose of absolutely, and quite a number of inquiries have been received from many points in the United States asking for further particulars, and in several instances prospective purchasers have asked for private prices, wishing to make certain of securing some of the good ones before the sale takes place. To inquiries of this kind Mr. Holly has invariably stated that all of the stock as catalogued will be sold on that day, no matter what it brought, and that prices could not now be placed on any of the entries. The blood of Electioneer, Kentucky Prince, Alcazar, Sidney, Alcona, Woodnut, Abdallah Wilkes, Albert W., Alaska, Echo, Stamboul, Bayonne Prince and George M. Patchen, Jr., is found thickly scattered in the animals offered for sale, and without doubt the sale of the Hollywood stock will prove one of the most successful vendues ever held in this State. Catalogues have already been issued and may be had by addressing B. C. Holly, Vallejo, or on application at the office of the BREEDER AND SPORTSMAN.

A Forestry Patrol.

Unless something is not speedily done to check the ruthless and unseasonable slaughter of deer in the northern and eastern counties of California, we shall soon find the deer scarcer here than in New York, Vermont or Maine. Already the hide-pigs and horn-gluttons have effectually robbed of deer every county that borders upon the Sacramento and San Joaquin valleys; and now the deer is undergoing his slow and sure extermination at the hands of the omni present "squaw man of the Coast range."

The writer can well remember when the approach of a high-pressure steamer, with her cloud of smoke and roar of exhausting steam, would startle the great bands of antelope from almost every bend on the Sacramento River; when vast herds of elk inhabited the willow thickets along Stony Creek and Feather River; and when a man could not ride after dark, from Chico down to Bidwell's Landing, without starting up from two to a dozen grizzly bears. All that condition of affairs is changed. The elk have sought the mountain fastnesses of Mendocino and what few antelope remain, are to be found only on the Truckee and the Humboldt. As for the grizzly bear, he never leaves the Sierras now. The white man's presence is distasteful to him and he scents the smoke of a brick chimney from afar off.

Therefore, unless legislation be had to check the ruthless slaughter of deer in the mountain counties of this State, we shall soon find that they have vanished like the antelope and the elk. The only way of checking the promiscuous slaughter of deer out of season, that we can see practicable, is for the State to maintain a forest patrol during the close season, the members of which shall be peace officers with full power to make arrests and compel the attendance of witnesses. The question next arises, How can such a police system be kept up without entailing an undue expense to the State?

Our answer is by the issuance of gun licenses, three dollars per year for one gun, five dollars for two, and seven dollars for three, owned by one and the same person. During the war a man had to pay a yearly license to the internal revenue department, for carrying any sort of a gold watch, and yet nobody felt it a hardship. And we will venture to say that no man should deem it a hardship, at least, no genuine sportsman, to pay three dollars a year on his gun for the sake of having the game protected during the close season. All guns should be taxed alike, whether breech-loaders or muzzle-loaders, for it is generally your idle, lazy, shiftless poacher who cannot earn enough money to buy himself a breech-loading gun. For the collection of this tax, the several counties could afford to pay a commission of not less than twenty-five per cent.; and the men who serve as patrolmen during the close season could be employed to collect the tax during the open season. They should be appointed by the Sheriffs of the several counties, subject to confirmation by the Boards of Supervisors.

The chief objection to this proposition lies in the fact that the counties in which the most slaughter of deer out of season takes place are the very ones in which there is the least population, and which are, for that reason, least able to support a patrol system. But whether this plan of supporting a forest police by gun licenses be adopted or not, we feel that something must be done to save the deer; and we trust that after the Senatorial election is disposed of, our Solons may give this matter their earnest consideration.

Destruction of Food Fishes.

The presence of seals and sea-lions in the bays of San Francisco and Monterey, is a constant menace to the fishing interests of the State. A full grown sea-lion will consume over one hundred pounds of fish per day, and the show at the Cliff House for the amusement of the average Eastern tenderfoot, costs the people of San Francisco about two tons of fresh fish every day in the week, or more than 700,000 tons per annum. Some years ago a large number of lobsters were planted in this bay, and yet none have since been caught here or elsewhere along the coast; and it is the belief of our leading naturalists that their destruction is due to the presence of seals and other less formidable natural enemies.

There is no good reason why destructive animals like seals and sea-lions should be protected by law, as at present, any more than that legislation should be enforced to protect bears, wolves or panthers. They make fish scarcer and so debar poor men from earning a livelihood, the getting of which is already sufficiently environed with danger. This makes the price of fish higher and places them out of the reach of the working classes, who need a variety of food just as much as the rich. Again we say, repeal the laws protecting the seals and let us have plenty of good and wholesome food fishes for the rich and poor alike.

Our Game and Fish Laws.

It is of the highest importance to the public interest that the action of the coming legislature relative to our game and fish laws be well considered. There is a movement of no inconsiderable importance which has for its object the enactment of a law which will permit the use of seines in the streams of the State, other than the Sacramento river, the meshes of which shall not be to exceed four and one-half inches in size. That such a provision would be subversive of the public interests, it would seem need only to be stated to be recognized, but the friends of this interest must be on the alert.

The plea that the smaller streams should be governed by a different provision as to the taking of fish than that applying to the Sacramento river, is possessed of no force whatever, but there exists the strongest and most cogent reasons why such provisions should not be enacted.

The small streams of the State are the spawning grounds of the salmon. To permit of the use of a four and one-half inch mesh in seines used in such streams, would destroy the object of the law, as the fish would be taken before they would arrive at maturity, and thus destroy the opportunity for their reproduction.

It is estimated that hundreds and hundreds of tons of fish would thus be taken before they would have the opportunity of spawning.

To the friends of the salmon we would say, watch the movement and see that it meets a well-merited defeat.

The Value of a Good Dog.

The interest which has been awakened in dogs all over the country in a few years past has been marvellous, yet notwithstanding this fact, and when we consider the use and well nigh invaluable worth of a good suitable dog to the farmer, ranchman, and in fact, to every household, we cannot but be surprised at the inattention given to the selection of these highly meritorious animals.

The selection of good dogs has so far been left to the sportsman, the dog fancier, or the shepherd. The great masses of the people, who have constant use for good watch dogs, seem to be satisfied with almost any mongrel that chance may have thrown in their way.

In order to have good dogs supplant the inferior ones, their superior traits of character must be known in order to be appreciated.

We should not feel safe to leave our home unguarded by the faithful dog which knows and performs his duties better, and even far more faithfully than the average man could or would.

As office and bank guardians, they are of the first importance, while to the farmer and average householder, they are of inestimable value. The bird dogs, and those of the hunting family generally are being well cared for, and it lies in the hands of the general public to say, by their demand for his services, how far the watch dog shall be coached and developed. The St. Bernard, the mastiff, the bloodhound, and other species of this faithful animal, are worthy of the first attention of the public. We trust that a far more than usual interest may be taken in this matter at the coming bench shows, to be held in the State during the coming spring. If you have not a good watch dog, secure one at once; he will repay you a thousand fold on the investment.

The Case of Nelson.

In another column will be found the written confession of Nelson which was handed to the Board of Review of the National Trotting Association, when his case was called at the semi-annual meeting lately held in New York City. Already sentiment has set strongly in favor of the expelled horseman, and there are many who are outspoken in their belief that Nelson was treated with too much severity by the Board; especially in view of the fact that he has given evidence that will most surely tend to convict Noble of being the party who was most to blame in the transaction. It would even seem that Noble was the person who paid Splan $500 not to drive Nelson, so that his owner was obliged to get up in the sulky with almost thirty pounds overweight which was a serious handicap in such a race. There are some who advocate that Mr. Nelson should have been suspended only, instead of being expelled, but it must be borne in mind that suspension in the National leaves the American tracks open to the use of the party under penalty. If a fine had been inflicted of several thousands of dollars, one exhibition in any of the principal trotting centers would have recouped Nelson for the money paid out and that punishment would not have been severe enough on the offender. In our judgment the Board have pursued the only course that was left open to them by inflicting the extreme measure of the law, and its very severity will arouse a feeling of sympathy in the minds of all horsemen throught the country, that will ultimately result in his reinstatement.

Pheasants in California.

Senator Routier deserves the thanks of all our sportsmen for his efforts to import and domesticate the Mongolian pheasants which he is purchasing in Oregon and Washington. The birds are thriving and multiplying rapidly there, where the winters are far more rigorous than in California; and there is every reason to believe they will do better here—if they are let alone for a year or two. The great complaint made about them in Oregon is that they are destructive to the grain crops. This we do not believe. Wild geese and widgeons are far more destructive to the young grain. But farmers' boys must have some excuse for shooting before the law expires, which is in September, 1891. They sell the birds to taxidermists in Portland and Salem for which they are paid $3 for cock birds and $2 for females. The taxidermists get from $16 to $20 per pair for them. We know of one naturalist who dresses an average of eighty pheasants per year, and has done so for the last three years. The sportsmen of this State should see that legislation is had that will punish taxidermists for selling them as specimens, just as severely as market men who sell them for the table.

California Trotters.

This week we give our readers a list of the trotting horses now on the Pacific Coast that are liable to take part in the California Circuit next year. As far as possible pedigrees have been given, but in quite a number of instances the breeding of horses have not been sent in with the reports and lack of time prevents our being able to correct the oversight. This list will be valuable to the Secretaries of the various California Agricultural Associations, and we would suggest that this copy of the FREEDER AND SPORTSMAN be filed away for reference, as it will come in handy when the societies are making up their programmes for next year.

Mr. Salisbury, of the Pleasanton Stock Farm, makes an emphatic denial to the assertion that raising trotters is a lottery; he claims that trotters can be raised with as much certainity as draught horses from work stock. "Speed will produce speed, and you will get speed from developed sires and dams," is the old gentleman's axiom, and "colts and fillies by Director, 2:17, from broodmares who have entered the list, are sure to be trotters," he confidently asserts.

Answers to Correspondents.

Answers for this department must be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

W. K. Smith.

In your next issue please let me know if a mare called Lady Hope trotted in Providence, R. I. in 2:26. I can not give the year but think it was between "80 and 85." Also if there is such a stallion as "Infantry 8357" and the owner.

Answer.—There is no record that Lady Hope ever entered the 2:30 list either at Providence or elsewhere. There is a horse called Infantry 8857 and a letter to C. E. Mayne care of this office will reach the owner.

L. H.

Wm. Boyd.

E. S. S

Your horse is not standard. His colt, if a trotter, with the record of 2:26, would have made the sire standard, but being a pacer the stallion receives no credit.

A Subscriber.

The grey mare Maud M. by Stockbridge Chief, Jr., is not in the Standard list.

H. W. O.

In your "Answers to Correspondents" column, please inform me who is the greatest sire of trotting horses, and who has the greatest number under 2:20. What place did Electioneer rank in the list?

Answer.—George Wilkes has 63 trotters and Electioneer 61. The latter leads with trotters under 2:20, the number being 12.

W. E. C.

Will you please give the age of Williamson's Belmont and where he died, if he is dead?

Answer.—Belmont died near Oakland July 4th, 1865, aged 18 years.

A subscriber.

Please state in your next paper 1, the names of the horses that took part in the celebrated Foster and Katie Pease race? 2, Who won? 3, Was not Foster some other horse, and please give his name. 4, When and where the race took place.

Answer.—There were Foster, Rutherford, Katy Pease, Hockhocking, Golden Gate and others, but with the exception of the two first named all were distanced in the first heat, Foster proving the winner of the race. He was sometimes called the Oregon Plough Horse as a nickname, but Foster was his right name. The race was run on Feb. 22d, 1876.

H. P.

Please give me the pedigrees of the following horses—George M Patchen Jr., Antevolo and Christmas.

Answer.—Geo. M. Patchen Jr. 31, by Geo. M. Patchen 30, dam Belle by Top Bellfounder grandson of imp. Bellfounder. Antevolo 7648 by Electioneer, dam Columbine by A. W. Richmond, 2d dam Columbia by imp. Bonnie Scotland. Christmas by Santa Claus dam Mary G by Blondin son of imp Sovereign.

The Horse Shoe Superstition.

The origin of the horseshoe superstition has never been satisfactorily explained. Among the theories offered, that contained in the following is among the possibilities: The horseshoe of old was held to be of special service as a security against the attacks of evil spirits. The virtue may have been assigned, perhaps, to the rule of contraries, from it being a thing incomprehensible with the cloven foot of the Evil One, or from the rude resemblance which the horseshoe bears to the ray of glory which in ancient pictures were made to surround the heads of saints and angels, or, finally from some notion of its purity, acquired through the fire. This latter superstition receives some countenance from the method resorted to for the cure of horses that had become vicious or afflicted with any distemper which village farriery did not understand. Such disease was invariably attributed to witchcraft, and the mode of cure seems to imply the belief that the imperfect purification by fire of the shoe which the animals wore had afforded an inlet to malevolent influences. Accordingly, the horse was led into the smithy, the door was closed and barred, the shoes were taken off and placed in the fire, and the vitan or warlock was speedily under the necessity of removing the spell under which the animal suffered. Sailors are, for the most part, careful to have a horse shoe nailed to the mizzen mast, or somewhere on the deck near midships for the protection of the vessel. The Chinese have their tombs built in the shape of the horse shoe, which custom is very curious, as it may be fairly regarded as a branch of the superstition long ago prevalent among ourselves.

The principal gateway at Allahabad is thickly studded with horse shoes of every size and make. There are hundreds of them nailed all over the great gates, doubtless the offerings of many a wayfarer, who has long since finished his earthly pilgrimage.

We could not find out what was the exact idea connected with this custom—probably much the same notion of luck as we attach to finding a horseshoe, especially one with the old nails still in their place. We afterward noticed that the sacred gates of Somnah, in the Fort at Agra, are similarly adorned. It reminded us of that curious old manorial rite still kept up at Oakam, in Rutlandshire, where every peer of the realm is bound the first time he enters the town to present a horseshoe to be nailed on the portal, which is well nigh covered with these lordly tributes. It is said that in case any contumacious peer should refuse to pay this tax, the authorities have a right to stop his carriage and levy their blackmail by unshoeing one of the horses. To avert so serious an annoyance, the tribute shoe is generally ready, some being of an enormous size and inscribed with the name of the donor. Whether these Eastern horseshoes were taxes of offering I cannot tell, but it certainly is very curious to observe how widespread is the superstitions reverence attached to this peculiar form.

The Kite Shaped Track.

The following very readable letter was sent to the New York Spirit of the Times by Dr. J. W. Day President of the New York Trotting Horse Breeders Association, he having been asked to give his opinion of Kite Shaped tracks.

Your editorial of Oct. 4 on the kite-shaped track, with your accompanying note, asking for my opinion of the article and also my opinion of the kite shaped track, reached me just as I was on the point of shipping five of my stable of horses from the fast Cleveland track to the kite shaped track in question. I therefore decided to await the results of my practical experience with my stable, also what I might see, hear and learn personally on the ground, before rushing into print upon a subject upon which I had no practical knowledge. I would suggest that it would have been better for all concerned if yourself and a number of your correspondents had adopted the same course. I would also modestly suggest that we have had altogether too much of this kind of theory writing on tracks, breeding, etc., by a lot of people who know nothing about the subjects by personal, practical experience.

But to the subject before us. After three days' freight shipment (made twelve hours longer than necessary by my being persuaded by a freight solicitor at Cleveland into shipping from Chicago west by way of the Chicago, Milwaukee and St. Paul Railroad instead of the Q route or the Illinois Central, as either one of the last named would have saved the twelve hours, I deem it a duty I owe my fellow breeders and horsemen who may in the future ship to Independence to thus warn them), we arrived at the city of Independence, Ia.—mind you, we say city after we go west to Chicago. Well, Independence with its 4,000 inhabitants has good right to be called a city as any place of its size I ever witnessed, surrounded as it is by the most beautiful farming country the sun shines on, and its citizens are composed of the most energetic, intelligent, and by far the most hospitable class of people I ever met. I was invited and did call, dine and get well acquainted with ministers, lawyers, doctors and bankers, and therefore to say that my visit of three weeks at Independence was enjoyable, is unnecessary. As to Williams, the man with whom the word luck has been so often connected. I want to say that whoever will do as I have done, go to Independence, watch the man closely, observe his cool, calculating quiet, but at the same time persistent (almost bulldog) way of managing all the affairs of his business, will never again write or mention the word luck in connection with him.

Williams has done more to stimulate the breeding and sale of the American trotting horse than any other ten men that ever lived, rich or poor. He deserves success, and now that he is using the means that he has acquired in the business by building the finest, fastest track on earth at an expense that no other man would have dared incur, and as he is now out with a programme of stake the magnitude and liberality of which is far above any other that has ever been offered by any association, much less by any one man, I say he deserves success and support. Instead of trying to cast odium on him and his track every breeder in the land owes it to him and the business to at least make one or more entries in his stake even if they never go near there. We cannot afford as breeders to let such a man or such stakes fail for want of support.

But now to the track itself. First, this kite-shaped track is not five, four, three nor even two seconds faster than the regulation tracks in this country when cared for and at their best condition What difference there is, is not due so much by half in the shape of the track as to the nature of the soil. I firmly believe that a track built after the regulation form on the same soil would, to the average horse, he just as fast and to some even faster.

Your expressed fears as to a lot of 2:35 horses getting into the 2:30 list on kite-shaped tracks. I assure you, is wholly groundless. But such statements by yourself and others of your correspondents was misleading and cost some poor men quite a bit of money that they could not afford to lose by leading them to ship horses that could not trot better than 2:35 on other tracks to Independence, expecting to get them in the 2:30 list. Thus for ten days we were treated to the miserable sight of from ten to twenty horses each day being hustled, hooted at and lifted and whipped around that track in a vain effort to heat 2:30. I saw a dozen men that paid in $20 each time to start in one of those nonsensical, partial, so-called standard stakes. They paid and started from two to five times in such stakes, and failed at last. To farther illustrate, while out jogging alongside of a young man with a big, raw-looking colt hitched to an old sulky, the young man asked me: "How came you to ship your horses way up here? Did you know they could beat 2:30 before you shipped?" His question, but more his manner and tone of voice, made me want to laugh. I answered him that "unless I had known by my horses' previous performances that they could beat 2,30, I should not have paid the bill to ship so far. But," said I, "why do you ask me such a question?" "Why," said he, "when I shipped this colt down here I expected to beat the best record of my State for this aged colt. This colt, said he, could trot our poor half mile track in 2:40, and as I always heard that a mile track was five or six seconds faster than a half mile, and about this track being five seconds faster than any other mile track, so I thought I would be able to beat 2:30 sure. But, darn it, the colt has not beat 2:40 since I have been here, and I don't know whether it is the colt or the track that is to blame." I could not help but laugh, but the poor fellow did not seem to relish the joke or see where the laugh came in, as it cost him a hundred dollars for the trip

To your correspondents that have rushed into print with the opinion that the track was five seconds faster than the regulation track, I will say just ship one of your 2;35 horses there, stay and pay the bills on him until you have beaten 2:30 then you will know more about it. I shipped five horses from Cleveland, where I had worked and trotted them for three weeks. Three of them the public has no interest in, as I did not start them in public, but I will state as a fact that the average speed of the three in trials under the watch was but a second faster as a whole than they had showed me at Cleveland. The two stallions, Kaiser and Sunset Patchen, I gave records at Independence, and are, therefore, subjects of public interest. These stallions I also showed and trotted at the National Breeders' meeting at Cleveland just previous to shipping to Independence, therefore their records and showing at Cleveland are fit subjects to base my opinion upon as to the relative fastness of the two tracks. Sunset Patchen got a record of 2:26 in the fifth heat of a race at Independence, pacing every heat from wire to wire below 2:28. I drove him a mile trial in 2;24½ at Cleveland. I refer to Mr. Wm. B. Fasig, Secretary of the Cleveland track, and Mr. Miller, of Bay City, the driver of the dun gelding Wonder, each of whom timed him. So much for Sunset.

I started Kaiser in a race at Cleveland, winning the third heat in 2:33, but was beaten only by a length in 2.28½ the first heat and in the fourth heat I was well up in 2:25¼. Kaiser actually trotting from wire to wire in 2:28½. I refer to the judges of the race, and especially to Mr. Packer, Secretary of the National Breeders' Association, who came out of the stand after the race, and shaking me by the hand, remarked, "Doctor, you have a trotter sure in Kaiser and he demonstrated here to day in this race that he can beat 2:30." Therefore his race won in three straight heats in 2:29¾. 2:29 and 2:28½, was no more than I expected, and needed no kite-shaped track to help accomplish it. In fact, as he could trot the turns at Cleveland as fast as the sides I think that the shape of the track had nothing to do with his record. Allerton, the greatest four year old stallion that ever lived, trotted the third heat in a race at Terre Haute one week in 2:15½ The next week he did the same thing at Lexington in a race that was a fight to death from start to finish between him and McDoel, one of the fastest horses of the season. The next week Allerton started at his home on the kite-shaped with a runner to help, and made 2:15. The next week he tried again and at the pole, with a runner to help again, succeeded in scoring 2:14.

A few days later, under the same favorable circumstances, he made the third attempt, and the result was 2:13½. Where is the four or five-second man now? Allerton had recovered from his lameness, and was improving all the time. Yet who will claim that his 2:13½ thus made was a more meritorious performance than his hard-fought third heat with McDoel on a track that was not claimed to be as fast by one or two seconds that day as some of our best regulation tracks are? Was Jack's 2:12½ over the kite-shaped track, with the pole and a runner to help, better than his race against Palo Alto when he drove him out in 2:13? Who is there to claim that Jack trotted that day three or four or even two seconds faster than he had ever done on other tracks? Now, dear Spirit, if you really think it best to make a distinction between those tracks where records are made, you had best commence at the half-mile tracks, and as Mr. Judson H. Clark so sensibly suggests, credit a horse making a 2:35 record over a half-mile track with just as much as one making a 2:30 record over a mile track. Also, as no one will dispute the fact that Cleveland and a few other of our best regulation tracks are from one to two seconds faster than others, you will need to make a distinction also against records made on these fast tracks.

By the way, when we get fairly into this distinction business it might become so burdensome and difficult to fairly distinguish that perhaps we had better discourage all fast tracks. And to carry out the same sensible plan, discourage all improvements; go back to our 80 or 100 lb. sulkies; throw away our boots and toe weights, so as to give Flora Temple, George M. Patchen, Ben Butler and a host of our dear old departed favorites of our boyhood days a fair chance to keep up with the procession. Now, dear Spirit, I was surprised at your article and those of a few of your correspondents. I do believe the track of Independence is by the nature of the soil a second or such a matter faster than any other track on earth at present. And Williams says that he can resoil it this winter so as to make it another second faster another season Well then, I say good, do it, and all praise to you, friend Williams, for doing it. Any man who invents anything or builds anything, no matter what it is, that helps to improve the speed of the American trotter, has my thanks, and, I say, give the honor due to all such.

Yours truly, DR. J. W. DAY.

Lower Entry Fees.

That the smaller racing associations will ever be able to live and do business on a smaller entry fee than 10 per cent., is a matter of very grave doubt, says the Western Sportsman, But that the larger associations, where the gate fees and daily attendance are larger, it is fair to believe that purses can be paid without drawing so heavily on owners for entry fees. It is unreasonable to ask, or expect of a certain class of men that they they not only furnish the horses to make racing attractive, but also money with which to pay the purses. In most cases, at larger meetings, the entry fee more than pay the purses; and just how the owners of track horses, as a class, are to make any money out of the business by raising or buying colts, raising them up, paying expense of training—campaigning expenses, and then paying in more money to racing associations on entry fees than they take out in winnings, has been a very puzzling problem. At the recent business meeting of the Kentucky Horse Breeders' Meeting this matter was considered, and the justice of lower entry fees thoroughly discussed, and after due deliberation, it was found to be the sense of the meeting that the association charge only 2½ per cent. forfeit, and 7½ per cent. to start. This is a commendable move, and one that large associations generally should be quick to follow. Any and every racing association is entitled to running expenses, and a fair business profit above that; but are not entitled to an enormous profit off of a business to which they stand as foster parents. So far as the public is concerned, its relations to racing are the same as to any other form of entertainment or amusement, and it should "foot the bills." An entry fee operates as a "tariff" on owners, and we think it should be reduced to the minimum. In this instance, at least, we are for "tariff reform."

$10,000 For A Foal From Sunol.

ROBERT BONNER, ESQ:

Dear Sir—Allerton has proven himself the greatest race colt yet produced. I am very anxious to give him the best possible opportunity in the stud, which prompts me in making you the following proposition: I will give you $10,000 for the use of your mare Sunol to raise one colt by Allerton, It is the opinion of the writer that she could be bred in the spring and trot faster next fall than she would were she not bred. An early reply will greatly oblige, yours truly,

C. W. WILLIAMS.

INDEPENDENCE, Iowa, Dec. 4, 1890.

The reply to the enterprising man on the plains is as follows:

MR C. W. WILLIAMS:

Dear Sir—I admire your pluck. Ten thousand dollars for the use of a mare to raise one colt is an exceedingly liberal offer; in fact, as far as I know, an unprecedented offer; but it is my intention to give Sunol an opportunity not only next year, but the year following, to lower her record; and to raise a colt from her would necessarily throw her out of training for part of both seasons. As she is only four years and seven months old, and has already wiped out all the records made by horses and mares of all ages, except the 2:08¾ of Maud S. and the 2:10 of Jay-Eye-See, it seems to me it would be a pity to handicap her at this early period of her career by raising a colt from her. Still, I appreciate your very handsome offer, coming as it does from the man who raised Axtell, the fastest three year old the world has ever seen, Sunol alone excepted. Yours truly,

NEW YORK, Dec. 8. ROBERT BONNER.

Electioneer's 2:30 List.

Electioneer was a dark bay horse, hind feet white; 15 2½ hands high; foaled May 21, 1868. Bred by Chas Backman, Stony Ford, New York. Sired by Rysdyk's Hambletonian 10, sire of Dexter., 2:17¼, Nettie 2:18. Orange Girl 2:20, and 37 more from 2:20½ to 2:20. First dam, the famous Green Mountain Maid (dam of Elaine 2:20, Prospero 2:20, Elista 2:20¾, Dame Trot 2:22. Mansfield 2:26, Storm 2:26¾. Antonia 2:28¾, Miranda 2:31), by Sayre's Harry Clay 45, record 2:29, sire of dams of St. Julien 2:11¼, Bodine 2:19¼, and 20 more from 2:20 to 2:30; second dam Shanghai Mary, a fast trotting mare of unknown blood.

Electioneer was the sire of

Sunol	4 y o 2:10¼; 3 y o 2:10¼; 2 y o 2:18

Stella	2:30

Athletics—Continued.

The roads are now in splendid order for cross country running, and some of the clubs should remember the fact. The weather, too, is all that could be desired, and some runs should be gotten up before the rain begins to fall.

The membership of the Olympio Club is increasing very rapidly, thanks to the exertions of President W. Greer Harrison and his indefatigable fellow officers, who lost no time in preparing a splendid programme of amusements for the winter months.

To-morrow at 2 P. M. there will be a very important meeting of the Alpine Amateur Athletic Club at the club rooms, Central Park, corner of Eighth and Market streets. All members are requested to attend.

Apropos of the Alpine Club we understand that a change is about to be made in the management of the club affairs. The annual meeting and election of officers which was to have taken place this evening, has been postponed until next Saturday night at 8 o'clock. After the meeting is over the members will hold a high jinks. A good many of the members are in favor of the club withdrawing from the Pacific Coast Amateur Athletic Association for the reason that they have no place to train properly for the championship games, and it would be useless for them to attempt to compete untrained. The Alpine Club have some very good athletes amongst its members, but they are always placed at a disadvantage on field-days, because they have not had an opportunity to prepare themselves for the competitions beforehand. The club is thinking of holding a field day in conjunction with the Scottish Thistle club some Sunday in January. The games would consist of weight and hammer throwing, running, jumping, tossing the caber, tug of war and a grand foot ball contest between the Thistle and Alpine clubs. The The sports would be held at Central Park. Should the club decide not to withdraw from the P. C. A. A. A., this meeting would not be held because by competing against the Thistle club the Alpine members would become professionals. Without the aid of the Alpine club, the in-door championship meeting which will be held in the Mechanics' Pavillion in April and the out-door championship meeting which will be held on Decoration Day, will not prove as exciting as if the Alpine athletes were entered for the contests.

ATHLETIC, GYMNASTIC, FENCING AND SPARING GOODS. Only house that can furnish latest improvements. Send 4cts. stamp for catalogue to manufacturer, J. R. Judd, 101-105 W. 36 St., New York City.

FOR SALE.

The Hambletonian Stallion

Hancock.

He is a handsome bay, 16 hands high, weight about 1100 lbs., 10 years old, in excellent condition and perfectly sound. Can show a mile better than 2:40 without work, and is a first-class stock horse. He is by Barney's Hambletonian, a son of Whipple's Hambletonian, dam by Williamson's Belmont. For terms and further particulars, address P. O. Box 2108, San Francisco, or apply at this office.

THE FARM.

The Proper Shelter For Sheep.

Shelter from fall, winter and spring storms is of the utmost importance, says George McKerron in Breeder's Gazette. The flock during these portions of the year is carrying quite heavy coats which when once soaked with water take a long time to dry out, during which time the animal must suffer much discomfort. If you doubt this, step out into one of these storms, get a good wetting and remain out until dry. Strong, cold winds of these seasons are also very uncomfortable for the flock as well as for their owner. To avoid the losses coming from exposure to such storms, substantial, plain shelters will pay large interest on the money invested in them. They may be built of poles and straw, boards, stone or brick, but of whatever material there are a few points the flock master must keep in view in their construction. They must be on sufficiently high ground so that the flock will be always dry under foot, and so roofed as to insure dryness on the back; ventilated so as to be free from all foul air and drafts, with plenty of light and never too warm. There is not much fear of cold injuring the flock if they can be kept dry and protected from wind. A frame structure is probably the best and cheapest in most localities.

We have found a stone basement, eight to ten feet high, built above ground with a number of windows and wide doors that can be kept open in pleasant weather, to be very good, especially when our lambs are being dropped in early spring, before the cold weather is past. The great danger from the stone basement is in keeping the flock too warm, which is more liable to injure them than cold. Overcrowding in the shed should be avoided. We have found that a flock of fifty Oxford Down ewes are quite crowded in a shed containing 500 square feet, while fifty Shropshires ewes appear fairly comfortable, and fifty Southdowns are quite well accommodated there, and I have no doubt that the same space would hold sixty Merinos of good size or possibly more; so that in constructing shelters and dividing them into compartments, care should be taken to have them adapted to both the number of sheep to be housed and to their size. While we have had the straw and pole shed, the common board shed and the stone basement under the bay barn, we have not yet got our ideal of a sheep barn, and would be pleased if some of the readers of this would give us some practical information on the subject.

Breeding of Horses on the Farm.

There is no question in my mind that a farmer can raise his horses cheaper than he can buy them, says W. F. Brown in Practical Farmer, and also that he can have better horses home grown than he is sure of getting when he buys. The conscience of the average horse trader is quite elastic and he frequently forgets to mention defects or vices, which, if known would prevent your buying. Besides, in buying a horse of whose ancestry you know nothing, you may get one with a tendency to blindness or other diseases that will render it of little value after a few years of use Having settled that we will raise our horses, the next thing is to choose the brood mare or mares, and the sire. The mare should be sound, free from blemishes or vices, and of good disposition. Avoid a dish-faced animal, and choose one broad and full between the eyes and with good bone. I would begin breeding young and keep her at it every year. Large young mares may be bred at two years old to come in at three, and while this may retard their growth a little, it will make better suckers and breeders of them. There is a great loss of colts every year from neglecting to have the mare in a suitable place at foaling time.

I am quite in favor of fall colts, as the mares have less work to do in winter and a colt will develop better to be weaned in the spring and have the run of good pasture, than if weaned in the fall with six months of dry feed before it. I always halter break my colts at a few days old. The first time you drive the mare leave the colt tied in a safe place with a good head halter, and practice it a little every day, and before it is a month old you can have it broken so it will lead at its mother's side. A colt well halter broken at this age can always be handled with little trouble and will usually go to work as though he knew all about it.

Teach the colt to eat as young as possible, and begin feeding it on oats and bran, long before it is weaned, but do not give it any corn. I have seen colts made to look fat and glossy by being stuffed with corn, but it is the worst possible food during the period of growth, when the colt is making bone and muscle, and at least until your colt is two years old its grain food should be bran, oats and oily meal. I prefer bright corn fodder to hay for a part of its winter diet, and blue grass pasture to any other. Of one thing I am certain, that on this kind of feed you cannot push your colts too fast, and you should feed so as to keep them always thrifty and growing. I would always keep colts in a warm stable at night in winter, and on cold stormy days, but would keep them loose in box stalls, and on earth floor; and would let them out for exercise every pleasant day all winter.

I believe in accustoming colts to the harness and putting them at light work early, and would drive them at two years old if well developed, otherwise at three; while they ought not to be strained, they can be used to relieve the work horses, and can do all the light work of the farm. Many farmers feed their horses wastefully both with hay and grain when they are idle in winter. When horses are doing heavy work regularly, they should have an abundance of feed, but when idle for weeks or months, the grain rations should be reduced more than one-half. I prefer ground food at least once a day in winter, and mix equal parts of finely ground cob-meal and bran, and about four quarts of old process oil-meal to each bushel. Three quarts of this a day and one quart of shelled corn or two quarts of oats will keep an idle horse in fine condition through the winter, if it is fed with bright hay or corn fodder it will eat clean. If hay is scarce or high in price, horses can be well wintered with bright straw for their rough feed, but the grain ration should be increased. It is without doubt true economy to cut the hay or straw, and grind all the grain, and feed as chop. This not only makes the food more palatable, but also more digestible; and careful experiments by express and omnibus companies, where large numbers of horses must be fed, and all the food bought, has shown that a large saving of money is made by this plan. A horse requires bulky food, and this bulk may be of bright straw as well as high priced hay, if the straw is supplemented with some rich food. The difference in the nutritive value of bright straw and good hay is less than most farmers are aware of. Taking corn as the standard and calling it one hundred, hay is put down at fifty-nine and straw at forty-seven, and the addition of a few pounds of mixed grain ration to the straw will make it as good or better than the hay. Rye straw cut early and threshed with a flail is very convenient to run through the cutter, and there is no straw softer or cleaner, and it will pay farmers to grow rye for this purpose. In my judgment a horse can be kept in good condition through the winter on much less food than a steer of the same weight.

Look to the Colts.

Heavy rains in the fall will do no end of injury to the colts if left unprotected in the pastures. The old theory that roughing it made the colt hardy has long since been exploded. Careful breeders take their young stock from the pastures at the commencement of the fall rains and put them where they find shelter. If the pasture is provided with a shed to the south under which the colts may stand out of the wind and rain, they will do well left out as long as the feed lasts. But to leave them out in such chilly rains as that of late is a serious mistake. They may not take cold, but are liable to, and lung fever is not an infrequent result of too much exposure. A colt will not take on flesh or increase in size while shivering in the rain. The aim of every breeder should be to keep his colts growing every day until they are fully matured. Fat is not desirable, but good solid flesh is. A shed or stable and plenty of hay and oats are necessary to keep the youngster growing. Don't neglect them just when they need care the most.—Farm and Home.

The Breeding of Swine.

The breeding of swine, like the breeding of other domestic animals, has become a science, and the profits realized from the business are governed largely by the difference in methods of keeping and intelligence or skill of the breeder.

The first element of success is a love for the business, says Mr. Stephens in the Western Agriculturist. A natural adaptation, coupled with energy and ability, insures success in any calling. Owing to the great diversity of conditions met with in embarking in the business, it is impossible to give in limited space definite teachings exactly suited to each case.

At the very outset—the selection of stock—there is a wide range for difference in choice. But the swine breeder is most likely to succeed best with the breed which he fancies most, be it white or black, large or small. As a general rule we would recommend the large breeds where the farm produces corn and clover in abundance. In disposition they are very quiet and take on fat rapidly, and they can be held and fed longer with profit when prices are not satisfactory. But when the food is made up from dairy and house slop, fruit and vegetables, along with a small corn ration, small fine boned breeds give best satisfaction, and they are not so liable to contract infectious diseases.

Before purchasing foundation stock the breeder should decide whether his aim will be to produce breeding stock, having the ancestral lines, the typical form, color, markings and qualities of his favorite breed to a degree of excellence above the average, or simply a pork-making machine that will do the most in the least time and at the least cost and risk Professional breeding may be easily over-done and yield unprofitable returns, but the farmer who economically converts his various farm products into pork, and hence into ready cash is most usually conducting a safe and very profitable business.

The fancy breeder should secure only the best representatives of the most popular families and leading strains when founding a herd for the production of pure bred stock. And these the beginner should buy only from thoroughly reliable and experienced breeders, and leave to them the selection and mating of animals. A mistake in starting has a tendency to dampen the ardor of the novice, if he does not become completely disgusted with the business.

The farmer whose aim is to produce pork for the market is not so particular about purity of stock as he is for individual merit—he is no stickler for pedigree, but he is for bone and muscle. Whatever may be the aim of the breeder, he should select breeding stock with strong constitution, powerful digestion and quiet temperament. A strong constitution helps the pig to battle with disease; good digestion enables it to assimilate food and lay on flesh, while a quiet temperament renders them easily handled and prevents a needless loss of flesh, from roaming and ranging.

Good breeding is very essential to success in keeping hogs. If the farmer holds on to his grades in preference to pure bred stock, we would insist that his breeding be in the line of gradual improvement and grading up. This brings us to the selection of

THE BOAR.

All breeders who desire to improve their pig stock or keep up their herd to a high state of excellence, must be careful in the selection of a sire. If we are to improve our stock we must be careful to hold all the advances we make. The advantage of a pure-bred hog over an ill-bred one lies in his ability to reproduce animals of the characteristics of form, color and quality of themselves. Their young will look like them, grow like them, and fatten like them.

Habits of the Honey Bee.

Now, only think of it! what a mass of bees will be in each colony when the first young queen bee is hatched! There will soon issue a very strong swarm. When this swarm is hanging on a tree, or when I have it in the swarm-catcher lying in the shade of a bush or tree, then I go to the hive it came from, and pull out every queen cell. Toward evening I then return the swarm. Such a colony will not swarm afterward, although it will have probably more than one young queen. A few days after there will be only one queen in the hive. As soon as this is the case, such a colony will work to the utmost capability, if there is honey in the blossoms. As long as I have built up such colonies, I have never had a lack of honey, so that, in the poorest season I never had to feed such colonies

From the end of May till the 13th of September we had a hard time for our bees. We have had rain, and nothing but rain. Only a few hours in a week did we have fine sunny weather, and that was the only chance for our bees to do anything. In the worst time we had I did not have a swarm. The most of our German bee-keepers were not so lucky as I, as they had more rain, hailstorms and cold days, or their bees had no pasturage if the weather was favorable. My bees did very well in the month of April; some excellent days in June, July and August, and so I secured a good honey crop from these colonies I have above described, I worked or extracted honey, as we have in Germany no market for comb honey. Rape, fruit growers, poplars, goose-berries, acacia linden, and buckwheat were the honey sources.

Breeding for Lean Meat.

It is well known that in animals of the same parentage—for example, pigs of the same litter—there are marked differences in growth and development, says a correspondent in Breeder's Gazette. Some fatten readily at an early age, while others continue to grow and will fatten well only when much older than their fellows. The former can hardly be depended on to yield the lean meat we desire. At least we would hardly expect that they should. Theoretically the more growthy, active, muscular pigs should be chosen. If it is found that these, instead of the quiet, fat-accumulating pigs, are the best suited to our purpose, should not special care be taken to select well-muscled pigs for breeding purposes?

But some may ask: "How are we to know in the growing pig which is fat and which is muscle?" This is the lesson to be learned. Here is opportunity for study and experiment by every farmer and feeder who wishes to produce a superior article for a special market. As a rule the smoothest pigs with the best rounded forms are chosen for breeders. They are supposed to be the best feeders, and doubtless they will make the most weight of fat pork in a given time from a given amount of feed; but fat pork is not what we are seeking for now. It does not follow, however, that the lean, lank, restless pigs are necessarily the ones to be chosen, either to feed or to breed from, when a greater proportion of lean meat is desired. There may be no profit in feeding or handling such for any purpose, and besides it often happens that they change the habit after awhile, and in the end are the greatest fat-pork producers in the lot. A lean habit in early pig hood may come from ill-feeding or from ill-health.

To know a pig all through as he stands before us, and be able to determine with reasonable certainty from outward appearance and touch the tendency of his growth, whether to muscle, and therefore lean or marbled meat, or to excessive fat, is an accomplishment well worth acquiring. I believe the most successful breeders of the near future will be able to do this.

Food for Breeding Jerseys.

A correspondent in the Cultivator and Country Gentleman, in presenting the subject of the best food for breeding Jerseys is by feeding corn fodder and hay. To do this properly he suggests:

The best process of doing this is to spread the cut corn fodder and hay into the mixing vat, and then spread the malt sprouts over this evenly and mix them altogether dry. Then wet this with three gallons of water forking it altogether. Then mix the corn meal and bran together, spread this evenly over it and fork it altogether. This represents the feed of one cow for a day. But practically the mixing vat will be large enough for the whole herd, and each cow will have this amount of corn fodder and hay put into the vat, and five pounds of malt sprouts for each cow in the whole herd mixed with it, then the corn meal and bran for each cow as before stated. This will be ready to feed in about an hour after mixing, and if the mixing is done in the afternoon before the evening feed, half will be given for the evening feed and the best in the morning. So the mixing will be done but once per day. The feeder should weigh all these articles of food and find how much bulk is required for each and then he can measure it accordingly.

There is nothing deleterious about this ration to cows in breeding. But when the cows are dry the corn meal should be omitted and four pounds malt sprouts and three pounds of bran with the hay will make a good ration for the dry cows. The rule is that all heating food should be avoided when breeding cows are dry.

Asparagus Beds.

It is probably safe to say that in the gardens of at least half of our readers there are no asparagus beds. This omission should be remedied before another season passes. One hundred roots can be purchased for less than a dollar, and that number will make a bed large enough for the average family. No one feature of the garden will be productive of more comfort to all who eat its product, and it will be especially welcome to the housewife who has to look after the daily bill of fare. Then, when once established, it requires less labor than any other part of the garden. If you are without one, do not delay—set one out next spring.—Orange County Farmer.

Referring to color of horses, the London Farmer says: The Americans are only teaching our breeders an old lesson. It is a pity that gray draft horses should have gone so much out of fashion in Scotland. Those that whitened with age were, as a rule, full of tear and wear. Perhaps they showed their years rather too honestly for a generation addicted to doctoring, and they certainly looked dirty after a day's work; but it surely was a loss to throw out a good sort. Few breeders, however, can afford to despise "the spirit of the age," and the Americans have been an immense help to our breeders of pedigree stock during these many years in which prices for corn have ruled low. Indeed, it is almost a truism to say that American dollars have kept numbers of British farmers on their feet during the bitter years when there has been such a difficulty in adjusting the claims of landlords (who have come through years of easy letting and prosperity) and the tenants (who found themselves going "deeper and deeper still" into a trough of low prices for ground produce) with rather old-fashioned rents to pay.

In referring to the freak of an occasional black sheep in a flock, the North British Agriculturist says: A large Australian flockmaster has entered on an experiment with the view of testing whether it is possible to breed a flock of black sheep. He intends to put only black rams to black ewes, and has removed all his black sheep to a range by themselves. In reference to this experiment, an exchange says that these black sheep cannot truthfully be called freaks of nature, and that there is something mysterious about them is proved by the fact that even if a black ram be used in a flock of white ewes, more than nine-tenths of the offspring will be white. Cases often occur where both sire and dam are black and the lambs white. As something does not come from nothing, black blood must be diffused throughout most flocks. Where wool is to be dyed a deep color, it is claimed that the "basic pigment" of black wool being already provided, it absorbs less dye and makes more enduring color. However this may be, there is a serious objection to black sheep, because their coats absorb more rays of the sun than white, the heat thus affecting them more readily and more seriously.

Exhibition Games.

PROFESSIONAL AND AMATEUR.

Played at Home and on Interior Diamonds.

Harris' Picked Nine from the Frisco and Oakland teams, strongly augmented by catcher Bowman of the Sacramentos, administered another defeat to Fogarty's "All Star" California players last Sunday at the Haight Street grounds. It was a decidedly pretty, interesting and closely contested exhibition all through, and the well satisfied audience of some two thousand people imagined they were witnessing a regular championship game instead of a mere exhibition. Roscoe Conghlin appeared in the box for the Picked team, and his work was excellent. The 'Stars" couldn't bunch at all off his peculiar delivery, while his work at critical stages was superb. His good work was ably supplemented by his back stop and the remainder of the team. Phil Knell pitched for the celebrities and kept the hits secured off him well distributed except in the sixth and tenth innings. His support was good and bad in patches. Smalley and Van Haltren showed up very poorly in their positions, each slipping up on several chances. The best work of the game was done aronnd the middle bag, Cantillion, Pete Sweeney and McDonald making some phenomenal plays. Two splendid double plays with McDonald at the difficult and brilliant end were prominent features. Donohue umpired, giving splendid satisfaction, and made a very graceful little presentation speech, pinning the diamond "popular vote" medal on the breast of Rube Levy. The All Californias tied the score in the ninth, making two runs, bnt were unable to do anything in the tenth, retiring in one, two, three order. The Picked Nine, however, batted out their victory in their half. Dooley led off with a single, went to second on Bowman's hit of the same quality, third on Ebright's sacrifice, and came home with the winning run on Levy's cracking single to left. The score:

Umpire—John Donohue. Official scorer—Stapleton.

SAN DIEGO vs. LOS ANGELES.

SATURDAY, DEC. 13TH, 1890, AT SAN DIEGO.

The Southern California winter series opened last Saturday at San Diego in a blaze of glory. The initial game was between the San Diegos and Los Angeles and was easily won by Stapleton's men. An immense audience numbering many of the elite of the city were attracted and were well satisfied with the excellent exhibition. Young was in the box for the Los Angeles team and was a "berry" for the San Diegans who banged him aronnd for thirteen safeties, including several long shots secured by Reitz, Goodenough, Cobb and Darby. Darby, late of Peoria, pitched for San Diego and was fairly steady and very effective, but three safe hits being made off him. Dungan caught him in capital style, and the team back of him supplemented their heavy hitting by putting up a strong fielding game. Catcher Graves was injured by a foul ball in the seventh inning, causing his retirement. Lohman assumed the vacant position, Brown was substitnted at short and Ross, an amateur, was pressed into service for the remainder of the game. Sheridan's umpiring was highly satisfactory. The score:

San Diego.	AB	R	BH	SB	PO	A	E	Los Angeles.	AB	R	BH	SB	PO	A	E
Goodenough, c f	5	1	3	1	0	0	0	Holliday, c f	4	1	0	0	2	0	0

SAN DIEGO vs. LOS ANGELES.

SUNDAY, DEC. 14TH, 1890, AT SAN DIEGO.

An immense crowd numbering almost two thousand people turned out to see the second game of the series. Cobb and Dungan formed the San Diegos battery, and Carsey and Lohman were in the points for the Los Angeles team. Cobb was in fine fettle, and pitched a magnificent game, bnt Carsey was not so effective. Dungan displayed a wonderful familiarity with his ex colleague's curves, making a single, double and triple. Both teams put up a pretty fielding game. The San Diegans assumed the lead from the start, augmenting it by five runs in the seventh, and winning hands down. Sheridan's decisions were most favorably commended by players and spectators alike. The score:

San Diego.	AB	R	BH	PO	A	E	Los Angeles.	AB	R	BH	PO	A	E
Goodenough, c f	5	1	1	4	1	0	Holliday, c f	4	1	1	0	0	0
Dungan, c	5	2	3	7	0	0	Britton, 3b	3	1	0	3	0	0
Stapleton, 1b	3	1	0	9	0	1	Fogarty, 2b	5	0	1	3	2	0

SENATORIAL SAYINGS.

Mart Devine Expresses His Views on the Sacramento Situation and Also Poetically Alludes to the Magnates.

Special Correspondence.

SACRAMENTO, Dec. 18, 1890.

EDITOR BREEDER AND SPORTSMAN:—Though the interest in baseball may have simmered down considerably since the closing of the season, yet any one who frequents the places where the cranks are wont to gather, would think that we were still in the middle of an exciting pennant race. There they will sit arguing and contending about the respective abilities and playing strength of last season's teams, and so heated are the arguments, that it is a wonder some one is not hurt. But most all baseball fans believe that "discretion is the better part of valor (O'Neill would have been better off if he had thonght so before his encounter with Carsey), and a quarrel is therefore averted. The sole topic of conversation at present is the squabble between the managers of the League. It has been suggested that the managers and their numerous petty troubles would be a good subject to build a comic opera on, and I submit the following effusion after the Gilbertian style:

FIRST BASS—John J. Mone, the Honorable Little, But Oh! My:

I am ruler of all the magnates of baseball,
With an extended sovereignity;
And with high and ruling hand, I issue each command,
And low they bow to my divinity.

REFRAIN.

So, ho! to every foe
Defiance now I fling;
So, ho! tell every foe
I am the baseball king.

SECOND BASS—Manager Michael Angelino Finn:

To you, my gracious lord, I bow
In humble deference;
To begin the season coming now,
Declaring my obedience;
No secrets of the combine, I divulge,
But in joyous tones, I sing
The song that always cheers my heart,
Long life to our dear king!

THIRD BASS—Manager Tom Enright:

A manager bold am I,
And many hard battles I've fought;
And I know that a heaving sigh
Won't accomplish the object sought;
But the ruler who contends
With remarkable ingenuity,
To make the meeting of the ends,
Must let loose his tyranny.
He will find it better by far to sail
To the frozen Arctic pole,
And, in Esquimax style, to live awhile,
And then crawl into his hole.
No king I own, the power's my own,
No deadly foe I dread;
Though combines form, I fear not the storm.
And will never bow my head.

There has been some talk of late about Sacramento not being represented in the League next season. All this is buncombe, for it is a settled fact that the Capitol City will be in the League the coming season, and from what I can hear of the make-up of the team, they intend to capture the silken banner and have its glossy folds waving over the home of the Senators. I hope for the winning of the pennant, for it will be one instance at least in the history of baseball that a team from Sacramento will have the proud privilege of being called "champions." Mark my words, Sacramento will be more than in it the coming season, all reports to the contrary, notwithstanding. M. D.

Notes.

Zouave Hardie will probably catch to-day or to-morrow.

Pitcher Lookabaugh was married the day after he arrived at his home in Indiana.

Manager Grace, of the Santa Rosas, is quite a familiar figure around the Oberon now.

Jack Sheridan is now in Los Angeles umpiring the games of the Southern California League.

Last Sunday at Central Park the Gall and Dunnes defeated the Yosemities by a score of 15 to 10.

Eddie Howell has pitched nine consecutive winning games for Fresno. Quite a brilliant record for the little 'un.

In last Sunday's game Bowman was six times to the bat, making three safe hits and striking out every other time.

Campbell, Pope and Belcher are the heavy hitters of the E & O E team. Hittell is their best rungetter, being a very successful bunter and rapid daring base runner.

"Down went the Captain" is the song the Carsey partisans sang after the club house *affaire d'honneur* between the beliggerent captain, Tip O'Neill, and the plucky little pitcher.

Several players of the Frisco team have trades towhich they will return for the winter months. Speer is an iron moulder, Shea a sign painter, Stevens a carpenter, and Levy a shoe cutter.

Tom Brown and Ed Morris are the only California players who did not return home this winter. The great out fielder and base runner is now employed in a billiard room in Boston.

The Los Angeles team wear a maroon uniform with black trimmings, and the San Diegos are attired in a pearl gray, with blue trimmings.

When, oh when, will the averages be computed. Their are several players anxiously awaiting the official publication of their efforts, and eleven Roederer gold medals depend on the result.

On the steamship Mariposa due to arrive to-day, Hoog's California Tourists are expected from their visit to Honolnlu. The same ship also brings back the sable heavy weight, Peter Jackson.

Ebright's column of last Sunday's game presents an unbroken row of ciphers, something very unusual in Buck's score. But in the summary he is credited with three sacrifices and they were all telling ones.

Catcher Bill Bowman, who is spending a few weeks in this city, has received a very liberal offer from a Western Association team, bnt Bill likes California and will remain here for a slight advance on his last season's salary.

Besides Pitchers McGlade and Crosby, Frank Loughran, of the Pioneers, has signified his intention of returning to the diamond field next season. Loughran is a splendid twirler with plenty of speed, and controls some very deceptive curves, including a raise and a drop ball.

The local cranks are anxious to see Billy Nash, Bostons great third baseman play a game at that corner before he leaves for the East. This the obliging Billy has consented to do and before the series between the picked nine and the All Californias is over the patrons will in all likelihood see a high class exhibition of third base work.

The Santa Rosas and Vallejos didn't go to Fresno on account of the managers being unable to arrive at satisfactory terms. Fresno, so it is reported, wanted "the earth" and would allow nothing more than expenses to visiting teams and the pennant winners of the amateur league as well as the Marines couldn't see it that way. As a consequence, no games at Fresno for the past two Sundays.

Harris' "picked nine" is composed of more players than any team carried through the season. The following are the players Harris had on his staff for last Sunday's game, some of whom felt sorely disappointed at not having any opportunity to play. Pitcher, Roscoe Conghlin; catchers, Bill Bowman, George Speer; infielders, Charley Dooley, Jim McDonald, Joe Cantillion, Bill Everett, and Buck Ebright; outfielders, Fred Roberts, Rube Levy, Danny Sweeney and Bill Stevens.

The San Diego team is composed of the following players, Cobb and Dungan of the Oaklands, Stapleton, Reitz and Goodenough of the Sacramentos, Darby of Peoria, Brittan and Menefee of Tacoma and Sylvester of last seasons Sacramentos. The Los Angeles team has Carsey, Lohman and Charley O'Neill from the Oaklands, Isaacson of the Friscos, Fogarty, Holliday and Young of the Stocktons, Goldie of the Peoria and Graves the old St. Louis catcher.

Its hard telling what players will constitute the Frisco team next season, as Manager Harris is very conservative, and divulges little. But a team after this style would be a "hummer," and possibly many of those herein mentioned will be seen in a Frisco uniform next season. Pitchers, Mike Kilroy, Pete Meegan, Billy Incell; catcher, Fred Carroll; first base, Tom Power; second Pete Sweeney; third Buck Ebright or Jack Wilson; short stop, Jim McDonald; outfielders, Rube Levy, Fred Roberts and Geo. Hanley.

The managers need scarcely look to the East for twirling talent for next season, for there will be a large supply of pitchers right at home. Incell, Meegan, Loughran, Crosby and McGlade have all stated that they will return to the box next season, and the amateurs, Howell and Baltz may also be seen professionally. Distributed between four clubs, this septet, if given engagements here, together with many of those of the past season whose services will be much in demand, would leave but little room for new Eastern pitchers.

The indications are that base ball will enjoy a genuine boom next season. Should the California League be limited to four teams, which is by no means a representative State league, another strong organization is very likely to spring into existence, and with the proposed circuit, good management and a salary limit fixed at something less than the four figures would be a paying investment. The matter is now being agitated by substantial business men, and a Central and Southern California League representing Stockton, Fresno, Los Angeles and San Diego, is one of the base ball probabilities of 1891.

The Western Association magnates have a scheme which they will spring as soon as the National League and American Association have selected their cities, and the Players' League is officially declared dead. Henry L. Hatch, owner of the Minneapolis team says: "The Western Association will be the third great league of the country. It will be made up of Detroit, Toledo, Indianapolis, Milwaukee, St. Paul, Minneapolis, Kansas City and Omaha. Five of these cities are in the present Western Association, but they can get out of it by resigning and forming a new league." It is apparent from these remarks that Denver, Lincoln and Sionx City are to be unceremoniously frozen out of the Western Association and larger Eastern cities substituted.

I saw a paragraph in a New York paper last week, says Henry Chadwick, the "father of base ball", referring to foot ball as a coming rival to our National game. The idea to me seems simply absurd. The great attractive feature of all field sports to the educated class of the votaries of out door sports is strategetic skill in the playing of each individual game. The rough features of each sport are attractive only to those of low and vitiated tastes, hence the charm which the brutal characteristics of the so called boxing matches of the period, and the slugging and wrestling features of the foot ball arena have for the class of spectators whose low animal instincts so largely influence their taste for sports. Our national game of base ball, while calling for manly nerve, courage and endurance, to a degree exceeding that of any other field sport in vogue, opens the door wide to a field of employment for skillful and strategic play of the most attractive character, while at the same time not a single brutal feature is allowed to characterize the play of a team even in the most exciting phase of a championship contest. The same praise, too, can be awarded to England's national game of cricket. But with foot ball, and even with lacrosse to a more limited extent, the rough and brutal features too frequently prevail, as the experience of the past two or three years fully proves.

In Charley Sweeney's picked team is a trio of "old familiar faces" who have not been seen professionally on the local diamond for some time. They are Jack Ryan, formerly of the Greenhoods, Jim Cusick of the Greenhoods and Stocktons and Harry O'Day of this year's Minneapolis and Portland team.

There were 12485 votes cast in the balloting for the most popular player, and last Sunday Umpire Donobue announced that Rube Levy was the favorite, and entitled to the diamond medal presented by the Roederer Champagne Co. he having received 3485 votes. McDonald came next with 2344 and was followed by Danny Sweeney 1286. N. O'Neill 1186, Hanley 745. Speer 485, Coughlin 314, and Ebrigbt 306. Scattering 2640.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS.

SUMMARY.

The wheelmen are taking advantage of the good condition of the roads,and the members of the Bay City Wheelmen and Alameda Bicycle Club have been practicing regularly for some time past. The Olympic Club athletes are still keeping up practice at their new out-door grounds, and it is probable that handicap races will be held every Sunday from now until the regular season opens up again early in Spring. The oarsmen will soon begin to train for the Washington Birthday regatta.

AT THE OARS.

The weather was pleasant on Sunday, and many of the South End crews were out for practice spins.

Leander Stevenson and Harry Ferrill, both of the Ariel Rowing Club, engaged in a canoe race on Sunday last. The start was made in front of the Ariel boat house, the course being about three-quarters of a mile. Ferrill won very easily, covering the distance in 7:30. At the conclusion of the race George Creagh and George Phelan, also of the Ariels, took possession of the two two canoes and engaged in a similar contest, Phelan finishing first by about four seconds. The two winners, Ferrill and Phelan, will try conclusions for the club championship to-morrow forenoon. Stevenson will then challenge the winner to another contest.

The annual meeting and election of officers of the Pacific Rowing Association will be held on the first Monday in January. Owing to the result of the race between Peter Kemp and John McLean, the regatta committee will be obliged to make different arrangements. The chances now are that Kemp will not visit this coast, and inducements will probably be offered to some of the other world renowned oarsmen to come to San Francisco and engage in a match race on February 22nd, under the auspices of the Pacific Rowing Association.

Some members of the Pioneer Rowing Club visited Hunters Point on Sunday last.

A dozen candidates for the Yale 'Varsity crew of 1891 began training on December 3rd, and will do two hours' work every afternoon till February, when they will go to the training table and have their exercise increased. Five members of last year's crew—Brewster, Ives, Hartwell, Ferris and Simms—are included in the lot, the candidates for the three remaining seats being Klimpe, '92; Balliet, '92; Morrison, '92; Crosby, '92; Ryle, '92; Rogers, '93; and Wallis, '93.

It is almost a certainty that Alameda will be the center of aquatic sports next season. The Alameda Boating Club is at the present time very comfortably situated, and its members who are more than attentive to their practice, promise to make a big showing in the spring.

Full particulars of the McLean—Kemp match race, which resulted in favor of the former oarsman, are eagerly awaited by the lovers of aquatic sports. The race came off on Monday last over the Parramatta River course, the stakes being $1,500 a side.

The Dolphin Boating Club has elected the following officers: President, J. O. Dwyer; Vice-President, A. Shuppert, Recording Secretary, J. J. Jamison; Financial Secretary, E. Eugelberg; Treasurer, L. B. Thomas; Captain, H. R. J. Kochmeister; Trustees, W. Proll, R. P. Wieland and W. S. Russell.

THE WHEEL.

Moonlight night rides are now in order.

The roads are almost in perfect condition, and the long distance men are in their glory.

Maltby, the trick rider, will take his departure for the East in a couple of days. Those who have seen him perform at the Olympian Club Rink are very high in their praise of his ability. On last Monday night he engaged in a contest with A. W. Ridely of the Olympian Rink, the latter using skates while Maltby used his wheel. The course was one mile, eight laps. The start was made at 9:30 o'clock. The bicyclist led for the first four laps, when Ridgely forged to the front and took the lead, which he maintained to the finish. Time, 4:28¾.

The proposed club run of the Alameda Bicycle Club to San Jose which was to have come off on Sunday last was abandoned. The members, however, took a run to Castro Valley and partook of dinner at San Leandro. On the return trip they ran across a company of the Bay City Wheelmen who were returning from San Lorenzo, and the representatives of the two clubs rode home together.

About a dozen members of the Bay City Wheelmen took a trip to Willows Hotel, near San Lorenzo last Sunday morning. On the way home Mr. Story, and unattached wheelman from Alameda who was keeping company with the local riders met with a curious, but fortunately not serious accident. He was run into by a horse and buggy, and strange to say that although both wheels passed over him he escaped without a scratch. This was Mr. Story's initial effort at road riding, and there is no fear but that he will avoid the middle of the road in future. After running into the bicycle the occupant of the buggy whipped the horse and was out of sight in a very few seconds.

A few members of the Bay City Wheelmen have already procured the new uniforms recently adopted by the Club. The uniforms are very neat and present a pleasing appearance.

The club rooms of the Bay City Wheelmen on Van Ness Avenue are crowded nightly with members who take an interest in the pastimes which have been gotten up for their amusement during the long winter nights.

If arrangements are not made for a tournament on Washington's Birthday the Bay City Wheelmen will probably hold another of their successful road races at San Leandro.

The Alameda Club boys will take a run over to Hsywards for breakfast to-morrow morning. They will put up at the Haywards Hotel.

The Alameda Bicycle Club has now over thirty members.

UNIVEBSITY JOTTINGS.

Last Wednesday the Freshmen commenced practice for the coming football series.

Since Field Day the cindar path has been deserted.

In the practice foot ball game on Wednesday last Hyde and Clary espscially distinguished themselves. Practice will be kept up every day from now on.

Three medals will be awarded for each event in which there were a sufficient number of entries in the late field games. The first medals will be very neat and valuable and will be a combination of gold and silver.

Young Mays is a promising sprinter.

Hunt is the coming amateur champion shot putter.

Van Dyke will win the pole vaulting championship.

JOTTINGS FROM ALL OVER.

The Seventh Regiment of N. G. S. N. Y. held their annual games at their armory in New York on December 6th. About 4,000 spectators were present, and the many events were well contested. Following are complete summaries of the various events:

Ninty-three yards run (scratch)—Trial heats—First heat won by W P Baird, Company B; second F M Warner, Company K. Time 11 seconds. Second heat won by W H Morrow, Company F; second W D McClintock, Company H. Time 11 1-5 seconds. Third heat won by F B Swiney, Company B; second H S Bartow, Company D. Time 11 3-5 seconds. Fourth heat won by J. J. Dollard, Company C; second W R Taylor, Company B. Time 11 seconds. Fifth heat won by L Van Syckel, Company F; second T F Doyle, Jr., Company B. Time 10 2-5 seconds. Sixth heat won by W F Saportas. Company A; second W I Covell, Company F. Time 10 2 5 seconds. This equals the best armory record.

One thousand yard run (handicap)—A B George, Company H and Manhattan Athletic Club, won easily from scratch in 2 minutes 25 1-5 seconds, beating the best armory record by 1 1-5 seconds; W S French. Company E, was second and F H Hoyt, Company H third.

One mile safety bicycle race (scratch)—Won by John T. Byrne, Company H; second, T G Barber Jr., Company B; third, C O Woodhouse Jr., Company F. Time, 3min 43 4-5 seconds.

Two hundred and twenty yard run (handicap)—Trial heats—First heat, won by M Remington, M A C and Company G, scratch; second, G E Dunscomb, Company H, 8 yds; time, 25 2-5 seconds. This beats the best armory record by three-ûtths of a second. Second heat—Won by G R Martin, Company H, 11 yds; second, T F Doyle Jr , Company B, 10 yds. time, 25 2-5 secs. Third heat—Won by S. Duncan, Company H, 6 yds; second, J F Norton Jr. Company C, 4 yds; time, 25 secs. Finsl heat—Won by J T Norton Jr., Company C, 4 yds; second, S Duncan, Company H, 7 yds; third, G R Martin, Company H, 11yds; time, 25 seconds.

Half mile walk (handicap).—Won by Lloyd Collis, Company F, scratch, in three minutes, 22 2-5 seconds. This is 18 2 5 seconds better than the armory record. F A Ware, Company B, scratch, second; H W Warner, Company K, 15 seconds, third.

Sack race (scratch), 50 yards.—Won by C L Jacquelin, Company G; C S Busse, Company F, second; H S Bartow, Company D. Time, 8 seconds.

Four hundred and forty yard run (handicap).—Won by G. L. Catlin, Company F, 4 yards; second, W S French, Company E, 20 yards; third, M Remington, Company G, scratch. Time, 55 seconds.

Two hundred and twenty yard hurdle race (handicap).—Won by H H Morrell, Company F, scratch; second, J T Norton, Company C, 7 yds; third, G Dunscomb, Company H, 13 yards. Time, 28 4-5 seconds. This beats the armory record by 1 4-5 seconds.

Wheelbarrow race (handicap), two laps—Won by J. P. Thornton, Company C, 7 yards; second, T. H. Crary, Company H, scratch; third, J. S. Woodhouse, Company F, 12 yards. Time, 50 seconds.

Invitation race, one mile walk—C. L. Nicoll, M. A. C., first; W. R. Burkhardt, P. A. C., second. Time, 6 minutes 55 seconds.

One mile run (handicap)—Won by A. B. George, Company H, scratch; second, W. S. French, Company E., 65 yards. Time, 4 minutes 45 seconds. This is 8 seconds better than the armory record.

Two mile bicycle race (handicap)—Won by W. C. Barker, Company F, scratch; second, W. D. Edwards, Company F, 35 yards; third, D. N. Cole, Company D, 100 yards. Time, 6 minutes 45 4 5 seconds. This is 7 2-5 seconds better than the armory record.

Obstacle race—Won by W. R. Mills, Company H, second; G. H. Page, Company F; third, G. L. Catlin, Jr., Company F. Time, 1 minute 39 1-5 seconds.

Putting the 16-pound shot (handicap)—Won by T. A. Morgan, Company A, 1 foot with a put of 32 feet 7 inches; second, H. H. Morrell, Company F; third, D. L. Williams, Company G.

Tug-of-War (650 pounds)—Time limit 5 minutes—Company C beat Company F by 7 inches.

The Pastime Athletic Club of New York City have elected the following officers: President, John Burkhead; Vice-President, D. Ross; Treasurer, F. W. Korth; Recording Secretary, L. Frfedheim; Financial Secretary, W. P. Sheridan; Captain, James B. Hughes; Lieutenant, J. Rieff.

P B Kirwin, a member of the editorial staff of Sport, Dublin, Ireland, died on Nov. 23 after an illness of several weeks' duration. He was well known as a handicapper and general manager of athletic sports.

The Boston Athletic Association have postponed their boxing, wrestling and fencing championship meeting which was fixed for Dec. 10. The fencing competitions will take place separately on April 8th next.

H. M Walters, captain of the Casual football team died on Nov. 27th, from the effects of internal injuries received in a game with the St. Bartholomew's Hospital team at Wormwood Scrubs, Eng.

A. G. Cumnock, father of the captain of the Harvard football team, was so elated over the defest of Yale by his sons team that he has presented the captain with a check for $5,000

The Winter games of the Sixty-fifth Regiment, N. G. S. N. Y. came off at the Broadway Arsenal, Buffalo, N. Y., on Saturday evening, Dec. 6. The races took place on a ten lap track, in view of which fact it will be noticed that the cycling events were won in fast time. J. M. Nason, enveloped in a 31in. sack, ran seventy-five yards in 16s., but, as the hurdles were less than the regulation height, the performance does not form a record. Summary:

Seventy-five yards run—Harry E Benson, B L C, first, in 8 1-5s.; G A Vogt, I A C second; A B Wilson, Seventy-fourth Regiment, A A third.

Half mile walk—C J Wolf, Seventy-fourth Regiment, A A, first, in 3m 40s; T Mercer Sr, I A C, second; J W Fraser, Seventy-fourth Regiment, A A third.

Five mile bicycle race—Charles Dorntge, I A C first, in 16m 57⅗s; A T Crooks, R B C second; J J Kane, R I A C, third.

Running high jump—C F Richter, I A C, first, 5ft ½in; George Mason, Seventy fourth Regiment A A second, 4ft 11½ in; W H Stanley, I A C third, 5ft 10½in.

Ten mile bicycle race—Charles Dorntge, I A C first, in 36m 56s; A T Crooks, R B C second; J J Kane, R I A C third.

Hitch and kick—W H Stanley, I A C first 8ft 1½in; Grant W Bush E A C second, 8ft 1in; C F Richter, I A C third 8ft ½in.

Five mile run—T Mercer Jr. I A C first, in 31m 54s; E St. James, I A C second; Al Smal I A C third.

Putting the shot—M H Brunner, R B C first 36ft 8in; C F Ritcher I A C second, 36ft 5½in; T Fallon I A C third, 35ft 1in.

Sack race over hurdles 75yds.—T H O'Mara, I A C first in 18⅜s; T Mercer Jr, I A C second; P Fitzpatrick, Sixty-fifth Regiment third

RUNNERS, WALKERS, JUMPERS, ETC.

About a dozen members of the Alpine Club exercised at the Bay District track on Sunday morning last.

Charley Armbruster ran 220 yards in 26 seconds, which, considering the poor condition of the track may be considered very good time for a novice.

Captain J. D. Garrison of the Alpine Club is not enjoying good health at the present time. He has not been able to practice for some time past. Rumor has it that he intends going East before long.

Professor Eldridge, the runner, is a constant visitor at the Skating Rink, and he will compete for the skating championship when chance offers.

H. Massey and A. Choynski, both members of the Alpine Club, have made arrangements to run a series of five races for a valuable trophy. The distances will be 100, 220, 440, 880 and 1760 yards. To-morrow the mile race will be decided. The man winning three out of the five events will receive the trophy.

There was a large gathering of Olympic Club members at the out door grounds on Sunday to witness the second attempt of Martin Espinosa to lower the Pacific Coast record for 1,000 yards. On the previous Sunday Espinosa succeeded in tying the record, and in consequence much interest was taken in his second trial. He appeared at the scratch in splendid condition and he had a look of confidence on his face. His running did not belie his appearance for he succeeded in knocking two seconds off the record, covering the distance in 2:27 4-5. He was coached by S V Casady. The judges were R McArthur, J C Kortick and C A Jelleneak. James Jarvis, John Elliott and Eugene Van Court acted as time-keepers. After Espinosa's exhibition, there was a 220 yard race, handicap, with the following starters: W T Haberly, scratch; F G Redding, G H Hammersley and J S J Oths, eight yards each. Haberly won in 27¼ seconds, Redding second. R Belan won a 100 yard scratch race in 12 2-5 seconds, with J S Oths second.

S. V. Casady and W. H. Toomey, of the Olympic Club, are matched to run a series of three races, viz., one quarter, one half and one mile. Both men are training hard, and fast time will no doubt be made. The first race will probably come off in a week. The indications are that Casady will win the quarter and Toomey the mile. But the question is, which one will capture the "half?"

There will be a big difference in the results of the championship events in May next from those of last May. The University men will surely win the hammer, shot and pole vault events, while Foster, of the Olympics, will have a sure thing in the long jump and hurdle races. With careful practice, Espenosa should win the "half," while McArthur has a mortgage on the mile.

Peter McIntyre is keeping the cinder track in fine condition.

Harry C. Casidy was seen in his buggy all alone last Sunday, driving along the San Leandro road. This is something unusual for the Alpinite.

CLUB JOTTINGS.

The Tehance Athletic Club of Oakland recently issued the following circular:

OAKEAND, Cal, December 14th, 1890.

Members of Reliance Club:

The Board of Directors desires to inform the members that, in accordance with the authority vested in them by the amendment of the By-Laws adopted at the last annual meeting, they have seen fit to reduce the initiation to $5 until January 1, 1891. This step has been taken with a view to increasing the membership (as well as the revenues) of the Club—a matter quite necessary in view of a probable change of quarters some time next spring. Enclosed find blank applications, which it is sincerely hoped every member will make good use of.

A series of entertainments for the winter will be opened by a Musicale, to be give next Wednesday evening, December 17th, at the rooms of the club. Enclosed you will find cards of admission for yourself and ladies.

A committee has been appointed consisting of P. H. Remillard, J. H. Ames and S. G. S. Dunbar, to arrange for several tournaments for members of the Club. Full information concerning the same can be obtained from any member of the Committee. Yours respectfully,

R. N. FITZGERALD, President.

W. R. BERRY, Secretary.

The "Ladies' Night" exhibition, given by the members of the Olympic Club last week, was a success. The invitations, however, were rather limited, as the BREEDER AND SPORTSMAN did not receive any. We are, therefore, unable to report the exhibition in full.

The following are the officers recently elected by the Sacramento Athletic Club: President, G. H. Clark; vice-President, J. C. Drusie; Secretary, A. P. Booth; Treasurer; Ira A. Robie; Lieutenants, A. Klemsorge, C. E. Baner; Directors, George Littlefield, W. F. Purnell, Adolph Scheld and Thomas L. Enright.

The State Agricult'l Society

Occident Stake of 1893

Trotting Stake for Foals of '90.

To be Trotted at the

State Fair of 1893

Entries to close JANUARY 1st, 1891, with Edwin F. Smith, Secretary, at office in Sacramento. One hundred dollars entrance, of which $10 must accompany the nomination; $15 to be paid January 1, 1892; $25 to be paid January 1, 1893, and $50 thirty days before the race. The Occident Cup of the value of $400 to be added by the society. Mile heats three in five to harness. First colt to receive the cup and six-tenths; second colt three tenths, and third colt one-tenth of the stakes. Five to enter, three to start; otherwise the N. T. A rules to govern.

The value of this stake in 189 , exclusive of cup, was $1,535.

CHRIS. GREEN, President.

EDWIN F. SMITH, Secretary.

Road Horse for Sale

STYLISH BAY GELDING,

Eight Years Old.

Black mane and tail; weighs about 1,075 pounds; sixteen and a half hands high. Can show a 2:40 gait; good disposition. A lady can drive him. Reasonable price. Apply to

W. E. SHAW,
1621 Market St., S. F.

FOR SALE.

Bay Mare, Standard Bred

By ALBERT W, record 2:20, he by Electioneer. Five years old. Never trained, but can trot a quarter in 40 seconds. Lowest price $500, or exchange for outside city lots.

D. C. BRAID,
1222 Market St.

Pictures of Great Horses.

ALL IN COLORS.

Size of Sheet 13 1-2 by 17 3-4 Inches.

Price 20 Cents, or Six for $1 00.

The racing season is over, and now everybody wants pictures of the great horses. We have ready Elegant Pictures of the great California horses

Sunol, Stamboul, Palo Alto and Salvator,

And also the champion Nelson, Axtell, Belle Hamlin, Guy, Maud S, Jay-Eye-See, Roy Wilkes, Richball, Johnston Salvator and Tenny Race, Hanover, The Bard, Terra Cotta and Ten Broeck.

PRICE—Twenty Cents each, or Six for One Dollar, by Mail, Post Paid, on receipt of price. Address,

Under Breeder and Sportsman Office.

Third Payments Due January 1, 1891

—IN THE—

BREEDER & SPORTSMAN'S

FUTURITY STAKES.

For Mares Covered in 1889. (Trotting Foals of 1890)

To be Trotted in 1893.

Closed JANUARY 1st, 1890, with 284 Entries.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations closed, $10 August 1st, 1890; $10 JANUARY 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893, and $50 for starters, payable July 1st, 1893.

Neglect to make any payments at the time stipulated with incur forfeiture of all previous payments.

Kentucky's Blue Ribbon Fair

Read! $5,000 for $100.

THE BLUE RIBBON $5,000 FUTURITY PURSE

—FOR THE—

Produce of Mares Bred in 1890, to be Trotted at the Maysville Fair, Maysville, Ky., Third Week in August, 1893,

—ON THE FOLLOWING CONDITIONS—

Mares to be nominated, named, described and by what horse served January 1, 1891, $10 to accompany nomination. AUGUST 1, 1892, $15 due. JUNE 1, 1893, $25 due. $50 to start, evening before the race.

Description and name of the colt to be forwarded by January 1, 1892. Mares proving barren or foaling dead foals, entrance money will be returned. All claims of this kind must be made by July 1, 1891.

Race to be mile heats, best two in three. Purse divided 50, 25, 15 and 10 per cent. to winners.

Every owner of a good mare should nominate whether you expect to train the colt or not, especially if you expect to sell. Encourage the buyer to train and give him a chance to win it out. Remember, Maysville has one of the fastest and best mile tracks in the world.

JAMES W. FITZGERALD, Secretary.

MAYSVILLE, KY.

Thoroughbred Stallion

JACKSON

Will make the Season 1891 at the

SACRAMENTO RACE TRACK,

LIMITED TO TWENTY-FIVE MARES.

$50 for the Season.

Terms Cash, or Satisfactory Note at time of Service.

Commencing February 1st; closing May 10th.

PEDIGREE.

Jackson by Luke Blackburn, dam Ivy Leaf by imp Australian; second dam Bay Flower by Lexington; third dam Bay Leaf by imp Yorkshire; fourth dam imp Maria Black by Filho da Puta; fifth dam by Smolensko; sixth dam by Sir Peter, etc.

For further particulars, apply to or address,

D. F. ABEL,
Race Track, Sacramento.

The Standard Bred Stallion

CALAVERAS

Will make the Season of 1891 at

LODI.

(LIMITED TO TWENTY MARES.)

Description.

Calaveras is a handsome chestnut; foaled 1887. He is a horse of splendid conformation, stylish, high spirited, kind, level headed and remarkably intelligent, and from his fine blood lines must get game and speedy colts.

Pedigree.

Calaveras is by Hawthorne 10,935, (sire of Tempest 2:19, e oses S. 2 21¾, John C. Shelly 2:20¾, Chief Thorne (2 yrs.) 2:20) by Nutwood 600, record 2,18¾, sire of forty trotters and eight pacers in the 2:30 list.

Calaveras's first dam is Fanny by Muldoon, he by George M. Patchen, Jr. Second dam Sarah by Wine Creek. Third dam Jessie by Morgan's Black Hawk. Wine Creek was a half brother to David Hill, Sarah's half brother, Bickford, trotted at San Jose at Startle's wheel in 2 28¾. Sarah has trotted 32 miles inside of two hours on two separate occasions.

TERMS.

$30 for the season. Payable at time of service. Mares not proving with foal may be returned next season free of charge. In case the horse or mare has not changed ownership. For further particulars apply to

WM. SALES,
Mokelumne Hill, Calaveras Co.,
or to DANIEL NUNAR, Lodi.

Napa Fair Grounds

TO LEASE.

At a meeting held Saturday, Dec. 13th, 1890, the Directors of the Napa Agricultural Association decided to lease the Napa Track and Fair Grounds for the term of two years. Track to be kept in good order for training, keeping grounds in order and buildings in repair.

Proposals to be made with A. H. CONKLING, Secretary, Napa, on or before Dec. 27, 1890.

An Indian Horse-Race.

An elderly Indian of great dignity and presence of mind steps into the ring, and with graceful movement throws his long red blanket to the ground and drops on his knees before it, to receive the wagers of such as desire to make them. Men walk up and throw in silver dollars and every sort of personal property imaginable. A Winchester rifle and a large nickel-plated Colts revolver are laid on the grass near me by a cowboy and an Indian, and then each goes away. It was a wager, and I thought they might well have confidence in their stake-holder—mother earth.

Two ponies, tied head and head, were led aside and left, horse against horse. No excitment seemed to prevail. Near me a little half Mexican Comanche boy began to disrobe until he stood clad only in shirt and breech-cloth. His father addressed some whispered admonition, and then led up a roan pony, prancing with impatience, and evidently fully conscious of the work cut for him that day. With a bound up the little fellow landed on the neck of the pony only half way up, but his toes caught on the upper muscles of the pony's leg, and like a monkey he clambered up and was in his seat. The pony was as bare as a wild horse, except for a bridle, and loped away with his graceful little rider sitting like a rock. No, not like a rock, but limp and unconcerned, and as full of the motion of the horse as the horse's tail, or any other part of him.

A Kiowa, with loose hair and great coarse face, broke away from the group and galloped up the prairie until he stopped at what was to be the starting point, at the usual distance of "two arrow flights and a pitch." He was followed by half a dozen ponies at an easy lope, hearing their half naked jockeys. The Indian spectators sat around on their ponies as unmoved in countenance as oysters, being natural gamblers, and stoical as such should be, while the cowboys whispered among themselves. "That's the bay stallion there," said one man to me, as he pointed to a racer, "and he's never been beaten. It's his walk over, and I've got my gun up on him with an Injun." It was to be a flying start, and they jocked a good deal and could not seem to get off. But presently a puff of smoke came from the rifle held aloft by the Kiowa starter and his horse reared.

The report reached us, and with a scurry the five ponies came away from the scratch, followed by a cloud of dust. The quirts flew threw the air at every jump. The ponies bunched and pattered away at a nameless rate, for the quarter race pony is quick of stride. Nearer and nearer they came, the riders lying low on the horses' necks, whipping and ky-yi-yi-ing. The dust in their wake swept backward and forward, and with a rush they came over the scratch, with the roan pony ahead, and his little eyes snapping with the nervous excitement of the great event. He had beaten the invincible bay stallion, the pride of this Comanche tribe, and as he rode back to his father his face had the settled calm which nothing could penetrate, and which befitted his dignity as a young runner.—The Century.

Trotters vs. Runners.

As to the difference in profit between the breeding of race horses and trotters, it is one of those matters on which doctors will disagree. It depends largely upon the man himself, who goes into the business For instance, John M. Clay, with several mares of approved blood and never more than one stallion, used to breed six or eight horses, which he sold at large prices. Old John Harper, with a very small stud, was very successful as a breeder. Zeb Ward, on the other hand, had plenty of money, as also had Mr. Keene Richards, but both these gentlemen got broken up and Richards died in absolute destitution. The following table shows the amounts won by the principal trotters and racehorses during the present year:

TROTTERS.		RUNNERS.	
Margaret S.	$12,020	Tournament	$89,575
Dallas	6,625	Potomac	75,510
Mambrino Maid	6,305	Russett	55,722
McDoel	6,250	Sal McClelland	54,705
Walter E	6,245	Strathmeath	40,325
Pamlico	6,090	Salvator	30,670
Keno F.	6,060	Burlington	30,395
Prince Regent	5,550	Sinaloa II	26,195
Semienlon	5,318	Tenny	25,780
Leopold Rose	4,920	Reckon	23,945
Total	$65,383	Total	$455,802

It would, therefore, appear by the foregoing table that one running horse, Tournament, has won $24,192 more in a single season than the entire amount won by the ten best trotters in the United States. In 1889 the ten best trotters won $71,930 against the $392,238 won by the ten most successful runners, with Salvator at their head and the ephemeral Chaos, the horse of an hour, in the second place. This is a startling showing in behalf of breeding thoroughbreds. Some time ago we asked a young breeder who was selling out a large lot of trotters, if he calculated to go into the breeding of thoroughbreds? His answer was that he did not, as gallopers were something that he knew nothing about. The truth was that he knew as much about them as he did about trotters—or anything else.

Yet with all this showing, the prices of trotting stallions are higher and their service rates are higher than those of thoroughbreds, Axtell sold for $105,000, and his service fee is $1000. Against this, Kentucky sold for $40,000, and the highest fee ever paid for any thoroughbred stallion's services was $500 for Lexington. Nelson's fee is $750, Stamboul's $500, and there are a dozen that range from $200 to $300. Against this, among the thoroughbreds, we have Longfellow at $250, Lake Blackburn and King Alfonso each $150, Falsetto $100. St. Blaise, Rayon d'Or and Sailor Prince are kept as private stallions and serve no mares except those of their owners, and the same is true of those owned at the Rancho Del Paso. Now, according to the way trotting stallions are rated in regard to service fees, Longfellow should stand at $500 at least, Hindoo $400, and Spendthrift and Powhattan each $300.

This seems very anomalous to us, that while a second class running stallion can win as much money in purses and stakes as a first class trotter, yet the moment that both go to the stud the trotter's earnings are nearly three times as much as those of the galloper. Looking over a lot of stallion advertisements in an Eastern paper we find Kentucky Prince and William L at $500; Ambassador, Onward and Sultan each at $400; Patron, Norval, Anteeo, Phallas, Simmons and Banner Mark, each $300; Allandorf, Conductor, Wedgewood, Bermuda, Repetition, Sprague, Gold dust, and Alfred G each $200. Outside of Onondaga and Longfellow, we do not know a thoroughbred stallion unless it be Eolus, that stands for more than $100. Granting that such horses as Bermuda, Allandorf, Conductor and Repetition are worth $200 this season, Iroquois and Lake Blackburn should each be worth $200; Eolus and Longfellow each $300 and St. Blaise $500, if not reserved as a private sire.

But there is one thing to be considered in this connection which does not appear upon the surface. We allude to the classification of trotters according to time records, while among the gallopers there is no classification whatever. Some trotting stallions command big figures just because, while they have no progeny in the 2:20 list, they have a great many in the 2:30 list, and their get are noted for being steady and reliable horses in a long and stubbornly contested race. It is in the 2:25, 2:27 and 2:30 classes that the most money is won, as the "free-for-all" contests are generally on the "hippodrome" order, hence the largest fields are to be found just within the standard classes. In running, there is no such thing as classification, although handicapping is resorted to in order to bring horses together on equal terms. But even that fails, as in the recent case of Carbine, in the Melbourne Cup, where he gave from 16 to 48 pounds to every horse in the race, and then beat them all in a canter and in the fastest time on record. The anomaly to us is that trotting stallions' service fees should increase steadily, while the value of trotters for gaming purposes are as steadily declining.

THE Hollywood Trotting Stock,

Property of B. C. HOLLY, Vallejo, Cal.

——WILL BE SOLD AT——

PUBLIC AUCTION,

WEDNESDAY, January 7, 1891, commencing at 10:30 o'clock, at

Hollywood Farm,

Situated three miles from Vallejo on the Napa Road. All Trains Stop at Flosden.

Consisting of FIFTY-TWO HEAD of first-class and fashionably bred

Stallions, Brood Mares, Colts, Fillies and Horses in Training.

Send for Catalogue.

ANNOUNCEMENT.

Owing to ill health, I have fully determined to sell at auction my entire stock of trotters and thorough breds. I have been an extensive buyer, both privately and by auction, for the past four years and have endeavored to get the best. Whoever will take the trouble to glance over the catalogue of sires, represented in the sale, and then notice the producing families that support them on the dam's side will see that nearly all the remarkable getters are included.

TERMS OF CREDIT.

While the terms of the sale are cash, responsible buyers may have the privilege of credit for an agreed time, by observing the following conditions: Buyers must furnish satisfactory security, and must, prior to the opening of the sale, notify the owner and obtain his approval, specifying the drawer and endorser of the proposed note. Notes to bear six per cent., and payments to be made at the Vallejo Commercial Bank. In reference to credits, address B. C. Holly, Vallejo, Cal.

For Catalogues, now ready, address

B. C. HOLLY, Vallejo, Cal.

Or BREEDER AND SPORTSMAN, San Francisco, Cal.

ROAD TEAM FOR SALE.

A Pair of Young Blacks,

Good Size, Well Matched, Well Bred, Perfectly Sound and Gentle.

Will Trot Fast with a Little Work.

Rare chance for a gentleman to secure a first-class Road Team at a reasonable price. Can be seen at the

PARK TRAINING STABLES,

Corner Baker and Grove Streets, near entrance to Golden Gate Park.

FOR SALE.

A FOUR YEAR OLD STALLION

Oliver B.,

Full Brother to Contractor, 2:24 3-4.

By Sultan, dam Madam Harding by Overland; second dam Kate Tabor. OLIVER B. is a handsome seal brown in color; kind, gentle and level-headed. He is about 16⅜ hands high; weighs about 1,100 lbs., and is a horse of splendid conformation, bone and muscle. He is perfectly sound; without a blemish, and while he has had no track work, shows evidence of great speed.

The reason for selling is that the owner has a stallion by Stamboul. As to the value of this young stallion, the undersigned refers to Walter Maben, San Gabriel, or, L. J. Rose, Los Angeles.

For price, etc., address

OWEN BROS.,

Fresno, Cal.

FOR SALE.

The Bay Mare

Rosette,

By Wbeatley, full sister to Daisy D, now in foal to Harry Peyton, and her filly seven months old by Three Cheers, full sister to Acclaim. Price for both $2400. Or Rosette, $1,000; filly, $500.

UNDERHILL & McFAYDEN.

	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle.	4th dam by Whip.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro, and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. The roads are very good.

All stock sent from San Francisco may be brought over by Express, which leaves San Francisco on the Creek route boat. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car.

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance, ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

For Sale.

THE STANDARD STALLION

CADUCAS 10,480,

By Almont Medium 2:28¾, dam Amelia T., (by Alcona 730), full sister to Prince Warwick 2:16¾. Caducas is a handsome two-year old, thoroughly broken, and while he has not been driven for speed as yet, he shows great promise. Also

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50.

STAMBOUL 2:11.

MR. HOBART'S ELEGANT TROPHY.

The Trotting Horse Breeders Champion Stallion Cup.

For more than a year the eyes of all Californians have been centered on the two great trotting stallions, Palo Alto 2:12¼ and Stamboul 2:11, every horse breeder on the Pacific Coast being anxious to have a horse bred on the Slope carry away the stallion record; fate, however, seems to stands in the way of the accomplishment of such a desire, for in 1889 rain set in so early in the season that both of the representative stallions had to be relegated to their respective ranches, and Axtell went into winter quarters as champion of the year. This year almost the same thing has happened; Palo Alto was taken East but seemed unable to lower his record of last year and consequently an abiding faith was built up that Mr. Hobart's great horse, Stamboul would be able to lower the colors of the Eastern wonder, Nelson; how faithfully he has labored toward that end, the records of the different heats trotted by Stamboul this year shows. Starting in with a mark of 2:12¼ he has gradually lowered it until the present record of 2:11 stands opposite his name, then again did rain interfere and the son of Sultan had to be sent home with no prospect of California's leading the world in that direction. That Stamboul is a great horse, no one can deny, and he has amply demonstrated Mr. Rose's great faith in the speed producing qualities and the breeding on capabilities of The Moor blood.

Stamboul was originally trotted as a two year old and made a record for himself of 2:37; as a three year old he made a record of 2:26½, that mark being cut down in his four year old form to 2:23. In 1887 he started as a five year old, and during the season beat such good horses as Thapsin, Valentine, Harry Velox, Black Diamond, Sister, Daisy S., Lottie M., Rexford and Lot Slocum, getting for himself a further reduced record of 2:17¼.

In 1888, while still owned by Mr. Rose, Stamboul further reduced his record to 2:14¾, having won during the season what is known as the Great National Stallion Stake, in which Woodnut won the first heat in 2:17, Stamboul winning the second, third and fourth heats in 2:17, 2:17¾ and 2:17. During that same year Arab was also defeated by the stallion, Stamboul, winning in 2:15, 2.17½ and 2:16¾. On October 24th, he was sent against his record of 2:15 and trotted in 2:14¾, he going into winter quarters with that mark opposite his name. During last year he was given several trials in attempts to lower his record, the first one being on October 5th, at San Jose, but owing to a lack of work, 2:17½ was the best he could do. On the 9th of November, at the annual meeting of the Pacific Coast Trotting Horse Breeders Association, he started and cut down the figures to 2:13¾. A special record meeting held at Napa on November 16th was the occasion of the third attempt to beat Old Father Time, and again Stamboul was victorious, knocking a second and a half off his previous mark, gaining a record of 2:12½. During the year 1889, Mr. Hobart had secured possession of the horse, having purchased him from Mr. Rose, the breeder, and all the trials for that year were given him by Orrin A. Hickok. Owing to Mr. Hickok's taking a stable of horses East this season, Jno. A. Goldsmith was put in charge and during his handling of the horse, reduced his record a full second. Several attempts, or rather we should say workouts were given the stallion while the regular circuit was going on, his best efforts being retained for a great exhibition mile at the Breeders meeting. Those who were present and saw the horse reduce his time to 2:11½ will never forget the enthusiasm that was displayed by those who were in attendance; the last quarter of the mile was made in 31¾ seconds, while the entire circuit of the track was completed in 2:11¾. This feat was accomplished for the champion stallion cup of the Breeders Association to be given to the horse making the lowest record during their meeting.

Later on in the season still other trials were made against time, and finally at Stockton Mr. Goldsmith knocked off another quarter of a second, the stallion completing the mile in 2:11¼. Three days afterwards Mr. Goldsmith was seriously injured by being thrown from a sulky, and feeling assured that Stamboul had not shown what he really was capable of doing, urged on Mr. Gamble, the superintendent of the Hobart Stock Farm, to secure the services of Mr. Hickok, who, in the meantime, had returned from his trip through

the Eastern States. An additional trial was given the horse at Stockton, and there, under the pilotage of Mr. Hickok, still further reduced his record to 2:11, as will be seen from the cut, and Stamboul is now the champion stallion of the coast. Mr. Wilfred Page was appointed a committee of one for the purpose of securing a trophy or emblem representing the Pacific Coast championship of the present year, and in furtherance of the wishes of his fellow Directors, has had the well known firm of Geo. C. Shreve & Co. manufacture a very elegant silver cup, a fac simile of which is herewith presented. On the reverse side of the cup are the figures 2:11½, which was made at the Breeder's meeting, while the 2:11 which is on the base of the stem represents his Stockton record. The cup is made of what is known as oxidized silver, being heavily plated inside with gold, the trophy being a masterpiece of workmanship, and will doubtlessly be appreciated by W. S. Hobart, to whom it will be presented within a few weeks. The cup is at present on exhibition in Shreve's window on Montgomery street, where it is admired by the thousands who daily pass their place of business.

The members of the San Joaquin Valley Agricultural Association, not to be outdone, have had a committee appointed for the purpose of having made for Mr. Hobart an elegant gold medal, which will be set with diamonds, and on one side the inscription will be "Stamboul 2:11, Stockton, November 29th, 1890," and on the reverse side, "Presented to W. S. Hobart by the San Joaquin Agricultural Association." It is to be regretted that the rain prevented the further education of the great stallion's record, as there can be no question in the minds of any who have seen him lower his record this year, but what with more work, he could easily have beaten Nelson's 2:10¾. Whether Mr. Hobart will send the stallion back East or not is still a query. There has been a great deal of talk in that direction, and many horsemen are confidently predicting that Stamboul will be seen on the Eastern Circuit next yesr. Mr. Hobart himself is very non-committal, and it may be several months before he ultimately determines whether the horse will be trotted any more or not. In an interview with Mr. Hickok shortly after the horse made his present record, that well known driver remarked that there was no horse on earth that could beat Stamboul a race of three heats in five, and that if he could have had a trial on a kite shaped track with the stallion, that he feels convinced he could have reduced the present record of Maud S. Such positive assurance coming from a man of Mr. Hickok's experience is surely worthy of great consideration, and Mr. Goldsmith is equally emphatic in stating that the horse would have done better if the rain had kept off for a week longer. There is not a horseman on the Pacific Coast but what is willing to pin his faith to Stamboul as against any of the great Eastern cracks, and we sincerely trust that Mr. Hobart will allow Stamboul to be trotted next year, so that the people of the Eastern States may see what a great horse he really is.

Suing for Kenilworth's Value.

A dispatch from New York, dated the 15th, says: The suit for $10,000 damages brought by Mayor Grant against the New York, New Haven and Hartford Railroad Company to recover for injuries received by his trotting horse Kenilworth, has been set down for trial this week before Judge Dugro in the Superior Court. Kenilworth was injured on the night of Sept. 10, 1887, while being shipped from Springfield, Mass., to this city. The horse, with others owned by prominent men in this city, left Springfield, placed in an ordinary box car, arriving at Mott Haven late at night. In side tracking the cars, the switchman opened the wrong switch and allowed the car to run full into a stationary box car. The shock threw every horse down, the lamps were dislodged, and for a few minutes the wildest confusion ensued. Drs. Ogle and Oliver C. Varley examined Kenilworth and found that the tail or crupper bone was broken, and that the muscles across the back were badly strained.

Shortly afterwards Kenilworth was sold at public auction in this city to John Scanuell for $3,000, and was then shipped to South America, dying on the trip. Previous to the accident, Mayor Grant had been offered, and refused, $20,000 for the horse.

Among the witnesses who will testify to the value of Kenilworth are David Bonner, Frank Work, Alfred De Cordova and Capt. Dawson.

The railroad company is contesting on the ground that the accident was not the result of its carelessness, and that moreover, it has an "ironclad" release signed by Mayor Grant's man.

A Racy Reminiscence.

[Harvey Warde Peck.]

In the Fall how sweet the air,
How soft the breeze, and how fair
All Nature seeme;
The woods are brown and gold,
What beauties there unfold
Beside the streame.

In the Fall the distant bell
Grandly boome, as to fortell
The dying year,
While clouds of mottled white,
Half veiled in golden light,
Are drifting near.

In the Fall the song of birds,
Seems translated into words,
By hazy air;
To the buzz and hum of bees,
As they drone amid the trees,
What can compare?

And it was in the fall that we were sitting upon a fallen pine whose skeleton branches had punctured the earth in such manner as to leave the body of the tree some ten feet above the ground. We occupied a hill which overlooked the town of Placerville, California. It was known in those days as Hangtown, from the somewhat abrupt and uncermonious manner they had of disposing of undesirable citizens. It was in those days a mining camp of considerable merit. That it was not altogether tame may be gathered from the fact that there were thirty-two saloons in the town, while the resident population was about twelve hundred and the fleeting population one thousand. My companion was Tom Edwards, a man who had done a little of everything—mined all over the country, freighted ore over the Sierras, and trotted and raced horses throughout California and Oregon. He was a native of New York, was a well educated and widely informed man, aside from being as shrewd as an Arab horse trader. Tom was in a retrospective mood, and sat with his chin in the palm of his hand watching some miners digging under a house, and propping it up with timbers, so eager were they in their search for gold. Many of the houses stood on stilts from four to ten feet high, mute monuments for their all powering thirst for gold. As Jack Thompson used to say: "The breezes of Heaven blow under 'em whenever they want to."

The scene, as we looked down upon it—the town in the foreground, filled with noisy miners, the sharp click of picks from the surrounding hills, the occasional roar of a blast, the rumble of the distant stamp mills—how vividly it all comes before me now! It seems to be impossible that it was fifteen years ago that I sat upon that log! Ah. me, how time flies! But it was October 1875, that most beautiful month in California, when the soft sheen of Indian summer makes life seem worth living.

Edwards was, at that time, bargaining for a hotel in the town. He excused himself to his friends, as Tom had many, for entering upon that plan of action, by saying that he had done everything else and why not try hotel business? Genial Tom! He laid down his load several years ago, and the dried leaves of many autumns have rustled about upon his grave.

While we were gazing upon the panorama below us, the sun sank into the blue Pacific. As Tom observed this he said:

"Say!"

"Well, say on."

"Did you ever see the sun set in a blaze of glory?"

"I guess I have! Why?"

"Because I never recall that expression without bringing to my mind one of the strangest experiences that a man ever had. If ever you see Barney Fagan you just say to him, 'and the sun set in a blaze of glory.' After he recovers from his astonishment he will say, 'Sure, that's what he said.' But thereby hangs a tale. Would you mind hearing it?"

"Mind? I'd be delighted," and I lit a fresh cigar.

Tom was a great story teller, and had a fund of anecdotes stowed away, that never, to my knowledge, gave out. Although a man of education, he sometimes elapsed into the phraseology of the frontier, due probably to constant association for many years.

"Well, old man, seven years ago I was knocking about through the mines, doing nothing in particular, having struck a rich 'pocket' in Sierra Valley. It was about this time of year, and I concluded I would spend the winter in Sacramento, which I did. When spring opened Barney Fagan, whom I had known for years, came to me and says: "Tom, me boy, I've got a trotter, be gob! A little more wurruk and he's the boy that can fasten their collars—he is, indade!" I went to see him. He was a yellow bay gelding about 15 hands and an inch, four years old and good looking. Barney said he belonged to a man out of town who had hired him to break him to drive. The man claimed the horse was sired by Geo. M. Patchen, Jr. Whether there was any truth in it or not I don't know. Patchen came to this State in 1862, and might have sired this fellow. I had a good deal of confidence in Barney's judgment, and he said the horse could speed in places faster than anything he had ever seen, and he was very anxious I should buy him. Barney was a little commonplace looking Irishman, but he was very bright and knew a trotter when he saw one in the dark. I finally bought the horse for $300, his owner never dreaming he was anything out of the common run of young horses. When I first took hold of him he could brush a 40 gait and was remarkably steady for a young horse without much work. In a short time I got him so he would stand driving, and when May came with buds and balm, he could go a mile in about 2:28 and was mighty handy. It soon got noised about that I had a wonder—for a horse that could beat 2:30 was a trump those days—and I guess he was the fastest horse in the State, at that time. When summer fairly opened I made up my mind that I had a bonanza, if I worked it right. I consulted Barney, and his plan was to go over the state with the horse and tackle anything we met, regardless of sex, age or previous conditions, to which I finally agreed. I had Paulson of Sacramento make me a sulky, for which he charged me the modest sum of $425.

The 15th day of June, I made a match with a horse called Pacific, on the Marysville track. He won two races at the regular fair held there two months afterwards, getting a record of 2:32¾. He could go a mile the day of the race in about 2:35, which was fun for my horse. We made the match for $1,000 a corner and bet everything but our lives. The residents thought Pacific the fastest thing on earth and never quit backing him. The first heat I went to the half in :15, which was faster than I intended, and came home in 2:32½. It was his first race and I could not rate him very well. They changed drivers a couple of times, but I won the next two heats in 2:32 and 2:33, with something to spare. You may imagine that this race attracted attention to my horse, and it wasn't so easy to pick up races as I thought it would be. About two months afterward I made a match for $2.000 against a horse that had just made a record of 2:30¾ at the Sacramento Fair. Barney had named my horse Pat. I was a little sorry that I had made the match with the Sacramento horse, for I thought I would have to uncover my horse in order to win, which I didn't want to do. But the horse wasn't as good as the day he made his record and I won in 2:33, 2:34½ and 2:34. I won about $3,500 on the race. That night Barney got full and told the town about the spot where he was born, on that little emerald isle far away.

I next made a race with Red Bird, a horse hailing from the northern part of the State. Pat was to pull a wagon and Red Bird go to harness. I won in 2:32, 2:34, 2:31½, and had to pull Pat double to keep from going faster.

In September, 1868, I made my last race for that year. It was with a horse named Dan Benson, he to go under saddle and Pat to wagon. I beat him easy, without having to go faster than :33½. I gathered in about $500 on this match, and when I went into winter quarters I had a better horse than I started with and about $8,000 winnings.

The next Spring I got excited about the mines on the Comstock, and leaving the horse with Barney I went to Nevada, and stayed there for almost a year. Barney had taken good care of Pat, and he looked fine when the rains let up the early part of 1870. I am a rover, as you know, I had a longing to visit Oregon, so one April day, when sparkling drops of water were depending from every bush and blade of grass, and all Nature look like a child in tears, I gathered up Bob Chase, (of the old stage line) Barney, Pat, the sulky and harness and went to Portland. I put Pat in a livery stable, where Barney could watch him all the time and sleep in the stall at night. For three months we stayed around the town, sometimes joining a crowd of horsemen around the stove at night, listening to them tell stories of majestic proportions, regarding what some horse they owned could do or had done or would do and all that. Pat was feeling fine and Barney was the most disgusted man you ever saw. One day he said to me, "Tom, it's a loon ye are, a spendin' yer time in this haythen country, when ye know there's niver a trotter here at all; it's money we'd be makin' in California, the likes of which was never seen."

Truth to tell I was about ready to leave. The day after Barney delivered his little talk, Chase came in to dinner with some news. He said there was a roan mare out at the track that was owned by a man named Churchhill, and driven by a smooth looking young man named Ryan. He said it was an open secret that this mare could go very fast, and that if we let it be known that we had a trotter, and managed the affair properly, we could make a race for plenty of money. The next day I went to the track and looked the mare over. She was dark roan, about 15½, long bodied and short legged and had a racy appearance. The groom told me that Rosie C., as she was called, was a pretty good mare, but he was very cautious and would say nothing about how much speed she had. I sent Barney out to the track that evening, plentifully supplied with cocktails, upon which both he and Rosie C's rubber got reasonably drunk, but he found out nothing of importance. I watched the mare unknown to anybody, but could never see her go faster than a three minute gait, except once, when Ryan moved her a 30 gait down the back stretch.

One Saturday, about four months after our arrival, the owner of Rosie C. came into town. He was a plain, unassuming granger, with an innocent smile, and a farm just out of town. After we were introduced, I tried to sound him by offering to buy the mare, but he declined selling her. He went on to tell me that he had raised her, and his family thought the world of her, and although she was green and had never been in a race, he considered her the fastest nag in Oregon. His son was proud of her, his daughter loved her, his wife doted on her. and he himself had never seen her equal, and as for his brother——

He went on that way for about five minutes. I finally got back to my normal condition, and taking heart again I asked.

"So you think the mare is the boss, do you?"

"I do!"

"Are you a betting man?"

"I ain't nothin' else! What do you want to bet on now?"

"I want to bet that I've got a horse right here in town that can beat your mare a race!"

"For how much?"

"You name it!"

"Say $5,000?"

"Good! let's put up now."

He went to one bank and I went to another. We got $5,000 a piece and planked it up in the hands of a well known sporting man of Portland, along with the conditions, which read, 'mile heats, three in five, to harness, under National rules, race to take place the next Saturday.' Don't you know you can't near understand how cunning I felt after I had all the arrangements made. When I told Chase and Barney about it they were much pleased. Chase rubbed his hands together and beamed with suppressed joy, while Barney executed a double-shuffle of great precision.

The next day we took Pat and moved to the track. For three days we only jogged him slow, but a good many miles a day. As Barney had driven him ten to twelve miles most every day since we had been in Portland, he was hard as nails, and when I called on him he could brush like a runner.

Of course the match was known far and wide, and every body was out on dress parade the day of the race, which happened to be a beautiful one. Before noon the grounds were crowded with everything, from a four-in-hand to the ram-shackle rig of the loud-voiced young man with bananas for sale. Some local man sold pools and the way money went in (at slight odds on the mare) beat anything I ever saw. But it stopped going in after a while—chiefly because our money gave out. We had in $6,000 before the first heat, against $7,560. In fact we got up all I had except $100; all Chase had, and as for Barney, he never did have any money.

At half past one we picked the judges and timers, and I will say, got a good square lot of men. At two o'clock we were called out for the first heat. Barney led Pat on to the track, and as I was about to get up behind him, I heard a boy's voice, not very loud, but very distinct, crying:

"Who wants a copy of the latest novel? All the rage! Only 50 cents a copy! By Oregon's young authoress! Agnes Holloway's 'And the Sun Set in a Blaze of Glory!' Who wants it?' "

As I climbed into the sulky, Ryan drove on the track with Rosie C. Everybody cheered, Barney included—I guess it sounded louder to me than it really was—for I know I smiled grimly and thought to myself they wouldn't yell so much presently.

We scored several times, with me always behind. I was trying to get a line on the mare's speed, and I found out enough to know that I would have to score considerably faster if I intended to keep up with her. The next time up I sent Pat lively, and we got away together. We went to the quarter in 0:36, to the half in 1:12, to the three-quarters in 1:48½, and it was head and head with Pat at the pole. Down the stretch I strung out Pat for keeps, and landed a winner in 2:23¾ by a length. When I got out of the sulky nobody cheered; no, sir, not a soul! The only thing I heard was:

"Who wants Agnes Holloway's new book, 'And the Sun Set in a Blaze of Glory?' "

I was a little surprised to think the mare could trot such a mile, and looked at her uneasily as she passed me with a cooler thrown over her. After the heat, while Barney and Chase were attending to the horse, the owner of the mare came up to me. While we were talking, he remarked that I had a pretty good horse, but that his mare would beat him!

"The devil she will," I replied tartly; wish I had some more money to bet she don't!"

"Tell you what I'll do. If your horse can beat Rosie, I don't want her money. I'll just bet her against your horse even up that she wins!"

"How about your son and daughter and wife and brother and ——"

"Never mind about them. They can live without her. Come, now, is it a whack?"

I was somewhat staggered by this proposition, but the crowd stood around, watching covertly, and without much consideration I agreed to his proposition.

We drew up a contract and gave it to the man who held the stakes. When I told Barney what I had done, he said:

"And that's right! The likes of no roan beast like her can bate Pat. Leastwise, if she does, he'll disgrace the name he bears, he will. and the divil a one by two do we want of him, anyway!"

Just the same I could see that Barney didn't feel very good over it—for he thought more of Pat than he did of himself—and the longer I thought over it, the bigger the mistake I thought I had made.

My horse looked very fit when he came out for the second heat; so did the mare for that matter. We got away at the second attempt, amid almost entire silence, so thoroughly interested were the entire crowd. I led a little at the quarter in 0:35½, with the mare right at me. I got to the half in 1:10, with the mare half a length back; at the three-quarters she had decreased it to a head, and a blanket would have covered us as we turned into the stretch. Neither horse had made a wiggle, and as we straightened out, Pat was doing his best. Half way down the stretch I heard the crack of Ryan's whip, and the roan mare shot up to me. Again the whip descended, and she showed half a length in front, and the wire was in plain sight. I steadied Pat and plied the silk myself. He made a game effort, and reached her head as she went under the wire. Mother of Moses! how the crowd yelled. When I was dismounting the bell rang, and I heard:

Rosie C. first, Pat second; time 2:20.

I felt gone, you bet I did! At this juncture Chase appeared and as he grabbed my arm he exclaimed positively: "If we

ain't beat may I live on Spighetti the rest of my life! That was an awful finish and Pat was game, but I'm afraid we've struck a snag. Don't you think so?"

We were walking behind the sulky toward the stall, while Barney was leading Pat and looking solemn as an owl. I told Chase that it looked blue, but that I was going to move Pat the next heat from wire to wire. When I thought of losing that horse, as well as all my money, my heart sank, for there wasn't many of his sort then, and they ain't any too plenty now. But I was in for it, and I had to take my medicine.

When we were called out for the third heat, I was cool as ice, and I could see that Ryan was just a little uneasy, from some cause. We got off the first time we came to the wire, my horse having a shade the best of it. I carried the mare to the quarter in 34, where she made a break and I took the pole. She settled quick and came very fast, for before we reached the half she was on my wheel. Pat reached the three-quarter pole in 1:44—a 2:16 clip—but the roan mare's nose was still on my wheel. In the stretch both horses tired a little. Half way down Pat broke, but caught at once, and simultaneously Rosie went up, but lost nothing, and came again like a shot. At the distance I was half a length in front; forty yards from the wire it was only a head, and although I used every endeavor and drove for my life, I was second in 2:19.

The crowd arose and cheered as one man, and the greatest excitement prevailed. Right then I did some tall thinking. What sort of green mare was this that could go two heats in 2:20 and 2:19? Like lightning out of a clear sky came the revelation that I was up against a "ringer." If she was a ringer where did she come from? From the Eastern States of course! Just then I saw Churchbill going towards the mare's stall. I called to him, and as he approached, I said,

"The old mare has'nt lost any of her speed since she left the East I see!"

"What mare? What East?" but he stammered and colored some, and I knew my surmise was right.

"Why, the *east* East of course," I replied factiously, though I didn't feel that way, "I simply thought I'd let you know that when you said you raised this mare, and that she was a green mare, that you lied. If this was a class race I'd head you off, but as it's a match, you've got me."

He grinned and said "my son is fond of her, my daughter loves her, my———"

I walked away before I heard any more.

When the bell rang for the fourth heat, I felt it was all over but the shouting. While we were scoring, I imagined the mare acted tired. Then I adopted new tactics. I either went up too fast or too slow. I scored her about a dozen times, during the progress of which I was fined three times, the last time $50, but I didn't care for that if it would do any good in the end When we finally got away I had the best of it. Pat reached the quarter in :34, as before, and went up the backstretch to the half in :35—the half in :09, mind you—while Rosie was two lengths back. Around the upper turn the positions remained unchanged. As we entered the stretch the mare came at me, and half way down I could see her roan head out of the corner of my eye. Then Ryan's whip came into play, and at the distance she was even, while Pat was at the top notch. The mare made a tired break close to the wire and after the hardest drive I ever made in all my life, I beat her about half a length, and so the judges decided. The time was 2:20 flat. The crowd did not rise to meet me, not much, but Chase and Barney did, for when somebody asked which horse won Chase shouted:

"Pat, of course—in a walk!"

I remember thinking that if I had won that heat in a walk, I never wanted to take part in a race where I'd have to hurry.

As you may surmise, the scoring done the work. The mare wasn't keyed up for a great effort because they thought they could best me without. But she was done. I won the fifth heat and the race in 2:23, the mare a half dozen lengths behind. Chase and Barney yelled like Comanche Indians, and we drank nothing but champagne for a week, I got the money and the mare. Churchill told me the mare's name as I was leading her away. You'd be astounded to know what mare it was he had. When the owner came after her it cost Churchill over $10,000 to pay for her.

I both inquired and asserted, "You haven't got them now?" breaking the silence for the first time during his recital.

"No! I sold them to a well known road driver in Chicago. I got a long price for the pair. The mare is now the dam of a very fast young steed whose name is known all over the land, while Pat is one of a famous pole team in an Eastern city. But I forgot something—when we were leaving the grounds after the race, the boy yelled after us:

"And the sun set in a blaze of glory!"

"So did Pat," howled Chase, loud enough to be heard from here to Folsom.

We remained in Portland a couple of weeks after the race, when we drifted southward, finally reaching San Francisco, where we separated, since which I have never seen Chase and Barney but once."

As Tom finished, the lamps were being lighted in the town below, our cigars were out, and the crisp night air and the darkness descended together. From a cabin, not far away, came, in robust tones:

"And in this hole
He yielded up his soul,
In the days of '49."

As I scrambled down from the log, I said, sententiously: "Let's go buy two drinks."

HEALDSBURG, CAL., Dec. 1890.

GENERAL TAYLOR.

A Noted California Sire Who Still Remains Unregistered.

In the immigration of 1853 across the plains, came a man from Michigan named J. L. Eyclesheimer, with several fine driving horses, among which was a small pony-built grey stallion about fifteen hands high. He was foaled in 1847 in New York State, and got by the "Morse Horse," and his name was General Taylor. Shortly after his arrival here he was sold to George Bement, then living out about six miles from the Mission in the San Bruno hills. Mr. Bement subsequently sold General Taylor to E. W. Teackle, afterwards famous as the owner of Princess, Gentleman George and Dexter.

In the spring of 1857 he was matched to trot over the Union Course against a chestnut gelding called Rattler, thirty miles in harness for $2,500 a side. At that time he could not trot much better than 2:50, and for the first ten miles it was only a jog for him. But Rattler, whose best record up to that time was 2:53, hung on like a leech, and kept coming right along. The twenty miles saw Taylor behind Rattler, it being his driver's determination to rest him up for a last effort. In the 26th mile he again went to the front, and won the race by a scant three lengths in 1 hour 47 minutes 59 seconds, which is still the record at that distance.

The following year he was exhibited at the State Fair, where he took first premium over a large lot of stallions, Williamson's Belmont being among the number. After that he became a regular campaigner, and won several races, in one of which he gained a record of 2:46. He had now passed into the hands of Mr. E. H. Parker, agent of the Hazard Powder Co., and long and favorably known as a gentleman who loved honest sport. Mr. Parker subsequently sold the little General to Leonidas Haskell, who is long since dead. Mr. Haskell's driver and groom was the well-known "Jack" Kelly, who was killed here some years ago by "Gus" Bellemere.

Under Kelly's management, Taylor got a fair share of patronage, but the cream of the trotting mares in the State were sent to Easton's David Hill, by Vermont Black Hawk; Werner's Rattler by Bigart's Rattler; J. H. Fish's Comet, record 2:50, and other sires of less note, including Vibbard's Stockbridge Chief, the sire of Abe Edgington. Taylor had an uphill fight against these rival sires, their owners being mostly men of wealth. Nor should we overlook John Nelson at this period, for he arrived here in December 1858, and was at that time the only son of imported Trustee in the State. For all this antagonism, Taylor seemed to thrive, and in 1862, when Charles H. Shear offered to trot his colt Paddy McGee, then three years old, against any entire colt in the State, either three or four years old, people began to regret having neglected the gallant little grey. He was a good roadster, and could trot well to wagon. Stephen B. Whipple at that time had probably the best trotting mare in the State—old Diana. She won a race on Long Island the day before he bought her, trotting a third heat in 2:33½. But Mr. Whipple could never be persuaded to breed his mare to General Taylor, consequently she was sacrificed for years to horses that were not fit to haul oats to him.

Several of his get had appeared and trotted in comparatively slow races—say from 2:48 to 2:55—prior to the State Fair of 1864. Then came the great surprise party of the year—a stallion purse, for which the entries were George M. Patchen Jr., Paddy McGee, Latham and Tecumseh, but the latter was drawn before the hour for starting arrived. Goff drove Patchen and told his owner, Mr. Hendrickson, not to bet anything, as the big horse was very rank and unsteady. But that did not stop the crowd from betting by a good deal. George Rice, "the Count" as we used to call him, had introduced pool-selling here for the first time, and everybody was in rapture at the new mode of speculation.

And so money poured in like water on Patchen at $60, Latham $40 and Paddy from $25 to $30. Judge of the astonishment of the crowd when Patchen broke at the half-mile stake and did not settle down to his gait until Paddy McGee had won the heat in 2.33 from Latham and Patchen was distanced. The little gray pony went along and won the race with ease. On the following Saturday in the double team Paddy was hitched up with Latham, but Charley Shear could get no better than second to Honest Ance and Gentleman George. The truth was that the horses were wholly unsuited to each other, Paddy being a very free goer, while Latham was a dull and sluggish horse that needed constant whipping. On the following day (Sunday), Latham was mated with Honest Ance and beat Jim Barton and Fleet, one of the most exciting races ever seen.

Just what was Taylor's last appearance on the turf we do not well recall, nor have we any printed records to go by. We know that he started in a stallion purse against Werner's Rattler and six others over the Yolo Grove course across the river from Sacramento, and that Rattler won the two first two heats and Taylor the next two. The race was then postponed on account of darkness, and the presiding judge declared all bets off, because the race was not concluded on the same day it was begun, which decision created a storm of indignation all over the State. Taylor went out next day to contest for the purse, but Rattler had got rested up and was too fleet for him. Had the race been finished that night, he would certainly have won the money, as Rattler, who was short of work, was terribly distressed.

Taylor trotted against W. H. Seward at the opening of the Willows Park by the late lamented W. F. Williamson, and was beaten by Seward, who then was the property of George B. Gammons, then a leading Front street grocer, but now long since dead. Seward won by over 150 yards in something outside 32 minutes, being splendidly rated by Barney Rice. He was subsequently sold to Robert F. Morrow, who also owned the stallion Latham. We recollect seeing both these races and will not be positive which of them took place first, but think the ten-mile race with Seward was the game little stallion's final effort.

Taylor was one of the most sensible and intelligent horses that ever looked through a bridle. Mr. Parker once told us that he was driving him out to the Ocean House one afternoon, when suddenly the buggy came to a halt. The little horse stood perfectly still and cast his head around to see what was the matter. A root, protruding from the ground, had stuck itself between the spokes of the buggy. Some horses would have kicked the buggy to pieces in a case like that, but Taylor halted quietly. On the return from the Ocean House, Taylor was going a lively clip, but just as he approached the spot where the root stuck up, he came down to a walk until he had passed the place and then broke into a faster trot than ever.

It is a crying shame that a horse which has conferred such unquestionable benefit upon the stock of this State, is not eligible to registration under any of the rules by which stallions are made standard. General Taylor is the sire of seven dams, of horses in the 2:30 list, to wit: Well Fargo 2:18¾ by George M. Patchen, Jr; Lee, by General Lee, 2:30; Nerea 2:23½ by John Nelson; Lady Blanchard 2:26¼ by Whipple's Hambletonian; Brown Jug 2:28 by Nutwood, Sargent 2:28 by Brown Jug, son of Nutwood; Bickford 2:29¼ by Black Chief, and Stella 2:30 by Electioneer.

Here are eight horses, and the most remarkable feature of all is that no two of them are by the same sire, thus showing conclusively that the Taylor mares "nicked" with every strain of blood with which they were mated. In addition to this, Taylor was the sire of the dam of that useful stallion Whippleton, now dead. He was the sire of Lilly Stanley 2:17½, Cora C. 2:28 and the pacer Homestake, with a record of 2:16½.

All these things considered, Taylor must stand in the front rank of valuable early importations to the Pacific Coast. He is long since dead, but his descendants are keeping his memory green in the hearts of our stalwart pioneers. He fairly divides honors with Williamson's Belmont, and far surpasses many sires who enjoyed a large share of patronage. Either Shenandoah or Werner's Rattler could pull a wagon and beat him, but his descendants have far outstripped theirs.

Whatever of condemnation General Taylor received during his life time was spontaneously bestowed upon him either by maliciously prejudiced people, or by those whose ignorance would not admit of their recognition of his merits; and whatever homeopathic quality of praise was bestowed upon him, he won by indubitable gameness which he has unerringly transmitted to all his posterity. Paddy McGee was the sire of Mary Howard 2:24, and Eugene Casserly was the sire of Sweetbriar 2:26½, both of them being known as resolute finishers under the whip.

Perhaps in this connection some mention should be made of Paddy McGee's double name. He was out of an old blind mare called Peggy McGee, which trotted on Long Island in 2:36 about 1852. She went blind shortly after reaching California and was sold to William Shear, then proprietor of the Pippona livery stable on Commercial street. Shear, becoming heavily involved, sold the mare to his brother, John P. Shear, then engaged in quartz mining near Mokelumne Hill, in partnership with Captain H. J. Hanford. The colt was called Paddy McGee in his first race by his driver, Charles H. Shear, a brother of the owner. John came down here, some months later and changed the colt's name to Captain Hanford, which it remained till about 1866, when there came about an "unpleasantness" between Messrs. Hanford and Shear, who dissolved partnership. John Shear then ordered the horse's name changed back to Paddy McGee, and as such he died. Eugene Casserly was a totally different looking horse from either General Taylor or Paddy McGee, being nearly fifteen hands, three inches, in height, and of great length of body. He was a very bold mover and as handsome a horse in harness as we can recall. He was a beautiful iron gray with a lofty way of carrying himself, and old Mr. Woodward was very proud of riding behind him. He beat Katie Tricks (dam of Mr. Dietz's mare Empress 2:24) a match at two mile heats and afterwards got a record against sorrel Charley of 2:45. He subsequently trotted against Latham and lapped him out in 2:33¾. Take little General Taylor for all in all, he was a great horse in his day, and his impression on the trotting stock of California is not likely to fade out.

Taylor's dam was called the Buskirk mare, and sometimes Flora. Her pedigree was never traced, but the man who sold her to the Eyclesheimers told them she was of Messenger family. In his letter of 1872 to Mr. Bement, Mr. J. L. Eyclesheimer, who will be well remembered by pioneer turfmen as the first driver of Jim Barton, says: "She was a road mare in New York city and wore out two mates. She was traded off twice, and finally came into our possession. We turned her out to grass all summer, and when we took her up in the fall we found she could trot handily in 2:40 We bred her to the Morse Horse at Lansinghurgh and she had eight colts in eight years. All but one could beat three minutes, and one of them trotted in 2:52 to top buggy at five years old. You can set it down that Taylor is one of the best bred horses ever left the State of New York."

As to his record, there have been several disputes about it, some claiming that he never beat 2:45. Mr. George Bement, whose word has never been called in question, and who ought to be as good an authority as anybody, says that he trotted in 2:44 in harness and 2:41 under saddle. Certainly that was a good enough record for those days when "Yank" Sessions' old mare was the only horse in the State that could beat 2:30; and when an entire meeting was trotted through without a heat better than 2:35 in harness or 2.40 to wagon. That is of little consequence now, however. The great little horse is gone and forever. He died at Napa in 1877, at the ripe age of thirty years, after leaving a mark upon the trotting stock of California that defamation shall not wither nor time efface.

TURF AND TRACK.

No Star performer ever remained on the turf so long as Goldsmith Maid.

The dam of Maud S. is safely in foal to King Wilkes, the sire of Oliver K. 2:16¼.

There are to-day ten pacing horses by trotting sires where there is one by a pacing aire.

Mr. Bonner says that Sunol 2:10¼ has got through with racing or going fast miles for gate money.

Nelson 2:10¾ is the only horse who has ever held the class record that has lowered his own record at every attempt.

It ia reported that J. O. Whitten, of Cambridge, Mass., owns one quarter interest in the stallion Nelson.

Ira Ramsdell will start out in the spring for Chicago with a small stable, including Homer, Oscar and a couple of others.

Clarke & Book, of Newcastle, Pa., have purchased the standard bred stallion St. Vincent for $15,000, from the Powers Brothers, of Shadeland.

A yearling that has been making Kentuckians open their eyes, is the black colt called Connor, by C. F. Clay 2:18, that not long ago stepped a quarter in 36½ seconds, a 2:26 gait.

It took twenty-four years for Phallas to cut ten seconds off the record of old George M. Patchen. Will the next forty years see as big a slice chopped off the record of Phallas? We trow not.

First it was paper collars and cuffs, then paper car-wheels, and now it is paper horse-shoes. It will he paper steamboats before we are twenty years older. Everybody who has used them prefers them to iron.

The brown gelding Limestone 2:19¼ owned by J. Owings, of Marysville, Kentucky, has been sold for $7,000 to Benjamin Kendig of Pittsburgh. He is by The King (son of George Wilkes) out of a mare by Marshall.

Samuel Keys, of Pittsburg, Pa,, has purchased of B. J. Treacy, of Lexington, Ky., a two year old bay colt called Redding, by Red Wilkes out of Lady Dennison by John Dillard. The price paid is stated at $3,500.

France is paying big prices for American-bred trotters. The most recent purchase is Cash, bred in Michigan, for which $13,250 was paid. He is by Olmedo Wilkee, 2:26½, son of Onward, 2:25¼. Cash is three years old.

A rumor is flying about New York, anent that the famous Futurity colt, Potomac, that his wind is badly affected by his illness of last October. If this be true, he is unlikely to bring the top price at the forthcoming Belmont sale.

Ab Stemler, who has been in town for several days, says that he expects to get several more well bred mares for the Shippee farm in a few weeks, and there is a possibility of Mr. Shippee purchasing a stallion if he finds one to suit him.

A weanling colt, nine months old, owned by J. Brooke Curry, of Lexington, Ky., is reported to have trotted a quarter in 43 seconds to a light cart, which is at the rate of 2:52 to a mile. He is by Wilton, out of a mare by Red Wilkes.

Speaking of Electioneer, the Kentucky Live Stock Record says: "He was a great sire of trottera, and has left the impress of individuality deep and strong. His many high class sons will perpetuate his line and fame for years to come."

Col. R. S. Strader recently purchased ch m Mysie by Creedmoor (son of Asteroid), out of Dame Gourlay by Planet. This mare's pedigree, after the fifth cross, is identical with that of Dame Winnie, the dam of Palo Alto. The price was $1,175.

Two races took place at Ione Valley on Saturday last between Ike Harlan's Roany and P. Yager's Electricity. The first race was half a mile and Roany won as he liked. The second was a mile and Roany won the mile easier than he did the first.

The Bowerman Bros. of Lexington, Ky , have bought from J. I. Case of Racine, the brooodmare Constance by Ellerslie Wilkes, out of Kinkora by Mambrino Patchen. The owner of Jay-Eye-See appears to be letting go a great deal of gilt-edged stock.

T. H. Williams has sold Rinfax and Glenlivet to Palo Alto. and next season will have only a small stable which will include Tycoon, Brownidle, a two year old brother to Carmen, and a two year old by Falsetto from Galanthis, a sister to Falsetto.

It is just thirty years since George M. Patchen, in a race with Flora Temple cut the stallion record down to 2:23½. He went under saddle in this race. In the thirty years that have intervened, Nelson and Stamboul have done some responsible whittling.

Medallion, by Nordenfeldt, out of Locket, dam of Thunderbolt and Necklet, won the New Zealand Derby. He ran second to Titan for the Ascot Vale stakes last March at Melbourne. He is of good size and well calculated to become a good breeding stallion.

Highborn, by Grandmaster, won four races in March and April at Sydney, and one of these was the Rowley mile; yet he sneaked into the Melbourne Cup with 92 pounds up as a five-year old, and ran into second place. His owner, Mr. Oatley, pulls down $10 000.

Brock Heffernan, who so ably handled Tycoon last season, was in town last week He says that the chestnut gelding is shaping up better than ever and expects to have him in better trim than any one has yet seen him. He is also rather sweet on the yearling brother to Carmen.

It is said that Fry, the great London hook maker, entertains most royally and that Lord Randolph and Lady Churchill are to be frequently found among his guests. But then, Fry does not belong to the 'ouse of bondage, you know, so the Queen may forgive Randuff after all.

Greaford, winner of several two-year-old events, in Australia, has been sold to W. T. Jones (owner of Bravo) for $5,000. He is by The Drummer, son of Rataplan and My Neice by Cowl. He cut up very soft, however, at Caulfield, and was scratched for all engagements at Flemington.

Judson H. Clark, of Elmira, N Y., who bought from Senator Stanford the stallion Lord Wellington, one brother to Sunol 2:10½, has changed the horse's name to General Wellington, to avoid confusion of names, there being already another Lord Wellington, which has been registered as such.

Henry Walsh, the Palo Alto racing superintendent was in town during the early part of the week, and says the thoroughbreds are all in great shape, there being no sickness among them. Gorgo, who recently returned from the East, is in rather poor condition and has a very badly bowed tendon.

The thoroughbred mares in the trotting department at Palo Alto have been bred eight each to Piedmont, Wild Boy and Liberty and five each to Electioneer and Alban. Two were bred to Azmoor, who has an infusion of racing blood, his dam being by the imported horse Hercules, son of Kingston.

Mr. Frank L. Coombs made a good impression at the East. His quiet, modest manner was very much in his favor, and, as he never got up unless he had something to say, he found attentive listeners and made substantial friends. The trotting interests of California could not have been better represented.

R. A. Swigert, of Kentucky, is said to have refused $7,000 for his two year old Michael by Glen Athol out of Verbena by Virgil. He says he will not let him go for less than $10,000. Race horses by Glen Athol are few and far between, Checkmate and Glenmore being his only real high class performer.

The trotting stock of Col R. G. Stoner, of Paris, Ky., is to be sold on the 10th of February, at Lexington. Colonel Stoner is in failing health. and hence his retirement from breeding. The quality of Col. Stoner's stock has never been called in question, and we are sorry to see him quitting the business.

There is little doubt but Sunol will go down to Maud S's record if she could only be rested up in one place, instead of traveling from place to place and giving exhibition heats. She had more speed at three years than Maud S. had at five, and all she needs is sufficient respite to enable her to expand and develop herself.

In the season which has closed in September last, the get of Sir Modred won in Australia $15,715. He was represented by Sir William, Antaeus and Camden, the latter of which did not win a race. Sir William won the Doncaster Handicap and several other good races. All these colts served ten or a dozen mares at two years old.

Lucille's Baby, by Princeps out of Lucille Golddust, is to be bred to her half-brother, Sprague Golddust, who is by Governor Sprague. With as many good stallions as there are now offered for public service in America, we should think that such inbreeding was wholly unjustifiable. It deteriorates substance although it increases quality.

A. G. McCann paid $500 for a mare called Retta at Lexington, last week. She is by Hyder Ali, out of a mare by Colossus, her dam the dam of Alma Mater. Mr. McCann breeds trotters only, and that is why he picked up this four year old thoroughbred at a low figure. He is liable to get an Alcantara yet; if he will stick to the Wilkes stallions.

The Canadian sporting papers received at this office all eulogize the dead Electioneer and rate him as the world's greatest trotting aire. When we consider the predisposition of Britishers to underrate everything that is American, we feel proud of the compliment paid Californias departed hero. Such praise could not have been yielded unless nobly deserved.

J. H. Butler, who has recently removed from Butte to Boise City, Idaho, has a good string of trotters in charge of William Weyand. He has the pacer Major Wonder 2:14, Manning 2:20, Al Mott 2:32½, and Belle McGregor, a very fast mare without a record. The stable of Mr. Butler is liable to be seen at the State Fair and other California tracks in the Fall.

The Blood Horse Association should fix an early date for their spring meeting, as they will be all the more likely to have good racing if the meeting take place before the Eastern contingent leave. The Rose, Ramsdell, Hearet, Baldwin, Shippee, and other stables, will all go East this spring, but probably not until after the Blood Horse meeting if it is held early enough.

Pomona is to be sold in Kentucky next week and as there are no Electioneers for sale at the Palo Alto stud farm, he is likely to bring a good price. He is by the dead hero, out of Peril by George Lancaster, her dam Melinche by Old St. Clair. Melinche was the dam of Fred Crocker 2:25¼ at two years old, and as Pomona can trot in 2:28, he is liable to bring a pretty round figure.

Eddie Gould, the second son of the "Wizard of Wall Street," is said to be aspiring to fame on the turf. He certainly has plenty of money at his back and need not hesitate at buying the best stock in the land if he once decides to go into the game. But if he manipulates his horses as his father manipulates his stocks, Master Eddie will be ruled off before the close of his first season.

Correze, by Newminster, out of Ouida, who ran third for the Melbourne Cup to Carbine, won the V. R. C. handicap, one mile and three-quarters. Enue was second, Vengeance (winner of the Caulfield Cup) third, Chaldean fourth, and Little Bernie fifth. The V. R C. handicap was established in 1877, and the only horse that ever won it twice was Bravo, who won the Melbourne Cup of last year.

Bruce & Kidd's sale of thoroughbreds at Lexington from Dec 6th to 10th inclusive, was a great success, there being 273 horses sold for a total of $190,075, being an average of $696.25 per head. Of these Palestine brought $13,000, Tom Martin $2,300, Ronald $2,525 Prince Fortunatus $4000, Dr. Nave $3000, Fero $1300, Hera $1400, Jim Gore $1500, Flyaway $1500, Julia May $2,350 and Balgowan $3000.

W. C. France & Son, Lexington, Ky., have sold to Bowerman Bros., for $4,000, the two year old black filly Cornelia, by Wilton, dam Cornelia by Colonel Bonner. To T. B. Kitchell, Coldwater, Mich., for $3,000, a yearling bay colt by Red Wilkes, dam Mambrino Jane, by Mambrino Patchen. To W. H. Crawford, Lexington, for $2,000, a black weanling filly by Wilton, dam Avoca, by Ellerslie Wilkes. This latter filly, it will be seen, is inbred to that marvellous aire, George Wilkes.

Titan, who won all his two year old engagements except a five furlong sprint in which he was beaten by Wilga, and who brought at auction the longest price ever paid for a gelding, has gone wholly amiss and has been let up in his work for an indefinite period. Gatling, who ran him to a head in the Great Foal Stakes at Sydney, after a bad start, has turned rogue and given his backers a very bad deal.

Princess, the dam of Happy Medium, was as wicked a mare in the stable as we ever saw, while her son Happy Medium, was the personification of good temper. Widow Machree was an excellent mare in disposition, but her son Aberdeen was a perfect savage and severely injured several grooms. It was not till he was taken to Kentucky that his bad temper was cured and he became tractable.

Dr. J. L. Benson, of Winnepeg, Manitoba, has purchased the standard bred stallion Sharper, foaled 1882, with a record of 2:19¾. He is by Bonrbon Wilkes 2345, ont of Lacy Sharp by Joe Downing. The third dam of Bonrbon Wilkes was Lizzie Peebles, and she was the dam of Joe Downing. She was said to be by Wagner, who was second (in his day) only to Boston as a four-mile race horse.

A. G. McCampbell, the Louisville turfman, disposed of his entire stud at Lexington. The 35 head brought $28,715, an average of $820. Mr. McCampbell was noted in racing circles as the owner of Tom Martin, winner of the Twin City Handicap, and of Jim Gore, that ran second in no less than three Derbies. The former was disposed of for $2,350 and the latter brought $1,500.

According to Allan Lowe, who has contributed a most interesting article to the Boston Globe, Andrew Jackson was the first stallion to beat 2:40. He trotted at Philadelphia October 27, 1834, in 2:38½. It is from this horse that the great Clay family of horses is descended. It is therefore fifty-six years from Andrew Jackson to Nelson, during which time the stallion record has been reduced 27¾ seconds.

"Plunger" Brodribb, who paid £4,600 for Titan at White's sale, last April, was a heavy winner on The Admiral and Carbine at Melbourne, and went far to recoup his losses at Sydney. This was owing to his horses, Prince Consort and Tantallon being in the same stable with the great Carbine. Mr. Donald Wallace, owner of the latter horse, is reported to have taken £80,000 out of the ring, in addition to £11,000 in the stake won by Carbine.

Richard Donovan, who owned Dunlop in partnership with Tom Saunders, the jockey, when that horse won the Melbourne Cup of 1887, two miles in 3:28½ with 115 pounds up, has filed his schedule in bankruptcy with liabilities at £13,000. We have very little sympathy with him for he tried to sell that horse to a gentleman of this city last April for $5,000, knowing full well at the time that the horse had passed out of his hands and he could give no clear title to the animal.

In 1865 the 2:30 list had fifty-three representatives, of which Flora Temple was the only one below 2:20. The 2:25 list had only George M. Patchen 2:23¼, Prince (by Long Island Black Hawk) 2:24½, John Morgan 2:24 and California Damsel 2:24½. Brown Dick and Ethan Allen were a tie on 2:25½, while Lady Suffolk and Cooley were equal on 2:26. Now a 2:30 horse is barely standard, while a horse that cannot do better than 2;35 is only saleable for a roadster.

At a meeting of the National Association of Trotting Horse Breeders, held in New York, Mr. S. A. Browne, of Kalamazoo, made a statement of his belief that there should be at least one thousand more professional handlers of colts than are at present employed. His belief was that from two thousand to five thousand good colts were annually spoiled for the want of proper breaking and handling in their yearling form. There is more in this declaration than appears on the surface.

The following gentlemen have been elected as officers of the National Association of Trotting Horse Breeders for 1891: President, H. W. T. Mali, New York; first vice-President, Leland Stanford, California; second vice-President, I. V. Baker Jr., New York, third vice-president, A. J. Caton, Illinois; Secretary, L. D. Packer, New Jersey. This is Mr. Mali's fourteenth term as President. The old Board of Censors was reappointed.

A kite-shaped track is to be built at Centralia, Missouri. The three counties of Boone, Monroe and Audrain, lying adjacent to Centralia, have been engaged in breeding a fair quality of trotters for several years past and we should not be surprised at hearing of some very fast trotting and running performances over that self-same track. There is a great deal of good blood in that neighborhood and most of the farmers are well supplied with the goods of this world.

The Oxford Horse Company of Wyoming, has imported the English stallion Busy Bee, by Altyre, out of Queen Bee (dam of King of Trumps) by King Tom, her dam Clementina by Venison. If this horse's form is as good as his pedigree, he is certainly a desirable outcross for the Kentucky mare; and if such be the case, it is an even bet he never sees Wyoming. The fad is now all in favor of English stallions, and breeders, if they want to sell their yearlings, will have to keep up with the procession.

George Van Gorden, Senator Hearst's Superintendent at San Simeon, brought a carload of thoroughbreds to San Jose last week. The youngsters which are principally yearlings will be worked on the San Jose track this winter. Mr. Van Gorden says he shall breed imported Gertrude, imported Fun and three other mares to Wildidle. Several mares including an Australian mare by Goldsbrough, will be bred to Three Cheers. Nellie Collier, the dam of Yosemite, will be bred to imported Trade Wind, a horse by Goldsborough.

Master "Pikey" Barnes, whom the proprietor of the Baldwin Hotel accuses of belonging to the Armstrong family, has set up a racing stable of his own, to be called the Carlton Stable. It consists of Mark S (late Moxie) by Duke of Montrose and Molly Hardy, by the Texas stallion, Jack Hardy. These both belong to the all-aged division, but Barnes will buy some two year olds in the spring. He is said to be worth nearly $40,000, and that will buy a good many horses, if not of the most fashionable strains.

Tom Hales, who rode The Admiral for Sam Cook's party in the late Derby at Melbourne, won his fifth Derby in seven years and his third one consecutively, his two previous victories being on Enaign in 1888 and Dreadnaught in 1889. Hales, who is a capital jockey on two-year-olds, also won the Maribyrnong Plate on Corvette. She is a racy-looking little thing and started at 7 to 1, the chief favorites being Submission, Ascot and Hartington. Corvette is by Martin Havey, out of Lady Vivian, the dam of Volley.

Senator Hearst recently purchased a very handsome yearling colt from Charles Reed, of Gallatin, on private terms. The youngster is by that big little horse Forester, and is said to be very shapely and of business-like formation.

The many friends of Mr. Jas. B. McDonald, of Marysville, will regret to hear of his recent bereavement. His wife, well known to all who have visited Marysville in early days, died here suddenly while doing her Christmas shopping last Saturday. She was an earnest, sincere Christian woman, and is mourned by a legend of friends.

The dam of Little Brown Jug was a great brood mare. She had nineteen foals, of which two died and four were mules. Of the remaining thirteen only six were never trained in the least. They are Little Brown Jug 2:11¾; Brown Hal 2:11½; Cooper's Jug, trial 2:28: Silver Jug, 2:36 trotting. Director's Jug, trial 2:31, and a gelding which was driven for three or four weeks by Mr. Brown and then sold. Her daughter Lizzie Moore, sister to Brown Hal, promises to be a great brood mare.

Mr. A. F. Baker, of Fresno, who recently returned from an Eastern trip, informs us that Mr. J. C. Sibley, of Sibley & Miller, of Franklin, Pa., will visit California after the holidays and make a general inspection of all the breeding farms. Sibley & Miller own ten Electioneer stallions, a larger number than is owned at Palo Alto. He is evidently in search of some suitable stallions for outcross breeding upon the daughters of those stallions.

A writer in the Sporting World visited the Hearst's stables at Coney Island and says that the big colt Tournament has greatly thickened and looks as big as a Cleveland Bay. Rhono has a big blister on his foreleg and shoulder. All the other horses are looking splendidly, more particularly Yosemite by Hyder Ali out of Nellie Collier by Joe Hooker. He is a tough and knurly sort of colt, and will evidently make a good campaigner. Ballarat, the most disappointing horse in the stable, is said to be wintering well and looking finely.

It seems, just now, a misfortune that Senator Stanford should have sold all of Beautiful Bells' sons by Electioneer Now that "the King is dead," it is doubtful which of his sons will prove his legitimate successor; and we have great faith in that Moor blood in Beautiful Bells. She was a trotter of high form herself, and her sire was by long odds a better horse than his performances in public would indicate. Guy Wilkes was a great performer and a good sire, but his son, Sable Wilkes, is outbreeding him beyond cavil. The Moor blood is a very good thing to have in a horse.

B. B., the mustang pacer, who loomed up in such great form during the past season, is not a beauty by any means. Orrin A. Hickok, who saw and drove against him in several of his races, says he is a chunky looking, ordinary kind of a customer; a bad roan in color, and not very prepossessing anywhere. Why, Adonis could always beat him, but had a bad knee in the last race. Adonis, by the way, is all right again, and is being given slow work on the Bay District Track.

The Grassland Stock Farm, of Indianapolis, has recently sold to the Pate Stock Farm, of St. Louis, a two year old filly, full sister to Wilkesbrino, 2:23, being by Hambrino out of Ella G. by George Wilkes, the price being stated at $3 50. The same concern has also sold to C. C. O'Fallon, of St. Louis, a yearling brother to the above named filly. for $5,000. He is said to be a very shapely youngster. The grand dam of these colts is the thoroughbred mare Widow Rantoul by Ulverston, son of Lexington and Utilla by Margrave.

Jay-Eye-See was by Director, his dam by Pilot, Jr., granddam by Lexington, and fourth dam by Wagner. Now Lexington was by Boston, he by Timoleon, son of Sir Archy, who was the son of Diomed. Now Wagner was by Sir Charles, he by Sir Archy and Sir Archy by Diomed, so that it will be seen that the great little black gelding was inbred to Diomed, the winner of the first English Derby in 1780, just 110 years ago last June. Palo Alto has the Diomed blood double also, his dam being by Planet, he by Revenue, out of Nina by Boston. Revenue was by imp. Trustee out of Rosalie Somers by Sir. Charles.

Gate money is a word wholly unknown at Gloucester, N. J. Admission to the track is free and it is kept up solely by the selling of privileges, such as pools, book-making, mutuals, restaurants, fruit stands and drinking bars. The track at Flemington, Australia, is free to such people as see fit to go upon "the flat," but the prices are five dollars to the grand stand, three dollars to the Maribyrnong stand, which is up the stretch and two dollars to the hill stand, which is about three hundred feet back from the track and nearly eighty feet above it. "You pays your money and you takes your choice."

The premier thoroughbred stallion on Marcus Daly's farm in Montana will be imported "The Chief of the Mist," who was foaled in 1882 by Blair Athol, dam Ma Belle (dam of Beau Brummel, etc ,) by Lord Clifden out of Dulcibella by Voltigeur. Where can a better stallion be found? His sire, a great race horse, dam by one of the horses of the age, both as a race horse and a producer, grand dam a well known race mare by the great Voltigeur, a race horse beyond dispute and the most fashionable strain in England to-day through his grandson Galopin, etc.

Carbine, winner of the Melbourne Cup, has started in 36 races, of which he has won 27, and has only run once unplaced. Dreadnought beat him twice, and so did Abercorn; Melos, Lochiel and one or two others scoring single victories over him. The Melbourne cup is his eleventh consecutive win, and probably the last, as he pulled up very lame at the finish. He was bred by the New Zealand Stud Co., which also bred Martini Henry, Matchlock and Nordenfelt. As a yearling, he was sold to Daniel O'Brien for 620 guineas. O'Brien then sold him in Nov. 1888 to Mr. Donald Wallace for 3000 guineas, and that gentleman has since won about £24,000 in plates and stakes with him.

The Christmas issue of the Chicago Horseman is as creditable a publication as has yet come to our table. It contains about a dozen trotting portraits, and while that department is complete, it is plainly to be seen that the galloping end of the publication has not been overlooked. The portrait of Glencoe looks as he might have looked at four years of age. He was 24 the only time we ever saw him and blind as a bat. The portrait of Lexington is a pitiful thing to contemplate, with his blind eyes and his head all swollen out of shape with the nasal disease that afflicted the Hero of Woodburn during the last ten years of his life. But it is a very faithful portrait, all the same. The Horseman is a paper that improves with age.

The following named gentlemen have been elected officers of the Sonoma and Marin Agricultural Society for the ensuing year: President, J. H. White; Vice-President, T. C. Putnam; Secretary, Thomas Maclay; Treasurer, the Petaluma Savings Bank. Prior to the election the Secretary read a letter from T. C. Putnam resigning the office of director to which he had been elected on the 6th instant. After the reading of the same Mr. Wilfred Page arose and said that inasmuch as Mr. Putnam had proven to be the "right man in the right place" he proposed that the resignation be laid on the table and placed the said T. C. Putnam in nomination for the office of vice-president, to which he was unanimously elected.

Some very noted performers have been sold for insignificant sums of money before their true greatness was suspected. The highest price in twelve trotting celebrities is $480, as given by Clark's Review, and the lowest was old Flora Temple. The following table gives the original sale price, and the records subsequently attained by these trotters:

Maud S. 2:08¼	$250.00	Rosa Wilkes 2:18¼	$400.00
Director 2:17	200 00	John W. 2:23¾	78 00
King Almont 2:21¼	200.00	Flora Temple 2:19¾	13.50
Epaulet 2:19	480.00	Majolica 2:15	400.00
Tucker 2:19½	2 50 00	Princeton 2:23	245.00
Noontide 2:20¾	100.00	Noonday 2:10¼	460.00

The following amendments to the National Association of Trotting Horse Breeders' Constitution were adopted at the recent meeting held in New York:

"At least one general meeting shall be held under the auspices of this association in each year, at such date and place and for such stakes and classes as shall be announced by the Executive Committee. Entries to be confined to animals owned and bred by members of this association or the get of stallions owned or stood by members."

"It shall be the duty of the Executive Committee to encourage the holding of trotting meetings of similar organizations throughout the country, upon such terms and conditions as to them shall seem meet and just."

Seeing the venerable Col. Jack Gambill on Bush street the day before yesterday, called to mind the famous old Southern race horse which Col. John Campbell named after him. The tracks in Alabama, Georgia and South Carolina are mostly laid on sandy soil, and while old Jack could not beat first-class cattle over the classic Metairie grounds, he could run so well in deep sand that nothing could beat him at Mobile, Savannah or Charleston. Well Jack's dam was the fifth dam of the mare Laura C, by Electioneer, which got a record of 2:29¼ about a month ago. We would not be surprised to hear that Laura C. had developed into a great mare at long distances. She is certainly "bred to the Queen's taste" and no road should be too long for her.

It is now pretty evident that Sunol will get below 2:10 before the grapes of 1891 begin to turn purple. Mr. Bonner is authority for the statement that she will not trot any more exhibition heats for gate-money; and that course being determined upon, it will be assured that none of those tedious journeys by rail, exposed to heat at nights, changes of climate and water, and a dozen other little trifles that "take the edge off" a fine racehorse. Those obstacles removed we look for her to equal the record of Maud S. before October 1891. She has already proven herself to be much faster than Maud S. was at the same age, and as for steadiness, there was never much to choose between them. Both are very high-lifed and full of that impetuous nature which denotes the presence of thoroughbred blood.

The Santa Rosa Republican has a "Young America" anecdote which is about as good as we have read in some time. A citizen of Santa Rosa lost a colt. It strayed away. His boy went to him and asked him how much he would give him if he would find him. The father replied he would give him a dollar. "But how much would you give another boy" queried the son. "I would give any other boy $2.50" replied the parent. It was not long before a neighbors lad appeared with the lost colt and the owner promptly paid the boy $2.50. Then the neighbor's lad went around the corner where stood the son of the man who owned the colt and divided with him. "That was not so bad" said the shrewd lad as he dropped $1 25 into his Christmas fund "and I am ahead of the governor two bits on the lead.

On the night of the 15th inst., there was shipped from Abdallah Park, Cynthiana, Ky., a car load of trotters to Los Angeles, Cal., in charge of Mr. Wilson's driver H. S. Shultz. The cargo consisted of the four high bred fillies purchased lately by Dr. K. D. Wise of Los Angeles, Cal., viz., Bonnie June by Simmons dam Bonnie Wilkes 2:28½; Adelaide Simmons by Simmons dam Adelaide 2:18; Adelaide McGregor by Bonnie McGregor, dam Adelaide, and Nevada 2:31½ by Simmons dam by Smuggler. Mr. Wilson sent along five of his own to get the benefit of the California climate, viz., the fast four year old gelding Greenleaf 2:22½, by Simmons; West Wilkes black stallion, record 2:28¼ by Simmons; Blackfield black colt by Simmons dam Belle Brasfield 2:20, second dam Sally Chorister dam of 2:20 and two brown weanling fillies by Simmons out of mares by Abdallah Mambrino.

The most fashionable road team in America, according to the verdict of the New York Horse Fair, is a black and-gray team called Brandy and Soda, owned by a Boston hotel keeper named Whipple. They are 16 hands high under the standard, and can trot on the road together in 2:45 to a heavy rockaway. Soda is the gray, and was bred near Kansas City. Brandy is the black, and was purchased in the neighborhood of Nashville. When they are driven tandem to a dog cart, Soda is the leader and Brandy goes into the shafts. They cost $350 for Soda and $450 for Brandy, and yet they are such a perfect pair of well behaved brutes that their owner has refused an offer of $7,000 for them. They took two blue and one red ribbon at the New York show, and their owner was so pleased with the way his coachman handled them, that he presented him with a check for $100.

Notwithstanding the fact that Carbine carried 145 lbs. in the Melbourne Cup, he was tipped as the winner by no less than four turf prophets in Melbourne, chief among which was Mr. Charles Linck, editor of the Sportsman. The next highest weight ever carried by a winner was 142 lbs. hy Archer, who won it twice. But in Archer's days the quality of horses was not up to the present standard, the fields were smaller and the system of training was vastly inferior to that of to-day. Some of the turf prophets tipped Chaldean who was in at 102 pounds, but he never showed in any part of the race. Another strong tip was out on Tantallon, by Wellington out of imp. Phizgig, but he died away at a mile and three-quarters. Strange that Correze, who ran all abroad in the Derby, should have gotten third money in the Cup in the fastest two miles ever made by horses in a bona fida race. There were 39 starters in the Cup.

Martin Loughlin, of Ballarat, who won the Melbourne Cup in 1885 with Sheet Anchor, has recently returned from England and was given a banquet on his return, at which some amateur vocalist sang "The Anchor's Weighed." The Sydney Bulletin suggests an amendment to the effect that "The Sheet Anchor's Weighed." We heard a good story of Martin not long ago. A colonial friend met him on the Boulevard Italian in Paris and asked him how he liked the gay French capital.

"Foine, sor. foine," replied the hero of Dowling Forest," but I enjoy meself betther in Melbourne."

"But I see you at all the theatres—you appear to be quite at home here."

"Throne for you," replied Loughlin," but I have been here six months. In fact, I've been here so long that I'm beginning to count meself as quite a Paris-ite."

S. A. Browne, of Kalamazoo, says, in speaking of dishonest practices among trotting drivers, that "Our great difficulty in this matter lies in the want of a reserve body of qualified reinsmen; the old-time drivers and trainers guard their secrets and methods with such jealous care that the rubber gets little or no chance to rise." This is a pitiable condition of affairs, but the worst part of it is, that it is all true. The cases of John Turner and "Knapsack" McCarthy are exceptional. They were pupils of a man whose nature was entirely free from any little petty jealousies. But their rise from obscurity seems to establish the truth of Mr. Browne's statement, rather than to refute it. The old-time trainers were careful never to teach their employes any more than they could possibly help, and therefore the supply was cut off at the source. We are of the belief that this way of doing business has deprived old trainers of many valuable coadjutors in times gone by.

The annual meeting of the Pacific Coast Blood Horse Association will take place on December 30th (next Tuesday), when there will be very important business to be discussed. Besides the election of officers for the ensuing year the discussion is sure to ensue as to where and when the next meeting will be held. Where is hard to decide, the Bay District track has practically ceased to exist; Oakland Trotting Park is hardly in a fit condition to accomodate a gathering of the elite of California, the stands and surroundings, (stables included) being in a very dilapidated state; and San Jose, Napa, Sacramento, and the other race tracks are "too far from the Bowery." Fruitvale is mentioned as a particularly suitable locality for a new track owing to the exceptional facilities afforded to would be spectators in the various modes of transit. A track will have to be built somewhere, and the sooner the better, for there is no doubt that with the right kind of people behind it will be a great success and a profitable investment. The Blood Horse Association should be the proper institution to build and run a race track, owing to their reputation and general standing in California, and certainly there is no lack of wealth among the individual members.

The glorious uncertainty of racing is well depicted by a writer in the Melbourne Sportsman, who shows the last eleven years and their results. proving that the favorits has only won the V. R. C. Derby four times out of eleven. He calls his table

THE FATE OF THE FAVORITE.

Y'r.	Favorite.	Winner.	Odds Against Favorite.
1880	Progress	Grand Flaneur	11 to 8
1881	Somnus	Darebin	5 to 2

1890	Annesley	The Admiral	5 to 2

Miss Maggie Thompson and Thomas P. Dudley, telegraph operators employed in Chicago, were arrested on the 17th at Chicago, for tapping the wires to send fraudulent results of races. The complainant in the case was the Western Union Telegraph Company. It is alleged in the complaint that the conspirators sent confederates to different pool rooms in Washington to buy pools on "short" horses. Then the pair of telegraph operators tapped the wires, sent the winners to correspond with their bets, cashed their tickets for large sums and after all this had been done and the conspirators had made good their escape the real race results were sent to the pool rooms. An investigation was set on foot and the conspirators indicted in Washington. Dudley claims to be a relative of Carter Harrison, ex-Mayor of Chicago; but that gentleman denies any relationship. He says that he knows who Dudley is and that his life has been such that no respectable person can afford to have anything to do with him.

The National Association of Trotting Horse Breeders has decided to offer three purses of $5,000 each, one for five-year olds that have not beaten 2:20 at four years; one for four-year-olds that have not beaten 2:30 at three years; and one for three-years-olds that have not beaten 2:40 at two years. Also a purse of $2,500 for two-year-olds that have not beaten 3:00 as yearlings. At the same time the Secretery was authorized to open a $25,000 stake for foals of 1891, to be trotted in 1894. An attempt was made to amend the constitution by striking out the section which prohibits pool selling, Paris mutuals and bookmaking at race meeting under the auspices of the Association, but it failed to pass. The question of punishing dishonest drivers next came up and Rev. T. A. Hendricks made a plea for measures that would protect owners of horses against dishonest trainers. He said he could prove by a number of gentlemen present that there were trainers who had robbed their employers.

W. H. McCarthy, commonly known as "Knapsack," comes as near being an all-around horseman as any man in America. He first worked as a groom under Daniel Mace, now deceased. Dan found him a willing student and a hard worker, and lost no opportunity to teach him all he possibly could. McCarthy has shown his versatility by training the thoroughbred racers owned by D. D. Withers, "the Sphinx of Brookdale," who is so well satisfied with him that he has reengaged him for the campaign of '91. McCarthy, who owns half of the mare Geneva S., has had her with him at Red Bank, N. J., all the season while he has been looking after the Brookdale stable of runners. She was to have gone into Doble's stable last spring, the people who owned the other half of her having accepted McCarthy's offer to sell his interest, but about that time some foreign parties were trying to buy the mare, and although McCarthy at one time said he would send her to Doble, she never came. Geneva lapped out Jack in 2:15 last year at Lexington, and has no record better than 2:19¼. Hence she is liable to sell for a good long price, if "Knap" concludes to part with her.

THE KENNEL.

Dog owners are requested to send for publtcation the earltest possible nottces of whelps, sales, names clatmed,presentattons and deaths, tn thetr kennets, tn all tnstances wrttting ptatnly names of stre and dam and of grandparents, colors, dates and breed.

Fixtures.

BENCH SHOWS.

1891.

The Buckeye Poultry and Pet Stock Associatton's bench show, Caton. O., December 30 and .1, and January 1, 2 snd 3. James Sterling, Secretary.

Michigan State Pouttry and Pet Stock Assoctation's twelfth annual bench show, Jackson, Mich., January 7, 8, 9, 10, 1t, 12, 13 and 14. S. H. Sltfer, Secretary.

Centrat Clty Kennel Ctub's tnaugurat bench show, Jackson, Mtch., January 10, 11, t2, 13, and 14. Dr. E. L. Ktmball, Secretary.

Sonth Carottna Poultry and Pet Stock Associatton's Internattonal Exhtbttion, Charleston S. C., January 13, 14, 15, 16 and 17. Benj. Mc. Innes, Jr., Secretary.

Loutstana Poultry and Pet Stock Assoctatton's first anuual bench show, New Orleans, La., January 20, 21, 22, 23, 24 and 25. A. E. Shaw, Secretary.

Etmtra Poultry and Pet Stock Associatton's bench show, Elmtra, N. Y., January 21, 22, 23, 24, 25 and 26. Carl Hart, Secretary.

Sonth Carotina Kennel Assoctatton's tnangural bench show, Greenvtlle, S. C., January 27, 28, 29 and 30. F. F. Capers, Secretary.

Westmtnster Kennel Club's fifteenth annual bench show, New York, February 24, 25, 26 and 27. James Morttmer, Supertntendent.

Marytand Kennel Club's second annual bench show, Baltimore Md., March 3, 4, 5, and 6. W. Stewart. Diffenderffer, Secretary.

Duquesne Kennet Ctub's tnaugurat bench show, Pttsburgh, Pa., Marth 10, 11, 12 and 13. ——, Secretary.

Massachusetts Kennel Clnb, Lynn, Mass., second annual bench show, March 24, 25, 26 and 27. D. A. Wtlliams, Secretary.

New England Kennel Club's seventh annual bench show, Boston, Mass., March 31, Aprtl 1, 2 and 3. E. H. Moore, Secretary.

Caltfornta Kennel Club's bench show, San Franctsco, Cal., Aprtl ——, 1891. J. B. Marttn, Secretary.

Clevetand Kennel Olnb's fourth annuat bsnch show, Cleveland, O., Aprtl 1, 2, 3 and 4. C. M. Munhall. Secretary.

Mascoutah Kennel Ctub's thtrd annual bench show, Chicago, Ill., April 8, 9, 10 and 11. G. H. Goodrtch, Manager.

FIELD TRIALS.

1891.

Southern Sportsmen's Associatton's annuat field trial, Lafayette, La., January 13. John K. Rensud, Secretary.

Pacific Kennel Club's etghth aunual field trtals, January 19, Bakersfield, Cal. H. H Brtggs, Secretary.

Southern Ftetd Trtal Ctub's thtrd annual field trtals, New Albany, Mtss., February 2. T. M. Brumby, Secretary.

Meeting of the American Kennel Club.

HELD AT ITS ROOMS, 44 BROADWAY, NEW YORK CITY, THURSDAY, DECEMBER 11, 1890.

In the absence of both the President and Vice President, Mr. James L. Anthony was elected as Chairman.

Present: Associate Member, J. L. Anthony; Associate Member, A P. Vredenburgh; American Fox Terrier Club, W. Rutherford; American Beagle Club, H. F. Schellhass; American Pet Dog Club, Dr. M H. Cryer; American Spaniel Club, J. Watson; California Kennel Club, Max Wenzel; Gordon Setter Club of America, L. A. Van Zandt; Louisiana Poultry & Pet Stock Association, A. H. Vanderpool; Maryland Kennel Club, Jas. Thompson; National Greyhound Club, L. C. Whiton; New Jersey Kennel Club. A. C. Wilmerding; Rochester Kennel Club, W. Whitney; South Carolina Poultry & Pet Stock Association, Dr. H. C. Glover; Tolodo Kennel Club, Dr. H. T. Foote; Westminster Kennel Club, H. B Cromsell.

EXECUTIVE COMMITTEE.

Mr. August Belmont Jr. presiding. Present—Associate Member, J. L. Anthony; Associate Member, A. P. Vredenburgh; American Fox Terrier Club, W. Rutherford; American Beagle Club, H. F. Schellhass; American Pet Dog Club, Dr. M. H. Cryer; American Spaniel Club, J. Watson; California Kennel Club, Max Wenzel; Gordon Setter Club of America, L. A. Van Zandt; Louisiana Poultry and Pet Stock Association, A. H. Vanderpoel; Maryland Kennel Club, Jas. Thompson; National Greyhound Club, L. C. Whiton; New Jersey Kennel Club, A. C. Wilmerding; Rochester Kennel Club, W. Whitney; South Carolina Poultry and Pet Stock Association, Dr. H. C Glover; Toledo Kennel Club, Dr. H. T. Foote; Westminster Kennel Club, H. B. Cromwell.

Credentials of delegates to represent different clubs were read as follows:

American Spaniel Club, James Watson; Louisiana Poultry & Pet Stock Association, A. H. Vanderpool; Maryland Kennel Club, James Thompson; Rochester Kennel Club, W. Whitney; Toledo Kennel Club, Dr. A. H. Foote; Westminster Kennel Club, H. B. Cromwell; Gordon Setter Club, L. A. Van Zandt; Kansas City Kennel Club, Major J. M. Taylor; English Setter Club, Wilson Fiske, Youngstown Kennel Club, John A. Logan. Credentials accepted.

A communication from Mr. C. J. Peshall, of December 11th, 1890, was read and placed on file.

Minutes of previous meeting read and approved.

Mr. Max Wenzel stated that Mr. Peshall had said to him that he had been disqualified at a meeting of which he had no official notice and no opportunity to defend.

Mr. Wenzel stated further that he asked President Belmont at the meeting of the Executive Committee (at which Mr. Peshall was disqualified) if Mr. Peshall had been notified to attend, and that Mr. Belmont replied that he had, and for that reason he had voted for his qualification.

Mr. Belmont stated that if he did make that statement he considered that Mr. Wenzel's question referred to the meet. of the Advisory Committee, which meeting he was possitive Mr. Peshall had been invited to attend, and not to the meeting of Executive Committee.

On motion of Mr. Antony the meeting of the Executive Committee adjourned, and the meeting of the Association resumed. Mr. Belmont retired after requesting Mr. Antony to take the chair.

The reading of the Amendments to the Constitution and By-laws was taken up.

Constitution, as Adopted by the American Kennel Club.

ARTICLE I.

The name of the Association shall be "The American Kennel Club."

ARTICLE II.

The object of this Association shall be the protection of the mutual interest of its members. It shall admit such clubs to membership, or persons as associate members, as may be deemed desirable. It shall adopt and enforce such rules as shall tend to uniformity in the regulations governing bench shows and field trials, and to the proper conduct of persons interested in the exhibition, breed or sale of dogs. Furthermore, it shall publish an official Stud Book and a Kennel Gazet,e.

ARTICLE III.

All regularly organized clubs or associations in the United States or British American Provinces which have held Bench Shows or Field Trials, or for the purpose of holding Bench Shows or Field Trials, or for the improvement of any breed of dogs, and associate members as hereinafter provided, shall be eligible to membership.

ARTICLE IV.

SECTION 1. The regular annual meeting of this Association shall be held on some day in February, March or April of each year at such time and place as shall he designated by the President; thirty days' notice whereof shall be given and published in the Gazette.

SEC. 2. Each member of the Association shall have the right to be represented at the meetings of the Association, or of the Executive Committee, by one delegate duly authorized and his appointment certified to by his club secretary, excepting the delegates of the associate members provided for in Article XI. Before such delegate shall be entitled to qualify in the Association, he must be accepted by the Association, or its Executive Committee.

SEC. 3. At any special or regular meeting of this Association, nine members shall constitute a quorum.

ARTICLE V.

SECTION 1. The management of this Association shall be entrusted to an Executive Committee, consisting of one delegate from each club and the delegates of the associate members; and no delegate shall represent more than one club.

SEC. 2. The Association shall elect a President and Vice-President.

SEC. 3. The Executive Committee shall appoint a Secretary-Treasurer, who shall, under the direction and supervision of the Advisory Committee, perform the duties pertaining to the office.

SEC. 4. Regular meetings of the Executive Committee shall be held at the time of the annual meeting, and quarterly thereafter, on such dates as may be designated by the President, twenty days notice of which shall be given to members.

SEC. 5. The President may call a special meeting of the Executive Committee or of the Association at such time as he may deem expedient; and he shall call a special meeting upon the written request of seven members within fifteen days of the receipt of such request. At special meetings no other business shall be transacted than that for which they were called, and such business shall be specified on the calls, which shall be sent out ten days previous to the time appointed for the meetings.

SEC. 6. At any regular or special meeting of the Executive Committee seven members shall constitute a quorum.

ARTICLE VI.

The President shall preside at all meetings of this Association of the Execu ive Committee, and of the Advisory Committee.

The Vice-President shall, in the absence of the President, perform the duties pertaining to that office.

ARTICLE VII.

SEC. 1. The Secretary-Treasurer shall keep records of all meetings of this Association, also of the Executive Committee and of the Advisory Committee; and he shall issue calls for such meetings. He shall keep a roll of membership, and take charge of all papers belonging to the Association, and dispense the same under the direction of the Advisory Committee. Furthermore, he shall transact all other business, and fulfill all further duties of his office, or others which may be directed by the Executive Committee or Advisory Committee.

SEC. 2. He shall have the supervision of the publication of the Stud Book and Gazette, subject, however, to instructions from the committees responsible for said publications.

SEC. 3. His remuneration from the Association shall be fixed and determined upon by the Advisory Committee.

SEC. 4. He shall be required to execute a bond of indemnity in favor of the President of the Association to an amount not less than $2,500, before assuming office. Such bond must be satisfactory to the President of the Association.

SEC 5. He is prohibited from acting as a delegate either for a club or for the Associate members.

ARTICLE VIII.

Applications of clubs for membership shall be made in writing to the Secretary of the Association, accompanied by a copy of the applicant's Constitution and By-laws, a list of officers, and a full year's dues, and an election shall be held at the next meeting of the Executive Committee, provided said application shall have been filled with the Secretary at least ten (10) days previous to said election. It shall require two-thirds of members voting to elect.

ARTICLE IX.

SEC. 1. The Executive Committee shall have power by a two-thirds vote to suspend for a stated period or to expel any club or delegate or individual whose membership it may deem prejudical to the welfare of the Association.

SEC. 2. Any person may, in the interests of the Association, prefer charges against another person before the American Kennel Club. Or charges may be preferred before said Club when the conduct of any individual has been, or is, questionable, provided such charges are made in writing. All such charges except matters within the province of the Stud Book Committee to investigate, shall be heard at the first opportunity by the Advisory Committee; from whose decision an appeal may be taken to the full Executive Committee.

No person shall, however, be disqualified or deprived of any privileges without due notice, and formal charges with specifications have been made and an opportunity has been given him to be heard in his own defense.

ARTICLE X.

SEC. 1. The annual dues of clubs shall be $10, payable on or berore Jan. 1st. Any Club failing to pay ssid dues within the specified time shall forfeit all right to representation in this Association, and such club may be suspended or dropped from the roll.

SEC. 2. The Executive Committee shall have the right to make one assessment during the year, not to exceed $10.

ARTICLE XI.

SEC. 1. Any person who is vouched for in writing by not less than two members of any club a member of this Association, or by two Associate Members, shall, upon payment of $5 annual dues, to the Secretary of the American Kennel Club and the endorsement of his application by the President of the American Kennel Club and the President of the Associate Members, become an Associate Member and be announced as such in the next issue of the Kennel Gazette.

SEC. 2. An Associate Member shall be entitled to the Kennel Gazette and Stud Book for the current year for which his dues are paid, also to two free registrations in the Stud Book during said year.

SEC. 3. The annual dues of $5 shall be payable to the Secretary of the American Kennel Club, on the first of January of each year, and any person whose dues are not paid on or before January 20th shall thereby forfeit his right to be included in the list of members eligible for election to office and entitled to vote for officers for the ensuing year; and if his dues shall remain unpaid at the next annual meeting of the Associate Members his name may be stricken from the roll, provided, however, that upon remitting the $5 dues with an application of membership he shall be reinstated upon the endorsement of his application by either of the two Presidents as herein before provided.

SEC 4. The annual meeting of the Associate Members shall be held on the day proceeding the annual meeting of the American Kennel Club. At said meeting the reports of the retiring officers shall be presented, which, together with a copy of the official minutes of the meeting, shall be filed with the Secretary of the American Kennel Club.

SEC. 5. The officers of the Associate Members shall be a president a vice president and a secretary. The president shall be a member of the Advisory Committee. The Associate Members shall have the right to be presented by three delegates; to which position the officers may be elected. And for every one hundred members over three hundred they shall elect an additional delegate.

Sec. 6. That all elections shall be by mail vote, and the annual election of officers and delegates shall be conducted as follows:

On January 21st of each year, the Secretary of the American Kennel Club shall forward to each and every Associate Member in good standing a printed list of all members eligible to hold office, together with an addressed envelope, for return, on which the word "vote" is legibly printed or written. The members receiving the said printed list shall mark thereon, in such manner as may be requested, their choice for president, vice-president and secretary, and the delegates to which the Associate Members are entitled, and return the same in the envelopes provided.

Fifteen full days after the mailing of such printed list to the Associate Members the Secretary of the American Kennel Club shall, in the presence of Presidents of the American Kennel Club of Associate Members, or such persons as they may deputize to represent them, open all such mail votes; and the result of the counts shall be certified to by the three officials present.

Immediately upon the signing of such certificate the Secretary of the American Kennel Club shall notify all who have been elected; and shall, also, send the results of the ballot to the President of the Associate Members.

In the case of a tie for any office, the tie shall be decided by a majority vote of the members present at the annual meeting; and in event an officer declines to serve, the member receiving the next highest number of votes shall at the annual meeting be declared elected.

The election of additional delegates to which the Associate Members shall be entitled, as herein before provided, shall be taken as soon as each additional quota is filled; and it shall be conducted by mail vote, the same formalities being observed as when the annual election of officers and delegates take place. Identicalty the same method shall be employed in electing delegates to fill vacancies which occur among the officials or delegates.

ARTICLE XII.

SEC. 1. An Advisory Committee of five, consisting of the President and Vice-President of the Association, the President of the Associate Members, and two other delegates of the Association shall be members, shall be elected at each annual meeting.

SEC. 2. It shall have the power to act upon all cases of protest and appeal; to investigate and act upon all charges prefered against active or associate members, or individuals; and shall be vested with the powers of the Executive Committee during the interval between the regular quarterly meetings, subject, however, to the final action of the Executive Committee.

SEC. 3. It shall have the management of the Kennel Gazette.

ARTICLE XIII.

The business management of the Stud Book shall be subject to the direction of a committee of three, elected by a majority of the delegates present at the annual meeting of the club, and shall render an account of its proceedings to the Executive Committee at each meeting.

ARTICLE XIV.

This Constitution and the By-Laws and Rules may be revised or amended, provided thirty days' notice has been given to all members of such proposed revision or amendment, by a two-thirds vote at any meeting of this Association where at least two-thirds of the members are represented, or by obtaining within thirty days, through the Secretary of the club, of at least two-thirds of the members of the Association, a ratification of any enactment of any revision or amendment of the Constitution, By-Laws or Rules, duly proposed and carried by a two-thirds vote of any meeting of the Association.

The amendments to the By-laws were also read and adopted as follows.

BY-LAWS.

SEC. 1. The following order of business shall be observed at the meeting at this Association:

1. Roll Call.
2. Reading Minutes of previous meeting.
3. Secretary's Report.
4. Treasurer's Report.
5. Election of officers and committees.
6. General Business.
7. Adjournment.

SEC. 2. The following order of business shall be observed at the meeting of the Executive Committee of this Association;

1. Roll Call.
2. Reading of Minutes of previous meeting.
3. Secretary's Report.
4. Treasurer's Report.
5. Report of Standing Committees.
6. Report of Special Committees.
7. Unfinished Business.
8. Election of Secretary-Treasurer.
9. New Business.
10. Adjournment.

SEC. 3. In the event of an appeal from an order of suspension imposed hy a Show Committee, or hy the President, or by the Advisory Committee, it must he heard at the next regular or special meeting of the Executive Committee, and any person who is proved to the satisfaction of the committee to have been guilty of fraudulent or indiscreditable conduct of any kind, may be declared ineligible to compete or win a prize at any show held under the rules of this Association for such period as the Executive Committee may decide.

All complainta or disputes between membera of tbia Association shall be decided by those members of the Executive Committee who are in no way connected with the olnbs interested.

SEC. 4 The President ahall appoint from the Executive Committee snoh special committeea as shall be found necessary.

SEC. 5 Tbese By-Laws may be altered, amended or snapended without notice, at any regular meetiug of the Executive Committee by two-thirds vote of the members present, or at any special meeting on no'ice.

In executive session the Secretary read hia report, which showed that tbe Central City Kennel Club of Jackson, Mich.; the Deleware and Susquehanna Poultry and Pet Stock Association of Bingbampton, N. Y.; tbe Indiana State Poultry Aasociation, Indianapolis, Ind., and tbe Bull Dog Club of America, had made application for memberahip. Mr. Oldham has been disqualified. Recommended that a committee be appointed to consider tbe matter of holding a show at Chicago in connection with world's fair.

A suggestion from Mr. F. H. Meroer that the clnb would adopt a scale of the value of wins at our different shows, so that a win at a small show may not be of equal value as one at one of the leading ahows.

Tbe treasurers report showed the receipts from all aources from January 1st to date to be $8,679,33. Expenses for same period, $6,192.16. Balance on hand, $2,487.15.

At this poinl, Mr. C. J. Peshall appeared and addressed the meeting, and then witbdrew. The Chair permitting him to proceed, there being no objection made by the delegatea, and no further action had in his case.

Resolutions of condolence with the president of the club on the death of his father were read and adopted.

Tbe clubs above mentioned as seeking admission, were admitted. A. P. VREDENBURGH, Secretary.

Why Some Bench Shows are Failures.

A writer in the Fanciers Journal gives some oogent reasons why the Pbiladelphia Kennel Club does not propose to give a show during the coming spring. He allegea that each show has been literally given to the people of that city, and that the cost to the clnb of tbe gift has been all the way on each occasion from $1,500 to $2,000. He now says that the clnb he thinks has given enough, and that he for one is out of the giving business.

The only method he suggests by which a show may be secured in tbe future is by the raising of a gnarantee fund of of $1,500 or $2,000 to cover the estimated deficit which the clnb has been called upon to meet after their several annual bench shows heretofore held. Now wbat can be tbe difficulty. In field trials tbe members of tbe P. K. C. are active if it indeed it may not be said that they lead many other kennel organizations in the country, The writer who signs his article by the pertinent cognomen of "Had Enough" alleges that the Quaker City is the leading one of the country in doggy matters.

It is evident that the reasons for failure from a financial point of view must be attributed to other cansea than that of the lack of numbera of kennel men and exhibitors as compared with other oities, where bench ahows have been and still are being carried on to the satifaction of the treasnry of the several organizations under whose anspicies the showa are held.

Bench shows are not dissimilar to other forms of amnsement and entertainment which appeal to tne public for patrouage and popular support. All men are not dog fanciers, and indeed the public are sadly lacking in knowledge concerning the merits and character of our four-footed companions.

The management of a bench abo w is peculiar. The public must be educated, and by judicious advertising and appeal, must be awakened to an interest in theae exhibitions before they will attend them. Any ahow will fail no matter what its merits may be nnless it is liberally, judicicusly and attractively advertised. We cannot believe tbat to-day, failure would result in an exhibition of this kind in any city in America possessing anything like the population of Philadelphia, if the event was announced as it shonld be, and the pnblic be assured that the show contained matters of interest nsual to all bench sbowa.

The eminent succeas of bench showa in other cities, nnder far less favorable ciroumstances than those which shonld obtain in the city of "brotherly love" go to prove conclnsively that there is a screw loose somewhere in the management of the benob shows of that oity. It is nndonbtedly true that bench ahowa in other places have met with financial failnre, and onr remarks as to "a acrew being loose aomewhere" will apply to them with equal force.

We have seen successful ahows, and wherever they have been attended with failure, the canse ooald, with a reasonable degree of certainity, be attribnted to the weather or more often to lack of proper management or a false economy in advertising.

Remarkable Cass of Surgery.

The following account taken from the Stock Keeper, shows what surgery can do for a disabled dog:

We came across a case of canine snrgery the other day which is at once extraordinary in itself, and should point out to dog owners not to despair when their pets get injured badly. The patient is a liver and white Field Spaniel bitch, and is owned by Mr. Hayward, of Dudley. A few weeks ago thia bitch strayed from home and returned in about a week'a time in a pitable pligbt, a large portion of her upper jaw waa entirely taken away, and her mouth and lips were in a terribly mangled and crushed state, beaides other minor injuriea.

She had evidently strayed on to the railway, and had been run over by a passing train, and then in all probability had in a frenzied atate made off no one knows whither. Being a favorite, her owner determined to try and save her, and aent her to Mr. Abraham Green, veterinary surgeon, of Dudley, who at once anbjected her shattered jaw to a critical examination. He fonnd a piece of the left upper jaw gone, and another large fragment, which included the canine tooth and two othera, with the adherent bony parts, opening right into antrnm, cracked so badly that to reunite it was impossible.

This piece he took right away from the jaw, and stiching the mangled and partly-aevered lipa together, left the rest of cnre to natnre and the proper styptic dressings. We have seen thia bitch on two occasiona, and the fleah aronnd the jaw has quite healed up, and ahe is able to eat bread and milk. Tbe injury to the fleshy parta of the lower jaw and lips are not quite healed, but there is no donbt but that a cure will be effected in a very short time.

Names Claimed.

Mr. P. D. Linville claima the following names for a litter of puppies by Dan Gladstone out of Florine; WARSPITE for a black and white dog; GLADYS G for a black and white bitch; NATALIE for a white ticked bitch; FLAKE G for a snow white bitch; DOTTIE DIMPLE for a white and ticked bitch and BLOOD ROYAL for a white and ticked dog.

The Occidental Coursing Club.

The Occidental Coursing Club will hold its annual meeting on Tbursday, January 1st, at Newark.

Greyhonnds owned by membera of tbe olub only allowed to oompete. Entrance $5. Entries close and drawing takes place on Monday evening at 8:30 P. M., at the club'a rooms, No. 21 Kearney street.

An unusual interest haa been taken in this meeting and the public will be given one of the finest exbibitions of the year on the coursing field. The grounds are in splendid condition; a large number of exceptionally fine hares have been secured, and in short nothing bas been left undone to make the meeting a success. All communioations should be addressed to J. F. Carroll, Secretary, 21 Kearney atreet.

Anatin B. Sperry of Stockton will rnn Count Dick, his pointer dog, in the Field Trials in January.

George T. Allender left on Friday last for Bakersfield with his field trial doga, eight in nnmber. The dogs show carefnl preparation, and George looka the picture of health and determination to win. He will do his training from now on at the Wible ranch, a few miles out from Bakersfield.

Dr. Davenport of Stockton writes that he has a little red cocker, aired by hia Bronta ont of Senora that will be a nail driver. Tbe Doctor says he is a specimen of the right type. One thing certain, his breeding is of the best, both Bronta and Senora having been imported from Canada last fall.

The St. Louis Republic, of the 19th instant, says that Mr. M. E. Ellison, of Hutchinson, Kansaa, Preaident of the National Coursing Association is in that city for the purpose of looking over the gronnd with a view of removing the headqnarters of the association to that point. A meeting was to be held on Monday last to determine the matter.

Mr. Campbell of Oakland has two very nice cocker spaniels, which he is very fond of. Mr. Campbell does not breed, but only keeps his spaniels for private hunting, and he pronounces them a good all-round gentleman's hunting dog. His liver and white dog Teddy is a very snperior retriever, being an exceedingly game little fellow.

Chief of Police Tompkins of Oakland takes a great deal of pride in ahowing aome fine specimens of the English Pug family to his frienda. Mr. Tompkins recently imported a dog and bitch, the latter being a good typical animal, of the right aize and markings. An effort will be made to have these arrivals exhibited in April, there having been only one pug benobed in 1889 at the Pacific Kennel Shows.

Admirera of English Mastiffs are making some choice importations of late. Since the death of Scott'a Dick last year, a really good Stud Mastiff was hard to find, and outside of Mrs. Preston's Actress, there were very few desirable Mastiffs in the State. Mastiffs are preferred by many on aoconnt of their comparatively close flat coat being mnch easier kept clean than the long haired St. Bernard or Newfoundland dogs.

The importation by Mr. Jamea E. Watson, of his famous brace of pointera we trust will give impetus to this splendid class of dogs. Recently there has been considerable inqniry for pointers at this office; setters, English and Irish, have heretofore been the leading favorites on the coast. It would seem that as the tender cockle-burr increases, together with other plagues of a similar natnre following in the pathway of the cultivated field tbat the smooth-coated pointer wonld come in for his fnll share of attention.

It is to be hoped that the devotees of the bench shows within onr State will aee to it that full reciprocation is manifest in the entriea of the two shows to be given dnring the apring. Coming as they do shortly after the dates selected for the Denver benoh show, it wonld not be at all snrprising to find a number of entries made in California from dogs entering at that exhibition. In any event there should be a well marked interest by the dog men of this aection and those in the sonthern part of the State, in making entries both at this place and at Los Angeles. Let us have the full force of the bench ahow interest represented at each point.

In training a dog, one cannot exerciae too much patience. One thing only should be tanght at a time, and this should be taught thoroughly, For inatance, you take up the lesson of dropping. Let yonr dog become thoroughly versed in this leaaon before you attempt to teach him anything else. After teaching him to "charge" at the word, teaoh him to drop at the motion of yonr hand, follow this by teaching him to drop to shot.

Alwaya call yonr dog by name. Let him become familiar to all commanda by name and in the field, when working with other or competing dogs yon will have less tronble. Don't be in a hurry, teach the same lesson over and over, again and again, until your dog is thoroughly under command. It will pay in the long run, and is in fact the only way to train a dog snccessfully.

THE GUN.

Special Announcement.

Next week we will begin the publication of a series of articles on "The Pleasanton Marshes," from the pen of that well known writer and thorongh sportsman, Mr. J. A. A. Robinson. Mr. Robinson handles tbe subject of Suipe and Suipe shooting in a manner wbich cannot fail to arrest tbe attention of every lover of the gun and dog. His descriptions of this interesting sport are vivid and life like, and cannot help but interest every lover of field sports. Ten years ago at the trap he beat every trap shooter in California, and for years had a standing challenge to shoot a match with any man in the world with the Winchester repeating rifle. The many friends of this celebrated sportsman will be gratified to have the opportunity of reading these splendid articles.

Extra numbers of the BREEDER AND SPORTSMAN containing these highly interesting and instructive contributions should be ordered at once. None should fail to aecure them as they will prove not only interesting, but invaluable, to every sportsman.

Field Trials at Bakersfield.

Tbe Pacific Coast Field Trial Club's eighth annual field trials will take place at Bakersfield on the 19th of January. It is evident from the extensive preparations which have been made for this event, that it will prove of surpassing interest. Tbe indications are that a large number of our sportsmen will attend on this occasion. There is probably no section of the country so admirably adapted for the successful conduct of field trials as the gronnds chosen for this meeting. Tbe number of splendid field dogs entered for this contest will insure a grand display of superior field work. Tbe birds are nnusually plentiful, and every circumstance portends a glorious time for all who may take advantage of being present to witness the sport on this occasion.

Every Day Life of Our Birds.

THE HERMIT THRUSH.

This bird is not as much of a recluse as hia name would indicate, for often have I been awakened early on a spring moruing by his clear, bell-like notes just outside my window. However, aa a usual thing, be prefers the edge of some shady woods iuto which he can retire in the heat of the day.

When singing he selects a leafy bough high up in the world where he can see and yet not be seen, and from which he can thrown his silvery notes far and wide. This thrush continues to sing late in the summer, and it is only when the cool nights warn him tbat it is time to be preparing for his long journey sonthward that his voice is stilled.

He is very shy and wild, and it is difficult to approach him. When, however, he is surprised, he atands perfectly qniet, trusting to his coat of dark olive for concealment among the leaves.

His food consists of insects for whicb he searches among the dead leaves.

OLIVE BACKED THRUSH.

This birds resembles the Hermit Tbrush so much in song and appearance that they are both known to the people by the apellation of Swamp Robin. There are, however, so many differencea in their characters and habits that I easily distinguished their different modes of life, although I have met the birds nnder discussion but a few times.

The Hermit Thrush prefers a deep woody retreat, generally of a awampy character; the Olive back is more often met with in the thinly wooded highlands.

The Hermit Thrnsh seeks his food on the gronnd among the fallen leavea and pine needles; the other prefers to feed on the ants and inaects wbich infest the branches of treea.

I met with an interesting family of five of these birds once on Mackinac Island. The old birds were at first very suspicious, bnt when one ot the half fledged yonng found ita way to our poroh, the mother followed, and perching on a convenient bnsh, nsed all her arta to induce the prodigal to return. He, however, declined, seeming to prefer the society of man, which to him had aa yet no terrors, to that of his wilder or more prudent mates. Finally I threw him into the alr; the parent was immediately at his side, guiding his flight to the safer confines of the wood.

BROWN CREEPER.

On some morning in early April, when tbe birds have hardly arrived and when the rough Marcb winds have not ceased to blow, take a walk into the nearest orchard.

By close observation you will find a quaint little bird aitting, mayhap, on the very spot on which but a moment before your eyes were fixed. Aa long as he imagines danger from yonr presence, he remains nearly motionless, hitching aideways little by little untit he has gained the other side of the tree, when he will steal silently away.

If however he is not auspicioua, yon may have a very good opportunity for observing his habits At first he alights on the trunk of an old apple tree, and ascending in a spiral manner, picks off the insects with which he meets, ever and anon apringing into the air to snap up a fly. On gaining the top of tbe tree he flies hurridly to the next alighting on it as before. In tbis manner he very qnickly goea through an orchard, doing almost incalculable good in destroying its yet undeveloped pests.

Even during migrations when other birds travel in compact flocka thia speeiea ia aeldom found in banda of two or three, and even these aeem to have come together more by accident; drawn by the abundance of food in a particnlar spot than by a desire for each other'a company.

BROWN THRASHER.

This mnaical bird has so wide a reputation that he is honored in aome parts of the country with the title of "Brown Mooking bird."

After escaping from the alnahy, mnddy payments of the city breathing the pure freah air and absorbing the genial aunshine with deilght, one feels that he could remain forever aitting nnder the same buah listening to tbe grand anthem of praiae presented by the feathered creation.

Each bird, no matter how amall, contributes his part, seeming to play a kind of accompaniment, aa it were, to those royal aongatera.

Foremoat among them all ariae the notea of the brown thrasher, claiming your attention by their novelty, and holding their chief charm in the fact that they are ao different from, and yet ao like tbe strain of every other bird. On first hearing it one would be strongly tempted to believe that the trasher ia really a mocker, but on listening to several individuals yon are convinced tbat it is truly original. If I had the power of describing the songa of birds I might attempt to convey aome idea of this, but as I have not, I mnst

simply content myself with advising you to go and hear for yourselves.

The brown thrasher frequents the solitary trees and sections of scrub oak from which here and there rises a lone tree, which seems just placed for singing purposes.

The flight of this bird is generally very short and when on occasion he is forced to go some distance he does so in a rather labored manner after the flight of a crow. They obtain their food by scratching on the ground.

Grand Rapids, Mich. STEWART E WHITE,

Squirrels as Travelers.

"I remember," said Colonel S. O. Gregory to the writer hereof some days ago, "the splendid shooting which we enjoyed in northern Indiana some 20 y are ago. The country about my old home was amply supplied with marshes. If it rained but little, the conditions for duck, goose and snipe shooting in season was rendered all that the most ardent sportsman could desire.

"It was no uncommon thing for one to go out and score such bags as would now seem to be wonderful feats of sportsmanship.

"The proximity of that portion of Indiana to Lake Michigan, made it the natural stopping place for all aquatic birds in their annual flights across the country. It seems to me now that they were much more plentiful then than now, although those same grounds are still capable of furnishing first class sport.

"One of the remarkable features of those early times was the great abundance of squirrels. These little animals, you know, migrate in great bodies, from reasons which I am not prepared to state, but I do know that when they once took it into their heads to travel, that they set about it in a business way, and would allow no obstacle to turn them out of their course. I have seen some twelve or fifteen of them, on such occasions, on one little tree. They would run along the fences, perch on the stumps of the field which they might chance to be crossing, and one could kill all of them they desired in a few moments.

"Well, I presume there comes to none of us through life scenes which equal those of our childhood."

Shameless Sportsmanship.

An exchange gives the following account of a royal hunt, "For unprecedent slaughter the record made by the Prince of Wales and party, including Baron Hirsch, Lord Dudley, Col. Clarke, Col. Payet, Col. Ellis, Mr. Reoben Laseon and Mr. Ronald Monorieffe, stands without an equal Hungary is famous for its amount of game, and, of course, on this occasion very special efforts were made by Baron Hirsch to see that the Prince had the best obtainable. The total list is as follows, from October 7 to 28: Partridges 21,218; hares 5,754; pheasants, 4,109; rabbits, 508; various, 77; total, 31,666."

We sincerely trust that the game of America may never be subjected to the senseless and wanton slaughter evidenced by the above item.

Whenever our game laws are made to serve such a purpose their utility to the public will have come to an end.

We trust that such provisions may be made as will preserve the game for the use and recreation of the public at large and not permit the control of it to fall into the hands of a few who may shock every fair minded man with the accounts of such murderous events.

Serious Accident to a Hunter.

A Vacaville dispatch says: "On Monday afternoon while Joseph Collins, a prominent orchardist, was out hunting, in attempting to cross a creek in Gates canyon, he slipped on some boulders, and both barrels of his double-barreled shotgun were discharged. The entire load of one barrel entered the back part of his left leg just above the knee joint, producing a wound about as deep and thick as a man's hand, cutting the flesh completely away to the bone. Medical aid was summoned as soon as possible, and the wounded man was conveyed home. No serious results are at present apprehended, although in all probability Collins will be badly crippled.

Owing to the fact that we present the constitution and by-laws of the A. K C, a number of our communications are crowded out this week together with other items of interest.

Some shameless wretch has been slaughtering ducks on the Sacramento with a swivel gun. Thousands of these birds have been thus killed during the past week. The sportsmen of Sacramento, have taken steps to stop this class of work.

The boys of Green Valley are having a remarkable time hunting coons. During the past few days their record runs up to the number of twenty-eight coons, which have fell before them. There is much of genuine sport to be derived from a coon hunt.

The Santa Rosa Democrat says: "John Cooper and party returned Tuesday from a hunting trip to the coast, bringing six deer and three bear with them."

Isn't it about time to cease killing deer? The open season closed on the 15th of December, and we trust that we shall hear that the law is being observed. It may possibly be that the deer referred to were killed before that time.

In this day of travel, when so large a number of our population are living at the hotels of the country, it is pleasing to find hostelries of superior merit. Such an one is "The Southern" at Bakersfield, this state kept by that genial friend of the travelling public, Mr. John C. Morrison. Guests stopping there are always rendered comfortable in all respects. Our friends travelling in that direction are recommended to give it a trial.

On last Monday, the family of D. M. Carithers heard a crashing of glass in the direction of their conservatory and on investigation were astounded to find a wild spike buck in the interior of the conservatory among the flowers. It was a strange sight to find a wild deer in a conservatory in the heart of a city of 10,000 inhabitants. The buck had evidently been chased by hounds from the mountains. It was finally killed after escaping from the flower house. The occurrence of an age.

A large number of our sportsmen are spending their holiday vacations in the fields and marshes after game. Duck and snipe shooting continue good, with a fair quantity of geese and brant thrown in by way of slight diversion. Good retrievers are in demand for this work. From this point northward, along the coast and on the marshes and lakes of the interior the Chesapeake Bay dog should come into general use for this class of shooting. They are a natural duck and water dog, can stand work in ice cold water all day, being strong, vigorous and active, with a world of endurance. They are superior as retrievers.

We are glad to note that a number of sportsmen of Stockton have clubbed together and purchased a registered Chesapeake Bay dog. In this movement, the names of James H. Budd, Dr. S. N. Cross, R. R. Smith, George Atherton and C. C. Moore are given. The dog purchased is Tide, registered number, 15,903, and is expected to arrive soon.

There is no questioning the fact that these dogs are peculiarly fitted for the sport of duck shooting and for all classes of sport where water retrievers are desirable. They are a rough looking dog, the element of beauty playing but a small part in their appearance; the outer coat is of rough, coarse hair, while beneath this is a fine, thick coat, resembling the fur of water animals, which is oily and impervious to water. They will plunge into ice cold water, and stay for an indefinite length of time, suffering no chill or inconvenience from the bath. They will dive for a wounded duck with the agility of an otter. They are just the dog for this and the more northern coast.

They are the only distinctively American species of the dog family, having originated on the Chesapeak Bay by a cross with a wild or native dog of that region with a species of uncertain origin introduced by the French priests who landed there in an early day. The inner or fur coat is the result of the cross with the wild dog of that region.

ROD.

The United States Fish Commission.

The generality of the public may be in ignorance of the fact that the study, culture and bearing of the fish industry stands to-day as one of the leading features of the government which has for its object the benefit of our people as a whole, and that it is steadily advancing to a still more prominent and important position.

The United States Fish Commission has three large steamers, one sailing vessel and three railroad cars for the purpose of distributing fish. The work is prosecuted by a number of well versed scientists whose work is largely composed of the study of the various food fishes together with the work of exploration in the seas, lakes, gulfs and rivers of the country. Their object being to obtain and promulgate a knowledge of the location, food, habits and nature of the several classes or species of useful fishes; to observe the direction and currents of the winds and of the waters and prepare and publish such charts and data as will prove of benefit to the country.

The culture of fish is carried on at more than a score of hatcheries located at different points over the country. In this respect their labors have been invaluable in building up the fish supply of the country and in aiding and assisting the several State Boards of Fish Commissioners in their work.

Work of the U. S. Fish Commission.

The distribution of young fish to stock the streams of the various States which have been exhausted of their original supply through neglect of their protection and from other causes, seems to be becoming one of the most popular, at least one of the most interesting, branches of our government, says the St. Louis Republic.

A few years ago the people in the Middle and Western States knew little, and possibly cared less, about this comparatively new industrial branch of Uncle Samuel's big farm. But of late years there has been a steady and growing demand for a means of replenishing the streams of the States in the Mississippi basin, and the Fish Commission, under the direction of Commissioner McDonald, has been trying to supply this demand by sending out cars loaded with young fish, to be distributed where there was a demand. The business grew and it became necessary to establish hatching and supply stations in the interior of the country, those on the Atlantic seaboard not proving equal to the emergency. In consequence, there have been stations established in the great lake basins, on the Pacific Slops and Mississippi Val- There are 22 in the United States at present, the majority being in the New England States.

"There needs," said the Commissioner, "to be three more yet established, one in the Southeast, one in the South, and another in the Southwest."

A new station has just been completed this year at Neosho, Mo., and the first lot of fish hatched there are ready now for distribution, as follows:

Seven hundred and fifty lake trout, 10,000 Von Behr, or common European trout; 20,000 rainbow trout, 9,355 touch and 13,674 goldfish.

There is no demand, either public or private, to any extent for the two latter varieties, but the trout are all to be distributed this winter. The 750 lake trout will be placed in streams in McDonald County, Missouri. The 10,000 Von Behr, or European trout, will be distributed about equally in streams in Jasper and McDonald counties, Missouri, Benton County, Arkansas, and in tributary streams of the Osage River, along the line of the Kansas City, Springfield and Memphis Railroad in Missouri, and the 20,000 rainbow trout in ponds in Coffin, Meade, Reno and Leavenworth counties, Kansas, Benton and Washington counties, Arkaneas, and ponds in Missouri, and about half in the Osage river basin in streams along the lines of the K. C. S. & L. R. R. and the railroads running north from Neosho.

One thousand of these rainbow trout will be retained as breeders, there being a larger demand for them than any other fish. They are hardy, rapid growers, and fine flavored fish. The most popular fish, however, in Missouri, Arkansas, Texas and Kansas, as indicated by the statistics, is the black bass, and it is closely followed by the crappie. They are hardy, good growers, attaining a good size, and, as all anglers know, are a fair game fish. With the exception of Illinois, the bass, trout and crappie largely outnumber any other fish distributed. In that State the pike perch seems to be a favorite, there being 7,170,000 distributed, being considerably over 7,000,000 majority of any other fish distributed. Illinois leads the list in the total number of fish distributed in the States of Texas, Arkansas, Iowa, Missouri and Illinois. The pike perch were distributed in no other State in the list named. Following is a table showing the total number of fish distributed in the States named, and aside from the pike perch distributed in Illinois, the black bass, rainbow trout and crappie seem to be largely the favorites. Table showing total number of fish of all kinds distributed: Missouri, 21,404; Texas, 3,904; Arkansas, 2,006, Kansas, 6,395; Iowa, 25,237; Illinois, 7,208 334. Total, 7,267,280.

Sea Fishing Tackle.

The following suggestions are taken from the notes of a correspondent in Fishing Gazette, and as we deem them eminently practical, we commend them to our readers:

A streaming collar is a useful piece of gear for small bottom fish. It is somewhat on the principle of a mullet trace, but longer, and the arrangement of the lead is altered, becoming in fact an elongated flying collar. The streaming ground collar will answer well enough for whiting, dabs, flounders, etc. One can be thus made. Procure a paternoster lead of about three or four ounces—one with a hole through it will be the best; then get a piece of hard brass wire about No. 18 B. W. G., about four inches long; solder one end into the lead, and turn a long eye in the other end; to this eye both the reel line and streaming line can be attached. The latter is to consist of a yard of gimp (No. 0), then a swivel; next to this a trace of either stout single or twisted gut, three yards long, terminating with a loop; along the length of this gut six loops should be made, to which hooks snooded on short bits of twisted gut should be attached, another hook on strong single gut being fixed to the terminal loop of the collar.

The most convenient way of keeping, or rather stowing, such a trace as that just described is on a piece of cork. At any tool shop a suitable cork may be bought, as they are used by carpenters for glass-papering up their work. These corks may be had of various sizes, so that a convenient piece may be easily selected. If two or three hollow grooves be filled in each end, two or three traces can be wrapped on one piece, the hooks being stuck into the cork. A similar piece will be also convenient on which to wind the paternoster.

Probably the most killing of all methods is the paternoster. The whiffing line accounts for a good many bass or pollack, but it has to be used from a moving boat. The advantage of the paternoster is that it may be worked in waters of any depth. The same remarks apply to the ledger, but the bait being below the lead, it is only of use when fish are feeding at the bottom. Whichever method be adopted, the rod should be fitted with a stiff top, and it must be borne in mind that the larger and heavier the bait and lead, so much stiffer must be the rod. The rod suitable for this purpose is that previously spoken of with the stiff top.

I would suggest that the end fitting on the stiff top should be of the pattern devised by Mr. A. W. Parker, of the Gresham Angling Society. It is a pulley arrangement, and is an excellent precaution against the otherwise inevitable cutting of the top ring, which is sure to occur in deep sea fishing. In hauling in an 18lb or 20lb. cod, or any other heavy fish, it will be found a valuable addition to the sea angler's outfit.

Instructions have already been given for making a paternoster, but the rod fisherman cannot do better than send to Carter and Peek for one made similar to the pattern I use; one of these, made in twisted treble gut, with three swivel spreaders, hooks, and three or four ounce lead, complete in a tin box, will cost only eighteen pence The mullet trace previously mentioned can be used as a light paternoster by removing the bottom hook.

Where the bottom is not foul or weedy, I am very partial to a paternoster. This kind of line is preferable for fishing off piers or quays, in quiet water and gentle eddies, or inside a harbour's mouth, and enables one to take a greater variety of fish that any other. In a very heavy tideway it is not to be recommended, as the heavy lead necessary to keep the bottom would put too much strain on the rod point. The lead should just touch the bottom and the line should be kept taut.

The paternosler lead is usually of a pear or fig shape, but really any lead of the requisite weight will answer the purpose. The ordinary form has a bass wire eye soldered into the apex, but a flat ledger lead on a short sling, or a bullet fitted up in similiar manner, will answer as well. The weight required is just sufficient to keep the lead on the bottom, and to allow of easy casting; any beyond this is unnecessary.

The sinker generally attached to a float line is either the barrel lead, fitted with a brass wire eye at each end, or the pipe lead, which has a hole running through its entire length. The weight should be from 1oz. to 2oz.. according to circumstances. Small bullets or lead wire wrapped round the collar will effect the same purpose.

For catching eels or flat fish, and at the mouth of the river occasionally bass, the rod ledger is a very useful piece of tackle. The lead for this purpose is preferably flat, the shape frequently known as the "coffin" lead being suitable. This lead, which may weigh about an ounce and a half to two ounces, should be strung on a yard of grimp (patent by preference). The strength of this grimp must be regulated by circumstances; but as a rule No. 0 will be generally useful. At each end of the grimp are loops; just beyond one loop a split swan shot is to be fastened on, and a similar shot about 18in. further along the grimp. Between these two shots the ledger lead will have play. Below the lead will be another yard or grimp, or stout gut terminated by the usual gut or grimp mounted hook.

This tackle being cast out, the lead is allowed to rest on the bottom. When the bait is taken, the line is drawn through the lead for some fifteen inches, and the fisherman is immediately made acquainted with the fact by feeling the pull of the fish. Another hook may be added to the discretion of the angler, near the junction of the reel line with the ledger line. This tackle will also answer for a heavy float tackle. If a brass swivel be attached to the top loop, and above this another long loop of grimp be placed, this modified tackle will answer for float collar, spinning trace and ledger line.

To the telling of lies there is no end. The lightening rod agent, the wind mill vendor and the sewing machine man, have been accredited with standing well at the head of the list as experts of the art. True, the position of these gentlemen has been warmly contested by the circus poster and the advance agent of the theatrical company, but they all are thrown into shade by the newspaper paragrapher. As an illustration we commend our readers to the following which we clip from an eastern exchange:

"A huge trog fish was caught near the Wildwood pavilion in Cape May county, Monday, which was opened by the editor of this paper and found to contain twenty-five canvas-back ducks, full grown."

We do not doubt the story, but if we were the guardian of a boy who was a born liar, and we wished to stimulate and enlarge his natural abilities in this direction—in short to graduate him in the profession, we would place him under the tutorage of this recorder of unusual events.

Grim's Gossip.

H. E. McClellan, of Plumas County, has taken several trotting horses to Red Bluff, where he will exercise them during the winter months.

Treasure, b h. by Aberdeen out of the dam of Alabaster 2:15, is located at Greenwood, Missouri. He will be given good opportunities in the stud hereafter.

Astoria, own sister to Dexter 2:17½, is the property of David Bonner, of New York. She is in foal to Kentucky Prince and will be bred to Ansel 2:20 this year.

John Elliott Thayer, a retired Boston merchant, has been elected President of the New England Association of Trotting Horse Breeders. C. M. Jewett was re-elected Secretary.

Speaking of Mr. Valensin's stallion Sidney, the Horseman says "He has commanded public recognition by sheer force of his splendid intrinsic merit and stands to-day unmatched and alone among sires of his age.

Mr. Salisbury has made a handsome offer for two Director youngsters owned by the Coombs Bros., one being out of Lilly Stanley and the other out of Dolly McMann, but the price was refused; $2,000 was the sum tendered.

Money is no object when Wilkes blood is for sale. D. B. Powers, of Springfield, Ky., has recently sold for $5,000, the mare Zudoo Wilkes by Ferguson Wilkes out of Little Woful. She has a record of 2:29 made in the fifth heat of a race.

Mr. Mulkey visited the Stock Farm of Mr. Judson one day last week and took home with him the Wildidle—Fedora IV colt which he purchased some time ago. Cy reports him as a grand looker, with back and loins that cannot be beat.

John T. Manlove, of Indiana, has lost by death the four-year-old stallion Colonel Sprague, a grandson of Governor Sprague. This makes three stallions valued at $12,000 that Mr. Manlove has lost since November 10th. This shows that "misfortunes never come singly".

Doctor Shepherd, the well known veterinary surgeon at the Coney Island track, is operating upon Sorrento (brother to C. H. Todd, winner of the Chicago Derby) who is suffering from bad hocks. Sorrento was a good deal better horse than Todd, but never had his good luck.

Immediately after the holidays there will be an influx of Eastern visitors, all of whom will want to get a line on the California stock that is going to be sent back East for sale. Some of the owners of breeding farms on the other side of the Rocky Mountains employ regular touts for that purpose.

The owner of the pacer Crawford 2:15, will let him make a short season at his home in Pennsylvania. He is confident Crawford can equal the 2:08¼ of Roy Wilkes, as he paced a half mile in 1:05¾ with only three week's work. Crawford is but five years old and has plenty of time to improve.

The great question now-a-days in the old Pine Tree State, where they pry up the sun with a crow bar, is, Who has the best Nelson colt? One of the most enthusiastic breeders in that State is Mr. A. R. Yates, of Waterville, who owns a quartz mine about three hundred miles from Cape Town in Africa.

Last week we published a list of trotters that are likely to start in the California Circuit next year and undoubtedly there are some few mistakes. Those of our readers who may have discovered errors are requested to apprise us of them so that the names may be republished with no mistakes whatever.

Walter Gratz has decided to sell of a lot of his thoroughbreds next month by auction, and eight will be offered on the block at Guttenberg, two of which are California-bred. One of these is the Earl by Warwick, out of Lady Middleton by Hurrah, and the other is Discount by Sir Modred, out of Premium.

Jacob Ruppert, the millionaire brewer of New York, has succeeded in getting a price on the world-famous trotting stallion, Nelson. The price named is $135,000 and yet there are those who believe that Ruppert will pay the price asked, enormous as it seems. A few seasons at $1,000 per mare would soon repay the outlay.

Mr. Shaw of 1621 Market street, San Francisco has a road horse for sale, which he is anxious to sell at a reasonable price. This roadster can show a 2:40 gait, is of good disposition and a lady can drive him. Any person looking for a good fast horse cannot do better than examine the one that is now offered.

The two Nutwood stallions, Baywood and Fleetwood, owned by E. S. Smith, San Jose, are offered for sale this week, and as Nutwood blood is now so much sought after, the advertiser should have little or no trouble in disposing of the two horses. A full description of each and their pedigrees are given in the notice.

William Hendrickson, the old time trotting horseman, and former owner of George M. Patchen Jr., Washington and other good horses, is seriously meditating a trip to British Columbia with a stable of trotters. Mr. Hendrickson says he thinks there should be a great field for trotters there, and will probably take a trip north in the forthcoming spring.

Mr. Joseph H. Neal writes us to say that the total winnings of Margaret S. for 1890 were $13,595, instead of $12,020 as stated by us last week. This was taken from an Eastern paper which, Mr. Neal thinks, had not heard of this famous mare's winnings on her own native soil during the season just closed. We are only too much pleased to make the desired correction.

A dispatch from Paris, Ky., says that Gray & Harris, of that place, will probably have the stallion king, Nelson, 2:10¾ to make the season of 1891 at their establishment near Paris. It is stated that James O. Gray, of Boston, one of the firm, is a personal friend of Mr. C. H. Nelson, and as the latter is desirous of having his great horse stand in the Blue Grass Region, color is lent to this report.

This is the season of the year when owners of stallions are laying their plans for next year and it may not be out of place to suggest that at the office of the BREEDER AND SPORTSMAN every facility may be found for preparing stallion cards and advertisements. Pedigrees are arranged and work completed in a manner that defies competition, while prices are as low as consistency will permit of.

Humphrey Oxenham was having a remarkably busy time on Melbourne Cup day when a lady speculator kept bothering him as to what he was laying about certain horses. Oxenham lost his patience at last, and upon her asking him, "What price Little Bernie?" he replied: "If you only go away I will lay you a hundred pounds to nothing!"—and the wager was actually booked in her name.

George Johnson, one of the New Jersey bookmakers arrested on a prosecution instigated by Peter Delacy, was tried and found guilty of violating the gambling act of that State. He was ably defended by J. M. Kallisch, of Newark, but the jury found him guilty after thirty minutes deliberation. An appeal to the Supreme Court will be taken at once, until that is decided, the other 36 bookmakers will not be tried, this being a test case.

The Sioux Falls (Dakota) papers tell of a stallion kept their for service that is a carnivorous animal and will eat five pounds of raw beef at a single feed. He is said to be perfectly kind and gentle, and was never known to kick or bite anybody. Just the same, I don't care to own a bull devouring horse like that. Oats are worth less than two cents per pound and beef is worth about six, hence there is no money in a blood drinking quadruped such as this one is.

When Mr. Archibald started week before last for Australia, he took with him one of the sulkys manufactured by W. E. Shaw, of 1621 Market St., this city. Several well known horsemen were present when the purchase was made and one and all declared that for good servicable work and lightness in construction no superior sulky had ever been sent from the East. As Mr. Shaw's prices are somewhat lower than those asked by agents of eastern firms, it would be well for horsemen to pay him a visit.

An interior newspaper, in speaking of the horses at the Napa track, says:

"First of all is the famous broodmare, known by all turfmen, Dolly McMann. Her pedigree is too well known to enter into details."

We will take it as a favor if you will forward the pedigree to this office, and undoubtedly the Coomba Bros will be highly gratified at receiving information which they have tried for years to obtain.

There are cranks of all kinds and in all sorts of business, but the worst crank of the lot is one that starts in on horse pedigrees, and thinks he knows it all. A new light in the pedigree firmament is one that claims to have all of the original papers in regard to Waxy, the grandam of Sunol, and is only asking the modest sum of $10,000 for them. It is true he has offered to take less, and is at present in correspondence with Mr. Bonner, to whom he hopes to sell the document; as yet, however, he has found no one on this side of the mountains that is willing to come to his terms.

During the late meeting of the Pacific Coast Blood Horse Association a large sum of money was paid out in the various stakes and purses, and we herewith give the amounts won by each stable. Appleby & Rose $3,039; Palo Alto $2,615; P. Siebenthaler $1,815; C. Mulkey $1,585; L. U. Shippee $870; W. L. Appleby $500; Westley George $405; Piedmont Stable $350; J. F. Foster $325; Elmwood Stable $261; Matt Storn $187; Gus Walters $175; T. S. Montgomery $155; E. D. Paddock $125; R. P. Ashe $100; Dennison Bros. $95; Fashion Stable $75; H. D. Miller $63; Lone Star Stable $45; J. W. Harper $25.

Mr. E. F. Thayer of Riverside, has been in the neighborhood of San Francisco for two weeks or more, looking for a couple of stallions, and has finally purchased from A. W. Foster of San Rafael, the standard horse Rafael 9215, by Fallis 4781, dam Stockton Maid, (dam of Old Nick 2:23) by Chieftain 721. The gentleman has also bought from A. H Hecox, the four year old pacing stallion Harry H, by John Sevenoaks, (son of Nutwood 600) dam Jane McLane (dam of Jim Mulvenna 2:27¾) by Budd Doble 3764. These two well bred horses will be taken South in the course of a few weeks, and next year will make the season at Riverside.

Johnny Dickerson has purchased for $1,800, of Smith & Reynolds, Los Angeles, Cal, the four-year-old stallion Stamboul Jr. 10142, by Stamboul, 2:11½, dam Flower Girl by Arthurton; second dam Flora by General McClelland; third dam by Langford, son of Williamson's Belmont. This is richness for you, and the colt is individually right up with his breeding. Johnny is terrible sweet on him, and thinks as much of him as he does of Rhody Patterson, he having refused an offer of $4,200 for him within a week after the purchase. The colt will be prepared this winter for some of the rich five-year-old stakes of the coming year.

It is said that a two year old stepmother is to be found on the farm of B. F. Townsend, of Garden Grove, Orange County. One of his mares died, leaving a colt six weeks old. The colt was adopted by a two year old filly, at whose teats he niggled away until he brought milk into them and has had all the lacteal food he requires. The filly has never taken the horse and yet the colt, now five months old, is thriving splendidly. A similar case was reported in Tennessee about the close of the civil war, but in that case the filly was a year older. There is every once in a while a miracle like this, as for instance, a mare mule owned by Major Samuel J. Hensley, gave birth to a colt in 1861 and everybody who saw it agreed that it was gotten by a stallion and not by a jackass.

An exchange says, How the mighty have fallen! Once used to ovations that a king might covet, now fallen from his high state and none so poor to do him reverence. A little over a year ago the old campaigner, Joe Davies, 2:17¼, winner of 115 heats better than 2:30, of the Hartford $10,000 purse and many a well fought battle, when the heats were split and many was sold in the Cambridge City sale for something like $800. The word comes that all this season under the management of Frank Wallingford, Boston, Mass., the old hero was masqueraded through the New England circuit, sweeping everything before him in the 3 minute and other slow classes. No class was too slow or none too fast. One day known as George Hall, the next as Billy Terrell, and then as Senior Boy, and many was the bright dollar that was raked off. The first week out the conspiratora came near running against a snag in the person of "Circus Charlie," who knew the horse in the days of his triumph. Charlie, however, was willing to "do business" and was let into the game. The New England circuit skinned, a ringing tour was started through the South, but at Charleston, S. C., old Joe, carrying 30 ounce shoes in front with 8 ounce toe weights, found the deep sand, hard lines, and a break down was the result, which will release him for all time from the ringing gang.

At Woodland, on Saturday last, there was a mixed race between trotters and pacers, between Barry's b m Nellie and Harry Edmund's h g Claude, pacers, and Brown's b g Snap, trotter. The race was won in three straight heats by Nellie, who was admirably driven by Peter McGinnis; time, 2.40, 2:37½, 2.39½. The second race was a mile and repeat between three roadsters, Fred, Diamond and Stamboul Jr. Fred won both heats as he liked in 3:13½ and 3:24½. The last race was a single dash of a mile between Midnight and Buckley's Diamond, the latter winning in 3:07. There will be more trots there on New Year's Day. Yolo County has already turned out some very good horses at both gaits, and we see no reason why she should not rival Santa Clara and Los Angeles.

The belief is current that Nelson's expulsion from the trotting tracks will be rescinded and that Nelson will be reinstated before the close of 1891. At the same time we do not see how the Board of Appeals could do less than expel both the horse and his owner. Mr. Nelson was charged with having bought the race and admitted having done so, therefore there was nothing left but to punish him. In this connection we come to the statement of John Splan, who says he got $500 to drive Alcryon in case he was called on by Mr. Noble, a call which never came. The Yorick of the Turf further says that he was satified Nelson could win the race and bet the $500 on him accordingly. He denies that the $500 was paid him expressly to "stand down" and not drive Nelson. Having accepted the contingent fee from Noble to drive Alcryon if needed, of course he could not touch Nelson.

A gentleman writing from the Blue Grass region says "Several of our most prominent and successful breeders are beginning to experience like misfortunes of a year ago. Their mares are beginning to abort. We have had no severe weather that would cause such mishaps, and the care and attention given mares in this section this season is far better than that of any former one. With the losses of last year still upon the breeder, and the like now staring them in the face, it is enough to cause alarm and make them distrust the business. Fortunes were lost by mares slipping, and some smaller breeders, who were just beginning in the business with bright prospects, have to sell their mares in order to keep up and prevent the sheriff doing it for them. This malady certainly bodes no good, and is to be deplored by all men throughout the country, whether interested in the horse business or not."

The sudden appearance in this city of two Melbourne sporting celebrities, without previous notice, may not have anything to do with a story narrated by the Sydney Bulletin. It says that a certain bookmaker laid a young man in Melbourne £500 to 1 that he could not name the winners of both cups—the Caulfield and Melbourne. The young man named Vengeance and Carbine. After Vengeance won the Caulfield Cup, the punter laid off 250 against 40 to enable him to "stand on velvet" for £250. This transaction was had with another bookmaker and when Carbine won the Melbourne Cup the young man went around to collect his £500 and found that his "hookey" had emptied the city of his presence. He is now engaged in finding money enough to enable him to pay the £250 he owes against Carbine. There is no use in compelling bookmakers to give bonds in Australia as the courts will not hear suits brought to enforce bonds given for such purposes.

Of all kite flying schemes growing out of an over-indulgence in nerve food, the great (?) meeting to be given by C. W. Williams, of Independence Iowa, during August next, takes the palm; says the Terre Haute Express. The Barnum theory that the people like to be humbugged has long since been adopted as a guiding principle by amusement managers, but Proprietor Williams goes them one better and not only proposes to humbug the public but those furnishing the amusement, the horsemen. He is out with nine so-called $5 000 stakes and proposes to give others varying from $5,000 to $10,000 each until the grand total of $75,000 is reached, and if one would believe the horse papers that are unbaidized with advertisments, it is a great piece of enterprise, unequalled in the history of the trotting turf. Surely a Moses come to lead the trotting interests out of the wilderness, where it was want to put up all the money, into the promised land of large stakes and low entrances. This sounds all very nice, but fine words and many do not butter parsnips and the horsemen of the country will not be landed with a bare hook. The following two conditions are the milk in the cocoannt, and have been added recently: "Right reserved to refund amount of payment in any above stake, should they not fill reasonably well." "Above are not guaranteed stakes and in no case will more than $5,000 be paid in any stake." Here we have the old game of "heads I win and tails you lose". Under these most liberal conditions it is to be wondered that Mr. Williams did not make his stake $100,000 each, they would surely sound bigger and not cost him a red cent more. However, he should be commended for permitting the horsemen to put up all the money, and allowing him all over. Some people might have wanted the owners to throw in the horses also. Mr. Williams only wants and will be satisfied with a sure thing.

A story that is going the rounds of the press to the effect that the stallion Onondaga (by Lexington out of Susan Beane by Lexington) which was blinded by a surgical operation to prevent him from killing his grooms, has recovered his sight and can see as well as ever. Dr. C. W. Ahy who was then superintendent for Frank B. Harper, the owner of Longfellow and Ten Broeck, told us that he was present when the operation was performed which consisted in chloroforming the horse and puncturing the ball of each eye with a needle. The horse was afflicted with a peculiar disease, which rendered him not only unmanageable, but a dangerous animal to a groom, and no less than three man nearly lost their lives from the effect of his viciousness. The veterinarians called in by Mr. Young said the horse must be blinded by an operation or killed outright. Being highly prized in the stud at McGrathiana, Mr. Young did not want to lose his services, and therefore as above stated, consented to the operation prescribed by the surgeons.

The press, all over the United States, denounced the operation as one of the greatest cruelty, at the time; and some of them went so far as to predict failure as a breeder for Mr. Young. His sagacity as a breeder has become fully vindicated by "the inexorable logic of events," as Onondaga has not only become gentle as a lamb, but is achieving the most remarkable success in the stud. The New Orleans Times Democrat actually sent one of its staff to Mr. Young's farm (the old Price McGrath place), to ascertain the truth or falsity of the story. The reporter says that Onondaga can see as well as ever he could and that, while he is not as savage as when he first went into the stud, he is still a very dangerous horse and one that cannot be trusted.

THE WEEKLY

Breeder and Sportsman.

JAMES P. KERR, PROPRIETOR.

The Turf and Sporting Authority of the Pacific Coast.

Office, No. 313 Bush St.

P. O. Box 2300.

TERMS—*One Year, $5; Six Months, $3; Three Months, $1.50.*
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter, addressed to JAMES P. KERR, San Francisco, Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

NEW YORK OFFICE, 177—179 BROADWAY.

ALEX. P. WAUGH, - - - - - Editor.

Advertising Rates

Per Square (half inch)

One time	$1 50
Two times	2 50
Three times	3 25
Four times	4 00

And each subsequent insertion 75c. per square.
Advertisements running six months are entitled to 10 per cent discount.
Those running twelve months are entitled to 20 per cent. discount.
Reading notices set in same type as body of paper, 50 cents per line each insertion.

To Subscribers.

The date printed on the wrapper of your paper indicates the time to which your subscription is paid.
Should the BREEDER AND SPORTSMAN be received by any subscriber who does not want it, write us direct to stop it. A postal card will suffice.

Special Notice to Correspondents.

Letters intended for publication should reach this office not later than Wednesday of each week, to secure a place in the issue of the following Saturday. Such letters to insure immediate attention should be addressed to the BREEDER AND SPORTSMAN, and not to any member of the staff

San Francisco, Saturday, Dec. 27, 1890.

'Neath Holly Sprays.

The yule log burns brightly on the brazen audirons and the peal of the Merry Christmas chimes will have died away on the frosty midnight air before this issue of our paper shall meet the searching glance of its readers. In all the fair lands of earth where Christianity has trampled down bondage and let in the light of liberty, Christmas Day is holy in the hearts of mankind.

On the empire of the Prince of Peace the sun never sets, for when midnight hovers over San Francisco, the sun, with an impartial glory, lights up the spires of Melbourne and Sydney. And wherever the English tongue is spoken, orisons of praise arise from palace and cottage alike; and we feel that the cradle song of the lowly Nazarene was not sung in vain.

And while you are sitting in your peaceful and comfortable homes, there may be frail forms fainting at your door. The prosperity you enjoy may be something that is to them a half-forgotten tradition of days that can never return. Charity is the noblest of all the virtues that make up the sum total of Christianity, and there is no season more appropriate for its bestowal than the present one. And to all our readers, high or low, rich or poor, we send forth our heartfelt wish and ever-present thought, "A Merry Christmas and a Happy New Year."

The Washington Park Club.

In an appropriate column will be found this week an advertisement anent the annual meeting of the Washington Park Club announcing a series of stakes, entries to which will close on January 15th, 1891, to be run at their summer meeting of that year. Twenty-five days' racing will be given with more than $110,000 in added money to stakes and purses. Those who are in the habit of making entries for the racing meetings of Eastern Associations will see that the Washington Park Club has this year materially added to the amounts given to certain of the stakes. An increase has been made in the Wheeler Handicap, the added money in that now being $5,000. The Great Western, the Oakwood and Boulevard have each been increased $500, while four others have been increased $250 each. Those who are interested will observe that in all of the stakes mentioned declarations are permitted for a very small forfeit, giving owners a good opportunity to make entries now, and if their favorites do not come up to expectation they can be declared out for but a trifle. The Chicago organization is one of the most progressive turf clubs in the United States, and as it has always in the past received a generous support from horsemen in California, there is no reasonable doubt but that the present programme will have many entries from the Pacific Coast.

Subdividing the Standard.

Subdivision or reduction of the 2.30 standard by which trotting horses are rated, seems to be one of the probabilities of the immediate future. When sires like Alcantara, Nutwood, Egbert and Electioneer, can put their progeny into the 2:30 list at the rate of one score in a single year, it becomes evident that some new test must be adopted to create a proper distinction between the highly bred trotter and the horse of obscure lineage which, through skillful training, invades the hitherto sacred seclusion of the 2:30 list. It is the opinion of many competent breeders that before long the high prices for trotters, now prevalent, must decline owing to an overstocked market. A man breeds a Conestoga work mare to a highly-bred trotter and her filly foals to another. He keeps on this course of procedure until by the fourth cross he has a 2:30 trotter and that trotter, if a stallion, is liable to become a prepotent sire. Hence these breeders, in whose ranks are many men of the highest order of intelligence, predict a forthcoming collapse in the present high prices for standard-bred trotters.

This is no exaggeration and no fanciful way of treating a sober subject. It deals with a live question, meeting it squarely; and while we believe that highly-bred sires, like Electioneer, Guy Wilkes and Stamboul will always get better trotters than the non-standard-bred sires, yet "the woods are full" of horses who have performed well and whose lineage is enshrouded in obscurity. This is especially true of horses bred east of the Hoosac mountains and it is impossible for any intelligent horseman to read Leidsley's book on the "Morgan Horse" without being convinced that half the early New England pedigrees are the most stupid of forgeries. Of course, we do not impute any complicity in those forgeries to the compiler of that book. He probably solicited information for his book and took it just as it was given him. But the "faked" pedigrees remain there just the same.

Therefore we say that the progress of breeding trotters has advanced so rapidly that the standard mark must either be reduced to 2:25 or else the 2:30 standard, if it be retained, should be subdivided into the following subclassifications:

Standard A. All horses that trot in 2:15 or better in harness or in 2:18 or better to wagon.

Standard B. All horses that trot in 2:20 to harness and outside of 2:15; and all that trot in 2:23 or better to wagon.

Standard C. All horses that trot in 2:25 to harnesss or 2:28 to wagon and outside of 2:20 in harness.

Standard D. All horses that trot in 2:30 in harness and outside of 2:25, and in 2:33 to wagon.

It has either got to come to this or the standard must be reduced from 2:30 to 2:25. There are more 2:20 horses to-day than there were 2:25 horses in 1880, and the standard must either be lowered or subdivided. In 1850, a horse was called a trotter if he could do a mile in 2:40 or better. Now 2:40 is simply a roadster's gait and 2.30 horses are more abundant than 2:40 horses were then. When it is possible for horses nine years old to have four representatives in the 2:30, as Phallamont and Sidney have already done, it will be seen that some change for the better must be made and that right speedily.

In another portion of this issue we publish an article written by one of our staff, showing the progress of the American trotting horse, from Boston Blue (the first horse to beat three minutes) down to Maud S., the only one that has beaten 2:10. It shows what patient study and diligence will accomplish, and leaves the shrewd observer to cogitate upon what must be the standard twenty years hence, if the 2:30 trotters increase as rapidly in the next decade as they have done in the past five years.

So far the actual wealth of the nation, in the way of trotting horses, has been but little augmented except as poor men have bred fast horses and sold them to people of wealth. But now the exportation of trotters to Europe and South America, bringing back solid bullion for their purchase, is beginning to cut an important figure in "the balance of trade." Men of wealth in France and Germany, more than in England, are paying the highest prices for American trotters and large shipments are being made to those countries every year. It is through such exportations that the material wealth of the country is being reinforced by the importation of bullion rather than of the articles of luxury which the rich are prone to regard as the necessaries of life.

In Australia, the progress of the trotter is slow but sure. Every outgoing steamer sees one or two horses taken thither. The three most prominent stallions now kept for service on the South Continent are Huon in New South Wales, a son of Hamlin's Almont Jr.; and in Victoria there are Honesty by Priam and Red Wind by Red Wilkes. It is our belief that with the decline of fox hunting and steeple chasing, there will be a proportionate increase of trotting in the colonies which will precipitate new and extensive purchases in America and particularly in California.

Prudential Game Laws.

It is painfully apparent that the changes wrought in the natural order of events by the onward march of civilization are such as to doom to destruction much that is beautiful and useful in the former conditions of the country.

To the sportsman it is evident that the time is not far distant when there will remain but small and remote sections of country where they can hope to find fields for the exercise of their powers, and derive pastime with the use of gun and dog. All that may be done is to guard off by a system of wise legislation, and the proper education of the sporting public the evil day, and make its advent as remote as possible.

The conditions of this country are such, strengthened by the spirit of American equality and individuality, that the system of game preserves, which have obtained in the Old World, will be found of slow and indifferent growth here.

Our people do not take kindly to them. The idea that the wild game is the property of him who shall pursue and capture it, is a part of our general law. That this law should be evaded by the land owners claiming an absolute property in the game by reason of having the title to the land on which it may be found, is going farther than justice will allow.

Perhaps, under a strict construction of the law the land owner would be entitled to a nominal damage for trespass, but that he would be entitled to more we think our courts would be slow to affirm.

Let the game be rigidly protected by law during the closed season, and even it might, with justice and wisdom, go farther and limit the amount of game to which one man would be entitled to capture during the year; let a spirit of tolerance, wisdom and fairness be created as a standard for our sportsmen, regarding all classes of game killed during the open season, that harmony and good will, may obtain.

Under our form of government no law can be uniformerly enforced which is not supported by the wisdom and conscience of the masses.

The public are suspicious and jealous of any encroachment on their rights, and especially when the tendency of the law is to centralize the right or power heretofore held by the masses into the hands of the wealthy classes. It is the same question which has been and still is cropping out in almost every channel of trade and commerce—the power of capital against the interests of the masses.

The Occident Stake.

Entries will close on January 1st, 1891 for the Occident Stake to be trotted in 1893. This stake, as is well known, is for foals of 1890, and the picked yearlings of California are usually entered in this now classical event. $10 will pay for the nomination fee, and $15 more is requisite on January 1st, 1892; $25 must also be paid on January 1st, 1893, while $50 more is required thirty days before the race. To the stake money the State Agricultural Society adds the Occident Cup, the value of which is $400. The conditions are mile heats, best three in five to harness; the first colt to receive the cup and six-tenths of the money; the second colt to receive three-tenths, and the third colt to receive one-tenth of the stakes. The value of the stake in 1890, exclusive of the cup, was $1,535, and as there were only two starters, it made a very handsome division for the owners of the two young trotters. Those who have well bred youngsters must bear in mind that the entries for this stake close on the first of next month.

The Breeder and Sporteman Futurity Stake.

Almost every trotting horse breeder throughout California is more or less interested in the Futurity Stake which was inaugurated by the proprietor of the BREEDER AND SPORTSMAN on the 1st of last January, the entries being at that time 284. Already money enough has been paid in to warrant us in the belief that this will be one of the most successful future events ever instituted west of the Rocky Mountains, and there is every reason to believe that the winner will receive more money than has ever been paid before for three-year-old colts. The third payment of $10 is due on the 1st of January next, and our readers must bear in mind that neglect to make this payment at the time stipulated will incur the forfeiture of all previous payments. There is a very substantial addition made to the value of a horse when it has good engagements, and there is no person who has made entries to this stake but what could sell their entry for much more than he would be worth, providing such

entry had not been made. These Futurity Stakes are now being generally adopted all over the United States, and we are more than pleased with the generous support that was given us when this stake was originally started, and we hope to see a large majority of those who are at present interested make the third payment.

Gone—An Old Familiar Face.

Captain Junius G. Foster, well known to all the pioneer element of this city, died on Tuesday night at Paraiso Springs, where he has resided since 1885. As he was known and esteemed by all those who drove on the road for many years before he left this city, we give him more than a passing mention.

He was born in Sheffield, Mass., in September 1822 and came to California in 1853, as storekeeper on the steamship Uncle Sam, of which William C. Ralston was purser. In October 1854, Mr. Buckman, purser of the Sierra Nevada, was transferred to the Uncle Sam to fill the vacancy created by Mr. Ralston's resignation, and Mr. Foster was put in Buckman's place. From that time until the sale of the Sierra Nevada to Ben Holladay in 1859, Foster was the most popular purser between San Francisco and the Isthmus. He was as courteous and attentive to the wants of his passengers as he was honest and conscientious with the money of his employers. After he quit going to sea, he leased the International Hotel and made it the leading hotel of the city up to the time the "Rues" and "Lick" were opened in the winter of 1862. Early in 1864, he opened the Cliff House at Point Lobos, where his name became a household word with visitors to this city. He charged good prices and gave his guests the very fat of the land. In 1885 he removed to Paraiso, where his urbanity and good humor stood him well in hand.

Capt. Foster was a shrewd man and a capital judge of human nature. He was a man of a broad vein of charity, and his bounty often went, in a silent and unobtrusive way, to relieve the wants of pioneer citizens who had been less fortunate than himself. As a conversationalist, he was the most humorous and genial of companions. His only surviving relatives are his son, Edward, who succeeds him in the Paraiso Hotel, and a widowed sister, Mrs. Thomas Harris, who resides in this city. His death is generally regretted by a legion of friends all over the State, and by none more than the writer of this little tardy tribute to the memory of a sincere and truly earnest man.

The Yellowstone Park.

The recent report of the Secretary of the Interior animadverts somewhat on the lethargy shown by out National legislators in reference to the bill providing for the preservation of the forests and belongings of the Yellowstone Park. The bill passed the Senate in proper form to protect the beauties and natural features of this important preserve. The bill, however, passed into the hands of the Committee on Public Lands in the House of Representatives, and its usefulness as a measure has there been seriously crippled, if indeed not totally destroyed, by having attached to it a railroad amendment. The provision for this purpose looks to the permission of the construction of a railroad through the Park which, if allowed, will certainly destroy the grounds for the purpose for which they have been intended. Secretary Noble, in a previous report, very clearly exposes the designs of this amendment in the following language:

So long as this tract of country shall remain a national preserve for science, curiosity and pleasure, it will of course be an object of cupidity to the covetous, who will see or imagine countless ways in which its exhaustless wonders and resources can be turned into private advantage and who will invent many artifices to beguile and circumvent the guardians of this national treasure into granting them footholds of one kind or another, whereby they can make personal gain out of this great public benefit. If it is not to be thus frittered away, deprived of its most attractive features and measurably lost to science and wonder, if not to pleasure, the best and surest way to protect it is to permit no trimming down, no incursions, and no privileges except such as may be deemed absolutely necessary for its protection and regulation, and for the proper accommodation and comfort of visitors.

The Secretary very earnestly urges the passage of the bill, without the amendment allowing a railroad to be constructed therein. Viewed from an unbiased position, it would seem that there could be but one opinion regarding the matter.

The ninth annual volume of the Dunton Trotting and pacing Register which will be published next spring, will be the most complete ever issued. It will contain the name (and aliases) color, sex, height, age, pedigree, breeder, owner and driver, where and when record was made, of every 2:30 trotter and pacer as far as known. Also a complete list of horses that have sired 2:30 performers as well as a list of mares that have produced 2:30 performers. To insure completeness and correctness, all horsemen who have either bred, own or are interested in a horse that comes under the above heads should send at once for blanks. Address

Dunton's Spirit of the Turf, 415 Dearborn St., Chicago.

Our Australian Letter.

SYDNEY, N. S. WALES, NOVEMBER 26, 1890.

EDITOR BREEDER AND SPORTSMAN:—The Victorian Racing Club Spring Meeting commenced on 1st of November, with perfect Australian weather. The event of the day was the Victorian Derby for which eight three year olds faced the music. The Admiral, ridden by Tom Hales, the jockey who rode so many of the late Hon. Jas. White's horses to victory, was most fancied at 2 to 1 and the next on demand was Annesley, a colt by the crack sire Neckersgat from Ada. The only other youngster backed at any thing like a short price was Mr. Gannon's Gatling, by Nordenfeldt from Petroleuse. Hales won on Admiral, followed by the unthought of Magic Circle, a filly by First King or St. Albans from Yardly, dam of Ringmaster, the little Australian horse running so well in England. Gatling ran third. The Admiral is by Richmond from Footstep. Last year he won the Maribyrnong Plate, the big two year old event of the year, and he is the first animal to secure the two races. Big interest was taken over the Melbourne Stakes, a weight for age race over a mile and a quarter, as the Champion Carbine and Mr. Gannon's crack Melos would meet, and it was thought a line might be gauged for the Melbourne Cup. As five year olds both Carbine and Melos carried 9 stone 3 lbs. and the betting was 3 to 1 on Carbine and 7 to 1 *versus* Melos. Ten others started, amongst them the good ones, Loyalstone, Gresford and The Queen.

Carbine, however, never left the matter in doubt, as jumping well away against the rails, he hugged them until he led into the straight, and won almost without an effort from Melos in 2 min. 10¾ seconds.

The Maribyrnong Plate, the big two year old event, next came on the board, and Ascot Vale, by St. Albans—Solitude, was backed at 2 to 1, but she failed to run into a place, the winner turning up in Yarran by Epigram from Nellie, bred and owned by the Hon. George Lee. The places were filled by the, Nordenfeldt—Steppe colt, and Corvette by Martini—Henry from Lady Vivian. The Coburg Stakes brought out a fine field, and it was thought a good thing for Megaphone, who was backed down to 5 to 2, but his nine stone proved too much of a steadier and he was beaten by the four year old Crown Jewel, a horse by Crown Prince from Chrysolite.

The second day of the meeting eventuated on the 4th, on which day the premier event of the Australian turf, the Melbourne Cup, was run. You Americans can have little idea of the commotion this race excites from one end of Australia to the other, and indeed beyond it, for the first prize in the great £50,000 sweep was this year won by a party of Japanese on Thursday Island, a small trading station off the Queensland Coast. George Adams held the fabulous sum of £110,000 of the people's money in sweeps, out of which he took the tidy sum of £11,000 in commission. As I daresay I have already told you, these "sweeps" are outside the pale of the law, but George Adams is winked at, whilst the authorities uphold the majesty of the law by now and then making a raid upon some poor devil of a tobacconist running a five shilling totalisator. Thirty-nine faced the music for the £10,000 Melbourne Cup, and even the humping of 9 stone, 5 lbs. could not shake the public off their idol, Carbine, who started at 4 to 1; then at fancied was the Caulfield Cup winner, Vengence 5 to 1, and then Melos 8 to 1. I metaphorically take my hat off whilst I relate how Carbine, carrying 10 stone, 5 lb., the greatest weight ever put up in a Melbourne Cup, beat his field almost without bustling himself, doing his 2 miles in 3:28½, the best time on record for the race. Teksum, a five year old son of Musket from Albatross performed well on the Cup day when he won both the Railway Handicap and Yan Yean Stakes. Teksum's name is derived from the spelling of his sire's name backwards.

Carbine pulled up lame after the Cup, his old weak spot, the heel, finding him out, and he did not start again during the meeting. His stable was worthily represented by the sensational colt Megaphone, who annexed both the Flying Stakes and the Royal Park Stakes. For the Veteran Stakes Sir Modred's son, Sir William, started favorite at 2 to 1, but he was unable to get nearer than third, the winner turning up in Corythus, an aged horse by Paris from Fun. The Oaks Stakes for three year old fillies was won by Litigant, a filly by Maritini—Henry from Lonie, who started at the rather outside price of 7 to 1.

The Oaks was the first race Litigant started in at the meeting. She was bred by the late Hon. James White, by Martini-Henry, from Lonie, and was sold as a yearling for 1,550 guineas. On the concluding day the Foal Stakes fell to The Spot, a likely youngster by St. Albans from Lady Disdain, who was ridden by the crack jockey, Hales. The Canterbury Plate, a weight-for-age two mile race, brought only four starters to the scratch, three three year olds, and Mr. Gannon's Melos. The Admiral, ridden by Hales, was elected favorite, but Hales broke a stirrup leather and fell off. Megaphone won, a few feet only separating the three horses, in the order of Megaphone, King William and Melos. King William is a thorough young gentleman by Nordenfeldt from the imported Petroleuse. The final race of the meeting, the Free Handicap, fell to Muriel, a speedy Kingsborough mare, who was a good deal fancied for the Melbourne Cup. The owner of Highborn, the horse who ran second in the Cup, must have thought he had a good thing on us; they backed the gelding for £30,000 at hundreds to one. Knowing how good the gelding is, they must have chuckled over the coup they were about to bring off, for they could never have imagined that Carbine, good as he is, could have romped home under 9st. 5lb, in 3min. 28¾sec. Of the sum of £27,016 paid away over the meeting in stakes, the Hon. Donald Wallace headed the list with £11,911, whilst Tom Payten, who turned out so many winners for the Hon. James White, brought up the rear with a very modest £10. How are the mighty fallen! Elsie, a mare imported from England by Mr. Wilson, won her first race in Australia the other day, when she annexed the St. Albans Handicap at Geelong, Victoria. Elsie is one of the few animals who have won races on both sides of the world. She is by St. Simon and was bred by the Duke of Portland.

They continue to raise good animals in New Zealand. At the Auckland Racing Club Spring meeting, Cissy, a four year old sister to the great Trenton, won three races during the two days, carrying big weights. The bookmakers were very hard hit over Carbine's win of the Melbourne Cup, it being reckoned that they were fully £200,000 on the wrong side of the book, some of them, in fact, having to ask for time.

Yours, "THE JUNGLE"

Answers to Correspondents.

Answers for this department MUST be accompanied by the name and address of the sender, not necessarily for publication, but as proof of good faith. Write the questions distinctly, and on one side of the paper only. Positively no questions will be answered by mail or telegraph.

R. V. C.

Will you kindly inform me through your columns whether there was a horse shipped to a man by the name of Miller from Illinois to Chico, Butte Co., in 1870 or '71; sired by Alexander's Abdallah, or stallion by any other horse? If so, please give name and pedigree.

Answer.—There was a black stallion stood in Chico about the time mentioned which was known as Miller's Abdallah, but we do not know his pedigree. Perhaps one of our Butte county readers can furnish the information.

A Reader.

Can you give me the breeding of "Young Speculation" and who drove Lady Blanchard to her record. Also who drove the chestnut horse Graves to his record of 2:19.

Answer.—We do not know the pedigree of Young Speculation. McClellan drove Lady Blanchard and Gamble drove Graves.

P. F.

What constitutes a Registered Driver as there is a gentleman from Nebraska who claims he is the third (3rd) Registered driver in the United States.

Answer.—We never heard of drivers being registered.

E. D. S.

Can you kindly give me name, discription and pedigree of No. 725 raised by Haggin. Also please send me catalogue of the Holly sale.

Answer.—If you mean the trotting horse which has 725 for a number, Mr. Haggin did not raise him and never owned him. Whipple's Hambletonian 725 ch h foaled 1861 is by Guy Miller (son of Hambletonian 10) dam Martha Washington by Washington 332, bred in Orange County, N. Y. and brought to California in 1862. Have sent you a Holly catalogue.

J. F.

We gave you the pedigree of Butte as far as known, several months ago. Butte is not registered. McCrackens Black Hawk as given in the American Trotting Register is "by Vermont Black Hawk 5, dam not traced". David Hill by Black Lion, son of Black Hawk 5, dam by Liberty, son of Bishop's Hambletonian.

N. H. S.

I notice in B. C. Holly's list for public auction, Pink's name and pedigree in your paper it said "Pink's second dam is by Rifleman". Will you please inform me through your Answers to Correspondents whether you think it is correct or not. Give pedigree of Rifleman. Has he any record?

Answer.—As Mr. Holly has advertised Pink's second dam as by Rifleman, we presume he has good grounds for the statement. Rifleman was by imp. Glencoe, dam Rodolph mare by Rodolph, second dam Butterfly by Sumpter, third dam by imp. Buzzard etc. Thoroughbreds do not have records.

J. L. L.

A son of Electioneer would be better than either of the stallions mentioned, provided you are positive as to the thoroughbred blood.

C. V. T.

Write and ask Col. H. I. Thornton.

Information Wanted.

A correspondent asks the following:

Can you or any one of your readers tell about a pair of mares which Gov. Latham owned and drove for some years? Colonel Lightner afterwards owned one of them and bred her to California Dexter. What was the breeding of those mares, especially the one Colonel Lightner owned?

Anteeo.

Can you give me the pedigree of Napoleon, a horse that was owned by Dr. Oliver Plummer of Cosumnes many years ago.

Answer.—Dr. Plummer has forwarded the following which was on the printed cards when the horse stood for service.

NAPOLEON.

This horse was foaled May 29th, 1853, raised by James Kyle, Butler Co., State of Ohio. He was sired by Benj. Sweet's horse "Bellfounder", whose well earned reputation precludes the necessity of a pedigree. His dam was sired by Doctor Mulligan's horse "Cadmus"; g. dam sire, old Cadmus g. g. sire, the celebrated "Eclipse". His g. dam was sired by "Big Shakespeare"; g. g. dam by "Messenger" and "Expedition."

This noble animal stands nearly 17 hands high; of a powerful and beautiful form, neat head, large nostrils, upright ears, bright bold lively eyes. He has strong quarters, high withers, vigorous arms and flat legs; full of life and spirit and of great force and courage. He is a free, pleasant traveler and moves in a good, bold, majestic style. His color is dark bay with long, full black mane and tail. His appearance is enough to recommend him to any Farmer. Come and see.

NATHANIEL MC TUCKER & BRO.

A CHAT WITH ORRIN A. HICKOK.

Reminiscences of a Campaign.

It is at this season of the year when horses are partaking of a well earned rest, that the trotting horse driver sits in his favorite resort and recounts the incidents that have occurred during his season's work. Many a time has the writer sat at a good warm fire and listened to tales told by those who have "gone down the line." These stories are always listened to with a great deal of attention, especially by those who were not present when the reality took place, and they are usually satisfied to listen to the wonderful yarns told by the driver, the groom, or the stable boy, or some interested party who played the "combine's" money in the pool box. Of course the pleasure arising from these stories are materially enhanced when the relater is a good talker and impressive in his way.

Orrin A. Hickok, the old-time driver, who has many times been called the "Tallyrand of the Turf," is an exceptionally good story teller, and it is always with a great deal of unction his auditors listen to stories of by-gone days. It is only a very short time ago that we had the pleasure of hearing Mr. Hickok give the history of last summer's campaign while back East with Adonis, Alfred S, Prince Warwick and others, and it may possible interest our readers if we give a short synopsis of what the veteran driver told us.

"As you are well aware, a man must have the tools or he cannot do good work. Along about the middle of April, I made up my mind that with Adonis and Prince Warwick I might be able to hold my own against the large stables of horses that one has to meet now on the great Eastern circuit. Wishing to improve my string, and also knowing the speed of Alfred S., I concluded to buy him, and did so shortly before I started East in May, paying a good round sum to the Seale's estate for the bay gelding.

Our objective point was Terra Haute, which had been highly recommended as one of the best tracks east of the Rocky Mountains, and I must confess that we found it so, and in addition to which I may also say that the Californian contingent was courteously looked after by all who had any thing at all to do with the Terre Haute Association. It was while we were shaping up our horses there that the accident happened to Alfred S, which for a time caused me to think that he would be unable to earn his oats during the circuit. Having given him an exercising jog one day, my boy was leading him up and down, and carelessly took him too close to another horse which was also being cooled out, and the result was that Alfred S. was severely kicked, and it was sometime before he gave me assurance that I could do very much with him.

After a little preliminary work at Terre Haute at the opening meeting of the Association, we went to Detroit and were there some little time prior to the Blue Ribbon day, which is the inaugural each year of the Detroit Association, the Directors throwing open their gates to the masses and allowing all to enter without entrance fee. Fully 15,000 persons were present on the first day, and the sight was really a grand one. Much has been said and written about the decadence of trotting, but any one who witnessed that seething mass of humanity on the opening day could readily believe that trotting has as firm a hold on the sport loving people of America as ever it had, and that instead of falling behind there is a strong prospect that the future will see even better results in the way of attendance than has been seen in the past.

"I had heard considerable about the mare Cricket that Mr. Salisbury had in his stable, and had a chance to see what she could do on the first day, she being entered in the 2:24 class, her opponents being Grant's Abdallah, Chimes C. and Nettie C., but the little California mare just walked away from them as she pleased, winning in straight heats in 2:18½, 2:15¾, and 2:14½ This was her first race outside of the small meetings, where she had been entered further west, yet still her fame had preceded her, and she was so much thought of that those who backed her had to put up $100 to win $25 On the same afternoon a second of the California horses started, Charlie Marvin having Voucher entered in the 2:22 class, but the horse was not nearly as good as he proved himself later on in the season, and the best he could do was to take second place in the last heat, the time of the winner being 2:20¾.

On the second day of the meeting it was again easy to see what a hold trotting has on the people, as fully 10,000 persons paid admission at the gates. The *piece de resistance* was the Merchants and Manufacturers' Stake of $10 000 for horses eligible for the 2:24 class, and I must confess that I had an idea that Prince Warwick stood a very good show, and as a consequence, placed considerable money in the box, expecting him to win, but somehow or another during the entire circuit he was very unfortunate and usually seemed outclassed, and when not in that category there was something the matter with him that would prevent me from getting to the front. The betting at first was rather light, Prince Warwick selling for first choice at $11, he having shown a mile better than "19" in his work the week previous. Siglight was somewhat fancied at $10, while the field sold for $25. Play Boy won the first heat in 2:18½, and from the manner in which he finished, was installed favorite, he selling against the entire field. The second heat was taken by Walter E., a bay gelding owned by the Stewart Bros. of Kansas City in 2:18½, while the third heat fell to the Electioneer mare Suiaun in 2:18½. Those in the habit of placing money in the pool box were by this time all at sea as remarkable good form had been shown by most of the horses in the race and it really looked a ter the third heat as though anybody might win it. At the three-quarter pole in the fourth heat, I felt considerable confidence, as Prince Warwick was leading, but Suisun came very fast and carried me to a break, and in a moment she and Play Boy had both passed me, Suisun, however, winning in 2:22. That night Gen. Turner who had driven Suiaun during the afternoon, was compelled to go to Pittsburgh, and Marvin was up behind the Electioneer mare when she appeared the next day. Notwithstanding that Suisun had two heats to her credit, the field sold favorite at $25, the mare bringing $10. During the night there had been some little rain and the track was heavy which militated against the mare's ultimate success, as she likes a good hard, dry track; at any rate, Walter E. won the fifth heat in 2:20, and as Prince Warwick disliked a heavy track, I withdrew him after that heat, and Marvin requested me to drive Turner's mare, which I did in the sixth and seventh heats, but was unable to secure better than third place in either, the time of the last two heats being 2:23 and 2:23¾, Walter E. winning and stamping himself as a race horse of indomitable pluck. It was on that same afternoon that Charlie Marvin drove Sunol a half mile in 1:02½, and I think that never in my life did I see such an ovation given to any one as was given to the "gray driver" when he returned to get out of his sulky. On the same afternoon there was a purse of $2,000 to contest for, for the 2:18 class, and I had entered Alfred S, Direct also being one of the starters. The son of Director sold at $50, Lady Bullion bringing $25; my gelding sold for $18, while Kit Curry and Ketch went at $10 each. The race was best two in three, and I had no trouble in winning both heats easy, the time being 2:18½ and 2:19¾, which more than surprised me, considering the injury the horse had received at Terre Haute.

The fourth day of the meeting gave me a chance to show what Adonis could do, and although there were only three starters, the best I had to do was 2:16¾ in the first heat, winning the second and third in 2.20¾ and 2:18¾. It was on this day that Margaret S defeated Allerton, the race having been postponed from the 24th. This race created a great deal of excitement, and those who had pinned their faith to the California representative were more than repaid for their confidence, as she won a five heat race, in which she distanced every one of her competitors. Palo Alto was given a chance to show what he could do, starting in the Free for all later on, and won in three straight heats, the time being 2:15½, 2:14 and 2:16¼.

From Detroit we journeyed to Cleveland; there on the first day I had Prince Warwick entered against Leopard Rose, Pixley, Siglight, Hylas Boy and three or four others. This was only a walkover for Leopard Rose, she winning the second, third and fourth heats in hollow style, while Pixley, a very speedy bay mare who was driven by Budd Doble, took the first heat. However, to win the race Leopard Rose had to show how much speed she had; for she was forced to trot in 2;15¼ to win the second heat, and I was really glad to get off with third money from such a speedy field. On that same afternoon I saw Simmocolon for the first time back East, and was considerably struck by the improvement in his work, as I rather fancied last year that he was not going to make a successful campaigner. He had no difficulty in winning the first, third and fourth heats, making a mark for himself of 2:19.

On the second day I received a black eye, yet still at the same time secured a mark for Adonis that has made him famous throughout the length and breadth of the land. It was in the free-for-all pacing class, the starters being Hal Pointer, Jewett, Fred Arthur and Grey Harry. During the early morning Adonis and Hall Pointer had sold at equal favorites, but later in the day the son of Tom Hal was made a pronounced first choice at $200, while Adonis sold for $130, Fred Arthur for about $75 and the field for $10 The first heat was simply a good exercising gait, and Adonis won as he liked in the rather slow time of 2:15¾. For the second heat Hal Pointer was still looked upon by the talent to win, as he was backed at $50 while the field sold for $100. At the half mile pole in the second heat Adonis led by a short length from Jewett and Arthur, while Geers was occupying fourth position. From this point out Geers sent Hal Pointer like a whirlwind, and was at my wheel as we swept past the third quarter in 1:38¾. When we came down the home stretch we were head and head, both of us whipping quite freely. I knew we were going at a fearful gait, and I was more than relieved, when, within fifty feet of the wire Hal Pointer made a break, which just enabled me to win, for the judges gave me the heat although he was a half length in front of me. When the time was hung out, 2:11½, the applause was simply terrific, as the audience had seen the fastest time ever made in a race up to that period. Notwithstanding that Adonis had shown what he could do, the Hal Pointer people stuck tenaciously to their favorite and backed him at $25 while Adonis brought $35, this probably being in view of the fact that Hal had been timed from the half mile pole home in 1;02½.

Adonis was very much distressed on being brought out for the third heat, and I thought it good judgment to lay up before calling on him for another fast heat, in consequence thereof Hal Pointer was enabled to take the third heat in the very slow time of 2.18½. For the fourth heat Pointer was now a very strong first choice, selling at $100 against $25 for the field. I rather fancied that I could win this heat and led from the time the word was given until we reached the third quarter in 1:40¼, although Jewett was hanging to me so closely that I felt I would have to fight the heat out with him. However, Geers brought up Hal Pointer and quickly passing Jewett, and there was a repetition of the second heat. We came down the homestretch nose and nose together, until within a hundred feet of the wire, when knowing that I had no chance to win I let up on the gelding, Pointer winning in 2:14½, beating me by three-quarters of a length. Hal Pointer now sold at $100 to $15, and this heat was as hardly fought for as any of the balance, but the other gelding simply out lasted Adonis and won by a length and a half in 2:17.

On the third day of the meeting I had Alfred S. in the 2:17 class, and although I lost the first heat to Pamlico in 2:17½, I had no difficulty in winning the next three heats in 2:18½, 2:17 and 2:19¾. This was a race in which the California crowd made some little money as Margaret S, and Alfred S, sold in the field for $25, while Houri brought $50 and Pamlico $40.

On the last day of the meeting I saw Adonis' record equalled, in the 2:17 pacing race, Dallas, a chestnut gelding by Almont Boy, making the same time in the second heat, 2:11½.

While we were sojourning in Cleveland, I had a long conversation in reference to the kite-shaped track, of which almost everyone was talking with the president of the association, he fancying that the new idea would be a decided improvement for the Cleveland people and asked my opinion as to whether a change would be suitable, and whether the horsemen of the country would patronize it or not. I was compelled to state emphatically that it would be impossible for me to attend at Cleveland in future, if they had a kite-shaped track, and for what I considered a very good reason Here we are at the opening of the grand circuit, and I have a horse which I feel assured is good for the 2:18 class on an ordinary track, but at the beginning of the season I may be compelled to show a mile in 2:14, which my horse could never do again on the regulation track, and consequently I would be forced out of my class simply because my horse had made a record on one of the new fangled things. The president of the association at once saw my course of reasoning, and you may state that it will be many a day before there is a kite shaped track at Cleveland.

From there we went to Buffalo where I took second money with Prince Warwick, Leopard Rose proving the winner in three straight heats. Time being 2:21½, 2:18¾ and 2:20.

On the second day, August 7th, I had the satisfaction of winning the 2;18 class purse in three straight heats in 2:20¼, 2:17¼ and 2:19½, Mocking Bird owned by Mr. Hamlin, making it lively for me in the last two heats.

On the 8th I had no horses entered, but a little party of us played the pool box, buying the field for $15 against Simmocolon, who was selling for $25. The first heat of the race was won by the mare called Henrietta in 2:19½, while the second and third heats were won by Jeau Valjean. The fourth heat was won by Simmocolon in 2:19¼, and it was while we were waiting for the decision of the judges that I happened to make the remark that I thought I could win the race with Walter E, and in a very few minutes Bob Stewart came and asked me if I would consent to drive his entry for the balance of the race as he felt that he could not win with him. I readily consented, especially as we had been chopping around considerably in our betting, and I could win more by having Walter E get the first money than if either of the others won. I won the fifth heat with the Patchen Mambrino gelding in 2:21, the betting immediately changing, and Walter E. was established favorite, he selling at $50 while the field brought $25. I won the sixth heat easily enough in 2:20, Henrietta being second and Simmocolon third. The seventh heat was a surprise party to me without a doubt, as I led the field from the time the word was given until within a few feet of the outcome, where Simmocolon who had stuck to me like a leech, beat me out of first place by half a length in 2:21¾, and I want to say right here that from that time I became convinced that Simmocolon was as game a horse as I had ever seen, although I had an altogether different notion of him when I first saw him in California. He is a great young stud and will surely make a very low mark for himself bar accident. In the eighth heat Henrietta got away in the lead and I could not catch her from start to finish, she winning in 2:22. As the matter now stood there were four of us in the race with two heats to the credit of each. At the quarter pole I managed to catch Henrietta, who was leading, and from there out had no difficulty in winning the ninth heat and race in 2:25¼, and I might say, probably one of the hardest races I ever drove in my life.

On the afternoon of August 9th, there happened one of those things which is always annoying to those who may be mixed up in them. Having no entry for that day, Budd Doble asked me if I would be kind enough to drive McDoel for him in the 2:22 class, as he had two other horses to drive the same day, Ed Annen in the 2:17 pacing class, and Jack in the free-for-all purse. I had no objection, and won the first heat quite readily with him in 2:20¼, but felt that the horse was not at himself, and so told Doble, and informing him also that I thought it impossible for him to win the race. Doble said to me: 'You are doing first rate, keep right on.' I tried to win the race in straight heats, and when the word was given for the second, I started off in the lead and was ahead of the field at the half mile pole; from there home McDoel fell behind, being unable to keep up with the balance of the field, and I finished absolutely last in 2:19¾, Mambrino Maid being the winner. The third heat was but little better, for although the time was only 2.21¼, I could not finish better than fifth, and I told Doble that I wished he would get up behind the horse himself. Doble said he could not do it, owing to his other engagements, and I therefore asked the judges if I might be relieved, telling them that the horse was not in fit condition to win, and could not possibly do so. I was requested by the judges to take my seat and finish the race, which I did, Voucher winning the fourth heat in 2:21¾, while Mambrino Maid took the fifth and last in the same time. Two newspapers published in the East made a hue and cry about the race having been thrown off intentionally, and there was a great deal of newspaper talk in reference to the race for several weeks, until it was finally discovered that the reporter of the New York daily paper which had originally started the story had been egged on to writing the false reports by a newspaper man connected with one of the Eastern horse papers; I traced this ultimately to its foundation, and found that the story had been inspired by a spirit of spite, the party who incited the reporter to write as he did, having a feeling of enmity against me which has existed for several years. However, I may say that the judges in the stand and Mr. Doble himself have exonerated me from all blame, although I am sorry that I ever drove in the race at all.

Rochester was the next objective point, but it was not until the second day of the meeting there that I had any entries, and then started Adonis in the free-for-all, his only competitors being Gossip, Jr. and Jewett. The Sidney gelding still showed the effect of the previous week's work and was also considerably off, and it took five heats for him to finish the race, he taking second, third and fifth in 2:18¾. 2:16 and 2:23½.

On the third day Alfred S. was started in the 2:17 class, having as competitors Pamlico, Mocking Bird, Houri, Margaret S. and J. B. Richardson. From the speed already shown by my horse he was installed favorite, selling at $90; Houri $55; Pamlico $25; Margaret S. $25; Mocking Bird $15, and J. B. Richardson $7. In the first heat Mocking Bird proved her ability by winning in 2:19½, while Alfred S. took the second and third in 2:18¼ and 2:16½. Pamlico proved himself a great race horse that day as he out lasted the balance of us and won the next three heats in 2:16¾, 2:17¼ and 2:18½. Some complaint has been made because I did not try to win in the fourth heat of this race, but as Alfred had to trot in the third heat in 2:16½, I deemed it good judgment to give him a breathing spell, and was unable afterwards to beat Jimmy Goldsmith's entry as he had the foot of the party.

From Rochester I went to Chicago to attend the meeting of the Northwestern Breeders Association, and on the third day started Prince Warwick, in a race which was lost in the miserably slow time of 2:31, 2;27¾ and 2;30¼ yet still I ought to state that Warwick is a peculiar kind of a horse and simply refuses to trot when the track is heavy. The throwing of mud seems to knock the very life out of him, and he sulks so badly that no one can do anything with him. I am satisfied that he is as good a green horse as I could possibly wish for, yet still when he does show speed it will be on a hard, dry track. On this occasion the course was sticky mud, and none of the horses could show what they were capable of doing."

"You attended a meeting at Philadelphia, did you not?"

"Yes, I was there with Alfred S. when Palo Alto and Sunol were sent their exhibition miles, and it was owing to taking Alfred S. there that I sold him. A son of Mr. Bonner was there to witness the sport, and when he returned the owner of Sunol asked him what he thought of the two great sensational performers, and his answer was that he had seen a horse that he liked better than either of them and that was Alfred S., who to wagon made a record that afternoon of 2:16½. Mr. Bonner began negotiations for the purchase of Alfred S., and I finally sold him for $7,500, with the understanding that I was to have the use of him for one more race in which I had him entered, and as he won $500 for me, I really consider that I sold him for $8 000.

"After getting through the main circuit I journeyed on to Lexington, where there was an exceedingly good meeting held under the auspices of the Kentucky Trotting Horse Breeders' Association, going from there down to the Hot Springs in Arkansas, to which I had been recommended by my physician, the arduous work of the campaign having completely worn me out."

Mr. Hickok is looking extremely well, has entirely recovered from his indisposition arising from the fatiguing duties attending the care of his horses, and while we do not wish him any bad luck, still it is to be hoped that his familiar figure will be seen on the California circuit next year.

Exhibition Games.

Played at Home and on Interior Diamonds.

ALL CALIFORNIAS vs. PICKED TEAM.

SATURDAY, DEC. 20TH, 1890, AT SAN FRANCISCO.

The Examiner's charity game for the benefit of the orphaned children was in every respect a brilliant success. The day was clear and bright, the audience representative and large, and the players in fine playing form. Before the game the celebrated Park Band discoursed national airs of Hawaii and America, as well as some delightful concert music. The occasion was graced by the presence of King Kalakaua and suite who occupied the directors' box, which was tastily draped with flags of the Hawaaisn Kingdom and the United States surmounted by festoons of evergreens and holly berries. Col. Charles F. Crocker, who was advertised to umpire, sent a dispatch regretting that on account of pressing business he was unable to officiate, and Charley Sweeney, the ex-king pin twirler, and Billy Nash of the Bostons, kindly consented to act. Pete Meegan started in to pitch for the Picked Team, but after three innings, during which he was batted very freely he retired to right field and Ebright took his place in the box. The Frisco captain was not a "phenom" in his new position, the Easterners having no difficulty in hitting him at will. Phil Knell pitched for the "Stars," but did not have to exert himself. The fielding was generally good and the batting heavy. Brown, Ebright, Long and Hardie excelled in the latter department. The score:

ALL-CALIFORNIAS.	AB	B	BH	SB	PO	A	E
Van Haltren, s s	6	0	2	0	1	2	0

ALL CALIFORNIAS vs. PICKED TEAM.

SUNDAY, DEC. 21ST, 1890, AT SAN FRANCISCO.

Last Sunday's game besides being the shortest of the season was the best played of the winter series. Both pitchers' work was superb. Van Haltren was the better supported, the errors of the Picked Nine being responsible for the victory of the "Stars." Speer was hurt in the second inning, causing his retirement. Stevens took his place behind the bat and Donahue, who was umpiring was pressed into service, there being no other available player. Meegan officiated as referee during the remainder of the game. McDonald, Levy, Hardie, Carroll, Ebright, Cantillion and Bill Brown put up a magnificent game in their respective positions. The score:

ALL-CALIFORNIAS.	AB	R	BH	SB	PO	A	E
G. V'n H'ltr'n, p	4	2	2	2	3	4	0
Fogarty, c f	4	0	0	0	0	0	0

Van Haltren to Carroll. Time of game—1 hour and 12 minutes. Umpires—Donohue and Meegan. Official scorer—Stapleton.

Notes.

Jimmy Fogarty returned to his home in Los Angeles last Monday. The great outfielder will undoutedly captain and play with Marco Hellman's team for the remainder of the winter series.

Manager Finn is gradually getting his team together. Besides Fogarty and Everett, he has signed outfielders Osborne of Pittsburg, and Jack McGucken, of this season's Jersey and Baltimore team. His latest acquisition is Chick Speer, the clever little backstop of the Champion Frisco team.

Jack Donohue showed last Sunday that he can play ball a little bit yet. Although out of practice he hit Van Haltren for the prettiest kind of a two hagger and handled himself very cleverly in the outfield. Could Donohue hold up his end next season in this league? Well, from present indications, I guess yes.

Charley Gagus and his charming bride returned from their honeymoon spent at Del Monte, last Saturday. Sunday, Charley, accompanied by his wife, was out on the road behind a clipping trotter, still he couldn't overlook the ball game, the final innings of which he viewed from the carriage drive.

McDonald, Roberts, Goodenough, Hanley and O'Day will all very likely be with cracking good teams East next season, and then when glowing accounts reach the coast of their work, the old familiar question will present itself to the managers: "Why did we let them go?"

It is rumored that both Manager Finn and Harris are after Nick Smith. This is a step in the right direction. Smith, like a dozen or more California players "at liberty," is a big favorite, and the re-signing of these sterling local players would do more to popularize the game on the coast, than anything else the brainy quartette of managers might devise.

Edward Anstin, the hustling manager of the Fresno team, writes us contradicting the report that he has treated pitcher Howell unfairly. He states that he has lived up to the letter of his agreement with the little pitcher who, he claims, is thoroughly satisfied, and that the report was most likely started by unscrupulous, vindictive and dissipated players for whom he had no use in his team.

The work of Van Haltren and Coughlin in the box last Sunday was truly magnificent. Van had terrific speed, a most delusive change of pace and some tantalizing curves. Roscoe Conghlin was never in better form, and kept his formidable opponents guessing all through. It was the most even exhibition of twirling seen on the local grounds this season.

Whenever there is a player short in the team George Van Haltren plays with on this coast during the winter, the ex-Chicagoan—Brooklander always manages to place his brother Charley in the vacant position. This is a case of brotherly love, but it is often worked to the detriment of the game, as there is no lack of professional talent that can always be secured on the grounds half an hour before the play commences.

There are many who would like to see that old time favorite, Hen Moore, back again in the fold. Hen is a fielder of fielders, a great base runner and a corking good hitter. The greatest difficulty with this player was that he was a hard man to discipline. However, "experience is a great teacher," and whatever team has Moore on its staff next season will find that besides being one of their star players he will be a most tractable man to handle.

The California Colts did not arrive on the Mariposa last Sunday as was expected. Advices reach us that at the last moment they were oportuned to remain over for another week and consented. There was some talk of their going to Sidney and Melbourne but that trip will not be made this year as the boys are all anxious to be home for the holidays. They will undoubtedly arrive Friday per the Australia, too late unfortunately for notice in this issue as on that day the paper goes to press.

Phil Knell came very near losing the 250 dollar spark that ornaments the little finger of his left hand last Sunday. After the game, he thoughtlessly laid it in one of the lockers in the club house, and went home without it. Danny Long, who was one of the last to leave the room, had occasion to look in the locker, and overturning a pair of stockings, accidentally discovered it. Phil returned in the course of an hour much excited at his probable loss, but was greatly relieved on being informed that his friend Long was the finder. Had Long not found it, the chances are it would be "good-bye, John," as the club house is frequently pillaged by thieves, who have no difficulty in gaining access to the rooms.

McGucken and Osborne, the two Eastern outfielders Finn has signed for his San Jose team, ain't likely to set this country afire either by their fielding or hitting capabilities. Of the two, McGucken is without donbt the better man, being reputed to be a good run getter, strong hitter and fairly fast fielder. His record with the Atlantic Association this year, however, does not show him to be the wonderful player he is cracked up to be. In 97 games he made 98 hits, giving him rank 40 with a batting average of 249. His fielding percentage in 88, rank 17th. Osborne's record with the Pittsburg (N. L) team is still lower. He is said to be a big, strapping player in about the 4th class, who can rap the life out of a speedy pitcher, but is completely at the mercy of a brainy curve twirler. As a fielder he is a slow man, and his record will bear out this statement. Osborne participated in 41 league games this year, made 40 hits, 2 sacrifices, and didn't steal a base. His batting rank is 69th and percentage 238. In fielding, his position in the list of 43 men is 41st, with 827 as his per cent of chances accepted. As a pitcher he was given five trials, but all were failures. Finn could undoubtedly find as good men as these right at home among the amateurs.

The prize fakir on a morning contemporary is again actively engaged in dishing out base ball news with his scissors, and trying to beguile the public that it is original and fresh-cut matter. This has been the alleged base ball writer's (?) methods all through the past season, the BREEDER AND SPORTSMAN being the principal sufferer by his piratical invasions, no less than two hundred uncredited notes and comments being stolen from this paper. When the "would-be" oracle with the "cast iron gall" does essay to write something original (at space rates), he invariably makes a most complete and laughable display of his ignorance of the game. For instance, take his statement to the effect that Fogarty, Van Haltren and Smalley are not in demand in the East for next season, and that the late war will force many of the California stars to remain in the Golden State next year at reduced salaries. Of course, everyone conversant with the public affairs of the National game, knows that until the salary limit to be agreed upon by the National League and American Association is settled, no players will be put on any team roster, so it would be quite useless to make overtures to the players mentioned at this early day. In last Monday's paper immediately preceeding several notes taken bodily and entire from the BREEDER AND SPORTSMAN this individual says, "It is now a definite thing that Danny Long will play with the Oakland team next season." Definite, I guess not. California patrons may or *may not* see Long with Oakland next year. He is on the reserve list of the Baltimore Club of the American Association and until released cannot contract or negotiate with any team desiring his services. A thread up of the National Agreement and current baseball literature of the day would be of inestimable service to this writer if he wishes to act honestly with his employers and the public generally.

HOOGS CALIFORNIA TOURISTS.

Electrify the Hawaiians by their Dashing Style of Playing the Great American Game.

Frank Hoogs team of California players were something of a revelation to the inhabitants of that little tropical cluster of islands known as the Hawaiian group. The team Manager Hoogs took with him numbered three professionals of considerable reputation—Tom Powers, Patsy Cahill and Harry Howard, while the remainder were ambitious promising youngsters with comparatively little experience professionally. With but one exception they were recommended to Mr. Hoogs by the writer, who has carefully watched their earnest and praiseworthy endeavors on the amateur (and occassionally on the professional) field, knowing full well that under the mentorship of that splendid captain, Powers, they would make an excellent showing against the teams they were to meet, who on account of their isolation could not be expected to be as proficient in the art of tossing the sphere as those who have the advantage of profiting by playing with and witnessing the work of experts at all seasons of the year. Commenting on the initial game the Honolulu Bulletin says:

"During the preliminary practice the visiting players were the object of much admiration on account of their uniformerly strong physique and snug costumes of Chicago caps, cream-white flannel shirts and blue trousers and socks.

* * * * * * * * * * * *

The home players were evidently disconcerted by the novel features introduced by the coachers of the Californias. They kept up a din of shouting that must have made our auctioneers turn green with envy at their capacity of turbulent elocution. The grand stand was kept ringing with laughter at the war whooping of the coachers."

The first game was played Thanksgiving Day before an audience of two thousand, and was easily won by the Californias by a score of 20 to 1. Seven games have been already played the "tourists" being victorious in all. We append the scores of games played Nov. 29th and Dec. 3rd and 7th.

ATHLETICS.

Athletic Sports and Other Pastimes.

EDITED BY ARPHIPPUS.

SUMMARY.

In our columns will be found a resume of the past year's doing in the athletic and aquatic world. The majority of the athletes have abandoned the cinder path and gymnasium until after the holidays when they will again don their spikes and begin training for the events which will take place early next year Foot ball is now the only out door sport that any real interest is being taken in, and the U C, Oaklands and San Francisco teams are practicing hard for their coming matches.

RUNNERS, WALKERS, JUMPERS, ETC.

There was not a very large attendance of athletes at the Olympic grounds on Sunday last in consequence of there being no special event on the list. A few of the boys, however, stripped and took exercise.

About half a dozen members of the Alpine Club visited the Bay District track, but owing to its muddy condition no races were run off. Massey and Choynski engaged in a mile spin, the former allowing the latter seventy-five yards start. The run was merely a practice trial, Choynski crossing the finish first by about thirty yards. Time, 5:13.

The athletes are eagerly looking forward to the 23rd of April when the first indoor championship meeting of the P C A A A will be held in the Mechanics Pavilion. It is to be hoped that a proper track will be prepared, as the runners generally complain of sore limbs after having run on hard boards. There are many of the boys who will not compete unless a track is built for the occasion, and the committee should do all in their power to attract a large entry list.

The hand ball court at the Olympic Club grounds on Sunday last was well patronized.

Jelleneak, Espinosa, Yates, McArthur, and several other prominent Olympian athletes are very fond of visiting the skating rink.

The present weather is just suited to foot ball playing, and many lovers of that favorite, but rough pastime are now getting themselves into condition for the future. At Central Park on Sunday afternoon several of the Alpine Club members formed themselves into a team and engaged in a trial match.

UNIVERSITY JOTTINGS.

Last Wednesday the Officers base ball nine won their second game from the University nine. The score was 9 to 4.

Over $40 worth of things have been stolen from the gymnasium during the past couple of months, and great efforts are being made to capture the thief or thieves, who, if discovered, will be summarily dealt with.

At a meeting of the Foot-ball Eleven held last week, White was elected captain. Practice will be begun immediately after vacation, and the boys will work hard to get into condition for their coming games with the Oaklands and the San Franciscos.

Two entries have already been made for the tennis tournament which is to come off on January 14. It is said that neither Allen nor Sanborn are about to enter, so that there is a chance for several to climb into first place.

AT THE OARS.

There was not much activity in the neighborhood of the South End boat houses on Sunday last. The air was a little too chilly and the oarsmen preferred the fireside to the cold breeze that predominated on the bay.

Ed Finley, George Phelan, J. J. Larkey and Hermann Pless of the Ariels took the lapstreak and rowed over to Harbor View in the forenoon where they enjoyed a clam chowder feed.

Harry Terrill forfeited his final race to George Phelan. Those who were included in the dinner bet will have the satisfaction of enjoying a New Years fete.

Charley Long of the Pioneer Club; J. B Munhead of the same organization, W. H. Growney, Leander Stevenson and J. T. Sullivan put out in their singles in the early part of the day and rowed several miles.

The Lurline Club is not showing much activity at the present time and it is very doubtful if the club will ever be heard from again.

Several months rent has not been paid and the interior of the gymnasium presents a very bad appearance which would indicate that the members had deserted in a body.

The South End Club was represented by a couple of crews who took mild exercise in the barges, Charles N. Felton and James A. Garfield.

The annual election of officers of the Ariel Club will take place on Sunday January 4.

J. T. Sullivan made his first appearance on Sunday last in the role of a canoe paddler. When he recovers from the effect of his impromptu bath he will probably make up his mind when he will take another paddle.

THE WHEEL.

The moonlight evenings during the early part of the week were thoroughly appreciated by the cyclers who enjoyed several pleasant runs neath Luna"s silver beams.

Dozens of wheelmen took in the magnificent panoramic view in the vicinity of the Life Saving Station on the ocean beach, where the breakers looked terrifically grand in the pale moonlight.

The Alameda Bicycle Club will hold an election of officers on the first Monday in January.

Quite a number of the Bay City wheelmen are fine skaters, and they may be seen almost nightly on their rollers at the skating rink.

About fifteen members of the Alameda Bicycle Club took a run to Haywards on Sunday, where they held a grand dinner party to which several of Haywards' prominent citizens were invited.

CLUB JOTTINGS.

The annual meeting and election of officers of the Alpine Club will not be held until after the holidays. It is probable that the gymnasium at Central Park will be abandoned, owing to the fact that the majority of the members are outdoor athletes who take no interest in in-door sports. Efforts will be made to hold a series of amusements some Sunday in January in Central Park for the benefit of our club's trersury which is at the present time not over stocked with the necessary ducats.

The Golden Athletic Club is keeping in the dark until the California Club makes another effort to revive pugilism, and if the New Montgomery Street corporation makes a success of its undertaking then it is possible that the Jone'a organization will make a desperate effort to stand on its legs again.

If the proposed new Olympic Club building turns out to be as fine as the plans, etc,, would indicate the members will have much to be thankful for.

An important meeting of the Pacific Coast Amateur Athletic Association was held in the rooms of the Olympic Club on Tuesday evening last. J. H. Bargman, of Stockton, was reinstated to the amateur ranks, and he will make an effort to return the compliment by starting a new amateur club in the Slough city, which will apply for admission to the P. C. A. A. A. W. Zelner's application for reinstatement was rejected. The First California Guard Athletic Club was admitted to membership. S. V. Casady and E. S. Van Court were accepted as delegates from the Olympic Club. Messrs. Douglas, Holcomb and Hine, of the C. G. A. C. were accepted as delegates to represent the new organization.

A Resume of the Past Year.

The present year is almost at an end and it will not be out of place for us to give a brief resume of all that has happened both in the athletic and aquatic world since last we published our annual address Commencing in December last, the Alpine Amateur Athletic Club was started by a body of well meaning and hard working athletes, solely for the purpose of booming amateur athletics, and to encourage competition. Their efforts were successful, and to the existance of the Alpine club may be attributed much of the boom which athletic sports received during the past twelve months. Several good in and out-door exhibitions were given by the Alpine club since its organization, and through its influence the P. C A. A. A. has obtained much notriety. The fact that the Olympic and University athletic clubs were to be opposed by the Alpine team on the occasion of the annual championship meeting in May last, materially helped to increase the number of spectators at the games. For four or five months there was considerable talking done by certain officers of the Olympic and Alpine clubs in reference to the standing of an Alpine member named Little, whom it was claimed was none other than the celebrated professional runner of the same name.

It was Captain George W. Jordan, of the Olympic Club, who first began to suspect that there was something wrong with the Alpine man and he kept up his cry until the game was run to earth. Mr. Jordan was right in his suspicion and Little was debarred from competing in the championship games. Some of the most prominent athletes in the Alpine Club refused to enter the games on the grounds that Little was not treated fairly and the Alpine team which was partially represented made but a poor showing against the Olympic and University men. Since that time, however, the club has redeemed itself, and at the present time there are a number of good men ready to defend its cause. The opening of the Olympic Club'a new out-door grounds on Decoration Day was the foundation of the present boom in that club's affairs and with such a fine gymnasium and out-door grounds it is no wonder that the membership has been largely increasing since. During the year W. Greer Harrison was elected President once more, and now that he is in power again the members can rely on it that the much talked about new building will soon be started. Previous to last May there were several promising athletes amongst the members of the Olympic Club, who only required practice to bring them out, and as soon as the new grounds were opened up they began to take a genuine interest in their training with the result that many of them are now record holders who before were considered but second and third class men. The great victory of the Olympic team over the University and Alpine teams last May was a grand advertisement for the former club, and since then the name of Olympic has been heralded all over the world.

Many records have been broken in the past year, and many new champions have come before the public. James Jarvis representing the Olympic Club lowered all the walking records from half a mile up to three miles. Foster and Mc Arthur of the same club made new records for the half mile run, 120 and 220 yds hurdle racing. Purcell broke the pole vaulting record and Espinosa the one thousand yard running record. Cooley made new records in all the long distance events, and now with the exception of the hammer throwing and high jumping records the Olympic Club holds all the Pacific Coast records for out door sports, and it is not at all improbable but that it will claim these records before another year goes by. When one good man retires there is always another to take his place, and the absence of Purcell and Schefferstein at next year'a championship meeting would not in the least endanger the club'a chance of success, for it has Foster, McArthur, Cooley, Espinosa, Casady and many other improving athletes to represent it. The weekly handicap races which have been given by the Olympic and Alpine Clubs for some months past have had much to do with the improvement shown by most of the out door men.

The athletes need practice and in order to make practice a pleasure it is absolutely necessary that inducements in the way of prize, etc., should be offered from time to time. Several new clubs have been started during the year but up to the present except the Alpine Club none of them have made any record on field sports.

Much was expected from the members of the San Jose Athletic Club but when the time for action came the Garden City boys were not in it. Since the championship games the University athletes have been very quiet and until recently the cinder path at Berkeley has been deserted. As a member of the P. C. A. A. A. the U. C. should be more liberal towards the outside clubs, by holding games at least twice a year which would be open to the members of associate clubs. This time last year the professional clubs were in full swing and the lovers of pugilism were in their glory. Since then matters have changed and now the professional sports are compelled to sit with their heads between their legs while the honest amateur is reaping a harvest of prosperity. In the Cycling world the past year also saw a big boom and there was a big increase in the membership of the Cal. Division L. A. W. Thanks to the exertions of the Bay City wheelmen members many good road races were given for which valuable prizes were awarded and owing to these good runs and races many indifferent riders began to take an interest in their wheels. The Alameda Bicycle Club which was started this year is a very promising young club and as its membership is rapidly increasing it is certain to be well known in the racing world before long. The Oakland, American and San Francisco Bicycle Clubs did not make any wonderful showing of late and the Bay City wheelmen and Alameda Bicycle Club are the only two organizations that make any effort to boom cycling. As the Olympic Club is in the athletic world so the Bay City wheelmen are in the bicycling world—the premier Club.

They will shortly build a new club house, a description on which we published some time ago More interest was taken in foot ball this year than last, and the season will soon be at its height. The fact that unusual interest is being taken in all kind of out-door sports at the present time means that the public are beginning to realize the good effects which proper and mile athletic training produces. Never before in the history of California was such an interest taken in cricket as at the present time. During the past three or four months many good games were played and large audiences witnessed the playing. The season is now over, but early in spring the boom is sure to repeat itself. Aquatic sports we regret to say, did not receive a proper amount of attention this year. Perhaps this lack of interest is due mainly to the fact that the wharves were bad and the boat houses dilapitated. Oarsmen as a general rule like comfort, but there does not seem to be too much of that in the neighborhood of Long Bridge. We hope that the present boom in all kinds of sports will continue, and that the season of 1891 will be even more prosperous than the one that is now about to close.

JOTTINGS FROM ALL OVER.

The annual two miles steeplechase and ten miles run for the championship of the Amateur Athletic Union came off Saturday afternoon, Dec. 13th, at the grounds of the Manhattan Athletic Club. The New York City events were held under the auspices of said organization, by permission of the Union, which body gave the M. C A. the privilege on condition that whatever profit occured from the contests should go to the treasury of the central body. The Manhattans settled the question of profit by admitting the public to the grounds free, and very few availed themselves of the privilege extended, the weather being very cold and the entries for the races holding forth little promise of interesting contest. The track was not in good condition for the making of extraordinary time, so no record cutting was indulged in. Summary:

To mile steeplechase—W T Young, Manhattan Athletic Club, first, in 10 min. 50 2-5sec ; A B George, Manhattan Athletic Club, second in 11 min. 16 2-5 secs.; Conrad Marks, Richmond County Athletic Association, third, fifty yards behind. Among the obstacles negotiated was a ten foot water jump. The Manhattan representatives alternately led until after entering upon the last half mile, when Young went to the front, and as George was unable to run up to his usual form, Young won with ease.

Ten mile run—Thomas P Conneff, Manhattan Athletic Club, first, in 55 min. 32 5 8 secs ; W T Young, Manhattan Athletic Club, second in 58 min. 20 secs ; John Lloyd, Prospect Harriers, third. in 56 min. 32 2-5 secs.; W. N. Jack Manhattan Athletic Club, quit at nine miles; W A DePodesta, Manhattan Athletic Club, quit at three miles and a half; J Adelsdorfer, Pastime Athletic Club, stopped at one mile. The winner was suffering from a lame foot, but won handsomely. The failure of Willie Day to start took away much of the interest that would otherwise have attached to the event.

The armory of the Thirteenth Regiment, N. G. S. N. Y., in Brooklyn, N. Y , was well filled on the evening of Saturday, December 13th, by ladies and gentlemen interested in athletic sports, the occasion being the joint meeting of Company H and the Varuna Boat Club. The affair, financially as well as in a sporting sense, was an encouraging success.

SUMMARY.

Fifty yards run—Final heat: G Chadwick, St. George Athletic Club, 13ft start, first, in 5 4-5s; F G Christie, Acorn Athletic Association, 9ft, second; H F Thompson, Varuna Boat Club, 11ft, third.

One mile walk—F R Simonson, Pastime Athletic Club, 45s, start, first, in 7m 34 2-5s; J B Keating, New Jersey Athletic Club, 10s, second; I L Weinstein, Young Men's Institute, 60s, third.

Half mile run, in heavy marching order—Ernest Collyer, Company C, Twenty-second Regiment, first, in 2m 34 2-5s; A S Macgregor, Company I, Seventy-first Regiment, second; Harry W Kraft, Company H, Thirteenth Regiment, and W S French, Company E, Seventh Regiment, ran a dead heat for third place, and as the former declined to run off, the prize went to French.

Tug of war—Varuna Boat Club team (Ira A Baird, Charles T Belger, C W Stockum, Ed H Baird, anchor) beat Acorn Athletic Association (C Edwards, R W Aahley, Carl Vofrei, A Cale, anchor) by half an inch in the first pull and a half in the second.

Running high jump—Herbert Herrick, New York, allowed 3½in , first, 5ft. 11¼in.; James H. Reilly, Institute Athletic Club, 6in., second, 5ft. 11in.; Alva Nickerson, New York Athletic Club, scratch, third, 5ft. 10¾in.

Half mile run—Fin l heat: E. W. Pierson, Riverside Athletic Club, 35yds. start, first, in 2m. 8 1-5s ; J. McCreery, St. George Athletic Club, 40yds., second; Frank Bernard, Acorn Athletic Association, scratch, third.

Six hundred yards race, for novices—Final heat: Edward Berton Jr., Prospect Harriers, first, in 1m. 25s.; E M. Ketchum, Brooklyn, second; C. Leiner, American Athletic Club, third.

One mile run—C. H. Stanton, Brooklyn Young Men's Christian Association, first, in 4m. 85s.; R. H. Collins, Prospect Harriers, 95yds. start, second; Garrett Fitzgerald, Star Athletic Club, 80yds , third.

Three hundred yards run—Final heat· H. F. Thompson, Varuna Boat Club, 14yds., first, in 37s.; E. E, Barnes, New Jersey Athletic Club, scratch, second; J. Dixon Jr., Manhattan Athletic Club, 12yds., third.

The silk banner offered for competition by clubs on the score of points was won by the Prospect Harriers, the St. George A. C. second, and the Acorn A. A. and Varuna B. C. being tied for third place. The games were followed by dancing.

ATHLETIC, GYMNASTIC, FENCING AND SPARING GOODS. Only house that can furnish the latest improvements. Send 4cts. stamp for catalogue to manufacturer, J. R. Judd, 101, 105 W. 36 St,, New York City.

THE FARM.

Character in Horses.

Traits Made Plain by the Expression of the Face.

Horse faces are as full of charactor as are men's faces, says the Indianapolis News. It is easier, perhaps, to read a horse's character in its face than it is to sum up the hidden traits of a man or woman by the facial expression. The horse's head is a correct indication of the character; the human expression oft times is wholly counterfeit.

"I never ask about a horse's trait," said a horse buyer at the market to The Indianabolis News the other day. "All I want is a good, sqnare look at him in the face. Once in 100 times I may mistake the head, but not oftner than that, I believe."

It doesn't reqnire an expert to read horses' faces either. A person who has never handled a horse can saunter down Washington Street any afternoon, and point out the good, docile family carriage horse, the biting horse, the treacherous animal, the one that is likely to kick, or run at any moment, or the proud, high spirited horse. that may be dangerous and yet not vicious in the least. The most interesting horse is the good-natured family horse. He hears ill will toward no one, and has the good will of all who look upon him. He has bnt to be seen to become a favorite. There are thousands of families who would as soon part forever with an immediate relative as to lose the good-natured old family horse—the one that lived with all the children, and often times, it seems, showed as much care and affection for them as their parents. The children or women of the family were always safe when ont with him. If some other horse run away he was always sure to get out of the way of all danger, and he never allowed the carriage he hauled to collide with an obstacle.

The biting horse always reminds one of the dyspeptic man—he is always mad, always irritated. Pedestrians frown at this horse as they pass along the street, and the horse, it may be remarked, never fails to frown back, and if opportunity affords, snap his enemy—and everything alive is his enemy—on the back with his big, broad teeth. It must be said for the biting horse, however, that he is not always of a disposition wholly bad. He may show bad temper when approached by man, woman or child, and still be one of the gentlest and most reliable while doing his daily work.

The kicking horse can nearly always be singled ont by the vicious gleam in his eyes, which stamps him a born kicker. And, too, the kicker is nearly always a restless, impatient animal, who seems to imagine that his born right to freedom is being interfered with.

Of all horses, though, the miserable looking horse attracts most attention. This is the horse that is persecuted by the use of the check rein. Like women and men who wear shoes a size too small, he shows the outward evidences of misery. Many good-natured horses, horsemen say, have been made fretful and vicious by being enslaved by the infamous and ornel check rein.

If there are men and women who are overburdened with struggles for life, have lost all spirit, have agreed to take things as they come, so there are horses broken down by hard and continuous service for man, which show by the facial expression that they are not caring whether this old world continues to go or not. These sad-faced animals may be found hitched to the drays around town, to the rickety wagons of the peddlers and the rag-pickers, and occasionally to the wagons of the contractors and teamsters. Once, perhaps, they were full of the buoyancy of youth, but constant drudgery has made them only tools, barely animate.

Early Development of the Horse.

In speaking of early development a writer in the National Stockman says: By early development I do not mean speed alone, hut the general muscular growth of the colt. I have two colts that were two years old last spring that weighed respectively 930 and 920 pounds when 20 months old. They have never been fat, bnt have always been in a good growing condition. They are to-day 16 hands high, and are nearly always mistaken for three and freqnently for four years old by people not acquainted with them. They are trotting-bred, stylish, up-headed, nice drivers, with lots of speed, and are not for sale. They were broken single and double when 13 months old, and with the exception of one week have had a small qnantity of oats each day since they were four months old—never more than six quarts, except about a month this fall, when they were fed nine quarts per day. My method has been criticised to qnite an extent by my neighbors who "don't raise theirs that way," and who claim I will never get pay for expense, etc, meaning the oats I have fed while their colts were eating nothing but grass, and also the time I have "fooled away" breaking yearling colts. They all have to admit, however, that my colts "look a little better than theirs just at present; hut then think of the grain they have eaten!" Well now let's see about this grain. During the six months of each year that my neighbors' colts have had no grain my colts have perhaps averaged four quarts each per day, Most of this time oats have been selling from 25c to 35c per bushel—for convenience say 32c per bushel. This for two years would make an additional expense ot $14.60 for each colt. Now there are colts in this neighborhood, sired by the same horse and from eqnally good mares that would not sell within several dollars of what mine would if they were to he sold, so I feel satisfied with the extra cost of feed, and the labor is not much. I simply feed them night and morning, keeping them in the barn nights except in hot weather when the flies are bad, then they are kept in through the day and go to grass nights. As to the time "fooled away" breaking, I have found by experience that I get better results to commence the colts' education at an early date than to wait until three or four years old, and furthermore, a good deal of this latter is done late in the afternoon when some of my friends have finished their day's work and are loafing about the grocery. The colts must be educated some time; the sooner the better if used carefully.

Save Your Cabbage.

It won't cost you anything, and the green worm will make sad havoc with them if you don't destroy them, take a kettle of hot water and pour about a gill into every head where you see any worms working; it effectually destroys every worm. Don't be afraid to give them a good sousing, it won't hurt the cabbage in the least. It may turn a few ontside leaves white, but they will make fine clean heads for all that. This is the best remedy I ever found for destroying the green worm in cabbages; it is a sure cure for them.—Exchange,

Cultivating the Tomato.

In an article under the above head, a writer in the practical farmer says the cry of physicians during the last few years seems to have been "More tomatoes and better health," and the American people have taken their advice. The increase in the consumption, and consequently production, of tomatoes has been enormous, and there are evident signs of a continnal increase. There is a profit in tomatoes, and when there are so many ways of disposing of them, there is really very little risk to run in case of an overstocked market. If more is raised than the markets can take at profitable rates; the canning factories stand ready to buy them up at the rate of $8 per ton, which means about 25 cents a bushel. Even at this low rate it pays to grow them, especially when you add to it the large profits obtained for the early and late ones. Next to the canning factory is the hame factory. Glass jars are only six and seven cents each, and they are just the thing for holding cooked tomatoes.

Every household should have plenty of stewed tomatoes for winter use. But one can make tomato culture profitable in another way. An enterprising farmer on Long Island tried it, and it worked successfully. He started a factory of his own, and ran in opposition to the big canning trusts. Neither were forced out of business, bnt he made a good year's profit out of the experiment. Tomatoes were cheap that year, and even the canning factories were pretty well stocked with last year's fruit. Little or nothing could be obtained for the tomatoes, of which he had plenty. He purchased several hundred quart jars, costing him less than five cents apiece when buying them by the five hundred. A large boiler was rigged np outside of the house, and the tomatoes stewed by the gallon. All of the jars were filled, and packed away carefully. In the winter he advertised canned tomatoes for sale, and supplied the nearest village stores and other customers. Everybody preferred them to the factory canned for three reasons. The home canned were better and purer, glass instead of poisonous tin was nsed, and the price was cheaper. There was one disadvantage about buying them, which, however, did not wholly counteract the advantages. This was that each purchaser had to return the glass jar before the following spring, or pay five cents for it. It was on the same principle that ginger ale bottles are returned. The jar of tomatoes cost them fifteen cents, five cents of which was returned on delivering back the jar. For every can of tomatoes he thus received ten cents profit not counting the labor and the cost of production. Ten dollars a hundred paid him well—far better than selling to the canning factory. Hereafter he is going to be his own canning factory, and very few tomatoes will be sold by him to factories by the ton. There is no reason why this operation can not be repeated by others, for there is always a local demand for stewed tomatoes, even if they cannot be sent to the cities

Planting Fruit Trees.

In planting fruit trees the first thing is to select a good location, the east or northerly side of the hill being the best, since the south or westerly side of the hill get too much heat in the latter part of the day, says the American Cultivator. The grass and weeds need to be killed, and the ground made rich enough to bear at least fifty bushels of shelled corn per acre.

In setting out the trees dig the holes broad enough to stretch the roots their full length, and but little deeper than the tree is set in the hole. In no case should this be deeper than the tree originally set before being taken up. Fill in a few inches of fine, rich loam, bnt put in no manure of any kind. Let the center of the hole be a little higher than the sides, so the roots will point a little downward. Have the tree ready. Take hold near the roots with one hand and with a sharp knife cut off all the broken roots with a slanting cut on the under side. Turn the tree the other end to. Cut a large piece off the top, also all the surplus limbs, leaving only such as are needed to form the top. Four or five limbs at the most should be sufficient.

Cut back the remaining limbs at least one half their length It requires much courage to trim a tree in this way, hut it will pay abundantly in the long run. Set the tree in the hole and straighten out all the roots and fibers. Work in the fine dirt well around them, and be sure that there is no vacant place under the roots. With a sprinkling pot sprinkle on a little water, then put on a little more dirt, and sprinkle again working in this way until the hole is filled up. A little packing of the earth should be done as the filling progresses, bnt do not pack too hard, or make the ground muddy with the sprinkler. Set the apple trees forty feet apart if you want nice fruit.

Ducks on the Farm.

The Pekin or Aylesbury ducks seem to be best adapted for purely economical purposes, having large bodies, white wings, and a habit of extremely rapid growth; says the Cultivator and Country Gentleman. They are prolific egg producers, and the eggs hatch well.

My experience with the young has been that extreme care is necessary for the first two or three days after they are hatched, as they do not begin to eat or drink readily, even when twenty-four or thirty-six hours old. A little patience, however, in teaching them to eat will overcome this difficulty—if difficulty others have found it. When once they begin to eat, they will need no urging, as any one who attempts to feed a couple of hundred will soon find out.

Their growth from the shell up to the time when they are eight or nine weeks old is simply marvelous. One can almost see their bodies expanding. But to sustain such a growth they must have a large supply of growth producing foods—milk, meat, bran, oats and whole wheat steamed, chopped clover steamed, and some corn meal, or better, cracked corn. To secure the greatest profit, the young stock should be marketed at about eight weeks of age. Prices in other years have been very good for young ducks at the proper season in the spring, in May and June, but the present season has seen a decrease in prices, I believe—probably owing to the large number that are produced. A great many have doubtless gone into raising them for market, induced by the good prices and the very rosy accounts that certain ones have given in regard to the business.

The adult ducks are most excellent and persistent layers, and will average more eggs than the general run of hens, and the eggs will usually sell at an extra price. Wisely conducted, the raising of ducks may be made to pay a profit, bnt the average poultry keeper will probably make more profit from hens, giving them the same care, and such food as ducks require in order to do well. If one is situated by tide waters, where the ducks can gather a good deal of their living, the margin of profit might perhaps be quite large.

Enormous Potato Crops.

Nearly 1,000 bushels of potatoes, or, to be exact, 974 bushels and 48 pounds, have been grown on one acre of land in Johnson County, Wyoming, the past season, says the Massachusettts Ploughman. This crop wins the first prize offered by the American Agriculturist, and also the first prize offered by the Wyoming Legislature, for the largest yield of potatoes on one exact acre. It was grown on virgin soil, without manure or fertilizer, but the land was rich in potash, and the copious irrigation of water also rich in saline material. There were 22,800 sets planted on one acre, weighing 1560 pounds containing one, two and three eyes each of the Early Vermont and Manhattan varieties. The profit on the crop on this first prize acre was $714 exclusive of $500 in prizes. Another large crop was that of R. A. Chisholm, of Del Norte, Cal., of 847½ bushels, on 2000 pounds of fertilizer. There was great interest in the competition in the famous potato growing county of Aroostook, Northern Maine, where the crops secured ranged from 450 to 746 bushels per acre. These crops largely exceed those grown in a similar competition last year, when 731½ bushels of potatoes in Aroostook county took the grand prize of $1100. Other prize crops last year were—135 bushels of oats on one acre, 80 bushels of wheat and 255 bushels of shelled corn. It appears that the average Western potato crop on virgin soil is hardly up to that under ordinary culture in the East, while intelligent fertilization seems equally profitable in both sections. The wonderful operation of the mysterious laboratory of the soil is emphasized by the evidence in this competition that crops were increased 50 or 100 per cent. by the application of actually pure plant food at the rate of only one pound to 100 or 200 square feet of land. The superiority of fertilizers or chemical manures over stable manure for potatoes is also emphasized by the two years' contest.

The State Agricult'l Society

Occident Stake of 1893

Trotting Stake for Foals of '90.

To be Trotted at the

State Fair of 1893

Entries to close JANUARY 1st, 1891, with Edwin F. Smith, Secretary, at office in Sacramento. One hundred dollars entrance, of which $10 must accompany the nomination; $15 to be paid January 1, 1892; $75 to be paid January 1, 1893, and $50 thirty days before the race. The Occident Cup of the value of $400 to be added by the society. Mile heats three in five to harness. First colt to receive the cup and six-tenths; second colt three-tenths, and third colt one-tenth of the stakes. Five to enter, three to start; otherwise the N. T. A. rules to govern.

The value of this stake in 189., exclusive of cup, was $1,535.

CHRIS. GREEN, President.

EDWIN F. SMITH, Secretary.

Catalogues Compiled.

Pedigrees Traced & Tabulated

The undersigned, having had an experience of over five years in work of this kind, is well posted in regard to trotting pedigrees and performances, and will give special attention to compiling catalogues, circulars, advertising cards, tabulating and tracing pedigrees, etc. My facilities are unexcelled for doing this sort of work, and parties can arrange with me to do both compiling and printing at reasonable rates. Samples, estimates and references will be furnished parties contemplating having work done. Satisfaction guaranteed.

DANIEL GEARY.

Room 90, 140 Nassau St.,

P. O. BOX 2511 NEW YORK.

Pictures of Great Horses.

ALL IN COLORS.

Size of Sheet 13 1-2 by 17 3-4 Inches.

Price 20 Cents, or Six for $1 00.

The racing season is over, and now everybody wants pictures of the great horses. We have ready Elegant Pictures of the great California horses

Sunol, Stamboul, Palo Alto and Salvator,

And also the champion Nelson, Axtell, Belle Hamlin, Guy, Maud S, Jay-Eye-See, Roy Wilkes, Richball, Johnston Salvator and Tenny Race, Hanover, The Bard, Terra Cotta and Ten Broeck.

PRICE—Twenty Cents each, or Six for One Dollar, by Mail, Post Paid, on receipt of price. Address,

BREEDER & SPORTSMAN'S

FUTURITY STAKES.

For Mares Covered in 1889. (Trotting Foals of 1890)

To be Trotted in 1893.

Closed JANUARY 1st, 1890, with 284 Entries.

Subscriptions payable as follows: $10 on January 1st, 1890, when nominations closed, $10 Augnst 1st, 1890; $10 JANUARY 1st, 1891; $10 January 1st, 1892; $10 January 1st, 1893 and $50 for starters, payable July 1st, 1893.

Neglect to make any payments at the time stipulated will incur forfeiture of all previous payments.

The Washington Park Club,

CHICAGO, ILL.

Announce the following Stakes, to close January 15th, 1891, to be run at their Summer Meeting of 1891, beginning Saturday, June 20th, and ending Saturday, July 18th, for which a programme will be arranged for

TWENTY-FIVE DAYS' RACING

—WITH MORE THAN—

$110,000

In Added Money to Stakes and Purses.

$5,000. THE WHEELER HANDICAP. $5,000.

A SWEEPSTAKES for three-year-olds and upwards $100 each, $25 forfeit, or only $10 if declared; $5 000 added; the second to receive $750 and the third $250 out of the stakes. Weights to be announced Monday, July 6th; declarations to be made on or before Saturday, July 11th. Starters to be named through the entry box Friday, July 17th. A winner of any race after the announcement of weights of the value of $1,500 to carry five pounds extra. TO BE RUN SATURDAY, JULY 18TH. One mile and a quarter.

$2,000. THE GREAT WESTERN HANDICAP. $2,000

A SWEEPSTAKES for all ages, $50 each, half forfeit, or only $10 if declared out on or before May 1st, 1891; $2 000 added; the second to receive $500 and the third $200 out of the stakes. Weights to be announced April 1st, 1891. A winner of any race after the publication of weights of the value of $1,000 to carry five pounds; of $1,500, seven pounds extra. One mile and a half.

$1,500. THE OAKWOOD HANDICAP. $1,500.

A SWEEPSTAKES for all ages, $50 each, half forfeit, or only $10 if declared out on or before May 1st, 1891; $1,500 added; the second to receive $300 and the third $100 out of the stakes. Weights to be announced April 1st, 1891. A winner of any race after the publication of weights of the value of $1,000 to carry five pounds extra. One mile and a furlong.

$1,500. THE BOULEVARD STAKES. $1,500.

A SWEEPSTAKES for all ages, $25 each, $10 forfeit; $1,500 added; the second to receive $300 and the third $100 out of the stakes. A winner in 1891 of two races to carry 5 lbs.; of three or more races, 7 lbs. extra. Maidens allowed 10 lbs. One mile.

$1,250. THE MAIDEN STAKES. $1,250

A SWEEPSTAKES for three-year-olds (foals of 1888) that have not won a race previous to January 1st, 1891; $50 entrance, $15 forfeit, with $1,250 added, of which $300 to the second and $100 to the third. Maidens at the time of starting allowed 5 lbs. One Mile and a Furlong.

$1,250. THE DEARBORN HANDICAP. $1,250

A SWEEPSTAKES for three-year-olds (foals of 1888), $50 each, $15 forfeit, with $1,250 added; the second to receive $300 and the third $100 out of the stakes. Weights to be announced by 12 M. two days before the day appointed for the race. Starters to be named through the entry box, at the usual time of closing, the day before the race. One Mile and a Furlong.

$1,250. THE LAKEVIEW HANDICAP. $1,250.

A SWEEPSTAKES for two-year-olds (foals of 1889), $50 each, $15 forfeit, with $1,250 added; the second to receive $300 and the third $100 out of the stakes. Weights to be announced by 12 M. two days before the day appointed for the race Starters to be named through the entry box, at the usual time of closing, the day before the race. Three-quarters of a Mile.

$1,250. THE QUICKSTEP STAKES. $1,250.

J. E. BREWSTER, Secretary.

Kentucky's Blue Ribbon Fair

Read! $5,000 for $100.

THE BLUE RIBBON $5,000 FUTURITY PURSE

—FOR THE—

Produce of Mares Bred in 1890, to be Trotted at the Maysville Fair, Maysville, Ky., Third Week in August, 1893,

——ON THE FOLLOWING CONDITIONS——

Mares to be nominated, named, described and by what horse served January 1, 1891, $10 to accompany nomination. AUGUST 1, 1892, $15 due. JUNE 1, 1893, $25 due. $50 to start, evening before the race.

Description and name of the colt to be forwarded by January 1, 1892. Mares proving barren or foaling dead foals, entrance money will be returned. All claims of this kind must be made by July 1, 1891.

Race to be mile heats, best two in three. Purse divided 50, 25, 15 and 10 per cent. to winners.

Every owner of a good mare should nominate whether you expect to train the colt or not, especially if you expect to sell. Encourage the buyer to train and give him a chance to win it out. Remember, Maysville has one of the fastest and best mile tracks in the world.

JAMES W. FITZGERALD, Secretary.

The Standard Bred Stallion

CALAVERAS

Will make the Season of 1891 at

LODI.

(LIMITED TO TWENTY MARES.)

Description.

Calaveras is a handsome chestnut; foaled 1887. He is a horse of splendid conformation, stylish, high spirited, kind, level headed and remarkably intelligent, and from his fine blood lines must get game and speedy colts.

Pedigree.

Calaveras is by Hawthorne 10,935. (sire of Tempest 2:19, Moses S. 2:21½, John C. Shelly 2:20¾, Chief Thorne (2 yrs.) 2:20) by Nutwood 600, record 2,18¾, sire of forty trotters and eight pacers in the 2:30 list.

Calaveras's first dam is Fanny by Muldoon, he by George M. Patchen, Jr. Second dam Sarah by Wine Creek. Third dam Jessie by Morgan's Black Hawk. Wine Creek was a half brother to David Hill. Sarah's half brother, Bickford, trotted at San Jose at Startle's wheel in 2:28¾. Sarah has trotted 32 miles inside of two hours on two separate occasions.

TERMS.

$30 for the season. Payable at time of service. Mares not proving with foal may be returned next season free of charge, in case the horse or mare has not changed ownership. For further particulars apply to

WM. SALES,

Mokelumne Hill, Calaveras Co.,

or to DANIEL NUNAR, Lodi.

Thoroughbred Stallion

JACKSON

THE Hollywood Trotting Stock,

Property of B. C. HOLLY, Vallejo, Cal.

——WILL BE SOLD AT——

PUBLIC AUCTION,

WEDNESDAY, January 7, 1891, commencing at 10:30 o'clock, at

Hollywood Farm,

Situated three miles from Vallejo on the Napa Road. All Trains Stop at Flosden.

Consisting of FIFTY-TWO HEAD of first-class and fashionably bred

Stallions, Brood Mares, Colts, Fillies and Horses in Training.

Send for Catalogue.

ANNOUNCEMENT.

Owing to ill health, I have fully determined to sell at auction my entire stock of trotters and thorough breds. I have been an extensive buyer, both privately and by auction, for the past four years, and have endeavored to get the best. Whoever will take the trouble to glance over the catalogue of sires, represented in the sale, and then notice the producing families that support them on the dam's side will see that nearly all the remarkable getters are included.

TERMS OF CREDIT.

While the terms of the sale are cash, responsible buyers may have the privilege of credit for an agreed time, by observing the following conditions: Buyers must furnish satisfactory security, and must, prior to the opening of the sale, notify the owner and obtain his approval, specifying the drawer and endorser of the proposed note. Notes to bear six per cent., and payments to be made at the Vallejo Commercial Bank. In reference to credits, address B. C. Holly, Vallejo, Cal.

For Catalogues, now ready, address

B. C. HOLLY, Vallejo, Cal.

Or BREEDER AND SPORTSMAN, San Francisco, Cal.

DISPOSAL SALE.

TOGETHER OR SEPARATELY.

Mambrino Wilkes 6083

Sire of Five in the 2:30 List.

BALKAN (3-year old Record 2:29 1-2.) 8848

(Separately timed in three different races in 2:22, and can show now a much faster rate of speed.)

FANNY FERN (dam of Balkan, 2:29 1-2,

Mollie Drew, 2:27, Fred Arnold, 2:33¼, Onyx (trial 2:40), etc., with nine of her immediate offspring. Freedom, yearling record 2:29¾, descends on the dam's side, from Fanny Fern through Mollie Drew.

FANCY (the dam of Gus Wilkes, 2:22.)

ANNIE LAURIE (2:30 at 3 years old.)

And a few other choice broodmares, standard and registered, with their progeny.

ALSO

The San Miguel Stock Farm.

This place is as well adapted to the raising of fine stock as any; has good stables, full mile track (kite shape), etc. The soil is as good as any the sun shines on, whether for raising grain or fruit.

PROOF—Grain sown about the first of April, this year, produced a fine crop.

Walnut Creek, which never fails, runs through the place. There are also a never-failing spring and two wells. Water can be obtained by sinking twenty to twenty-three feet. Apply to

IRVIN AYRES.

30 and 32 Fremont Street, S. F.

FOR SALE.

Two Nutwood Stallions

Baywood & Fleetwood.

BAYWOOD is eleven years old, dark mahogany bay, with black points, weighs twelve hundred pounds, fine disposition, has a record of 2:33 this year, and one of his colts 2:16. He has shown miles in 2:26 last year. His dam is by G. M. Patchen, Jr. Second dam by Champion. Third dam by Belmont. He is in fine condition and looking well.

FLEETWOOD is ten years old, is sorrel, very much like his sire, lots of style and fine action; not quite sixteen hands, weighs eleven hundred pounds; has never been trained, shows lots of speed; fine mane and tail. His dam is the dam of Dr. Swift 2:24, sired by Young America, he by Jack Roberts. He is looking fine and in fine condition; also, some colts and fillies together with Dr. Swift, pacer. Enquire of

E. S. SMITH,

Cor. Third & Empire Sts, San Jose.

---

FOR SALE.

A FOUR YEAR OLD STALLION

Oliver B.,

Full Brother to Contractor, 2:24 3-4.

By Sultan, dam Madam Harding by Overland; second dam Kate Tabor. OLIVER B. is a handsome seal brown in color; kind, gentle and level-headed. He is about 16½ hands high; weighs about 1,100 lbs., and is a horse of splendid conformation, bone and muscle. He is perfectly sound; without a blemish, and while he has had no track work, shows evidence of great speed.

The reason for selling is that the owner has a stallion by Stamboul. As to the value of this young stallion, the undersigned refers to Walter Maben, San Gabriel, or, L. J. Rose, Los Angeles.

For price, etc., address

OWEN BROS.,

Fresno, Cal.

FOR SALE.

The Bay Mare

Rosette,

By Whetley, full sister to Daisy D, now in foal to Harry Peyton, and her filly seven months old by Three Cheers, full sister to Acclaim. Price for both $1,000. Or Rosette, $1,000; filly, $500.

UNDERHILL & McFAYDEN.

Santa Rosa, Cal.

	4th dam and beyond thoroughbred.	4th dam Eagletta (thoroughbred) by Grey Eagle.	4th dam by Whip.

How to Get Stock to the Souther Farm.

The Souther Farm is one and a half miles northeast of San Leandro, and eight miles southeast of Oakland. The stables are about one mile east of the county road, which runs between Oakland and San Leandro. The place to turn off is at Stanley Road, where a large signboard of the farm is placed. Guide boards will be found at every cross road. The roads are very good.

All stock sent from San Francisco may be brought over by Express, which leaves San Francisco on the Creek route boat. In the case of very young or very valuable horses, the Souther Farm will send reliable men to lead or drive over any stock that will not lead behind a wagon. A small charge will be made in such cases, to cover the extra expense incurred.

Horses are very easily taken from Oakland to the farm, and where it is inconvenient for owners to bring them or send them, the farm will send after anything that is to come.

Horses can be shipped by rail from almost all parts of the State to San Leandro. Always notify the Farm several days before shipping anything, and then men will be on hand to receive stock on arrival. The railroad station is but two miles from the Souther Farm, and the agent invariably gives immediate notice of the arrival of any stock consigned to the above farm, but when word is sent to the farm in good season by letter or telegram, the animals sent are saved waiting a couple of hours in the car.

Passenger trains leave San Francisco (from the broad gauge ferry) and First and Broadway, Oakland, at frequent intervals during the day. There are several trains from San Jose to San Leandro on both the broad and narrow gauge railroads; the broad gauge, by way of Niles, is much more convenient for getting to the farm. There are trains each day from Sacramento, Stockton and Livermore to San Leandro. In ordinary weather it is a short and pleasant drive from Oakland to the Souther Farm or from San Francisco to the Farm by way of the Creek route ferry boat. Always notify the Souther Farm just when you will arrive at San Leandro, and some one will meet you at the station. If you do not recognize the farm conveyance, ask the stage driver, who will point it out.

Write to the above address for references, circulars and price lists. Terms reasonable. Visitors Welcome any day except Sunday.

GILBERT TOMPKINS, Proprietor.

For Sale.

THE STANDARD STALLION

CADUCAS 10,480,

By Almont Medium 2:28½, dam Amelia T., (by Alcona 730), full sister to Prince Warwick 2:16¼. Caducas is a handsome two-year-old, thoroughly broken, and while he has not been driven for speed as yet, he shows great promise. Also

Represented at Sacramento by Edwin F. Smith secretary State Agricultural Society.
At San Jose by Messrs. Montgomery & Rea, Real Estate Agents.
Being the oldest established firm in the live-stock business on this Coast, and having conducted the important auction sales in this line for the past fifteen years, amounting to one half a million of dollars, we feel justified in claiming unequaled facilities for disposing of live stock of every description, either at auction or private sale. Our list of correspondents embraces every breeder and dealer of prominence upon the Pacific Coast, thus enabling us to give full publicity to animals placed with us for sale. Private purchases and sales of live stock of all descriptions will be made on commission, and stock shipped with the utmost care. Purchases and sales made of land of every description. We are authorized to refer to the gentlemen whose names are appended.

Training The Trotting Horse

BY CHARLES MARVIN.

This great practical horse book is a handsome, three hundred page octavo, bound in cloth, elegantly printed, superbly illustrated, and explains in every detail the remarkable success of CHARLES MARVIN and the whole plans and methods pursued at Palo Alto as to breaking, training, shoeing, gaiting, driving, keeping, racing and breeding trotters.

Read what J. C. Sibley, the owner of St. Bel, says of this book: "In this work Marvin has let out all the mysteries of the craft, and it is so simple and plain that any breeder, owner, trainer or rubber who has any relish for his business can take a colt as a yearling and develop to the highest and fullest extent that colt's capacity as a trotter. The work impressed me so strongly that I have ordered twenty copies, and shall place one in the hands of every rubber on our farm." Mailed postpaid for $3.50,

Address,

THE BREEDER & SPORTSMAN,

Pure English Bloodhounds.

—:o:—

The first genuine English bloodhound pups seen on this coast are now offered for sale. Both parents imported from Brough's famous kennels in England; pedigree includes over twenty champions, besides the celebrated COUNTESS, the model for Landseer's "Sleeping Hound." The English bloodhound is the kindest of pets and most intelligent of companions. In tracking lost or stolen stock, his instinct is unerring. His noble appearance is shown in the bronzes at Shreves', and art-photographs at Vickery's. Send stamp for descriptive circular and 25 cents for photograph.
