Syra-Cord TIRES

A Clean-Cut Tire Policy

There is one policy back of the manufacture of SYRA-CORD TIRES. That policy is to build the finest cord tire it is possible to produce.

SYRA-CORDS are made in a factory where the only tires built are cord tires. They are built under the personal direction of cord tire specialists.

The manufacturers of SYRA-CORD TIRES know that in this age of specialization, he who is a "Jack of all trades" can master none. When you buy SYRA-CORD TIRES you buy a tire made by masters of the building.

How to Use The Blue Book

*Fundamental points to understand
in order to use the Blue Book
conveniently and effectively*

First:

Turn to the folded *General Index Map* facing next page. Locate your starting point and destination on this map.

Second:

If unfamiliar with the location of your starting point or destination, see *General Index of Towns* following Sectional Index Maps which begin on page 16. First page of *General Index of Towns* explains how to locate the desired town by key number and letter.

Third:

Now note the *Route Number* on the black line of the map with arrow pointing in the direction of your travel.

Fourth:

Turn to the corresponding *Route Number* (not page number) in the book for complete running directions.

Fifth:

Where there is an option of routes, select the one desired by referring to *Route Chart*, page 4. (*Preferable routes are indicated by heavy lines.*) This chart, which gives mileages, can also be used for quick reference in selecting long tours.

(For further detailed information see pages 12-13.)

Table of Contents, page 11, gives location of the various maps and subjects included in this volume.

YOU CAN PURCHASE

HOOD TIRES

at the sign of the HOOD DEALER

You can buy a car load of sugar for less money per pound than you will pay per pound for a wagon load of the same sugar.

In the same way, you can buy 10,000 miles in a Hood Extra Ply Tire at less cost per mile than you will pay for 10,000 miles in *two* ordinary tires that run 5,000 each.

One Hood is at least \$10.00 cheaper than *two* ordinary tires and delivers the same mileage, saving the user the price of one tube and the worry and trouble of unnecessary tire changes.

The Hood is cheaper (more economical) for the user because he buys 10,000 miles in one tire. The other tires cost more to run the same mileage because there is double the manufacturing expense and double the selling expense.

The Hood is made to run the maximum number of miles. It costs a little more in the first place, but costs *least* in the *last* place—which is on the road.

Think it over—CAN YOU AFFORD TO BE WITHOUT HOODS?

General Index Map of Automobile Routes in Volume 8

Showing Main Highways in California, Nevada, Utah and Arizona, with correct geographical locations of cities and towns, with extension routes into Oregon, Colorado, Idaho, Wyoming and New Mexico.

For convenience this folded General Index Map has been subdivided into sections and reproduced on pages 16-25.

Route Chart of main routes (page 4) shows route numbers, mileages and terminals only. A ready reference to main routes between cities and large towns.

City Maps For maps of cities and towns refer to General Index of cities and towns, pages 26-55, and for list of National Advertisers, page 56.

The Table of Contents page 11, shows where to find all of the features in this volume.

Character of Roads given in text immediately preceding running directions for each route, will materially aid in the selection of tours.

Points of Interest are noted on the pages where the route matter pertains to their locality.

For Correct Geographical Locations of Towns and Directions of Routes See General Index Map on Page 7.

ROUTE CHART of THIS VOLUME (No. 8)—Numbers with Arrows (\leftarrow 245) are **ROUTE NUMBERS**. Found at Upper Outside Corners of Text Pages. Points of Arrows Indicate Direction in which Routes Read. **FIGURES IN LINES** Indicate Distances Between Terminals. **HEAVY LINES** Show Preferable Routes.

Every - where

No matter where you tour you are not far from one of the thousands of garages displaying the famous Michelin Sign—the hallmark of quality in the tire world.

Every one of these dealers will supply you with Michelin Cord or Fabric Casings, and the famous ring-shaped Michelin Tubes, the best you can buy, at prices you can rely upon as fair.

Remember the Michelin Sign and what it stands for.

Michelin Tire Co., Milltown, N. J.

Automobile Blue Book 1 9 2 0

"Standard Road Guide of America"

Established 1901

Volume Eight

California, Nevada, Utah and
Arizona with extension routes
into Oregon, Colorado, Idaho,
Wyoming and New Mexico

THE Blue Books cover the entire United States and Southern Canada in thirteen Volumes (see insert between pages 320 and 321). They tell you where to go and how to get there, giving complete maps of every motor road, running directions at every fork and turn, with mileages, all points of local or historical interest, state motor laws, hotel and garage accommodations, ferry and steamship schedules and rates. A veritable motorist's encyclopedia.

GET TOP VALUE

There is superlative protection—enduring service—in Rayntite Top material. Under its beautiful exterior are all the essential qualities—the inbuilt strength and stamina that give top value.

DU PONT
FABRIKOID
RAYNTITE

must be satisfactory. Its ample guarantee—a Du Pont guarantee—insures this. A trim Rayntite Top will give your car the distinctive elegance that compels admiration. Its extra cost is more than repaid by its final economy.

If your local auto trimmer does not carry Rayntite, he can get it from us promptly. Insist upon its use—it is worth while.

Motor Quality Fabrikoid

is a durable, beautiful, sanitary and economical material for re-covering torn or shabby auto upholstery.

**A new top and new cushions
may save you buying a new car**

Write for samples and literature, giving us the name of your nearest auto trimmer.

DU PONT FABRIKOID CO.

HOW TO US

The Trip:—This route and number corresponds to the route and number you have picked from the General Index Map or the Route Chart.

The Return Trip:—The same complete directions are given reversed.

Description of Trip:—Tells you via what principal towns you travel, the condition of the roads, etc.

Total Mileage:—This column shows how far you have gone. Keep your odometer set to check with these mileages.

Mileages Between Points:—This column shows the distance between points enroute.

Running Directions:—Direct you at every prominent fork or turn in the road. So clear you can't go wrong.

Danger Points:—Warn you in advance of bad hills, sharp turns or railroad grade crossings.

Hotels and Garages:—Tells you where good, reliable accommodations can be found enroute.

City Map:—When you reach a town the City Map shows you the general layout of the town, the street names and the best and quickest way through town. There are hundreds of these maps in every volume.

Points of Interest:—Tell you what is interesting to see enroute. Like a personal guide it adds to the pleasure of the trip

1st—Know what is in your book

2nd—To find your destination

General Index of Towns and Routes

| | Location General Index Map Page Seven | Detail Map Back of Book Pages 126-100 Plate Key |

Table of Contents:

Found on page 11. A complete indexed outline to everything in the book. For instance, the description and page number of every map in the book is clearly outlined; also how to find the Index of Towns, Hotels, Garages, Ferries, Motor Laws, Points of Interest, etc.

General Index of Towns:

Found on pages 24 to 53. Always turn to this index to locate a town. The key to the right for Sacramento (G 3) is the location on the folded map, pages 3 to 8. This index tells you where good Hotels, Inns, Garages, Service Stations, etc., are located and on what page to find the Points of Interest or City Map of each town.

3rd—To find how to get there

4th—To find main traveled roads

General Index Map:

Found on page 7. Having found the location of your destination on this map, pick out the route number or numbers leading there from your starting point. (For full information about numbers and arrows see directions on the map itself.) Having found your route numbers, then turn to the route chart—see explanation following.

Route Chart:

Found on page 4. Shows you the main traveled highways indicated by the heaviest lines. This map is for laying out longer trips and shows only towns that are route centers or that have converging or intersecting routes passing through them.

Tourist Garage, 8th E. St.

SUPPLIES—Bowman Auto Supply Co., 11th & Jay Sts.

SERVICE STATIONS—Batteries—Exide Battery, Graham & Lamus Co., 711 M St.

POINTS OF INTEREST, SACRAMENTO, CAL.

Sacramento (pop. 75,000, alt. 30 ft.), the capital of the state of California, is one of the most interesting and historical cities on the Pacific coast. It was founded in 1839, by General John A. Sutter, and the second time

the American flag was raised in California, it was raised over Fort Sutter. This historic old fort, which is within the old limits of Sacramento City, has been restored and is cared for by the Native Sons of the,

VOLUME T

1920 Edition

Volume T is the new Transcontinental Edition of the Blue Book, covering in **ONE** volume all of the main trunk-line highways of the entire United States.

Volume T is prepared specially for Transcontinental and Long-Distance Tourists. No local or side routes whatever are given. For these, secure the regular numbered volumes shown on the map below.

On sale wherever Blue Books are sold

SAFEGUARD YOUR MONEY On Your Motor Trip

The Travelers Cheque system was originated, in 1891, by the American Express Company, to protect the money of travelers at home and abroad. The success of the plan to provide a safe, convenient, and universally-accepted form in which to carry travel funds, is attested by the fact that Travelers Cheques are now known and used the world around. Travelers by railroad, steamship or motor have come to regard them as indispensable.

Banks, tourists' agencies and express offices sell these sky-blue Travelers Cheques, bound in neat leather folders, at a charge of fifty cents for each \$100. The Cheques are in denominations of \$10, \$20, \$50, \$100, \$200.

You sign them when you buy them. Then, wherever you are, at any time of day or night, on banking days or Sundays, whenever you wish to pay a bill or make a purchase, you tear out a Cheque and sign it again in the presence of the person accepting it. The two signatures identify you, immediately, without question and without the embarrassment sometimes incidental to cashing a personal check.

American Express Travelers Cheques protect you against loss. Thieves do not seek them, for the Cheques can be cashed only by your signature, and the penalty for forgery is a heavy one.

Should the Cheques be lost or destroyed, the filing of certain protective papers with the American Express Company restores you the amount of the uncountersigned Cheques.

They are negotiable at express offices and banks throughout the United States, Canada and abroad. Hotels prefer them, good garages, service stations, stores, shops, and restaurants readily accept them in payment.

Obtainable at
Express Offices
and Banks

General Index

The following 29 pages make up the complete index for this Volume, containing a list of:

Cities and Towns

Under important towns a list of—

Hotels
Restaurants
Garages
Ferries
Service Stations

and

Under towns *not* located on map, a list of route numbers on which they will be found.

The key (i. e. A-3, K-5, etc.) given under heading of General Index Map, indicates the location of each town on the folded general index map in the front of the book, which, for convenience, is reproduced in sections on pages 16-25.

To locate a town on the map by the key—

Find the corresponding key letter and number on the margin of the map.

Now draw an imaginary straight line from both letter and number.

The town will be found at or near the intersection of these lines. (*See Illustration.*)

Where **City Maps** are given in this volume, page numbers indicating their location will be noted under the name of town.

Where **Points of Interest** are given, a line to this effect, showing page number, will be noted under name of town.

Page numbers listed after **Hotels, Restaurants, Garages, Service Stations, etc.**, indicate location of their advertisement in this Volume. **National Advertisers** are listed on page 56.

See **Table of Contents (Page 11)** for location of various other subjects covered by this book not listed above.

GENERAL INDEX of towns with key to location on General Index Map (page 7) and on Detail Road Maps (pages 755 to 786). Where towns are not shown on General Index Map the route numbers on which they appear are given. List of national advertisers, page 56.

GOODELL-PRATT

1500 GOOD TOOLS

No. 599

Friends of the Motorist

Motor Set No. 599

PREPARED for the man who guards against long delays on the road, for the enthusiast who matches the quality of his car with the quality of its extras, for the owner who cuts repair expense by the little mechanical attention he gives to his car.

This set contains twenty-seven tools and is suitable for repairing all ordinary road troubles. The tools come in an extra heavy leather-bound canvas roll and each tool is held firmly in

place by broad, strong leather straps.

Motorists can feel proud of this kit, for Goodell-Pratt skill and care have entered into its production. The great demand for this high-grade Motor Set proves its value.

Your dealer will be glad to show you how complete and handy this set is, or a more detailed description of this or any of the other 1500 Goodell-Pratt Tools will be sent upon request.

Motor Set No. 599 contains

WHEN IN DOUBT

**Ask Mr. Foster
He Probably Knows**

Ask him at any of his offices or write him about your travel problems. He maintains a thoroughly systematized organization of trained specialists for supplying, without charge, advice and information concerning travel by all known methods, and concerning schools, camps and educational tours. All of these offices are especially equipped with maps, tour books and printed data of many sorts for giving reliable information to automobile tourists. No fees are asked or ever accepted.

LONG DISTANCE ITINERARIES

Showing best way between important objectives with Route Numbers and Mileages. These ITINERARIES will enable you to lay out the best routes between important points.

FOR ITINERARIES FROM:

| | |
|-------------------|----------|
| El Paso | 1 to 3 |
| Los Angeles | 4 to 12 |
| Reno | 13 to 17 |

| | |
|----------------------|----------|
| Sacramento | 18 to 21 |
| Salt Lake City | 22 to 34 |
| San Francisco | 35 to 44 |

1—El Paso, Tex., to Grand Canyon.

| Route No. | (VOLUME 8) | Mileage |
|-----------|------------------------------------|---------|
| 650. | El Paso, Tex., to Deming, N. M.... | 107.8 |
| 651. | Deming " Douglas, Ariz..... | 156.7 |
| 652. | Douglas " Tucson, Ariz..... | 144.6 |
| 653. | Tucson " Phoenix, Ariz..... | 134.2 |
| 590. | Phoenix " Prescott, Ariz..... | 147.4 |
| 591. | Prescott " Ashfork, Ariz..... | 65.8 |
| 438. | Ashfork " Gd. Canyon, Ariz. | 72.4 |
| | | <hr/> |
| | | 828.9 |

2—El Paso, Tex., to Los Angeles, Cal.

| Route No. | (VOLUME 8) | Mileage |
|-----------|------------------------------------|---------|
| 650. | El Paso, Tex., to Deming, N. M.... | 107.8 |
| 651. | Deming " Douglas, Ariz..... | 156.7 |
| 652. | Douglas " Tucson, Ariz..... | 144.6 |
| 653. | Tucson " Phoenix, Ariz..... | 134.2 |
| 581. | Phoenix " Agua Caliente, Ariz. | 100.3 |
| 582. | Agua Caliente " Yuma, Ariz..... | 100.1 |
| 584. | Yuma " El Centro, Cal..... | 64.3 |
| 586. | El Centro " San Diego, Cal..... | 122.1 |
| 541. | San Diego " Los Angeles, Cal. | 134.5 |
| | | <hr/> |
| | | 1064.6 |

3—El Paso, Tex., to Salt Lake City.

| Route No. | (VOLUME 8) | Mileage |
|-----------|--------------------------------------|---------|
| 635. | El Paso, Tex., to Hot Springs, N. M. | 124.3 |
| 636. | Hot Springs " Magdalena, N. M. | 94.4 |
| 623. | Magdalena " Albuquerque, N.M. | 111.2 |
| 624. | Albuquerque " Santa Fe, N. M. | 66.6 |
| 617. | Santa Fe " Las Vegas, N. M. | 72.6 |
| 618. | Las Vegas " Trinidad, Colo. | 138.1 |
| 619. | Trinidad " Pueblo, Colo. | 90.1 |
| 735. | Pueblo " Colo. Spgs., Colo. | 42.6 |

(VOLUME 7)

| | | |
|------|--|--------|
| 322. | Colorado Spgs. to Buena Vista, Colo. | 95.3 |
| 410. | Buena Vista " Glen'w'd Springs, Colo. | 135.1 |
| 234. | Glenwood Spgs. " Gd. Junction, Colo. | 102.0 |
| 449. | Grand Junction " Green River, Utah. | 119.9 |
| 450. | Green River " Price, Utah | 66.8 |
| 451. | Price " Salt Lake City, Utah | 125.7 |
| | | <hr/> |
| | | 1384.7 |

4—Los Angeles to Grand Canyon.

| Route No. | (VOLUME 8) | Mileage |
|-----------|--|---------|
| 427. | Los Angeles, Cal., to San Ber'dino, Cal. | 63.3 |
| 432. | San Bernardino " Barstow, Cal. | 81.7 |
| 433. | Barstow " Needles, Cal. | 166.2 |
| 434. | Needles " Kingman, Ariz. | 71.0 |
| 435. | Kingman " Williams, Ariz. | 141.0 |
| 439. | Williams " Gd. Canyon, Ariz. | 64.8 |
| | | <hr/> |
| | | 588.0 |

5—Los Angeles, Cal., to Kansas City.

Via Santa Fe and La Junta.

| Route No. | (VOLUME 8) | Mileage |
|-----------|--|---------|
| 427. | Los Angeles, Cal., to San Ber'dino, Cal. | 63.3 |
| 432. | San Bernardino " Barstow, Cal. | 81.7 |
| 433. | Barstow " Needles, Cal. | 166.2 |
| 434. | Needles " Kingman, Ariz. | 71.0 |
| 435. | Kingman " Flagstaff, Ariz. | 177.4 |
| 620. | Flagstaff " Winslow, Ariz. | 64.8 |
| 621. | Winslow " Springerville, Ariz. | 135.8 |
| 622. | Springerville " Magdalena, N. M. | 130.5 |
| 623. | Magdalena " Albuquerque, N.M. | 112.1 |
| 624. | Albuquerque " Santa Fe, N. M. | 66.6 |
| 617. | Santa Fe " Las Vegas, N. M. | 72.6 |
| 618. | Las Vegas " Trinidad, Colo. | 138.1 |

| Route No. | (VOLUME 7) | Mileage |
|-----------|------------------------------------|---------|
| 518. | Trinidad to La Junta, Colo. | 85.8 |
| 345. | La Junta " Syracuse, Kan. | 114.9 |
| 346. | Syracuse " Dodge City, Kan. | 107.3 |
| 347. | Dodge City " Hutchlnson, Kan. | 154.5 |
| 351. | Hutchlnson " Emporia, Kan. | 122.4 |
| 352. | Emporia " Kansas City, Mo. | 130.3 |
| | | <hr/> |
| | | 1995.3 |

6—Los Angeles, Cal., to New Orleans.

Via El Paso, Ft. Worth and Houston.

| Route No. | (VOLUME 8) | Mileage |
|-----------|--|---------|
| 483. | Los Angeles, Cal., to San Diego, Cal. | 132.4 |
| 556. | San Diego " El Centro, Cal. | 119.3 |
| 558. | El Centro " Yuma, Ariz. | 64.3 |
| 560. | Yuma " Agua C'ente, Ariz. | 100.1 |
| 562. | Agua Caliente " Phoenix, Ariz. | 99.2 |
| 642. | Phoenix " Tucson, Ariz. | 133.0 |
| 643. | Tucson " Douglas, Ariz. | 140.4 |
| 644. | Douglas " Deming, N. M. | 156.7 |
| 645. | Deming " El Paso, Tex. | 93.2 |

(VOLUME 7)

| | | |
|------|---------------------------------------|--------|
| 577. | El Paso, Tex., to Sierra Blanca, Tex. | 87.2 |
| 578. | Sierra Blanca " Pecos, Tex. | 126.2 |
| 579. | Pecos " Midland, Tex. | 129.0 |
| 581. | Midland " Abilene, Tex. | 151.4 |
| 582. | Abilene " Ft. Worth, Tex. | 170.8 |
| 776. | Ft. Worth " Waco, Tex. | 93.4 |
| 783. | Waco " Houston, Tex. | 191.7 |
| 865. | Houston " Crowley, La. | 205.4 |
| 866. | Crowley " New Orleans | 208.4 |
| | | <hr/> |
| | | 2402.1 |

7—Los Angeles, Cal., to Reno, Nev.

| Route No. | (VOLUME 8) | Mileage |
|-----------|--|---------|
| 381. | Los Angeles, Cal., to Bakersfield, Cal. | 127.5 |
| 361. | Bakersfield " Fresno, Cal. | 109.7 |
| 331. | Fresno " Modesto, Cal. | 94.4 |
| 337. | Modesto " Stockton, Cal. | 30.3 |
| 5. | Stockton " Sacramento, Cal. | 48.8 |
| 160. | Sacramento " Reno, Nev. | 145.9 |
| | | <hr/> |
| | | 566.6 |

8—Los Angeles to Salt Lake City.

| Route No. | (VOLUME 8) | Mileage |
|-----------|----------------------------------|---------|
| 412. | Los Angeles to Mojave, Cal. | 100.8 |
| 413. | Mojave " Bigpine, Cal. | 166.2 |

REGULATIONS GOVERNING THE ADMISSION OF AUTOMOBILES INTO CRATER LAKE NATIONAL PARK FOR THE SEASON 1919-1920

Pursuant to authority conferred by the acts of Congress approved May 22, 1902 (32 Stat., 202), and August 21, 1916 (39 Stat., 521), the following regulations governing the admission of automobiles and motorcycles into the Crater Lake National Park are hereby established and made public:

1. **Entrances.**—Automobiles and motorcycles may enter and leave the park by the western or Castle Creek entrance, the eastern or Sand Creek entrance, and the southern or Anna Creek entrance.

2. **Automobiles.**—The park is open to automobiles operated for pleasure, but not to those carrying passengers who are paying, either directly or indirectly, for the use of machines (excepting, however, automobiles used by park concessioners).

Careful driving is demanded of all persons using the roads.

The Government is in no way responsible for any kind of accident.

3. **Motorcycles.**—Motorcycles are admitted to the park under the same conditions as automobiles and are subject to the same regulations, as far as they are applicable.

4. **Hours.**—Automobiles will not be permitted to enter or leave the park before 6:30 a. m. or after 8 p. m., except in case of emergency.

5. **Permits.**—The permit must be secured at the ranger station where the automobile enters, and will entitle the permittee to go over any or all of the roads in the park. It is good for the entire season, expiring on December 31 of the year of issue. The permit must be conveniently kept so that it can be exhibited to park rangers on demand. Each permit must be exhibited to the checking ranger for verification on exit from the park.

6. **Fees.**—Fees for automobile and motorcycle permits are \$2.50 and \$1, respectively, and are payable in cash only.

7. **Distance apart; gears and brakes.**—Automobiles, while in motion, must not be less than 50 yards apart, except for purpose of passing, which is permissible only on comparative levels or on slight grades. All automobiles, except while shifting gears, must retain their gears constantly engaged. The driver of each automobile will be required to satisfy the ranger issuing the permit that all parts of his machine, particularly the brakes and tires, are in first-class working order and capable of making the trip; and that there is sufficient gasoline in the tank to reach the next place where it may be obtained. The automobile must carry at least one extra tire.

8. **Speeds.**—Speed is limited to 12 miles per hour ascending and 8 miles per hour descending grades, and when approaching sharp curves. On good roads with straight stretches and when no team is nearer than

200 yards, the speed may be increased to 20 miles per hour.

9. **Horns.**—The horn will be sounded on approaching curves or stretches of road concealed for any considerable distance by slopes, overhanging trees, or other obstacles, and before meeting or passing other machines, riding or driving animals, or pedestrians.

10. **Lights.**—All automobiles must be equipped with head and tail lights, the headlights to be of sufficient brilliancy to insure safety in driving at night, and all lights must be kept lighted after sunset when automobile is on the roads. Headlights must be dimmed when meeting other automobiles or horse-drawn vehicles.

11. **Muffler cut-outs.**—Muffler cut-outs must be closed while approaching or passing riding horses, horse-drawn vehicles, hotels, camps, or checking stations.

12. **Teams.**—When teams, saddle horses, or pack trains approach, automobiles will take the outer edge of the roadway, regardless of the direction in which they may be going, taking care that sufficient room is left on the inside for the passage of vehicles and animals. Teams have the right of way, and automobiles will be backed or otherwise handled, as may be necessary, so as to enable teams to pass with safety. In no case must automobiles pass animals on the road at a speed greater than 8 miles an hour.

13. **Accidents; stop-overs.**—Automobiles stopping over at points inside the park, or delayed by breakdowns or accidents of any other nature, must be immediately parked off the road, or, where this is impossible, on the outer edge of the road.

14. **Fines and penalties.**—Violation of any of the foregoing regulations will be punishable by revocation of automobile permit, or by immediate ejection from the park, or by a fine not to exceed \$500, or six months imprisonment, or by any combination of these penalties, and be cause for refusal to issue a new automobile permit to the offender without prior sanction, in writing from the Director of the National Park Service.

15. **Reduced engine power, gasoline, etc.**—Due to the high altitude of the park roads, ranging between 4,000 and 7,000 feet, the power of all automobiles is much reduced, so that a leaner mixture and about 40 per cent more gasoline will be required than for the same distance at lower altitudes. Likewise, one gear lower will generally have to be used on grades than would have to be used in other places. A further effect that must be watched is the heating of the engine on long grades, which may become serious unless care is used. Gasoline can be purchased at regular supply stations, as per posted notices.

AUTOMOBILE REGULATIONS FOR NATIONAL PARKS—(Continued)

REGULATIONS GOVERNING THE ADMISSION OF AUTOMOBILES INTO SEQUOIA AND GENERAL GRANT NATIONAL PARKS FOR SEASON 1919-1920

Pursuant to authority conferred by the acts of Congress, approved September 25, 1890 (26 Stat., 478); October 1, 1890 (26 Stat., 650); and August 25, 1916 (39 Stat., 535), the following regulations governing the admission of automobiles and motorcycles into the Sequoia and General Grant National Parks are hereby established and made public:

1. **Entrances.**—Automobiles and motorcycles may enter and leave the Sequoia National Park on the west from Visalia and Lemon Cove by any of the three entrances from Three Rivers, i. e., the Giant Forest Road, the Middle Fork Road to near Moro Rock, and the Mineral King Road, and may enter and leave the General Grant National Park on all roads leading into or from the park.

2. **Automobiles.**—The parks are open to automobiles operated for pleasure, but not to those carrying passengers who are paying, either directly or indirectly, for the use of machines (excepting, however, automobiles used by park concessions).

Careful driving is demanded of all persons using the roads.

The Government is in no way responsible for any kind of accident.

3. **Motorcycles.**—Motorcycles are admitted to the parks under the same conditions as automobiles, and are subject to the same regulations, as far as they are applicable.

4. **Roads, hours.**—The use of automobiles will be permitted on the Giant Forest Road, from the western boundary of Sequoia National Park to Giant Forest tourists' camp grounds and return at all hours. Automobiles will not be permitted to enter or leave General Grant National Park before 6 a. m. or after 9 p. m., except in case of emergency.

5. **Permits.**—Permits for Sequoia National Park must be secured from the superintendent at Three Rivers, Cal., or from his authorized representative at Cedar Creek Station on the Giant Forest Road in the park.

Permits for General Grant National Park must be secured at the office of the superintendent or at the ranger headquarters in the park.

Permits are good for the entire season, expiring on December 31 of the year of issue. The permit must be conveniently kept so that it can be exhibited to park rangers on demand. Each permit must be exhibited to the checking ranger for verification on exit from the park.

6. **Fee.**—The fee for an automobile or motorcycle permit in Sequoia National Park is \$2.50; and in General Grant National Park, 50 cents. These fees are payable in cash only.

7. **Distance apart; gears and brakes.**—Automobiles while in motion must not be less than 50 yards apart, except for purpose of passing, which is permissible only on comparative levels or on slight grades. All automobiles, except while shifting gears, must retain their gears constantly engaged. The driver of each automobile will be required to satisfy the ranger issuing the permit that

all parts of his machine, particularly the brakes and tires, are in first-class working order and capable of making the trip, and that there is sufficient gasoline in the tank to reach the next place where it may be obtained. The automobile must carry at least one extra tire.

8. **Speeds.**—Speed is limited to 8 miles per hour except that on good roads with straight stretches and when no team is nearer than 200 yards the speed may be increased to 15 miles per hour. Speed indicated on sign-boards along the road will control in all cases.

9. **Horns.**—The horn will be sounded on approaching curves or stretches of road concealed for any considerable distance by slopes, overhanging trees, or other obstacles, and before meeting or passing other machines, riding or driving animals, or pedestrians.

10. **Lights.**—All automobiles must be equipped with head and tail lights, the headlights to be of sufficient brilliancy to insure safety in driving at night, and all lights must be kept lighted after sunset when automobile is on the roads. Headlights must be dimmed when meeting other automobiles or horse-drawn vehicles.

11. **Muffler cut-outs.**—Muffler cut-outs must be closed while approaching or passing riding horses, horse-drawn vehicles, hotels, camps, or checking stations.

12. **Teams.**—When teams, saddle horses, or pack trains approach, automobiles will take the outer edge of the roadway, regardless of the direction in which they may be going, taking care that sufficient room is left on the inside for the passage of vehicles and animals. Teams have the right of way, and automobiles will be backed or otherwise handled as may be necessary so as to enable teams to pass with safety. In no case must automobiles pass animals on the road at a speed greater than 8 miles an hour.

13. **Accidents, stop-overs.**—Automobiles stopping over at points inside the park, or delayed by breakdowns or accidents of any other nature, must be immediately parked off the road, or where this is impossible on the outer edge of the road.

14. **Fines and penalties.**—Violation of any of the foregoing regulations will be punishable by revocation of automobile permit or by immediate ejection from the park or by a fine of not to exceed \$500, or by any combination of the three, and be cause for refusal to issue new automobile permit to the owner without prior sanction in writing from the Director of the National Park Service.

15. **Exceptions.**—Paragraphs 2, 4, 5, 6 and 7 hereof are not applicable to motor traffic on the Middle Fork and Mineral King roads in Sequoia National Park.

16. **Reduced engine power, gasoline, etc.**—Due to the high altitude of the park roads, ranging as high as 8,000 feet, the power of all automobiles is much reduced, so that a

AUTOMOBILE REGULATIONS FOR NATIONAL PARKS—(Continued)

leaner mixture and about 40 per cent more gasoline will be required than for the same distance at lower altitudes. Likewise, one gear lower will generally have to be used on grades than would have to be used in

other places. A further effect that must be watched is the heating of the engine on long grades, which may become serious unless care is used. Gasoline can be purchased at regular supply stations as per posted notices.

REGULATIONS GOVERNING THE ADMISSION OF AUTOMOBILES INTO YOSEMITE NATIONAL PARK FOR THE SEASON 1919-1920

Pursuant to authority conferred by the acts of Congress approved October 1, 1890 (26 Stat., 650) and August 25, 1916 (39 Stat., 535), the following regulations governing the admission of automobiles and motorcycles into the Yosemite National Park are hereby established and made public:

1. **Entrances.**—Automobiles and motorcycles may enter and leave the park by any of the entrances, viz., Tioga Pass, Aspen Valley, Crane Flat, Merced Grove, El Portal, Wawona and Mariposa Grove.

2. **Automobiles.**—The park is open to automobiles operated for pleasure, but not to those carrying passengers who are paying, either directly or indirectly, for the use of machines (excepting, however, automobiles used by park concessioners).

Careful driving is demanded of all persons using the roads.

The Government is in no way responsible for any kind of accident.

3. **Automobile Trucks.**—Automobile trucks are admitted to the park under the same conditions as automobiles, and are subject to the same regulations except as hereinafter noted:

Trucks of more than 3 tons capacity are not permitted on any of the park roads other than the El Portal Road and the roads on the Floor of Yosemite Valley.

4. **Motorcycles.**—Motorcycles are admitted to the park under the same conditions as automobiles and are subject to the same regulations, as far as they are applicable. Automobiles and horse-drawn vehicles shall have the right of way over motorcycles.

5. **Roads.**—The Tioga Road is open from July 15 to September 30, the Big Oak Flat Road from May 15 to November 1, and the Wawona road from May 1 to November 1.

The El Portal and Valley Roads are open all of the year, except occasionally during the winter, when the Valley Roads may be blocked with snow for short periods. These cases are rare, however, as the roads are cleared promptly after snow storms.

On the Big Oak Flat Road between Gentry (station No. 2) and Floor of Valley (station No. 1), 4 miles, and on the Wawona Road between Inspiration Point (station No. 3) and Floor of Valley (station No. 4), 2½ miles, automobiles may go east, down grade, only on odd hours, and may go west, up grade, only on even hours, speed in no case to exceed 12 miles per hour. They must travel between stations No. 1 and No. 2 on the Big Oak Flat Road within the hour, but in not less than 25 minutes, and between stations No. 3 and No. 4 on the Wawona Road within the hour, but in not less than 15 minutes.

6. **Permits.**—The permit must be secured at the ranger station where the automobile en-

ters, and will entitle the permittee to go over any or all of the roads in the park. It is good for the entire season, expiring on December 31 of the year of issue. The permit must be conveniently kept so that it can be exhibited to park rangers on demand. Each permit must be exhibited to the checking ranger for verification on exit from the park.

7. **Fees.**—Fees for automobile and motorcycle permits are \$5 and \$2, respectively, and are payable in cash only.

8. **Distance apart; gears and brakes.**—Automobiles while in motion must be not less than 50 yards apart, except for purpose of passing, which is permissible only on comparative levels or on slight grades. All automobiles, except while shifting gears, must retain their gears constantly enmeshed. The driver of each automobile will be required to satisfy the ranger issuing the permit that all parts of his machine, particularly the brakes and tires, are in first-class working order and capable of making the trip; and that there is sufficient gasoline in the tank to reach the next place where it may be obtained. The automobile must carry at least one extra tire. Motorcycles not equipped with brakes in good working order will not be permitted to enter the park.

9. **Speeds.**—On the roads on the Floor of Yosemite Valley speed not to exceed 30 miles per hour will be permitted on straight stretches of open road, but speed must not exceed 15 miles per hour when passing through villages or camps, crossing bridges, passing teams or other automobiles or pedestrians, or rounding curves where visibility is obscured.

On all other roads in the park speed is limited to 12 miles per hour on grades and when rounding sharp curves. On straight, open stretches when no team is nearer than 200 yards speed may be increased to 20 miles per hour.

Automobile trucks of more than 1½ tons' capacity are limited to a speed of not to exceed 10 miles per hour on all park roads.

10. **Horns.**—The horn will be sounded on approaching curves or stretches of road concealed for any considerable distance by slopes, overhanging trees, or other obstacles, and before meeting or passing other machines, riding or driving animals, or pedestrians.

11. **Lights.**—All automobiles must be equipped with head and tail lights, the headlights to be of sufficient brilliancy to insure safety in driving at night, and all lights must be kept lighted after sunset when automobile is on the roads. Headlights must be dimmed when meeting other automobiles or horse-drawn vehicles.

The POINTS OF INTEREST

In the Automobile Blue Book

have been most carefully compiled for the benefit of the touring public. There are thousands of scenic, historic and commercial features which the motorist should see and know about as he covers the ground. Our country is teeming with past legend, present day achievements and future hopes and aspirations; the cities offer much in the way of sight-seeing and pleasure, while each rural section has its own peculiar attraction. Learn of these things, see them and enjoy them to the fullest extent by reading the *Points of Interest* in the Blue Book.

These *Points of Interest* are given in foot-notes thruout the book except in cases where we publish a city map, in which event they will be found with the map. Wherever possible in the larger cities we have outlined a way that will be quickest and best to see these cities, given a schedule of the important buildings with their open hours and a list of the most popular short trips in and about the vicinity. This, we believe, will be of particular advantage to the tourist who has but limited time in which to see much.

We have devoted much time and effort toward making this data complete, accurate and strictly up-to-date and if you will but take advantage of the *Points of Interest* we feel confident they will add materially to the pleasure of your tour.

Should you find anything interesting on your trip that we have not recorded in the *Points of Interest*, we will appreciate your informing us, so that we may tell others about it in next year's Automobile Blue Book.

San Francisco Section

Route 1—San Francisco to Stockton, Cal.—80.5 m.

Reverse Route 143.

Via Oakland, Foothill Blvd., Hayward, Dublin canyon, Tracy and State highway. Oiled macadam and asphalt to Dublin, next 23 miles concrete state highway; balance oiled macadam. Summary: 57 miles fair to good macadam; 23 miles concrete state highway.

Leaving Oakland the route passes thru a fine residential district to Hayward, then enters a hilly region following Palomares and Altamont canyons. The last 30 miles lead thru a prosperous farming section of the San Joaquin valley.

Route 3 offers a longer but very popular option by way of Niles canyon and Pleasanton.

GARAGES—West Side Garage & Machine Works, Lincoln highway & Central Ave.

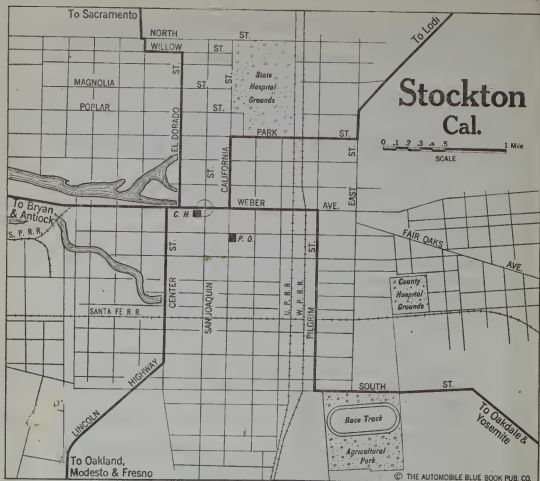

*Livermore, Cal. (pop. 2,050, alt. 482 ft.), is 48 miles east of San Francisco, in a grain, grape and dairy region. Town and valley are named after Robert Livermore, the first settler of English-speaking parentage, who, in partnership with Jose Noriega, purchased the Rancho Las Positas and settled here. He was the first, except the mission fathers, to engage in grape, fruit and grain culture. In 1844 he set out an orchard of pear and olive trees,

planted a vineyard, and began to grow wheat. He was a native of London, England, and died on his ranch in 1858.

*Tracy, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasts of a \$35,000 grammar school, a \$70,000 high school and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

POINTS OF INTEREST, STOCKTON, CAL.

Stockton (pop. 26,000, alt. 17 ft.), the capital of San Joaquin county, is situated in an extensive fertile plain on a tributary of the San Joaquin river, 48 miles southeast of Sacramento. It is about three miles east of the San Joaquin river, with which it is connected by a navigable channel. Steamboats ply daily between here and San Francisco. Radiating from this point in every direction is a 350-mile system of paved highways built by the county at a cost of \$2,500,000. Stockton is the gateway to the Yosemite valley, Lake Tahoe, Calaveras Big Trees and the Southern mines on the "Mother Lode," the country of Mark Twain and Bret Harte.

In 1843 Capt. C. M. Weber was granted 48,000 acres surrounding the present city of Stockton by the Mexican government. Four years later he founded the town site which he renamed in honor of his friend, Commodore Stockton, of the U. S. Navy. Just a few blocks from the business district, still extant, is the old home of the founder of the city, one of the points of historic interest. One of the beneficent acts of Captain Weber was the donation of ten blocks scattered thru the city for park purposes. They have been beautified and maintained fittingly.

Stockton was the outfitting post for the miners during the gold rush of '49. The city was organized in that year and incorporated

a year later. In keeping with its historic background, the people of Stockton some years ago built a \$500,000 hotel of Spanish renaissance style, typifying the early California missions. Facing the plaza, it is within a stone's throw of where the gold seekers disembarked for the mines.

In Stockton is the largest state hospital for the insane, surrounded by magnificent grounds and supplemented by a farm of more than 500 acres. In point of volumes, Stockton has one of the largest libraries in the state. Other points of interest are the mineral baths and natatorium. The Stockton golf and country club embraces 101 acres on the banks of the San Joaquin river, 4 miles from town. From the broad verandas of the club house one may gain some idea of the beauties of innumerable points along the river with its 400 miles of tributary, navigable waterway winding in and out thru the famous Delta of the San Joaquin, the "Holland of America."

The practical minded can see extensive industries of many types in Stockton; combined harvesters, "caterpillar" tractors, boat building works, wineries, etc. Finally the visitor should see the Stockton chamber of commerce, located at the top of the city's tallest skyscraper. From the roof above is a panorama of city and county that will remain long in memory.

The route chart, page 4, will give you quick reference to main routes between towns.

Straight thru on Lincoln highway. Avoid right-hand road just before switch 59.8. Cross RR 60.2.

Right at 59.8 is Route 18 to Fresno.

- 61.8 2.5 4-corners; turn left with pavement.
 - 62.6 0.8 Right-hand road just before RR; turn right.
 - 63.1 0.5 Banta, 4-corners, sta. on far left. Turn right along RR.
 - 64.3 1.2 3-corners; bear left. Cross iron bridge over San Joaquin river 67.6.
 - 68.1 3.8 Left-hand diagonal road, school in angle; bear left. Cross RR 74.7.
- Straight ahead at 68.1 is Route 14 at mileage 68.1 to Modesto.
- 75.0 6.9 French Camp, 4-corners. Turn left. Cross RR 75.3.
- Right at these 4-corners is Route 12 to Modesto.
- 79.4 4.4 5-corners; meeting trolley, bear left onto S. Center St. Cross RRs 79.7-79.9.
 - 80.3 0.9 End of street; meeting cross-trolley, turn right onto Weber Ave.
- Left on Eldorado St. 80.4 is Route 5 to Sacramento.
- 80.5 0.2 STOCKTON, Weber Ave. & San Joaquin St., court house on near right.

Route 4—San Francisco to Sacramento, Cal.—101.0 m.

Reverse Route 142.

Via Oakland, Walnut Creek, Martinez, Benicia and Dixon. Paving and oiled macadam to Walnut Creek; gravel with a 2½ miles stretch of concrete to Martinez; balance concrete State highway. Summary: 21 miles paving and oiled macadam; 10 miles good gravel; 70 miles concrete State highway.

After crossing San Francisco bay by ferry and passing thru business and residential sections of Oakland, the route follows a winding road thru a pretty hilly country to Martinez where ferry must be taken across channel to Benicia. From here to Vacaville the country is rolling and very attractive, with fruit raising one of the leading industries. The balance of this trip leads thru a level, highly developed agricultural section of the Sacramento valley.

For optional route via Stockton, see Routes 1 and 5. Route 82 offers an option to Martinez via San Pablo and Pinole.

For this and other exits see City Map, page 160D.

For enlarged map of Congested Business District, see page 160G.

*Martinez, Cal. (pop. 2,175, alt. 7 ft.), is a quiet, restful place, delightfully located in a little valley with its back to the many curved hills and its face to the water and looking toward Benicia. The locality is full of charming nooks. Many of the first families of Martinez came from New England. The town was named in honor of Ignacio Martinez, who was

born in the city of Mexico in 1774, became a military man and as such came to California in 1800. In 1837 he was made alcalde of San Francisco. He died sometime before 1852. Just west of the town are situated the Nevada Warehouse and Dock company's warehouses, the largest on the Pacific coast. Here deep water ships take on cereals for Europe.

- 72.5 8.7 Left-hand diagonal road, just before RR; bear left along same.

*Benicia, Cal. (pop. 2,375, alt. 55 ft.), situated on the swift-running Strait of Carquinez, which connects Suisun and San Pablo bays, is 24 miles in a direct line north of San Francisco. It has a good harbor for vessels not drawing over 23 feet of water. There are extensive wharves and ship yards, and a United States arsenal and barracks. The town was founded in 1847 and named in honor of the wife of the Mexican general, Vallejo. For two years it was the rival of San Francisco. In 1853 it was made the "permanent seat of government," but in March, 1854, the capital was transferred to Sacramento.

Over the Strait of Carquinez pass the high voltage wires of the Pacific Gas & Electric Company, which bring all the electric power for the electric light plants and the manufacturing in the city of San Francisco from the hydro-electric power plants in the High Sierras, over 200 miles distant. Jack London's "Tales of a Fish Patrol" and "John Barleycorn" tell of adventures which happened in these straits and in San Pablo bay. At Benicia two great transfer boats carry the longest trains across the straits on the way to and from the bay cities.

*Suisun, Cal. (pop. 1,000, alt. 8 ft.), is built on an island in a navigable tule slough, 9 miles north of Suisun bay and 50 miles northeast of San Francisco. Just 5 miles north of the town stood the little Black schoolhouse where Edwin Markham, poet and seer, and author of "The Man with the Hoe," went to school. Incidents of his school days here are described by one of his teachers, Mr. S. O. Woods, in "Lights and Shadows of the Pacific Coast."

Suisun was settled by Captain Joseph Wing in 1858. He ran boats on the slough and

gave the town its first impetus as a trading point. A few miles from Suisun is the great orchard of A. T. Hatch. It contains 800 acres and is one of the largest in the state. In the Suisun hills is a marble quarry where very beautiful onyx is produced.

The Suisun valley enjoys a national reputation as a great fruit growing district. Along the river, about fifteen miles to the south, are the Suisun marshes, which up to a very few years ago were only used for grazing purposes. These same marshes are now being rapidly put under cultivation and becoming immensely valuable for farming and truck gardening.

*Vacaville, Cal. (pop. 1,200, alt. 175 ft.), is situated at the entrance to the beautiful and fertile Vaca valley, about 29 miles southwest of Sacramento. It has fruit growing industries, and has attained great fame for early fruits and vegetables, it being usually the first to supply the city markets and to ship deciduous fruits to the east. It was founded in 1852 by William McDaniel for Manuel Baca, anglicised to Vaca, from whom the town and valley took its name. John R. Wolfskill was the pioneer settler of the township and planted the first trees and vines on the bank of Potah creek, about fourteen miles north of Vacaville.

The town is situated on the state highway connecting Sacramento and points around or on the bay, this unit of the highway being the most direct route and being served by ferry at Benicia and Vallejo with Martinez and Pinole, points in Contra Costa county. A concrete highway connects at Cordelia, about 15 miles southwest of Vacaville, with Napa, and opens the most direct route to the northern coast counties, being practically without grades.

***Dixon, Cal.** (pop. 800, alt. 64 ft.), in Solano county, 22 miles southwest of Sacramento, is an agricultural town. It was founded in 1868 and is the grain center of the county, shipping many thousand tons annually. It also has one of the largest certified dairies west of the Rocky mountains, milking about 400 cows.

***Davis, Cal.** (pop. 1,000, alt. 54 ft.), is the

site of the state experimental farm of the University of California, where all the practical work of the university school of agriculture is done. The country around Davis is one of the richest agricultural sections in central California, and the experimental work carried on there is of tremendous interest to all those interested or engaged in horticulture or agriculture.

*Galt, Cal. (pop. 1,000, alt. 52 ft.), a village of Sacramento county, is 26 miles south of Sacramento. It has vineyards of table grapes, and here the Flame Tokays mature to perfection. Good permanent roads radiate in all directions. From here the lateral good road of the California highway system will run to Jackson in Amador county. This road will pass the Preston School of Industry, located at Ione.

*Lodi, Cal. (pop. 4,500, alt. 52 ft.), is 12 miles north of Stockton, and the center of a great grape growing country. The Flaming Tokay is the special variety of the place and about

3,000 cars of these grapes are shipped annually from this town alone. Over 2,500 acres are planted to table grapes exclusively. The town of Lodi was established by the railroad company in 1869 in response to a petition of inhabitants accompanied by an offer of a half mile square of land on which to lay out the site for the town. The offer was accepted, the town laid by the railroad company and named Mokelumne Station, but this name being too similar to others in the state, was afterwards changed to Lodi. The Mokelumne river flows about three-quarters of a mile north of the town. Watermelons have for years been a specialty of the place.

*San Andreas, Cal. (pop. 1,550, alt. 1,033 ft.), the county seat of Calaveras county, is situated about 56 miles east of Sacramento. Placer gold was formerly extensively mined here. Calaveras county has been made famous by Bret Harte's tales and by Mark Twain in the "Jumping Frog of Calaveras." The name is a corrupt form of the Spanish word for skulls and was given to the stream by Captain Moraga, who headed the first expeditions on the San Joaquin and Sacramento rivers. He encamped on the stream and was surprised in the morning to find that the place was strewn with human skulls and bones. It was either an ancient battle ground where some 3,000 Indians had fallen and been left upon the field, or, what is more probable, was the charnel ground of those who fell in the fearful epidemic of 1833, in which thousands of Indians of this region died. San Andreas was destroyed by fire in 1856. The Calaveras big trees and Murphy's cave are nearby interesting points visited annually by thousands of tourists. Darrington, 3 miles from the Calaveras big trees, is an ideal spot for campers and fishermen.

*Angel's Camp, Cal. (pop. 3,375, alt. 1,500 ft.), is the mining town made famous by Bret

Harte in the "Bell Ringer of Angel's," and other stories. It stands at the summit of a switch back road which winds so continuously and in such short curves that the cars are curtailed to prevent their swinging off the track. In the canyon below rushes and roars over its rocky bed the turbid Stanislaus, also made famous by Bret Harte in Truthful James' account of the row "Upon the Stanislaus." On the stream were located most of the bars, gulches, flats and fords that figure in Bret Harte's tales. Angel's, the story runs, was so called because a miner related that here he had seen in the trees lighted by his campfire a seraphic vision. Though of all names least appropriate, it has clung. The town is situated on the Mother Lode and in the ravine in which gold was first discovered. It straggles for a mile and a half down the gulch. The Utica, Angel's and Lightner mines are rich gold-bearing quartz mines.

Calaveras county, in which Angel's is situated, is famous thru the story of the "Jumping Frog of Calaveras," by which Mark Twain leaped into fame; it is also known thru Bret Harte's "Brown of Calaveras," "The Boom in Calaveras," and the "Youngest Prospector in Calaveras."

- 42.0 4.9 Linden, P. O. on right. Straight thru. Thru 4-corners 42.7; prominent 4-corners 45.8 and irregular 4-corners 48.4. Same thoroughfare becomes Fremont St. Cross trolley 52.8.

Route 9—Stockton to Yosemite National Park, Cal.— 127.9 m.

Reverse Route 321.

Via Valley Home, Oakdale, Knights Ferry and Big Oak Flat. Good oiled macadam and concrete to Oakdale, then 10 miles of poor dirt, followed by 20 miles of graded gravel which is good except for some stretches, where surface is worn out and rather rough; balance fair to good mountain road with conditions gradually getting poorer as the valley is approached. Summary (approximately): 64 miles fair to good mountain road; 30 miles good graded gravel; 17 miles good oiled macadam; 7 miles concrete; 10 miles poor dirt.

Traversing a level farming country for the first 30 miles, we enter the foothills, gradually ascending into the timber covered region of the high Sierras. Winding its way on alternate up and down grades thru large forests, we reach the rim of the valley at Gin Flat, at an altitude of 7,031 ft. and descend a ten-mile grade to the floor of Yosemite.

127.0 3.2 Fork; bear left. Pass Camp Yosemite on left 127.2.

*Tuolumne Big Trees.—About twelve miles northwest of El Portal is this grove of big trees—an attraction far too wonderful to be omitted by the visitor to the Yosemite National park. From El Portal to Foresta the road ascends a solid wall of granite to an elevation of 4,500 feet, and, looking down from this elevation, awe-stricken at nature's handiwork, one beholds man's genius in operating loaded logging cars down the steepest rail incline in the world at intervals of ten minutes over an 87 per cent grade.

The scent over the new auto road is most interesting, and the change from the wild, rugged grandeur of the Merced canyon to the great forest depths is one that will not be quickly forgotten.

The "Dead Giant" in the Tuolumne Grove

is now but a great burnt, shaggy stump—a reminder of the days when it loomed its majestic head as the greatest tree in the world; for scientists have estimated that this tree was at least 400 feet high and 40 feet in diameter. There is no record of these times, for this great tree was a "dead giant" when this western world was first seen by man, and whether destroyed by the great forest fires of ancient times or struck by a thunderbolt, has never been determined. This tree, too, has the honor of being the first "tunnel tree" in the world. This opening is about 30 feet long and 10 feet square. Other famous trees in the Tuolumne Grove are the "General Lawton," one of the most perfect trees in the world, "King of the Forest," "Fallen Giant" and "Siamese Twins."

- 76.7 1.7 Diagonal 4-corners; bear left along RR.
- 80.7 4.0 Ripon, stores on right. Straight thru along RR.

*Livermore, Cal. (pop. 2,050, alt. 482 ft.), is 48 miles east of San Francisco, in a grain, grape and dairy region. Town and valley are named after Robert Livermore, the first settler of English-speaking parentage, who, in partnership with Jose Noriega, purchased the Rancho Las Positas and settled here. He was the first, except the mission fathers, to engage in grape, fruit and grain culture. In 1844 he set out an orchard of pear and olive trees,

planted a vineyard, and began to grow wheat. He was a native of London, England, and died on his ranch in 1858.

*Tracy, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasts of a \$35,000 grammar school, a \$70,000 high school, and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

83.8 3.1 Salida, sta. on far right. Straight thru along RR.
Left is Note (a) to Oakdale.

89.8 6.0 Fork, just beyond irrigation canal; bear right along RR onto 9th St.

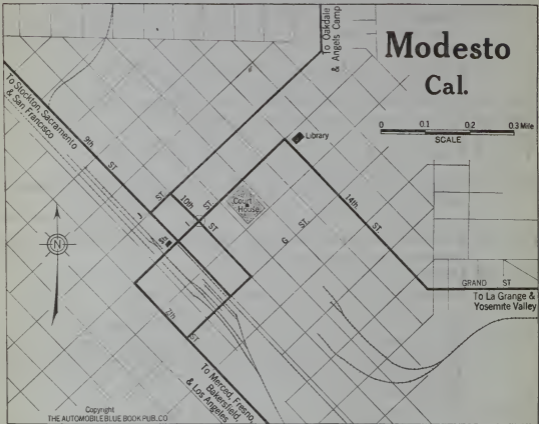

90.4 0.6 MODESTO, 9th & I Sts.

HOTELS—Hotel Hughson, 10th & J Sts.

GARAGES—C. C. Parks Garage, on 10th St., 1½ blks. w. Hughson Hotel.

SERVICE STA.—United States Tire Sales & Service Depots located here.

Straight ahead on 9th St. is Route 15 to Fresno.

POINTS OF INTEREST, MODESTO, CAL.

Modesto (pop. 4,050, alt. 86 ft.), capital of Stanislaus county, is located in the San Joaquin valley, near the Tuolumne river, 30 miles south of Stockton. It is scarcely half a mile from the business center to the river bridge, and though the river is practically

closed to navigation, steamers can tie at this bridge seven months in the year. The ruins of the Old Paradise mills, which ground flour for twenty-five years in the olden days, mark the former shipping point on the river.

- 54.8 2.3 THE PINES (Bass Lake P. O.).

*Madera, Cal. (pop. 3,000, alt. 275 ft.), is located in the geographical center of the San Joaquin valley. It was founded in 1873, and is in the center of a rich, prosperous farming country. The mill of the Madera Sugar Pine company is located in the town at the end of

a flume sixty-five miles long, which carries the lumber from the mountain hill to Madera. An irrigation project that will furnish gravity water is in process of organization and when completed will mean that Madera will be one of the largest cities of the San Joaquin valley.

 Keep straight ahead on road, which becomes Kearney Ave., thru Kearney Park.
 Fresno City Map and Points of Interest, page 376.
 138.8 9.4 5-corners; meeting trolley, turn left onto Fresno St. Under RR 139.6.
 139.4 0.6 I St.; turn left one block, leaving trolley.
 139.5 0.1 FRESNO, I & Merced Sts., city hall on right.

Note (a) Route 18—Connection to Madera—26.6 m.

Reverse Note (a) on Route 331.

Via Firebaugh. Dirt and sand road all the way. Liable to be bad in spots after long dry spell.

- 97.4 97.4 Keep ahead across bridge.
 Right just before bridge is Route 18 at mileage 97.4 to Fresno.
 Cross bridges over irrigation canal 98.1. Cross RR at sta. 98.2. Keep ahead thru edge of Firebaugh 98.3.
 98.4 1.0 3-corners, small green on right; bear right.
 98.7 0.3 Right-hand road immediately beyond bridge over San Joaquin river, turn right.
 99.2 0.5 Left-hand diagonal road; bear left with travel. Avoid right-hand road 116.0.
 116.6 17.4 Prominent left-hand road; turn left. Avoid right-hand road 117.6. Turn right with road 118.5. Pass school on left 120.5. Thru 4-corners 121.0.
 123.0 6.4 Cross RR and at diagonal 4-corners immediately beyond bear left onto Yosemite Ave. Thru 4-corners 123.9 and cross RR at sta. just beyond.
 Right at 123.9 just before RR is Route 15 to Fresno.
 Left at 123.9 just before RR is Route 331 to Modesto.
 124.0 1.0 MADERA, Yosemite Ave. & D St.
 Left on D St. is Route 338 to Yosemite.

Route 25—San Francisco to San Jose, Cal.—49.5 m.

Reverse Route 396.

Via San Mateo, Palo Alto and Santa Clara. Concrete boulevard the entire distance. Leaving San Francisco this route takes the tourist thru a fashionable suburban residence district and later enters a pretty farming community. Orchards of many varieties line the highway for miles, while to the west the wooded hills of the Coast range rival in grandeur with beautiful view of the nearby bay.

Route 72 offers a very good option to Uncle Tom's Cabin via S. San Francisco and San Bruno.

Route 26 offers an excellent and slightly shorter option via Oakland.

- 41.0 4.8 Right-hand road; turn right with pavement.
- 45.6 4.6 Left-hand road; meeting trolley, turn left.

*San Mateo, Cal. (pop. 6,500, alt. 22 ft.), is the center of a wonderfully attractive district for motorists, with perfect roads in all directions. One may drive across the Sierra Morena mountains to the coast in less than two hours; take the shorter run to Crystal Springs lakes; go to Palo Alto and Stanford university in half an hour; to Burlingame, Woodside, Redwood City or Menlo Park in a few minutes, thru some of the most beautiful scenery in California. Gaspar de Partola was standing on the mountain range back of San Mateo when he discovered San Francisco bay in 1769.

*Redwood City, Cal. (pop. 2,450, alt. 10 ft.), the county seat of San Mateo county, is situated 3 miles from the Bay of San Francisco and 5 miles south of San Francisco. It has manufacturing interests, but is chiefly a residence town. It was started in 1851 as the embarcadero for shipping lumber from the immense redwood forests on the eastern slopes of the mountains. It stood at the head of tidewater on Redwood creek and was incorporated as a city without a mayor.

*Menlo Park, Cal. (pop. 800, alt. 63 ft.), is 30 miles south of San Francisco. Here on the Flood estate is situated the dairy college of the University of California. The town is called "the village of beautiful homes," on account of the large number of suburban resi-

dences of San Francisco men. The country round about is especially rich in berries, nursery stock, and conservatories. There are many beautiful drives in the vicinity.

*Palo Alto, Cal. (pop. 6,500, alt. 63 ft.), is located on the peninsula 31 miles south of San Francisco. The southern arm of the bay of San Francisco is two miles to the east, and on the west twenty miles distant is the Pacific ocean. This city owes its existence to Stanford University. With the opening of University avenue from the quadrangle to the Southern Pacific railway, it was recognized that here was the location for the college city. The first house was built in 1891, the year the university opened for instruction. A visit to the university and its campus is well worth while.

From Palo Alto southward extends that wonderful fruit belt of California known as Santa Clara valley. In this territory is raised one half of all the prunes produced in the U. S.; no other county in the U. S. raises so many cherries or so many apricots.

Camp Fremont is located on the State highway, one mile north of the city of Palo Alto. The remount station and base hospital are located on Willow road, one mile northeast of the city and can be reached either via Pope street bridge or by leaving Palo Alto on the Middlefield road across Middlefield bridge and taking second road to the right.

DON'T HESITATE to motor thru any part of the United States or adjacent Canada. There is a Blue Book to guide you in all directions.

POINTS OF INTEREST, SAN JOSE, CAL.

San Jose (pop. 40,000, alt. 92 ft.), is situated in the beautiful and fertile valley of Santa Clara on the Guadalupe river, 48 miles southeast of the city of San Francisco. It has a dry and delightful climate and is noted for its gardens. It is the chief locality in the Santa Clara fruit region, and has extensive fruit growing and packing interests.

A few miles north of San Jose is the site of an old mission, Santa Clara de Assisi, founded on Jan. 12, 1777, now a part of the Santa Clara university.

A popular trip from San Jose is to Mount Hamilton, on the summit of which is the Lick observatory.

Left leads to Pescadero and Santa Cruz.
Right leads to San Francisco and Half Moon Bay.

*Santa Clara, Cal. (pop. 7,000, alt. 83 ft.), situated in a fertile valley of its own name, is engaged principally in the cultivation of fruit. It grew up round the old mission of Santa Clara de Assis, founded Jan. 12, 1777. In 1851 a Jesuit priest established Santa Clara college

in the old mission buildings and in 1855 it was chartered as a university. In a room of the college building is a collection of articles saved from the old mission—candlesticks, pictures, chairs, vestments and the key to the old mission.

A brief description of the states covered by this volume will be found in the back of the book. Read it and get an idea of the country you are about to traverse.

Right at 27.7 leads to Centerville and Irvington.
- 31.5 4.5 Mission San Jose,* Mission San Jose de Guadalupe (founded

*Niles, Cal. (pop. 1,500, alt. 85 ft.), in Alameda county, is 30 miles southeast of San Francisco. Large seed farms and nurseries are located here and it is an important fruit center. In early times the town was famous for the great flour mills constructed by Don J. J. Vallejo.

*Mission San Jose de Guadalupe, of which practically nothing remains but a small portion of the monastery, is in Alameda county, 28 miles from Oakland, in the foothills of a beautiful valley, now known as Santa Clara, looking out upon San Francisco bay. The mission church has entirely disappeared, the earthquake of 1868 having demolished what was left after secularization. A modern parish church has been built upon the site. In its belfry hang two of the old mission bells, and in the baptistry the old mission font is still in use. It is of hammered copper, about three feet in diameter and surmounted by an iron cross 8 inches high. The base is of painted wood. The corridor of the monastery is plain and without arches. Willows tied with rawhide to rafters of rough hewn logs

compose the roof. The garden is well kept up and there is a beautiful alameda of olive trees planted by the padres which still produce abundantly. At the end of this avenue is an orphanage conducted by the Dominican sisters.

The mission, of which so little remains, was founded in 1797 and was the first of the five intermediary missions founded in that year which were to clasp together the isolated mission units into one great chain, the limit of one being the boundary of the next, and so on. By the end of the first year San José Mission had 33 converts. It continued to prosper, but, owing to its location in the Sacramento and San Joaquin valley, which afforded good retreats for fugitives and also made it the first mission reached by trappers from the east, its history was far from placid. Estanislás and Cipriano, who terrified the ranchers and against whom the campaign of 1829 was waged, were runaway neophytes of San José mission. The mission attained its greatest population in 1824, having at that time 1,806 neophytes.

0.0 0.0 SAN JOSE, Santa Clara & Market Sts. Go east on Santa Clara St.

Cross bridge 1.1 onto Alum Rock Ave. Avoid left-hand road 4.1.

Left on Jackson Ave. leads to Milpitas.

Trolley leaves 4.8. Keep right.

5.5 5.5 Junction House, on right. Turn right onto Mount Hamilton road.

Straight ahead leads to Alum Rock park.

7.9 2.4 Fork; bear left. Cross bridge 8.1, passing Grand View Ranch on left. Mount Hamilton Vineyard on right 10.8. Reach summit 11.5 and begin long descent. Cross bridge 12.3. Pass Half-Way House on right 13.2. Mount Hamilton and Lick Observatory visible ahead 17.0. Turn left with road across bridge 18.5. Avoid left-hand road 20.0 (Kincaid road). Lick Observatory Reservation begins 20.2.

25.4 17.5 MT. HAMILTON,* Lick Observatory on right. Elevation 4,209 feet. From Smiths creek to the Observatory, there are something like 62 turns of the road and up grade is steady. Caution—turns extremely sharp. Care should be taken, as vehicles cannot pass at all points. No grades of any distance over 7 to 9 per cent. Use horn freely.

*A trip to Mount Hamilton, on the summit of which is the Lick Observatory, is well worth while. This observatory has the second largest refracting telescope in the world. Visitors are welcome at the observatory and on Saturday nights one may look at the stars thru the great instrument.

The climb up Mount Hamilton is an easy one, few grades being more than 7 per cent.

The views of the valley as the road ascends are magnificent. The whole of Santa Clara valley, San Francisco bay and even the cities around the bay are visible on a clear day. It is about thirteen miles from the start of the Mount Hamilton road to Smith's creek hotel. From here to the observatory (7 miles) the road has sixty-two curves, but the grade is easy and the scenery delightful.

TOURISTS! Practically all towns of any size maintain a Commercial or Business Men's Club which will gladly and graciously dispense local information upon request.

Right at 37.7 is Route 64 at mileage 9.1 to Watsonville.

*Morgan Hill, Cal. (pop. 1,200, alt. 387 ft.), is built on the famous Rancho San Francisco de Los Llagas, a piece of land granted to the Castro family by the Mexican government and later purchased by the Murphy family, who were members of the Donner party. Murphy's peak, towering 2,000 feet above the valley, may be seen about one-half mile to the west of town. The university of Santa Clara, Stanford and California university are all within 50 miles of Morgan Hill.

*Gilroy, Cal. (pop. 4,000, alt. 192 ft.), is a thriving town at the south end of Santa Clara valley and within a few miles of San Juan Bautista mission, one of the best preserved of the old missions in California. The main street of Gilroy is part of the state highway from San Francisco to Los Angeles and is paved its full length of over a mile and a half. Mount Hamilton, with its observatory,

is in sight on the north, and Fremont's Park on the south. The summer home of the late Robert Louis Stevenson, now occupied by Lloyd Osborne, and the cabin of the late Frank Norris, are in the low mountains on the west. The home of the late Henry Miller, cattle king of California, is 3 miles south.

Gilroy Hot Springs is situated in the Mount Hamilton spur of the Coast Range mountains, on the side of a beautiful canyon, 14 miles northeast of Gilroy and only 43 miles from the city of San Jose. The waters from these wonderful springs are 112 degrees of temperature and contain iron, soda, magnesia, sulphur and traces of iodine, arsenic and other valuable mineral properties. There are good accommodations here in the way of bathhouses, hotels and garages, and this spot has become a mecca for the health seeking and an unsurpassed resting place.

*The Mission of San Juan Bautista is situated in the town of San Juan. It was founded June 24, 1797, and was the second in the "filling up the links of the chain" missions. This mission was well located, the soil being fertile and the region well populated. In 1803 the corner stone of the present church was laid, and in 1809 the sacristy was completed and the image of San Juan was placed on the high altar.

In 1836 San Juan was the center of the hostilities between José Castro and Alvarado on the one hand and Governor Gutierrez on the other. Revolutionary meetings, excited speeches and the martial sound of fife and drum characterized the struggle which forced the exile of the governor and resulted in the election of Alvarado. In 1845 the inventory taken in accordance with the decree of Pio Pico that all that remained of the mission property except the curate's house, the church and the courthouse, should be sold, gave the value as \$8,000. In this same year Castro organized his forces at San Juan to repel the invasion of Frémont, and when California became a part of the United States through the landing of Commodore Sloat at Monterey, Castro was at San Juan and from there treated with the conquerors. To his humiliation it was Frémont who raised the stars and stripes over San Juan. Here also Frémont organized the volunteer battalion he led against Flores and his reactionaries in the south.

The mission today is much repaired and in use. The arched corridor, 300 feet long, extends along one whole side of the weedy plaza. In the corner at the right stands the church. Between it and the monastery is an "ugly modern wooden building, surmounted by a bell tower erected by Father Rubio in 1874." The fachada of the church is simply the end of the building practically unornamented. The walls of the church were supported by four buttresses on either side.

Those on the north still remain. Both church and monastery are of adobe and the floor of the monastery is paved with the original tiles laid by the fathers, conclusive proof of their thorough knowledge of the craft of making burnt brick as well as adobe. The entrance of the church is defended against the depredations of irresponsible tourists by a barricade extending from wall to wall and from floor to ceiling and kept padlocked like that of any prison. The church, unlike the other missions, is lighted by eight small windows placed almost at the top of the wall above the cornice. Within the altar rail is the tomb of Padre Presidente Estéban Tapis, whose body rests beneath the floor. The inscription records his life work. He was in America forty years and in California thirty-five. He died November 3, 1825.

San Juan Bautista originally had a chime of nine bells cast in Peru and of wonderful sweetness of tone. Only one now remains of the original chime. Two bells now hang in the hideous incongruous belfry, but neither is of the original chime. Those bells have been scattered, some to other missions and some recast. In one room of the monastery is a museum of mission antiquities. Among its objects of interest are the old chorals of Padre Presidente Tapis, who was an accomplished musician and composed a great deal of church music. The old scores are done on parchment with the large square notes for the different voices done in different colors so that the parts could be easily followed. Another musical object and the strangest thing in the whole collection is an old barrel organ made by Benjamin Dobson, The Minorities, London, 1735. Also in the musical part of the collection is an old wooden wheel with four hollow spokes, between each two of which is a wooden clapper which raps upon them as the wheel rotates. On the days when the bells were not run this instrument, which could be heard for a great distance, was used to call the people to worship.

 3.7 0.6 Right-hand road, water tank and windmill on right; turn right. Ascend easy grade 4.8. Follow narrow road thru canyon 7.1.
 9.7 6.0 3-corners; bear left across small wooden bridge.
 13.2 3.5 GILROY HOT SPRINGS.

HOTELS—Gilroy Hot Springs Hotel, 13 Mi. N. E. of Gilroy.

Route 29—Salinas to Paso Robles, Cal.—99.6 m.**Reverse Route 393.**

Via Soledad, King City, San Lucas and San Miguel. Concrete state highway the entire distance.

When Blue Book car was in this territory during summer of 1919 to secure road information for the 1920 edition, the highway between San Lucas and San Ardo was closed for paving and a temporary detour had to be followed. Some slight discrepancies might therefore be encountered in the following route matter.

The route follows the Salinas river thru a pretty valley, bordered on each side by a chain of hills, which are particularly attractive in the early spring and after the rainy season of the winter months. Great varieties of crops are raised on the fertile soil along the river bed.

GARAGES—Gonzales Garage, State Highway at the N. end of town.

*Salinas, Cal. (pop. 5,000, alt. 44 ft.), is situated on the Salinas river and lies between the Cabilan and Santa Lucia ranges of mountains about midway of the Salinas valley. Passing thru this valley, the high ranges on either hand afford a continuous panorama of varied mountain scenery most delightful and attractive to the tourist with the ever changing effects of light and shade.

Three miles south of Salinas is situated the mammoth factory of the Spreckels Sugar Co., one of the largest in the world, and the immense tracts of sugar beets tributary to it. Eight miles north is Moss Landing, on an estuary of the Pacific. The immense alfalfa

fields a few miles south of Salinas are always a source of interest and admiration to the tourist. From the main street of the city a fine view of the historical "Fremont's Peak" is had.

Salinas is one of the oldest towns in the state and was for a number of years the terminus of the Southern Pacific railroad out of San Francisco. Within a radius of 30 miles of the city there is grown an unusually fine grade of Chevier barley. These crops during the months of June and July are very beautiful as they undulate in the coast breezes. Salinas is the home of the universally known Salinas Burbank potatoes.

*The Mission of Nuestra Senor de la Soledad is situated in a grain field $3\frac{1}{2}$ miles west of the town of Soledad, named for the mission. Ruined and deserted, with sagging casements and fallen arches, there is little left to tell the visitor how well it once was builded. In its desolation there is a singular appropriateness in its being named for "Our Lady of Solitude." Years before the mission was founded Padre Crespi had called the locality La Soledad, "The Solitude," on account of its drear loneliness.

In 1814 Governor Arillaga, who had been taken ill while on a tour of inspection, hastened to La Soledad that he might be cared for by his friend, Padre Ibanez. The governor died at the mission and his remains still rest under the nave of the ruined church. When Bouchard, the South American revolutionist and pirate, harried the California coast, La Soledad, being inland, became a place of refuge.

Though growth at La Soledad was slow and the mission never acquired the wealth or renown of the others, yet it was blessed with plenty and prosperity, reaching the zenith of its wealth and influence about 1820. Then, owing to the political chicanery to which it was subjected during the years preceding its secularization, it declined. In 1846 the mission was sold to the Soberanes family for \$800.

It is claimed by this family that the church, whose ruins now remain, was built by their grandfather in 1850. He had been baptized, confirmed and married in the mission church, and grieved over its neglect and dissolution

during the years of mismanagement by the civil authorities; accordingly when the mission was offered for sale he bought it and rebuilt the church. The Soberanes family still resides in Soledad.

One of the saddest incidents of mission history is the death of Padre Sarria at La Soledad in 1838. This venerable priest had held a prominent place in missionary labors, having been Commissario Prefecto, and then Presidente. When Mexico broke away from Spain, he as a loyal Spaniard refused to take the oath of allegiance to the Mexican republic, and was ordered exiled, but he was held in such high esteem and trust and the confidence in his business management was such that the order was never enforced. When he became enfeebled by age he retired to La Soledad. After the secularization he refused to leave the fast thinning flock, and, though supplies of all kinds were running low, he continued to minister to the few Indians who clung about the mission. One Sunday morning while saying mass he fell upon the steps of the altar and immediately expired, in reality from starvation.

The ruins of La Soledad show that the walls were made of adobe mixed with flint pebbles and built upon foundations of rough rock. The walls were about three feet thick, and plaster is still sticking to them here and there, but the roof fell in over forty years ago. Fallen beams, heaps of tumbled adobes and ruined tiles show the outline of corridor and church. Beyond La Soledad is the beautiful watering place in the Santa Lucia mountains, known as Paraiso Springs, once part of the mission estate.

*The Mission of San Miguel Archangel is located in the town of San Miguel, named for the Mission, and on the site called Vahia. The location was chosen because of the proximity of the springs of Santa Isabel and San Marcos, which promised plenty of water for irrigation purposes. The remains of the old mission waterworks, including canals and dams constructed by the padres, are still to be seen.

San Miguel was the third Mission established by Padre Presidente Lasuen and was founded July 25, 1797. The conversion of Guchapa, chief of the Cholan rancheria, in 1804, casts interesting light upon the evangelistic methods of the padres. Padre Martin went to the chief, asking for some of his young men to make Christians of them. Guchapa refused and scorned the threats of the padre, saying that he feared not the Spanish soldiers for they but died as other men. Thirteen of these soldiers were then despatched to capture him. When he was brought a prisoner to the Mission he was conciliated with presents and finally allowed to go free, leaving his son as a hostage. Converts were brought in at the rate of about a hundred per year.

In 1814 Padre Juan Cabot headed an expedition for the exploration of the Tulare valley. The explorers went as far as the Kings river, were attacked by the natives at Sumtache, baptized 26 natives in another locality, and on their return Padre Martin advised the establishment of a Mission somewhere in the region visited. In 1836 the decree calling for secularization of San Miguel was issued.

San Miguel church and monastery have been restored and are now in use. In 1888 some of the old bells were recast into one bell, which hung in a rude wooden tower in front of the church until 1902, when this tower was replaced by the present incongruous construction of steel. In 1901 the outside of the church and monastery was restored by a coat

of new plaster and cement. The interior of the church is practically as left by the padres themselves, and to the student of mission art and architecture this completeness of interior decoration makes the church one of the most interesting in the whole Mission chain. The reredos is at the western end of the church and except for the altar, which is modern, the rest is as done by the Fathers. The walls are decorated with crude distemper paintings, which, however, are very interesting. The iron hinges of the old confessional built into the solid adobe wall afford good examples of the work of the Mission period. On the altar is an ancient breviary with handwrought metal clasps, bearing the date Antwerp, 1735. Extending from the side of the church is the long, log monastic building with the arched corridors, which here has the peculiarity of very irregular arches. The little red-tiled chimney rising above the comb of the red-tiled roof is a picturesque feature that should be noted.

The Hot Springs and Sulphur Mud Baths of Paso Robles, only 16 miles distant, were known and used by the padres and the Indians. Santa Isabel Ranch and the Hot Springs once formed part of the property of San Miguel.

*Paso Robles Hot Springs, Cal. (pop. 1,450, alt. 720 ft.), situated in the foothills of the beautiful Santa Lucia mountains in a great natural park of live oaks, is famous as a watering place. It is an all the year round resort and offers every opportunity for all the sports and life out-of-doors conducive to health, pleasure and happiness. The beneficent waters of these springs were drunk by the Indians before California history began and believed by them to be blessed by the Great Spirit. Later, with the coming of the Padres, the fame of the healing springs of the Pass of the Oaks became more widely known and drew the natives from all the country to bathe in the magic waters.

Stop at the Inn, all rooms have private baths, excellent cuisine, every comfort.

Avoid left-hand road just before gate 7.4.

8.0 5.7 End of road; turn right.

10.0 2.0 Right-hand road; turn sharp right.

11.5 1.5 Fork, cabin on hill in center; bear left.

12.0 0.5 The Pinnacles.*

Route 30—Paso Robles to Santa Barbara, Cal.—141.7 m.

Reverse Route 392.

Via San Luis Obispo, Arroyo Grande, Santa Maria, Los Alamos and Gaviota pass. All concrete excepting 4 miles of poor macadam between Orcutt and Los Alamos and 15 miles of gravel between Los Alamos and Las Cruces. Summary: 122 miles concrete; 15 miles good graded gravel; 4 miles poor macadam.

Owing to construction work between Arroyo Grande and Nipomo, the Blue Book car was found using the new highway completely between these two points and as a result of using the temporary detour, some discrepancy in mileage may be encountered. South-bound tourists arriving at Nipomo over the new road should reset their speedometer to mileage 55.1 to obtain readings corresponding with the route matter here given for balance of trip to Santa Barbara.

This route takes the tourist thru an especially attractive and hilly country. Near Pismo Beach it follows the ocean shore for a short distance, then travels inland and again reaches the coast at Gaviota, following it closely all the way to Santa Barbara.

Avoid left-hand road 18.7.

Left at 18.7 is Route 36 to Bakersfield.

*The Pinnacles National Monument. The spires, domes, caves and subterranean passages of the Pinnacles are awe-inspiring on close inspection, and are well worth a visit by tourists and lovers of nature in its primitive state. The motorist will reach this area over private roads from either Soledad or Gonzales, in Monterey county, California, after a trip of about 14 miles, or from Hollister, in San Benito county, after a run of 35 miles.

The name is derived from the spirelike formation arising from 600 to 1,000 feet from the floor of the canyon, forming a landmark visible many miles in every direction. Many of the rocks are so precipitous that they cannot be scaled.

A series of caves, opening one into the other, lie under each of the groups of rock. These vary greatly in size, one in particular, known as the Banquet Hall, being about one hundred feet square, with a ceiling thirty feet high. The caves are entered through narrow canyons with perpendicular rock walls.

One huge stone, called the Temple Rock, is almost cubical in form. It stands alone in the bottom of the canyon and its walls rise perpendicularly to a height of over two hundred feet. There are also several specimens of balancing rocks in each of the groups.

There are two groups of the so-called Pinnacles Rocks, known locally as the Big Pinnacles and the Little Pinnacles. The general characteristics of the two groups are similar. Each covers an area of about one hundred and sixty acres, very irregular in outline.

*Atascadero, Cal., is an interesting and splendid example of what can be done in this part of the country in the way of development. It covers a strip of land some 12 miles wide and 40 miles long, and numbers among its colonists persons from all parts of the United States. Just a few years ago it was an untrodden wilderness inhabited only by cattle, with but a single dirt road and a single house in its entire expanse. A touring information bureau is maintained here.

*San Luis Obispo, Cal. (pop. 6,000, alt. 201 ft.), is a modern little city located half way between Los Angeles and San Francisco, about 9 miles inland from the Pacific ocean. It is the county seat of San Luis Obispo county and traces its history back to the founding of the mission San Luis Obispo de Tolosa. The coast route of the California state highway, El Camina Real, passes thru the city. It is also a division point on the shore line of the Southern Pacific railway.

The Mission San Luis Obispo de Tolosa, restored without reference to the characteristics of the original mission, was founded by Padre Fr. Junipero Serra himself on September 1, 1772. Serra departed the next day, leaving Padre Cavaller in charge with two Indians from Lower California, four soldiers and their corporal. Their supply of provisions consisted of 50 pounds of flour, 3 bushels of wheat and a barrel of brown sugar. Fortunately for them, the Indians of the locality gratefully remembered that some time previous Lieutenant Fages had killed several bears to supply the starving people of Monterey with provisions, and so they brought the padre venison and seeds at frequent intervals, so that he and his comrades managed to subsist until new supplies arrived.

The padre built a log chapel and a log house for the missionaries, and the soldiers erected their own barracks. Converts were slow in coming in, as the mission had nothing to offer them better than what they already had. A year and three months after the founding of the mission only twelve had been gained, but the second year the Indians became interested in the abundant yield of the corn and beans planted by the padre, and in the other products of the mission rancharia, and the number of neophytes increased. In 1776 some Indians hostile to those sheltered by the padres attacked the mission by shooting flaming arrows on to the roof of tules and setting fire to it. Punishment followed swiftly upon the offense. Rivera, the commandante at Monterey, came with a small force, arrested the leaders and sent them prisoners to Monterey. But their success had been such that the mission buildings were jeopardized by similar attacks twice within the next ten years. This caused the Fathers to attempt the making of roof tiles. The experiment

proved so successful that all the missions were soon provided with tile roofs.

In 1798 Padre Luis Antonio Martinez, the most widely known and most popular of the padres, began his long term of service at this mission. In 1818 Bouchard, the South American revolutionist and pirate, descended upon the coast and Padre Martinez led a force of neophytes against him. Bouchard did little damage beyond the destruction of the mission ranch house. When he sailed away to Santa Barbara he left three of his men prisoners in the hands of the Spaniards. In 1830 Padre Martinez was banished in disgrace to Madrid, where he finished his days in retirement. He was dismissed on a charge of smuggling, but it is probable that his outspoken frankness led to his being made an example of to prevent the other padres from expressing their opinions of governmental policy in regard to the missions. Padre Martinez is the host whose novel entertainment of General and Senora Moreno on their wedding tour is described by Helen Hunt Jackson in "Ramona." In 1843 a decree completing the secularization of the mission was issued, converting it into a pueblo, freeing the neophytes, turning the mission house into a parsonage and converting the other buildings to public uses. In 1846 when Frémont, in co-operation with Stockton, was marching against the southern Californians, San Luis was thought to harbor revolutionists. Frémont accordingly surrounded and took it by assault one dark night, but it was found to contain only women and children.

The original church had adobe walls which stood on stone and cement foundations. The roof was of tiles. Under the restoration these mission characteristics have disappeared. The walls have been boarded, the roof shingled, and topped by a New England meeting house steeple, and the front arcade removed. The monastery, too, has been restored with the same want of discernment. At the end, however, are two old houses which happily have been left in their original state, as has the quiet, square, old-time garden. The mission is now a parish church which still "in a slight way cares for the Indians, for the Tulareños from the interior valley who come periodically to the coast to gather shell-fish make their camp fires as of right on the mission grounds.

*The Mission Santa Ynez is situated at Calahuasa, near Los Olivos, in the valley of the Santa Ynez river, about 30 miles from its mouth and about 35 miles from Santa Barbara. It is away from the main lines of travel, but this has been to its advantage, for it has suffered less from vandal tourists and is a real museum of historical and ecclesiastical objects. Santa Ynez was founded by Padre Presidente Tapis, September 17, 1804, making it the first mission founded in the nineteenth century. It was not comprehended in the original plan for California missions, but founded in response to a petition for a mission presented by a colony of neophytes who had settled in the locality several years before and who desired the benefits of a mission and priestly services without being obliged to go to Santa Barbara or La Purisima, several leagues distant, for them.

Twenty-seven children were immediately baptized and the building of a church commenced. This was a simple structure roofed with tile and was speedily completed, but the earthquake of 1812 caused the partial collapse of the structure, ruined the roof, cracked the walls and destroyed several buildings near by. The padres, with their usual dauntless perseverance, at once began the building of a new church constructed of brick and adobe, which was completed in 1817.

The mission was abandoned about 1850 and the building was used by the civil authorities as jail, blacksmith shop, or for whatever purpose best suited their convenience. Thru the efforts of Father Alexander Arbuckle some portions of the structure have been restored, but the earthquake of 1906 caused considerable damage, which has not yet been repaired

for lack of funds. The bell tower and several of the buttresses crumbled away during recent spring rains in 1911. These have been replaced with concrete, and the bells, which fortunately were not injured, have been rehung and are still used.

The large reservoir almost in front of the church entrance was for the use of the padres. It is built of burnt brick and is 20 feet long and 8 feet wide. It is at the bottom of a "sunk enclosure," also of burnt brick and 60 feet long by 30 feet wide and rising 6 feet above the reservoir proper. A sloping passage of burnt brick leads down to the reservoir. Connected with this reservoir by a cement pipe 660 feet long and laid underground is another reservoir 40 feet long and 8 feet wide and nearly 6 feet deep, which supplied the Indian village with water. The supply of water for both reservoirs was brought from the mountains in flumes where necessary in crossing ravines, but elsewhere in cement pipes laid underground. The whole waterworks formed a noteworthy engineering feat.

Among the objects in the museum of relics are obsolete firearms, branding irons, huge locks and cumbersome keys, parchment scores of music with the ancient square notes, old books with wonderful rubrics, curious religious figures carved by the Indians, and the vast yellow silk umbrella used by the padres in their long tramps in the California sun, for the strict Franciscan rule forbade their traveling in any manner except on foot. At Santa Ynez there were several workers in leather and silver who were artists of so great skill in carved work inlaid with silver that today remaining specimens of their work are not only of great value, but take high rank in collections.

*Carpinteria, Cal. (pop. 500, alt. 7 ft.). Here may be seen the world's largest grape vine. It was planted in 1842, measured 9 ft. in circumference at base, covered $\frac{1}{4}$ of an acre in area and bore as much as 10 tons of grape in one season. The vine died in 1916, but is preserved for exhibition purposes. There is an older vine, still living, at San Gabriel, Cal., planted by the missionary fathers in 1775. It covers 10,000 sq. feet of ground, a little less than $\frac{1}{4}$ acre. The lima bean in California was first raised commercially in the Carpinteria valley, the celebrated Fordhook variety of Bush lima bean originating here. English walnut and lemon groves also thrive in this vicinity.

*Ventura, Cal. (pop. 3,000, alt. 50 ft.) In the heart of this little city may be seen what remain of the Mission Buenaventura, which mission was founded by Father Serra personally. At one time it was the center of a great many raids and attacks by Indians. Bullet marks may still be seen on the walls. After 1830 it was allowed to drop into a state of

decay. It has been restored, but only as a church and a very beautiful tower, in which the old bells still hang and continue to call worshippers to the service. There is a caretaker in charge.

*Hollywood, Cal. (pop. 15,000, alt. 1,500 ft.), a populous suburb of Los Angeles, incorporated within the city, is situated among the Cahuenga foothills. Against the hillside the turrets of San Souci castle and Glengarry stand out prominently. These are both the possession of a wealthy owner who has filled them with tapestries, pictures, carvings and rare glass. Hollywood is in the vicinity of the oil belt but is fragrant with flowers. Its streets are planted with peppers and acacias and the flame tree brought here from the Antipodes. Roadways are lined with glossy magnolias and grounds are brilliant with poinsettia and roses. Strawberries are ripe here "from Christmas until Christmas." Paul de Longpre, the world's greatest painter of flowers, lived here until his death in 1911. In the country near Hollywood forty film-play producing companies have extensive plants.

*The Mission of San Juan Bautista is situated in the town of San Juan. It was founded June 24, 1797, and was the second in the "filling up the links of the chain" missions. This mission was well located, the soil being fertile and the region well populated. In 1803 the corner stone of the present church was laid, and in 1809 the sacristy was completed and the image of San Juan was placed on the high altar.

In 1836 San Juan was the center of the hostilities between Jose Castro and Alvarado on the one hand and Governor Gutierrez on the other. Revolutionary meetings, excited speeches and the martial sound of fife and drum characterized the struggle which forced the exile of the governor and resulted in the election of Alvarado. In 1845 the inventory taken in accordance with the decree of Pio Pico that all that remained of the mission property except the curate's house, the church and the courthouse, should be sold, gave the value as \$8,000. In this same year Castro organized his forces at San Juan to repel the invasion of Frémont, and when California became a part of the United States through the landing of Commodore Sloat at Monterey, Castro was at San Juan and from there treated with the conquerors. To his humiliation it was Frémont who raised the stars and stripes over San Juan. Here also Frémont organized the volunteer battalion he led against Flores and his reactionaries in the south.

The mission today is much repaired and in use. The arched corridor, 300 feet long, extends along one whole side of the weedy plaza. In the corner at the right stands the church. Between it and the monastery is an "ugly modern wooden building, surmounted by a bell tower erected by Father Rubio in 1874." The fachada of the church is simply the end of the building practically unornamented. The walls of the church were supported by four buttresses on either side. Those on the north still remain. Both church and monastery are of adobe and the floor of the monastery is paved with the original tiles laid by the fathers, conclusive proof of their thorough knowledge of the craft of making burnt brick as well as adobe. The entrance of the church is defended against the depredations of irresponsible tourists by a barricade extending from wall to wall and from floor to ceiling and padlocked like

that of any prison. The church, unlike the other missions, is lighted by eight small windows placed almost at the top of the wall above the cornice. Within the altar rail is the tomb of Padre Presidente Estéban Tapis, whose body rests beneath the floor. The inscription records his life work. He was in America forty years and in California thirty-five. He died November 3, 1825.

San Juan Bautista originally had a chime of nine bells cast in Peru and of wonderful sweetness of tone. Only one now remains of the original chime. Two bells now hang in the hideous incongruous belfry, but neither is of the original chime. Those bells have been scattered, some to other missions and some recast. In one room of the monastery is a museum of mission antiquities. Among its objects of interest are the old chorals of Padre Presidente Tapis, who was an accomplished musician and composed a great deal of church music. The old scores are done on parchment with the large square notes for the different voices done in different colors so that the parts could be easily followed. Another musical object and the strangest thing in the whole collection is an old barrel organ made by Benjamin Dobson, The Minories, London, 1735. Also in the musical part of the collection is an old wooden wheel with four hollow spokes, between each two of which is a wooden clapper which raps upon them as the wheel rotates. On the days when the bells were not rung this instrument, which could be heard for a great distance, was used to call the people to worship.

*Hollister, Cal. (pop. 2,325, alt. 287 ft.), is situated in the beautiful and fertile San Benito valley, 94 miles south of San Francisco. It has an important trade in grain, live stock and fruit. At Idria, south of Hollister, is a great quicksilver mine. The town of Hollister was named after Colonel W. W. Hollister of Licking county, Ohio. He was a man of education and great force of character. He brought a flock of sheep across the great plains in 1851 and another in 1853, a really great feat. He bought the San Justo ranch in the San Benito valley and settled down to sheep raising. In 1862 he built the Montgomery house, the oldest house in Hollister. The San Justo homestead association was formed in 1868 and bought the San Justo ranch from Colonel Hollister for \$400,000 and on it laid off the present town of Hollister in 1868.

*Maricopa, Cal. (pop. 2,200, alt. 746 ft.), lies at the foot of the Coast range of mountains in the San Joaquin valley's extreme southern end. Hot sulphur and epsom salt springs are found in many places near the city. Outcroppings of petroleum sands at the edge of town gave first indications of the Sunset oil field, which in turn gave the world the famous Lakeview Gusher, producing at the rate of

80,000 bbls. of crude oil a day for more than 18 months.

Not far from Maricopa are the Carissa plains famous painted rocks. These rocks are what remain of the old magnificent sun worship temple where thousands of Indians gathered each year. It is claimed these painted rocks antedate the pyramids of Egypt and were first discovered by early Spanish explorers in the early part of the seventeenth century.

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in the handling of lighted matches, cigars, cigarettes, etc., when touring through wooded sections.

GARAGES—Walker's Garage, San Fernando Blvd.
Right is Route 371 to Los Angeles.

San Fernando, Cal. (pop. 3,000). Just a few minutes' ride from this city is San Fernando Rey d'Espagna mission, occupying the Reyes Rancho. The Reyes hacienda temporarily housed the mission, which also included within its lands the famous Camulos Rancho, the home of Helen Hunt Jackson's "Ramona." The mission was founded by Padre Lasuen, September 8, 1797, but Padre Francisco Dumetz and his assistant, Francisco Favier Uria, were the first priests in charge. The baptismal register shows that ten children were baptized the first day and thirteen adults in October. The tile-roofed adobe church was consecrated in December, 1806, but was so severely injured in the earthquake of 1812, which damaged nearly all the missions, that thirty new beams were needed to support the shaken walls. A new chapel was completed in 1818.

The secularization of the mission was begun in 1834 by the appointment of Lieutenant Antonio del Valle as *comisionado*. In 1832 Micheltoarena, who had been appointed governor, stopped at San Fernando on his journey north to take up his office and was there informed of the raising of the American flag at Monterey by Commodore Jones. It was by Micheltoarena's decree in 1843 that San Fernando was returned to the padres, but there were only two vineyards and a few cattle left. Even this small gain was not to be theirs for long. The Californians led by Pio Pico and Castro revolted against Micheltoarena, who with most of his troops marched south to suppress the rebellion. At San Fernando was fought the "bloodless battle of Cahuenga," resulting in the capitulation of Micheltoarena. In 1847 San Fernando was again the scene of warlike operations. Fremont and his battalion arrived in January and remained until after the signing of the treaty of Cahuenga, which terminated all hostilities against the United States in its conquest of California. During their stay on their departure Fremont's command confiscated without compunction whatever horses and cattle remained to the San Francisco mission. The following year is famous for the discovery of gold in California, and with this discovery the Mission of San Fernando is associated. In 1842 Francisco Lopez, major-domo of the mission, seeking stray horses, stopped to rest and eat in the canyon of San Feliciano. In digging up

some wild onions for his luncheon he discovered a piece of gold. Search revealed other pieces. On his return to San Fernando he showed these to friends, who at once declared there must be a placer of gold in the canyon. People from Los Angeles and Santa Barbara flocked to the new gold field. The first California gold ever coined at the Philadelphia mint came from this field. It was taken around Cape Horn in a sailing vessel by Alfred Robinson, translator of Boscana's "Indians of California," and amounted to \$344.75. In the two years following Lopez' discovery about \$100,000 was taken from this placer. The first gold pans were bateas or bowl-shaped baskets made by the mission Indians.

The church at San Fernando is only a pathetic ruin. It is built entirely of adobe, with the entrance at the southwest end, while the altar stands at the northeast. On the east side is an entrance with a half-circular arch sloping into a larger arch inside with a flat top and rounded corners. Various and curious styles of these outer and inner arches are worked out in the thick walls and are of interest as affording a wonderful example of variety in adapting the arch to its necessary functions. On the northwest side of the church is the old graveyard, the doorway to which has the half-circular arch on the inside and slopes outward to an exterior square arch. Close to the graveyard and still surrounded by the remains of the original adobe walls is the old olive orchard, where a number of fine trees are still growing. There are two superb palms over 100 years old which have been the inspiration of many an artist. They stand isolated and pictures of the mission usually have these stately trees in the foreground with the long, low line of the monastery corridor in the middle distance and the beautiful hills rising into the Sierra Madre mountains in the distance. The exterior of the old monastery has been restored by the Landmarks club, which also placed the protecting shake roof over the church ruin. Close to the monastery building a fine old fountain built of brick and cement still pours crystal waters from a great double bowl on a center standard into a reservoir below. The square structure built of boulders which stands about 200 yards from the monastery incloses two circular cisterns of brick.

WHEN PLANNING AN EXTENSIVE TRIP CONSULT
VOLUME T

the new transcontinental edition of the Blue Book covering in one volume the main trunkline highways of the United States

Route 43—Ventura to Saugus, Cal.—50.0 m.

Reverse Route 385.

Via Santa Paula, Fillmore and Piru. Concrete paving to Los Angeles county line 10.4 miles; gravelly dirt to Castac Sta.; balance concrete. Summary: 44.3 miles concrete; 5.7 miles fair to good gravelly dirt (construction work is contemplated on this short stretch).

A very scenic drive thru beautiful Santa Clara valley, famous for its fine fruit and dairy products. This route in connection with Route 371 from Saugus offers a very good option between Ventura and Los Angeles.

*Salinas, Cal. (pop. 5,000, alt. 44 ft.), is situated on the Salinas river and lies between the Cabilan and Santa Lucia ranges of mountains about midway of the Salinas valley. Passing thru this valley, the high ranges on either hand afford a continuous panorama of varied mountain scenery most delightful and attractive to the tourist with the ever changing effects of light and shade.

Three miles south of Salinas is situated the mammoth factory of the Spreckels Sugar Co., one of the largest in the world, and the immense tracts of sugar beets tributary to it. Eight miles north is Moss Landing, on an estuary of the Pacific. The immense alfalfa

fields a few miles south of Salinas are always a source of interest and admiration to the tourist. From the main street of the city a fine view of the historical "Fremont's Peak" is had.

Salinas is one of the oldest towns in the state and was for a number of years the terminus of the Southern Pacific railroad out of San Francisco. Within a radius of 30 miles of the city there is grown an unusually fine grade of Chevier barley. These crops during the months of June and July are very beautiful as they undulate in the coast breezes. Salinas is the home of the universally known Salinas Burbank potatoes.

- 0.3 0.2 3-corners; bear left. Pass mission on left 0.5.

*Half Moon Bay, Cal. (pop. 1,200, alt. 40 ft.), is on the Pacific ocean about 27 miles southwest of San Francisco. It is connected with San Mateo by a morning stage. The road is beautiful, dipping among the hills, and passing Spring Lakes valley. Besides the auto highway over the range from San Mateo, there is a direct run over the Montara mountains following the ocean all the way for 30 miles to Half Moon bay, and still farther 18 miles south to Pescadero pebble beach, famous for its moonstones, etc. This run is considered far more beautiful than that via San Mateo and Crystal lakes, but is more dangerous because of its mountain climbing and countless abrupt turns.

The town is a quaint, rambling place, and, of all in the county, most retains the atmosphere of the pre-American regime. From it there stretches away to the northward a clean, gradually shoaling beach, the finest without exception in California. It is protected by a reef of rocks just discernible at low tide, which extends from Pillar Point, the northern headland, southward for two miles. This reef acts as a natural breakwater and renders the beach free from undertow and high rollers. The whole country is laid out in artichoke fields, the largest in the United States, and the autoists come from everywhere to see this sight. These artichokes are contracted for by eastern buyers long before ready for market.

Note (a) Route 51—San Gregorio to Redwood City, Cal.—26.7 m.

Reverse Note (b) on Route 25.

Via La Honda and Woodside. Graded dirt and macadam highway.

- 0.0 0.0 **SAN GREGORIO**. At P. O. go east.
 Pass Bellvale P. O. on right 5.7. Cross large concrete bridge 5.9, keeping ahead on winding road, using caution. Pass La Honda P. O. on right 8.7.

*Gilroy, Cal. (pop. 3,200, alt. 200 ft.), is a thriving town at the south end of Santa Clara valley and within a few miles of San Juan Bautista mission, one of the best preserved of the old missions in California. The real history of the city began with the advent of John Gilroy, a stalwart Scotch sailor, who unceremoniously left a British man-of-war at Monterey, walked two days inland and arrived in this valley in the year 1814. Many of his descendants are now living here. The main street of Gilroy is part of the state highway from San Francisco to Los Angeles and is paved its full length of over a mile and a half. Mount Hamilton, with its observatory, is in sight on the north, and Fremont's Peak on the south. The summer home of the late Robert Louis Stevenson, now occupied by Lloyd Osborne, and the cabin of the late Frank Norris are in the low mountains on

the west. The home of the late Henry Miller, cattle king of California, is 3 miles south.

Gilroy has become known as the "Home of the prune," as here this fruit reaches almost perfection in size, sugar and flavor and the production is much larger per acre than elsewhere.

Gilroy Hot Springs is situated in the Mount Hamilton spur of the Coast Range mountains, on the side of a beautiful canyon, 14 miles east of Gilroy and only 43 miles from the city of San Jose. The waters from these wonderful springs are 112 degrees of temperature and contain iron, soda, magnesia, sulphur and traces of iodine, arsenic and other valuable mineral properties. There are good accommodations here in the way of bath-houses, hotels and garages and this spot has become a mecca for the health-seeking and an unsurpassed resting place.

 Right at mileage 5.4 leads to Redwood City via King Mountain.
 Caution for bad curve 6.2 and another 6.5. Pass Mountain House 6.8. Reach
 foot of grade 7.3.

*Half Moon Bay, Cal. (pop. 1,200, alt. 40 ft.).
 is on the Pacific ocean about 27 miles south-
 west of San Francisco. It is connected with
 San Mateo by a morning stage. The road is
 beautiful, dipping among the hills, and pass-
 ing Spring Lakes valley. Besides the auto
 highway over the range from San Mateo,
 there is a direct run over the Montara moun-
 tains following the ocean all the way for 30
 miles to Half Moon bay, and still farther 18
 miles south to Pescadero pebble beach, fa-
 mous for its moonstones, etc. This run is
 considered far more beautiful than that via
 San Mateo and Crystal lakes, but is more
 dangerous because of its mountain climbing
 and countless abrupt turns.

The town is a quaint, rambling place, and,
 of all in the county, most retains the atmos-
 phere of the pre-American regime. From it
 there stretches away to the northward a
 clean, gradually shoaling beach, the finest
 without exception in California. It is pro-
 tected by a reef of rocks just discernible at
 low tide, which extends from Pillar Point,
 the northern headland, southward for two
 miles. This reef acts as a natural breakwater
 and renders the beach free from undertow
 and high rollers. The whole country is laid
 out in artichoke fields, the largest in the
 United States, and the autoists come from
 everywhere to see this sight. These arti-
 chokes are contracted for by eastern buyers
 long before ready for market.

*Salinas, Cal. (pop. 5,500, alt. 44 ft.), is situated on the Salinas river and lies between the Cabilan and Santa Lucia ranges of mountains about midway of the Salinas valley. Passing thru this valley the high ranges on either hand afford a continuous panorama of varied mountain scenery most delightful and attractive to the tourist with the ever changing effects of light and shade.

Three miles south of Salinas is situated the mammoth factory of the Spreckles Sugar Co., one of the largest in the world, and the immense tracts of sugar beets tributary to it. The immense alfalfa fields a few miles south

of Salinas are always a source of interest and admiration to the tourist. From the main street of the city a fine view of the historical "Fremont's Peak" is had. The huge whaling station, 7 miles distant, is an interesting sight.

Salinas is one of the oldest towns in the state and was for a number of years the terminus of the Southern Pacific railroad out of San Francisco. Around it many traditions still linger of the old days when the bandits Joaquin, Murietta and Vasquez terrorized the whole countryside, murdering and robbing at will. Salinas is the home of the universally known Salinas Burbank potatoes.

Coast Drive Near Half Moon Bay, Santa Cruz, Cal.

POINTS OF INTEREST, MONTEREY, CAL.

Monterey (pop. 4,925, alt. 5 ft.), the first capital of California, is teeming with historic interest. Del Monte, the famous resort, Monterey and Pacific Grove, the "chateauqua center of the state," lie almost side by side, 125 miles from San Francisco.

Monterey peninsula is the southern arm of the Bay of Monterey. This bay was discovered in 1602 by Sebastian Vizcayno. The padres came and took up their peaceful pursuits, and the old adobe town became the first capital of the Spaniards. In 1846 Commodore Sloat raised the American flag over the custom house, and Sept. 1, 1849, the first constitutional convention was held, and the foundation of California's statehood was laid.

Monterey is situated in the mission county of California, including in its boundaries four of the old missions. They are Missions San Antonio, Carmel, Soledad and San Carlos. Just north of the county line, in San Benito county, is Mission San Juan Bautista, and one mile south of the county line is Mission San Miguel. Father Junipero Serra founded Carmel Mission, at the town of Carmel-by-the-Sea, four miles south of Monterey, and his body is buried there.

Colton hall is one of the many interesting buildings and monuments in Monterey. Others are the residences of General Alvarado and General Castro, the old custom house, built a hundred years ago; the old Washington hotel, built in 1832; the first theater in the state, where Jenny Lind sang in 1847; the first postoffice in California; the first frame building of the state, built of lumber brought from Australia; the monument erected by Mrs.

Leland Stanford in honor of Father Serra; the ruins of a convent built in 1797, which may still be traced, and the Presidio, a Spanish garrison, a century ago, now one of the most important military posts in the country.

There is scarcely a pleasure-seeker who does not know of the beauties of the Seventeen-mile drive on the Monterey peninsula. Now another drive has been built, and it is called the Scenic boulevard. These two drives are 42 miles long, while half a dozen minor roads ways bring the total mileage to 50 miles. These roads wind thru forests, climb cliffs and skirt the shore of the sea. They are especially designed for the convenience and pleasure of the motorist, who may send his car whirling along without shifting gears, the average grade being two percent, and the highest six percent.

Along the Seventeen-mile drive there are many attractions. From Pacific Grove one soon reaches points of more than passing interest, among which are Seal Rocks, the Ostrich Tree—a pair of cypress trees twisted by the wind into the shape of an ostrich—Cypress Grove and Midway Point. At Cypress Grove the road leads thru the narrow restricted grove of the Monterey cypress. The cypress tree is unique in that it is of a species found only in Monterey and at Palestine.

The marine life in Monterey bay is said to be the most abundant and as wonderful as found anywhere in the world. Viewed from one of the glass bottomed boats in the bay one marvels at the panorama of the depths, and the endless variety of fish moving about the surprising growth of plant life at the bottom. This bay is a great favorite among sportsmen.

POINTS OF INTEREST, PACIFIC GROVE, CAL.

Pacific Grove (pop. 4,000, alt. 100 ft.) has some of the most beautiful and artistic homes on the peninsula. It is set on the rocky cliffs of the outer peninsula, but is well sheltered by the woods that gave it its name. This is one of the two places on the Pacific coast

where glass bottom boats are used to give a glimpse of the wonderful life beneath the surface. These marine gardens are noted for their beauty, the clear waters along the coast giving a perfect view of the greatest of all aquariums, and the flora and fauna of the

8.4 1.0 Right-hand diagonal road, just before stone gate; bear right.

8.8 0.4 Fork; bear left upgrade.

9.0 0.2 **CARMEL HIGHLANDS**.

*Del Monte, Cal. (alt. 10 ft.), covering 125 acres, with its beautiful lawns and gardens and its wonderful oak, pine and cypress groves, is one of the great show places of California. Here the hotel life is exception-

ally comfortable, enjoyable and refined. Golf, tennis, polo, boating, bathing and other pastimes are provided. The 17-40 mile drive, the old Spanish fort at Monterey and the beautiful and unique Pebble Beach lodge on Carmel bay are among the attractions for the traveler.

(Pacific Grove Points of Interest, Cont'd.)

Monterey peninsula and bay, both in their natural condition and also as exhibited in the Pacific Grove museum, are an ever increasing attraction to scientists. The Chautauqua as-

sembly offers for two weeks of each year an interesting and attractive program at Pacific Grove, presenting speakers of national and often of world wide fame, and attracting a very large and appreciative audience.

POINTS OF INTEREST, CARMEL-BY-THE-SEA, CAL.

Carmel-by-the-Sea, Cal. (pop. 1,500, alt. 200 ft.), is in the angle formed by two ranges of hills, one running in a general easterly and westerly direction, forming the backbone of the Monterey peninsula, and the other at right angles to it, forming the natural barrier between the Carmel bay and the Carmel river territories. In this angle has grown a forest of pines, not insignificant stripplings, but substantial forest trees. Immediately back of the town, along the Carmel river, is a valley thirty miles long of rich alluvial soil. Over 60 per cent of the residents of this town are devoting their life to work connected with the aesthetic arts, as broadly defined. College professors, artists, writers, poets and professional men find the location conducive to their work. The Mission of Carmelo is at the foot of the town—one of the best preserved of the old California missions. Near Carmel is the Carnegie botanical institute, one of the foremost institutions of its kind in America.

and the hills both steep and narrow, but experienced and careful drivers find no difficulty in covering the trip. All along the coast the scenery is grand—quite unduplicated in the more accessible parts of the country. A side trip of rare beauty is that up the canyon of the Palo Colorado, where there are fine camping spots among gigantic trees along the creek.

Carmel-by-the-Sea was discovered by Vizcaino, accompanied by a number of friars, in 1602, and given its name by the friars on account of its resemblance to the Carmel monastery in the Holy Land. It is the oldest geographical name in the United States.

Mission San Carlos de Borromeo, situated near the town of Carmel-by-the-Sea and half a dozen miles from the historic town of Monterey, was founded by Fr. Serra, Sunday, June 3, 1770. This Mission is generally referred to as Mission Carmel because of its location on the banks of a little stream, Rio Carmelo. San Carlos Mission was Fr. Serra's own charge. There he spent all his time when not called away by his duties as president of the missions. On August 28, 1784, Fr. Serra died at San Carlos Mission. His last expressed wish was to be buried by the side of Fr. Crespi, his friend and associate in the administration of Mission Carmel. Here he was laid to rest in the sanctuary of the mission. The church was restored in 1868.

From Carmel, southward along the rugged coast, a narrow, winding route traverses the unsettled district to the Little Sur and Big Sur rivers, both of which points are favorite fishing spots. Great salmon, trout and other varieties are found in profusion at Big Sur, where camping accommodations and ranch fare may be had by those adventurous enough to take the trip. The road is rough in spots

- 0.0 0.0 From junction with San Francisco-Santa Cruz highway near Half Moon Bay go east, following phone poles. Cemetery on left 0.1. Caution for sharp curve 3.1. Cross small concrete bridge 3.5, ascending winding grade, with numerous sharp turns calling for cautious driving.
- 5.2 5.2 Fork, sign in center; bear left.
Right leads to Redwood City via King Mountain.
Pass Mountain House on left 6.6.
- 7.4 2.2 Left-hand road; turn left.
Straight ahead following paving leads to Belmont.
- 9.5 2.1 End of road; bear left.
Sharp right leads to County farm.
- 9.8 0.3 Left-hand road, sign on left; turn left across small bridge.
Straight ahead is Note (a) on Route 67 at mileage 10.0 to San Mateo.
- 10.2 0.4 Fork; bear right upgrade, entering canyon. Pass concrete dam over to left 10.5. Caution for sharp curves on narrow, winding road thru canyon.
- 10.8 0.6 End of road, gate on left; bear right along shore of lake. Pass flume over to right on hillside 15.1.
- 15.9 5.1 Right-hand road; turn right across bridge over flume, at end of Lake Pilarcitos at concrete dam, and bear left up winding grade just beyond.
- 16.7 0.8 Right-hand road at top of grade; turn right, descending grade.
Straight ahead along high tension wires is option to San Bruno.
- 18.4 1.7 Millbrae, 4-corners, sign on right. Turn left.
Avoid right-hand diagonal road 20.4.
Right leads to San Bruno, South San Francisco and Colma, connecting with this route at mileage 26.2.
Thru San Bruno 21.0, city hall on right.
- 23.0 4.6 Baden, fork. Bear left with paving. Pass cemeteries on right and left 24.4-25.6. Under RR 25.7.
- 26.2 3.2 Colma, 3-corners, sign on left. Bear right along trolley.
Left is Route 67 to Santa Cruz, via Half Moon Bay.
Left at mileage 26.5 is Route 51 to San Francisco.
- 27.3 1.1 Right-hand diagonal street; bear right onto Mission St. along trolley.
San Francisco City Map, page 160D; Points of Interest, page 160A.
Left at 29.1 is optional connection to San Francisco via Route 134.
- 31.0 3.7 Left-hand diagonal street (trolley divides); bear left onto Valencia St. Pass hospital on left 31.1. Caution for RR crossing 31.4.
- 32.9 1.9 End of street; bear right with trolley onto Market St.
- 33.2 0.3 SAN FRANCISCO, Van Ness Ave., Oak & Market Sts.
For Enlarged Map of Congested Business District, see page 160G.

Route 71—Monterey, Cal., and Return—18.4 m.

Reverse Route 71A.

Via Pacific Grove and Seventeen-Mile Drive. Fine graded gravel all the way.

A very picturesque drive around Monterey peninsula, the principal attraction being the old lighthouse, Bird Rock, Cypress Grove and the rocky shore of Carmel bay. Many side trips deviate from the main drive which are adequately explained by frequent sign boards.

This trip leads mostly over private grounds and the road was built and maintained by the Del Monte Hotel Corporation. Guests from the Hotel Del Monte or the Del Monte Lodge upon securing a ticket are extended free passage, while others are charged a fee of 25c to 75c.

- 26.5 7.4 Redwood City* (outskirts), diagonal 4-corners. Straight thru. Diagonally left leads to business center.

*San Mateo, Cal. (pop. 6,500, alt. 22 ft.), is the center of a wonderfully attractive district for motorists, with perfect roads in all directions. One may drive across the Sierra Morena mountains to the coast in less than two hours; take the shorter run to Crystal Springs lakes; go to Palo Alto and Stanford university in half an hour; to Burlingame, Woodside, Redwood City or Menlo Park in a few minutes, thru some of the most beautiful scenery in California. Gaspar de Portola was standing on the mountain range back of San

Mateo when he discovered San Francisco bay in 1769.

*Redwood City, Cal. (pop. 2,450, alt. 10 ft.), the county seat of San Mateo county, is situated 3 miles from the Bay of San Francisco and 5 miles south of San Francisco. It has manufacturing interests, but is chiefly a residence town. It was started in 1851 as the embarcadero for shipping lumber from the immense redwood forests on the eastern slopes of the mountains. It stood at the head of tidewater on Redwood creek and was incorporated as a city without a mayor.

Thru 5-corners 27.4. Thru Menlo Park* 30.1.

GARAGES—Curtis Bros. Garage, Main St., 1/2 blk. W. of Santa Cruz St.
SERVICE STA.—United States Tire Sales & Service Depots located here.
Straight ahead is Route 74 to Santa Cruz.

*Menlo Park, Cal. (pop. 800, alt. 63 ft.), is 30 miles south of San Francisco. Here on the Flood estate is situated the dairy college of the University of California. The town is called "the village of beautiful homes," on account of the large number of suburban residences of San Francisco men. The country round about is especially rich in berries, nursery stock, and conservatories. There are many beautiful drives in the vicinity.

*Palo Alto, Cal. (pop. 6,500, alt. 63 ft.), is located on the peninsula 31 miles south of San Francisco. The southern arm of the bay of San Francisco is two miles to the east, and on the west twenty miles distant is the Pacific ocean. This city owes its existence to Stanford University. With the opening of University avenue from the quadrangle to the Southern Pacific railway, it was recognized that here was the location for the college city. The first house was built in 1891, the year the university opened for instruction. A visit to the university and its campus is well worth while.

From Palo Alto southward extends that

wonderful fruit belt of California known as Santa Clara valley. In this territory is raised one half of all the prunes produced in the U. S.; no other county in the U. S. raises so many cherries or so many apricots.

Camp Fremont is located on the State highway, one mile north of the city of Palo Alto. The remount station and base hospital are located on Willow road, one mile northeast of the city and can be reached either via Pope street bridge or by leaving Palo Alto on the Middlefield road across Middlefield bridge and taking second road to the right.

*Los Gatos, Cal. (pop. 2,250, alt. 500 ft.), is one of the points of interest to visitors in central California. It is picturesquely located, with immaculate streets and homes—the gateway to the Santa Cruz mountains and beach. New Almaden quicksilver mines, Alma Soda Springs, Santa Cruz big trees, California Redwood park and Monterey bay are reached from Los Gatos. It is the starting point and finish of a 27-mile drive along the ridge of Santa Cruz mountains—one of the most impressive scenic mountain roads in America.

A Peaceful Valley in the California Mountains.

POINTS OF INTEREST, SANTA CRUZ, CAL.

Santa Cruz (pop. 12,000, alt. 25 ft.), is situated on Monterey bay, 80 miles from San Francisco. It is a seaside resort and mountain city, with mild, equable climate.

The Santa Cruz big trees, 6 miles north of the city, are one of the attractions of this section. General Fremont lived one winter inside of one of these trees. The California State Redwood park of 4,000 acres of giant woods, 26 miles from town, is another attractive spot and one that should be visited. Here

may be seen some of the oldest living trees in the world, many of them estimated to be 3,000 to 4,000 years old. Some of these trees are 60 to 70 feet in circumference.

Santa Cruz was in the early days the site of Mission Santa Cruz, established in 1791. Not a trace now remains of the building and a large Catholic church occupies the spot on which it originally stood. A commemorative arch has been built at the entrance, dedicated to the memory of the mission.

Route 75—San Jose to Santa Cruz, Cal.—56.8 m.

Reverse Route 407.

Via Saratoga, Governors Camp and Boulder Creek. Concrete paving to Saratoga; balance fair to good gravelly dirt. Summary: 11 miles concrete; 46 miles fair to good gravel and dirt.

This route traverses a fine orchard district to Saratoga, enters the hills shortly beyond and after a long, steady climb reaches the summit of the Santa Cruz mountains at mileage 17.7. From here on to Governors Camp the road is mostly down grade. While surface conditions are generally good, the road is extremely winding, with numerous very sharp curves, calling for slow and cautious driving. Similar conditions prevail on the balance of this route.

Route 74 offers a shorter option via Los Gatos and Alma.

Upper road comes in from left at 36.9.

*The California Redwood Park, a great forest of the big trees, and the Big Basin, are two of those natural wonders peculiar to California, and every visitor ought to see them. Imagine a great bowl scooped out of the Santa Cruz mountains, the floor carpeted with grass and wild flowers, the walls bris-

ting with redwoods, on every side the hills rimming it evenly, and the name Big Basin is explained. Many of the trees are 350 feet high and 50 to 60 feet around.

First class accommodations can be had by those wishing to spend a day or more at this park exploring and enjoying its wonders.

- 38.7 2.4 End of road; turn right.
 42.9 4.2 End of road; turn left and immediately right.

 HOTELS—Beach Hotel Inn, 37 Main St., on Beach Hill.
 GARAGES—Cedar Garage, 301-303 Pacific Ave.
 Diagonally right on Pacific Ave. is Note (b) Route 67 to The Beach Resorts.

Route 80—San Francisco to Williams, Cal.—139.9 m.

Reverse Route 200.

Via Oakland, Walnut Creek, Martinez, Benicia, Dixon, Woodland and Arbuttle. Concrete and macadam to Walnut Creek, gravel to Martinez, concrete highway to Woodland, dirt to Dunnigan; balance concrete.

Construction work on the new highway paralleling the RR between Woodland and Dunnigan is now in progress and it is possible that the stretch between Blacks and Dunnigan will be open for 1920 travel, reducing the total distance between the two points considerably.

After crossing San Francisco bay by ferry (taking 35 minutes) and passing thru business and residential sections of Oakland, we follow a winding road thru a pretty hilly country to Martinez, and ferry across channel to Benicia. From here to Vacaville the country is rolling and very attractive, with fruit raising one of the leading industries. From Dixon to Williams the route traverses a level farming section, chiefly devoted to grain and fruit growing.

*Boulder Creek, Cal. (pop. 550, alt. 484 ft.), one of the great lumber towns of the coast, is a resort in the midst of beautiful hills, 14 miles north of Santa Cruz. It has important manufactures of high grade lumber. The California Redwood park is 9 miles distant by stage. This park was purchased by the state in 1902 for \$250,000 and is especially beautiful, its natural beauty and majesty having been

left almost untouched. Free camp sites are granted and there are pleasant hotels within walking and driving distance. (For description see California Redwood Park.) Boulder Creek has three tributary canyons from which come the redwood, pine and oak lumber. The fishing is good, and hunters find excellent coverts of deer, quail, wild pigeons and squirrels.

- 53.8 9.9 Irregular 4-corners; bear right with pavement, keeping ahead along RR.

*Woodland, Cal. (pop. 6,000, alt. 58 ft.), is 22 miles west of Sacramento, and is one of the handsomest and most progressive towns in the state. There are several collegiate institutions here and thriving industries. The nucleus of the town was James McClurg & Sons' blacksmith shop in 1855. A store was established the same year and in 1858 the town ac-

quired a post office and was known as Yolo City. In 1862 it was made the county seat and its name was changed to Woodland. The town has grown rapidly from the first and is the home of many wealthy men. It is said to have a larger number of millionaires in proportion to the population than any other town in the state.

Left on E St. are Routes 203 and 204 to Lakeport.

Right on E St. is Route 86 to Marysville and Route 88 to Chico.

Route 82—San Francisco to Blacks, Cal.—103.2 m.

Reverse Route 201.

Via Oakland, San Pablo, Martinez, Benicia, Winters and Madison. First 64½ miles concrete highway; balance gravel and dirt. Summary: 64½ miles concrete; 38.7 miles fair to good gravel and dirt. Some rough gravel thru Pleasant valley and some poor dirt between Madison and Blacks.

This route takes the tourist along hilly shore of San Pablo bay into Martinez, then by ferry to Benicia and over pretty rolling country to within 3 miles of Vacaville. Here it leaves the concrete highway and passes thru Pleasant valley with its fine farms and prosperous orchard districts.

*Arbuckle, Cal. (pop. 1,250, alt. 139 ft.), an important railroad point 37 miles north of Davisville. The town is in the Sacramento valley and is situated on a fan-shaped deposit of recent alluvium. About 20 miles to the east and clearly visible are the Marysville buttes, a cluster of hills about 10 miles in diameter and of volcanic origin. The central butte has an elevation of 1,863 feet. The principal indus-

try of Arbuckle is almond growing. (For description of the Marysville buttes see Colusa.)

*Williams, Cal. (pop. 600, alt. 84 ft.), in Colusa county, is the starting point for the Lake county resorts. It is a flourishing railroad town with good schools and hotels and large warehouse capacity. A motor bus runs to Bartlett Springs.

 GARAGES—Winter's Garage, at south end of town.

***Martinez, Cal.** (pop. 2,175, alt. 7 ft.), is a quiet, restful place, delightfully located in a little valley with its back to the many curved hills and its face to the water and looking toward Benicia. The locality is full of charming nooks. Many of the first families of Martinez came from New England. The town was named in honor of Ignacio Martinez, who was born in the city of Mexico in 1774, became a military man and as such came to California in 1800. In 1837 he was made alcade of San Francisco. He died sometime before 1852. Just west of the town are situated the Nevada Warehouse and Dock company's warehouses, the largest on the Pacific coast. Here deep water ships take on cereals for Europe.

***Benicia, Cal.** (pop. 2,375, alt. 55 ft.), situated on the swift-running Strait of Carquinez, which connects Suisun and San Pablo bays, is 24 miles in a direct line north of San Francisco. It has a good harbor for vessels not drawing over 23 feet of water. There are extensive wharves and ship yards, and a United States arsenal and barracks. The town was founded in 1847 and named in honor of

the wife of the Mexican general, Vallejo. For two years it was the rival of San Francisco. In 1853 it was made the "permanent seat of government," but in March, 1854, the capital was transferred to Sacramento.

Over the Strait of Carquinez pass the high voltage wires of the Pacific Gas & Electric Company, which bring all the electric power for the electric light plants and the manufacturing in the city of San Francisco from the hydro-electric power plants in the High Sierras, over 200 miles distant. Jack London's "Tales of a Fish Patrol" and "John Barleycorn" tell of adventures which happened in these straits and in San Pablo bay. At Benicia two great transfer boats carry the longest trains across the straits on the way to and from the bay cities.

***Winters, Cal.** (pop. 1,500), in Yolo county, is 12½ miles north of Vacaville. It has fruit industries, and in importance is the second town in the county. It was laid out in 1875 by the Vaca Valley & Clear Lake Railroad and is on the line between Yolo and Solano counties. It is a good business point with a large shipping trade.

*Corning, Cal. (pop. 1,300, alt. 277 ft.), on the Pacific highway, is the trading center of the Maywood colony, a subdivision of 39,000 acres, 12,000 of which are in orchards, with olives,

almonds and oranges predominating. Corning is conspicuous for its mission architecture. A free camping ground with lights, stoves, tables, benches, water and dressing rooms is maintained for the use of autoists.

POINTS OF INTEREST, RED BLUFF, CAL.

Red Bluff (pop. 5,000, alt. 304 ft.) is situated on the Sacramento river and named from the color of the banks of the river at this point. The most important object of interest near Red Bluff is Lassen Volcanic National Park. Mt. Lassen Peak is the only active volcano in America. A picture of this moun-

tain taken during eruption in 1914, known as the "Vulcan Face," was named after the god of fire and volcanoes, owing to the pronounced features of a man's face in the smoke. Other points of interest in the Lassen Volcanic National park are the Cinder Cone, numerous boiling lakes and mud lakes.

*Colusa, Cal. (pop. 1,600, alt. 82 ft.), is located on the west bank of the Sacramento river, 65 miles northwest of Sacramento. It is at the head of deep water navigation and has a large shipping trade. The town has fine school buildings and is the seat of St. Aloysius college, a Catholic institution. The court house and hall of records are handsome buildings standing in spacious and well-kept grounds.

Colusa is situated on alluvial deposits formed by the streams flowing down from Marysville buttes. In the vicinity are immense fields of rice, barley, wheat, wild oats and burr clover. Just east of the town are the Marysville buttes, a cluster of hills 10 miles in diameter and culminating in South butte, 2,132 feet above sea level. The North butte has an elevation of 1,863 feet. These hills have an interesting geological history. The Bulletin on the U. S. geological survey says of them:

The central area, about 4 miles in diameter, is composed of andesite, a lava that was pushed up from the interior of the earth in a molten but stiff condition. Around the andesite is an irregular belt of sandstone and shales of the Tertiary age bent upward by

the force of intrusion of the andesite so that they dip away from the center at angles of 18-90 degrees. An outer belt about 2 miles wide, of tuffaceous breccias, consisting of angular fragments of lava of various sizes, with some pebbles of other rocks, surrounds the sandstone and shales. The material of these breccia beds once flowed from the crater of the volcano as thick stony mud. The hills have an outer slope of 250 to the mile and a steeper in-facing scarp or bluff. A projection of the outer slope to the center would restore the outline of the old volcano, making it about 5,000 feet high, or over twice the present height.

Yuba City, Cal. (pop. 1,175), is situated on the west bank of the Feather river opposite the mouth of the Yuba river, about 50 miles north of Sacramento. It has fruit-canning industries. Just across the river is Marysville, and the two towns really form one city. In Yuba City lived George Ohleyer, a newspaper man, who brought about the law forbidding hydraulic mining. The court house and hall of records is a handsome building standing on the main street and surrounded by large well-kept grounds.

*Marysville, Cal. (pop. 7,000, alt. 67 ft.), named after Mary Coviland, the first white woman and a descendant of the ill-fated Donner party, is one of the oldest towns of mining days, founded because it was at the head of navigation on the Feather river, one of the richest gold-bearing streams up which boats could come from San Francisco by way of the Sacramento. Steamers still ply regularly to Sacramento. Yuba City is across the river and the two really form one city. Seven miles of levees constructed in 1875, to protect the two cities from floods, have never had a break. Both cities are towns of '49, but today the mines have sunk to secondary importance, agriculture and horticulture being the leading industries. In mining days Marysville ranked next to San Francisco and Sacramento in importance and in the volume of business transacted. In old mining days, too, Marysville was the jollification gathering place for the miners from every quarter, and it was also the storm center of the trouble between the farmers of the valley and the hydraulic miners. The old town is still so much in evidence that the general effect produced is one of age.

*Colusa, Cal. (pop. 1,600, alt. 82 ft.), is located on the west bank of the Sacramento river, 65 miles northwest of Sacramento. It is at the head of deep water navigation and has a large shipping trade. The town has fine school buildings and is the seat of St. Aloysius college, a Catholic institution. The court house and hall of records are handsome buildings

standing in spacious and well-kept grounds.

Colusa is situated on alluvial deposits formed by the streams flowing down from Marysville buttes. In the vicinity are immense fields of rice, barley, wheat, wild oats and burr clover. Just east of the town are the Marysville buttes, a cluster of hills 10 miles in diameter and culminating in South butte, 2,132 feet above sea level. The North butte has an elevation of 1,863 feet. These hills have an interesting geological history. The Bulletin on the U. S. geological survey says of them:

The central area, about 4 miles in diameter, is composed of andesite, a lava that was pushed up from the interior of the earth in a molten but stiff condition. Around the andesite is an irregular belt of sandstone and shales of the Tertiary age bent upward by the force of intrusion of the andesite so that they dip away from the center at angles of 18-90 degrees. An outer belt about 2 miles wide, of tuffaceous breccias, consisting of angular fragments of lava of various sizes, with some pebbles of other rocks, surrounds the sandstone and shale. The material of these breccia beds once flowed from the crater of the volcano as thick stony mud. The hills have an outer slope of 250 to the mile and a steeper in-facing scarp or bluff. A projection of the outer slope to the center would restore the outline of the old volcano, making it about 5,000 feet high, or over twice the present height.

67.8 1.4 Chester, store and P. O. on right. Turn right and follow Route 185 (from mileage 68.3 to 103.6) for directions balance of way to

103.1 35.3 SUSANVILLE, center of town.

Route 90—San Francisco to Ukiah, Cal.—120.6 m.

Reverse Route 210.

Via Sausalito, San Rafael, Petaluma, Santa Rosa, Healdsburg and Cloverdale. Concrete with some short stretches of macadam to Healdsburg, good gravel balance of way, with 5 miles of concrete approaching Ukiah. Summary: 75 miles concrete, with some stretches of macadam; 45 miles good gravel.

After a pleasant half-hour trip across beautiful San Francisco bay the tourist arrives in Sausalito. From here the road leads over pretty hilly country to Petaluma, the largest poultry center in the world. A vast and fertile valley extends to Healdsburg, where a rolling vineyard district is followed to Cloverdale. Shortly beyond Cloverdale a fine gravel highway is followed thru a pretty mountain country.

0.0 0.0 SAN FRANCISCO, Market St. & Van Ness Ave. Go northeast with trolley on Market St., passing thru business district.

2.0 2.0 End of street at ferry building; meeting cross-trolley, turn left onto Embarcadero St. and immediately right.

2.1 0.1 Northwestern Pacific Sausalito Ferry across San Francisco bay.

Charges—Automobile, 90c each way; passenger, 15c each way, 25c round trip.

*Chico, Cal. (pop. 12,000, alt. 189 ft.), is a beautiful little city located in the heart of the famous Sacramento valley. This city has a free camping site for the auto tourist—pure water, clean grounds, etc. Among its many other attractions are the government's world famous experimental gardens and the famous Bidwell park of world-wide historical interest. The famous Sir Joseph Hooker oak, declared by Sir Joseph Hooker, an eminent botanist of England, to be the largest oak in the world,

is within the confines of this park. The tree covers an acre of ground, and 10,000 men can stand under it easily at one time. A short distance away is the famous Mount Lassen, which can be easily seen from the highway when passing thru.

Several large gold dredgers are in operation along Butte creek at Chico. The gold output of this county exceeds two millions annually.

Richardson Springs, 10 miles from town, are famed for the great medicinal qualities of their waters.

- Leaving ferry, jog left and immediately right along park on left.
- 2.2 0.1 Sausalito,* at far side of park. Bear right onto Water St. along RR. Same thoroughfare becomes Caledonia St. Caution for sharp curve 2.9.
- 3.1 0.9 Bonita St.; turn right with pavement.
- 3.7 0.6 Right-hand road; turn right with pavement. Pass Waldo Sta. on right 4.4.
- 5.6 1.9 Fork; bear right across concrete bridge.
- 6.7 1.1 Fork; bear right across RR at High School Sta.
A trip may be made from High School Sta. to Mt. Tamalpais* and Muir Woods.*
- Avoid left-hand road 7.4 and at fork just beyond keep left upgrade. Pass Corte Madera Sta. on right 9.7.
- 10.1 3.4 3-corners; bear right with pavement. Thru Larkspur 10.6. Cross RR at Kentfield Sta. 12.0.
- 12.3 2.2 End of road; turn left, passing store on right.
- 13.9 1.6 San Anselmo,* stores on right. Keep ahead along RR.
- 14.0 0.1 End of road, just beyond RR; turn right along same.
Left before this turn is Route 116 to Monte Rio.

*Sausalito, Cal. (pop. 2,400, alt. 200 ft.), a resort of Marin county, is situated on the west shore of San Francisco bay, 6 miles northwest of San Francisco, with which it is connected by ferry. It is one of the prettiest of the shore towns, with trim houses and gardens from which flower-wreathed ladders lead to the water's edge. In the summer time the waters between Sausalito and Belvedere are a favorite gathering place for beves of yachts, launches and house boats. From Sausalito an auto road runs to the Muir Woods National monument via Mill valley. Sausalito is the starting point of the railroad to Mt. Tamalpais, "The Blue," "The Tri-Peaked," "The Hill of Tamal-land," which is reached, after crossing the Straits, by a broad gauge railroad to the summit of the cone which rises 2,600 feet above sea level. The view from the top is one of unusual magnificence, embracing the sea and the city and bay of San Francisco.

*Mt. Tamalpais.—Guarding the golden portals to San Francisco Bay looms Mt. Tamalpais, rising above the surrounding hills to a height of 2,592 feet. Long ago the Tamal Indians traced narrow trails to its summit to survey the ocean, bays, forests, valleys and the riot of little hills that crowd the base of the mother mountain. Now tourists go to its very pinnacle over the "crookedest railroad in the world" to enjoy the wonderful and beautiful view of the city of San Francisco and the Golden Gate. After one has filled his eyes with the beauty of the picture, he no-

tices the marvel of the engineering feat which has made this easy ascent possible. At one point the railroad track parallels itself five times to achieve a difficult grade, forming a double bow knot.

*Muir Woods National Monument, at the foot of Mt. Tamalpais, on the north shore of San Francisco bay, is a splendid grove of California redwoods. One may reach this delightful spot in less than two hours from San Francisco by means of the Sausalito ferry and a very picturesque road leading to the woods from which a panorama of the bay and ocean to the south and west and Mount Tamalpais with its "crookedest railroad in the world" to the north may be had. A good road leads thru the forest, beneath the great trees, many of which are thirty to forty feet in circumference and 250 feet high. These are the Sequoia Sempervirens, a different species than the Sequoia Gigantea of the High Sierra.

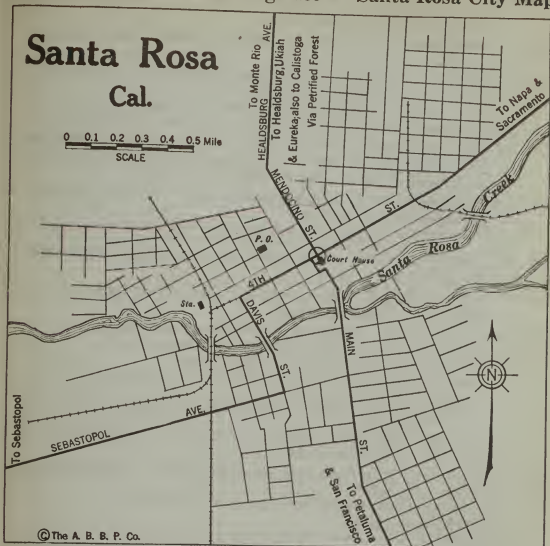

During the summer season there is a guide at the woods who will conduct parties thru the grove and point out the most noted trees, some of which bear the names of prominent men. Muir Woods National Monument has an area of 295 acres, given to the people by William Kent in honor of John Muir, the California naturalist.

*San Anselmo, Cal. (pop. 2,500, alt. 17 ft.), was in the early days a hunting ground for the Indians. It is located but two and one-half miles from Mission San Rafael. (For history of this mission see Index in front of book.) Mount Tamalpais is also but a short distance away.

POINTS OF INTEREST, SANTA ROSA, CAL.

Santa Rosa (pop. 12,000, alt. 800 ft.), capital of Sonoma county, is located on Santa Rosa creek, in a fertile valley near the west base of the coast range. It has an ideal climate, adapted to the culture of grapes. It

formerly was largely engaged in the manufacture of wines. The Pacific Methodist college and the Ursuline academy are both located here, but Santa Rosa is probably best known as being the home of the famous horticulturist, Mr. Luther Burbank.

*San Rafael, Cal. (pop. 6,000, alt. 12 ft.), situated near the northern end of the Bay of San Francisco, is chiefly a residential city containing many beautiful homes and gardens. The old mission San Rafael Archangel, established here December 14, 1817, at the foot of Mt. Tamalpais, was the beginning of the present beautiful city. The mission prospered until secularization took place, from which time the buildings fell into decay and nothing now remains but a few old pear trees planted by the padres.

*Petaluma, Cal. (pop. 5,900, alt. 10 ft.), is considered the largest poultry center in the world; is also considered a dairy center. Annually 13,101,512 dozen eggs and 106,032 dozen poultry have been shipped from Petaluma. This does not take into consideration the thousands of dozen that are used in hatcheries and consumed locally.

The largest hatchery in the world is located in this city, having a capacity of 225,000 eggs every three weeks. The only silk mill west of the Rockies, manufacturing spool silk, is also located here.

A historical landmark of Petaluma is General Vallejo's Fort, known as the "Old Adobe." It is located about three and one-half miles from town. This is a building of immense proportions and was under course of construction during a period of ten years, from 1834 to 1844. It is a two-story structure of adobe and timber, the timber being brought by oxen from the giant redwood of the northern part of this country. It was in this building one of the first schools of industry of California was established—where Mexicans and Indians were taught the crafts and skill. This old landmark has recently been deeded to the Parlor N. S. G. W. with the understanding that it would be preserved for all time.

*Geyserville, Cal. (pop. 600, alt. 205 ft.), is 82 miles north of San Francisco. It has winter-ies and there are a number of geyser springs in the vicinity. The Russians first came here from Fort Ross and planted grain on the rich lands of the Russian river valley, floating it to the mouth of the river on barges and thence up the Coast to Fort Ross.

*Cloverdale, Cal. (pop. 825, alt. 100 ft.), is situated on the Russian river. The surrounding country is a fine grape and orange growing district. The town itself is situated among orange groves and is the railroad station for many well-known springs.

Ukiah, Cal. (pop. 2,150, alt. 620 ft.), is the gateway to the largest forests of redwood in the world. The great state highway runs right through Ukiah and on into Mendocino county, whose rugged mountain and forest scenery is unsurpassed.

Three miles from Ukiah is one of the state's largest hospitals for the insane, a model institution. Three miles in another direction lie the famous Vichy Springs, one of America's best known watering places and a magnificent resort hotel, there being included in its spacious grounds a large plunge of the Vichy water.

But a half mile from town, in one of the most picturesque canyons imaginable, lies one of the state's fish hatcheries. This is always open to the public and shows the care of trout from the smallest spawn to the largest fish. California maintains several of these hatcheries, the fish from which are distributed free in the streams of the state for all who may come.

Several miles distant are the world-famous terraces of Carl Purdy, the noted bulb expert, who made his home in Ukiah.

Route 92—Ukiah to Eureka, Cal.—178.5 m.

Reverse Route 209.

Via Willits, Laytonville, Garberville, Scotia and Fortuna. First 8 miles macadam, then good gravel highway to Longvale. From here on to Garberville all but 18 miles have been graded and construction work is now in progress on this stretch. When Blue Book scout car covered this route some very poor road was encountered north of Laytonville, pending the completion of a gravel surface. A seven-mile detour over poor road and steep grades was encountered just beyond Garberville. The balance of this route is good gravel highway, including a 4 mile stretch of concrete near Loleta.

The scenery along this route beggars description and the charm and grandeur of the country must be seen to be appreciated. The country is densely wooded with Giant Redwood forests and in places the luxurious growths of foliage forms a living arch across the highway. The shady shores of Eel river offer ideal camping sites and during hunting season hundreds of sportsmen are attracted by the wild game inhabiting the forests. A movement is now in progress for the purpose of acquiring a large acreage and set it aside for a National Park of Redwoods.

POINTS OF INTEREST, EUREKA, CAL.

Eureka (pop. 11,850, alt. 28 ft.) is situated on Humboldt bay, about two miles east of the Pacific ocean. Steamboats run regularly from this point to San Francisco, 224 miles distant, and to Portland, Ore., 439 miles to the north. Eureka has a mild and equable climate. It is surrounded by mountains and forests of red-

wood trees, which attain an enormous size. It has a safe harbor, separated from the ocean by a very narrow tongue of land, and with a minimum depth of water of about 24 feet. Large quantities of redwood are exported from Eureka to San Francisco, Hawaii, Australia, and other points. The annual exports of dairy products are about 8,000 tons.

Reverse Route 265.

Via Arcata, Orick and Requa. Macadam and stone to Arcata, good gravel to Orick, then fair to poor dirt and 4 miles of rough plank; balance of way construction work on a new road is in progress between Requa and Crescent City, which, when completed will eliminate the long grades now in existence on this stretch. Summary (approximately): 55 miles good gravel; 36 miles fair to poor dirt; 6 miles good macadam; 4 miles rough plank.

This route presents a continuation of the scenic attractions which were enjoyed between Ukiah and Eureka. Now following the coast more or less closely, winding around inlets and lagoons, penetrating deep virgin forest, one is simply amazed at the grandeur of it all. Nowhere else are trees of such magnitude and number to be seen, and as one gazes with silent admiration at these sentinels of the passing ages one feels exalted with joyous wonderment before nature's own, undisturbed and mighty creation.

- 97.8 19.9 Left-hand road; turn left, turning right with road onto beach.
Straight ahead before this turn is Note (a) to Crescent City, to be used during high tide.

*Arcata, Cal. (pop. 2,700, alt. 25 ft.), is a favorite residence town, being more free from fogs than its larger neighbor. Steamboats ply to San Francisco. Redwood timber abounds here and the town has large lumbering interests and lumber mills. The main forest forms a dark serried wall about two miles north and east of the town. South of the town extends

a vast mud flat or tide land over which the railroad runs to a wharf two miles in length which reaches to deep water in the bay. The early history of the town was filled with mining excitements which doubled and trebled its population several times and as often left it smaller than before and stained its records with bloody fights and massacres.

- 100.8 3.0 End of road, just beyond RR; turn left.
Right is Route 96 to Grants Pass, Ore.
- 101.3 0.5 End of road; turn left across RR.
Turn left with road at lumber yard 102.8—now on 2nd St.
- 103.1 1.8 CRESCENT CITY, 2nd & H Sts.
HOTELS—Bay Hotel & Annex, on the shore of the Pacific Ocean on H St., bet. 1st & 2nd Sts.
GARAGES—Crescent City Garage & Machine Shop, 2nd St., bet. J & K Sts.
COMM. ORGAN.—Crescent City & Del Norte County.
DRUG STORES—Endert's Drug Store, Cor. 2nd & H Sts.

Route 96—Crescent City, Cal., to Grants Pass, Ore.—
95.2 m.

Reverse Route 264.

Via Waldo, Kerby and Selma. First 55 miles winding mountain road which is narrow in places; balance good graded gravel. Summary: 55 miles of mountain road, most of it solid gravelly surface; 40 miles good graded gravel.

Shortly after leaving Crescent City the tourist enters the Giant Redwood Forests of Del Norte County and crosses the state line into Oregon at an altitude of 4,500 feet. A wonderful view of the surrounding country may be had from the summit. Descending a 4-mile grade on narrow, winding road the route traverses a slightly rolling timber country, following rivers and creeks all the way to Grants Pass. The trip can easily be made in 7 hours.

*Grants Pass, Ore. (pop. 5,000, alt. 962 ft.), the county seat and metropolis of Josephine county, is located on the Rogue river, famed for its steel-head and rainbow trout fishing. Mountains embrace it on all sides, the Coast range on the west, the Umpqua divide on the north, the Cascades on the east and the Siskiyou on the south. The Siskiyou are said to have more deer to the square mile than any other section of the U. S. The Rogue river valley is noted for the fertility of its soil and salubrity of its climate. Grants Pass is the valley's gateway to the Pacific ocean at Crescent City, about 100 miles distant, and the center of the famous Rogue river pear and apple growing district.

*Sonoma, Cal. (pop. 975, alt. 98 ft.), is situated on Sonoma creek, 45 miles north of San Francisco, and in the beautiful Sonoma valley, whose soil and climate are especially adapted to viticulture. The site of Sonoma was a part of the original grant of 86,000 acres made to Mariano Guadalupe Vallejo, a Mexican who was reared in Monterey. He founded the town and his beautiful hacienda is still standing, though deserted. It was once the scene of sumptuous hospitality and was called Lachryma Montis, or Mountain of Tears, the name having its origin in the legend of an Indian maid whose lovelorn tears were said to have given rise to the spring on the mountainside. In a Swiss chalet is a historical collection of mementos of the days before the Americans came. The descendants of General Vallejo are now living in a comparatively modern house. At his home on the Sonoma plaza near the mission church he was seized by Fremont and his swashbuckling crew and carried off to Sutter's ranch (near Sonoma), where he was held a prisoner for many weeks

while his captors proclaimed the Republic of California.

Here on Sutter's ranch was Fort Helvetia, where the Bear Flag was raised. After the Republic had been proclaimed, the "republicans" felt the need of a flag, and proceeded to construct one out of a torn sheet. In one corner William Lincoln Todd, nephew of Mrs. Abraham Lincoln, drew a star, but it was recalled that Texas was already the "Lone Star State," so he drew in a grizzly bear as most characteristic of California, and it was then decided to add a bar, for which was contributed, according to the records, the red flannel petticoat of the wife of the American express rider between the Fort and Sonoma. Beneath was printed crudely the legend "California Republic." In 1911 this entire device was adopted as the state flag of California.

It was at Sutter's ranch that the discovery of gold was made in 1848, which led to the great influx the next year of immigrants who were known as "Forty-niners." At Sonoma was established the last of the missions. (See Mission San Francisco Solano.) Sonoma is an Indian word signifying "Valley of the Moon," by which the natives designated the valley of that name.

The Mission of San Francisco de Solano is located in the town of Sonoma. This, the last of the California missions, was founded July 4, 1823, just 54 years after the first mission. It was not comprehended in the original scheme and was not, in fact, intended as a new mission. Father José Altamira, a young priest who had been newly stationed at the Mission of San Francisco de Asis, becoming greatly concerned over the high mortality at his station, desired that the locality of the mission be changed. Encour-

The Mission of San Francisco de Solano, Cont'd.

aged by Governor Arguello and other political personages, he sent out exploring parties and Sonoma was selected as a suitable site and the mission was formally dedicated in April, 1824. Within a year adobe buildings roofed with tiles had been constructed and many neophytes received, a large number of them having come from the missions of San José, San Rafael, and San Francisco. The Indians at this mission represented 35 different tribes. In the twelve years of the mission's existence before secularization, 1,300 baptisms were recorded. Ten years after secularization not 200 Indians remained around the mission.

The pueblo of Sonoma was organized as a part of the secularization of Solano and soon afterwards the soldiers of the presidio of San Francisco were transferred to Sonoma to act as a check on Russian aggression from the north and on the influx of Americans from the United States. Secularization was so thoroughly carried out at Solano that in 1845 when

Pio Pico issued his decree for the sale of mission property, Solano was declared without value. In 1880 the mission and its grounds were sold by Bishop Alemany to a German named Schocken for \$3,000. With the proceeds he erected a modern parish church, which is still in use. For six months after the sale divine services continued to be held in the old mission, then Schocken used it for storing wine and hay. In September, 1903, the mission was purchased for \$5,000 by William R. Hearst, who deeded it to the state of California. The deeds have been accepted by the legislature and an appropriation has been made for the preservation of the mission as a historical landmark. The buildings were extremely plain and have not been improved by age. Their interest is chiefly historical. The church is 36 feet long by 16 feet wide. The tower is said to have been built by General Vallejo in 1835. Adjoining the church is a long, low building with a corridor on one side covered with the overhanging roof.

 21.6 6.4 Fork at signs; bear right.
 21.8 0.2 Cross long wooden bridge over Russian river and at far side of same jog left and immediately right.

*Calistoga, Cal. (pop. 1,500, alt. 359 ft.), is at the head of the Napa valley. Vineyards stretch everywhere around it. To the north is Mt. St. Helena (4,440 ft. high) an extinct volcano. At the summit of this mount may be seen a tablet placed by the Russians in 1812 to commemorate its discovery. The Russians from Ft. Ross were the first white people in this valley. Lassen, Shasta, Tamalpais and points around San Francisco bay may be seen on a clear day from the summit of Mt. Helena.

It is a six mile trip from Calistoga to the Toll House (on the shoulder of Mt. Helena, on the stage road) near which Stevenson

lived when he wrote the "Silverado Squatter." Close at hand is the Silverado mine, where now a monument stands, dedicated to this famous author. Also nearby is the inn over which Mrs. Patterson, to whom he refers, presides.

Another five mile trip from Calistoga will take one to the famous Petrified Forest, one of the natural wonders of the world, also written of by Stevenson.

Hot mud and medicinal mineral baths are a feature of the numerous resorts in the vicinity of Calistoga. There are also numerous spouting geysers which are a source of interest to tourists.

| 31.3 | 3.0 | Fork, sign in center; bear right. |
| 32.3 | 1.0 | Fork; bear left with travel. Avoid left-hand diagonal road 34.6. Thru Strongs 35.2. Keep ahead on winding road up and down grades. |

*Fort Bragg, Cal. (pop. 2,425, alt. 90 ft.), was originally the military post of the Mendocino reservation and was established by Lieutenant Gibson in 1857. The reservation was abandoned in 1867 and the military post no longer needed nor sustained. Gen. Grant was stationed here about 1860. The old McPherson house, about a mile south of Fort Bragg, is of historical interest. An auto camp ground is maintained here.

Two of the victims of the ill-fated Donner party are buried at Fort Bragg, their resting place being marked with a monument.

*Fortuna, Cal. (pop. 1,100, alt. 70 ft.) formerly called Springville, is an important manufacturing town, lively and progressive. Its main industries are saw, shingle, excelsior and planing mills. Carson woods, a tract of 2,200 acres of virgin redwood forest and a proposed national park, is located near here.

- 42.0 9.7 Fork, redwood trees in center; bear left. Caution for sharp turn across small wooden bridge 43.9.
- 48.2 6.2 Bridgeville, end of road. Turn right thru long covered bridge over Van Duzen river.
- 48.3 0.1 Left-hand road; turn left onto winding road up and down grades.
- 51.7 3.4 Fork; bear right onto winding road, using caution for numerous sharp curves.
- 53.5 1.8 Fork, just beyond gate; keep right.
- 55.6 2.1 Fork, at mail boxes; keep left upgrade. Follow winding road for several miles, using caution for numerous sharp turns and pitches. Caution for sharp turn 59.7. Cross suspension bridge over Van Duzen river 59.9. Caution for sharp turn 62.2. Thru Dinsmore 64.4. Thru Valley View 65.5. Caution for downgrade 65.8.
- 69.2 13.6 Left-hand road; turn left. Continue on winding road, using caution for numerous turns on narrow road. Jog left and right across long wooden bridge over Mad river 71.6.
- 72.3 3.1 Fork, sign in center; bear left.
- 86.6 14.3 Auto Rest. Keep ahead downgrade. Jog left and right across long wooden bridge over south fork of Trinity river 86.7.
- 101.8 15.2 End of road, just beyond long concrete bridge; turn right. Follow winding road thru numerous fords, using caution for sharp turns on grade. Thru Wildwood 111.7. Caution for sharp turn, avoiding left-hand road 114.9. Caution for sharp curve on grade 115.6. Pass Nobel Sta. on right 122.9.
- 123.2 21.4 Fork, sign in center; bear right.
Left is Route 114 to Redding.
- 125.5 2.3 Beegum, store on right. Jog right and left across small wooden bridge over Beegum creek.
- 127.8 2.3 Fork; bear left. Thru gate 128.3. Pass well on right 131.2. Thru gates 135.8-139.8-141.9-142.3.
- 142.5 14.7 Right-hand road; turn right.
- 144.9 2.4 Fork; bear right. Thru Rosewood 145.3.

GARAGES—Ft. Bragg Garage & Machine Co., 225 Main St.

Route 119—Fort Bragg to Eureka, Cal.—159.4 m.

Reverse Route 226.

Via Westport, Kenny, Petrolia and Ferndale. Good gravel and dirt over easy, rolling grades along shore to Hardy; winding narrow mountain road to Ferndale; concrete and gravel to Eureka. Average road conditions on this trip are fair and there are many stretches of good surface.

A continuous succession of up and down grades, with varying elevations ranging from sea level to 2,500 feet are encountered, beginning at Hardy. Some of the grades which have sharp turns and blind curves are long and steep. The country is timbered most of the way and some fine views of mountain and marine scenes are encountered. Of particular scenic interest are the beautiful Mattole valley and Cape Mendocino.

Supply and stopping places are very limited and tourists must provide accordingly. There is a small hotel at Kenny's and emergency accommodations may be obtained at the farmhouse in Upper Mattole. Tourists with camping facilities will find this an ideal trip.

*Mendocino City, Cal. (pop. 1,000, alt. sea-level), is situated at the mouth of Big river, 30 miles north of San Francisco, with which it is connected by steamer. It is named after the viceroy Mendoza, who sent Cabrillo forth on his voyage of exploration in 1543. It is connected with Ukiah by stage. The town was founded by William Kaster, whom foul weather drove ashore at this place as he was cruising up the coast in a craft of some kind in 1851. The following year machinery was sent here by ship, saw mills were built and a regular town begun.

*Fort Bragg, Cal. (pop. 2,425, alt. 90 ft.), was originally the military post of the Mendocino reservation and was established by Lieutenant Gibson in 1857. The reservation was abandoned in 1867 and the military post no longer needed nor sustained. Gen. Grant was stationed here about 1860. The old McPherson house, about a mile south of Fort Bragg, is of historical interest. An auto camp ground is maintained here.

Two of the victims of the ill-fated Donner party are buried at Fort Bragg, their resting place being marked with a monument.

Around San Francisco Bay

SAN FRANCISCO is the city of the bay and the ocean. Within a few miles are many of the wonders and beauties of California. To help the visitor understand, appreciate and enjoy this great metropolis and its surpassingly beautiful environs, the following insert has been carefully prepared

*San Francisco
and
The Golden Gate
from
Twin Peaks Blvd.*

Where to Stop and What to See around San Francisco Bay

POINTS OF INTEREST, SAN FRANCISCO, CAL.

San Francisco (pop. 540,000, alt. 69 ft.), wonderfully poised on a succession of hills among surroundings of great charm, is most impressive and holds much that is of interest to the tourist. More especially for the motorist does it hold a charm, for it has looked well to the construction and maintenance of its roads and boasts of many miles of well kept boulevards within its limits. The city occupies the end of a peninsula or tongue of land with the ocean on one side and the bay of San Francisco on the other. Several of the hills surrounding it are traversed by residential streets, from which magnificent prospects over the country, with the bay and ocean, can be had.

The entrance from the Pacific Ocean to the bay at San Francisco is thru the Golden Gate, a waterway with a strikingly beautiful and picturesque setting, a mile and a quarter wide at the narrowest point. The bay itself extends from Fort Point past the city in a southeasterly direction and northward expands into San Pablo bay, at the northeast end of which is Mare Island, where the United States navy yard is located. Almost in front of the city

are Alcatraz, Angel and Yerba Buena (or Goat) Island. This harbor ranks among the few great seaports of the world. It is a landlocked sheet of water, some fifty miles long and varying in width. A government military reservation, the Presidio, occupies 1,500 acres on the north end of the peninsula. This is the largest military reservation within city limits in the United States.

The highest of the hills surrounding San Francisco, known as Twin Peaks, are 925 feet high and form an amphitheatric background to the built-up portion of the city, a beautiful auto drive leading over these. At the Ocean Beach is the Cliff House and Seal Rocks, which are reached by a drive thru Golden Gate park. The Seal Rocks, with their curious occupants, are a most interesting sight. These rocks are conical in shape, three in number, and vary in height from 20 to 50 feet. They are the haunts of seals, and it is said that there is never a moment when scores of these curious marine-mammals may not be seen basking in the rays of the sun on these rocks or struggling among themselves for a place thereon. These seals are protected

POINTS OF INTEREST, SAN FRANCISCO, CAL.

(Continued from page 160B.)

by law. Another point of interest in the vicinity of the Cliff House is Sutro Heights, the private grounds and art collection of the former Mayor Sutro.

The most notable public edifices in San Francisco are the city hall, civic auditorium and public library in the civic center. There are several squares in San Francisco, the best known of which is Portsmouth square. On July 8, 1846, Capt. Montgomery of the U. S. sloop-of-war Portsmouth, then lying in the bay, at the command of Commodore Sloat, raised the American flag on the plaza of what was then called "Yerba Buena." A salute of 21 guns from the Portsmouth announced the fact that the U. S. had taken possession of northern California. This square was then named Portsmouth square, and at the same time Montgomery St. was named in honor of the captain. The chief commercial thoroughfare is Market street, which has a length of about 3½ miles. Of the residential quarters the most distinguished are "Knob Hill" on California street, Pacific Heights, Forest Hill and St. Francis Woods. Chinatown, unique

and picturesque, yet more interesting to the majority of sight-seeing tourists, is situated between Kearney and Stockton, California and Pacific streets. Telegraph Hill is well known to old Californians. In 1849 a signal station was established on this elevation and the dwellers of the bay were notified of the approach of vessels from the sea by means of a well understood system of signals.

The largest of the city's parks is Golden Gate park, which covers an area of 1,013 acres. Originally a barren tract of sand dunes, it has been gradually converted into one of the most attractive parks in the country. The oldest building in San Francisco and the one most noted, historically speaking, is the Mission Dolores on the corner of Dolores and 17th streets. Considerable of the original building remains and many of the interior decorations have, to a certain extent, been retained in their pristine state, sufficient to recall the times of the early fathers. The adobe walls are three feet thick, resting on a low foundation of rough stone, not laid in mortar, and the roof is covered with heavy semi-cylindrical tiles. The floor is of earth,

except near the altar. Adjoining is the Mission cemetery, which was used for the purpose of interment since 1858, many of the inscriptions on the tombs being in Spanish. (For further description of this Mission, see page 160L.)

The first white settlement at San Francisco Bay was established in 1776, when an Indian Mission (San Francisco de Assisi) was founded by the Spaniards. Sixty years later the little village of Yerba Buena sprang up on the shores of the bay. This took the name

of San Francisco. The discovery of gold in 1848 attracted hosts of immigrants from all parts of the world to California, and San Francisco, which was their landing place, suddenly developed into a busy city. It was visited by a most disastrous earthquake and resultant conflagration in 1906, but has since been rebuilt on a grander and more substantial basis. The great Panama-Pacific exposition, which opened Feb. 20, 1915, in celebration of the completion of the Panama canal, added to the city's already universal fame.

QUICKEST AND BEST WAY TO SEE THE CITY.

Out Market street to Van Ness avenue, northerly to Fort Mason to the Marina (the boulevard facing on the Golden Gate in the Exposition grounds) to the Presidio, winding around the famous scenic boulevards to the

First avenue entrance; southerly on First avenue to Lake street; circling around West Clay park and Sea Cliff to Lincoln park; to the Cliff House, southerly on the Great highway, Sloat boulevard, easterly to Corbett

MISSION DOLORES.

The Mission Dolores, also known as Mission of San Francisco de Assisi, is located at the corner of Seventeenth and Dolores streets in San Francisco. It is three miles from the Palace Hotel and the Valencia or Howard electric cars pass the entrance. When the Spanish Visitador Galvez showed Serra the plans for the missions in Alta, California, Serra expressed his disappointment that the founder of his order was not recognized in the missions he had been called upon to found by asking, "And is our Father St. Francis to have no mission?" To which Galvez replied, "If St. Francis wants a mission, let him show you a good port and then let it be named after him." It therefore seemed like an intervention of St. Francis that Portola and his party, searching for the bay of Monterey, passed it unrecognized and toiled further north until they came in view of the Golden Gate. They returned to San Diego disheartened and only Serra's faith and enthusiasm caused them to start out again.

This time, accompanied by Serra and Crespi, they recognized the bay of Monterey, and later the great bay of San Francisco was revisited and surveyed. Serra, when he saw the bay, exclaimed, "This is the port to which the Visitador referred and to which the saint has led us," and determined to hasten the founding of the mission of San Francisco, but many tasks intervened and it was not until the memorable year of 1776 that this mission was established.

Captain Juan Bautista de Anza with a company of about 200 colonists, men, women and children, had been sent ahead to select a site. He chose a site near a spring and creek which he named after the day—the last Friday in Lent—"Arroyo de los Dolores." Hence the name so often applied to the mission itself, it being commonly known even today as Mission Dolores. As the city grew the creek and the small lake were drained, filled up and finally built over.

In 1782 the corner stone of the present old

(Continued from page 160I.)

mission church was laid. Twice the great English navigator Vancouver visited and was entertained here. In 1806 the Russian chamberlain, Rezanof, who had been on a special voyage round the world, came to the San Francisco settlement. He was accompanied by Dr. G. H. von Langsdorff, whose account of the visit and reception is most interesting.

The Mission of San Francisco de Assisi was secularized in 1834. When California became part of the United States in 1846 and the stars and stripes were raised over the bay and city of San Francisco, the mission was too far gone to participate or indeed be affected by the event. It had already reached the condition in which Bret Harte "gave it but few years longer to sit by the highway

and ask alms in the name of the blessed saints." It has now been somewhat renovated from the condition of "ragged senility" in which he saw it. Only the chapel remains. Here two services are held annually in Lent. A beautiful new church has been erected next to the old mission.

The church yard of Dolores is an interesting place, and though neglected and uncared for, is picturesquely beautiful. Just at the side entrance of the church is a stone inscribed with the name of the first governor of California. Further along is a brown stone monument erected by the famous fire company to Casey, who was hung by the Vigilantes—Casey, who shot James King of William.

POINTS OF INTEREST, OAKLAND, CAL.

Oakland (pop. 246,150, alt. sea level) is beautifully situated on the east shore of San Francisco Bay, the land sloping gradually down to the waters from the Contra Costa mountains, which rise back of the city at a distance of a few miles. The foothills are crowned with the suburban villas of wealthy merchants of Oakland and San Francisco, and from their verandas can be obtained a most extensive and pleasing view of the bay and the ocean beyond. Oakland is one of the most beautiful residence cities in the world. A marvel of engineering is the Oakland Mole,

which has been constructed for two miles directly out in the bay. At its terminus is an immense building containing waiting room and all necessary accommodations for the convenience of the great army of travelers who disembark on the arrival of trains. All the passenger trains from the east, north or south are made up at this depot and here all incoming passengers leave their trains and are transported on magnificent ferry boats to San Francisco. An enormous bridge, the largest in the world, is being planned to connect Oakland with San Francisco.

QUICKEST AND BEST WAY TO SEE THE CITY.

Entering Oakland by Lincoln highway. Pass Chevrolet automobile factory (on left), 69th street and Foothill boulevard; follow Lincoln highway signs to city hall, 14th and Washington streets, passing en route Municipal auditorium (on left) and Lake Merritt (on right), only salt water lake in the world inside a city limits; from city hall drive south and east 18 blocks to

MOST POPULAR SHORT TRIPS OUT OF CITY.

Mount Diablo—East Twelfth street and foothill boulevard (Lincoln highway) to Dublin road, then north through San Ramon valley to Danville, then to summit of Mt. Diablo, then westward to Tunnel road, through Walnut Creek, from Tunnel road to Claremont, Berkeley and Oakland. Time required, about four hours.

POINTS OF INTEREST, BERKELEY, CAL.

The Campanile
At University of California, Berkeley.

Berkeley (pop. 63,000, alt. 183 ft.) is located about seven miles northeast of San Francisco and commands a beautiful view of the bay and the hills around it. It is the seat of the University of California and also the State agricultural and mechanical college and the Berkeley Bible seminary. The city is named in honor of Dr. George Berkeley, Dean of Derry and Lord Bishop of Cloyne, a gifted scholar and philosopher.

Starting in Berkeley you will find well kept boulevards that reach to all parts of the country and to interior points in California. The tourist in search of picturesque scenes and enjoyable environment is well repaid by the panorama of mountains and plain, of inland harbor, of sunset views thru the Golden Gate, while the ocean beyond invites the eye to more distant scenes.

In the northern part of the city along the foothills are the beautiful residence districts, the most popular of which seems to be the "Thousand Oaks" section. The view from the heights of Thousand Oaks is magnificent. An hour's drive from the city will bring one to the home of Joaquin Miller, the Poet of the Sierras—a mecca of many admiring pilgrims. There is a fine grove of California redwoods in Alameda county, near Berkeley. The Muir woods are in Marin county, just across the bay of San Francisco, at the base of Mt. Tamalpais. A delightful ride of 40 miles from Berkeley will take the visitor to the Mission of San Jose, the only relic of its kind to be found in Alameda county. Palmdale, which is part of the ancient mission hacienda, contains a wealth of tropical trees and vines. As a reminder of the romantic era of Castilian domination in California, every tourist will wish to see this place.

SERVICE STA.—Eureka Battery Co., 219 5th St., between C & D Sts.
United States Tire Sales & Service Depots located here.

Route 121—San Francisco to Lakeport, Cal.—91.7 m.

Reverse Route 218.

Via Vallejo, Napa, St. Helena, Calistoga, Glenbrook and Kelseyville. Ferry across bay to Vallejo; first 4 miles out of Vallejo worn macadam, then concrete to Napa; good gravel and dirt to Lakeport. Summary: 74 miles good gravel and dirt; 14 miles concrete; 4 miles worn macadam.

Take ferry at foot of Market St. to Vallejo. From here to Calistoga, situated at the head of Napa valley, the route leads thru a prosperous fruit and general farming community with wooded hills and pretty scenery always in sight. Shortly beyond Calistoga a wide and well graded road takes the tourist across Mt. St. Helena and into a rugged mountain country with many views of exceptional beauty. From Kelseyville on a level farming district is traversed.

Route 124 offers a longer option from Cobb P. O. to Lakeport and within close proximity of most of the popular Lake County resorts. Note (a) gives a connection to Benicia and Note (b) gives a short route from Middletown to Seiglers via Howard Springs.

For this and other exits see City Map, page 160D.

For enlarged map of Congested Business District, see page 160G.

*Vallejo, Cal. (pop. 16,000, alt. 87 ft.)—At this point transfer is made by ferry boat crossing the strait to Mare Island, where may be visited the Mare Island navy yard, the largest naval station on the Pacific coast. It is within two hours by boat from San Francisco, on a comfortable, modern bay steamer through the upper reaches of San Francisco bay.

In visiting the navy yard every courtesy is extended by the officials, and an orderly is at hand to explain objects of interest. Many

thrilling chapters of American history are found in the collection of American victories at sea at Mare Island. Usually one or more battleships or cruisers may be seen in the drydocks, while torpedo boat destroyers are loafing at anchor. No cameras are allowed in the navy yard. Luncheon may be had on board the boat or at Vallejo. Vallejo itself is an interesting little city of homes, with a deep water channel and fine highways leading to the valleys, lying north and east, as well as to the bay cities. It is the chief city in Solano county.

SERVICE STA.—United States Tire Sales & Service Depots located here.

*St. Helena, Cal. (pop. 1,625, alt. 260 ft.), is 60 miles north of San Francisco. It is in a grape region and formerly produced much wine. It was founded 1851 and is on the edge of the lake country. A road runs to Clear lake, which is the Lake Tahoe of the northern region. At the head of the valley stands Mt. St. Helena, made famous by Robert Louis Stevenson as the place of his honeymoon and the scene of the "Silverado Squatters."

Stages run to the mountain and to the lake country beyond. Near St. Helena is the St. Helena sanitarium and the home of Mrs. Ellen G. White, who, with her husband, practically founded the cult of the present Seventh Day Adventists. Mrs. White was also the originator and first leader of the movement toward hygienic living and treatment of disease more fully developed and perfected by Dr. Kellogg in what is known as the Battle Creek sanitarium methods.

POINTS OF INTEREST, NAPA, CAL.

Napa (pop. 6,500, alt. 21 ft.) is situated on a river of its own name and is the county seat of Napa county. The Napa Soda Springs and other springs are found in this vicinity. A few miles to the north of the city, at Yount-

ville, is the Veterans' home, where hundreds of Uncle Sam's old soldiers find a peaceful haven. Napa is also the seat of the state insane asylum and has several thriving manufacturing factories.

 Right at school is Note (b) to Selgier Springs.
- 62.5 1.4 End of road; turn right across culvert. Ascend long winding grade 65.5.
- 70.0 7.5 Cobb P. O., fork. Bear left thru Cobb valley.
 Right fork is Route 124 to Lakeport via Selgier Springs.
- 73.0 3.0 Glenbrook, fork. Bear right across stone bridge.
- 73.4 0.4 Fork; bear left with travel, ascending grade over mountain. Reach summit of Battle Rock mountain 75.3. Pass water-trough on right 77.4.
- 81.8 8.4 Fork; keep left upgrade and at fork just beyond, bear right upgrade.
- 83.6 1.8 3-corners; bear right.
- 83.7 0.1 End of road; turn left.
- 83.9 0.2 Kelseyville,* P. O. on left. Keep ahead.
 Left is Note (a) Route 218 to Highland Springs.

*Calistoga, Cal. (pop. 1,500, alt. 359 ft.), is at the head of the Napa valley. Vineyards stretch everywhere around it. To the north is Mt. St. Helena (4,400 ft. high) an extinct volcano. At the summit of this mount may be seen a tablet placed by the Russians in 1812 to commemorate its discovery. The Russians from Ft. Ross were the first white people in this valley. Lassen, Shasta, Tamalpais and points around San Francisco bay may be seen on a clear day from the summit of Mt. Helena.

It is a six mile trip from Calistoga to the Toll House (on the shoulder of Mt. Helena, on the stage road) near which Stevenson lived when he wrote the "Silverado Squatter." Close at hand is the Silverado mine, where now a monument stands, dedicated to this famous author. Also nearby is the inn over which Mrs. Patterson, to whom he refers, presides.

Another five mile trip from Calistoga will take one to the famous Petrified Forest, one of the Natural wonders of the world, also written of by Stevenson.

Hot mud and medicinal mineral baths are a feature of the numerous resorts in the

vicinity of Calistoga. There are also numerous spouting geysers which are a source of interest to tourists.

*Kelseyville, or Kelsey, Cal. (pop. 1,000, alt. 1,160 ft.), is situated at the base of Uncle Sam mountain amidst beautiful scenery. It is 25 miles northeast of Cloverdale and 3 miles south of Clear lake. It is the oldest town in the county and was the home of Stone and Kelsey, who, in 1847, bought the cattle of the Vallejo family and came in and took possession, compelling the Indians to erect for them an adobe house on the banks of Kelsey creek directly opposite the present town of Kelsey. They treated the Indians cruelly, compelling them to work hard and without pay, and often supplying them with insufficient food, and sending them out to dig gold for the whites, most of the Indians perishing on these trips. Eventually the reckoning came. The Indians beset the adobe, put both Stone and Kelsey to death. The following year Lieutenant Lyons was sent against the defenseless Indians destroying them almost to a man. The town possessed a store and blacksmith shop as early as 1857 and is today a place of considerable importance, having an academy and several industrial establishments.

Pass Sears Point Sta. on right 32.1.
38.7 14.3 4-corners, gas sta. on left; turn right.

*Sausalito, Cal. (pop. 2,400, alt. 200 ft.), a resort of Marin county, is situated on the west shore of San Francisco bay, 6 miles northwest of San Francisco, with which it is connected by ferry. It is one of the prettiest of the shore towns, with trim houses and gardens from which flower-wreathed ladders lead to the water's edge. In the summer time the waters between Sausalito and Belvedere are a favorite gathering place for beves of yachts, launches and house boats. Sausalito is the starting point of the railroad to Mt. Tamalpais, "The Blue," "The Tri-Peaked," "The Hill of Tamal-land," which is reached, after crossing the Straits, by a broad gauge railroad to the summit of the cone which rises 2,600 feet above sea level. The view from the top is one of unusual magnificence, embracing the sea and the city and bay of San Francisco.

*San Anselmo, Cal. (pop. 2,500, alt. 17 ft.), was in the early days a hunting ground for the Indians. It is located but two and one-half miles from Mission San Rafael. (For history of this mission see Index in front of book.) Mount Tamalpais is also but a short distance away.

*San Rafael, Cal. (pop. 6,000, alt. 12 ft.), situated near the northern end of the Bay of San Francisco, is chiefly a residential city containing many beautiful homes and gardens. The old mission San Rafael Archangel, established here December 14, 1817, at the foot of Mt. Tamalpais, was the beginning of the present beautiful city. The mission prospered until secularization took place, from which time the buildings fell into decay and nothing now remains but a few old pear trees planted by the padres.

Route 124—San Francisco to Lakeport, Cal.—98.2 m.

Reverse Route 220.

Via Vallejo, Napa, Calistoga, Seigler Springs and Kelseyville. Ferry across bay to Vallejo; 4 miles of rough macadam leaving Vallejo; then concrete to Napa; good gravel to Calistoga; mostly good dirt to Lakeport, excepting some rough surface between Cobb and Seigler Springs. Summary: 48 miles good dirt; 5 miles poor surface; 27 miles good gravel; 14 miles concrete; 4 miles worn macadam.

The trip to Vallejo is made by ferry. From here to Calistoga, situated at the head of Napa Valley, the route leads thru a prosperous fruit and general farming community with wooded hills and pretty scenery always in sight. The route also passes thru a pretty section of Lake county. Many of the most popular resorts are on or within a short distance from the road.

- GARAGES—The Gulglay Garage, on N. & S. highway at S. end of town
 Left is Route 84 to Redding.
 Right is Route 200 to San Francisco.

Route 126—Lakeport to Williams, Cal.—71.2 m.

Reverse Route 204.

Via Kelseyville, Lower Lake and Wilbur Hot Springs. Dirt road entire distance. Most of this route is over narrow, winding mountain road, and while the surface conditions are fair, careful driving is necessary owing to the narrowness of the roadway and the great number of sharp turns. There are many washes along this route, which are liable to be almost impassable after a storm.

The road is a continuous succession of up and down grades and some of the climbs are long and steep. The first 7 miles to Kelseyville, as well as the last 10 miles approaching Williams, are over level farming country.
 Route 125 offers an option via Upper Lake and Bartlett Springs.

- | MILEAGE | | Distance | Points |

 Right fork leads around east side of Blue lake.
 13.6 1.2 Right-hand road; turn right across bridge.

*Wilbur Springs, Cal. (alt. 1,250 ft.), is in the Coast range mountains, 25 miles southwest of Williams. There are numerous natural springs here, both hot and cold, possessing unusual strength and curative properties. These are accessible the year round.

Wilbur canyon is noted among geologists thruout the world as being the only known district in which gold and mercury are found side by side. There are numerous mineral springs here also, there being 38 within a distance of half a mile—cold and hot. The canyon also has a geyser which spouts every

fifty minutes regularly. This is often referred to as the "man made geyser," as it first started to play when a prospector, while sinking a shaft, put in a "shot" that opened the outlet. Thus it came into being. Beside the gold, silver, mercury, magnesia and copper found in the canyon, there is also a mountain here of almost pure sulphur.

*Williams, Cal. (pop. 600, alt. 84 ft.), in Colusa county, is the starting point for the Lake county resorts. It is a flourishing railroad town with good schools and hotels and large warehouse capacity. A motor bus runs to Bartlett Springs.

Route 129—Martinez to Stockton, Cal.—60.9 m.

Reverse Route 146.

Via Concord, Antioch, Brentwood ad Borden cut-off. Gravel to Pittsburg, concrete to Brentwood, gravel with stretches of oiled macadam to Stockton. Summary: 37 miles good gravel; 17 miles concrete highway; 7 miles oiled macadam.

This route traverses a hilly country to Antioch on easy rolling grades, with many fine views of Mt. Diablo and Suisun bay. Leaving Antioch the highway enters upon the great plains of the San Joaquin valley. At Taylor Ranch, 5½ miles south of Brentwood, the route leaves the highway and follows the Borden cut-off almost due east thru this wonderfully rich agricultural section, the fertile soil of which is equal to the famous loam of the Nile.

- 27.1 0.6 STOCKTON, Weber Ave. & San Joaquin St., court house on right.

GARAGES—Class "A" Garage, 125 S. Sutter St.
Smith & Scott, Channell at Center Sts., 1 block from Hotel Stockton.

*Ukiah, Cal. (pop. 2,150, alt. 620 ft.), is the gateway to the largest forests of redwood in the world. The great state highway runs right through Ukiah and on into Mendocino county, whose rugged mountain and forest scenery is unsurpassed.

Three miles from Ukiah is one of the state's largest hospitals for the insane, a model institution. Three miles in another direction lie the famous Vichy Springs, one of America's best known watering places and a magnificent resort hotel.

But a half mile from town, in one of the most picturesque canyons imaginable, lies one of the state's fish hatcheries. This is always open to the public and shows the care of trout from the smallest spawn to the largest fish. California maintains several of these hatcheries, the fish from which are distributed free in the streams of the state for all who may come.

Several miles distant are the world-famous terraces of Carl Purdy, the noted bulb expert, who made his home in Ukiah.

A brief description of the states covered by this volume will be found in the back of the book. Read it and get an idea of the country you are about to traverse.

Route 130—Martinez to Tracy, Cal.—55.9 m.

Reverse Route 145.

Via Concord, Antioch, Brentwood and Byron. Gravel to Pittsburgh, concrete to Brentwood, followed by 4 miles of gravel, then 8 miles of concrete; balance macadam. Summary: 21 miles good gravel; 25 miles concrete; 10 miles oiled macadam.

This route traverses a hilly country to Antioch on easy rolling grades, with many fine views of Mt. Diablo and Suisun Bay. The balance of route is over the great plains of the San Joaquin valley, one of the richest agricultural sections in the state.

| MILEAGE | Distance Between Mileage Points | |

- 54.8 14.0 Diagonal 4-corners; turn left across RR.
- 55.9 1.1 TRACY,* irregular 4-corners at outskirts, school on right. Straight ahead is Route 1 to Stockton.

Route 131—San Francisco, Cal., and Return—21.9 m.

Reverse Route 132.

Via Presidio, Ft. Miley, Great highway, Forest Hill and South Drive of Golden Gate park. Macadam and hard surfaced roads all the way.

For this and other exits see City Map, page 160D.

For enlarged map of Congested Business District, see page 160G.

0.0 0.0 SAN FRANCISCO, Van Ness Ave. & Market St., at monument. Go north with trolley on Van Ness Ave. Pass city hall and civic center on right 0.2. Caution for numerous cross-trolleys. The route passes thru the heart of "Automobile Row," extending from 0.3 to 1.3.

1.8 1.8 Lombard St.; turn left. Cross trolleys 2.4-2.7.

2.9 1.1 Baker St.; turn right; now in what was formerly the Panama-Pacific Exposition grounds. Palace of Fine Arts and Lagoon over to left 3.2.

3.4 0.5 End of street, California Bldg. just ahead; turn left onto The Marina.

3.9 0.5 End of road; bear left along bay shore. Pass U. S. Coast Guard Sta. on right 4.5. Curve sharp left with road and ascend slight grade 4.8.

4.9 1.0 Right-hand road; turn right, continuing upgrade. U. S. Presidio Military Reservation from last turn. Pass Military Barracks over to left 5.5.

A wonderful panorama of Golden Gate, San Francisco Bay, Mt. Tamalpais and the surrounding country is to be had from 5.7. Fort Point and Mile-Rock Lighthouse are in view.

Caution for narrow winding road. Keep to the right at all turns and be sure to sound your horn. This is a military regulation.

6.7 1.8 Fork; bear right. Avoid left-hand road 6.9. Down short steep grade 7.2 and pass Mountain lake at foot of same.

7.4 0.7 Lake St., just beyond exit from Presidio; turn right.

8.1 0.7 27th Ave.; turn right.

8.3 0.2 W. Clay St.; turn left up slight grade, using caution. Enter Lincoln park 8.7.

A fine view of the bay and surrounding country may be had from the summit of climb at Western Terminus Sign of the Lincoln highway on right 9.1.

9.5 1.2 4-corners; keep straight ahead on 34th Ave., leaving park.

9.6 0.1 End of street; turn right along trolley onto Geary St.

10.1 0.5 Prominent right-hand diagonal road; bear right with travel onto Pt. Lobos Ave., leaving trolley.

10.2 0.1 4-corners, 43rd Ave.; keep straight ahead on Pt. Lobos Ave.

A side trip thru Ft. Miley, the Coast Artillery Garrison, from this point is well worth while. To make the trip, turn right onto 43rd Ave. The entrance to the reservation is at 10.4. Turn square left at first road beyond entrance and follow good though somewhat

*Byron Hot Springs, Cal. a short distance from Byron (pop. 100, alt. 35 ft.), is a health resort. Its waters are said to rival those of Parisbad. Splendid macadamized roads connect the Springs with San Francisco and Oakland. Hotel and cottage accommodations.

*Tracy, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasted of a \$35,000 grammar school, a \$70,000 high school and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

narrow macadam road around reservation. Keep to the right and sound your horn on turn. Exceptional views of the bay and surrounding country are offered by this trip. Avoid right-hand diagonal road 10.6, keeping downgrade along bluff and turn right at warehouse 10.7. Pass out of reservation again 10.9 and reaching Pt. Lobos Ave. 11.1. Here reset odometer to 10.2 and turn right onto Pt. Lobos Ave.

From 43rd Ave., after side trip, proceed west along Pt. Lobos Ave. Cross trolley 10.5.

Road to left, just after crossing trolley thru gate, leads to the private estate of former Mayor Sutro. Automobiles are not allowed within the grounds which, however, are open to the public on foot. Beautiful gardens and a wonderful view, which is to be had from the observation platform, make it worth while to park your machine and spend half an hour making the excursion.

Proceeding from entrance to Sutro Estate, go down slight grade, passing Sutro Museum and Baths on right 10.7. Pass Cliff House on right 10.8.

From the observation platform to which the entrances are down a flight of stairs at either side of the Cliff House, the seal rocks are to be best seen.

Descend short steep road onto Great highway, following along the Pacific ocean beach.

Prominent left-hand diagonal road at 11.3 is north drive of Golden Gate park, leading back to San Francisco. The ship in angle at this point is the "Gjoa," Captain Ronald Amundsen's ship, which came thru the Northwest Passage in the summer of 1905, and is now a part of the Golden Gate park exhibit.

- 11.8 1.6 Just beyond prominent left-hand (leading thru Golden Gate park to San Francisco via the South Drive) take right-hand drive up slight grade onto Sand Dike Drive, which follow along coast above the ocean. Bear left with road 12.2.
- 13.8 2.0 Turn left with road onto Sloat Blvd. Caution for curve 14.2.
- 15.6 1.8 Fork; bear right with trolley.
- 15.8 0.2 Left-hand road; turn left onto Monterey Blvd. Proceed up slight grade from turn.
- 16.1 0.3 4-corners; turn left around small park onto Santa Clara Ave. Thru 4-corners 16.3, following winding road. St. Francis Wood Park to right at 4-corners.
- 16.6 0.5 End of road; turn right onto Portola Drive, taking left-hand diagonal road just beyond onto Claremont Blvd. Straight ahead on Portola Drive is Route 51 at mileage 89.1 to San Francisco via Twin Peaks Blvd.
- Claremont Blvd. merges onto Dewey Blvd. 17.0.
- 17.1 0.5 Pacheco St.; turn left around small green with large urn in center.
- 17.3 0.2 Left-hand road; turn left with travel upgrade, still on Pacheco St.
- 17.4 0.1 Fork; bear left down slight grade.
- 17.5 0.1 Left-hand diagonal road; turn left.
- 17.6 0.1 End of street; turn right onto 9th Ave., at end of trolley. To the east from this point is a view of Twin Peaks, while to the north is a fine panoramic view of the entire city, Golden Gate and Mt. Tamalpais.
- 18.6 1.0 4-corners; straight thru across trolley and bear right into Golden Gate park, and follow South Drive. A detailed description of the drive thru the park is difficult, but it is very simple to make the trip if it be remembered that all right-hand turns which do not lead out of the park should be taken.
- 19.4 0.8 End of road; bear right onto Main Drive, then immediately left onto Stanyan St., leaving park.
- 19.5 0.1 Right-hand road; turn right onto Fell St., along Panhandle. Pass Southern Pacific Hospital on left 20.3. Cross trolley on Divisadero St. 20.4.
- 20.5 1.0 Scott St.; turn left up slight grade. Cross trolley 20.6.
- 20.7 0.2 4-corners, Alamo Square on right; turn right around square onto Fulton St., going down fairly steep grade. Caution for cross-trolley at foot of grade 21.0.
- 21.7 1.0 End of street, city hall just ahead; turn right onto Van Ness Ave.
- 21.9 0.2 SAN FRANCISCO, Van Ness Ave. & Market St. at monument.

Route 132—San Francisco, Cal., and Return—21.9 m.

Reverse Route 131.

Via South Drive of Golden Gate park, Forest Hill, Great highway, Ft. Miley and Presidio. Macadam and hard surfaced roads all the way.

For this and other exits see City Map, page 160D.

For enlarged map of Congested Business District, see page 160G.

- 0.0 0.0 SAN FRANCISCO, Van Ness Ave. & Market St. at monument. Go north on Van Ness Ave. Cross trolley 0.1.
- 0.2 0.2 Left-hand street, city hall and civic center on right; turn left onto Fulton St. Cross trolley 0.4-0.9, proceeding up fairly steep grade.
- 1.2 1.0 4-corners, Alamo Square on left; turn left around square onto Scott St. Caution for cross-trolley 1.3.
- 1.4 0.2 Fell St.; turn right. Caution for trolley crossing and heavy travel on Divisadero St. 1.5. Pass Southern Pacific hospital on right 1.6, now following along Panhandle of Golden Gate park on left.
- 2.4 1.0 End of street; turn left onto Stanyan St., then immediately right into park.
- 2.5 0.1 First left-hand diagonal road; bear left onto South Drive.
Straight ahead on Main Drive is Route 133.
A detailed description of the South Drive is somewhat difficult. The road is easy to follow if it be remembered that all left-hand turns should be taken that do not lead out of park.
- 3.3 0.8 Left-hand road; turn left (leaving park), and cross trolley (on Lincoln Way) onto 9th Ave. Pick up trolley from left 3.5 and follow same up slight grade.
- 4.3 1.0 Left-hand road, at end of car line; turn left onto Pacheco St.
- 4.4 0.1 End of street; turn right, still on Pacheco St., and keep right-hand drive just beyond, up slight grade.
This is entrance to Forest Hill, a fine residential park.
- 4.5 0.1 Fork; bear left with travel, passing thru 4-corners just beyond.
- 4.6 0.1 End of street; turn right, still on Pacheco St., descending grade. Thru 4-corners 4.7, passing small park with large urn in center on right.
- 4.8 0.2 4-corners, at end of park; turn right onto Dewey Blvd. Keep right-hand drive 5.0. Same thoroughfare becomes Claremont Blvd.
West portal of Twin Peaks Tunnel may be seen to right 5.1.
- 5.3 0.5 End of street; bear right, down slight grade onto Portola Drive, and immediately turn left at first left-hand road onto Santa Clara Ave. Thru 4-corners 5.6.
St. Francis Wood Park to left.
- 5.8 0.5 Monterey Blvd.; turn right around small park, continuing down slight grade.
- 6.1 0.3 End of street; turn right onto Sloat Blvd., along trolley.
- 6.3 0.2 Fork; bear left with trolley.
Avoid right-hand roads 6.6-7.3. Caution for curve 7.7.
- 8.1 1.8 Turn right with road at end of trolley onto Great highway.
- 9.7 1.6 Fork; bear left up short pitch onto high drive along the ocean—wonderful view. Descend to main highway 10.1, avoiding right-hand diagonal road, entering Golden Gate park just beyond.

This is South Drive to San Francisco.

Avoid prominent right-hand road into Golden Gate park at ship on right 10.6.

The ship in angle at this point is the "Gjoa," Captain Ronald Amundsen's ship, which came thru the Northwest Passage in the summer of 1905, and is now part of the Golden Gate park exhibit.

Up short grade 11.0, passing Cliff House on left 11.1.

From the observation platform to which the entrances are down a flight of stairs at either side of the Cliff House the seal rocks are to be best seen.

Continue upgrade, winding around to right and passing Sutro

Museum and Baths on left 11.2. Caution for cross-trolley 11.4.

Road to right, just before crossing trolley, leading thru gate is to the private estate of former Mayor Sutro. Automobiles are not allowed within the grounds which, however, are open to the public on foot. Beautiful gardens and a wonderful view, which is to be had from the observation platform, make it worth while to park your machine and spend half an hour making the excursion.

From cross-trolley, proceed up slight grade on Pt. Lobos Ave.

11.7 2.0 4-corners; straight ahead on Pt. Lobos Ave.

Ft. Miley, the Coast Artillery Garrison, lies just to left, and a side trip thru same is well worth while. For this trip turn left onto 43rd Ave. Entrance to the reservation is at 11.9. Turn left at first road after passing thru gate and follow good, though somewhat narrow, macadam road around reservation. Keep to the right and sound your horn at all turns. Exceptional views of the bay and surrounding country are offered by this trip. Avoid right-hand diagonal road 12.1, keeping down slight grade along bluff. Turn right at warehouse 12.2. Pass out of reservation again 12.4, reaching Pt. Lobos Ave. 12.6. Here reset odometer to 11.7, and turn left onto Pt. Lobos Ave.

Proceed eastward from 43rd Ave., on Pt. Lobos Ave., which merges into Geary St., coming along trolley at 11.8.

12.3 0.6 Left-hand road; turn left onto 34th Ave., entering Lincoln park 12.4. Follow winding road up slight grade to summit.

A fine view of the bay and surrounding country may be had from the summit at Western Terminus Sign of the Lincoln highway on left 12.8.

From this point descend easy grade, leaving park at 13.2; now on West Clay St., using caution.

13.6 1.3 27th Ave.; turn right.

13.8 0.2 Lake St.; turn left.

14.5 0.7 4-corners; turn left into Presidio, following road to right just beyond entrance. Mountain lake on right 14.7. Ascend short steep grade, avoiding right-hand road 14.9. Caution for narrow, winding road 15.2. Keep to the right at all turns and be sure to sound your horn. This is a military regulation.

A wonderful panorama of The Golden Gate, San Francisco Bay, Mt. Tamalpais and the surrounding country is to be had from 16.2. Mile-Rock Lighthouse and Fort Point are both in view.

Descend winding grade, passing Military Barracks over to right 16.4.

17.0 2.5 End of road; turn left, downgrade. Turn right with road along bay shore 17.1. U. S. Coast Guard Sta. on left 17.4.

18.0 1.0 Right-hand diagonal road; bear right onto The Marina.

18.5 0.5 Right-hand road, the California Bldg. on left and Palace of Fine Arts and Lagoon on far right; turn right onto Baker St., now in what was formerly the Panama-Pacific Exposition grounds.

19.0 0.5 Lombard St.; turn left. Caution for cross-trolleys 19.2-19.5.

20.1 1.1 Van Ness Ave.; turn right along trolley. Ascend slight grade, crossing trolley 20.5 and cable line at top of grade 20.6. Caution for numerous trolley crossings, now passing thru the heart of "Automobile Row," as far as 21.6. Pass city hall on left 21.7.

21.9 1.8 SAN FRANCISCO, Van Ness Ave. & Market St. at monument.

Route 133—San Francisco, Cal., and Return—16.9 m.

Reverse Route 134.

Via North Drive of Golden Gate park, Great highway, South Drive, 19th Ave., Sloat Blvd., and Ocean Ave. All hard surfaced paving.

- 30.5 0.6 End of road; turn right with poles, taking first left-hand road just beyond, still following poles.
- 30.6 0.1 Danville. Turn left onto Main St.
Right leads to Alamo and Walnut Creek.
Cross RR 31.0. Thru San Ramon 33.8.
- 39.5 8.9 End of road, sign just ahead; turn right.
Left is Route 1 to Stockton and Route 14 to Modesto.
Thru 4-corners at Dublin 39.6.
Left is connection thru Niles Canyon to Niles.
Follow paving over rolling grades through Dublin and Palo-

*Mount Diablo, Cal., an isolated, conical peak of the Coast range, in Contra Costa county, about 38 miles from San Francisco, rises to a height of 3,849 feet above the sea level and is the most conspicuous landmark in the central part of the state. No other mountain in the world offers a greater panorama than that presented from the summit of this mountain. It is a mere foothill compared with Shasta, Whitney, Rainier, Hood and other western mountains, but from its pinnacle half the great commonwealth of California is spread out in an unending glory of lights and shadows.

Mount Diablo is linked to the nearby cities by fast electric train service and a system of broad automobile highways that encircle the

mystic peak to its very summit. The Indians called this mountain Koo Wah Koom, "the mountain of laughter," but the legends of the early Spanish inhabitants of the region supply the name "The Mount of the Devil," or Mount Diablo. It is so centrally located that the United States government in July, 1851, established it as a base meridian for all land surveys in the state. An observatory is located at the summit of the peak. Social life at Diablo centers around a well-established country club and inn. Two hundred acres of rolling and wooded hill land comprise the eighteen-hole golf course, these links being among the most beautiful and best appointed in the country. Bathing, fishing and tennis are among the other amusements offered.

- mares canyons. Cross bridge and ascend grade 46.2. Cross bridge 47.2.
- 47.4 7.9 Right-hand road, sign on far right; turn right around store on right. Thru 4-corners 48.2.
Straight ahead at 47.4 is Route 143 to Hayward and Oakland.
Right 48.2 leads to Rose canyon.
- 48.9 1.5 Fork, sign in center; bear right.
Straight ahead leads to Hayward.
- 50.0 1.1 Fork, bear left with travel. Follow winding road along Lake Chabot 50.9. Caution for many sharp curves and narrow road along bluffs. Descend short steep grade 53.0.
- 53.3 3.3 End of road at foot of grade; turn left onto Estudillo Ave.
- 53.6 0.3 4-corners, filling stations on left and right; turn right onto Foothill Blvd. Thru 5-corners 58.3.
- 59.0 5.4 4-corners; bear slightly right with boulevard, passing brick school on right just beyond.
- 59.2 0.2 High St.; turn left.
- 59.5 0.3 14th St.; turn right along trolley. Thru Fruitvale 60.2.
Left on Fruitvale Ave. 60.2 leads to Alameda.
Home for the Aged on left 60.6. Thru prominent 4-corners at 23rd Ave. 61.0.
- 61.1 1.6 22nd St.; turn left one block, then turn right at lumber yard onto East 12th St. Ascend slight grade, passing small green on left 61.7, and bear slightly right.
- 62.5 1.4 Irregular 4-corners; bear slightly left, joining trolley. Pass Lake Merritt on right 62.6.
- 63.3 0.8 OAKLAND, 12th & Broadway.

Route 137—Oakland to Mt. Diablo, Cal., and Return— 81.8 m.

Reverse Route 136.

Via Foothill Blvd., Lake Chabot, Dublin and Danville, returning via Walnut Creek and Tunnel Road. All hard surfaced road except five miles along Lake Chabot, and some stretches of good dirt and gravel between Dublin and Danville.
Route 1 may be used as an option as far as Dublin.

- 15.4 0.6 Highland Ave.; turn right for $\frac{1}{2}$ mile.
(Route continued on page 195.)

*Claremont, Cal. (pop. 1,500, alt. 1,200 ft.), was formerly the home of the Mission Indians, their rendezvous, known as Indian Hill, now being used as the Indian Hill golf links. An old Indian burial ground is located close to the town. Timber used for the construction of the San Gabriel Mission was hauled from here by oxen, a distance of 28 miles, and the

Mission olives were first planted in this district by padres. An old kiln where the Indians made their pottery is still standing. They glazed the surface of this pottery with asphalt which they brought from Brea canyon. Pomona college, one of the largest educational institutions west of the Rockies, is situated in Claremont.

California
Mission Tour

One of the most picturesque
and historically interesting
of all tours.

THE MISSIONS

California's early history and romance are interwoven with the old Missions. Those desiring to visit these interesting sites are advised to follow the heavy lines shown on the accompanying maps, starting either from San Francisco going southward, or from San Diego going northward. The numbers on both heavy and double lines refer to routes given in this volume of the Blue Book, the arrows indicating the direction in which the routes read. The heavy lines indicate the MISSION TOUR, while the double lines indicate optional routes and best way for reaching the tour route. The location of missions in relation to routes is shown by the solid black dots.

On the following pages will be found an illustration and short sketch of each of the Missions. More detailed description may be had by referring to Index (Missions) in front of book. Also an interesting write-up on California history and the Missions in general will be found in back of book

- Towns
- Missions
- Mission Tour, numbers refer to Blue Book Routes.
- Optional Roads, numbers refer to Blue Book Routes.

Yosemite National Park
Mono Lake

San Francisco De Assisi
(Dolores Mission)

The MISSION SAN FRANCISCO DE ASSISI, popularly known as the Mission Dolores, is located at the corner of Sixteenth and Dolores streets in San Francisco. It is the oldest building in San Francisco and one of the most noted, historically speaking. It was founded by Father Serra personally and the first bell rang out in 1776—the same year that the Liberty Bell was heard. The Mission bells are still suspended by the original rawhides; considerable of the original building remains and many of the interior decorations have been retained in their pristine state. Adjoining is the Mission cemetery, an interesting and picturesque place, though neglected and uncared for. Here are names carved on stones, many in Spanish, denoting that those that lie beneath helped make California history.

San Rafael Archangel

MISSION SAN RAFAEL ARCHANGEL was established on December 14, 1817, on the north side of the Bay of San Francisco, 18 miles from the city of San Francisco, in a beautiful little valley at the foot of

Mt. Tamalpais. The Mission prospered until secularization took place. From this time the building fell into decay. Nothing now remains but a few old pear trees planted by the padres.

San Francisco de Solano

The MISSION OF ST. FRANCIS DE SOLANO is located in the town of Sonoma. This, the last of the California Missions, was founded July 4, 1823, just fifty-four years after the first Mission. In 1860 the Mission and its grounds were sold

and with the proceeds of this sale a modern parish church was erected, which is still in use. In September, 1903, the old Mission was purchased for \$5,000 by William R. Hearst, who deeded it to the State of California.

San Jose De Guadalupe

MISSION SAN JOSE DE GUADALUPE was founded in 1797 by Father Presidente Lasuen. Owing to the soil and climatic conditions this Mission readily became a point of great importance and had a pop-

ulation of 1,754 in the year 1820. Only a portion of the monastery remains, and the Mission has recently been repaired and restored to a great extent. Its style of architecture is plain and dignified.

Santa Clara

Nothing remains today of the original buildings of MISSION SANTA CLARA DE ASSISI, founded on January 12, 1777, at what is now the town of Santa Clara. In 1851 a Jesuit priest established Santa

Clara College in the old mission buildings, and in 1855 it was chartered as a university. In a room of the college building is a collection of articles saved from the old Mission.

Santa Cruz

MISSION SANTA CRUZ was established in 1791. A large Catholic church now occupies the spot on which the Mission originally stood, not a trace being left

of the original buildings. A commemoration arch has been built at the entrance of the grounds, dedicated to the memory of the one-time Mission Santa Cruz.

San Carlos

MISSION SAN CARLOS is located at Monterey. San Carlos Borromeo, the old presidio church, is in the town of Monterey, while San Carlos Carmelo (known as El Carmelo), the Mission proper, is situated about six miles from the city. This was the favorite Mission of Father Serra. Here he spent all of his time when not called away by his duties as president of the Missions, and here he now lies buried in the sanctuary of the Mission. This Mission was founded in 1770. Its architecture is magnificent. The Mission was restored in 1881 and the furnishings of the original building were preserved and may still be seen.

San Juan Bautista

The MISSION OF SAN JUAN BAUTISTA is situated in the town of San Juan. It was founded June 24, 1797, and was the second in the "filling up the links of the chain" Missions. San Juan Bautista

originally had a chime of nine bells cast in Peru and of wonderful sweetness of tone. Only one now remains of the original chime. In one room of the monastery is a museum of Mission antiquities.

The MISSION OF NEUESTRA DE LA SOLEDAD is situated in a grain field three and a half miles west of the town of Soledad. Ruined and deserted, with sagging casements and fallen arches, there is little left to tell the visitor how it was once builded. In its desolation there is a singular appropriateness in its being named for "Our Lady of Solitude." Years before the Mission was founded Padre Crespi had called the locality La Soledad, "The Solitude," on account of its drear loneliness. The ruins of La Soledad show that the walls were made of adobe mixed with flint pebbles and built upon foundations of rough rock. Fallen beams, heaps of tumbled adobes and ruined tiles show the outline of corridor and church. Pa-

La Soledad

raiso Springs, a beautiful watering place just beyond La Soledad, was at one time part of the Mission estate.

San Miguel

MISSION SAN MIGUEL ARCHANGEL is located in the town of San Miguel, named for the Mission, and on the site called Vahia. The location was chosen because of the propinquity of the springs of Santa Isabel and San Marcos, which

promised plenty of water for irrigation purposes. The remains of the old Mission waterworks, including canals and dams constructed by the padres, are still to be seen. San Miguel was the third Mission established by Padre Lasuen.

The MISSION OF SAN ANTONIO DE PADUA is situated twenty miles out from Jolon, a quaint little village of California. After riding several miles thru a beautiful park of mossy and majestic live oaks, the ruins of the Mission are seen in the distance, lying silent and deserted, walled in from the world outside by encircling tree-clad mountains. San Antonio was the third Mission in the chain and was founded in 1771. In 1904 the California

San Antonio

Historical Landmarks League undertook the preservation of this Mission.

San Luis Obispo

MISSION SAN LUIS OBISPO DE TOLOSA, restored without reference to the characteristics of the original Mission, stands on a prominent street of the busy little town named for the Mission it encircles. This Mission was founded by Padre

Junipero Serra himself on September 1, 1772. The original church had adobe walls which stood on stone and cement foundations. The roof was of tiles. Under the restoration these Mission characteristics have disappeared.

La Purisima

MISSION LA PURISIMA CONCEPCION is situated near Lompoc, north of Santa Barbara. It consists of two Missions. The older, known as Mission Vieja or old Mission, to distinguish it from its successor, is near the town, while the latter is located some three miles northwest of town. Both are in ruins. La

Purisima was officially founded December 8, 1787. In style, decorations and dimensions it was the least pretentious of the Missions. Its construction was peculiar in that parts of the buildings were in two stories and that the church formed a room merely in the great building which had many rooms.

Santa Ynez

MISSION SANTA YNEZ was founded by Padre Presidente Tapis in 1804, being the first founded in the nineteenth century. The first Mission church was a simple structure roofed with tile and

speedily completed, but the earthquake of 1812 caused the partial collapse of the structure. A new church was immediately begun and completed in 1817. This is the edifice which the tourist sees today.

Santa Barbara

SANTA BARBARA is one of the largest, most beautiful and best built of the Missions. It alone of all the Missions keeps its ancient aspect. Rebuilt after the earthquake of 1812, it is preserved and still in use, being now a monastery of

the Franciscan friars. This Mission was founded December 4, 1786. The Mission garden is enclosed by Mission buildings, and as no woman may enter here save a reigning sovereign, it is popularly known as the "Forbidden Garden."

Buena Ventura

The MISSION BUENAVENTURA, now situated in the heart of the city of Ventura, was founded by Father Serra personally. At one time this was the center of a great many raids and attacks by Indians, and bullet marks may still be seen in the

walls. After 1830 the Mission was allowed to drop into decay, but it has since been restored as a church. It has a very beautiful tower, in which the old Mission bells are hanging and still ring out in dulcet tones.

San Fernando

MISSION SAN FERNANDO REY D'ESPAGNA stands on the Reyes Rancho, a few minutes' ride from San Fernando. The Reyes Rancho formerly formed part of the Mission estate. The Reyes hacienda temporarily housed the Mission, which also included within its lands the famous Camulos Rancho, the home of

Helen Hunt Jackson's "Ramona." The church at San Fernando is only a pathetic ruin. On the northwest side of it is the old graveyard. Close to the graveyard and still surrounded by the remains of the original adobe wall is the old olive orchard, where a number of fine trees are still growing.

San Gabriel

SAN GABRIEL, founded in 1771 was the fourth of the California Missions to be established and one of the most prosperous. The stone church seen today is the third Mission church of San Gabriel. Across the road, in a theater erected for the purpose is produced at certain seasons the "Mission Play," a drama similar to the "Passion Play" at Oberammergau. Hugo Reid, whose romance gave Mrs. Helen Hunt Jackson the idea for her well-known story "Ramona," lived in San Gabriel near the old Mission, and so the author makes this the birthplace of her heroine.

San Juan Capistrano

SAN JUAN CAPISTRANO, the "Melrose Abbey of the West," and the seventh Mission in order of founding, is considered to have been the most splendid of all the Missions. Its ruins are both picturesque and imposing, and possess, particularly when lighted by the full

moon, a singularly romantic beauty. Against a background of purple mountains, they stand on a hilltop at the border of the sleepy little town of Capistrano. The old church has been restored. Mass is still celebrated in "Serra's Chapel," as this church is called.

Los Angeles Mission

LOS ANGELES MISSION was founded in 1781 and is situated in the center of Old Los Angeles at the Plaza. The original city was centered around this spot, which is now the scene of Mexican gatherings. From an historical standpoint this Mission is very interesting, but from an architectural standpoint it is insignificant. It is now used regularly as a place of worship and is open thruout the day.

While not in reality a mission, the famed MISSION INN at Riverside gives equal inspiration to those who love California's old tradition. It holds so fervidly the romantic spirit of the past, the glamour of old Spain, the restfulness of the Franciscan establishments and the hospitality of the California Dons that a tour of the missions would scarce be complete without a visit here.

This wonderful work of architecture and art is the realization of the lifetime dream and desire of its builder, Mr. Frank Miller, to depict in a modern hostelry the ideals and charms, the simplicity and hospitality of the old missions, and that this has been accomplished will be admitted by all visitors to the inn. Its lofty cloistered walls, spacious sunlit courts and shadowed Moorish corridors breathe of the peace and repose of the days of the padres, combined with which is the most luxurious service of a great modern hotel.

One of the unique features of the inn is the Spanish patio, with its arched openings and its grilled gates and windows. Here one may dine every month of the year under the shade-giving palms and orange trees, within sound of the Spanish mountains and the dreaminess of Castilian music. At night, lighted by the silvery moon and the quaint candelabras set here and there, it is a most picturesque and beautiful spot. Thruout the inn are valuable objects of art, rare antiques and valuable paintings, most of which have been brought from Spain. Below the lobby looms a veritable labyrinth of corridors and

Patio of The Fountains, Mission Inn.

rooms comprise the most interesting curio shop in the west.

No California spot has a richer inheritance of romance than the Upper Santa Ana valley, where Riverside and the Mission Inn lie. Spanish explorers, Franciscan padres, American pioneers and the first overland stages passed thru the valley in turn, and each has left its influence and memory.

Riverside itself with its mission architecture, beautiful parks and magnificent avenues, is on the inland mission automobile route from Los Angeles to San Diego, and all about it the motor boulevards lure one to the best of southern California's scenery and to three of the most interesting of the old missions—Pala, Capistrano and San Luis Rey.

Mission Inn Court.

San Luis Rey de Francia

MISSION SAN LUIS REY DE FRANCIA, named for St. Louis, King of France, was established on June 13, 1798. It was the last Mission founded before the close of the century and the last located south of Santa Barbara. It was completed in 1801 and in its prime was the pride of all the Missions. It stands today in a

fair state of preservation, its architecture being a grand example of the old Mission style. The first pepper tree in California was planted here, and the pulpit used by Father Serra is still shown. San Luis Rey is now used by the Franciscan fathers as a college for the training of missionaries.

San Diego

MISSION SAN DIEGO DE ALCALA, stripped of all save its memories, stands alone upon an isolated hill six miles from San Diego. A fine automobile drive leads directly to the ruins. This Mission was the beginning of the missionary enterprise in California and was founded by the great-souled missionary Padre Fr.

Junipero Serra, whose name is cherished by all Californians of whatever class or creed. It dates back to 1769. Here the first California Indian was baptized, and from here the missionaries pushed on northward. Today only the fachada of the old Mission church and a few portions of the walls remain.

State Capitol, Sacramento, Cal.

Sacramento Section

POINTS OF INTEREST, SACRAMENTO, CAL.

Sacramento (pop. 75,000, alt. 30 ft.), the capital of the state of California, is one of the most interesting and historical cities on the Pacific coast. It was founded in 1839, by General John A. Sutter, and the second time the American flag was raised in California, it was raised over Fort Sutter. This historic old fort, which is within the old limits of Sacramento City, has been restored and is cared for by the Native Sons of the Golden West, part of the building being used as a museum, surrounded by a beautiful park. Sacramento is also the city in which such famous "Captains of Industry" as Mackey, Huntington and Crocker got their start in life. It was here that the Central Pacific Railroad was conceived, financed and started.

Sacramento is regularly laid out, with wide shaded streets and attractive gardens. The city enjoys a mild and salubrious climate; it lies at the head of navigation for all steamboats, and is accessible for steamers and sailing vessels at all seasons of the year. The principal buildings of the city are the state capitol, built in a large park at a cost of \$2,500,000, and containing a library of upwards of 120,000 volumes; the city hall, Crocker art gallery and the exhibition building of the state

agricultural society. To the automobile tourists, Sacramento presents many attractions, as it is within easy reach of such famous scenic spots as Lake Tahoe. At the request of the Chamber of Commerce, free camping grounds have been established at McKinley park for those desiring to take advantage of them. This park is one of the most beautiful in the city, and the camp is equipped with all conveniences

possible, including fuel. Those who desire interesting and scenic trips can, with profit, make Sacramento their headquarters for at least a week, and enjoy new and pleasant trips every day, either into the orange groves, into the gold fields, or into the fruit laden foothills of the Sierras. In the fruit section the beauty of the foothills and the wonderful Sacramento River is not equaled anywhere. Within a radius of 45 miles of Sacramento is grown fully 75 percent of all the deciduous fruits grown anywhere in the state of California.

A sign erected by the California Automobile association at the American river bridge leading out of Sacramento bears the inscription that gold was first discovered in this state in the headwaters of this river.

Route 142—Sacramento to San Francisco, Cal.—101.0 m.

Reverse Route 4.

Via Dixon, Benicia, Martinez, Walnut Creek and Oakland. Concrete state highway to Benicia, gravel with $2\frac{1}{4}$ miles stretch of concrete to Walnut Creek, oiled macadam and paving to Oakland. Summary: 70 miles concrete; 21 miles oiled macadam; 10 miles good gravel.

Leaving Sacramento the route traverses a level, highly developed section of the Sacramento valley to Vacaville. From here on to Benicia the country is rolling and very attractive, with fruit raising one of the leading industries. The channel to Martinez is crossed by ferry and a pleasant $1\frac{1}{2}$ hour drive brings the tourist over pretty, hilly country to Oakland. The trip by ferry across San Francisco Bay is made in 35 minutes.

For optional route via Stockton see Routes 141 and 143. Route 201 offers an option from Martinez to Oakland via Pinole and San Pablo.

For this and other exits see City Map, page 196.

SERVICE STA.—United States Tire Sales & Service Depots located here.

*Lodi, Cal. (pop. 4,500, alt. 52 ft.), is 12 miles north of Stockton, and the center of a great grape growing country. The Flaming Tokay is the special variety of the place and about 3,000 cars of these grapes are shipped annually from this town alone. Over 2,500 acres are planted to table grapes exclusively. The town of Lodi was established by the railroad company in 1869 in response to a petition of inhabitants accompanied by an offer of a half mile square of land on which to lay out the site for the town. The offer was accepted, the town laid by the railroad company and named Mokelumne Station, but this name being too similar to others in the state, was afterwards changed to Lodi. The Mokelumne river flows about three-quarters of a mile north of the town. Watermelons have for

years been a specialty of the place.

*Davis, Cal. (pop. 1,000, alt. 54 ft.), is the site of the state experimental farm of the University of California, where all the practical work of the university school of agriculture is done. The country around Davis is one of the richest agricultural sections in central California, and the experimental work carried on there is of tremendous interest to all those interested or engaged in horticulture or agriculture.

*Dixon, Cal. (pop. 800, alt. 64 ft.), in Solano county, 22 miles southwest of Sacramento, is an agricultural town. It was founded in 1868 and is the grain center of the county, shipping many thousand tons annually. It also has one of the largest certified dairies west of the Rocky mountains, milking about 400 cows.

- 67.8 0.3 Benicia,* bank on left. Straight thru. Cross RR at sta. 68.2.
- 68.3 0.5 Ferry across Strait of Carquinez.
Charges: Automobile, 75c one way; passenger, 15c.

*Vacaville, Cal. (pop. 1,200, alt. 175 ft.), is situated at the entrance to the beautiful and fertile Vaca valley, about 29 miles southwest of Sacramento. It has fruit growing industries, and has attained great fame for early fruits and vegetables, it being usually the first to supply the city markets and to ship deciduous fruits to the east. It was founded in 1852 by William McDaniel for Emanuel Baca, anglicized to Vaca, from whom the town and valley took its name. John R. Wolfskill was the pioneer settler of the township and planted the first trees and vines at the bank of Potah creek, about fourteen miles north of Vacaville.

The town is situated on the state highway connecting Sacramento and points around or to the bay, this unit of the highway being the most direct route and being served by ferry at Benicia and Vallejo with Martinez and Pinole, points in Contra Costa county. A concrete highway connects at Cordelia, about 15 miles southwest of Vacaville, with Suisun, and opens the most direct route to the northern coast counties, being practically without grades.

*Suisun, Cal. (pop. 1,000, alt. 8 ft.), is built on an island in a navigable tule slough, 9 miles north of Suisun bay and 50 miles northeast of San Francisco. Just 5 miles north of the town stood the little Black schoolhouse where Edin Markham, poet and seer, and author of "The Man with the Hoe," went to school. Incidents of his school days here are described by one of his teachers, Mr. S. O. Woods, in "Lights and Shadows of the Pacific Coast." Suisun was settled by Captain Joseph Wing in 1858. He ran boats on the slough and gave the town its first impetus as a trading point. A few miles from Suisun is the great

orchard of A. T. Hatch. It contains 800 acres and is one of the largest in the state. In the Suisun hills is a marble quarry where very beautiful onyx is produced.

The Suisun valley enjoys a national reputation as a great fruit growing district. Along the river, about fifteen miles to the south, are the Suisun marshes, which up to a very few years ago were only used for grazing purposes. These same marshes are now being rapidly put under cultivation and becoming immensely valuable for farming and truck gardening.

*Benicia, Cal. (pop. 2,375, alt. 55 ft.), situated on the swift-running Strait of Carquinez, which connects Suisun and San Pablo bays, is 24 miles in a direct line north of San Francisco. It has a good harbor for vessels not drawing over 23 feet of water. There are extensive wharves and ship yards, and a United States arsenal and barracks. The town was founded in 1847 and named in honor of the wife of the Mexican general, Vallejo. For two years it was the rival of San Francisco. In 1853 it was made the "permanent seat of government," but in March, 1854, the capital was transferred to Sacramento.

Over the Strait of Carquinez pass the high voltage wires of the Pacific Gas & Electric Company, which bring all the electric power for the electric light plants and the manufacturing in the city of San Francisco from the hydro-electric power plants in the High Sierras, over 200 miles distant. Jack London's "Tales of a Fish Patrol" and "John Barleycorn" tell of adventures which happened in these straits and in San Pablo bay. At Benicia two great transfer boats carry the longest trains across the straits on the way to and from the bay cities.

- Leaving ferry, keep ahead on trestle.
- 68.8 0.5 End of road; turn left across RR at sta. onto Ferry St.
- 68.9 0.1 **Martinez,* Ferry & Main Sts., bank on right.**
Right on Main St. is Route 201 to San Francisco via Pinole and San Pablo.
Turn left onto Main St. three blocks.
- 69.1 0.2 4-corners, court house, on near left; turn right.
- 69.4 0.3 4-corners; turn left. Caution for sharp turn under RR 72.
- 73.8 4.4 End of road; turn left across small iron bridge.
- 73.9 0.1 Right-hand road, blacksmith shop on left; turn right. Through Pacheco 74.0. Avoid left-hand road 76.6. Cross trolley 79.0.

*Martinez, Cal. (pop. 2,175, alt. 7 ft.), is a quiet, restful place, delightfully located in a little valley with its back to the many curved hills and its face to the water and looking toward Benicia. The locality is full of charming nooks. Many of the first families of Martinez came from New England. The town was named in honor of Ignacio Martinez, who was

born in the city of Mexico in 1774, became a military man and as such came to California in 1800. In 1837 he was made alcalde of San Francisco. He died sometime before 1852. Just west of the town are situated the Nevada Warehouse and Dock company's warehouses, the largest on the Pacific coast. Here deep water ships take on cereals for Europe.

***Tracy**, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasts of a \$35,000 grammar school, a \$70,000 high school and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

***Livermore**, Cal. (pop. 2,050, alt. 482 ft.), is 48 miles east of San Francisco, in a grain, grape and dairy region. Town and valley are

named after Robert Livermore, the first settler of English-speaking parentage, who, in partnership with Jose Noriega, purchased the Rancho Las Positas and settled here. He was the first, except the mission fathers, to engage in grape, fruit and grain culture. In 1844 he set out an orchard of pear and olive trees, planted a vineyard, and began to grow wheat. He was a native of London, England, and died on his ranch in 1858.

Be cautious of solicitations from the curb for your garage accommodations. The expense of this practice to the garage is often costly to the Tourist. The Publishers recommend your patronizing garages listed in the Blue Book.

*Sonoma, Cal. (pop. 975, alt. 98 ft.), is situated on Sonoma creek, 45 miles north of San Francisco, and in the beautiful Sonoma valley, whose soil and climate are especially adapted to viticulture. The site of Sonoma was a part of the original grant of 86,000 acres made to Mariano Guadalupe Vallejo, a Mexican who was reared in Monterey. He founded the town and his beautiful hacienda is still standing, though deserted. It was once the scene of sumptuous hospitality and was called Lachryma Montis, or Mountain of Tears, the name having its origin in the legend of an Indian maid whose lovelorn tears were said to have given rise to the spring on the mountainside. In a Swiss chalet is a historical collection of mementos of the days before the Americanos came. The descendants of General Vallejo are now living in a comparatively modern house. At his home on the Sonoma plaza near the mission church he was seized by Fremont and his swashbuckling crew and carried off to Sutter's ranch (near Sonoma), where he was held a prisoner for many weeks while his captors proclaimed the Republic of California.

Here on Sutter's ranch was Fort Helvetia, where the Bear Flag was raised. After the Republic had been proclaimed, the "republi-

cans" felt the need of a flag, and proceeded to construct one out of a torn sheet. In one corner William Lincoln Todd, nephew of Mrs. Abraham Lincoln, drew a star, but it was recalled that Texas was already the "Lone Star State," so he drew in a grizzly bear as most characteristic of California, and it was then decided to add a bar, for which was contributed, according to the records, the red flannel petticoat of the wife of the American express rider between the Fort and Sonoma. Beneath was printed crudely the legend "California Republic." In 1911 this entire device was adopted as the state flag of California.

At Sonoma was established the last of the missions. (See Mission San Francisco Solano.) Sonoma is an Indian word signifying "Valley of the Moon," by which the natives designated the valley of that name.

The Mission of San Francisco de Solano is located in the town of Sonoma. This, the last of the California missions, was founded July 4, 1823, just 54 years after the first mission. It was not comprehended in the original scheme and was not, in fact, intended as a new mission. Father José Altamira, a young priest who had been newly stationed at the Mission of San Francisco de Asis, becoming greatly concerned over the high mortality at his station, desired that the

(The Mission of San Francisco de Solano, Cont'd.)

locality of the mission be changed. Encouraged by Governor Arguello and other political personages, he sent out exploring parties and Sonoma was selected as a suitable site and the mission was formally dedicated in April, 1824. Within a year adobe buildings roofed with tiles had been constructed and many neophytes received, a large number of them having come from the missions of San José, San Rafael, and San Francisco. The Indians at this mission represented 35 different tribes. In the twelve years of the mission's existence before secularization, 1,300 baptisms were recorded. Ten years after secularization not 200 Indians remained around the mission.

The pueblo of Sonoma was organized as a part of the secularization of Solano and soon afterwards the soldiers of the presidio of San Francisco were transferred to Sonoma to act as a check on Russian aggression from the north and on the influx of Americans from the United States. Secularization was so thor-

oughly carried out at Solano that in 1845 when Pio Pico issued his decree for the sale of mission property, Solano was declared without value. In 1880 the mission and its grounds were sold by Bishop Alemany to a German named Schocken for \$3,000. With the proceeds he erected a modern parish church, which is still in use. For six months after the sale divine services continued to be held in the old mission, then Schocken used it for storing wine and hay. In September, 1903, the mission was purchased for \$5,000 by William R. Hearst, who deeded it to the state of California. The deeds have been accepted by the legislature and an appropriation has been made for the preservation of the mission as a historical landmark. The buildings were extremely plain and have not been improved by age. Their interest is chiefly historical. The church is 36 feet long by 16 feet wide. The tower is said to have been built by General Vallejo in 1835. Adjoining the church is a long low building with a corridor on one side covered with the overhanging roof.

- 12.7 2.9 End of road; turn left with poles.
- 12.8 0.1 Right-hand road; turn right with travel.
- 13.2 0.4 End of road; turn left. Cross spur 15.0—same thoroughfare becomes Bremen St.

Route 235 to Santa Rosa and Note (a) Route 116 to Healdsburg.
- 49.7 3.4 MONTE RIO, at RR. P. O. on left.
HOTELS—Riverview Hotel, ¼ mile S. of P. O. on river.

*Petaluma, Cal. (pop. 5,900, alt. 10 ft.), is considered the largest poultry center in the world; is also considered a dairy center. Annually 13,101,512 dozen eggs and 106,032 dozen poultry have been shipped from Petaluma. This does not take into consideration the thousands of dozen that are used in hatcheries and consumed locally.

The largest hatchery in the world is located in this city, having a capacity of 225,000 eggs every three weeks. The only silk mill west of the Rockies, manufacturing spool silk, is also located here.

A historical landmark of Petaluma is Gen-

eral Vallejo's Fort, known as the "Old Adobe." It is located about three and one-half miles from town. This is a building of immense proportions and was under course of construction during a period of ten years, from 1834 to 1844. It is a two-story structure of adobe and timber, the timber being brought by oxen from the giant redwood of the northern part of this country. It was in this building one of the first schools of industry of California was established—where Mexicans and Indians were taught the crafts and skill. This old landmark has recently been deeded to the Parlor N. S. G. W. with the understanding that it would be preserved for all time.

The Easy Way to Use the Blue Book

Many users of the Blue Book lose one-half of the pleasure of traveling by *not studying thoroughly* "HOW TO USE THE BLUE BOOK" found in front of the book. Are you getting all the information this book contains?

Route 152—Sacramento to Red Bluff, Cal.—143.0 m.

Reverse Route 194.

Via Roseville, Marysville and Chico. Macadam and concrete to Marysville; concrete to a point 13 miles north of Chico; gravel and dirt to Proberta; concrete then to Red Bluff. Summary: 122 miles macadam and concrete (approximately 100 miles concrete and 22 miles macadam); 21 miles fair gravel and dirt.

The route traverses a rich agricultural district, chiefly devoted to grain, dairying and fruit growing. It follows the east side of the Sacramento valley as far as Tehama, crossing the river at that point and following along the Southern Pacific Ry. balance of the way to Red Bluff.

*Marysville, Cal. (pop. 7,000, alt. 67 ft.), named after Mary Coviland, the first white woman and a descendant of the ill-fated Donner party, is one of the oldest towns of mining days, founded because it was at the head of navigation on the Feather river, one of the richest gold-bearing streams up which boats could come from San Francisco by way of the Sacramento. Steamers still ply regularly to Sacramento. Yuba City is just across the river and the two really form one city. Seven miles of levees constructed in 1875, to protect the two cities from floods, have never had a break. Both cities are towns of '49, but today the mines have sunk to secondary importance, agriculture and horticulture being the leading industries. In mining days Marysville ranked next to San Francisco and Sacramento in importance and in the volume of

business transacted. In old mining days, too, Marysville was the jollification gathering place for the miners from every quarter, and it was also the storm center of the trouble between the farmers of the valley and the hydraulic miners. The old town is still so much in evidence that the general effect produced is one of awe.

Yuba City, Cal. (pop. 1,175), is situated on the west bank of the Feather river opposite the mouth of the Yuba river, about 50 miles north of Sacramento. It has fruit-canning industries. Just across the river is Marysville, and the two towns really form one city. In Yuba City lived George Ohleyer, a newspaper man, who brought about the law forbidding hydraulic mining. The court house and hall of records is a handsome building standing on the main street and surrounded by large well-kept grounds.

*Chico, Cal. (pop. 12,000, alt. 189 ft.), is a beautiful little city located in the heart of the famous Sacramento valley. This city has a free camping site for the auto tourist—pure water, clean grounds, etc. Among its many other attractions are the government's world famous experimental gardens and the famous Bidwell park of world-wide historical interest. The famous Sir Joseph Hooker oak, declared by Sir Joseph Hooker, an eminent botanist of England, to be the largest oak in the world,

is within the confines of this park. The tree covers an acre of ground, and 10,000 men can stand under it easily at one time. A short distance away is the famous Mount Lassen, which can be easily seen from the highway when passing thru.

Several large gold dredgers are in operation along Butte creek at Chico. The gold output of this county exceeds two millions annually.

Richardson Springs, 10 miles from town, are famed for the great medicinal qualities of their waters.

Route 153—Marysville to Chico, Cal.—52.4 m.

Reverse Route 195.

Via River Road and Oroville. First two and one-half miles out of Marysville, very rough, then fair to good gravelly dirt and five miles of hard surfaced roads into Oroville. Good gravel to Durham and concrete to Chico. Summary: 12 miles concrete and macadam; 40 miles fair to good gravel and dirt with the exception of 2½ miles of very rough surface just north of Marysville.

Tourists not wishing to go to Oroville should use Route 152 in preference to the one given here. The former is somewhat shorter and with better road conditions. The route lies thru a prosperous farming country, excepting some undeveloped prairie district between Oroville and Durham.

***Oroville, Cal.** (pop. 5,000, alt. 205 ft.), is situated on the Feather river 3 miles from Table Mountain and 28 miles north of Marysville. It is in a productive fruit and mining region in the Bret Harte country and is known as the "Gem of the Foothills." Here mining is carried on by means of the dredger which is producing a scarification of the land surface similar to that produced by the forbidden hydraulic mining of past days. Dredger mining is but a new application of the hydraulic methods under another form. The dredger cuts into the earth with steel buckets which, running on an endless belt, carry the "pay dirt" to the hopper, where the stones are sifted out. The earth is then washed in a sluice, where the gold is caught in the riffles. The escape of "slickens," whose damming up of the river beds caused hydraulic mining to be forbidden by law, is prevented by the damming up of the dredger, but dredger mining so mutilates the surface of the country that the

question of its prohibition by law has been raised. The dredger overturns the earth like extraordinarily deep ploughing, leaving great naked boulders on the top, so that nothing will grow. The experiment, however, of planting eucalyptus among the boulders has been tried with success. Some contend that instead of prohibiting dredger mining that dredgers be compelled to redeposit the soil so as to cover the rocks and prevent devastation.

Oroville is at the beginning of the canyon of the Feather river, the magnificent arch of the chasm extending to Portola and forming one of the wonders of the state. It has attracted considerable attention from numerous automobilists on account of being on the new scenic route from San Francisco to Lake Tahoe, as laid out by the Feather river highway association, whose object is to induce the state highway commission to connect the county seats of Butte, Yuba, Plumas and Lassen counties by a lateral down the Feather river canyon.

*Quincy, Cal. (pop. 1,000, alt. 3,400 ft.), is 85 miles north of Marysville. It is a delightful little town known to sportsmen for the grouse, deer and bear hunting of its neighboring forests and for its winter sports. It is the mecca of the botanist, for it is the habitat of the "Darlingtonia," or pitcher plants, a special and uncommon variety of which bears the state's name.

Quincy was laid out by H. J. Bradley of Quincy, Ill., and named by him in honor of his previous residence. As an inducement to the people to locate the county seat there, in 1854 he built and tendered to the county free of charge a rude shack building in the rear of this hotel. This building was used as a court room, and the other county offices found house room where they could. At the next election Quincy was formally made the county seat.

*Downieville, Cal. (pop. 500, alt. 2,530 ft.), the county seat of Sierra county, is situated on

the North Yuba river about 76 miles in a direct line northeast of Sacramento. Gold has been mined in the vicinity. Sierra county was the scene of Bret Harte's "Outcasts of Poker Flat," the final test of his genius. There is good grouse, deer and bear hunting in the vicinity. The town was laid out in 1849 by James Vineyard, one of the party of Major Downie which had reached this point some months before and stopped here for prospecting. In 1853 the town was entirely destroyed by fire, but was at once rebuilt. Two days after the fire, one McNulty opened the St. Charles hotel. On Washington's birthday of that year he took in for meals alone \$2,600. The town has had a number of eminent men as residents, among them Col. Joseph McKibben; Col. E. D. Baker, the great orator from Illinois, who fell at Edwards Ferry on the Potomac river; John Mackey, the millionaire, and J. Neely Johnson, Governor of California.

- bridge over south fork of Yuba river and turn left with road. Follow Yuba river for several miles.

- 41.1 2.2 Fork; bear right with travel, crossing RR and following

*Sierra City, Cal. (pop. 650), is in the Sierra Nevada mountains, about 100 miles northeast of Sacramento. The word "Sierra" is Spanish for "saw," and was applied to the mountains in allusion to the series of regular peaks presenting the appearance of the teeth of a saw. "Nevada" signifies "snowy."

*Grass Valley, Cal. (pop. 4,525, alt. 2,500 ft.), in the Bret Harte country, is a health resort of Nevada county and an important gold min-

ing center. The mines of this district produce about \$3,000,000 each year. One mine has been working continuously since 1850. It was asserted that gold was found even in the roots of the grass. Today the mines are all underground. The quartz veins are deep and rich. Grass Valley received its name from the meadow in which the town is situated and which is so moist that even in the dry season the grass is always a beautiful green.

For street maps shown of principal cities, page numbers will be found in General Index—front of book.

along same. Cross RR 41.6 and follow same. Cross switch 43.9. Cross bridge over creek 45.7, ascending winding grade.

Route 160—Sacramento, Cal., to Reno, Nev.—145.9 m.

Reverse Route 272.

Via Roseville, Auburn, Colfax and Truckee. Concrete and macadam to Auburn, fair to good mountain road to Reno. The road across the mountains is generally better during the early part of the season before the heavy travel, with its consequent deteriorating effect, destroys the surface. But as a whole the road is in fair shape and good time can be made. Summary: 36 miles concrete and macadam; 110 miles fair to good mountain road.

Traversing the big plains of the Sacramento valley to Roseville, our route gradually enters a rolling foothill country with prosperous orchard districts to Auburn. Wonderful scenery confronts the tourist as he reaches the timbered zone, climbing higher and ever higher into the heart of the mighty Sierras. Many attractive camping sites are found along the numerous creeks and streams. A winding but well-graded descent brings us from the summit to the shores of beautiful Donner lake and into Truckee, six miles beyond. After many miles across comparatively level country, Dog Valley grade is reached. Descending the grade into Verdi, the Truckee river is followed balance of the way to Reno.

- 25.5 2.5 Loomis. Keep ahead along RR.

*Roseville, Cal. (pop. 4,000, alt. 200 ft.), in Placer county, is a fruit packing center 18 miles northeast of Sacramento. It is the southern terminus of the line from Shasta through Tehama and Marysville to Sacramento. The town has brick kilns and foundries and is a grain shipping point.

*Rocklin, Cal. (pop. 1,000, alt. 249 ft.), is 22 miles northeast of Sacramento. It has large granite quarries and is the scene of the en-

terprises of J. Parker Whitney, the owner of the Spring Valley ranch of 20,000 acres, so well known as a leading California fruit grower and fine stock breeder. Fine medicinal springs are found within the town limits. Here the Indians gathered each year to partake of the healing waters. Near by is an old Indian burying ground, and innumerable holes may be noted in granite boulders in the vicinity of Rocklin, where the red man ground his acorns to make bread.

GARAGES—Colfax Garage, ½ Bk. W. of Tracks at Turn in the Highway.

*Colfax, Cal. (pop. 700, alt. 2,448 ft.), is in the Bret Harte country and was first known as Illinoistown, but was later renamed for Vice-President Colfax. The Central Pacific railway, built up from Sacramento, reached Colfax September 1, 1865. The town today has a large amount of traffic from the overland trains, and is connected with the near-by and important mining districts of Grass Valley

and Nevada City by a narrow gauge railroad. The town itself is an odd mixture of the flimsy structures of mining days with the solid buildings of the modern railroad junction. The road from Colfax to Grass Valley lies through a country of exceeding loveliness. A few miles west is "Rough and Ready," the locale of "A Millionaire of Rough and Ready," by Bret Harte.

*Donner Lake, Cal., located eight miles from Truckee, is one of the most picturesque alpine lakes in California. It is named after the ill-fated Donner party of emigrants, who in the winter of 1846 were snowbound on its shores, many of them perishing from starvation. A

monument has been erected to their memory in the meadow at the east end of the lake.

The altitude of the pass at Summit is 7,018 feet. Surrounding peaks and granite crests tower three thousand feet higher, with deep gorges and mountain lakes between.

Reno City Map and Points of Interest, page 312.

*Truckee, Cal. (pop. 1,500, alt. 5,820 ft.), is picturesquely situated on a bend of the Truckee river, where it flows in from the southwest out of Lake Tahoe. Truckee is the site of a large summer recreation camp. The narrow-gauge line of the Lake Tahoe Railway & Transportation Co. runs south from this city, winding thru the narrow canyon of the Truckee river fifteen miles to Lake Tahoe. Lake Independence, 18 miles north, Donner

lake, 3 miles west, and the Rocking Stone Tower are other interesting points. At Hobart, 8 miles north, are immense lumber mills. In 1846-47 a band of pioneers, known as the Donner party, perished near Truckee on account of the heavy snow (20 ft. on level). A \$3,500 monument now marks the spot on which they died, erected by the Native Sons of the Golden West. A little beyond the monument may be seen a plain white wooden cross designating their burial place.

*Grass Valley, Cal. (pop. 4,525, alt. 2,500 ft.), in the Bret Harte country, is a health resort of Nevada county and an important gold mining center. The mines of this district produce about \$3,000,000 each year. One mine has been working continuously since 1850. It was asserted that gold was found even in the roots of the grass. Today the mines are all underground. The quartz veins are deep and rich. Grass Valley received its name from the meadow in which the town is situated and which is so moist that even in the dry season the grass is always a beautiful green.

*Nevada City, Cal. (pop. 5,000, alt. 2,500 ft.), is a health resort in a hilly region about 60 miles northeast of Sacramento. It has rich mines of gold, and is extensively engaged in fruit culture. It is surrounded by magnificent mountain scenery, and the buildings are scattered over the adjoining hills, while in the town itself and in the outskirts are the quartz mines. The town is especially interesting to tourists by reason of its many pioneer attractions closely associated with California's history, made famous by the writings of Bret Harte.

Via Placerville, Meyers and Carson City. Macadam to Folsom; concrete to Placerville; good mountain road to Meyers. From Meyers road is sandy to Glenbrook; good mountain road to Carson City; good gravel to Lakeview; then rather rough and in places poor road to Reno. Summary: 29.6 miles concrete; 6.3 miles good gravel; 21.9 miles macadam; 19.2 miles sandy road; 67.0 miles mountain road; 23.4 miles rough and poor in places.

This is a part of the Transcontinental highway and one of the most scenic tours of the state. From Placerville to the summit of the high Sierras the road winds along the American river, unfolding an endless panorama of enchanting views. From the summit, at an elevation of 7,630 ft., a wonderful view of the valley, with Lake Tahoe in the distance may be had. A steep but well graded and safe descent brings the tourist almost 1,500 ft. lower to the level of Lake Tahoe. Just beyond Meyers the road forks. The right fork is the tour here described, while the left fork is part of the Lincoln highway via the west side of Lake Tahoe to Truckee. Good accommodations are to be had at Pacific House, Phillips and Meyers.

Note (a) gives an option from Meyers to Lakeside park. Note (b) gives an option from Lakeside park to Carson City.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attache to the office of the first territorial secretary, and the old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city—and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of

the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found footprints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

Glenbrook Inn and Ranch

GLENBROOK IMPROVEMENT CO.

GLENBROOK, Lake Tahoe, NEV.

Glenbrook is the ideal place for Rest and Recreation.

The mountains, the green fields and a glorious atmosphere, in combination with the good things to eat for which Glenbrook is famous, and a good place to sleep is all one could ask for.

 55.7 1.5 FALLON,* Williams Ave. & Main St., court house on left.

*Fallon, Nev. (pop. 741), is in the heart of Carson valley, 15 miles from Hazen, and is situated on a low, broad alluvial fan of Carson river. It is the headquarters of the Truckee-Carson irrigation project. This was the first of such projects undertaken by the United States government. The water is obtained from the Carson and Truckee rivers, whose waters run to waste in the early summer, being lost in inland lakes or sinks by evaporation. The waters of the Truckee are brought over to divide at Fernley by means of a large canal and turned into a huge reservoir in the Carson river. The present constructed reservoirs on the project have a total of 650,000 acre feet. An acre foot is the amount of water necessary to cover an acre of land one foot deep. The area to be irrigated comprises 90,000 acres on the western rim of the Great

Basin in the bed of the ancient and now extinct Lake Lahontan. This is one of the driest sections in the United States and was called the "Forty-mile Desert" by the early emigrants who crossed it on their way to California.

To the uninitiated the valley appears utterly desolate, but it has all the potential resources of the country around Boise, Idaho, or that about Greeley, Colo. The soil is a sandy loam, clay loam, or volcanic ash, and will produce every variety of crop known to the north temperate zone. Potatoes and celery and cantaloupes raised here are of superior quality and are shipped for consumption on dining cars. Considerable areas here yet remain to be taken up by settlers. The maximum claim allowed is 80 acres. The government has established an experiment farm near Fallon.

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in the handling of lighted matches, cigars, cigarettes, etc., when touring through wooded sections.

Route 167—Sacramento to Truckee, Cal.—152.8 m.

Reverse Route 274.

Via Folsom, Placerville, Meyers and west shore of Lake Tahoe. Macadam to Folsom concrete to Placerville; balance good mountain road. Summary: 22 miles macadam; 3 miles concrete highway; 100 miles good mountain road.

This is a part of the Transcontinental highway and one of the most scenic tours of the state. From Placerville to the summit of the high Sierras the road winds along the American river, unfolding an endless panorama of enchanting views. From the summit, at an elevation of 7,630 ft., a wonderful view of the valley and Lake Tahoe in the distance may be had. A steep but well graded and safe descent brings the tourist almost 1,500 ft. lower to the level of Lake Tahoe.

Just beyond Meyers the road forks. The left fork is the tour here described, while the right fork is part of the Lincoln highway leading to Glenbrook, Carson and Reno. Good accommodations and supplies are to be had at the Pacific House, Phillips, River ton, and at Meyers.

A very scenic side-trip to Fallen Leaf lake branches off to the left near Tallac, and the roads being fair and the distance short tourists should avail themselves of this trip.

Approaching the shore of Lake Tahoe, it is difficult to picture in words the charm and grandeur of what is in store. This beautiful lake, 23 miles long and 13 miles wide forms a natural boundary between the states of California and Nevada. It is encircled by rugged mountains whose crests are covered by eternal snow. There are numerous smaller lakes of almost equal beauty nestled hereabouts. All classes of accommodation are to be had in the many hotel resorts located near the lakes. Leavin

Lake Tahoe shortly beyond Tahoe Tavern, the route follows along the picturesque river into Truckee.

0.0 0.0 SACRAMENTO, 7th & K Sts., P. O. on left. See Route 16 for directions to Meyers, 105.1 miles, where reset odometer to 0.0.

Right at end of road is Note (a) Route 160 to Brockway.

*Truckee, Cal. (pop. 1,500, alt. 5,820 ft.), is picturesquely situated on a bend of the Truckee river, where it flows in from the southwest out of Lake Tahoe. Truckee is the site of a large summer recreation camp. The narrow-gauge line of the Lake Tahoe Railway & Transportation Co. runs south from this city, winding thru the narrow canyon of the Truckee river fifteen miles to Lake Tahoe. Lake Independence, 18 miles north, Donner

lake, 3 miles west, and the Rocking Stone Tower are other interesting points. At Hobart, 8 miles north, are immense lumber mills. In 1846-47 a band of pioneers, known as the Donner party, perished near Truckee on account of the heavy snow (20 ft. on level). A \$3,500 monument now marks the spot on which they died, erected by the Native Sons of the Golden West. A little beyond the monument may be seen a plain white wooden cross designating their burial place.

Redding Section

POINTS OF INTEREST, REDDING, CAL.

Redding (pop. 3,575, alt. 559 ft.), the capital of Shasta county, California, is situated on the Sacramento river, a distance of 35 miles north of Redbluff. It has very beautiful and interesting surroundings and a more moderate climate both in summer and winter than the rest of the Sacramento valley, owing to its unique location at a slight elevation above the lower floor of the valley.

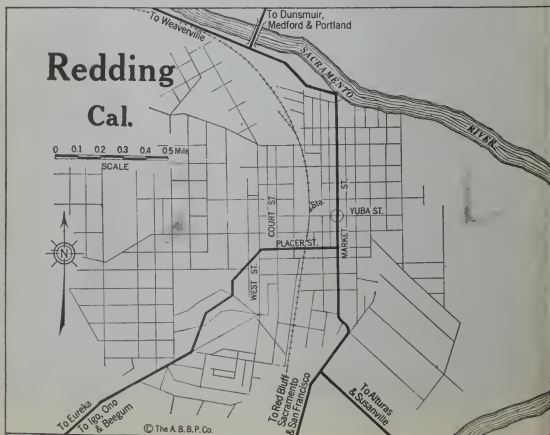

On the northern border, just across the line in Siskiyou county, stands Mt. Shasta, whose snow-capped summit can be seen from all parts of Shasta county. In the southeastern part of the county is Mt. Lassen, America's most wonderful natural phenomenon and the only active volcano in the United States. It is but a distance of 55 miles from Redding, and since the commencement of its eruptions in 1914 it has been the center of scientific and popular interest. The United States government has maintained a careful watch of the marvel from a scientific standpoint, and thousands of sight-seeing tourists have viewed the wonder from every point of vantage. Manzineta lake, a beautiful body of water picturesquely nestled at the foot of Mt. Lassen, is the objective of many autoists and furnishes a very popular trip, and one well worth while, out of Redding.

There are any number of beautiful waterfalls to be found in Shasta county, among which are Burney falls, Fall River falls and Pitt River falls. Other points of great interest that should be seen are the great olive orchards in Happy valley, a few miles from the city, the new concrete bridge just north of town, built by the business men of Redding at a cost of \$60,000, the Mammoth copper mine at Kennett, and also the bag house of

that company, which controls the smelter fumes at the Mammoth smelter. The Big Bend hot springs of the Pitt river and the Combs springs, just across the line in Trinity county, are famous for their curative powers and attract many tourists annually.

For many Old Shasta, near by, holds a peculiar interest, surrounded as it is with memories of the famous days of the gold rush in '49. It is one of the oldest mining towns in California and was at one time a great mining center. Mining is still carried on here to some extent, and also at Weaverville, Douglas and Trinity Center. Redding is the outfitting point for all of these towns, and many more, including the various mountain, hunting and fishing resorts of Trinity county, adjoining on the west. Great irrigation projects for intensification of agriculture are carried on all about this territory, and have brought about most wonderful and satisfying results, which the tourists cannot but take note of in traversing Shasta and its adjacent counties.

Clear Creek, a small stream about 3½ miles south of Redding, has become the center of one of the richest and most extensively worked placer mining fields of the state. About 3,000 acres of very fertile farm land has been turned over to the mining company to be worked by immense dredges, and when these machines have completed their task this entire acreage will be one immense barren district of rock and gravel. Just east of this field an irrigation project was completed a year or two ago and already thousands of acres of land formerly given over to sage brush and lizards are now giving substantial agricultural returns.

Route 171—Redding to Dunsmuir, Cal.—65.0 m.

Reverse Route 243.

Via Baird, La Moine and Castella. Good gravel highway, with the exception of 5 miles of poor dirt. This latter stretch is under construction and a good deal of it will be completed for the 1920 travel. Summary: 60 miles good travel; 5 miles poor dirt.

Crossing the Sacramento river on a fine concrete bridge, shortly beyond Redding, the route follows a winding road over easy grades thru a wooded foothill country, and enters a mountainous region near the junction of the Pitt and McCloud rivers. From here on the road becomes very winding, crossing several mountain ranges, but a wide

and well graded surface permits good progress. Again crossing the Sacramento river at mileage 27.7, the route follows a picturesque canyon on rolling, winding road all the way to Dunsmuir.

***Dunsmuir, Cal.** (pop. 3,300, alt. 2,280 ft.), is a village of Siskiyou county 60 miles southeast of Yreka. It is chiefly a railroad town, but good hunting and fishing are to be had near by. In front of the station are two aquariums in which may be seen the varieties of trout to be found in the region. Three miles south of Dunsmuir, on Little Cast Creek, is a

chromite mine, which up to 1913 was the only mine in the United States producing chromic iron ore. For those who are interested in geology there is a good example of columnar jointing to be seen in the lava on the west side of the railroad track near Dunsmuir in the direction of Shasta Springs. There are numerous summer resorts in the vicinity of Dunsmuir.

Shasta Springs, Cal. (alt. 2,510 ft.), is one of California's many ideal summer resorts, where Nature's beauty is unsurpassed and the home of the world famous Shasta water. It is located at the headwaters of the Sacramento river. Trout fishing, mountain climbing, horseback riding, swimming, tennis, motoring and dancing are only a few of the recreations enjoyed here.

Sisson, Cal. (pop. 800, alt. 3,555 ft.), is a small town, 78 miles north of Redding. It is the point of departure for the climb of Mount Shasta. This may be made by the Cloud River railroad, or by horseback or on foot. The latter is the more interesting. The start is made at noon and the timber line is reached before dark. The night is passed in camp and in the morning the ascent is continued on foot, the summit, 14,440 feet above the level of the sea, being reached in 7 to 8 hours. On the summit among the loose stones are hot springs. They have a temperature of 100° F. and their waters are strong with sulphur and other minerals. Many of them eject hot steam. From one a jet of hot steam two feet in diameter rushes out with great force and a loud noise. The ground is hot to the foot. Shasta has several craters, the largest being on the western peak, which is several hundred feet lower than the one where the springs are. This latter crater is the center of a circle of snow a mile in diameter and 2,500 feet deep, which is stained with the yellow of the sulphur of the volcano. From time to time cavernous rumblings may be heard, reminding the tourist that he is standing on a volcano. The descent may be made to Nowona or Strawberry valley by slid-

ing down the chutes, using the alpenstock as a rudder. There are but three months in the year, July, August and September, when it is considered safe to make the ascent.

The name Shasta is derived from the Russian "Tchastal," meaning the white or the pure, the name given to the mountain by the early Russian explorers and settlers at Bodega and later used by the trappers. The Indians call it "Ieka," the white. There is a pretty Indian legend that the mountain is the abode of the Great Spirit, and that the whole country round about was once inhabited by grizzlies who captured the daughter of the Great Spirit and married her to one of their number, and that these wedded two were the progenitors of the entire Indian race. The Great Spirit, the story runs, then built little Mount Shasta for a wigwam for the captured girl that she might dwell near the lodge of her father. There are but two higher peaks on the western coast than Shasta, Mount Whitney, 15,000, and Mount Williamson, 14,500 feet. But these peaks fall far short of Shasta in grandeur and magnificence, for their bases rest on the top of other mountains, above which they rise only a few thousand feet, while the base of Shasta is only 3,570 feet above the sea. By its isolation, its height and its purity, it is the most conspicuous mountain in America.

At Sisson there is a great fish hatchery, comprising 53 ponds, from which daily distribution is made to the streams of the state. Near the hatchery may be seen the ruins of the old Sisson tavern, which in its day sheltered most of the governors of California and other men prominent in the state's history.

POINTS OF INTEREST, ASHLAND, ORE.

Ashland (pop. 5,050, alt. 1,868 ft.) occupies a plateau overlooking the valley of the Rogue river and surrounded by the curving ranges of the snow capped Siskiyou mountains. The dominating peak is Mt. Ashland, or Siskiyou peak, situated on the state boundary at a height of 7,662 ft. An auto road leads to view points high up on its flanks. Its twin peak is Mt. Wagner, 7,000 feet high. Another lofty summit is Sterling peak, 7,377 ft. high. To the northeast rises Grizzley peak, a pile of lava 6,000 ft. high.

Ashland has numerous mineral springs owned by the municipality, whose waters show a higher mineral analysis than those of Saratoga, N. Y. Reaching the main business portion of the city, there is found a little plaza with a drinking fountain surmounted with a statue of the Pioneer, a gift to the city by one of its residents. To the left of the Plaza, about 100 yards, is Lithia park, especially maintained for tourists. The "Original" automobile camp ground is maintained here and auto parties are welcome to camp with no other cost than 25c a day for the gas used for cooking purposes. The camp is well lighted with electric lights, has modern sanitation, private table and benches for each camping party and individual gas plates and

lockers for food. A visit to this park would not be complete should the tourists fail to drive up Ashland canyon, crossing and re-crossing a swift running mountain stream to a point where a sign post says to turn off. This is the upper end of the scenic drive, and continuing on this driveway will give the tourists a splendid view of Rogue river valley and the city of Ashland.

Like most of the mountain walled towns of Oregon, Ashland's summer days are excessively hot, but the nights are always cool. It is a comfortable town and a good touring base for the Marble caves, Crater lake and the Klamath basin. In the vicinity a fossil flora has been found that is totally different from any living flora in Oregon. According to the U. S. geological reports, a flora of the same type, and hence presumably of the same age, is found in the rocks of northern California about the big bend of the Pitt river and on Little Cow creek east of Redding. These floras are evidently closely related to the plants that lived during the period when certain of the gold bearing gravels of the Sierra Nevadas in California were being deposited. The geologic age of these gravels has been determined in part by the aid of these fossil plants.

Straight ahead on Riverside Ave. is Route 261 to Grants Pass.

Route 174—Dunsmuir, Cal., to Klamath Falls, Ore.— 111.8 m.

Reverse Route 247.

Via Sisson, Weed, Grenada, Montague, Klamath Hot Springs and Keno. Fair dirt to Sisson, except after a long dry spell and heavy travel, when this stretch is badly cut up and dusty; good gravel thence to Weed; fair dirt to Ager; good gravelly mountain road to Klamath Hot Springs; poor road to Keno; good dirt to Klamath Falls. Summary: 30 miles good gravel; 58 miles fair to good dirt; 24 miles poor dirt.

Traversing a fairly level country at an altitude varying between three and four thousand feet to Ager, the route follows a winding narrow mountain road, reaches Klamath river and follows same thru a pretty canyon for many miles. After a long and steep ascent it reaches the summit of the Siskiyou mountains, gradually leaving the timber zone and emerges onto the vast plateaus surrounding Klamath lake. Klamath Hot Springs is the only stopping place between Montague and Klamath Falls.

*Yreka, Cal. (pop. 1,150, alt. 2,635 ft.), is situated on the Yreka river 85 miles east of Crescent City. The name is a corruption of the Indian word "Ieka," meaning "whiteness," which was the Indian name for the adjacent snow-crowned Shasta. The settlement of the town was occasioned by the Trinity Gold mine excitement of 1849. Governor Joseph Lane of Oregon was probably the first to carry on prospecting operations near the Yreka. He was followed by a party under Rufus Johnson

in 1850, and so large was the immigration that in 1852 the section was formed into a separate county under the name of Sis-ki-you with Yreka as county seat. The town was first known as Thompson's Dry Diggings on account of its very rich flat deposits; then, with a slight change in location, it became Shasta Butte; but this name causing confusion with Lower Shasta, the name Yreka was adopted at the time the town was made the county seat.

*Susanville, Cal. (pop. 700, alt. 4,195 ft.), is situated in the foothills at the entrance to Susan river canyon. The town is well built with brick and stone structures and is the center of much activity. Good trout fishing can be had in the Susan river, which winds

for twenty miles through its timbered and rugged canyon. Twelve miles to the north lies Eagle lake, a beautiful body of water, twenty-five miles long by five miles wide, alive with trout and black bass. This lake is reached by a good auto road.

- 51.0 1.0 4-corners; turn left.

*Anderson, Cal. (pop. 1,500, alt. 433 ft.), is just 7 miles southeast of Redding, which is the county seat of Shasta county. It is situated in the center of a large irrigation district, a fine fruit growing section. Fifty miles directly east of Anderson is Lassen Peak, the only active volcano in the U. S.

*Corning, Cal. (pop. 1,300, alt. 277 ft.), on the

Pacific highway, is the trading center of the Maywood colony, a subdivision of 39,000 acres, 12,000 of which are in orchards, with olives, almonds and oranges predominating. Corning is conspicuous for its mission architecture. A free camping ground with lights, stoves, tables, benches, water and dressing rooms is maintained for the use of autoists.

*Orland, Cal. (pop. 1,500, alt. 254 ft.), is a
 trade center of Glenn county, 166 miles north
 of San Francisco. Here the United States
 reclamation service has constructed a large
 dam in the Coast range from which the water
 conveyed to 14,000 acres of land near the
 town. This is the only instance in California

of federal reclamation.

*Williams, Cal. (pop. 600, alt. 84 ft.), in Co-
 lusa county, is the starting point for the
 Lake county resorts. It is a flourishing rail-
 road town with good schools and hotels and
 large warehouse capacity. A motor bus runs
 to Bartlett Springs.

*Quincy, Cal. (pop. 1,000, alt. 3,400 ft.), is 85 miles north of Marysville. It is a delightful little town known to sportsmen for the grouse, deer and bear hunting of its neighboring forests and for its winter sports. It is the mecca of the botanist, for it is the habitat of the "Darlingtonia," or pitcher plants, a special and uncommon variety of which bears the state's name.

Quincy was laid out by H. J. Bradley of Quincy, Ill., and named by him in honor of his previous residence. As an inducement to the people to locate the county seat there, in 1854 he built and tendered to the county free of charge a rude shack building in the rear of this hotel. This building was used as a court room, and the other county offices found house room where they could. At the next election Quincy was formally made the county seat.

LASSEN VOLCANIC NATIONAL PARK.

Congress created the Lassen Volcanic National Park in August, 1916. A month later the volcano was again in active eruption. It is the only active volcano in continental United States. It is situated in northern California; it is one of the celebrated series of volcanic peaks, including Mt. Rainier, Mt. Baker, Mt. Hood, Mt. Shasta, and what was once Mt. Mazama, but is now Crater Lake in the Cascade Range.

The region is one of extraordinary interest. Lassen Peak, the central feature of a group of volcanic peaks, is 10,437 feet in altitude. Cinder Cone, which showed activity a few years ago, has an altitude of 6,907 feet; North Peak, Southwest Peak and Prospect Peak are prominent elevations in the National Park.

Other features of interest are the Devil's Half Acre, including hot springs and gey-

sers, Bumpuss and Morgan Hot Springs, lakes of volcanic glass and ice caves. There are seven lakes, numerous trout streams and many majestic canyons. There are also forests of yellow and white pine, fir and lodge pole.

"On the whole," writes Professor Douglas W. Johnson of Columbia University, "it is difficult to imagine a region where the more striking phenomena of nature are developed on a grander scale."

The near vicinity of Lassen Peak is readily reached by road; from there trails will lead the visitor on horseback or on foot throughout the National Park enclosure. The peaks may be climbed and the interesting volcanic processes in action may be studied. This National Park will well repay a visit, but the visitor must be prepared to rough it, as Congress has not as yet appropriated funds to provide good roads and trails.

Route 187—Susanville, Cal., to Lakeview, Ore.—149.9 m.

Reverse Route 255.

Via Termo, Madeline, Likely and Alturas. Mostly fair-to-good natural prairie road to Alturas; good gravel balance of way to Lakeview. Some rough, rocky stretches are encountered within the first 15 miles after leaving Susanville. Summary: 60 miles good gravel; 85 miles fair-to-good natural prairie road; about 5 miles of poor, rocky surface thru forest near Susanville.

This route goes thru great valleys and over low mountain ranges, where many wonderful views of splendid scenery are encountered. The country is mostly open with wooded hills always in sight. Crossing the state line into Oregon at New Pine creek, the route follows along shore of beautiful Goose lake to Lakeview.

COMM. ORGAN—Reno Commercial Club, 2nd & Virginia Sts.

Route 189—Susanville to Sierraville, Cal.—96.6 m.

Reverse Route 277.

Via Lassen, Buntingville, Doyle and Loyalton. Good dirt and natural prairie road all the way.

The country traversed is rolling and especially pretty along the hills bordering Honey lake. From Constantia to Chilcoot rolling sage brush country predominates, with timber covered mountains in the distance. The last 25 miles are across Sierra valley with its big meadows and large herds of cattle.
 Route 190 offers an option via Quincy.

 yond school 99.3. Avoid right-hand diagonal road 110.5.

*Quincy, Cal. (pop. 1,000, alt. 3,400 ft.), is 85 miles north of Marysville. It is a delightful little town known to sportsmen for the grouse, deer and bear hunting of its neighboring forests and for its winter sports. It is the mecca of the botanist, for it is the habitat of the "Darlingtonia," or pitcher plants, a special and uncommon variety of which bears the state's name.

Quincy was laid out by H. J. Bradley of Quincy, Ill., and named by him in honor of his previous residence. As an inducement to the people to locate the county seat there, in 1854 he built and tendered to the county free of charge a rude shack building in the rear of this hotel. This building was used as a court room, and the other county offices found house room where they could. At the next election Quincy was formally made the county seat.

Note (a) Route 190—Sierraville, Cal., to Mileage—4.8 m.

Reverse Note (a) on Route 278.

Via Campbell Hot Springs. The following note gives an option on Route 190 from Sierraville.

- 0.0 0.0 SIERRAVILLE, 4-corners. Go east (straight ahead if coming from Susanville). Avoid left-hand diagonal road 0.4.
 1.0 1.0 Right-hand road; turn right.
 1.8 0.8 Campbell Hot Springs. Keep ahead.
 2.1 0.3 Fork; bear right up winding grade.
 4.8 2.7 3-corners; bear left.
 Route 190 comes in from right at this point at mileage 121.4.

Route 191—Quincy, Cal., to Reno, Nev.—88.5 m.

Reverse Route 279.

Via Mohawk, Beckwith and Vinton. Fair to good gravelly dirt road with some sandy stretches between Beckwith and Vinton.

Following Feather river canyon over rolling grades thru a scenic, timbered mountain country as far as Clio, the route ascends a long, winding grade thru Beckwith pass and follows around northern edge Sierra valley to Chilcoot. Shortly beyond the road enters a hilly, open sage brush country and crosses the state line into Nevada. This is a section of the Pike's Peak Ocean-to-Ocean highway.

During the summer months a very good option from Beckwith may be had by using Route 193 via Loyalton and Verdi.

- 0.0 0.0 QUINCY, Main & Court Sts., court house on far right. Go northeast on Main St.

*Lake Independence, Cal., nestles among the pine-clad mountains of Nevada county, California, 16 miles from Truckee, and is reached by a drive over a picturesque mountain road all the way thru magnificent forests of pine, fir and tamarack. It is located inside the Tahoe national forest reserve. Aside from the beauties of nature, the greatest attraction at Independence lake is the trout fishing.

*Truckee, Cal. (pop. 1,500, alt. 5,820 ft.), is picturesquely situated on a bend of the Truckee river, where it flows in from the southwest out of Lake Tahoe. Truckee is the site of a large summer recreation camp. The narrow-gauge line of the Lake Tahoe Railway

& Transportation Co. runs south from this city, winding thru the narrow canyon of the Truckee river fifteen miles to Lake Tahoe. Lake Independence, 18 miles north, Donner lake, 3 miles west, and the Rocking Stone Tower are other interesting points. At Hobart, 8 miles north, are immense lumber mills. In 1846-47 a band of pioneers, known as the Donner party, perished near Truckee on account of the heavy snow (20 ft. on level). A \$3,500 monument now marks the spot on which they died, erected by the Native Sons of the Golden West. A little beyond the monument may be seen a plain white wooden cross designating their burial place.

- 91.7 27.9 MARYSVILLE, 2nd & D Sts.

Route 193—Beckwith, Cal., to Reno, Nev.—53.5 m.

Reverse Route 273.

Via Loyalton and Verdi. Good dirt to Loyalton, excepting during wet weather, when roads across Sierra valley will be found difficult to negotiate; fairly good mountain road to Verdi; balance good gravel. Summary: 17 miles graded dirt; 26 miles gravelly mountain road; 10 miles good gravel.

Traversing the eastern part of the Sierra valley to Loyalton, our route soon enters a timber covered, mountainous region where brooks and pretty mountain meadows offer to the tourist excellent opportunities for fishing and camping. From Verdi to Reno the road follows along the Truckee River thru irrigated farming country.

Route 191 offers a shorter option between Beckwith and Reno, but leads mostly thru an uninteresting, hilly sagebrush country. It also crosses the mountains on considerable lower altitude and consequently is open to travel the year around, while the route here given is open only during the summer months.

*Oroville, Cal. (pop. 5,000, alt. 205 ft.), is situated on the Feather river 3 miles from Table Mountain and 28 miles north of Marysville. It is in a productive fruit and mining region in the Bret Harte country and is known as the "Gem of the Foothills." Here mining is carried on by means of the dredger which is producing a scarification of the land surface similar to that produced by the forbidden hydraulic mining of past days. Dredger mining is but a new application of the hydraulic methods under another form. The dredger cuts into the earth with steel buckets which, running on an endless belt, carry the "pay dirt" to the hopper, where the stones are sifted out. The earth is then washed in a sluice, where the gold is caught in the riffles. The escape of "slickens," whose damming up of the river beds caused hydraulic mining to be forbidden by law, is prevented by the damming up of the dredger, but dredger mining so mutilates the surface of the country that the

question of its prohibition by law has been raised. The dredger overturns the earth like extraordinarily deep ploughing, leaving great naked boulders on the top, so that nothing will grow. The experiments, however, of planting eucalyptus among the boulders has been tried with success. Some contend that instead of prohibiting dredger mining that dredgers be compelled to redeposit the soil so as to cover the rocks and prevent devastation.

Oroville is at the beginning of the canyon of the Feather river, the magnificent arch of the chasm extending to Portola and forming one of the wonders of the state. It has attracted considerable attention from numerous automobilists on account of being on the new scenic route from San Francisco to Lake Tahoe, as laid out by the Feather river highway association, whose object is to induce the state highway commission to connect the county seats of Butte, Yuba, Plumas and Lassen counties by a lateral down the Feather river canyon.

Route 194—Red Bluff to Sacramento, Cal.—143.0 m.

Reverse Route 152.

Via Chico, Marysville and Roseville. Concrete to Proberta, followed by 21 miles gravel and dirt; then concrete to Marysville; macadam and concrete to Sacramento. Summary: 122 miles concrete and macadam (approximately 100 miles concrete and 22 miles macadam); 21 miles fair gravel and dirt.

The route traverses a rich agricultural district of the Sacramento valley chiefly devoted to grain, dairying and fruit growing. Proberta, 7 1/2 miles south of Red Bluff, the dividing point for the two main routes to San Francisco. The left-hand road the route described below, and the road straight ahead is Route 183, which follows the west side of the Sacramento river, passing thru Corning, Orland and Williams.

- 55.4 6.8 Fork; bear right.
Left fork is new highway under construction. If same is completed, keep left, rejoining this route at mileage 63.2.
- 56.2 0.8 Left-hand road; turn left away from poles. Cross RR 56.5.
- 60.2 4.0 End of road; turn right. Thru 4-corners 63.2-68.7.
Left at 63.2 leads to Oroville.
Right at 68.7 leads to Biggs, $\frac{1}{4}$ mile.
- 72.2 12.0 Gridley, 4-corners at outskirts (business district $\frac{1}{2}$ mile to right). Straight thru along RR.
- 73.4 1.2 Fork; bear left with pavement. Cross RR 77.8.
- 78.2 4.8 End of road; turn right with pavement. Thru outskirts of Live Oak 78.7. Pass Sunset Sta. on right 80.3.
- 82.6 4.4 Caution, end of road; turn right across dangerous RR and immediately left along same.
- 88.1 5.5 3-corners; bear left with pavement.
- 88.3 0.2 Irregular 4-corners; turn right with pavement.
- 88.7 0.4 4-corners, school on far right; meeting trolley turn left. Cross RR at sta. 88.8.
- 89.1 0.4 Yuba City,* 4-corners, bank on far right. Turn left thru underpass, bearing right across long iron bridge over Feather river immediately beyond. Now on 5th St.
- 90.1 1.0 D St., brick church on far right; turn right with trolley.

*Chico, Cal. (pop. 12,000, alt. 189 ft.), is a beautiful little city located in the heart of the famous Sacramento valley. This city has a free camping site for the auto tourist—pure water, clean grounds, etc. Among its many other attractions are the government's world famous experimental gardens and the famous Bidwell park of world-wide historical interest. The famous Sir Joseph Hooker oak, declared by Sir Joseph Hooker, an eminent botanist of England, to be the largest oak in the world, is within the confines of this park. The tree covers an acre of ground, and 10,000 men can stand under it easily at one time. A short distance away is the famous Mount Lassen, which can be easily seen from the highway when passing thru.

Several large gold dredgers are in operation along Butte creek at Chico. The gold output of this county exceeds two millions annually. Richardson Springs, 10 miles from town, are famed for the great medicinal qualities of their waters.

Yuba City, Cal. (pop. 1,175), is situated on the west bank of the Feather river opposite the mouth of the Yuba river, about 50 miles north of Sacramento. It has fruit-canning industries. Just across the river is Marysville, and the two towns really form one city. In Yuba City lived George Ohleyer, a newspaper man, who brought about the law forbidding hydraulic mining. The court house and hall of records is a handsome building standing on the main street and surrounded by large well-kept grounds.

From every issue of MOTOR LIFE you can learn something new about economical motor car operation. See Motor Life colored insert.

- 90.3 0.2 Marysville,* D & 2nd Sts.
HOTELS—Western Hotel, 2nd & D Sts.
Straight thru on D St. Cross RR and long concrete bridge over Yuba river 90.4. Pass Ostrom Sta. on left 96.7.
- 102.8 12.5 3-corners; bear left with pavement.
- 103.1 0.3 Wheatland, 4-corners.
GARAGES—State Highway Garage, corner Main St. & State St.
Turn left and take right-hand road just before RR.
- 106.4 3.3 Sheridan. Turn left across RR and right at end of road immediately beyond. Cross switch 113.9, avoiding right-hand road at large tile factory immediately beyond.
- 114.3 7.9 Lincoln,* sta. on right. Straight thru along RR. Caution, jog right and left under RR 122.9.
- 124.5 10.2 Roseville,* irregular 4-corners at stores. Bear left.
- 124.6 0.1 4-corners, one block beyond RR; turn right.
- 125.3 0.7 Left-hand diagonal road; bear left with pavement.
- 128.7 3.4 Irregular 4-corners; turn right. Avoid left-hand road 137.5. Bear right across RR 138.5.
- 139.2 10.5 Left-hand diagonal road; bear left. Cross trolley 139.9 and RRs 140.6-140.8. Avoid right-hand road 141.0, keeping ahead across concrete bridge over American river. Bear left under RR 141.9—now on 12th St.
Sacramento City Map and Points of Interest, page 196.

Mileage Points

Tourists not wishing to go to Oroville should use Route 194 in preference to the one here given. The former is somewhat shorter and with better road conditions.

- 0.0 0.0 CHICO, Main & 4th Sts., park on right. Go south with trolley on Main St. Avoid left-hand diagonal road 0.3. Cross trolley 0.7.
- 1.6 1.6 Fork; bear right across small wooden bridge. Cross RR 2.0. Pass Camino Sta. on left 4.0.
- 5.4 3.8 Left-hand diagonal road, just beyond RR; bear left along same.

*Marysville, Cal. (pop. 7,000, alt. 67 ft.), named after Mary Coviland, the first white woman and a descendant of the ill-fated Donner party, is one of the oldest towns of mining days, founded because it was at the head of navigation on the Feather river, one of the richest gold-bearing streams up which boats could come from San Francisco by way of the Sacramento. Steamers still ply regularly to Sacramento. Yuba City is just across the river and the two really form one city. Seven miles of levees constructed in 1875, to protect the two cities from floods, have never had a break. Both cities are towns of '49, but today the mines have sunk to secondary importance, agriculture and horticulture being the leading industries. In mining days Marysville ranked next to San Francisco and Sacramento in importance and in the volume of business transacted. In old mining days, too, Marysville

was the jollification gathering place for the miners from every quarter, and it was also the storm center of the trouble between the farmers of the valley and the hydraulic miners. The old town is still so much in evidence that the general effect produced is one of age.

*Lincoln, Cal. (pop. 1,425, alt. 159 ft.), is 28 miles northeast of Sacramento on the main highway. Here are located the pottery and terra cotta works of Gladding, McBean & Co. of San Francisco. Near the town is a valuable deposit of glass sand and one of lignite coal. The town has fruit packing industries and is a grain and green fruit shipping point.

*Roseville, Cal. (pop. 4,000, alt. 200 ft.), in Placer county, is a fruit packing center 18 miles northeast of Sacramento. It is the southern terminus of the line from Shasta through Tehama and Marysville to Sacramento. The town has brick kilns and foundries and is a grain shipping point.

- 6.8 1.4 Durham, irregular 4-corners, flour mill on left. Turn left.
Straight ahead at 6.8 is Route 194 to Sacramento.

HOTELS—Western Hotel, 2nd & D Sts.

*Oroville, Cal. (pop. 5,000, alt. 205 ft.), is situated on the Feather river 3 miles from Table Mountain and 28 miles north of Marysville. It is in a productive fruit and mining region in the Bret Harte country and is known as the "Gem of the Foothills." Here mining is carried on by means of the dredger which is producing a scarification of the land surface similar to that produced by the forbidden hydraulic mining of past days. Dredger mining is but a new application of the hydraulic methods under another form. The dredger cuts into the earth with steel buckets which, running on an endless belt, carry the "pay dirt" to the hopper, where the stones are sifted out. The earth is then washed in a sluice, where the gold is caught in the riffles. The escape of "slickens," whose damming up of the river beds caused hydraulic mining to be forbidden by law, is prevented by the damming up of the dredger, but dredger mining so mutilates the surface of the country that the question of its prohibition by law has been raised. The dredger overturns the earth like extraordinarily deep ploughing, leaving great naked boulders on the top, so that nothing will grow. The experiment, however, of planting eucalyptus among the boulders has been tried with success. Some contend that instead of prohibiting dredger mining that dredgers be compelled to redeposit the soil so as to cover the rocks and prevent devastation.

Oroville is at the beginning of the canyon of the Feather river, the magnificent arch of the chasm extending to Portola and forming

one of the wonders of the state. It has attracted considerable attention from numerous automobilists on account of being on the new scenic route from San Francisco to Lake Tahoe, as laid out by the Feather river highway association, whose object is to induce the state highway commission to connect the county seats of Butte, Yuba, Plumas and Lassen counties by a lateral down the Feather river canyon.

*Marysville, Cal. (pop. 7,000, alt. 67 ft.), named after Mary Coviland, the first white woman and a descendant of the ill-fated Donner party, is one of the oldest towns of mining days, founded because it was at the head of navigation on the Feather river, one of the richest gold-bearing streams up which boats could come from San Francisco by way of the Sacramento. Steamers still ply regularly to Sacramento. Yuba City is just across the river and the two really form one city. Seven miles of levees constructed in 1875, to protect the two cities from floods, have never had a break. Both cities are towns of '49, but today the mines have sunk to secondary importance, agriculture and horticulture being the leading industries. In mining days Marysville ranked next to San Francisco and Sacramento in importance and in the volume of business transacted. In old mining days, too, Marysville was the jollification gathering place for the miners from every quarter, and it was also the storm center of the trouble between the farmers of the valley and the hydraulic miners. The old town is still so much in evidence that the general effect produced is one of age.

TOURISTS! Practically all towns of any size maintain a Commercial or Business Men's Club which will gladly and graciously dispense local information upon request.

- 19.9 2.4 Meridian, 4-corners, store on left. Turn right.

*Colusa, Cal. (pop. 1,600, alt. 82 ft.), is located on the west bank of the Sacramento river, 65 miles northeast of Sacramento. It is at the head of deep water navigation and has a large shipping trade. The town has fine school buildings and is the seat of St. Aloysius college, a Catholic institution. The court house and hall of records are handsome buildings standing in spacious and well-kept grounds.

Colusa is situated on alluvial deposits formed by the streams flowing down from Marysville buttes. In the vicinity are immense fields of rice, barley, wheat, wild oats and burr clover. Just east of the town are the Marysville buttes, a cluster of hills 10 miles in diameter and culminating in South butte, 2,132 feet above sea level. The North butte has an elevation of 1,863 feet. These hills have an interesting geological history. The Bulletin on the U. S. geological survey says of them:

The central area, about 4 miles in diameter, is composed of andesite, a lava that was pushed up from the interior of the earth in a molten but stiff condition. Around the andesite is an irregular belt of sandstone and shales of the Tertiary age bent upward by the force of intrusion of the andesite so that they dip away from the center at angles of 18-90 degrees. An outer belt about 2 miles

wide, of tuffaceous breccias, consisting of angular fragments of lava of various sizes, with some pebbles of other rocks, surrounds the sandstone and shales. The material of these breccia beds once flowed from the crater of the volcano as thick stony mud. The hills have an outer slope of 250 to the mile and a steeper in-facing scarp or bluff. A projection of the outer slope to the center would restore the outline of the old volcano, making it about 5,000 feet high, or over twice the present height.

*Williams, Cal. (pop. 600, alt. 84 ft.), in Colusa county, is the starting point for the Lake county resorts. It is a flourishing railroad town with good schools and hotels and large warehouse capacity. A motor bus runs to Bartlett Springs.

*Yuba City, Cal. (pop. 1,175), is situated on the west bank of the Feather river opposite the mouth of the Yuba river, about 50 miles north of Sacramento. It has fruit-canning industries. Just across the river is Marysville, and the two towns really form one city. In Yuba City lived George Ohleyer, a newspaper man, who brought about the law forbidding hydraulic mining. The court house and hall of records is a handsome building standing on the main street and surrounded by large well-kept grounds.

- 20.1 0.2 Go under trestle and immediately turn left along trolley, going over iron bridge over Sacramento river.
- 20.4 0.3 End of road; jog right and immediately left.
- 21.4 1.0 Fork, sta. on left; bear right, keeping along electric line. Cross same 22.4.
- 27.3 5.9 End of road; turn right across small bridge over irrigation ditch.
- 27.9 0.6 Left-hand road, immediately beyond trolley; turn left onto Market St.

- 38.0 9.3 WILLIAMS, bank on left.

GARAGES—The Quigley Garage, on H. & S. highway at S. end of town. Straight ahead is Route 204 to Lakeport. Left is Route 200 to San Francisco. Right is Route 84 to Redding.

Route 200—Williams to San Francisco, Cal.—139.9 m.

Reverse Route 80.

Via Arbuckle, Woodland, Dixon, Benicia, Martinez, Walnut Creek and Oakland. Concrete to Dunnigan, dirt to Woodland, concrete highway to Benicia, gravel to Walnut Creek, oiled macadam and concrete paving to Oakland.

Construction work on the new highway paralleling the RR between Dunnigan and Woodland is in progress and it is possible that the stretch between Dunnigan and Blacks will be completed for the 1920 travel, reducing the total mileage between the two points considerably.

Thru level farming country, chiefly devoted to grain and fruit growing, to Vacaville. From here on to Benicia the country is rolling and very attractive, with fruit raising one of the leading industries. The channel to Martinez is crossed by ferry and a pleasant 1½-hour drive brings the tourist over pretty, hilly country to Oakland. The trip by ferry across San Francisco Bay is made in 35 minutes.

- 139.9 75.1 SAN FRANCISCO, Market St. & Van Ness Ave.

Route 201—Blacks to San Francisco, Cal.—103.2 m.

Reverse Route 82.

Via Madison, Winters, Benicia, Martinez, San Pablo and Oakland. First 38.7 miles fair to good gravel and dirt; balance concrete highway. Summary: 64½ miles concrete; 38.7 miles fair to good gravel and dirt. Some stretches of poor dirt are encountered between Blacks and Madison and some rough gravel thru Pleasant valley.

Leaving Blacks, the route follows along the western edge of Sacramento valley thru vast fields of grain and rice to Winters. Shortly beyond the route enters Pleasant valley with its fine farms and prosperous orchard districts. Joining the concrete highway again at a point 3 miles south of Vacaville a pretty, rolling country is traversed to Benicia. Crossing the bay at this point by ferry the route reaches Martinez and follows along the hilly shore of San Pablo Bay into Oakland.

*Woodland, Cal. (pop. 1,000, alt. 58 ft.), is 22 miles west of Sacramento, and is one of the handsomest and most progressive towns in the state. There are several collegiate institutions here and thriving industries. The nucleus of the town was James McClurg & Sons' blacksmith shop in 1855. A store was established the same year and in 1858 the town acquired a post office and was known as Yolo City. In 1862 it was made the county seat and its name was changed to Woodland. The town has grown rapidly from the first and is the home of many wealthy men. It is said to have a larger number of millionaires in proportion to the population than any other town in the state.

*Dixon, Cal. (pop. 800, alt. 64 ft.), in Solano county, 22 miles southwest of Sacramento, is an agricultural town. It was founded in 1868 and is the grain center of the county, shipping many thousand tons annually. It also has one of the largest certified dairies west of the Rocky mountains, milking about 400 cows.

*Winters, Cal. (pop. 1,500), in Yolo county, is 12½ miles north of Vacaville. It has fruit industries, and in importance is the second town in the county. It was laid out in 1875 by the Vaca Valley & Clear Lake Railroad and is on the line between Yolo and Solano counties. It is a good business point with a large shipping trade.

Oakland City Map, page 160K, Points of Interest, page 160L.

***Suisun, Cal.** (pop. 1,000, alt. 8 ft.), is built on an island in a navigable tule slough, 9 miles north of Suisun bay and 50 miles northeast of San Francisco. Just 5 miles north of the town stood the little Black schoolhouse where Edwin Markham, poet and seer, and author of "The Man with the Hoe," went to school. Incidents of his school days here are described by one of his teachers, Mr. S. O. Woods, in "Lights and Shadows of the Pacific Coast."

Suisun was settled by Captain Joseph Wing in 1858. He ran boats on the slough and gave the town its first impetus as a trading point. A few miles from Suisun is the great orchard of A. T. Hatch. It contains 800 acres and is one of the largest in the state. In the Suisun hills is a marble quarry where very beautiful onyx is produced.

***Benicia, Cal.** (pop. 2,275, alt. 55 ft.), situated on the swift-running Strait of Carquinez, which connects Suisun and San Pablo bays, is 24 miles in a direct line north of San Francisco. It has a good harbor for vessels not drawing over 23 feet of water. There are extensive wharves and ship yards, and a United States arsenal and barracks. The town was founded in 1847 and named in honor of the wife of the Mexican general, Vallejo. For two years it was the rival of San Francisco. In 1853 it was made the "permanent seat of

government," but in March, 1854, the capital was transferred to Sacramento.

Over the Strait of Carquinez pass the high voltage wires of the Pacific Gas & Electric Company, which bring all the electric power for the electric light plants and the manufactories in the city of San Francisco from the hydro-electric power plants in the High Sierras, over 200 miles distant. Jack London's "Tales of a Fish Patrol" and "John Barleycorn" tell of adventures which happened in these straits and in San Pablo bay. At Benicia two great transfer boats carry the longest trains across the straits on the way to and from the bay cities.

***Martinez, Cal.** (pop. 2,175, alt. 7 ft.), is a quiet, restful place, delightfully located in a little valley with its back to the many curved hills and its face to the water and looking toward Benicia. The locality is full of charming nooks. Many of the first families of Martinez came from New England. The town was named in honor of Ignacio Martinez, who was born in the City of Mexico in 1774, became a military man and as such came to California in 1800. In 1837 he was made alcade of San Francisco. He died some time before 1852. Just west of the town are situated the Nevada Warehouse and Dock Company's warehouses, the largest on the Pacific coast. Here deep water ships take on cereals for Europe.

- 100.2 4.7 5-corners; bear right with cross-trolley onto Broadway.
- 100.3 0.1 Oakland, Broadway & 12th St. Keep ahead with trolley on Broadway.
Leaving ferry, keep ahead and at end of street, turn right onto Embarcadero St., one and one-half blocks.
- 101.0 0.7 Southern Pacific Ferry across San Francisco Bay, just beyond RR at sta.
Charges: Automobile, 90c each way; passenger, 6c.

| 76.4 | 0.4 | LAKEPORT, court house on right. | |

GARAGES—Crawford's Garage, on main highway at south end of town.

Route 204—Williams to Lakeport, Cal.—71.2 m.

Reverse Route 126.

Via Wilbur Hot Springs, Lower Lake and Kelseyville. Dirt road entire distance. Most of this route is over narrow, winding mountain road, and while the surface conditions are fair, careful driving is necessary due to the narrow roadway and the great number of sharp turns. There are many washes along the route which are liable to be almost impassable after a storm.

The road is a continuous succession of up and down grades, and some of the climbs are long and steep. The first ten miles out of Williams are thru a level farming country as well as the last 7 miles between Kelseyville and Lake-

 - 63.4 0.1 Kelseyville,* at stores. Keep ahead.

*Wilbur Springs, Cal. (alt. 1,250 ft.), is in the Coast range mountains, 25 miles southwest of Williams. There are numerous natural springs here, both hot and cold, possessing unusual strength and curative properties. These are accessible the year round.

Wilbur canyon is noted among the geologists throughout the world as being the only known district in which gold and mercury are found side by side. There are numerous mineral springs here also, there being 38 within a distance of half a mile—cold and hot. The canyon also has a geyser which spouts every fifty minutes regularly. This is often referred to as the "man made geyser," as it first started to play when a prospector, while sinking a shaft, put in a "shot" that opened the outlet. Thus it came into being. Beside the gold, silver, mercury, magnesia and copper found in the canyon, there is also a mountain here of almost pure sulphur.

*Kelseyville, or Kelsey, Cal. (pop. 1,000, alt. 1,160 ft.), is situated at the base of Uncle Sam

mountain amidst beautiful scenery. It is 25 miles northeast of Cloverdale and 3 miles south of Clear lake. It is the oldest town in the county and was the home of Stone and Kelsey, who, in 1847, bought the cattle of the Vallejo family and came in and took possession, compelling the Indians to erect for them an adobe house on the banks of Kelsey creek directly opposite the present town of Kelsey. They treated the Indians cruelly, compelling them to work hard and without pay, and often supplying them with insufficient food, and sending them out to dig gold for the whites, most of the Indians perishing on these trips. Eventually the reckoning came. The Indians beset the adobe, put both Stone and Kelsey to death. The following year Lieutenant Lyons was sent against the defenseless Indians, destroying them almost to a man. The town possessed a store and blacksmith shop as early as 1857 and is today a place of considerable importance, having an academy and several industrial establishments.

- 63.7 0.3 End of road, just beyond long iron bridge; turn right.
 64.6 0.9 Left-hand road at sign; turn left.
 66.4 1.8 End of road; turn right.
 66.8 0.4 Finley, left-hand road at P. O. and store. Turn left.

- 0.0 0.0 REDDING, Market & Yuba Sts., large department store on left. Go west on Yuba St. one block.
 0.1 0.1 California St.; turn right.
 0.4 0.3 Irregular 4-corners; turn left.
 0.6 0.2 Right-hand road, just before RR; turn right. Avoid right-hand diagonal road 0.8.
 Right is Route 171 to Dunsmuir.
 Follow along RR, crossing small ford 2.8. Caution for RR crossing at Middle Creek 3.0.
 3.8 3.2 Fork; bear right across bridge over Middle creek and curve left with road along same.
 4.4 0.6 Fork; bear left.
 Right leads to Kennett.
 Caution for some extremely sharp curves and fairly steep grade. Avoid creek 5.6.
 Sharp right at 5.9 leads to Igo and Ono.
 Thru Shasta* 6.4.
 6.7 2.3 End of street; turn right upgrade. Shallow fords from this point to Tower House are numerous. Up easy grades over Shasta Divide 7.7. Water trough on left 8.0. Reach summit of Shasta Divide (elevation 1,525 ft.) 8.6. Descend similar grade, crossing ford at foot of same 9.5.
 11.1 4.4 End of road; turn left across bridge. Thru Whiskeytown

*Shasta, Cal. (pop. 500, alt. 1,040 ft.), is one of the oldest and quaintest towns in the state, having been founded during the gold rush days of '49. Active mining has long since been abandoned here, although some of the oldest inhabitants are still prospectors for new gold leads in the hills. During the early '50s it was the principal town of northern California and during that time many substantial brick buildings were built, many of which still remain. An old residence built by a Mr. Benjamin Shurtleff in 1852 is standing in good state of preservation. Part of the lumber

used in this home was shipped around Cape Horn.

Shasta boasts of having the oldest Masonic charter in the state, issued May 10th, 1848, by the Grand Lodge of Missouri to Peter Lassen and others, to hold meetings at what was then known as Upper California, and was brought across the plains by Peter Lassen. At the first Grand Lodge held in California, San Francisco was awarded Charter No. 1, and the Western Star Lodge of Shasta, although working under an earlier charter, was given Charter No. 2.

(Stella P. O.) 11.2. Easy winding grade along creek follows.

17.7 6.6 Tower House on left. Cross small bridge over creek and at fork, just beyond, stable in center; bear right.

Left is old Toll Gate to Weaverville. Not so good as grade here described, on account of deep sand entering Lewiston. It rejoins this route at mileage 35.1.

Follow good graded road along foothills.

20.2 2.5 Caution for reverse fork; turn sharp left up slight grade.

Straight ahead leads to French Gulch and Trinity Center.

From this point long pull up Tom Green grade—extremely steep in spots. Road fairly wide, but very winding. Water-troughs are pretty well scattered along the route. (Elevation at foot of grade, 1,375 ft.) Reach summit Tom Green grade (elevation 3,850 ft.) 27.1.

A fine view is to be had of Mt. Shasta off to the right from turn in road just beyond summit.

Descent which follows is somewhat easier.

29.2 9.0 End of road; turn sharp right, under little mining tramway.

29.7 0.5 Fork; bear right.

30.4 0.7 Fork; bear sharp right.

Left leads to the village of Deadwood.

Avoid left-hand diagonal roads 30.7-31.2, which lead to Deadwood. Bear left with road across small ford at foot of grade 34.4.

35.1 4.7 Lewiston, right-hand road across bridge. Turn right. (The elevation here is 1,175 ft.)

35.2 0.1 Right-hand road; turn right across bridge over Trinity river.

35.3 0.1 Fork; bear left on rolling roads along Trinity river. Cross culvert bridge over Bush creek 39.0.

42.5 7.2 Fork, water-trough in center; bear left up steep grade. Caution for sharp turns and narrow road. Reach summit (elevation 2,909 ft.) 43.5. Cross bridge 44.8.

44.9 2.4 End of road; turn left. Cross ford 46.1. Cross bridges 47.1-47.4.

48.7 3.8 Fork; bear right across small ford. Pass cemetery on far right 48.9. Turn right with road into lane 49.2, then left at end of lane.

49.4 0.7 WEAVERVILLE,* Main St. & Union Road, P. O. on far left.

Note (a) Route 205—Weaverville to Peanut, Cal.—35.1 m.

Via Douglas City.

Offering much that is picturesque in the way of scenery, with roads fairly good and no serious grades, this trip from Weaverville to Peanut (on the new road from Redding and Red Bluff to Eureka) is one well worth while. We are indebted to Trinity County Development Association of Weaverville and Mr. W. F. Luning of Red Bluff, whom we thank, for the following mileages and data:

0.0 0.0 WEAVERVILLE, at Union Hotel, Eagles' Club Bldg. on left. Take main road as for Lewiston, proceeding east thru lane in front of hotel to sign reading "To Douglas City." At this fork bear right, and follow main travel over rolling country.

7.1 7.1 Douglas City. Keep ahead south, crossing bridge over Trinity river. Cross Redding creek at the foot of Browns mountain 9.6 and ascend grade with some sharp pitches. Cross the summit 10.6 and down similar grade for one mile. Caution for narrow road and numerous sharp turns. Cross Browns creek at the foot of grade, then keep ahead 7½ miles to summit of Hayfork mountain 19.1. Descend rather easy grade 21.6. From here on the road is on water grade and in good shape.

28.1 21.0 Hayfork. Straight thru, winding south with road ¼ mile beyond town and crossing Hayfork creek. Cross Salt creek just before coming into

35.1 7.0 PEANUT.

Weaverville, Cal. (pop. 1,100, alt. 2,172 ft.), the county seat of Trinity county, is 50 miles west of Redding, on the Redding-Weaverville-Eureka cross country state highway. It was

settled by miners in 1850 and is the center of large placer gold mining district, also gold dredging. Four miles west of the town is the La Grange mine, known as the largest operating placer mine in the world.

Route 206—Weaverville to Redding, Cal.—49.4 m.

Reverse Route 205.

Via Lewiston, Tom Green Grade and Tower House. Graded dirt road almost the entire distance. Some very steep grades over mountains and cautious driving is necessary on account of sharp curves. This road is in pretty good shape except during wet weather, when it is apt to be bad.

- | Total Mileage | Distance Between Points | |
|---------------|-------------------------|--|
| 0.0 | 0.0 | WEAVERVILLE, Main St. & Union Road. Go east on Union Road. |
| 0.1 | 0.1 | Right-hand road, Eagle Club bldg. on left; turn right. Turn sharp left with road 0.2. Pass cemetery on far left 0.5. Cross bridge 2.0. |
| 2.1 | 2.0 | Fork; bear right across bridge. Cross ford 3.3. |
| 4.6 | 2.5 | Right-hand road, just beyond bridge; turn right upgrade. Caution for sharp turns. Reach summit (elevation 2,909 ft.) 5.8. Down steep grade. Turn left with road across culvert bridge over Bush creek 10.4 and immediately right with road along same. Curve right 14.1, crossing bridge over Trinity river. |
| 14.3 | 9.7 | Lewiston, end of road, store just ahead. Turn left. Right is option to Redding via Turnpike Road. (On account of some sand, leaving Lewiston, this route is not advised.) It is also connection to Douglas City. From this point (elevation 1,175 ft.) long climb with many sharp curves is encountered to summit of Tom Green grade. Road is good except in wet weather. Avoid right-hand roads to right 18.2-18.7, which lead into Deadwood. |
| 19.0 | 4.7 | Left-hand road; turn sharp left. |
| 19.7 | 0.7 | Fork; bear left, passing under mining tramway. |
| 20.2 | 0.5 | Fork; bear left upgrade. Pass water box on left 21.5. Reach summit of Tom Green grade (elevation 3,850 ft.). A fine view of Mt. Shasta can be had from this point off to left. |
| 22.9 | 2.7 | Fork; bear right. Caution for very steep pitch in sharp curve 24.5. The descent is very steep and as road is very narrow in spots it is best to drive slowly, as passing spots are not frequent. |
| 29.1 | 6.2 | Caution for reverse fork at foot of grade; turn sharp right. Left leads to French Guich and Trinity Center. |
| 31.7 | 2.6 | Tower House. Curve left into road from right, crossing small bridge over creek just beyond. Road from right is Turnpike Road from Lewiston. Fords from this point into Middle Creek are numerous. However, none of them are deep. Follow good road over easy grade. Turn left with road passing thru Whiskeytown (Stella P. O.) 33.2. |
| 38.3 | 6.6 | Fork, just beyond bridge; turn right with travel. Cross ford 39.9, ascending winding grade. Reach summit of Shasta Divide (elevation 1,525 ft.) 40.8. Similar descent follows to foot of grade. Turn left with road 42.7. Thru Shasta* 43.0. |
| 43.5 | 5.2 | Fork; bear left. Right leads to Igo and Ono. |

Caution for very sharp curves on winding road along Middle

Route 207—Red Bluff to Eureka, Cal.—168.5 m.

Reverse Route 113.

Via Beegum and Fortuna. First 32.1 miles gravelly dirt, then dirt and gravel to Strongs; balance gravelly macadam with some concrete. Summary: 32.1 miles gravelly dirt; 101.2 miles dirt and gravel; 30.9 miles gravelly macadam; 4.3 miles concrete.

This is a narrow road, with many sharp turns, making it necessary to use caution at all times. During storms of any duration, the road thru mountains would be practically impassable.

The route is a most scenic one, traversing timbered section of alternate fir, pine and fine redwood timber. To those enjoying fishing and hunting, this route offers many opportunities for good sport.

GARAGES—Eureka Garage, Cor. 5th & C Sts.

SERVICE STA.—Eureka Battery Co., 219 5th St. Bet. C & D Sts.

Route 209—Eureka to Ukiah, Cal.—178.5 m.

Reverse Route 92.

Via Fortuna, Scotia, Garberville, Laytonville and Willits. Good gravel highway with 4 miles of concrete near Loleta extends to within 7 miles of Garberville. Pending the completion of new bridges, a temporary detour over poor road with heavy grades is encountered approaching Garberville. From here to Longvale all but 18 miles is over graded dirt road and construction on this stretch is now in progress. Until the surface is gravelled some poor road may be encountered; good gravel highway and 8 miles of macadam all the way from Longvale to Ukiah.

The scenery along this route beggars description, and the charm and grandeur of the country must be seen to be appreciated. The country is densely wooded with giant redwood forests and in places the luxurious growth of foliage forms a living arch across the highway. The shady shores of Eel river offer ideal camping sites and during hunting season hundreds of sportsmen are attracted by the wild game inhabiting the forests. A movement is now in progress for the purpose of acquiring a large acreage and set it aside for a national park of redwoods.

Left at 175.5 is Route 214 to Lakeport.
- 178.5 22.1 UKIAH,* State & Perkins Sts., court house on right.
GARAGES—Auto Service Garage, State & Stephenson Sts.

*Fortuna, Cal. (pop. 1,100, alt. 70 ft.), formerly called Springville, is an important manufacturing town, lively and progressive. Its main industries are saw, shingle, excelsior and planing mills. Carson woods, a tract of 2,200 acres of virgin redwood forest and a proposed national park, is located near here.

*Willits, Cal. (pop. 3,000, alt. 1,369 ft.), is a lumbering town in Mendocino county. Nearby are forests and the Noyo, one of the streams of northern California most favored by campers, hunters and anglers. Covert is furnished by miles upon miles of towering sequoias, through whose soaring branches may be caught glimpses of the hills and rugged summits of Coast range.

*Ukiah, Cal. (pop. 2,150, alt. 620 ft.), is the gateway to the largest forests of redwood in the world. The great state highway runs right through Ukiah and on into Mendocino county.

Three miles from Ukiah is one of the state's largest hospitals for the insane, a model institution. Three miles in another direction lie the famous Vichy Springs, one of America's best known watering places and a magnificent resort hotel, there being included in its spacious grounds a large plunge of the Vichy water.

But a half mile from town, in one of the most picturesque canyons imaginable, lies one of the state's fish hatcheries. This is always open to the public and shows the care of trout from the smallest spawn to the largest fish. California maintains several of these hatcheries, the fish from which are distributed free in the streams of the state for all who may come.

Several miles distant are the world-famous terraces of Carl Purdy, the noted bulb expert, who made his home in Ukiah.

Route 210—Ukiah to San Francisco, Cal.—120.6 m.

Reverse Route 90.

Via Cloverdale, Healdsburg, Santa Rosa, Petaluma, San Rafael and Sausalito. First 5 miles concrete, then fine gravel highway across mountains to Cloverdale; good gravel to Healdsburg; balance concrete and some stretches of macadam. Summary: 75 miles concrete, with some stretches of macadam; 45 miles good gravel.

A very scenic trip thru timbered hills and gorgeous valleys. Leaving Ukiah, we traverse a pretty valley within sight of the wooded shores of Russian river to Hopland, where a fine gravel highway winds its way thru pretty mountain country into Cloverdale. From here a great vineyard district extends to Healdsburg. A vast

and fertile valley is then followed thru Santa Rosa and Petaluma, while the rest is over pretty rolling country, unfolding splendid views of Mt. Tamalpais and San Francisco Bay.

| 66.7 | 0.8 | Right-hand diagonal road; bear right with concrete. Cross RR 71.1. Thru Cotati 74.0. Pass Penn Grove over to left 77.0. Cross electric RR 78.8. Same thorofare becomes Main St. | |

*Cloverdale, Cal. (pop. 825, alt. 100 ft.), is situated on the Russian river. The surrounding country is a fine grape and orange growing district. The town itself is situated among orange groves and is the railroad station for many well-known springs.

*Geyserville, Cal. (pop. 600, alt. 205 ft.), is

82 miles north of San Francisco. It has winter-ices and there are a number of geyser springs in the vicinity. The Russians first came here from Fort Ross and planted grain on the rich lands of the Russian river valley, floating it to the mouth of the river on barges and thence up the Coast to Fort Ross.

- 81.8 15.1 Petaluma,* Main & Washington Sts., bank on right. Keep ahead on Main St.
 Left on Washington St. is Route 236 to Sonoma.
 Right on Washington St. is Route 148 to Monte Rio.
- 82.0 0.2 Fork, town square in center; bear left onto 3rd St.
- 93.2 11.2 Novato (business district over to left across RR). Keep ahead.
- 93.5 0.3 Diagonal 4-corners, just beyond concrete bridge; bear left with pavement. Pass Ignacio Sta. on left 96.9. Same thoroughfare becomes Petaluma Ave.
- 104.4 10.9 4th St.; turn right.

- 106.6 1.8 Left-hand road; turn left across RR.
- 106.7 0.1 San Anselmo,* stores on left. Straight thru along RR.
- 108.3 1.6 Right-hand road, store on left; turn right. Cross RR at Kentfield Sta. 108.6. Thru Larkspur 110.0.
- 110.3 2.0 Fork; bear left across small concrete bridge.
- 110.5 0.2 3-corners; bear left with pavement. Pass Corte Madera Sta. on left 110.9, ascending long winding grade. Avoid right-hand road 113.2. Cross RR at High School Sta. 113.9.

A trip may be made from High School Sta. to Mt. Tamalpais* and Muir Woods.*

*Petaluma, Cal. (pop. 5,900, alt. 10 ft.), is considered the largest poultry center in the world; is also considered a dairy center. Annually 13,101,512 dozen eggs and 106,032 dozen poultry have been shipped from Petaluma. This does not take into consideration the thousands of dozens that are used in hatcheries and consumed locally.

The largest hatchery in the world is located in this city, having a capacity of 225,000 eggs every three weeks. The only silk mill west of the Rockies, manufacturing spool silk, is also located here.

A historical landmark of Petaluma is General Vallejo's Fort, known as the "Old Adobe." It is located about three and one-half miles from town. This is a building of immense proportions and was under course of construction during a period of ten years, from 1834 to 1844. It is a two-story structure of adobe and timber, the timber being brought by oxen from the giant redwood of the northern part of this country. It was in this building one of the first schools of industry of California was established—where Mexicans and Indians were taught the crafts and skill. This old landmark has recently been deeded to the Parlor N. S. G. W. with the understanding that it would be preserved for all time.

*San Rafael, Cal. (pop. 6,000, alt. 12 ft.), situated near the northern end of the Bay of San Francisco, is chiefly a residential city containing many beautiful homes and gardens. The old mission San Rafael Archangel, established here December 14, 1817, at the foot of Mt. Tamalpais, was the beginning of the present beautiful city. The mission prospered until secularization took place, from which time the buildings fell into decay and nothing now remains but a few old pear trees planted by the padres.

*San Anselmo, Cal. (pop. 2,500, alt. 17 ft.), was in the early days a hunting ground for the Indians. It is located but two and one-half miles from Mission San Rafael. (For his-

tory of this mission see Index in front of book.) Mount Tamalpais is also but a short distance away.

*Mt. Tamalpais.—Guarding the golden portals to San Francisco Bay looms Mt. Tamalpais, rising above the surrounding hills to a height of 2,592 feet. Long ago the Tamal Indians traced narrow trails to its summit to survey the ocean, bays, forests, valleys and the riot of little hills that crowd the base of the mother mountain. Now tourists go to its very pinnacle over the "crookedest railroad in the world" to enjoy the wonderful and beautiful view of the city of San Francisco and the Golden Gate. After one has filled his eyes with the beauty of the picture, he notices the marvel of the engineering feat which has made this easy ascent possible. At one point the railroad track parallels itself five times to achieve a difficult grade, forming a double bow knot.

*Muir Woods, situated at the foot of Mount Tamalpais, on the north shore of San Francisco bay, is a splendid grove of California redwoods. One may reach this delightful spot in less than two hours from San Francisco by means of the Sausalito ferry and a very picturesque road leading to the woods from which a panorama of the bay and ocean to the south and west and Mount Tamalpais with its "crookedest railroad in the world" to the north may be had. A good road leads thru the forest, beneath the great trees, many of which are thirty to forty feet in circumference and 50 feet high. These are the Sequoia Sempervirens, a different species than the Sequoia Gigantea of the High Sierra.

During the summer season there is a guide at the woods who will conduct parties thru the grove and point out the most noted trees, some of which bear the names of prominent men. Muir Woods has been set aside as a national monument and includes 295 acres, given to the people by William Kent in honor of John Muir, the California naturalist.

- 114.9 4.4 Fork; bear left with pavement. Pass Waldo Sta. on left 116.2.
- 116.9 2.0 End of road; turn left with pavement. Same thorofare becomes Bonita St.

Via Kellogg. Dirt and gravel roads all the way.
 Thru very rich vineyards, orchards and wooded hills.

- 0.0 0.0 HEALDSBURG, 4-corners, park on right. Go north.
- 0.6 0.6 End of road; jog left and immediately right.

*Sausalito, Cal. (pop. 2,400, alt. 200 ft.), a resort in Marin county, is situated on the west shore of San Francisco bay, 6 miles northwest of San Francisco, with which it is connected by ferry. It is one of the prettiest of the shore towns, with trim houses and gardens from which flower-wreathed ladders lead to the water's edge. In the summer time the waters between Sausalito and Belvedere are a favorite gathering place for be vies of yachts,

launches and house boats. Sausalito is the starting point of the railroad to Mt. Tamalpais, "The Blue," "The Tri-Peaked," "The Hill of Tamal-land," which is reached, after crossing the Straits, by a broad gauge railroad to the summit of the cone which rises 2,600 feet above sea level. The view from the top is one of unusual magnificence, embracing the sea and the city and bay of San Francisco.

- 2.7 2.1 Fork; bear right.
 3.9 1.2 Fork; bear right onto gravel. Turn sharp left with road across long iron bridge 5.3.
 6.6 2.7 Right-hand road; turn right on gravel.
 9.0 2.4 End of road; jog left and immediately right. Descend grade 10.3. Caution for narrow road on side of canyon 11.0.
 12.6 3.6 Fork; bear right. Pass Kellogg P. O. on left 16.3.
 18.4 5.8 Fork; bear right. Ascend grade 18.7.
 19.8 1.4 Fork; bear right downgrade.
 20.2 0.4 End of road, at foot of grade; turn right.
 21.0 0.8 End of road; turn right with travel. Same thoroughfare becomes Main St.
 23.7 2.7 Lincoln Ave., blacksmith shop on far left; turn left.
 24.0 0.3 CALISTOGA,* Lincoln Ave. & Washington St.

Route 214—Ukiah to Lakeport, Cal.—33.9 m.

Reverse Route 127.

Via Blue lakes. First 3 miles macadam; balance good dirt. Summary: 31 miles good dirt; 3 miles macadam.

Many sharp turns are encountered on this trip and tourists are cautioned to drive carefully. Of particular attraction is the country around the Blue lakes, which nestle in a narrow valley and provide excellent camping grounds.

GARAGES—Crawford's Garage, on main highway at south end of town.

*Calistoga, Cal. (pop. 1,500, alt. 359 ft.), is at the head of the Napa Valley. Vineyards stretch everywhere around it. To the north is Mt. St. Helena (4,440 ft. high) an extinct volcano. At the summit of this mount may be seen a tablet placed by the Russians in 1812 to commemorate its discovery. The Russians from Ft. Ross were the first white people in this valley. Lassen, Shasta, Tamalpais and points around San Francisco bay may be seen on a clear day from the summit of Mt. Helena.

It is a six-mile trip from Calistoga to the Toll House (on the shoulder of Mt. Helena, on the stage road) near which Stevenson

lived when he wrote the "Silverado Squatter." Close at hand is the Silverado mine, where now a monument stands dedicated to this famous author. Also nearby is the inn over which Mrs. Patterson, to whom he refers, presides.

Another five-mile trip from Calistoga will take one to the famous Petrified Forest, one of the natural wonders of the world, also written of by Stevenson.

Hot mud and medicinal mineral baths are a feature of the numerous resorts in the vicinity of Calistoga. There are also numerous spouting geysers which are a source of interest to tourists.

MOTOR LIFE'S free service departments are awaiting your commands.
 Have you tried them? See Motor Life colored insert.

Route 218—Lakeport to San Francisco, Cal.—91.7 m.

Reverse Route 121.

Via Kelseyville, Glenbrook, Calistoga, St. Helena, Napa and Vallejo. Good gravel and dirt to Napa; concrete and macadam to Vallejo. Summary: 74 miles good gravel and dirt; 14 miles concrete; 4 miles of worn macadam entering Vahejo.

Traversing a level farming district to Kelseyville, the route enters a mountainous region with many views of exceptional beauty. A wide and well graded toll road leads across Mt. St. Helena and into the prosperous town of Calistoga at the head of Napa valley. Now following thru a very pretty fruit and general farming community, the tourist reaches Vallejo and ferry across the bay to San Francisco.

- 30.6 1.4 Irregular 4-corners, school on left; jog left and immediately right, keeping ahead.
- 30.7 0.1 Middletown, 4-corners, store on right. Turn right.

*Kelseyville, or Kelsey, Cal. (pop. 1,000, alt. 1,160 ft.), is situated at the base of Uncle Sam mountain amidst beautiful scenery. It is 25 miles northeast of Cloverdale and 3 miles south of Clear Lake. It is the oldest town in the county and was the home of Stone and Kelsey, who, in 1847, bought the cattle of the Vallejo family and came in and took possession, compelling the Indians to erect for them an adobe house on the banks of Kelsey creek directly opposite the present town of Kelsey. They treated the Indians cruelly, compelling

them to work hard and without pay, and often supplying them with insufficient food, and sending them out to dig gold for the whites, most of the Indians perishing on these trips. Eventually the reckoning came. The Indians beset the adobe, put both Stone and Kelsey to death. The following year Lieutenant Lyons was sent against the defenseless Indians destroying them almost to a man. The town possessed a store and blacksmith shop as early as 1857 and is today a place of considerable importance, having an academy and several industrial establishments.

*Calistoga, Cal. (pop. 1,500, alt. 359 ft.), is at the head of the Napa valley. Vineyards stretch everywhere around it. To the north is Mt. St. Helena (4,440 ft. high) an extinct volcano. At the summit of this mount may be seen a tablet placed by the Russians in 1812 to commemorate its discovery. The Russians from Ft. Ross were the first white people in this valley. Lassen, Shasta, Tamalpais and points around San Francisco bay may be seen on a clear day from the summit of Mt. Helena.

It is a six-mile trip from Calistoga to the Toll House (on the shoulder of Mt. Helena, on the stage road) near which Stevenson lived when he wrote the "Silverado Squatter." Close at hand is the Silverado mine, where now a monument stands, dedicated to this famous author. Also nearby is the inn over which Mrs. Patterson, to whom he refers, presides.

Another five-mile trip from Calistoga will take one to the famous Petrified Forest, one of the natural wonders of the world, also written of by Stevenson.

Hot mud and medicinal mineral baths are a

feature of the numerous resorts in the vicinity of Calistoga. There are also numerous spouting geysers which are a source of interest to tourists.

*St. Helena, Cal. (pop. 1,625, alt. 260 ft.), is 60 miles north of San Francisco. It is in a grape region and formerly produced much wine. It was founded 1851 and is on the edge of the lake country. A road runs to Clear lake, which is the Lake Tahoe of the northern region. At the head of the valley stands Mt. St. Helena, made famous by Robert Louis Stevenson as the place of his honeymoon and the scene of the "Silverado Squatters." Stages run to the mountain and to the lake country beyond. Near St. Helena is the St. Helena sanitarium and the home of Mrs. Ellen G. White, who, with her husband, practically founded the cult of the present Seventh Day Adventists. Mrs. White was also the originator and first leader of the movement toward hygienic living and treatment of disease more fully developed and perfected by Dr. Kellogg in what is known as the Battle Creek sanitarium methods.

- 7.5 0.8 Left-hand road; turn left across iron bridge.

*Vallejo, Cal. (pop. 16,000, alt. 87 ft.)—At
 this point transfer is made by ferry boat
 crossing the strait to Mare island, where may
 be visited the Mare Island navy yard, the
 largest naval station on the Pacific coast. It
 is within two hours by boat from San Fran-
 cisco, on a comfortable, moderate bay steamer
 through the upper reaches of San Francisco
 bay.

In visiting the navy yard every courtesy
 is extended by the officials, and an orderly is
 at hand to explain objects of interest. Many

thrilling chapters of American history are
 found in the collection of American victories
 at sea at Mare Island. Usually one or more
 battleships or cruisers may be seen in the
 drydocks, while torpedo boat destroyers are
 loafing at anchor. No cameras are allowed
 in the navy yard. Luncheon may be had on
 board the boat or at Vallejo. Vallejo itself
 is an interesting little city of homes, with a
 deep water channel and fine highways leading
 to the valleys, lying north and east, as well
 as to the bay cities. It is the chief city in
 Solano county.

The Publishers of the Automobile Blue Books will greatly appre-
 ciate any suggestions or corrections from their motor patrons.
 They well realize the difficulty of the task to which they have set
 themselves—and the valuable assistance motorists are constantly
 in a position to lend.

How to Use the Route Chart and General Index

To lay out through trips between route centers you will find the Route Chart (page four) of great service.
For a comprehensive survey of all the territory and routes covered by this volume, see the large folded General Index Map in front of Book.

- Avoid right-hand diagonal road 1.4 and left-hand diagonal road 1.7.
- 1.8 1.7 End of road; turn right.
- 2.8 1.0 3-corners; bear right.
- Sharp left is Route 204 to Lakeport.
- Avoid right-hand road 6.2.
- 7.7 4.9 LOWER LAKE, center of town ahead.
- Left is Route 126 to Williams.

Route 221—Lakeport to Hopland, Cal.—26.5 m.

Reverse Route 106.

- Via Highland Springs, Pieta toll road and Old Hopland. Fair-to-good dirt road. Passing thru a comparatively level farming district to Highland Springs, the route reaches the Pieta grade and follows over winding mountain road on easy grades to Old Hopland. Road surface is fair and most of the run can be made on high gear. Caution is necessary for numerous sharp curves. A toll of \$1.50 is charged at Highland Springs.

Route 224—Napa to San Francisco, Cal.—51.9 m.

Reverse Route 123.

Via Black Point cut-off, San Rafael and Sausalito. First 8 miles concrete, followed by 15.5 miles good gravel; balance concrete and oiled macadam. Summary: 32.4 miles concrete and oiled macadam; 19.5 miles good gravel.

This route is known as the Black Point cut-off and offers a very good option to Route 218, eliminating the long ferry trip from Vallejo to San Francisco.

For this and other exits see City Map, page 162.

| 49.8 | 0.1 | Northwestern Pacific Sausalito-San Francisco Ferry across San Francisco Bay. |

Charges: Automobile, 90c each way; passenger, 15c one way, 25c round trip.

*San Rafael, Cal. (pop. 6,000, alt. 12 ft.), situated near the northern end of the Bay of San Francisco, is chiefly a residential city containing many beautiful homes and gardens. The old mission San Rafael Archangel, established here December 14, 1817, at the foot of Mt. Tamalpais, was the beginning of the present beautiful city. The mission prospered until secularization took place, from which time the buildings fell into decay, and nothing now remains but a few old pear trees planted by the padres.

*San Anselmo, Cal. (pop. 2,500, alt. 17 ft.), was in the early days a hunting ground for the Indians. It is located but two and one-half miles from Mission San Rafael. (For history of this mission see Index in front of book.) Mount Tamalpais is also but a short distance away.

*Sausalito, Cal. (pop. 2,400, alt. 200 ft.), a resort of Marin county, is situated on the west shore of San Francisco bay, 6 miles northwest of San Francisco, with which it is connected by ferry. It is one of the prettiest of the shore towns, with trim houses and gardens from which flower-wreathed ladders lead to the water's edge. In the summer time the waters between Sausalito and Belvedere are a favorite gathering place for be vies of yachts, launches and house boats. Sausalito is the starting point of the railroad to Mt. Tamalpais, "The Blue," "The Tri-Peaked," "The Hill of Tamal-land," which is reached, after crossing the Straits, by a broad gauge railroad to the summit of the cone which rises 2,600 feet above the sea level. The view from the top is one of unusual magnificence, embracing the sea and the city and bay of San Francisco.

Leaving ferry, keep ahead and at end of street, turn left onto Embarcadero St., joining trolley.

San Francisco City Map, page 160D, Points of Interest, page 160A.

49.9 0.1 Market St., ferry building on left; turn right with branch trolley.

GARAGES—Stockton & Sutter Garage, 410 Stockton St.

BATTERIES—Guarantee Battery Co., 639 Van Ness Ave.

Route 226—Eureka to Fort Bragg, Cal.—159.4 m.

Reverse Route 119.

Via Ferndale, Petrolia, Kenny and Westport. Concrete and gravel to Ferndale, winding narrow mountain road to Hardy; balance over easy rolling grades along shore to Fort Bragg. Average road conditions on this trip are fair and there are many stretches of good surface.

A continuous succession of up and down grades with varying elevations ranging from sea level to 2,500 feet are encountered, beginning at Ferndale. Some of the grades which have sharp turns and blind curves are long and steep. The country is timbered most of the way, and some fine views of mountain and marine scenes are encountered. Of particular scenic interest are the beautiful Mattole valley and Cape Mendocino.

Supply and stopping places are very limited and tourists must provide accordingly. Emergency accommodations may be obtained at the farmhouse in Upper Mattole and a small hotel is located at Kenny's. Tourists with camping facilities will find this an ideal trip.

- 112.6 0.1 MONTE RIO, P. O. on left at RRs.

HOTELS—Riverview Hotel, ¼ mile south of P. O. on river.

*Mendocino City, Cal. (pop. 1,000, alt. sea level), is situated at the mouth of Big river 10 miles north of San Francisco, with which it is connected by steamer. It is named after the viceroy Mendoza, who sent Cabrillo forth on his voyage of exploration in 1543. It is con-

nected with Ukiah by stage. The town was founded by William Kaster, whom foul weather drove ashore at this place as he was cruising up the coast in a craft of some kind in 1851. The following year machinery was sent here by ship, saw mills were built and a regular town begun.

*Willits, Cal. (pop. 3,000, alt. 1,369 ft.), is a lumbering town in Mendocino county. Nearby are forests and the Noyo, one of the streams of northern California most favored by campers, hunters and anglers. Covert is furnished by miles upon miles of towering sequoias, through whose soaring branches may be caught glimpses of the hills and rugged summits of Coast range.

*Ukiah, Cal. (pop. 2,150, alt. 620 ft.), is the gateway to the largest forests of redwood in the world. The great state highway runs right thru Ukiah and on into Mendocino county, whose rugged mountain and forest scenery is unsurpassed.

Three miles from Ukiah is one of the state's largest hospitals for the insane, a model in-

stitution. Three miles in another direction lie the famous Vichy Springs, one of America's best known watering places and a magnificent resort hotel, there being included in its spacious grounds a large plunge of the Vichy water.

But a half mile from town, in one of the most picturesque canyons imaginable, lie one of the state's fish hatcheries. This is always open to the public and shows the catch of trout from the smallest spawn to the largest fish. California maintains several of these hatcheries, the fish from which are distributed free in the streams of the state for all who may come.

Several miles distant are the world-famous terraces of Carl Purdy, the noted bull expert who made his home in Ukiah.

Route 232—Fort Bragg to Cloverdale, Cal.—86.9 m.

Reverse Route 107.

Via Greenwood, Philo and Boonville. Good dirt to Greenwood, fair mountain road and 8½ miles of good graded gravel highway to Cloverdale. Summary: 78½ miles fair-to-good dirt; 8½ miles fine gravel highway.

This route follows along the rugged shore of the Pacific Ocean to Greenwood, shortly beyond starting its long ascent across the coast range. The balance is over pretty country with wooded hills and prosperous farms always in sight.

- Via Guerneville and Fulton. Dirt and gravel roads; with exception of last 4½ miles, which are concrete. Caution for steep grades on narrow roads with sharp turn between Monte Rio and Guerneville.
- 0.0 0.0 MONTE RIO, sta. on left. Go east across RR.
- 0.1 0.1 Left-hand road; turn left across long iron bridge over Russian river.
- 0.3 0.2 Fork; bear left.
- 1.3 1.0 End of road; turn right upgrade, using caution for curves on winding road.
- 5.0 3.7 End of road; turn left away from RR.
- 5.3 0.3 3-corners; turn right.

*San Anselmo, Cal. (pop. 2,500, alt. 17 ft.), was in the early days a hunting ground for the Indians. It is located but two and one-half miles from Mission San Rafael. (For history of this mission see Index in front of book.) Mount Tamalpais is also but a short distance away.

*Sausalito, Cal. (pop. 2,400, alt. 200 ft.), a resort of Marin county, is situated on the west shore of San Francisco bay, 6 miles northwest of San Francisco, with which it is connected by ferry. It is one of the prettiest of the shore towns, with trim houses and gardens

from which flower-wreathed ladders lead to the water's edge. In the summer time the waters between Sausalito and Belvedere are a favorite gathering place for be vies of yachts, launches and house boats. Sausalito is the starting point of the railroad to Mt. Tamalpais, "The Blue," "The Tri-Peaked," "The Hill of Tamal-land," which is reached, after crossing the Straits, by a broad gauge railroad to the summit of the cone which rises 2,600 feet above sea level. The view from the top is one of unusual magnificence, embracing the sea and the city and bay of San Francisco.

Read the Editor's Advice on Touring Equipment
 in the Orange insert, center of Book

A careful analysis on things necessary—and superfluous—for touring in comfort. We recommend the particular makes of accessories listed as reliable.

- 5.4 0.1 Guerneville,* center of town. Keep ahead across RR.
- 5.5 0.1 End of road; jog left and immediately right across long wooden bridge over Russian river.

Straight ahead is Route 100 at mileage 22.0 to Napa.
- 49.7 1.1 SONOMA,* end of street at bank.

*Petaluma, Cal. (pop. 5,900, alt. 10 ft.), is considered the largest poultry center in the world; is also considered a dairy center. Annually 13,101,512 dozen eggs and 106,032 dozen poultry have been shipped from Petaluma. This does not take into consideration the thousands of dozens that are used in hatcheries and consumed locally.

The largest hatchery in the world is located in this city, having a capacity of 225,000 eggs every three weeks. The only silk mill west of the Rockies, manufacturing spool silk, is also located here.

A historic landmark of Petaluma is General Vallejo's Fort, known as the "Old Adobe." It is located about three and one-half miles from town. This is a building of immense proportions and was under course of construction during a period of ten years, from 1834 to 1844. It is a two-story structure of adobe and timber, the timber being brought by oxen from the giant redwood of the northern part of this country. It was in this building one of the first schools of industry of California was established—where Mexicans and Indians were taught the crafts and skill. This old landmark has recently been deeded to the Parlor N. S. G. W. with the understanding that it would be preserved for all time.

*Sonoma, Cal. (pop. 975, alt. 98 ft.), is situated on Sonoma creek, 45 miles north of San Francisco, and in the beautiful Sonoma valley, whose soil and climate are especially adapted to viticulture. The site of Sonoma was a part of the original grant of 86,000 acres

made to Mariano Guadalupe Vallejo, a Mexican who was reared in Monterey. He founded the town and his beautiful hacienda is still standing, though deserted. It was once the scene of sumptuous hospitality and was called Lachryma Montis, or Mountain of Tears, the name having its origin in the legend of an Indian maid whose lovelorn tears were said to have given rise to the spring on the mountainside. In a Swiss chalet is a historical collection of mementos of the days before the Americans came. The descendants of General Vallejo are now living in a comparatively modern house. At his home on the Sonoma plaza near the mission church he was seized by Fremont and his swashbuckling crew and carried off to Sutter's ranch (near Sonoma), where he was held a prisoner for many weeks while his captors proclaimed the Republic of California.

Here on Sutter's ranch was Fort Helvetia, where the Bear Flag was raised. After the Republic had been proclaimed, the "republicans" felt the need of a flag, and proceeded to construct one out of a torn sheet. In one corner William Lincoln Todd, nephew of Mrs. Abraham Lincoln, drew a star, but it was recalled that Texas was already the "Lone Star State," so he drew in a grizzly bear as most characteristic of California, and it was then decided to add a bar, for which was contributed, according to the records, the red flannel petticoat of the wife of the American express rider between the Fort and Sonoma. Beneath was printed crudely the legend "California Republic." In 1911 this entire device

was adopted as the state flag of California. At Sonoma was established the last of the missions. (See Mission San Francisco Solano.) Sonoma is an Indian word signifying "Valley of the Moon," by which the natives designated the valley of that name.

The Mission of San Francisco de Solano is located in the town of Sonoma. This, the last of the California missions, was founded July 4, 1823, just 54 years after the first mission. It was not comprehended in the original scheme and was not, in fact, intended as a new mission. Father José Altimira, a young priest who had been newly stationed at the Mission of San Francisco de Asis, becoming greatly concerned over the high mortality at his station, desired that the locality of the mission be changed. Encouraged by Governor Arguello and other political personages, he sent out exploring parties and Sonoma was selected as a suitable site and the mission was formally dedicated in April, 1824. Within a year adobe buildings roofed with tiles had been constructed and many neophytes received, a large number of them having come from the missions of San José, San Rafael, and San Francisco. The Indians at this mission represented 35 different tribes. In the twelve years of the mission's existence before secularization, 1,300 baptisms were recorded. Ten years after secularization not 200 Indians remained.

The pueblo of Sonoma was organized as a part of the secularization of Solano and soon afterwards the soldiers of the presidio of San Francisco were transferred to Sonoma to act as a check on Russian aggression from the north and on the influx of Americans from the United States. Secularization was so thoroughly carried out at Solano that in 1845 when Pio Pico issued his decree for the sale of mission property, Solano was declared without value. In 1880 the mission and its grounds were sold by Bishop Alemany to a German named Schocken for \$3,000. With the proceeds he erected a modern parish church, which is still in use. For six months after the sale divine services continued to be held in the old mission, then Schocken used it for storing wine and hay. In September, 1903, the mission was purchased for \$5,000 by William R. Hearst, who deeded it to the state of California. The deeds have been accepted by the legislature and an appropriation has been made for the preservation of the mission as a historical landmark. The buildings were extremely plain and have not been improved by age. Their interest is chiefly historical. The church is 36 feet long by 16 feet wide. The tower is said to have been built by General Vallejo in 1835. Adjoining the church is a long, low building with a corridor on one side covered with the overhanging roof.

Copyright 1914 by R. E. Stinson, Red Bluff, Cal.

The Vulcan Face

This picture depicts the eruption of Mt. Lassen, on May 15, 1914, and shows unmistakably outlined the face of Vulcan as portrayed by the ancient Greeks on all statues of that god, who was their deity of fire and was supposed to live in the largest volcano of the then known world.

Medford-Klamath Falls Section

POINTS OF INTEREST, MEDFORD, ORE.

Medford (pop. 12,000, alt. 1,374 ft.) is located in the very heart and center of the Rogue river valley, far famed for its pear and apple orchards. Here natural conditions favor the building of a large city; all the agricultural, horticultural, timbered and mining wealth

within a radius of fifty miles is tributary, and for this reason Medford has become a metropolitan city of paved streets, beautiful homes, inviting parks, large hotels and solid business blocks. It is the principal starting point for Crater Lake National Park.

Route 241—Medford, Ore., to Dunsmuir, Cal.—108.8 m.

Reverse Route 172.

Via Ashland, Hornbrook, Yreka, Gazelle and Weed. Concrete to Ashland. From here on to the California state line paving is in progress and a large portion of this stretch will be completed for the 1920 season; good graded gravel highway from the state line to Yreka; natural gravel and dirt thence to Dunsmuir. Summary: 13 miles concrete; 22 miles in course of paving; 25 miles good graded gravel highway; 50 miles air-to-good natural gravel and dirt.

A very scenic drive across the timber clad Siskiyou into California, thru picturesque Klamath and Shasta River Canyons and along the base of wonderful Mt. Shasta. The grades across the mountains are easy and safe, due to some very clever and interesting engineering features.

0.0 0.0 MEDFORD, Riverside Ave. & Main St. Go southeast on Riverside Ave. along RR. Thru Phoenix 4.6 and Talent 7.2. Under RR 11.2, bearing left onto N. Main St. immediately beyond.

 Left leads to business district, 0.2 mile.

*Yreka, Cal. (pop. 1,150, alt. 2,635 ft.), is situated on the Yreka river 85 miles east of Crescent City. The name is a corruption of the Indian word "Ieka," meaning "whiteness," which was the Indian name for the adjacent snow-crowned Shasta. The settlement of the town was occasioned by the Trinity Gold mine excitement of 1849. Governor Joseph Lane of Oregon was probably the first to carry on prospecting operations near the Yreka. He was followed by a party under Rufus Johnson

in 1850, and so large was the immigration that in 1852 the section was formed into a separate county under the name of Siskiyou with Yreka as county seat. The town was first known as Thompson's Dry Diggings on account of its very rich flat deposits; then, with a slight change in location, it became Shasta Butte; but this name causing confusion with Lower Shasta, the name Yreka was adopted at the time the town was made the county seat.

GARAGES—Brick Garage, State Highway, ½ block south of P. O.

*Sisson, Cal. (pop. 800, alt. 3,555 ft.), is a sawmill town, 78 miles north of Redding. It is the point of departure for the climb of Mount Shasta. This may be made by the McCloud River railroad, or by horseback from Sisson. The latter is the more interesting. The start is made at noon and the timber line reached before dark. The night is passed in camp and in the morning the ascent is continued on foot, the summit, 14,440 feet above the level of the sea, being reached in 7 to 8 hours. On the summit among the loose stones are hot springs. They have a temperature of 100° F. and their waters are strong with sulphur and other minerals. Many of them eject hot steam. From one a jet of hot steam two feet in diameter rushes out with great force and a loud noise. The ground is hot to the foot. Shasta has several craters, the largest being on the western peak, which is several hundred feet lower than the one where the springs are. This latter crater is the center of a circle of snow a mile in diameter and 2,500 feet deep, which is stained with the yellow of the sulphur of the volcano. From time to time cavernous rumblings may be heard, reminding the tourist that he is standing on a volcano. The descent may be made to Nowona or Strawberry valley by sliding down the chutes, using the alpenstock as a rudder. There are but three months in the year, July, August and September, when it is considered safe to make the ascent.

The name Shasta is derived from the Russian "Tchastal," meaning the white or the pure, the name given to the mountain by the early Russian explorers and settlers at Bodega and later used by the trappers. The Indians call it "Ieka," the white. There is a pretty Indian legend that the mountain is the abode of the Great Spirit, and that the whole country round about was once inhabited by grizzlies who captured the daughter of the Great Spirit and married her to one of their number, and that these wedded two were the progenitors of the entire Indian race. The

Great Spirit, the story runs, then built little Mount Shasta for a wigwam for the captured girl that she might dwell near the lodge of her father. There are but two higher peaks on the western coast than Shasta, Mount Whitney, 15,000, and Mount Williamson, 14,500 feet. But these peaks fall far short of Shasta in grandeur and magnificence, for their bases rest on the top of other mountains, above which they rise only a few thousand feet, while the base of Shasta is only 3,570 feet above the sea. By its isolation, its height and its purity, it is the most conspicuous mountain in America.

At Sisson there is a great fish hatchery, comprising 53 ponds, from which daily distribution is made to the streams of the state. Near the hatchery may be seen the ruins of the old Sisson tavern, which in its days sheltered most of the governors of California and other men prominent in the state's history.

*Shasta Springs, Cal. (alt. 2,510 ft.), is one of California's many ideal summer resorts, where Nature's beauty is unsurpassed and the home of the world famous Shasta water. It is located at the headwaters of the Sacramento river. Trout fishing, mountain climbing, horseback riding, swimming, tennis, motoring and dancing are only a few of the attractions enjoyed here.

*Dunsmuir, Cal. (pop. 3,300, alt. 2,280 ft.), is a village of Siskiyou county, 60 miles southeast of Yreka. It is chiefly a railroad town, but good hunting and fishing are to be had near by. In front of the station are two aquariums in which may be seen the varieties of trout to be found in the region. Three miles south of Dunsmuir, on Little Cast Creek, is a chromite mine, which up to 1913 was the only mine in the United States producing chromic iron ore. For those who are interested in geology there is a good example of columnar jointing to be seen in the lava on the west side of the railroad track near Dunsmuir in the direction of Shasta Springs. There are numerous summer resorts in the vicinity of Dunsmuir.

A brief description of the states covered by this volume found in the back of the book. Read it and get an idea of the country you are about to traverse.

Route 243—Dunsmuir to Redding, Cal.—65.0 m.

Reverse Route 171.

Via La Moine and Baird. Good gravel highway with the exception of 5 miles of poor dirt. This latter stretch is under construction and a good deal of it will be completed for the 1920 travel. Summary: 60 miles good gravel; 5 miles poor dirt.

Following the Sacramento river canyon on a winding, rolling road for the first 37 miles, the route crosses to the east side of the river and traverses a timbered mountain country to the junction of Pitt and McCloud rivers. The balance of this trip is thru a wooded foothill country, again crossing the Sacramento river on a fine concrete bridge shortly before reaching Redding.

Route 247—Klamath Falls, Ore., to Dunsmuir, Cal.—111.8 m.

Reverse Route 174.

Via Keno, Klamath Hot Springs, Montague, Grenada, Weed and Slisson. Good dirt to Keno; poor mountain road to Klamath Hot Springs; good gravel to Ager; fair dirt to Weed; good graded gravel to Slisson; fair dirt to Dunsmuir. The latter stretch is apt to be cut up and dusty after a long dry spell and heavy travel. Summary: 30 miles good gravel; 58 miles fair to good dirt; 24 miles poor dirt.

Crossing the big plateaus surrounding Klamath lake over a good dirt road, the route reaches Keno, and enters a timbered mountain country. A long descent brings the tourist to the level of the Klamath river, which is followed for many miles. From Ager to Dunsmuir the country is fairly level with considerable farming in evidence. Klamath Hot Springs is the only stopping place between Klamath Falls and Montague.

POINTS OF INTEREST, KLAMATH FALLS, ORE.

Klamath Falls (pop. 5,000, alt. 4,000 ft.), situated at the outlet of Upper Klamath lake, is a thriving and up-to-date little city. Its site is the ancient home of Indian tribes who were numerous when Fremont and Kit Carson, in 1846, first visited the outlet of the great Klamath lakes. Upper Klamath lake, itself a gem of wonderful attraction, is fed by a multitude of clear mountain streams in which the trout fishing is unsurpassed. Pelican Bay Lodge, the mountain home of the late Edward H. Harriman, is located in a particularly beautiful spot on the west shore of this lake. Crater Lake, that bottomless body of wonderful blue water, in the summit of an extinct volcano, is found in Klamath county and is reached by way of Klamath Falls, its nearest city point. The wonderful Lava Bed section, 40 miles southeast of the city, with its ice caves, cinder cones, chimneys and other unique geological phenomena, forms a variation to the scenery which makes a trip thru this region unusually pleasant and instructive.

Klamath Indian reservation, lying in the central part of Klamath county, is bordered on the west by Upper Klamath lake and Wood river and is on the direct route from Klamath Falls to Crater Lake national park. The reservation is 51 miles long and 45 miles wide and contains over one and a quarter million acres. The Indians living here number 1,115 and belong to the Klamath, Modoc and Pai-ute

tribes. There are also a few Pitt Rivers, who were slaves or are the offspring of slaves captured in former years by the Klamaths. These Indians are usually intelligent and progressive. They speak English, dress in "citizens'" clothing, occupy modern dwellings, and live in a civilized manner. The government maintains a boarding school and several day schools for the children. Farmers and stockmen are employed to instruct and assist the men in farming and the care of stock; field matrons teach and help the housewives, and physicians attend the sick. The Indians of the Klamath reservation are reckoned, next to the Osages of Oklahoma, potentially the wealthiest in the United States. Their wealth is estimated at \$2,500 for each man, woman and child.

The Klamath agency is located on the site of old Fort Klamath, among the pines near Upper Klamath lake, 31 miles from Klamath Falls and 29 miles from Crater lake.

At the old fort much of American history was made during the Modoc Indian war.

Here in 1872 Capt. Jack Schonchin, Charley Black Jim and Boston Charley were hanged for the murder of Gen. E. R. S. Canby and Dr. Thomas, while the party were conferring under a flag of truce.

It is but a short distance from the agency to the noted fishing resorts on Spring creek and Williamson river.

For a complete list of Hotels and Garages see listing under Towns in General Index—front of book.

- 102.7 7.5 Sisson* at stores. Keep ahead. Note Mt. Shasta over to left.
 HOTELS—Park Hotel, on main highway at north end of town.

*Sisson, Cal. (pop. 800, alt. 3,555 ft.), is a sawmill town, 78 miles north of Redding. It is the point of departure for the climb of Mount Shasta. This may be made by the McCloud River railroad, or by horseback from Sisson. The latter is the more interesting. The start is made at noon and the timber line reached before dark. The night is passed in camp and in the morning the ascent is continued on foot, the summit, 14,440 feet above the level of the sea, being reached in 7 to 8 hours. On the summit among the loose stones are hot springs. They have a temperature of 100° F. and their waters are strong with sulphur and other minerals. Many of them eject hot steam. From one a jet of hot steam two feet in diameter rushes out with great force and a loud noise. The ground is hot to the foot. Shasta has several craters, the largest being on the western peak, which

is several hundred feet lower than the one where the springs are. This latter crater is the center of a circle of snow a mile in diameter and 2,500 feet deep, which is stained with the yellow of the sulphur of the volcano. From time to time cavernous rumblings may be heard, reminding the tourist that he is standing on a volcano. The descent may be made to Nowona or Strawberry valley by sliding down the chutes, using the alpenstock as a rudder. There are but three months in the year, July, August and September, when it is considered safe to make the ascent.

The name Shasta is derived from the Russian "Tchastal," meaning the white or the pure, the name given to the mountain by the early Russian explorers and settlers at Bodega and later used by the trappers. The Indians call it "Teka," the white. There is a pretty Indian legend that the mountain is the

Straight ahead before this turn leads to lava beds and Doris.
 GARAGES—Merrill Garage, on main road to center of town.

*Dunsmuir, Cal. (pop. 3,300, alt. 2,280 ft.), is a village of Siskiyou county, 60 miles southeast of Yreka. It is chiefly a railroad town, but good hunting and fishing are to be had near by. In front of the station are two aquariums in which may be seen the varieties of trout to be found in the region. Three miles south of Dunsmuir, on Little Cast Creek, is a

chromite mine, which up to 1913 was the only mine in the United States producing chromic iron ore. For those who are interested in geology there is a good example of columnar jointing to be seen in the lava on the west side of the railroad track near Dunsmuir in the direction of Shasta Springs. There are numerous summer resorts in the vicinity of Dunsmuir.

(Sisson Points of Interest—Continued from opposite page.)

abode of the Great Spirit, and that the whole country round about was once inhabited by grizzlies who captured the daughter of the Great Spirit and married her to one of their number, and that these wedded two were the progenitors of the entire Indian race. The Great Spirit, the story runs, then built little Mount Shasta for a wigwam for the captured girl that she might dwell near the lodge of her father. There are but two higher peaks on the western coast than Shasta, Mount Whitney, 15,000, and Mount Williamson, 14,050 feet. But these peaks fall far short of Shasta

in grandeur and magnificence, for their bases rest on the top of other mountains, above which they rise only a few thousand feet, while the base of Shasta is only 3,570 feet above the sea. By its isolation, its height and its purity, it is the most conspicuous mountain in America.

At Sisson there is a great fish hatchery, comprising 53 ponds, from which daily distribution is made to the streams of the state. Near the hatchery may be seen the ruins of the old Sisson tavern, which in its days sheltered most of the governors of California and other men prominent in the state's history.

Route 255—Lakeview, Ore., to Susanville, Cal.—149.9 m.

Reverse Route 187.

Via Alturas, Likely, Madeline and Termo. Gravel to Alturas, fair-to-good natural prairie road with some rocky stretches where road passes thru forest balance of way. Summary: 60 miles good gravel; 85 miles fair to good natural prairie road and about 5 miles of poor rocky surface where road passes thru forest near Susanville.

Leaving Lakeview our route follows the shore of Goose Lake and crosses the state line into California at New Pine Creek. From here on the road is over great valleys and low mountain ranges and many wonderful views of splendid scenery are encountered. The country is open with wooded hills always in sight. Just two miles south of the hamlet of Termo, a prominent fork leads to Ravendale, 5½ miles to the east, where night stops can be made. This road also extends to Susanville over a longer route than the one here given, but eliminating some of the steep grades.

Route 261—Medford to Grants Pass, Ore.—32.6 m.

Reverse Route 262.

Via Central Point, Gold Hill and Rogue River. Hard surface paving to Gold Hill; gravel and dirt to a point $3\frac{1}{2}$ miles beyond Rogue River; balance paved. Summary: 21 miles paving; $11\frac{1}{2}$ miles fair-to-poor gravel and dirt.

Parts of this route will be under construction during 1920 and tourists will not be able to follow text matter closely. Temporary detours will be provided where the highway is closed for paving.

The route traverses thru the scenic Rogue River valley, which has become famous as one of the largest fruit producing communities in the country.

Note (a) offers a good option between Medford and Gold Hill and will be found preferable to the regular route pending completion of paving and new construction work on the latter.

*Central Point, Ore. (pop. 775, alt. 1,646 ft.), is situated in the valley of the Rogue river, which lies between the Umpqua divide on the northwest and the Siskiyou on the south. At Central Point the valley attains its greatest width, 18 miles. Mt. Pitt directly to the east is a striking landmark. Four miles south lies Medford. The soil of this section is rich volcanic ash and the area is remarkably fertile and is devoted to orchards and general farming.

*Grants Pass, Ore. (pop. 5,000, alt. 962 ft.), the county seat and metropolis of Josephine

county, is located on the Rogue river, famed for its steel-head and rainbow trout fishing. Mountains embrace it on all sides, the Coast range on the west, the Umpqua divide on the north, the Cascades on the east and the Siskiyou on the south. The Siskiyou are said to have more deer to the square mile than any other section of the U. S. The Rogue river valley is noted for the fertility of its soil and salubrity of its climate. Grants Pass is the valley's gateway to the Pacific ocean at Crescent City, about 100 miles distant, and the center of the famous Rogue river pear and apple growing district.

- 14.1 6.5 End of road; turn left. Under RR 14.2. Cross bridge over Rogue river and keep left just beyond.

est width, 18 miles. Mt. Pitt directly to the east is a striking landmark. Four miles south lies Medford. The soil of this section is rich volcanic ash and the area is remarkably fertile and is devoted to orchards and general farming.

When your car
needs attention

consult the Index of Cities and Towns, front of Book, to find the nearest Service Station for the part in trouble.

Route 264—Grants Pass, Ore., to Crescent City, Cal.— 95.2 m.

Reverse Route 96.

Via Selma, Kerby and Waldo. Graded gravel to Waldo, then fair-to-good mountain road balance of way. Summary: 40 miles good graded gravel; 55 miles narrow, winding mountain road, most of it good gravelly surface.

Leaving Grants Pass the route traverses a fairly level timber country to Waldo. Easy rolling grades are then encountered for the next 10 miles and a long, steady climb brings the tourist to an altitude of 4,500 feet and across the state line into California. A wonderful view of the surrounding country may be had from this point. Descending on long, winding grade the tourist reaches Patricks Creek Sta. and crosses another divide shortly beyond. The balance of this trip is thru the Giant Redwood Forests of Del Norte County and a few miles of open country just before reaching Crescent City. The trip can easily be made in 7 hours.

Cross Oregon-California state line at summit of grade 53.2. Pass Monumental P. O., Cal., on left 55.4. Caution for sharp curve 59.1. Pass Patricks Creek Sta. on left 62.6, ascending long winding grade immediately beyond. Reach summit 68.2. Caution for sharp turn in middle of descent 70.4. Pass Gasquet Sta. on left 77.0 and Adams Ranch on left 78.4 shortly ascending winding grade thru redwood forest. Cross suspension bridge over Smith river 85.1. Descend winding grade 91.1. Emerge from forest 92.3. Avoid left-hand road 92.8. Bear left across logging RR 93.4.
- 94.6 50.1 3-corners; bear right. Same thoro fare becomes 2nd St.
Left at these 3-corners is Route 265 to Eureka.
- 95.2 0.6 CRESCENT CITY,* 2nd & H Sts.

HOTELS—Bay Hotel & Annex, on the shore of the Pacific ocean on H St. between 1st & 2nd Sts.

GARAGES—Crescent City Garage & Machine Shop, 2nd St., between J & K Sts.

COMM. ORGAN.—Crescent City & Del Norte County.

DRUG STORES—Ender's Drug Store, corner 2nd & H Sts.

*Crescent City, Cal. (pop. 1,125, alt. 50 ft.), is on the Pacific ocean about 275 miles by water north of San Francisco. It has a lighthouse and lumbering interests. It is one of the four

California cities which hold an annual water carnival. The town was founded in 1852 by A. M. Rosborough and so named on account of the crescent shape of the roadstead.

"How Do I Get to Green Street?"

No need to ask your way through any town; this book will tell you everything. Turn to index in front of book for location of street maps of cities and towns. These maps show every main street, with names. The best way thru town is marked with a heavy line.

Route 265—Crescent City to Eureka, Cal—101.7 m.

Reverse Route 94.

Via Requa, Orick and Arcata. Fair to poor dirt and 4 miles of rough plank to Orick, good gravel to Arcata, macadam and stone to Eureka. Construction work on a new road is in progress between Crescent City and Requa, eliminating the long grades now in existence on this stretch. Summary: (approximately) 55 miles good gravel; 36 miles fair to poor dirt; 6 miles good macadam; 4 miles rough plank.

This trip presents a panorama of unsurpassed beauty. Following the coast more or less closely, winding around inlets and lagoons, penetrating deep, virgin forest, one is simply amazed at the grandeur of it all. Nowhere else are trees of such magnitude and number to be seen and as one gazes with silent admiration at these sentinels of the passing ages one feels exalted with joyous wonderment before nature's own undisturbed and mighty creation.

GARAGES—Eureka Garage, corner 5th & C Sts.

SERVICE STA.—Eureka Battery Co., 219 5th St., between C & D Sts.

*Arcata, Cal. (pop. 2,700, alt. 25 ft.), is a favorite residence town, being more free from fogs than its larger neighbor. Steamboats ply to San Francisco. Redwood timber abounds here and the town has large lumbering interests and lumber mills. The main forest forms a dark serried wall about two miles north and east of the town. South of the town extends

a vast mud flat or tide land over which the railroad runs to a wharf two miles in length which reaches to deep water in the bay. The early history of the town was filled with mining excitements which doubled and trebled its population several times and as often left it smaller than before and stained its records with bloody fights and massacres.

CRATER LAKE NATIONAL PARK.

Crater Lake is the deepest and bluest lake in the world and one of the most sensationally beautiful spots in America. To spend even a few hours upon its great lava rim is worth several days of motoring, the more so because the fairly good roads in both directions lie through a picturesque forest clad mountain country, with no heavy grades.

The water is remarkably blue, a lovely turquoise along the edges, and, in the deep parts, extremely dark. The contrast on a sunny day between the unreal, fairylike rim across the lake and the fantastic sculptures at one's feet, and, in the lake between, the myriad gradation from faintest turquoise to deepest Prussian blue, dwells long in the memory. Unforgettable, also, are the twisted and contorted lava formations on the inner rim. A boat ride along the edge of the lake reveals these in a thousand changes. At one point near shore is a mass of curiously carved lava called the "Phantom Ship," because, seen at

a distance, it suggests a ship under full sail. The illusion at dusk or by moonlight is striking. In certain slants of light the "Phantom Ship" suddenly disappears—a phantom indeed. Another experience full of interest is a visit to Wizard Island. One can climb its side and descend into its little crater, for it is a volcano.

Crater Lake has had a very remarkable geological history, which is readable by all visitors. Long before man, one of the very largest of the ancient volcanoes of the Cascade Range was Mount Mazama. It was about the height of Mt. Shasta, in plain sight of which it rose nearly 100 miles to the north; but this was ages ago. No human eye ever saw Mount Mazama. Long before man came the entire upper part of it in some titanic cataclysm fell in upon itself as if swallowed by a subterranean cavern, leaving its crater-like lava sides cut sharply downward into the central abyss.

The first awful depth of this vast hole no man can guess. But the volcano was not quenched; it burst up thru the collapsed lava in three places, making lesser cones within the greater, but not quite so high as the surrounding rim. Then the fire ceased and gradually, as the years passed, springs percolated into the vast basin and filled it with water within a thousand feet of its rim. As you see it today one of these cones emerges a few hundred feet from the surface. The lake is 2,000 feet deep in places. It has no visible outlet of any sort, nor is there any stream running out of it; but the water is supposed to escape by underground channels and to reappear in the Klamath River, a few miles away. Geologists find Crater Lake of special interest because of the way nature made it. Many volcanoes have had their tops blown off. Mount Rainier was one of these. But no other in the United States has fallen into itself like Mount Mazama.

The evidence of this process is quite conclusive. The lava found on the slopes that remain was not blown there from an exploding summit, but ran, hot and fluid, from a crater many thousands of feet higher. The pitch of these outer slopes enabled the scientists to tell with reasonable probability how high the volcano originally was.

The Indians believed that Crater Lake was the home of a great spirit whom they called Llao. The Indians believed that the blue waters teemed with giant crawfish, his servants, some of them so large that they could reach great claws a thousand feet to the top of the cliffs and seize venturesome visitors. Another great spirit chieftain, whom they called Skell, was supposed to live in the Klamath marsh nearby and to have many servants, who could take at will the forms of eagles and antelopes.

War broke out, so the Indian legend says, between Llao and Skell, and Skell was captured. The monsters from the lake tore out his heart and played ball with it, tossing it back and forth from mountain top to mountain top. But it was caught in the air by one of Skell's eagles and by him passed to one of Skell's antelopes, and by him passed to others, who finally escaped with it.

Skell's body miraculously grew again and he in turn captured Llao and tore his body into fragments, which he tossed into the lake. The giant crawfish, thinking them fragments

of Skell's body, devoured them greedily. But when, last of all, Llao's head was thrown in, the monsters recognized it and would not eat it. The remains of Llao's head remain today sticking out of the water of Crater Lake. Some Indians still look upon it with awe, but scientists recognize it as the little cone mentioned above. Its name is Wizard Island.

For many years no Indian would approach even the rim of Crater Lake. Judge Steele, whom you may find living near the Crater Lake park, urged them to come and finally dissipated their fears; now Indians will go even to the water's edge.

It will readily be seen that Crater Lake is not a spot to run rapidly past in your motor. It will pay you to stop at least a few hours. Every hour of the day the sun shifts and the marvelous colors change. One can spend an entire day sitting upon the rim and see the most remarkable alteration in the entire color scheme. It is a spectacle from the color point of view which excels even the Grand Canyon. Better still is the color spectacle when viewed from the launch on the lake. Most of an afternoon may be spent in the boat viewing these wonderful cliffs in all varieties and slants of sunlight; a thousand shades and colors are disclosed. And even more wonderful 's the spectacle of the water viewed from the boat's side.

An excellent new trail has been built on easy grades from the rim to the shore of the lake, which every visitor should make use of, for no one has seen Crater Lake who has not gone down to the water's edge and taken the ride in the launch.

There is a hotel on the edge of the rim where one can be very comfortable and for motorists bringing their own camping equipment a splendid camp ground is provided.

The fishing in Crater Lake is quite remarkable. Up to a dozen or so years ago there were no trout in the lake. Judge Steele at that time carried trout fry many miles in pails and stocked the lake. Now trout are caught on the fly from one to ten pounds in weight. The fishing is best from the rocks.

The road from Crater Lake to Klamath Lake is romantic and beautiful and Klamath Lake will be found a delightful spot.

A motor road has been constructed around the rim of Crater Lake. It is easily one of the scenic highways of the world. The motorist looks down on the lake disclosed in complete detail from every point of view, and on the other side over an ever-changing panorama of Cascade Mountain scenery. All park approaches connect with the rim road, which is 35 miles in length.

Lake Tahoe Section

POINTS OF INTEREST, RENO, NEV.

Reno (pop. 14,000, alt. 4,484 ft.), the metropolis of Nevada, is the county seat of Washoe county, and the location of the University of Nevada. It was named in honor of General Reno, who was killed at the battle of South Mountain. The city is attractively situated on the Truckee river, near the eastern base of the Sierra Nevada mountains, and has a fine courthouse, many good business blocks and a number of handsome residences. It has

gained quite some renown owing to the flexibility of its laws governing divorce. The university, with its attractive buildings on the rising ground north of the city, offers special courses in agriculture and mining. Reno is the center of a large wheat growing area, as well as the commercial center for hogs, cattle, sheep and wool. The high price of silver and copper has caused many of the old mines to be revived which are producing fabulous returns upon the investment.

Route 271—Reno, Nev., to Sacramento, Cal.—172.4 m.

Reverse Route 165.

Via Carson City, Meyers and Placerville. Rough gravel and dirt to Lakeview; good road to Carson City and across Kings canyon grade to Glenbrook; sandy road to Meyers. From Meyers good mountain road to Placerville; concrete to Folsom; macadam balance of way. Summary: 29.6 miles concrete; 6.3 miles good gravel; 21.9 miles macadam; 19.2 miles sandy road; 67.0 miles mountain road; 28.4 miles rough and poor in places.

Leaving Reno, this route follows close along the eastern slope of the Sierra mountains to Carson City. Shortly beyond, the climb over the mountains begins and a long steady grade over good roads brings the tourist to the summit of the high Sierras. Descending on easy grades, we reach the shores of Lake Tahoe and follow same closely over rolling, winding road to Lakeside Park, where the state line into California is crossed. Here the road leaves the lake and runs thru pretty timber country to Meyers. From Phillips, the road winds along the American river, unfolding an endless panorama of enchanting views.

POINTS OF INTEREST, LAKE TAHOE.

The Lake Tahoe country is an ideal objective for the tourist and an uncomparable vacation spot, easily accessible, at the right elevation and varied in attraction of stream and meadow, peak and canyon, its beauty culminating in beautiful Lake Tahoe itself.

Lake Tahoe is one of the largest and grandest mountain lakes in the world, even more superb than the famed Italian lakes Como or Maggiore. These lakes are two to three miles broad and wind about so that only part is visible from any one viewpoint, while Lake Tahoe is 13 miles in width and 23 in length, spreading out its entire surface before the eye at a single glance. More than this, the snow capped peaks of the Sierra rise above it to a height of 11,120 feet. Around the Italian lakes the highest mountains attain an elevation of about 7,000 ft. The depth of Lake Tahoe at Rubicon Point is approximately 2,000 ft., some several hundred feet deeper than the Italian lakes, and the marvelous colorings of its waters correspond accordingly. It is noted for its crystal clearness and wonderful hue—a zone of brilliant emerald encircling a heart of deepest indigo, nestling in a depression be-

tween the summit ridges of the Sierras, which completely hem it in. Round about it are gathered over 60 named and many unnamed smaller glacial lakes, constituting the shining girdle of unmatched Tahoe.

The shores of Lake Tahoe, pine fringed and indented, have many charming resorts with attractive hotels and numerous cottages.

Esmeralda Bay, an inlet or indentation in the shore, half a mile wide and three miles long, is most delightful. This is said at one time to have been a separate lake. Tallac is another well known place, situated at the extreme southern end of the lake. The hotel here stands close under Mount Talac, the one peak which rises directly from the shores of Tahoe. Just back of the hotel, in the forest, lies a beautiful glacial lake known as Fallen Leaf, its name being suggested from its appearance as seen at some elevation.

A twin-screw steel steamer makes the 75 mile circuit of the lake daily during the season.

The Lake Tahoe region is truly God's country and the human mind can scarcely conceive of more beauty, more peace or more of natural wonderment than found here.

- 34.2 1.6 Fork; keep left, ascending Kings canyon grade. Reach summit 44.2.
- 48.1 13.9 Glenbrook. Keep ahead along Lake Tahoe.
 HOTELS—Glenbrook Inn & Ranch, on the E. side of Lake Tahoe.
 Pass Cave Rock on left 51.4.
- 58.0 9.9 Edgewood, Nev. Keep ahead.
- 59.0 1.0 Lakeside Park, Cal., fork, just beyond Nevada-California state line. Bear left.
 Right fork is Note (b) to Meyers and Note (c) to The Grove.
 Avoid right-hand diagonal road 63.0.
- 63.9 4.9 Fork at sign; bear right.
- 67.3 3.4 Meyers, store on left. Straight thru.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attache to the office of the first territorial secretary, and the old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city—and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of

the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found footprints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

Emerald Bay, Lake Tahoe, Cal.

- 68.5 1.2 Fork, just beyond small wooden bridge; bear right up winding grade.

Left fork is Route 296 to Bridgeport.

Note Old Emigrant trail, branching to left 70.0. Abandoned for a smoother and lower grade, this trail has long since been forgotten. Just below may be seen the road over which the travel worn emigrant gained the summit of the Sierra Nevadas. A view of this ancient and historic path is worth while.

- Reach summit of Sierra mountains (elevation 7,630 ft.) 70.6.

Note wonderful view of valley and Lake Tahoe.

- Avoid right-hand diagonal road 70.9.

Diagonally right at 70.9 leads to Echo lake, 1 mile.

- 73.3 4.8 Phillips (Vade P. O.). Keep ahead.

HOTELS—Phillips Resort, north side of main highway.

- Descend long winding grade 75.9.

Note Lover's Leap over to right 77.7. The legend goes that a young Indian couple leaped from the height of the perpendicular cliff to their death a thousand feet below.

- Pass Strawberry Sta. on right 77.2; Kyburz Sta. on right 88.2; U. S. Forest Service Sta. on left 91.9, and Randall P. O. on left 95.1. Cross stone bridge over American River 97.7.

- 97.9 24.6 Riverton, P. O. on right. Straight thru.

HOTELS—Riverton Resort, on the main highway.

- Pass Bridal Veil Falls on left 101.0.

HOTELS—Pacific House, on right 102.3.

- Thru Camino 113.3. Cross switches at saw mill 113.7.

- 115.2 17.3 Fork, just beyond large barn; keep left. Cross RR 117.6. Thru Smith Flat 118.1.

- 120.2 5.0 Left-hand diagonal road; bear left and immediately right with pavement.

Heather Lake from Desolation Valley, Lake Tahoe, Cal.

- 120.6 0.4 Right-hand road, brick church on left; turn right with pavement.

SUPPLIES—Bowman Auto Supply Co., 11th & Jay Sts.

Note (a) Route 271—Carson City, Nev., to Lakeside Park, Cal.—24.8 m.

Reverse Note (b) on Route 165.

Via Genoa.

This is an option to Route 271, between Carson City and Lakeside park over King bury grade. It is one mile shorter than via Glenbrook, but has steeper grades at somewhat poorer roads.

- 0.0 0.0 CARSON CITY. Go south on Carson St. Pass state capitol on left 0.1.
- 3.0 3.0 Fork; bear right.
Left at 7.4 is Route 288 at mileage 7.4 to Hawthorne and Route 24 at mileage 7.4 to Bridgeport.
- 10.0 7.0 Fork; bear left.
- 12.9 2.9 Genoa. Straight thru. Pass Walleys Hot Springs, Nev., on left 14.6.
- 15.7 2.8 Right-hand road; turn right.
Ascend steady winding grade with some steep places. Reach summit 20.7. (Elevation 7,600 feet.) Keep ahead, going downgrade on steep road with several sandy stretches.
- 23.8 8.1 Fork; bear left.
- 24.8 1.0 LAKESIDE PARK, CAL.

*Placerville, Cal. (pop. 2,100, alt. 1,875 ft.), the capital of Eldorado county, is situated in a hilly country about 50 miles from Sacramento. It is one of the oldest gold mining towns in the west. From Placerville to the summit of the high Sierras, the road winds along the America river and presents an endless panorama of beautiful views, including Lake Tahoe in the distance.

*Folsom, Cal. (pop. 1,800, alt. 180 ft.), is situated on the American river near the junction of its fork, and 22 miles east of Sacramento. It is noted as the place where the first hydroelectric plant for the transmission of electric energy generated by water power in the high Sierras, was established. The plant was a small one on the American river and transmitted the energy to Sacramento.

Note (b) Route 271—Lakeside Park to Meyers, Cal.—9.5 m.

Reverse Note (a) on Route 165.

Via Bijou and Al Tahoe.

This is a good option between the two points. Although a little longer than the direct road, it is used considerably, as it takes the tourist along Lake Tahoe and to the popular summer resorts nearby.

0.0 0.0 LAKESIDE PARK, fork. Bear right (west) along shore of Lake Tahoe.
Left fork is Route 271 to Sacramento.

1.3 1.3 Bijou. Straight thru.
2.3 1.0 4-corners; turn left away from lake.
2.4 0.1 Al Tahoe, 4-corners, tennis court on far right; turn right.
3.0 0.6 End of road; turn left thru gate. Avoid right-hand road 3.4.
Right at 3.4 is Note (c) on Route 271 at mileage 3.4 to Tallac.

Thru gate 4.2.
9.5 6.5 MEYERS, store on left.

Note (c) Route 271—Lakeside Park to The Grove, Cal.—7.2 m.

Reverse Note (b) on Route 274.

Via Al Tahoe. Sandy road along southern shore of Lake Tahoe. A popular option between the two points.

0.0 0.0 LAKESIDE PARK, fork. Keep right (west) along shore of Lake Tahoe.
Left fork is Route 271 to Sacramento.

1.3 1.3 Bijou. Straight thru.
2.3 1.0 4-corners; turn left away from lake.
2.4 0.1 Al Tahoe, 4-corners, tennis court on right; turn right.
3.0 0.6 End of road; turn left thru gate.
3.4 0.4 Right-hand road; turn right. Thru gate 3.7.
Straight ahead before this turn at 3.4 is Note (b) Route 271 at mileage 3.4 to Meyers.
4.8 1.4 Prominent right-hand road; turn right.
5.9 1.1 End of road; turn right.
7.2 1.3 THE GROVE, gas station on right; hotel 0.2 m. to right.
Straight ahead is Route 167 to Truckee.

Route 272—Reno, Nev., to Sacramento, Cal.—145.9 m.

Reverse Route 160.

Via Truckee, Colfax, Auburn and Roseville. Fair to good mountain road to Auburn, concrete and oiled macadam to Sacramento. The road across the mountains is generally better during the early part of the season, before the heavy travel, with its consequent deteriorating effect, destroys the surface. But as a whole the road is in fair shape and good time can be made. Summary: 110 miles mountain road; 36 miles concrete and macadam.

Leaving Reno the road winds along the Truckee river to Verdi, shortly beyond crossing a long grade into the heart of the majestic Sierras. Many views of exceptional beauty are encountered, and camping sites along the numerous streams are plentiful. Gradually leaving the timber zone the route reaches Auburn and traverses rolling foothill country thru a prosperous orchard district to Roseville. The balance is over the great plains of the Sacramento valley. This is a section of the Lincoln highway.

For this and other exits see City Map, page 312.

- 100.9 5.9 Applegate, 3-corners. Bear left. Cross RR 101.3. Pass Lake Theodore on left 103.3. Avoid left-hand road 103.7. Pass Lake Arthur on left 104.4.

*Truckee, Cal. (pop. 1,500, alt. 5,820 ft.), is picturesquely situated on a bend of the Truckee river, where it flows in from the southwest out of Lake Tahoe. Truckee is the site of a large summer recreation camp. The narrow-gauge line of the Lake Tahoe Railway & Transportation Co. runs south from this city, winding thru the narrow canyon of the Truckee river fifteen miles to Lake Tahoe. Lake Independence, 18 miles north, Donner lake, 3 miles west, and the Rocking Stone Tower are other interesting points. At Hobart, 8 miles north, are immense lumber mills. In 1846-47 a band of pioneers, known as the Donner party, perished near Truckee on account of the heavy snow (20 ft. on level). A \$3,500 monument now marks the spot on which they died, erected by the Native Sons of the Golden West. A little beyond the monument may be seen a plain white wooden cross designating their burial place.

*Donner Lake, Cal., located eight miles from Truckee, is one of the most picturesque alpine lakes in California. It is named after the ill-fated Donner party of emigrants, who in the

winter of 1846 were snowbound on its shores, many of them perishing from starvation. A monument has been erected to their memory in the meadow at the east end of the lake.

The altitude of the pass at Summit is 7,018 feet. Surrounding peaks and granite crests tower three thousand feet higher, with deep gorges and mountain lakes between.

*Colfax, Cal. (pop. 700, alt. 2,448 ft.), is in the Bret Harte country and was first known as Illinoistown, but was later renamed for Vice-president Colfax. The Central Pacific railway, built up from Sacramento, reached Colfax September 1, 1865. The town today has a large amount of traffic from the overland trains, and is connected with the near-by and important mining districts of Grass Valley and Nevada City by a narrow gauge railroad. The town itself is an odd mixture of the flimsy structures of mining days with the solid buildings of the modern railroad junction. The road from Colfax to Grass Valley lies through a country of exceeding loveliness. A few miles west is "Rough and Ready," the locale of "A Millionaire of Rough and Ready," by Bret Harte.

- 106.8 5.9 Left-hand road; bear left across RRs.

SUPPLIES—Bowman Auto Supply Co., 11th & Jay Sts.

*Rocklin, Cal. (pop. 1,000, alt. 249 ft.), is 22 miles northeast of Sacramento. It has large granite quarries and is the scene of the enterprises of J. Parker Whitney, the owner of the Spring Valley ranch of 20,000 acres, so well known as a leading California fruit grower and fine stock breeder. Fine medicinal springs are found within the town limits. Here the Indians gathered each year to partake of the healing waters. Near by is an

old Indian burying ground, and innumerable holes may be noted in granite boulders in the vicinity of Rocklin, where the red man ground his acorns to make bread.

*Roseville, Cal. (pop. 4,000, alt. 200 ft.), in Placer county, is a fruit packing center 18 miles northeast of Sacramento. It is the southern terminus of the line from Shasta through Tehama and Marysville to Sacramento. The town has brick kilns and foundries and is a grain shipping point.

THE FREEMAN HOTEL

AUBURN CALIFORNIA

AMERICAN PLAN. Every Modern Convenience; Steam Heated; Hot and Cold Water; Long Distance Phone. Free Bus. We Cater Especially to Automobile Trade.
FIREPROOF GARAGE IN CONNECTION—FREE TO TOURISTS—Walsh Bros., Props.

Route 273—Reno, Nev., to Beckwith, Cal.—53.5 m.

Reverse Route 193.

Via Verdi and Loyalton. Good graded gravel to Verdi, fair to good mountain road to Loyalton, good dirt across Sierra valley to Beckwith. This latter part will be found difficult during wet weather. Summary: 10 miles good gravel; 26 miles fair-good gravelly mountain road; 17 miles graded dirt.

Leaving Reno the route follows an irrigated valley along Truckee river to Verdi then traverses a timbered, mountainous region with many pretty spots for fishing and camping to Loyalton. From here on to Beckwith the road leads across the Sierra valley, devoted to farming and cattle raising.

Route 279 offers a shorter option to Beckwith, but leads mostly thru an uninteresting, hilly sage brush country. It also crosses the mountains on lower altitude and consequently is open the year around while the route here given is only passable during the summer months.

For this and other exits see City Map, page 312.

Route 274—Truckee to Sacramento, Cal.—152.8 m.

Reverse Route 167.

Via west shore of Lake Tahoe, Meyers, Placerville and Folsom. Good mountain road with no serious grades to Placerville, concrete highway to Folsom; balance macadam. Summary: 100 miles good mountain road; 31 miles concrete; 22 miles macadam.

An easy one hour drive thru a picturesque canyon along Truckee river brings the tourist to the shore of Lake Tahoe, a wonderful body of water 23 miles long, 13 miles wide and an altitude of 6,240 ft. Around the lake is a chain of towering mountains, whose crests are covered by eternal snow. There are numerous smaller lakes of almost equal beauty nestled in close vicinity. All classes of accommodations are to be had in the many hotel resorts located near the lakes.

Leaving the south end of the lake and traversing a level valley for several miles the road ascends a winding and in places rather steep grade to the summit of Sierra mountains (altitude 7,630 ft.). Wonderful scenery will be encountered along the American river canyon, which is followed all the way to Placerville. This is a section of the Lincoln highway.

 Left at this turn is Route 194 to Sacramento.

*Grass Valley, Cal. (pop. 4,525, alt. 2,500 ft.), in the Bret Harte country, is a health resort of Nevada county and an important gold mining center. The mines of this district produce about \$3,000,000 each year. One mine has been working continuously since 1850. It was as-

serted that gold was found even in the roots of the grass. Today the mines are all underground. The quartz veins are deep and rich. Grass Valley received its name from the meadow in which the town is situated and which is so moist that even in the dry season the grass is always a beautiful green.

The Easy Way to Use the Blue Book

Many users of the Blue Book lose one-half of the pleasure of traveling by not studying thoroughly "HOW TO USE THE BLUE BOOK" found in front of the book. Are you getting all the information this book contains?

*Marysville, Cal. (pop. 7,000, alt. 67 ft.), named after Mary Coviland, the first white woman and a descendant of the ill-fated Donner party, is one of the oldest towns of mining days, founded because it was at the head of navigation on the Feather river, one of the richest gold-bearing streams up which boats could come from San Francisco by way of the Sacramento. Steamers still ply regularly to Sacramento. Yuba City is just across the river and the two really form one city. Seven miles of levees constructed in 1875, to protect the two cities from floods, have never had a break. Both cities are towns of '49, but today the mines have sunk to secondary importance, agriculture and horticulture being the leading industries. In mining days Marysville ranked next to San Francisco and Sacramento in importance and in the volume of business transacted. In old mining days, too, Marysville was the jollification gathering place for the miners from every quarter, and it was also the storm center of the trouble between the farmers of the valley and the hydraulic miners. The old town is still so much in evidence that the general effect produced is one of age.

*Sierra City, Cal. (pop. 650), is in the Sierra Nevada mountains, about 100 miles northeast

of Sacramento. The word "Sierra" is Spanish for "saw," and was applied to the mountains in allusion to the series of regular peaks presenting the appearance of the teeth of a saw. "Nevada" signifies "snowy."

*Downieville, Cal. (pop. 500, alt. 2,530 ft.), the county seat of Sierra county, is situated on the North Yuba river about 76 miles in a direct line northeast of Sacramento. Gold has been mined in the vicinity. Sierra county was the scene of Bret Harte's "Outcasts of Poker Flat," the final test of his genius. There is good grouse, deer and bear hunting in the vicinity. The town was laid out in 1849 by James Vineyard, one of the party of Major Downie which had reached this point some months before and stopped here for prospecting. In 1853 the town was entirely destroyed by fire, but was at once rebuilt. Two days after the fire, one McNulty opened the St. Charles hotel. On Washington's birthday of that year he took in for meals alone \$2,600. The town has had a number of eminent men as residents, among them Col. Joseph McKibben; Col. E. D. Baker, the great orator from Illinois, who fell at Edwards Ferry on the Potomac river; John Mackey, the millionaire, and J. Neely Johnson, Governor of California.

*Susanville, Cal. (pop. 700, alt. 4,195 ft.), is situated in the foothills at the entrance to Susan river canyon. The town is well built with brick and stone structures and is the center of much activity. Good trout fishing can be had in the Susan river, which winds for twenty miles through its timbered and rugged canyon. Twelve miles to the north lies Eagle lake, a beautiful body of water, twenty-five miles long by five miles wide,

alive with trout and black bass. This lake is reached by a good auto road.

*Lake Independence, Cal., nestles among the pine-clad mountains of Nevada county, California, 16 miles from Truckee, and is reached by a picturesque mountain road running thru magnificent forests of pine, fir and tamarack. It is located inside the Tahoe national forest reserve. Aside from the beauties of nature, the greatest attraction at Independence lake is the trout fishing.

- 116.8 0.4 Fork; bear left. Cross bridge 117.5 and RR 117.7.

*Quincy, Cal. (pop. 1,000, alt. 3,400 ft.), is 85 miles north of Marysville. It is a delightful little town known to sportsmen for the grouse, deer and bear hunting of its neighboring forests and for its winter sports. It is a mecca of the botanist, for it is the habitat of the "Darlingtonia," or pitcher plants, a special and uncommon variety of which bears the state's name.

Quincy was laid out by H. J. Bradley of Quincy, Ill., and named by him in honor of his previous residence. As an inducement to the people to locate the county seat there, in 1854 he built and tendered to the county free of charge a rude shack building in the rear of this hotel. This building was used as a court room, and the other county offices found house room where they could. At the next election Quincy was formally made the county seat.

Note (a) Route 278—Option from Mileage 22.0 to Sierraville, Cal.—4.8 m.
Reverse Note (a) on Route 190.

Via Campbell Hot Springs. The following note gives an option on Route 278 to Sierraville.

- 22.0 22.0 Fork; bear right. Descend grade 23.0.
Left fork 22.0 downgrade is Route 278 to Sierraville.
- 25.0 3.0 Campbell Hot Springs. Straight thru.
- 25.8 0.8 End of road; turn left.
- 26.8 1.0 SIERRAVILLE, 4-corners.
Straight ahead is Route 278 to Susanville.

Route 279—Reno, Nev., to Quincy, Cal.—88.5 m.

Reverse Route 191.

Via Vinton, Beckwith and Mohawk. Fair-to-good gravelly dirt road with some sandy stretches between Vinton and Beckwith.

Leaving Reno the route traverses an open, hilly sage brush country, crosses the state line into California near Reno Junction and enters the great Sierra valley shortly beyond Chilcoot. Following same for many miles along its northern border it descends a long winding grade thru Beckwith pass and reaches Clo at the foot of same. From here on to Quincy the road follows the Feather river canyon on rolling grades thru a scenic, timbered mountain country. This is a section of the Pike's Peak Ocean-to-Ocean highway.

During the summer months a very good option may be had by using Route 273 to Beckwith via Verdi and Loyalton.

 tains.
 49.4 5.5 Portola, fork. Bear right and immediately right at 3-corners
 just beyond.
 Left fork across RR leads to business district, 0.2 mile.
 51.2 1.8 Fork at large lumber camp; bear left across switches.
 53.2 2.0 Prominent fork; bear left. Descend long winding grade 55.9.
 Under high RR bridge 57.5. Avoid right-hand road 58.5.
 58.8 5.6 Clio, left-hand road, water tank ahead on right. Turn left.
 59.0 0.2 3-corners, just beyond wooden bridge over Feather river;
 bear right. Caution for timber chute crossing 61.9.
 62.3 3.3 3-corners; bear left.
 63.4 1.1 Mohawk, right-hand road, P. O. and store on left. Turn right.
 HOTELS—Mohawk Hotel, 0.1 mile east of P. O.
 63.9 0.5 End of road; turn left. Cross RR 64.4. Thru 4-corners 70.4.
 Cross RR just beyond small iron bridge 72.7.
 72.8 8.9 Fork; bear left with travel. Thru Spring Garden 77.5. Avoid
 left-hand road 77.6. Cross RR 79.2.
 81.8 9.0 End of road; turn left.
 85.9 4.1 Fork; bear right along RR. Avoid right-hand road 86.4. Cross
 RR 87.9—now on Main St.
 88.5 2.6 GINCY,* Main & Court Sts., court house on left.
 GARAGES—Sierra Auto Supply Co.
 Straight ahead on Main St. is Route 192 to Marysville.

*Quincy, Cal. (pop. 1,000, alt. 3,400 ft.), is 85 miles north of Marysville. It is a delightful little town known to sportsmen for the grouse, deer and bear hunting of its neighboring forests and for its winter sports. It is the mecca of the botanist, for it is the habitat of the "Darlingtonia," or pitcher plants, a special and uncommon variety of which bears the state's name.

Quincy was laid out by H. J. Bradley of Quincy, Ill., and named by him in honor of his previous residence. As an inducement to the people to locate the county seat there, in 1854 he built and tendered to the county free of charge a rude shack building in the rear of this hotel. This building was used as a court room, and the other county offices found house room where they could. At the next election Quincy was formally made the county seat.

For street maps shown of principal cities, page numbers will be found in General Index—front of book.

*Susanville, Cal. (pop. 700, alt. 4,195 ft.), is situated in the foothills at the entrance to Susan river canyon. The town is well built with brick and stone structures and is the center of much activity. Good trout fishing can be had in the Susan river, which winds

for twenty miles through its timbered and rugged canyon. Twelve miles to the north lies Eagle lake, a beautiful body of water, twenty-five miles long by five miles wide, alive with trout and black bass. This lake is reached by a good auto road.

From every issue of MOTOR LIFE you can learn something new about economical motor car operation. See Motor Life colored insert.

Route 288—Carson City to Hawthorne, Nev.—113.7 m.

Reverse Route 689.

Via Wellington, Fletcher Ranch and Lucky Boy grade. Natural prairie all the way. The 3-mile Lucky Boy grade, while somewhat steep in spots, abounds in sharp curves which call for cautious driving—it is good, solid surface, mostly gravel all the way, with numerous passing points. Water and supply stations are frequent all along the route and it is an excellent connection between the Lincoln highway and the Midland trail.

 Pass abandoned mining camp at foot of grade 108.7. Avoid
 right-hand diagonal road at slaughter house, left-hand diag-
 onal road just beyond 113.1. Keep ahead.
- 113.7 8.1 HAWTHORNE,* at town square.

*Gardnerville, Nev. (pop. 500, alt. 4,800 ft.), located in the heart of the famed Carson valley, was a favorite resting place of the daring scout, Kit Carson. Good roads lead over the mountains to Lake Tahoe, Yosemite valley, Tonopah and Goldfield and to Wallers-springs, where the great baths of western Nevada are located. Fremont in his historic trip across the Sierras stopped here for several weeks to place his men and stock in

proper condition for the perilous trip. A half a century later, Gardner, for whom the town was named, built his very modest hotel and blacksmith shop on the very site of Fremont's camp to care for the overland traveler and around it sprung up the present little city.

*Hawthorne, Nev. (pop. 600), was built about 35 years ago as a division point on the old Carson and Colorado R. R. It is four miles from Walker lake, a popular recreation point.

Are you using the BLUE BOOK intelligently? It is simple.
 Read how on pages 12 and 13.

Route 290—Hawthorne to Tonopah, Nev.—94.8 m.

Reverse Route 688.

Via Sodaville and Millers. Natural prairie road with the exception of about 7 miles of rough rock east of Sodaville, where route follows dry wash up long grade over divide. There are no stopping places between Sodaville and Millers, and only one spring providing water, so tourist should arrange supplies accordingly.

| MILEAGE | Distance | Points |
|---------|----------|--|

- 31.9 11.4 Fork; bear left. Pass Mtn. House, Nev., on right 35.1.
- 36.0 4.1 Prominent fork; bear right.
 Left fork is Route 288 at mileage 36.0 to Hawthorne.

*Tonopah, Nev. (pop. 5,000, alt. 6,100 ft.), the county seat of Nye county, is queen of the mining camps that dot the map of the great southwest. One hundred million dollars has thus far been blasted from out the Tonopah mines, and, to all appearance, only a fair start has been made. Here, where fifteen short years ago the horned toad and the coyote held full sway, stands today a forest of giant steel gallow frames, a great foundry, and machine shops, and, clinging to the hillsides, several thundering stamp-mills. Withal, Tonopah is a modern and up-to-date city, offering every convenience of a metropolis to the tourist. It is a radiating center for some of the finest natural roads in the west.

*Gardnerville, Nev. (pop. 500, alt. 4,800 ft.), located in the heart of the famed Carson valley, was a favorite resting place of the daring scout, Kit Carson. Good roads lead over the mountains to Lake Tahoe, Yosemite valley, Tonopah and Goldfield and to Wallersprings, where the great baths of western Nevada are located. Fremont in his historic trip across the Sierras stopped here for several weeks to place his men and stock in proper condition for the perilous trip. A half a century later, Gardner, for whom the town was named, built his very modest hotel and blacksmith shop on the very site of Fremont's camp to care for the overland traveler and around it sprung up the present little city.

- Pass alkali lake on left 41.4. Avoid left-hand road 45.7. Thru Coleville, Cal., 49.1.
- 51.4 15.4 8-corners; bear left along foot of hills. Enter Walker river canyon 54.7. Cross bridge over Walker river 65.2, leaving canyon and coming into open hilly sage brush country. Re-cross bridges over river 66.0. Avoid right-hand road at Blackburn Ranch 68.1.
- Right at 68.1 leads to Sonora pass.
Pass Fales Hot Springs on right 71.5.

Left fork picks up Route 296 at 26.5 to Bridgeport at school just beyond.
Avoid left-hand diagonal road 24.6 and right-hand diagonal road 24.9. Thru Fredericksburg, Cal., 26.6. Avoid left-hand road 28.1.
- 31.8 7.9 **WOODFORDS**.
Straight ahead is Route 418 to Truckee.

Route 294—Bridgeport to Bigpine, Cal.—122.7 m.

Reverse Route 415.

Via Mono Lake and Bishop. Fair-to-poor, sandy road first 47 miles, then 35 miles of good natural gravelly sand, followed by 12 miles of gravel highway; balance (28 miles) fair dirt.

A new road was under construction from Mono Lake extending south for 18 miles. This work will probably be completed for the 1920 travel. Grading of a new road was also in progress thru Round valley, paralleling the old road most of the way, and some slight discrepancies in mileage may be encountered in the following running directions.

The route parallels the Sierra Nevadas at an altitude varying between 6 and 8 thousand feet in the mountainous regions and dropping down to 4,400 feet into Owens valley. The trip presents a magnificent panorama of mountain scenery and many features of geological interest. Mono lake, altitude 6,428 feet in 1908, has no outlet and its level is steadily rising. There is no life in its waters, but large numbers of seagulls nest on the islands. Near the lake are a number of volcanic craters. Casa

- 104.6 4.5 Bishop,* irregular 4-corners, bank on far right.
GARAGES—Watterson Bros. Garage, Main & Academy Sts.

*Bishop, Cal. (pop. 1,500, alt. 4,347 ft.), is situated in a fine fruit growing region at the foot of the eastern slope of the Sierra Nevada mountains about 40 miles north of Independence. Not far distant is Bishop creek, a tributary of the Owens river. This creek is 14 miles long and in this distance falls 5,500 feet, or nearly 400 feet to the mile, flowing between canyon walls whose average height is 1,000 feet. The water of this creek is used seven different times for electric generating stations at different elevations, driving them "tandem." Two reservoirs surrounded by almost vertical cliffs nestle at the heads of canyons. To secure perfect regulation of flow and to prevent ice or snow from clogging or injuring the machinery the water is carried in pipes from the reservoirs to the seventh station. The highest of the stations is situated at an elevation of 8,000 feet, nearly 1,000 feet higher than Mount Washington, the highest mountain of the eastern states. After generating power at 8,000 feet, the water drops to 7,112 feet, turning the gener-

ators there, and then successively the generators at 6,276 feet, 5,156 feet, 4,730 feet and 4,460 feet. The power is transmitted upon aluminum wires carried on towers for 250 miles southward over hills and plains to the Mohave desert and thence to San Bernardino, Riverside and the Perris valley, and is being extended through the Coachella Valley, over the Colorado desert into the Imperial valley. Near Bishop on the north are geysers and hot springs.

Several companies are operating plants for the treatment of tungsten ore on a scale of such magnitude and with mines so extensive as to prestage the possibility of Bishop becoming one of the chief tungsten producing centers of the U. S. A considerable number of silver, lead and zinc mines are likewise more or less allied with the business interests of the town.

El Camino Sierra, the state highway that commands the passes of the Sierras and is part of the proposed National Defense highway system for the Pacific coast, passes thru Bishop.

Route 295—Bridgeport to Yosemite National Park, Cal.— 121.1 m.

Reverse Route 322.

Via Mono Lake and Hammond. Dirt to Hammond; some sandy stretches along Mono lake; gravel up the east slope of Tioga pass; balance dirt with the exception of the last four miles in Yosemite valley, which are gravel.

Shortly after leaving the shores of Mono lake, the route enters Leevining canyon, which soon becomes a deep, rugged gorge. Following the gorge on a long, steady climb, scenes of unsurpassed grandeur, including rushing torrents, snow-clad peaks, waterfalls and beautiful mountain lakes, are in constant view. At the summit, now 9,941 ft. above sea level, we enter Yosemite National park. The route follows along lakes and streams, winding up and down thru timber covered mountains and finally reaches the rim of the Yosemite valley. Dropping down a four mile grade, with countless views of Yosemite's grandeur, the floor of the valley is reached.

Via Fredericksburg and Genoa. Gravel all the way, with some sandy stretches. This is an option to Route 296.

Lake Tahoe Detail Map, page 314.

- 0.0 0.0 WOODFORDS. Go northeast on the main road. Avoid right-hand road 3.7. Thru Fredericksburg, Cal., 5.0.
- 7.8 7.8 Fork, signs in center; bear left.
Right is Route 296 to Bridgeport.

*Mono National Forest, Cal., lies entirely on the east slope of the Sierra Nevada mountains. Its western boundary is the summit of the range, its southern extremity is the divide between the Owens river basin and the Mono river basin. The northern boundary is a line running southeast of Lake Tahoe, and the eastern boundary lies in the dry pinon covered hills of western Nevada. It measures about 140 miles in length and 35 in width. Contiguous to it are the Yosemite national park and the Stanislaus, Eldorado, Sierra and Inyo national forests.

The Mono National Forest was formed by executive order of President Roosevelt in 1908. It is, for the greater part, mountainous and high, broken with wooded canyons containing cold, clear streams, large meadows and numerous small lakes. It is picturesque and scenic. Among its higher peaks are Mt. Lyell, 13,090 ft., and Mt. Dana, 13,030 ft. Mt. Dana possesses a great glacier. East of Tioga Pass, the Sawtooth ridge is particularly interesting because of its four glaciers, just west of Bridgeport.

While as a whole the climate of the forest is equable, summer travelers and campers should be prepared for rigorous weather conditions, especially those contemplating trips away from the regular stopping places.

Practically all the streams and lakes in the forest are well stocked with trout. Deer, bear, grouse, sage hen and mountain quail are found within the forest, but they are not abundant. There are no restrictions enforced

with regard to hunting or fishing except those contained in the regular fish and game laws of the state.

Forest officers will gladly give current information as it is available regarding fishing and hunting conditions, and sportsmen are requested to report conditions for the benefit of others.

A campers' register is kept at the headquarters of the forest supervisor at Gardnerville and travelers are requested to enter their names, addresses and intended routes.

Application may be made to any forest officer for the renting of permanent camps, summer homes or resort sites. Copies of maps and other data pertaining to the forest will also be furnished upon request.

Two tribes of Indians, the Piutes and Washoes, are found in the vicinity of Mono forest—the Piutes to the south and the Washoes to the north. In former years the tribes kept closely to their own territory, but now they intermingle.

Mono lake has long been of scientific interest in that it contains no outlet and its level is steadily rising. Its waters are impregnated with mineral and contain no living thing other than a minute crustacean found in immense numbers. About its shores are a number of volcanic craters.

The Mono forest region was first explored by John C. Fremont and Kit Carson in 1844. Some of their camping places are marked by appropriate signs placed by the Forest Service.

Automobilists are requested to observe the state automobile laws while in the forest.

- 11.1 3.3 Sheridan, Nev., P. O. on left. Straight thru. Avoid right-hand roads 11.8-12.9.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attaché to the office of the first territorial secretary, and the old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city—and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found footprints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

*Sparks, Nev. (pop. 3,500, alt. 4,225 ft.), is a city of Washoe county, 3 miles east of Reno on the Truckee river. It is the seat of Nevada state university and of the state asylum for mental diseases. There are mines in the vicinity. The town was named in honor of John Sparks, governor of Nevada, 1903-1906, and is the second city in population in the state. Trains make a stop of 15-20 minutes at the repair shops here, where a huge mountain-climbing locomotive is substituted for the ordinary type.

- 67.3 1.5 FALLON,* Williams Ave. & Main St., court house on left.

*Wadsworth, Nev. (pop. 800, alt. 4,077 ft.), is situated on the Truckee river 34 miles east of Reno. It is in a mining region. It is an old town and was one of the important stations on the original route of the Central Pacific, but the railroad now curves south of the town to secure a more even grade on the westward climb. Wadsworth was at one time a trading post and served as an Indian agency and fort.

The Truckee river, named in honor of an Indian guide of General Fremont, makes a bend to the north at Wadsworth and flows through a canyon for 20 miles to Pyramid and Winnemucca lakes, where its waters were formerly evaporated. Now by the government irrigation project (See Fallon) they are turned into the reservoirs of the Carson river and used for irrigating the lands. Fishing in Pyramid lake is excellent. Three varieties of trout are caught here, some of which attain a weight of 30 pounds. At the mouth of the river is a reservation of the Piute tribe.

*Fallon, Nev. (pop. 741), is in the heart of Carson valley, 15 miles from Hazen, and is situated on a low, broad alluvial fan of Carson river. It is the headquarters of the Truckee-Carson irrigation project. This was the first of such projects undertaken by the United States government. The water is obtained from the Carson and Truckee rivers, whose

waters run to waste in the early summer, being lost in inland lakes or sinks by evaporation. The waters of the Truckee are brought over to divide at Fernley by means of a large canal and turned into a huge reservoir on the Carson river. The present constructed reservoirs on the project have a total of 650,000 acre feet. An acre foot is the amount of water necessary to cover an acre of land one foot deep. The area to be irrigated comprises 250,000 acres on the western rim of the Great Basin in the bed of the ancient and now extinct Lake Lahontan. This is one of the driest sections in the United States and was called the "Forty-mile Desert" by the early emigrants who crossed it on their way to California.

To the uninitiated the valley appears utterly desolate, but it has all the potential resources of the country around Boise, Idaho, or that about Greeley, Colo. The soil is a sandy loam, clay loam, or volcanic ash, and will produce every variety of crop known to the north temperate zone. Potatoes and celery and cantaloupes raised here are of superior quality and are shipped for consumption on dining cars. Considerable areas here yet remain to be taken up by settlers. The maximum claim allowed is 80 acres. The government has established an experiment farm near Fallon.

STEAMSHIP LINES and FERRIES
WITH RATES AND SAILING SCHEDULES - SEE BACK OF THIS VOLUME

Route 300—Fallon to Austin, Nev.—117.3 m.

Reverse Route 672.

Via Salt Wells, Sand Springs and Frenchman's. Good, sandy dirt to Sand Springs, most of it graded and in dry weather in very good condition; balance principally fair-to-good natural prairie road. In the hills road conditions are generally better than on the flats.

Leaving Fallon we cross a well developed and productive irrigated district for seven miles. The balance is over a barren, uninhabited sage brush country. Water is scarce and supply should be replenished at every opportunity. Good meals, accommodations and supplies are found at Salt Wells and Frenchman's.

| 0.0 | 0.0 | EUREKA, court house on far right. Go southeast. |

* Austin, Nev. (pop. 700, alt. 6,594 ft.), is interesting as being typical of what is now popularly known as "Ghost Cities of the West." The westbound tourist first catches a glimpse of Austin from the lofty summit of the Toiyabe range, a patch of pleasant green nestled in an otherwise desolate and narrow canyon, with a wide expanse of desert valley and the Mt. Airy range beyond. From the summit the road descends on what was for-

merly the old overland trail of the Pony express riders, now a well-built, safe government road. The discovery of ore was made by one of the Pony Express riders accidentally in 1862, and the camp has since produced 50,000,000 dollars in silver-bullion. The numerous ore dumps on either side of the road represent the failures and successes of thousands of people from the time of the original discovery down to the present day.

- 0.4 0.4 Fork; bear left upgrade. Avoid right-hand road at abandoned brick house 0.7.
- 3.6 3.2 Fork; keep right upgrade. Pass Pinto House on right 7.2.
- 9.9 6.3 Fork; keep left and at fork just beyond bear left around ledge of rocks.
- 14.0 4.1 Right-hand road, abandoned ranch on right; turn right.
- 23.7 9.7 Fork; bear left across range of hills. Pass Six-Mile Ranch on right 33.9.
- 35.0 11.3 Fork; bear right with one-wire phone line.
- 36.5 1.5 Fork; bear right. Ascend winding grade thru canyon 37.3.
- 39.8 3.3 **Hamilton**, left-hand road at outskirts. Turn left upgrade.
Straight ahead before this turn leads to center of town, $\frac{1}{2}$ mile, where supplies and meals can be obtained.
Pass spring on right at foot of grade 47.5.
- 54.3 14.5 Right-hand road at fence corner; turn right. Ascend winding grade 64.1.
- 72.9 18.6 End of road, sign on right; turn sharp left. Avoid right-hand road 75.3. Cross RR 75.8.
- 75.9 3.0 **Kimberly**, fork, large mine on left. Bear left.
Right fork leads to center of town.
Curve left thru slag flat 76.7.
- 77.3 1.4 Fork; keep left. Cross RR 79.9, curving right just beyond. Caution for dangerous RR crossing 80.8. Cross RRs 81.0-81.1-82.1-83.3-83.6-84.4. Jog left and right, going under RR 84.7. Same thoroughfare becomes Aultman St.
- 85.1 7.8 **ELY**,* Aultman & Murry Sts.

HOTELS—Northern Hotel, corner Aultman & Murray.

GARAGES—Lincoln Highway Garage Co., on Aultman St.

Route 303—Ely, Nev., to Gold Hill, Utah—110.5 m.

Reverse Route 668.

Via McGill and Ibapah. Fine gravel highway to McGill, good natural prairie road to Tippet Ranch; balance fair with considerable stretches of rough surface. Summary: 15 miles fine gravel highway; 55 miles good natural prairie road; 40 miles fair to poor.

This route traverses a sparsely settled hilly prairie country and one grade of considerable length and steepness is encountered while crossing Shelbourne pass. The roadway here is wide enough to pass almost any place and the surface is in good condition. Meals and supplies may be had at frequent intervals and a good stopping place is found at Ibapah.

- 17.6 3.4 Left-hand diagonal road; bear left, following good road across long valley.
- 22.2 4.6 Fork; bear left with travel. Pass Magnuson Ranch on left

*Ely, Nev. (pop. 2,075, alt. 6,000 ft.), is practically the only large town between Salt Lake City and Reno on the Lincoln highway. It is one of the greatest mining centers in the country today, containing large deposits of copper, gold and silver. The largest copper pit in the world is located here and is well worth a visit from the tourist. A splendid free camping ground with light, water, grids for cooking and shower baths is maintained by the city for use of the tourist.

The wonderful piece of road work encountered out of Ely shows the eastern tourist what can be done by a few enterprising western men. Practically all of the road work on the Lincoln highway in Nevada is due to the efforts of Mr. G. S. Hoag, of Ely, and his associates. The tourist is advised while in Ely to call upon Mr. Hoag, who will cheerfully give him reliable information concerning any changes which have been made in the route since Blue Book representative covered it.

- 31.6. Avoid right-hand diagonal road 33.1.
- 37.8 15.6 Fork; bear right. Thru 4-corners 38.5.

 Straight ahead is Route 663A to St. George.

Route 305—Gold Hill to Salt Lake City, Utah—147.8 m.

Reverse Route 665.

Via new cut-off across American desert, Orr's Ranch, Johnson pass, St. John and Tooele. First 14 miles good natural prairie road, then 18 miles of new highway across Salt basin, followed by 22 miles of good dirt; 18 miles of poor road to Orr's Ranch; good gravel to Magna, with the possible exception of a few miles of uncompleted highway just beyond Johnson pass; concrete from Magna to Salt Lake City. Summary: 68 miles good gravel; 36 miles fair to good natural prairie road; 26 miles poor road; 18 miles concrete.

The first 90 miles of this route are over an uninhabited desolate prairie and desert country, Orr's Ranch being the only habitation on this stretch; last 60 miles are thru a densely settled agricultural section of Utah. As one descends from the range adjacent to Gold Hill, no grander view can be imagined than the one confronting the tourist on a clear day. In the foreground one may follow the new highway stretching out toward the treeless plains and 20 miles to the east the Granite mountains can be plainly seen. It is 72 miles from Gold Hill to Orr's Ranch, the first habitation. Here good meals and accommodations may be had. It is always safe to fill gas tank to capacity before leaving Gold Hill instead of relying on gas at Orr's Ranch. Carry plenty of water, as none is obtainable until Orr's Ranch is reached.

Since the completion of an 18-mile stretch of gravel highway across the Salt basin of the Great American desert and the opening of Johnson pass, the Lincoln highway between Ely to Salt Lake City has been shortened by over 30 miles and the poor road near Fish Springs forever eliminated. More work is contemplated for the improvement of the Lincoln highway on this section, but it is very probable that for the 1920 season travel will go over the route here given.

A number of roads in this vicinity, including several of the main highways, will be closed for construction and repair work during the coming year. It being impossible for us to determine at the present time just which roads will be included in this construction work, we advise tourists to call upon Mr. W. D. Rishel, Secretary of the Utah Automobile Club, Commercial Club Building, Exchange Pl., opposite P. O., Salt Lake City, for the most recent information.

Route 306—Orr's Ranch to Salt Lake City, Utah—88.7 m.

Reverse Route 666.

Via Iosepa, Grantsville and Garfield. This is a section of the Lincoln highway. The first 50 miles is across the Great American desert and is impassable in wet weather. The road is only fair in dry weather. There is no water fit for drinking purposes after leaving Orr's Ranch, so the tourist is cautioned to take on full supplies before starting.

From Grantsville graded gravel and concrete is followed all the way to Salt Lake City.

Route 305 offers a better option.

*Elko, Nev. (pop. 3,000, alt. 5,063 ft.), was settled by George F. Paddleford in December, 1868, and is an important mining, agricultural and stockraising center. The origin of the name is uncertain, but it is generally supposed to have been given on account of the large number of elk formerly found in this vicinity. The hot springs one and one-half miles west of the town were a favorite camping station on the old overland emigrant route, but the present town originated with the coming of the railroad in 1868. The railroad passes through the older part of the

town, which is built on the flood plain. The newer part forms the residence district and is located on the terrace north of the river. Agriculture and stockraising are the chief industries. A stage line runs from Elko to Tuscarora, a mining camp 50 miles north. Lone Mountain, another mining camp, is 28 miles north of Elko. At the hot springs west of the town there is a hotel with bath houses. There are several Indian reservations in Nevada and Indians may usually be seen around Elko. They are remnants of the Piutes, Shoshones, and other tribes.

Green's Ranch 12.0 and Cordano's Ranch 14.2. (Indian Ranch lies one mile to left 18.7.)

- 19.1 19.0 Fork; bear right. Cross RR 25.6.

 82.5 13.9 Fork; bear right.
 In wet weather keep left at this fork on main traveled road to Cobre. Thru ranch 83.2. Meet N. N. RR 86.7 and follow on left of same.
 94.9 12.4 COBRE.

Route 312—Reno to Lovelocks, Nev.—97.6 m.

Reverse Route 695.

Via Sparks and Wadsworth. 60 miles of this trip are over an old RR grade with good gravel surface; 37 miles fair to good natural prairie road, with some stretches of deep sand just east of Wadsworth. The worst places are usually kept strawed and no difficulties should be encountered.

This route follows the Lincoln highway to Wadsworth thru a partly irrigated valley along the Truckee river. Just east of Wadsworth the road branches. The left-hand road is the route here given and is known as the Overland trail, being also part of the Pikes Peak Ocean-to-Ocean highway. The right-hand road is the Lincoln highway to Fallon, Ely and Salt Lake. Shortly beyond Wadsworth this route enters a barren, desolate country and no habitations or water are encountered until the route enters the irrigated district adjacent to Lovelocks.

 34.3 0.4 Wadsworth,* P. O. on right. Keep ahead along RR.
 GARAGES—Wadsworth Garage, on south side of highway.

*Sparks, Nev. (pop. 3,500, alt. 4,225 ft.), is a city of Washoe county, 3 miles east of Reno on the Truckee river. It is the seat of Nevada state university and of the state asylum for mental diseases. There are mines in the vicinity. The town was named in honor of John Sparks, governor of Nevada, 1903-1906, and is the second city in population in the state. Trains make a stop of 15-20 minutes at the repair shops here, where a huge mountain-climbing locomotive is substituted for the ordinary type.

*Wadsworth, Nev. (pop. 800, alt. 4,077 ft.), is situated on the Truckee river 34 miles, east of Reno. It is in a mining region. It is an old town and was one of the important stations on the original route of the Central Pacific,

but the railroad now curves south of the town to secure a more even grade on the westward climb. Wadsworth was at one time a trading post and served as an Indian agency and fort.

The Truckee river, named in honor of an Indian guide of General Fremont, makes a bend to the north at Wadsworth and flows through a canyon for 20 miles to Pyramid and Winnemucca lakes, where its waters were formerly evaporated. Now by the government irrigation project (See Fallon) they are turned into the reservoirs of the Carson river and used for irrigating the lands. Fishing in Pyramid lake is excellent. Three varieties of trout are caught here, some of which attain a weight of 30 pounds. At the mouth of the river is a reservation of the Piute tribe.

- 34.4 0.1 End of road; turn left across RR.
 34.6 0.2 4-corners; turn right across wooden bridge over Truckee river.

Route 314—Winnemucca to Elko, Nev.—145.0 m.

Reverse Route 693.

Via Golconda, Battle Mountain and Carlin. Fair, good natural prairie road to Golconda, good gravel over old RR grade to Valmy Sta., poor to Battle Mountain and mostly poor first 40 miles east of that town; balance fair prairie road with some graded stretches approaching Elko. Summary: 27 miles good gravel over old RR grade; 56 miles poor road; 62 miles fair to good natural prairie road.

With the exception of some agricultural districts near Elko, this route crosses a vast sage brush country. Huge valleys are crossed and big mountain ranges are always in sight.

We are advised that a different route than the one here given will be opened between Battle Mountain and Ely for the 1920 travel, which will eliminate the 10-mile stretch of extremely poor road east of Battle Mountain. Tourists are advised to make inquiries at the Battle Mountain Garage, where reliable road information is always obtainable.

*Winnemucca, Nev. (pop. 2,500, alt. 4,347 ft.), is near the Humboldt river, 100 miles in a direct line west of Elko. The town was named for the chief of the Piute tribe of Indians and was originally a small trading station established in 1850 and known as French Ford on the overland emigrant route to California. Before the Oregon Short line was built it was the gateway to the whole of southern Idaho. The town supplies an extensive ranching and mining country including Paradise valley on the northwest and Quinn river valley on the north. The narrow bottoms along the Humboldt produce bountiful crops of wild hay.

North of the town an area 40 miles long from east to west and 8-10 miles wide from north to south is covered with sand dunes. These dunes are 75 feet high with the steeper slopes on the eastern side, which indicates that the whole vast field of sand is slowly moving eastward. The sand is a light creamy yellow and "form beautifully curved ridges and waves covered with a fretwork of ripples and many of the ridges are marked in a most

curious manner by the footprints of animals which form strange hieroglyphics that are sometimes difficult to translate." From Winnemucca a stage line runs to the National mine 70 miles distant in the Santa Rosa range.

*Battle Mountain, Nev. (pop. 1,000, alt. 4,511 ft.), was named from the mountain to the southwest, where in the early sixties a band of gold-seeking emigrants under Captain Pierson fortified themselves when attacked by the Indians. The highest point of the mountain is known as Antler peak. The town is a distributing and shipping point for the Austin, Reese river and other mining districts and the center of an extensive cattle and sheep raising district. Within a 20-mile radius are the producing mining camps of Maysville, Hilltop, Galena, Copper Canyon and Copper Basin. Deposits of lead, copper, silver and gold occur in the mountains on the southwest, and placer gold has been obtained on the south side of the mountain. About \$6,000,000 worth of ore has already been taken from these districts.

*Brigham, Utah (pop. 5,000, alt. 4,305 ft.), is situated at the western base of the Wasatch mountains 20 miles north of Ogden and near the northern shore of Great Salt lake. It is noted for its peaches. In summer the town is almost completely hidden beneath peach trees which grow luxuriantly because every street has its irrigating ditch running the

entire length of the street. Since 1907 Brigham has celebrated "peach day" early in September. On that day free peaches, plums and melons are given to the thousands of visitors to the town. Tomatoes are also grown in large quantities and a factory near the station cans in the height of the season 60-75 cars of tomatoes a day. Brigham was settled in 1853 and named for Brigham Young.

Route 319—Montello, Nev., to Brigham, Utah—149.0 m.

Reverse Route 690A.

Via Tecoma, Lucine, Kelton cut-off and Corinne. This road passable only in dry weather. Fair to good natural prairie road to Kelton; good dirt to Kosmo; fair with some short rough stretches to Blue Creek Sta.; balance good dirt, 20 miles of which are graded.

Traversing a rolling sagebrush country around south edge of Park valley, the road approaches Salt Lake at Kelton, a small settlement on the railroad and also a distributing point for the surrounding country. Leaving Kelton the road traverses the mud flats adjacent to the lake and in dry weather fast speed can be made here. During wet weather this stretch is entirely impassable. Five miles east of Kosmo P. O. the route leaves the Salt Lake basin and crosses several low mountain ranges thru dry farming and partly irrigated country to Brigham. This route is known as the Kelton cut-off. It follows the Overland trail for the first 50 miles, leaving same about 5 miles northeast of Rosebud Ranch.

*Brigham, Utah (pop. 5,000, alt. 4,305 ft.), is situated at the western base of the Wasatch mountains 20 miles north of Ogden and near the northern shore of Great Salt Lake. It is noted for its peaches. In summer the town is almost completely hidden beneath peach trees which grow luxuriantly because every street has its irrigating ditch running the

entire length of the street. Since 1907 Brigham has celebrated "peach day" early in September. On that day free peaches, plums and melons are given to the thousands of visitors to the town. Tomatoes are also grown in large quantities and a factory near the station cans in the height of the season 60-75 cars of tomatoes a day. Brigham was settled in 1853 and named for Brigham Young.

Yosemite National Park

The most celebrated of our national parks, the Yosemite, lies near the crest of the Sierra Nevada Mountains in middle eastern California. This eleven hundred square miles contain scenic features of beauty so unusual and variety so wide that adequate description reads like romance. Few persons know that the Yosemite Valley is only an area of eight square miles in this immense scenic wilderness. It is easily reached by motor from the south or from San Francisco on the east side of the Sierra. Since the completion of the Tioga road, which the government acquired in the spring of 1915, the park is accessible from the east side by way of Mono Lake, this route providing an excellent new road across the Sierra from east to west.

Most motorists will enter the Yosemite National Park by way of the Yosemite Valley. They will stop there a while first and see and enjoy it in comfortable luxury. Let us then consider the valley first and afterwards take a look at the magnificent high Sierra country above its rim.

THE YOSEMITE VALLEY.

Little really need be said of the Yosemite Valley. It has been so celebrated in books and magazines and newspapers that the Three Brothers, El Capitan, Bridalveil Falls, Cathedral Spires, Mirror Lake, Glacier Point and all the rest are old familiar friends, even to millions who have never seen them except in pictures.

No matter what their expectation, most visitors are delightfully astonished upon entering the Yosemite Valley. The sheer immensity of the precipices on either side of the valley's peaceful floor; the loftiness and romantic suggestion of the numerous waterfalls; the majesty of the granite walls, and the unreal, almost fairy qualities of the whole, cannot successfully be imagined.

The exceptional scenic quality of this valley is explained by its geological formation. Once it was simply a shallow, tortuous river canyon. But, in the ages long before man, so rapidly was it cut by the Merced River that the tributary valleys soon remained hanging high on either side. Then the canyon became the bed of a great glacier. It was widened as well as deepened and as a consequence the hanging character of the side valleys was accentuated.

The manner of its making explains the extreme loftiness of the waterfalls, which pour over the rim into the valley. The Yosemite Falls, for instance, drop 1,430 feet in one sheer fall, a height equal to nine Niagara Falls piled one on top of the other. The lower Yosemite Falls, immediately below, has a drop of 320 feet, or two Niagaras more. Vernal Falls has the same height. The Nevada Falls drops 594 feet clear; the celebrated Bridalveil Falls 620, while the Ribbon Falls, highest of all, drops 1,612 feet clear, a straight fall ten times as great as Niagara. Nowhere else in the world may be had a water spectacle such as this. If you wish to see these falls at their greatest, you should go in late May or during the month of June. After that they subside rapidly, but there is no part of the summer, up to the middle of August, when they are all not beautiful.

Nevada Fall

The two most celebrated rocks in the Yosemite Valley are El Capitan and Half Dome. El Capitan rises 3,604 feet sheer above the valley's floor. Its granite is so hard that it resisted the mighty

glaciers. It is a spectacle of remarkable grandeur. Half Dome was once a full dome, but the glaciers undermined its base and half of it split off. It rises 4,892 feet from the valley floor, and is the most popular of Yosemite's gigantic rocks. It suggests a hooded monk. Cathedral Rocks, famous in pictures, rise 2,500 feet clear of the valley; Sentinel Dome, 4,157 feet; Cloud's Rest, 5,964 feet.

Living in the Yosemite National Park is always comfortable and can be made as luxurious as any one desires. A hotel in the valley furnishes every need. A new hotel on Glacier Point, affording magnificent views down into the valley from a height of 3,000 feet, and up the Merced Canyon to the High Sierra in the far distance, is one of the finest stopping places in the world.

Besides these hotels there are two luxurious camps in the valley capable of accommodating thousands at modest prices. These camps have swimming pools and electric lights in each tent; one has log cabins in addition to tents; both set good tables. At distant points; by trail, other camps quite as comfortable, and all equipped with hot and cold baths, make trail traveling a luxury. In the village there are stores carrying everything needful at fair prices. There are adequate parking and garage facilities. Free camp grounds will be assigned by the superintendent, and full camp equipments may be rented on the spot.

ABOVE THE VALLEY'S RIM.

There is little fishing in the Yosemite Valley itself. There is plenty of excellent trout fishing in the rest of the park, however, and the most convenient trip is one from the valley up the Merced Canyon to Merced and Washburn Lakes. It is a ride of sixteen miles on horseback from the valley to Merced Lake. The trail crosses broad granite slopes, covered with glacier polish. At the head of Merced Lake an excellent camp will be found with all conveniences. The fishing is from boats in Merced and Washburn Lakes.

Cathedral Spires

The most striking trip for the motorist, however, is from the valley over the Tioga road above the rim of the valley to Mono Lake and return. Your course lies from the valley out the Big Oak Flat Road, and through the Tuolumne Grove of big trees. Just outside the park limits the Tioga road may be entered. From this point the motorist strikes west and traverses the extreme width of the Yosemite National Park. At Tenaya Lake an excellent and comfortable public camp will be found with good garage facilities. A few miles farther east excellent camp grounds will be found at the Tuolumne Meadows. From here it is a short run to the supreme crest of the Sierra at Tioga Pass and a few miles beyond that lies Mono Lake.

The Tuolumne Meadows is the favorite camping grounds of the celebrated Sierra Club. From this point trails go to many interesting points. It is a starting point for mountain climbers. It is also an advantageous starting point for anglers. The country is high and mountains dotted with glaciers and perpetual snow lies on every hand. The meadows are warm and delightful.

Down the river a short distance from the meadows lies the Grand Canyon of the Tuolumne, which is destined some day to become one of the most celebrated water spectacles in the world. Up to the present time it has been seen by few tourists, because of its inaccessibility, but the opening of the Tioga Road to motors will soon cause it to be visited by hundreds of thousands every year. For some miles the Tuolumne River rushes headlong downward at a sharp inclination through a gorge of extraordinary wildness. There is one ceaseless succession of waterfalls, cascades and stupendous rapids. At a dozen points the river, striking projections across its bed, rises in enormous waterwheels. Of course, this spectacle can only be seen on foot, starting from the camp grounds, as a base, at the Tuolumne Meadow.

Another spot of great interest which may be reached by the motorist in his car is the celebrated Hetch Hetchy Valley, which the city of San Francisco is damming up for a permanent water supply. This valley, which is one of the loveliest in the Sierra, will in a few years turn into an enormous lake. It is well worth seeing, but the road, unlike others in the Yosemite, is poor. An auto trip may also be made to the Mariposa Grove of Big Trees. The Grizzly Giant Tree here is the third largest in the world. The round trip by motor from the valley will require nearly a whole day, but motorists should plan their visit to this grove by entering or leaving the park through the southern entrance.

Wawona Tree

Vernal Fall

The Yosemite Valley was discovered in 1851 by mounted volunteers, who were pursuing marauding Indians into their fastnesses. Because of its extraordinary character and quite exceptional beauty it quickly became celebrated; but it was not until 1874 that a road was built into it. Until then it was approached only by trail. It was not made a national park until 1890.

LEGEND OF MIRROR LAKE AND HALF DOME.

The Indian woman Tis-sa-ack and her husband had traveled from a far-off country and hurried to reach the valley, for they were weary and thirsty and knew that here was rest and water in abundance. Tis-sa-ack was far in advance when she reached the Lake Ah-wei-yah (Mirror Lake), and she dipped up water in the basket which she carried and drank long and deep, drinking even until the last drop was drained. So displeased was the husband that the woman had drunk all the water and left none for him that he beat Tis-sa-ack with his staff, and she wept and reviled her husband, throwing her basket at him. And while they were in this attitude they were turned into stone for their wickedness, and there, facing each other, they still remain—the woman's face being tear-stained with long dark lines. Half Dome is the woman Tis-sa-ack and North Dome is her husband, while beside the latter is a smaller dome called Basket Dome to this day.

THE THREE BROTHERS.

Forever and forever the Three Brothers sit looking silently over each other's shoulders from the north wall of Ah-wah-nee. To the Indians these peaks were as so many frogs sitting upon their haunches ready to leap and they were called by them Kom-po-paises, the Leaping Frogs. But the white man did not know this when he named this triple peak the Three Brothers, because at its foot were captured the three sons of Ten-ie-ya, the last great chief of the Ah-wah-nee-ches, whose tribe was scattered far and wide and whose country was taken by the strange p le-face.

The Three Brothers

The Cascades

El Capitan

EL CAPITAN.

On this great rock, which the red man believes grew from a small boulder, it is told that once in the hazy past two little boys living in the Valley of Ah-wah-nee lay down to dry themselves in the sun after a swim in the river. They fell asleep and thru many moons and snows they slept, while the great rock was slowly rising, until it soon lifted them out of sight and so far into the blue sky that their faces scraped against the moon. Their friends searched for them in vain, and then all the animals assembled to bring the little boys down. Each of the animals sprang up the face of the rock as far as he could, but it remained for the insignificant measuring worm to creep by inches to the summit and carry the lads safely to the ground. The rock was therefore named for the measuring worm and called Tu-tok-a-nu-la by the Indians, and in later years El Capitan by the white man.

*Overhanging Rock*

Yosemite Nat'l Park

BRIDALVEIL.

Bridalveil it may be to the white man, but to the Indian it is Po-ho-no, Spirit of the Evil Wind. In passing, the white man pauses to marvel at the filmy cloud flung from the crest of the rocky precipice, but should an Indian by chance journey this way he hurries past with face averted, fearful and trembling, for it is told that in the long ago many of the children of Ah-wah-nee fell prey to Po-ho-no, who wanders ever thru the canyon and puffs his breath upon the waterfall that he might make for himself a hiding place in the mist. And not one of the red men would sleep within sight or sound of the falls, lest the Evil One would blow upon him and bear him away to an unknown land of torture and unrest.

*Bridalveil
Fall*

Route 321—Yosemite National Park to Stockton, Cal.— 127.9 m.

Reverse Route 9.

Via Big Oak Flat, Knights Ferry, Oakdale and Valley Home. First 23 miles are only fair, a good mountain road is then followed practically all the way to Chinese Camp, next 20 miles are over graded gravel highway, which is good except in some places where surface is worn and rather rough. About 10 miles of poor dirt is encountered approaching Oakdale, concrete to Valley Home, followed by 5 miles of good dirt; balance good oiled macadam and concrete. Summary (approximately): 64 miles fair to good mountain road; 39 miles good graded gravel; 17 miles good oiled macadam; 7 miles concrete; 10 miles poor dirt.

Following the Merced river for several miles the road then leaves the floor of the valley, ascending a ten-mile grade to an elevation of 7,031 ft. at Gin Flat. Winding its way on alternate up and down grades, thru a timbered mountain country, Big Oak Flat is reached. It then descends over easy winding grades into a rolling foothill country and reaches the big plains of the San Joaquin valley just west of Knights Ferry.

Route 325—Yosemite National Park to Merced, Cal.— 97.4 m.

Reverse Route 335.

Via Coulterville and Snelling. Gravel and macadam highway along Merced river thru Yosemite valley to foot of grade and extremely steep grade for one mile and a half, with narrow sandy road. (If desired, the direct road at foot of grade may be taken to El Portal, from which point a private road leads to the summit on easier grades. Permission to use private road may be obtained from the Stage company at El Portal.) All dirt road over rolling grade, some fairly steep, to Snelling. Some short stretches of macadam from Snelling to Merced; balance dirt and gravel.

Route 326 offers a complete option to this route.

- | Total
Mileage Points | Distance | Points |
|-------------------------|----------|--|
| 0.0 | 0.0 | YOSEMITE , at Sentinel bridge. Go north across bridge over Merced river and avoid right-hand diagonal road just beyond. |
| 0.2 | 0.2 | End of street; turn left along Merced river. Avoid left and right-hand diagonal roads at checking sta. 4.2. Diagonally right is Route 321 to Stockton. Avoid left-hand road which crosses Pohono bridge 5.4. |
| 8.7 | 8.5 | Fork; bear right up very steep grade for one and one-half miles. Low power cars must go via El Portal, thus avoiding very steep grade. |
| 12.8 | 4.1 | Ford Crane creek at Big Meadow Sta. 11.5, ascending grade. Fork, sign on tree in center, bear left. Ford creeks 14.2. Start long upgrade just beyond out of Yosemite valley. Last view of Yosemite valley 15.4. Thru Yosemite Nat. Park 19.1. Pass Mariposa Checking Sta. 20.0. Avoid right-hand road 22.5. Right leads to Crane Flat. Pass Hazel Green, old stage sta. on right 22.8, soon starting downgrade. Keep ahead on hilly road. Pass water trough on right 29.2 and old stage sta. 33.3. Pass historical Bower Cave on right 36.5. Cross small bridge over creek 36.6 and turn right along same. |
| 37.4 | 24.6 | Fork; keep right. |
| 40.1 | 2.7 | End of road; turn left. |
| 41.5 | 1.4 | Fork; bear left upgrade. Avoid right-hand road 43.0, keeping ahead on winding, rolling road. |
| 50.2 | 8.7 | Coulterville,* irregular 4-corners, store on far left. Jog right and left upgrade. |

*Coulterville, Cal. (pop. 525), was a once famous mining town; gold mining is still carried on to quite an extent. It was on the first carriage road to Yosemite. The stage line has now been discontinued, but there can be no question that this is one of the most attractive routes to the park. On the road from Snelling to Coulterville, and just before Coulterville is reached, a large quartz vein attracts attention. It is known far and near as the Mother Vein. Just after leaving Coul-

terville there is a long hill to climb, but from the top is a beautiful panorama of the town and the surrounding country and the first grand view of the snow-clad Sierras. About 11 miles from Coulterville is Bower cave, a natural grotto 100 feet in depth and length and 90 feet wide. Access is thru an opening in the top not more than 4 feet wide, thru which peep wild grape vines and maples. In the abyss below is a small pool of water 40 feet deep on which a boat is anchored.

- 50.5 0.3 Fork, sign on left; bear right along narrow gauge tracks.
 55.4 4.9 Prominent fork, sign on left; bear right upgrade.
 58.6 3.2 End of road; turn left. Pass small cemetery on right 58.9.
 63.4 4.8 Turn left with road and take first right immediately beyond.
 Pass small school 65.4. Avoid right-hand road 68.7.
 Right at 68.7 is Route 323 to Modesto.
 70.9 7.5 End of road; turn left.

Route 330—Yosemite National Park to Fresno, Cal.— 101.6 m.

Reverse Route 340.

Via Wawona, Oakhurst and Coarsegold. Good gravel thru floor of valley and good mountain road to Wawona; next 50 miles mostly poor road, including 20 miles of particularly rough surface between Coarsegold and Bates Sta.; last 20 miles fair to poor gravel and oiled dirt. Summary (approximately): 22 miles good mountain road; 50 miles poor road, including 20 miles of very rough surface; 25 miles fair to poor gravel and oiled dirt; 4 miles good gravel.

After a short trip along picturesque Merced river the road leaves the floor of the valley and starts its long climb to the summit of the massive mountain ranges which guard the gem of California's most celebrated beauty spots. Gradually descending the western slope of the Sierras, the tourist leaves the timber belt, traverses the brush covered foothill country and finally emerges into the great plains of the San Joaquin valley.

Fresno Section.

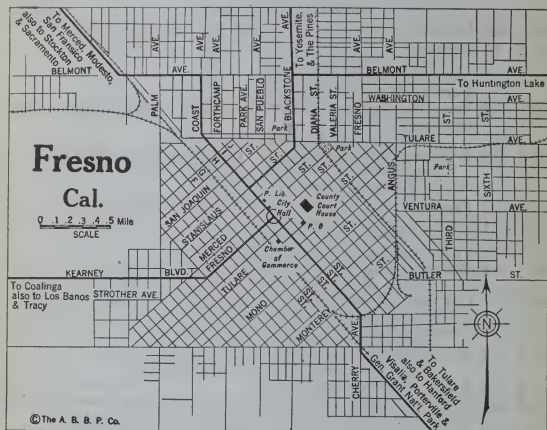

POINTS OF INTEREST, FRESNO, CAL.

Fresno (pop. 55,000, alt. 287 ft.), the geographical center of California, lies at the center of the San Joaquin valley. In this valley are immense holdings of the Miller and Lux estates. Not so many years ago it was said that the cattle kings could drive their stock from Oregon to Texas on their properties. They at that time owned millions of acres of grazing land. These holdings are now cut up into small fruit and dairy farms in the majority of cases. It was founded in 1872, and while wheat remained dominant a long time after that, it was around the young town that much of the first work was done in demonstrating California's possibilities as a fruit and grape country, and this section is now noted for the raisin product, which amounts to over \$12,000,000 per year. The fruit packing houses line the railroads in the industrial section. Among these plants are some of the biggest in the country.

The conditions that make the region about Fresno an orchard and vineyard country,

make the city itself one of the most attractive places to be found along the Pacific coast and there are any number of beautiful and attractive drives for the motorist. Kearney drive, one of California's most famous avenues, extends for 12 miles west of Fresno. Lined with eucalyptus and palms and red and white blossomed oleanders, this avenue is one of the most unique in the world. A few miles from the center of town is Kearney park, bequeathed to the university of California by its founder, Theodore Kearney, as an irrigation experimental farm. This estate, embracing 5,182 acres, is reached by a palm lined drive eleven miles long. Before the death of the donor, in 1906, it was operated as a ranch. Roeding park, embracing 121 acres, is the principal playground of the city.

General Grant National park, with its giant Sequoias, is but three hours' drive from Fresno. Kings river canyon, with its weird upheavals and vast forests, is another Fresno asset sought out with ever increasing interest.

Route 331—Fresno to Modesto, Cal.—94.4 m.

Reverse Route 15.

Via Madera, Merced and Turlock. Concrete state highway the entire distance. The route follows closely along the RR thru a prosperous agricultural district. Thousands of acres of valuable farm lands are added yearly to the growth of this community thru large irrigation projects, the water being taken from the San Joaquin river and its tributaries.

*Madera, Cal. (pop. 3,000, alt. 275 ft.), is located in the geographical center of the San Joaquin valley. It was founded in 1873, and is in the center of a rich, prosperous farming country. The mill of the Madera Sugar Pine company is located in the town at the end of

a flume sixty-five miles long, which carries the lumber from the mountain hill to Madera. An irrigation project that will furnish gravity water is in process of organization and when completed will mean that Madera will be one of the largest cities of the San Joaquin valley.

*Tracy, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasts of a \$35,000 grammar school, a \$70,000 high school and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

*Livermore, Cal. (pop. 2,050, alt. 482 ft.), is 48 miles east of San Francisco, in a grain, grape and dairy region. Town and valley are

named after Robert Livermore, the first settler of English-speaking parentage, who, in partnership with Jose Noriega, purchased the Rancho Las Positas and settled here. He was the first, except the mission fathers, to engage in grape, fruit and grain culture. In 1844 he set out an orchard of pear and olive trees, planted a vineyard, and began to grow wheat. He was a native of London, England, and died on his ranch in 1858.

*Knights Ferry, Cal. (pop. 573), in Stanislaus county, is situated on the Stanislaus river, 38 miles east of Stockton. Gold is found near this town.

*Jamestown, Cal. (pop. 1,100, alt. 1,402 ft.), is the old town of Jimtown now signified to Jamestown by the opening of the Sierra railway and the junction of a branch line to Angel's Camp. It is in the Bret Harte country and nestles along the gravelly bed of Wood creek. The hotel and railroad station are housed under one roof and stand on the hillside above the town. Opposite is a hill 20 miles long and with its top level as the ocean's horizon." This is Table mountain described in the opening paragraphs of the "Twins of Table Mountain" and the residence of "Truthful James" Gillis, one of the excursions of Bret Harte. Table mountain was formed by a flow of lava that came down from the high Sierras over the ancient river bed. Not far from the railroad are Poverty Flat and Whiskey Hill. This vicinity was the scene of the operations of Black Bart, the gentleman bandit, who with an unloaded revolver as his sole menace robbed the stages, mines and The Wells Fargo Express agents. To the left of the railroad as it begins the ascent to Angel's Camp, is the Rawhide mine, which produces annually \$1,000,000 in gold, or one-twentieth of all the gold mined in the state.

*Angel's Camp, Cal. (pop. 1,355, alt. 1,370 ft.), is the mining town made famous by Bret Harte in the "Bret Harte Country of Angels" and other stories. In the latter part of the animal a switch back road with a switch back road, only and in the early morning the cars are cautioned to clear their way off the tracks. In the early morning the cars and bears over its rocky and the table Stanislaus, also made famous by Bret Harte in "Truthful James" as sent of the row "Upon the Street." On the hill were located most of the gold catches. Paths and forks that figure in Bret Harte's story "Angel's," the story was called "Upon a higher related that here he had seen in the trees lighted by his surprise a "wonderful vision. Though of all names had forgotten, it has clung. The town is situated on the Mother Lode and in the ravine in which gold was first discovered. It straggles for a mile and a half down the gulch. The Utica, Angel's and Lightner mines are rich gold-bearing quartz mines.

Calaveras county, in which Angel's is situated, is famous thru the story of the "Jumping Frog of Calaveras," by which Mark Twain leaped into fame; it is also known thru Bret Harte's "Brown of Calaveras," "The Boom in Calaveras," and the "Youngest Prospector in Calaveras."

 Yosemite Detail Map, page 362.

*Coulterville, Cal. (pop. 525), was a once famous mining town; gold mining is still carried on to quite an extent. It was on the first carriage road to Yosemite. The stage line has now been discontinued, but there can be no question that this is one of the most attractive routes to the park. On the road from Snelling to Coulterville, and just before Coulterville is reached, a large quartz vein attracts attention. It is known far and near as the Mother Vein. Just after leaving Coul-

terville there is a long hill to climb, but from the top is a beautiful panorama of the town and the surrounding country and the first grand view of the snow-clad Sierras. About 11 miles from Coulterville is Bower cave, a natural grotto 100 feet in depth and length and 90 feet wide. Access is thru an opening in the top not more than 4 feet wide, thru which peep wild grape vines and maples. In the abyss below is a small pool of water 40 feet deep on which a boat is anchored.

Typical California Highway.

- 77.4 20.1 Mariposa Checking Sta., entrance to Yosemite National Park. Cross boundaries to park 78.3, keeping ahead downgrade. First view of Yosemite valley at 82.0. Ford Crane creek at Big Meadow Sta. 85.9.

*Wawona (pop. 50, alt. 4,000 ft.) is the name for Big Tree, and this little village is very appropriately called, as it is situated at the entrance of the Mariposa grove of sequoias, the most famous group of big trees in the world. It is 150 miles due east of San Francisco, in the Sierra mountains, on the auto road to Yosemite, 26 miles distant. This dis-

trict abounds in beautiful drives and fascinating trips. What is said to be one of, if not the best, 3,000-yard 9-hole golf courses in the United States is also found here. It was laid out by an eastern expert who asserts that the course with its "grass greens embodies the ideal hazards and lay-out for a course of its size."

Don't neglect the points of interest—read them and make your trip more enjoyable.

- 94.9 36.7 YOSEMITE, at Sentinel bridge.

Route 340—Fresno to Yosemite National Park, Cal.— 101.6 m.

Reverse Route 330.

Via Coarsegold, Oakhurst and Wawona. Oiled dirt to Lanes bridge; next 10 miles fair to poor dirt; from the foothills to Wawona the road is only fair at its best and particularly rough traveling will be encountered between Bates Sta. and Coarsegold. From Wawona conditions are generally better, as the road is being kept up and dragged by the Forest Service department. Good gravel roads lead thru the floor of the valley. Summary (approximately): 25 miles fair to poor oiled dirt and gravel; 50 miles poor mountain road, including 20 miles of particularly rough surface; 22 miles good mountain road; 4 miles good gravel.

Traversing a level farming district for the first 20 miles, the road then enters the foothills and gradually winds its way into the heart of the timber covered Sierras. Of particular attraction on or within easy reach from this route are Wawona, The Mariposa Big Tree Grove and Glacier Point.

For regulations governing entrance to park see Table of Contents in front of book.

- 0.0 0.0 FRESNO, I & Fresno Sts. Go northwest on I St. three blocks.
- 0.3 0.3 Stanislaus St.; turn right.
- 0.7 0.4 5-corners, school on right; bear left with trolley onto Blackstone Ave. Cross RR 2.2.
- 9.7 9.0 Fork; keep left.
- 11.0 1.3 Left-hand road; turn left. Turn left across Lanes bridge over San Joaquin river 11.7.
- 12.0 1.0 Right-hand road; turn right with high tension line. Avoid left-hand road 14.0. Thru prominent 4-corners 21.9. Enter foothills just beyond.
 Right at 21.9 is Route 341 to The Pines.
 Pass Bates Sta. on left 26.0.
- 27.1 15.1 3-corners at fence corner; bear left upgrade. Pass water trough on left 30.7. Avoid right-hand road at abandoned cabin 33.2.
- 35.6 8.5 Fork; bear left with travel. Thru dry creek 44.3, bearing right immediately beyond.
 Sharp left at 44.3 is Note (a) Route 341 at mileage 11.6 to Berenda.
- 44.4 8.8 Coarsegold,* P. O. on left. Keep ahead.

*Coarse Gold, Cal. (pop. 100).—Here many tourists will be interested in seeing the very large grape arbor, probably one of the largest in the world, which almost completely sur-

rounds the hotel, in its gnarled and twisted way. This vine has produced tons of grapes. Also in back of the hotel is a huge fig tree arbor, used as picnic grounds, which is an object of interest to tourists.

 46.4 0.8 End of street; turn right.

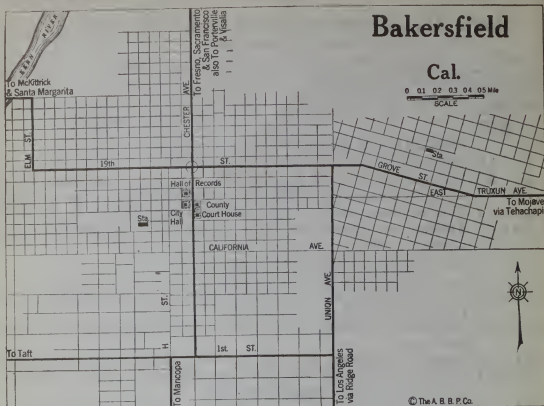

*Selma, Cal. (pop. 3,000, alt. 340 ft.), is sixty miles from General Grant Park, which can be reached easily in four hours. This park is set aside for the purpose of preserving a small forest of magnificent red woods, the largest of which is the famous General Grant tree, which is probably around six thousand years old. There are excellent camping grounds with water piped throughout. Eight miles further back on the road are the Hume saw mills where logs up to eight feet in diameter are worked into lumber. Continuing from this point is the road into the Kings river canyon, but this trip is always made on horseback with accompanying pack animals. The scenery in this canyon is claimed to surpass even that of the Yosemite. This locality is also the nearest point to Shaver lake and Huntington lake, where there are excellent camping grounds, good fishing and plenty of mountain climbing. There are excellent hotel accommodations at Huntington lake.

*Kingsburg, Cal. (pop. 2,500, alt. 301 ft.), is situated twenty miles south of Fresno City, on the state highway, in the heart of the largest raisin belt in the world. Its chief agriculture is raisins, table grapes, peaches of all varieties, figs, walnuts, watermelons and alfalfa. There is a thickly settled country district outlying Kingsbury, and the climate is ideal.

*Tulare, Cal. (pop. 4,500, alt. 281 ft.), situated in the San Joaquin valley on the main highway between Los Angeles and San Francisco, is the center of a rich agricultural and dairy section. The Tulare board of trade maintains a free camp ground with free shower baths and other accommodations for the touring public. There is also a municipal swimming pool open to tourists. Southern Pacific railroad shops are located here and there are various mills and factories. Sequoia National park, in the Sierra Nevada mountains, is 68 miles east of the city. It contains the largest grove of big trees in the world, known as the Giant Forest.

POINTS OF INTEREST, BAKERSFIELD, CAL.

Bakersfield (pop. 20,000, alt. 240 ft.), county seat of Kern county, produces annually about 90,000,000 barrels of oil, one-fourth of the entire world's output. The Bakersfield section is California's biggest producer and in Kern county are located some of the world's largest oil fields. These can be reached over a paved boulevard. Here can be seen thousands of

derricks busily pumping the black fluid into enormous mirror-like lakes. Besides oil, there is a prosperous surrounding grain and cattle country, and Bakersfield is a shipping point for live stock, wool, grain and fruit. High mountains surround the valley near Bakersfield on three sides. Grades, however, in the mountains are not over 6 per cent, the roads being wide and kept in good condition.

*Delano, Cal. (pop. 750, alt. 309 ft.), was named in honor of Columbus Delano, Secretary of the Interior under President Grant. The "no-fence" law drove men of small means out of the stock business and they bought tracts of land in this region or leased them from the railroad company and continued raising sheep. Hence the town was only important as a shipping point for wool and sheep until 1885. When irrigation was established by tapping the Kern river, Delano began to prosper, but soon after the town was entirely de-

stroyed by fire. This apparent reverse, however, seems to have started it on the road to greater prosperity. It is now a wide awake town with good business blocks, newspapers, a \$10,000 school building, and various fraternal societies.

*Fowler, Cal. (pop. 675), is a post village of Fresno county, is 9 miles southeast of Fresno. It has fruit and wine industries and is a shipping point of wheat, as the town is surrounded by a vast area of the finest wheat land in the state. Fowler prides itself on the culture and education of its citizens.

American Express Travelers Cheques

Route 347—Fresno to Bakersfield, Cal.—136.0 m.

Reverse Route 362.

Via Visalia, Exeter, Lindsay and Porterville. Concrete highway the entire distance. Although considerably longer than the direct route via Tulare, this route is very popular, as it takes the tourist thru many prosperous towns and thru a fine agricultural district. Oranges, lemons, walnuts and olives are raised in large quantities along the foothills. The trips to General Grant and Sequoia National parks also branch off from this route.

*Selma, Cal. (pop. 3,000, alt. 340 ft.), is sixty miles from General Grant Park, which can be reached easily in four hours. This park is set aside for the purpose of preserving a small forest of magnificent red woods, the largest of which is the famous General Grant tree, which is probably around six thousand years old. There are excellent camping grounds with water piped throughout. Eight miles further back on the road are the Hume saw mills where logs up to eight feet in diameter are worked into lumber. Continuing from this point is the road into the Kings river canyon, but this trip is always made on horseback with accompanying pack animals. The scenery in this canyon is claimed

to surpass even that of the Yosemite. This locality is also the nearest point to Shaver lake and Huntington lake, where there are excellent camping grounds, good fishing and plenty of mountain climbing. There are excellent hotel accommodations at Huntington lake.

*Kingsburg, Cal. (pop. 2,500, alt. 301 ft.), is situated twenty miles south of Fresno City, on the state highway, in the heart of the largest raisin belt in the world. Its chief agriculture is raisins, table grapes, peaches of all varieties, figs, walnuts, watermelons and alfalfa. There is a thickly settled country district outlying Kingsburg, and the climate is ideal.

 Left on K St. is Route 345 to Bakersfield.

*Porterville, Cal. (pop. 3,200, alt. 461 ft.), is on the Tule river, 30 miles southeast of Visalia. It is in a fruit, stock-raising, lumber and mining region. It is the usual point of departure for the Kern River canyon, which almost equals the Yosemite in the beauty and magnificence of its scenery. It was in this region in a tributary of the Kern river that the golden trout was found over whose beauty even the scientific experts of the United States government grew enthusiastic.

The town took its name from the given name of R. Porter Putnam, who located here in 1859 and opened an eating house for the accommodation of travelers on the overland stage then plying between Los Angeles and San Francisco. The surrounding country was at that time entirely devoted to stock raising and Mr. Putnam later opened a general store for the benefit of the stock raisers. With the advent of the East Side railroad Porterville

began a material growth. With irrigation the town and vicinity is now given over to orange culture and the cultivation of raisin grapes, apricots and prunes.

*Delano, Cal. (pop. 750, alt. 309 ft.), was named in honor of Columbus Delano, Secretary of the Interior under President Grant. The "no-fence" law drove men of small means out of the stock business and they bought tracts of land in this region or leased them from the railroad company and continued raising sheep. Hence the town was only important as a shipping point for wool and sheep until 1885. When irrigation was established by tapping the Kern river, Delano began to prosper, but soon after the town was entirely destroyed by fire. This apparent reverse, however, seems to have started it on the road to greater prosperity. It is now a wide awake town with good business blocks, newspapers, a \$10,000 school building, and various fraternal societies.

Be Sure You're Fully Equipped

In the Orange insert, center of Book, is a careful analysis by the Editor of necessary—and unnecessary—equipment for touring. Glance down the list and check your equipment. Read his advice. We recommend the particular makes of accessories listed as reliable.

Route 350—Fresno to Coalinga, Cal.—60.8 m.

Reverse Route 55.

Via Helm. Oiled dirt roads almost the entire distance, with the exception of the last 9 miles, hard surface.

The first part of this route is thru a rich farming community; the latter part is thru immense oil fields.

Left at 25.4 is Route 18 at mileage 77.2 to Fresno.

*Paso Robles Hot Springs, Cal. (pop. 1,450, alt. 720 ft.), situated in the foothills of the beautiful Santa Lucia mountains in a great natural park of live oaks, is famous as a watering place. It is an all the year round resort and offers every opportunity for all the sports and life out-of-doors conducive to health, pleasure and happiness. The benefi-

cent waters of these springs were drunk by the Indians before California history began and believed by them to be blessed by the Great Spirit. Later, with the coming of the Padres, the fame of the healing springs of the Pass of the Oaks became more widely known and drew the natives from all the country to bathe in the magic waters.

- Cross RR 36.5. Avoid prominent right-hand leading to business center of Los Banos 36.7

*Gilroy, Cal. (pop. 4,000, alt. 192 ft.), is a thriving town at the south end of Santa Clara valley and within a few miles of San Juan Bautista mission, one of the best preserved of the old missions in California. The main street of Gilroy is part of the state highway from San Francisco to Los Angeles and is paved its full length of over a mile and a half. Mount Hamilton, with its observatory, is in sight on the north, and Fremont's Park on the south. The summer home of the late Robert Louis Stevenson, now occupied by Lloyd Osborne, and the cabin of the late Frank Norris, are in the low mountains on

the west. The home of the late Henry Miller, cattle king of California, is 3 miles south.

Gilroy Hot Springs is situated in the Mount Hamilton spur of the Coast Range mountains, on the side of a beautiful canyon, 14 miles northeast of Gilroy and only 43 miles from the city of San Jose. The waters from these wonderful springs are 112 degrees of temperature and contain iron, soda, magnesia, sulphur and traces of iodine, arsenic and other valuable mineral properties. There are good accommodations here in the way of bath-houses, hotels and garages, and this spot has become a mecca for the health seeking and an unsurpassed resting place.

- 1.5 1.4 End of road; turn left.

*Tracy, Cal. (pop. 3,500, alt. 61 ft.), in San Joaquin county, is an ambitious little village about 12 miles southwest of Lathrop, founded in 1878. The town boasts of a \$35,000 grammar school, a \$70,000 high school and other splendid public buildings. It has grown from a town of 600 in 1910 to its present population.

*Delano, Cal. (pop. 750, alt. 309 ft.), was named in honor of Columbus Delano, Secretary of the Interior under President Grant. The "no-fence" law drove men of small means out of the stock business and they bought tracts

of land in this region or leased them from the railroad company and continued raising sheep. Hence the town was only important as a shipping point for wool and sheep until 1885. When irrigation was established by tapping the Kern river, Delano began to prosper, but soon after the town was entirely destroyed by fire. This apparent reverse, however, seems to have started it on the road to greater prosperity. It is now a wide awake town with good business blocks, newspapers, a \$10,000 school building, and various fraternal societies.

HOTELS—Hotel Johnson, Church & Main Sts.

Right on Court St. is Route 366 to Sequoia National park.

Left on Court St. is Route 367 to General Grant National park.

*Tulare, Cal. (pop. 4,500, alt. 281 ft.), situated in the San Joaquin valley on the main state highway between Los Angeles and San Francisco, is the center of a rich agricultural and dairy section. The Tulare board of trade maintains a free camp ground with free shower baths and other accommodations for the touring public. There is also a municipal swimming pool open to tourists. Southern Pacific railroad shops are located here and there are various mills and factories. Sequoia national park, in the Sierra Nevada mountains, is 68 miles east of the city. It contains the largest grove of big trees in the world, known as the Giant Forest.

*Kingsbury, Cal. (pop. 2,500, alt. 301 ft.), is situated twenty miles south of Fresno City, on the state highway, in the heart of the largest raisin belt in the world. Its chief agriculture is raisins, table grapes, peaches of all varieties, figs, walnuts, watermelons and alfalfa. There is a thickly settled country district outlying Kingsburg, and the climate is ideal.

*Selma, Cal. (pop. 3,000, alt. 340 ft.), is sixty miles from General Grant Park, which can be reached easily in four hours. This park

is set aside for the purpose of preserving a small forest of magnificent red woods, the largest of which is the famous General Grant tree, which is probably around six thousand years old. There are excellent camping grounds with water piped throughout. Eight miles further back on the road are the Hume saw mills where logs up to eight feet in diameter are worked into lumber. Continuing from this point is the road into the Kings river canyon, but this trip is always made on horseback with accompanying pack animals. The scenery in this canyon is claimed to surpass even that of the Yosemite. This locality is also the nearest point to Shaver lake and Huntington lake, where there are excellent camping grounds, good fishing and plenty of mountain climbing. There are excellent hotel accommodations at Huntington lake.

*Fowler, Cal. (pop. 675), a post village of Fresno county, is 9 miles southeast of Fresno. It has fruit and wine industries and is a shipping point of wheat, as the town is surrounded by a vast area of the finest wheat land in the state. Fowler prides itself on the culture and education of its citizens.

Route 362—Bakersfield to Fresno, Cal.—136.0 m.

Reverse Route 347.

Via Porterville, Lindsay, Exeter and Visalia. Concrete highway the entire distance. Also considerably longer than the direct route via Tulare, this route is very popular as it takes the tourist thru many prosperous towns and thru a fine agricultural district. Oranges, lemons, walnuts and olives are raised in large quantities along the foothills. The trips to General Grant and Sequoia National parks also branch off from this route.

*Delano, Cal. (pop. 750, alt. 309 ft.), was named in honor of Columbus Delano, Secretary of the Interior under President Grant. The "no-fence" law drove men of small means out of the stock business and they bought tracts of land in this region or leased them from the railroad company and continued raising sheep. Hence the town was only important as a shipping point for wool and sheep until 1885. When irrigation was established by tapping the Kern river, Delano began to prosper, but soon after the town was entirely destroyed by fire. This apparent reverse, however, seems to have started it on the road to greater prosperity. It is now a wide awake town with good business blocks, newspapers, a \$10,000 school building, and various fraternal societies.

*Porterville, Cal. (pop. 3,200, alt. 461 ft.), is on the Tule river, 30 miles southeast of Visalia. It is in a fruit, stock-raising, lumber

and mining region. It is the usual point of departure for the Kern River canyon, which almost equals the Yosemite in the beauty and magnificence of its scenery. It was in this region in a tributary of the Kern river that the golden trout was found over whose beauty even the scientific experts of the United States government grew enthusiastic.

The town took its name from the given name of R. Porter Putnam, who located here in 1859 and opened an eating house for the accommodation of travelers on the overland stage then plying between Los Angeles and San Francisco. The surrounding country was at that time entirely devoted to stock raising and Mr. Putnam later opened a general store for the benefit of the stock raisers. With the advent of the East Side railroad Porterville began a material growth. With irrigation the town and vicinity is now given over to orange culture and the cultivation of raisin grapes, apricots and prunes.

- 76.9 3.6 4-corners; turn left with pavement. Cross RR 77.1.

POINTS OF INTEREST, VISALIA, CAL.

Visalia (pop. 4,550, alt. 384 ft.), one of the earliest towns settled by Americans in the state of California. It is the most convenient starting point for excursions to the High Sierra on the east. An electric railway runs from Visalia to Lemon Cove, the starting point of the stages to the Sequoia National

Park or Giant Forest, which lies in the High Sierra and contains splendid forests of sequoias, besides most remarkable gorges, peaks and caverns. Parties are made up at Visalia and fitted out with animals, guides, camping equipment, etc., for a tour of the park.

 Left at 111.1 is Route 64 to Watsonville.

*Hollister, Cal. (pop. 2,325, alt. 287 ft.), is situated in the beautiful and fertile San Benito valley, 94 miles south of San Francisco. It has an important trade in grain, live stock and fruit. At Idria, south of Hollister, is a great quicksilver mine. The town of Hollister was named after Colonel W. W. Hollister of Licking county, Ohio. He was a man of education and great force of character. He brought a flock of sheep across the great plains in 1851 and another in 1853, a really great feat. He bought the San Justo ranch in the San Benito valley and settled down to sheep raising. In 1862 he built the Montgomery house, the oldest house in Hollister. The San Justo homestead association was formed in 1868 and bought the San Justo ranch from Colonel Hollister for \$400,000 and on it laid off the present town of Hollister in 1868.

*The Mission of San Juan Bautista is situated in the town of San Juan. It was founded June 24, 1797, and was the second in the "filling up the links of the chain" missions. This mission was well located, the soil being fertile and the region well populated. In 1803 the corner stone of the present church was laid, and in 1809 the sacristy was completed and the image of San Juan was placed on the high altar.

In 1836 San Juan was the center of the hostilities between José Castro and Alvarado on the one hand and Governor Guiterez on the other. Revolutionary meetings, excited speeches and the martial sound of life and drum characterized the struggle which forced the exile of the governor and resulted in the election of Alvarado. In 1845 the inventory taken in accordance with the decree of Pio Pico that all that remained of the mission property except the curate's house, the church and the courthouse, should be sold, gave the value as \$8,000. In this same year Castro organized his forces at San Juan to repel the invasion of Frémont, and when California became a part of the United States through the landing of Commodore Sloat at Monterey, Castro was at San Juan and from there treated with the conquerors. To his humiliation it was Frémont who raised the stars and stripes over San Juan. Here also Frémont organized the volunteer battalion he led against Flores and his reactionaries in the south.

The mission today is much repaired and in use. The arched corridor, 300 feet long, ex-

tends along one whole side of the weedy plaza. In the corner at the right stands the church. Between it and the monastery is an "ugly modern wooden building, surmounted by a bell tower erected by Father Rubio in 1874." The fachada of the church is simply the end of the building practically unornamented. The walls of the church were supported by four buttresses on either side. Those on the north still remain. Both church and monastery are of adobe and the floor of the monastery is paved with the original tiles laid by the fathers, conclusive proof of their thorough knowledge of the craft of making burnt brick as well as adobe. The entrance of the church is defended against the depredations of irresponsible tourists by a barricade extending from wall to wall and from floor to ceiling and kept padlocked like that of any prison. The church, unlike the other missions, is lighted by eight small windows placed almost at the top of the wall above the cornice. Within the altar rail is the tomb of Padre Presidente Estéban Tapis, whose body rests beneath the floor. The inscription records his life work. He was in America forty years and in California thirty-five. He died November 3, 1825.

San Juan Bautista originally had a chime of nine bells cast in Peru and of wonderful sweetness of tone. Only one now remains of the original chime. Two bells now hang in the hideous incongruous belfry, but neither is of the original chime. Those bells have been scattered, some to other missions and some recast. In one room of the monastery is a museum of mission antiquities. Among its objects of interest are the old chorals of Padre Presidente Tapis, who was an accomplished musician and composed a great deal of church music. The old scores are done on parchment with the large square notes for the different voices done in different colors so that the parts could be easily followed. Another musical object and the strangest thing in the whole collection is an old barrel organ made by Benjamin Dobson, The Minorities, London, 1735. Also in the musical part of the collection is an old wooden wheel with four hollow spokes, between each two of which is a wooden clapper which raps upon them as the wheel rotates. On the days when the bells were not rung this instrument, which could be heard for a great distance, was used to call the people to worship.

Cross iron bridge over Pajaro river 111.3. Pass Sargent Sta. on left 113.8. Cross RR 114.5. Avoid right-hand road 120.0—now on Monterey St.

Right at 120.0 is Route 60 to Merced via Los Banos.

- 57.0 12.5 **SEQUOIA NATIONAL PARK** (elevation 6,400 ft.).

*Gilroy, Cal. (pop. 4,000, alt. 192 ft.), is a thriving town at the south end of Santa Clara valley and within a few miles of San Juan Bautista mission, one of the best preserved of the old missions in California. The main street of Gilroy is part of the state highway from San Francisco to Los Angeles and is paved its full length of over a mile and a half. Mount Hamilton, with its observatory, is in sight on the north, and Fremont's Park on the south. The summer home of the late Robert Louis Stevenson, now occupied by Lloyd Osborne, and the cabin of the late Frank Norris, are in the low mountains on

the west. The home of the late Henry Miller, cattle king of California, is 3 miles south.

Gilroy Hot Springs is situated in the Mount Hamilton spur of the Coast Range mountains, on the side of a beautiful canyon, 14 miles northeast of Gilroy and only 43 miles from the city of San Juan. The waters from these wonderful springs are 112 degrees of temperature and contain iron, soda, magnesia, sulphur and traces of iodine, arsenic and other valuable mineral properties. There are good accommodations here in the way of bath-houses, hotels and garages, and this spot has become a mecca for the health seeking and an unsurpassed resting place.

POINTS OF INTEREST, SEQUOIA AND GENERAL GRANT NATIONAL PARK.

In the Sequoia National Park upon the upper slopes of the Sierra and in the little General Grant National Park, six miles away and under the same management, grow more than a million sequoia trees, of which twelve thousand are more than ten feet in diameter. Although the Yosemite National Park has some large sequoia trees, this is the big tree national park. Here grow the greatest groves of sequoias in the world and the greatest and oldest trees in the world.

Nature's forest masterpiece is John Muir's designation of the big trees of California. Many of the sequoias in this park are mere babes of a few hundred years, many sturdy youths of a thousand years, many in the young vigor of two or three thousand years, and a few of full maturity. The principal entrance to the Sequoia National Park is at Visalia, California, from which an excellent automobile road leads into the giant forests.

Some of the greater trees have the following dimensions:

General Sherman Tree, diameter 36.5 feet; height 279.9 feet.

General Grant Tree, diameter 35 feet; height 264 feet.

Abraham Lincoln Tree, diameter 31 feet; height 270 feet.

California Tree, diameter 30 feet; height 260 feet.

George Washington Tree, diameter 29 feet; height 255 feet.

William McKinley Tree, diameter 28 feet;

height 291 feet.

Gallatin Tree, diameter 27 feet; height 292 feet.

It is extremely difficult to realize what the dimensions of these trees really mean. To visualize as best you can the greatest of those now standing, the General Sherman Tree, measure off and stake in diameter, 36 feet 6 inches upon the ground in front of a church, the height of whose steeple you can readily ascertain. Then stand back a distance equal to the tree, 280 feet, and look hard at the stakes, whose distance apart represents the thickness of the trunk. Now raise your eyes slowly, imagining this trunk rising in front of the church, tapering very slightly as it rises. When you are looking upward at an angle of 45 degrees from the spot where you are standing—and this will not be difficult to calculate—you will be looking at the point where the top of the General Sherman Tree would be if it were growing in front of your church instead of in the Sequoia National Park. The known height of the steeple will help you to certify this interesting experiment.

It will help your comprehension of the great size of these trunks to know that a box big enough to have easily held the ill-fated ship Lusitania, one of the largest ever built, could be made from inch boards sawed from any one of these greatest sequoias with boards enough left over to build a dozen houses. This box would not only have held

Oldest and Biggest Living Tree in the World, Sequoia National Park.

the Lusitania, but its masts as well. Automobiles and six-horse teams have been driven up and down the fallen trunks of several sequoias and there are regular wagon roads running thru gaps in the trunks of several others in our national parks. Two parallel street car lines and a driveway might be run side by side thru the trunk of several of the very largest.

But the age of the sequoia tree is still more difficult to realize. It is beyond compare the oldest living thing. Several of the trees now growing in hearty maturity in the Sequoia National Park were vigorous youngsters before the pyramids were built on the Egyptian desert, before Babylon reached its prime. Some of them were thriving before the heroic age of ancient Greece—while, in fact, the Indo-Germanic ancestors of the Greeks were still swarming from the north.

Thousands were lusty youths through all the ages of Greek art and Roman wars. Tens of thousands were flourishing trees when Christ was born in Bethlehem.

But with all its vast age the sequoia today is the embodiment of serene vigor. "No description," says John Muir, "can give any adequate idea of its majesty, much less its beauty." He dwells upon its patrician bearing, its suggestion of ancient stock, its strange air of other days, its thoroughbred look inherited from the long ago. "Poised in the fullness of strength and beauty, stern and solemn in mien, it is clothed with eager and enthusiastic life to the tip of every leaf and branch and far-reaching root, calm as a granite dome, the first to feel the touch of the rosy beams of morning, the last to bid the sun good-night."

The sequoia is regular and symmetrical in general form. Its powerful, stately trunk is purplish to cinnamon brown and rises without a branch a hundred or a hundred and fifty feet, which is as high or higher than the top of most forest trees. Its bulky limbs shoot boldly out on every side. Its foliage, the most feathery and delicate of all the conifers, is densely massed. The bright green cones are about two and a half inches long, generating seeds scarcely more than an eighth of an inch across. The wood is almost indestructible, except by fire. Fallen trunks and broken branches lie for centuries undecayed and almost unaltered.

The sequoias are the glory as they were the cause of the Sequoia National Park. Scattered here and there over great areas, they cluster chiefly in separate groves and it is in these groves that they attain their greatest size and luxuriance.

But they are by no means the only attraction of this national park, which many frequenters declare nature has equipped best of all for the joys and pleasures of mountain living. It is the ideal place to camp out. It is a country of magnificent mountain scenery, easily accessible when once you are in it. Its peaks are among the loftiest, its canyons among the deepest and most romantic. Its summer temperatures are even and bracing. Its summers are practically without rain.

The Sequoia National Park is an ideal objective for a motor trip. The run from Visalia

into the Giant Forest is interesting and the road is fairly good. In the Giant Forest will be found a public tent camp, with garage facilities. Here also thousands of parties camp in the open for whole summers, running in by motor and carrying their tent and camp equipment and families with them. The camps lie in the middle of the forest, overspread with these huge sequoias. In every direction one wanders over the trails in the most typical and mysterious woods which the world contains. The study of these trees is a fascinating occupation for thousands of people. From these camps excellent trout streams are easily accessible and from them parties go out into the mountain regions to the north and east on trips of a few days or even weeks and revel in scenery of a majesty unexcelled perhaps anywhere in the world.

One cannot think or speak of the Sequoia National Park without including the extraordinary country lying beyond its boundaries. Not that there is much in common between the two, for the park marks the supremacy of forest luxuriance and the outlying country the supremacy of rock sculptured canyon and snowy summit. And yet there is a common note of supremacy—each of its own kind; and there is common note of continuity, for, from the lowest valley of the wooded park where the big trees grow to the peak of our loftiest height, Mount Whitney, nature's painting runs the gamut. The parts are indivisible; to separate them is to cut in two the canvas of the Master.

And so it is that those who know this land of exuberant climax have come to call it the greater Sequoia in order to express not the part limited by the park's official title, but the whole as God made it. The day will quickly come when Congress will include this outlying region in the Sequoia National Park, making a total park of sixteen hundred square miles.

Well outside the park boundaries and overlooking it from the east, the amazing, craggy Sierra gives birth in palatial chambers to two noble rivers. A hundred thousand rivulets trickle from the everlasting snows; ten thousand resultant brooks roar down the rock slopes; hundreds of resultant streams swell their turbulent trout haunted current. One of these rivers, the Kings, flows west, paralleling the northern boundary of the park. The other, the Kern, flows south, paralleling its eastern boundary. Both of these rivers are easily accessible by trail from the camping ground in the Giant Forest.

Now the Kings River canyon and the canyon of the Kern are practically matchless for the wild quality of their beauty and the majesty of their setting. The traveler goes home only to plan his return, for this is a country whose peculiar charm lays an enduring clutch upon desire. The greater sequoia has few visitors yet, but they are worshippers.

Unlike many areas of extreme rocky character, this favored country is not specially difficult to travel. It curiously adapts itself to trails. It is an ideal land for the camper, because it is so easily traversed and because parties do not have to carry tents. But one must otherwise go well equipped. There

must be good guides, good horses and plenty of warm clothing. The difference between a good and indifferent equipment is the difference between satisfaction and misery.

There are two valleys in this country north of the Sequoia National Park, which will some day share the fame of the Yosemite Valley. One of these, about two days' trip by trail north of the Giant Forest, is the Tchipite Valley. The middle fork of the Kings River runs thru it. This valley has walls even loftier than those of the Yosemite. Tchipite Dome, a giant rock which guards its lower end, is as remarkable in its way as El Capitan. The river for miles here is one of the best trout streams in America. It is seldom fished. The valley itself is wild in the extreme. The water is in every sense a big water. In all its course the river is a succession of waterfalls, torrents, cascades and fast reaches. Trouting is done here under the most romantic and delightful conditions.

The other notable valley which is destined to future great fame is the Kings River Canyon, thru which flows the south fork of the Kings River. This also has its lofty and pre-

cipitous walls and its giant rocks. The Tchipite Dome is also higher above the valley floor than El Capitan in the Yosemite. This fork is not the equal in size or turbulence to the middle fork of the Kings, but it is a stream of noble and romantic beauty and perhaps fully as good a trout stream. This valley is somewhat more accessible and contains a comfortable public camp. It will be the more populated in the future of the two great scenic valleys, because its floor is more open and more adapted to the accommodations of a considerable summer population.

East of the Sequoia National Park and just as accessible from the Giant Forest, the Sierra reaches its mightiest climax in Mount Whitney. No towering peak is Whitney, like Mount Rainier and Long's peak, but literally a climax; for here the Sierra has massed her mountains, tumbled them wilfully, recklessly, into one sprawling, titanic heap, as though this were the dumping ground for all left over after the making of America. The effect is imposing, breathless, overwhelming. From this mass emerges Mount Whitney, its altitude 14,501 feet.

A Glimpse of Sequoia National Park.

Don't tour in the dark
Read "HOW TO USE THE BLUE BOOK." Page 1

Use the National Parks!

The National Park Service invites motorists to use and enjoy the great national playgrounds established by Congress. They include the broadest range of sublime scenery in the whole world, and, remember, they belong to you.

Route 371—Bakersfield to Los Angeles, Cal.—127.5 m.

Reverse Route 381.

Via Ridge Road, Saugus, San Fernando, Lankershim and Hollywood. Concrete to foot of Tejon grade, next 11 miles oiled dirt, balance concrete and macadam. Summary: 116.5 miles of pavement; 11 miles oiled dirt. While the Ridge Road was closed for paving when Blue Book car was in this territory during spring 1919, we are advised that most, if not all, of this work will be finished by fall, an achievement which will enable the tourist to make the inland trip between San Francisco to Los Angeles over paved roads for the entire distance.

Leaving Bakersfield the route traverses a level farming country; great irrigation projects having turned thousands of hitherto almost barren acres into prosperous agricultural districts. The Tejon range is reached 33 miles south of Bakersfield. The route now follows winding, rolling roads thru a hilly country for approximately 50 miles. From Saugus the trip takes the tourist thru beautiful orchards and prosperous suburban towns over splendid roads balance of way to Los Angeles.

*San Fernando, Cal. (pop. 3,000). Just a few minutes' ride from this city is San Fernando Rey d'Espagna mission, occupying the Reyes Rancho. The Reyes hacienda temporarily housed the mission, which also included within its lands the famous Camulos Rancho, the home of Helen Hunt Jackson's "Ramona." The mission was founded by Padre Lasuen, September 8, 1797, but Padre Francisco Dumetz and his assistant, Francisco Favier Uria, were the first priests in charge. The baptismal register shows that ten children were baptized the first day and thirteen adults in October. The tile-roofed adobe church was consecrated in December, 1806, but was so severely injured in the earthquake of 1812, which damaged nearly all the missions, that thirty new beams were needed to support the shaken walls. A new chapel was completed in 1818.

The secularization of the mission was begun in 1834 by the appointment of Lieutenant Antonio del Valle as comisionado. In 1832 Micheltorena, who had been appointed governor, stopped at San Fernando on his journey north to take up his office and was there informed of the raising of the American flag at Monterey by Commodore Jones. It was by Micheltorena's decree in 1843 that San Fernando was returned to the padres, but there were only two vineyards and a few cattle left. Even this small gain was not to be theirs for long. The Californians led by Pio Pico and Castro revolted against Micheltorena, who with most of his troops marched south to suppress the rebellion. At San Fernando was fought the "bloodless battle of Cahuenga," resulting in the capitulation of Micheltorena. In 1847 San Fernando was again the scene of warlike operations. Fremont and his battalion arrived in January and remained until after the signing of the treaty of Cahuenga, which terminated all hostilities against the United States in its conquest of California. During their stay and on their departure Fremont's command confiscated without compensation whatever horses and cattle remained to the San Francisco mission. The following year is famous for the discovery of gold in California, and with this discovery the Mission of San Fernando is associated. In 1842 Francisco Lopez, major-domo of the mission, seeking stray horses, stopped to rest and eat in the canyon of San Feliciano. In digging up

some wild onions for his luncheon he discovered a piece of gold. Search revealed other pieces. On his return to San Fernando he showed these to friends, who at once declared there must be a placer of gold in the canyon. People from Los Angeles and Santa Barbara flocked to the new gold field. The first California gold ever coined at the Philadelphia mint came from this field. It was taken around Cape Horn in a sailing vessel by Alfred Robinson, translator of Boscana's "Indians of California," and amounted to \$344.75. In the two years following Lopez' discovery about \$100,000 was taken from this placer. The first gold pans were bateas or bowl-shaped baskets made by the mission Indians.

The church at San Fernando is only a pathetic ruin. It is built entirely of adobe, with the entrance at the southwest end, while the altar stands at the northeast. On the east side is an entrance with a half-circular arch sloping into a larger arch inside with a flat top and rounded corners. Various and curious styles of these outer and inner arches are worked out in the thick walls and are of interest as affording a wonderful example of variety in adapting the arch to its necessary functions. On the northwest side of the church is the old graveyard, the doorway to which has the half-circular arch on the inside and slopes outward to an exterior square arch. Close to the graveyard and still surrounded by the remains of the original adobe walls is the old olive orchard, where a number of fine trees are still growing. There are two superb palms over 100 years old which have been the inspiration of many an artist. They stand isolated and pictures of the mission usually have these stately trees in the foreground with the long, low line of the monastery corridor in the middle distance and the beautiful hills rising into the Sierra Madre mountains in the distance. The exterior of the old monastery has been restored by the Landmarks club, which also placed the protecting shake roof over the church ruin. Close to the monastery building a fine old fountain built of brick and cement still pours crystal waters from a great double bowl on a center standard into a reservoir below. The square structure built of boulders which stands about 200 yards from the monastery incloses two circular cisterns of brick.

- 22.5 3.0 Right-hand road, cabin on left; turn right.
- 22.7 0.2 Fork at fence; bear left. Avoid left-hand road 26.6.

*Hollywood, Cal. (pop. 15,000, alt. 1,500 ft.), a populous suburb of Los Angeles, incorporated within the city, is situated among the Cahuenga foothills. Against the hillside the turrets of San Souci castle and Glengarry stand out prominently. These are both the possessions of a wealthy owner who has filled them with tapestries, pictures, carvings and rare glass. Hollywood is in the vicinity of the oil belt but is fragrant with flowers. Its

streets are planted with peppers and acacias and the flame tree brought here from the Antipodes. Roadways are lined with glossy magnolias and grounds are brilliant with poinsettia and roses. Strawberries are ripe here "from Christmas until Christmas." Paul de Longpre, the world's greatest painter of flowers, lived here until his death in 1911. In the country near Hollywood forty film-play producing companies have extensive plants.

Los Angeles Section

POINTS OF INTEREST, LOS ANGELES, CAL.

Los Angeles (pop. 650,000, alt. 338 ft.) is the commercial metropolis and the most populous town of southern California. It is noted for the amenity of its climate, the beauty of its flowering gardens and walks and the excellence of its fruits. Thousands of people who have come to southern California only for a visit have become so charmed with the beautiful surroundings of Los Angeles that they have built permanent residences there. The soil in the immediate neighborhood is the richest and most inexhaustible in the world. The streets of the city are wide and well paved and there are many beautiful parks within its limits, among the larger of these being Griffith park, covering 3,000 acres.

Los Angeles was founded in 1781 by Felipe de Vene. It is located midway between the mountains and ocean, and is delightfully accessible to both. The original city was centered around a large plaza. At this point is an old Mission church, founded in 1781. From an historical standpoint this mission is very interesting, but from an architectural standpoint, it is very mediocre. It is now used regularly as a place of worship, and is open throughout the day to visitors. Many interesting relics are to be found here. Over 100 producing motion picture companies are oper-

ating in and near Los Angeles, making more than 1,000 miles of negative films each year.

No city in the United States has improved so rapidly within the past few years as has Los Angeles. There are, in addition to its public, high and normal schools, numerous universities, colleges and academies, among which might be especially mentioned the University of Southern California, with its many departments. The La Brea pits and the collection of pre-historic skeletons taken there from housed in the Museum of History, Science and Art, at Exposition park, are of interest to the historical student.

There are 1,100 miles, or more, of highly improved county roads, radiating from the city of Los Angeles, affording the autoist opportunity to visit the many cities of the country, as well as its numerous mountain and beach resorts.

Mount Lowe is one of the most inspiring mountain peaks in the west, towering over one mile above Los Angeles. It is reached by a world famous mountain railroad, and affords a beautiful panorama of southern California. On a clear day objects 100 miles away are plainly visible. At the summit of this mountain a tavern is maintained for the accommodation and comfort of the traveler.

POINTS OF INTEREST, CATALINA ISLAND.

Catalina Island, with its little town of Avalon, offers unrivaled attraction to the tourist, and is reached by boat from the harbor of San Pedro. Fishing, famous the world over, the submarine gardens viewed from the glass bottomed boats, and wild goat hunting are some of the special features of this trip.

Catalina is at the same time the oldest and the most modern spot on the Pacific coast, as well as one of the most popular and fashionable resorts. The earthen pots, stone weapons and bones found here in profusion give evidence of a dense and long vanished population.

Los Angeles Cal.

Route 381—Los Angeles to Bakersfield, Cal.—127.5 m.

Reverse Route 371.

Via Hollywood, Lankershim, San Fernando, Saugus and Ridge Road. Macadam and concrete the entire distance except for 11 miles of oiled dirt thru Tejon pass just north of Lebec. Summary: 116.5 miles of pavement; 11 miles oiled dirt. We are advised that paving of the Ridge Road will be completed by fall of 1919, an achievement which will enable the tourist to travel on paved roads all the way from Los Angeles to San Francisco.

Leaving Los Angeles the route leads thru fine suburbs and residential districts to Saugus and gradually reaches the foot of Tejon range. Winding its way thru a mountainous country for 50 miles, we reach the plains of the San Joaquin valley at mileage 95.0 and follow an almost direct course thru prairie and irrigated districts to Bakersfield.

*Hollywood, Cal. (pop. 15,000, alt. 1,500 ft.), a populous suburb of Los Angeles, incorporated within the city, is situated among the Cahuenga foothills. Against the hillside the turrets of San Souci castle and Glengarry stand out prominently. These are both the possessions of a wealthy owner who has filled them with tapestries, pictures, carvings and rare glass. Hollywood is in the vicinity of the oil belt but is fragrant with flowers. Its streets are planted with peppers and acacias and the flame tree brought here from the Antipodes. Roadways are lined with glossy magnolias and grounds are brilliant with poinsettia and roses. Strawberries are ripe here "from Christmas until Christmas." Paul de Longpre, the world's greatest painter of flowers, lived here until his death in 1911. In the

country near Hollywood forty film-play producing companies have extensive plants.

*San Fernando, Cal. (pop. 3,000). Just a few minutes' ride from this city is San Fernando Rey d'Espagna mission, occupying the Reyes Rancho. The Reyes hacienda temporarily housed the mission, which also included within its lands the famous Camulos Rancho, the home of Helen Hunt Jackson's "Ramona." The mission was founded by Padre Lasuen, September 8, 1797, but Padre Francisco Dumetz and his assistant, Francisco Favier Urias, were the first priests in charge. The baptismal register shows that ten children were baptized the first day and thirteen adults in October. The tile-roofed adobe church was consecrated in December, 1806, but was so severely injured in the earthquake of 1812, which damaged nearly all the missions, that thirty

(San Fernando Points of Interest, Cont'd.)

new beams were needed to support the shaken walls. A new chapel was completed in 1818.

The secularization of the mission was begun in 1834 by the appointment of Lieutenant Antonio del Valle as comisionado. In 1832 Micheltorena, who had been appointed governor, stopped at San Fernando on his journey north to take up his office and was there informed of the raising of the American flag at Monterey by Commodore Jones. It was by Micheltorena's decree in 1843 that San Fernando was returned to the padres, but there were only two vineyards and a few cattle left. Even this small gain was not to be theirs for long. The Californians led by Pio Pico and Castro revolted against Micheltorena, who with most of his troops marched south to suppress the rebellion. At San Fernando was fought the "bloodless battle of Cahuenga," resulting in the capitulation of Micheltorena. In 1847 San Fernando was again the scene of warlike operations. Fremont and his battalion arrived in January and remained until after the signing of the treaty of Cahuenga, which terminated all hostilities against the United States in its conquest of California. During their stay and on their departure Fremont's command confiscated without compunction whatever horses and cattle remained to the San Fernando mission. The following year is famous for the discovery of gold in California, and with this discovery the Mission of San Fernando is associated. In 1842 Francisco Lopez, major-domo of the mission, seeking stray horses, stopped to rest and eat in the canyon of San Feliciano. In digging up some wild onions for his luncheon he discovered a piece of gold. Search revealed other pieces. On his return to San Fernando he showed these to friends, who at once declared there must be a placer of gold in the canyon. People from Los Angeles and Santa Barbara flocked to the new gold field. The first California gold ever coined at the Philadelphia

mint came from this field. It was taken around Cape Horn in a sailing vessel by Alfred Robinson, translator of Boscana's "Indians of California," and amounted to \$344.75. In the two years following Lopez' discovery about \$100,000 was taken from this placer. The first gold pans were bateas or bowl-shaped baskets made by the mission Indians.

The church at San Fernando is only a pathetic ruin. It is built entirely of adobe, with the entrance at the southwest end, while the altar stands at the northeast. On the east side is an entrance with a half-circular arch sloping into a larger arch inside with a flat top and rounded corners. Various and curious styles of these outer and inner arches are worked out in the thick walls and are of interest as affording a wonderful example of variety in adapting the arch to its necessary functions. On the northwest side of the church is the old graveyard, the doorway to which has the half-circular arch on the inside and slopes outward to an exterior square arch. Close to the graveyard and still surrounded by the remains of the original adobe walls is the old olive orchard, where a number of fine trees are still growing. There are two superb palms over 100 years old which have been the inspiration of many an artist. They stand isolated and pictures of the mission usually have these stately trees in the foreground with the long, low line of the monastery corridor in the middle distance and the beautiful hills rising into the Sierra Madre mountains in the distance. The exterior of the old monastery has been restored by the Landmarks club, which also placed the protecting shake roof over the church ruin. Close to the monastery building a fine old fountain built of brick and cement still pours crystal waters from a great double bowl on a center standard into a reservoir below. The square structure built of boulders which stands about 200 yards from the monastery incloses two circular cisterns of brick.

In the country near Hollywood forty film-play producing companies have extensive plants.

*Ventura, Cal. (pop. 3,000, alt. 50 ft.) In the heart of this little city may be seen what remains of the Mission Buenaventura, which mission was founded by Father Serra person-

ally. At one time it was the center of a great many raids and attacks by Indians. Bullet marks may still be seen on the walls. After 1830 it was allowed to drop into a state of decay. It has been restored, but only as a church and a very beautiful tower, in which the old bells still hang and continue to call worshippers to the service. There is a caretaker in charge.

*Carpinteria, Cal. (pop. 500, alt. 7 ft.). Here may be seen the world's largest grape vine. It was planted in 1842, measured 9 ft. in circumference at base, covered $\frac{3}{4}$ of an acre in area and bore as much as 10 tons of grape in one season. The vine died in 1916, but is preserved for exhibition purposes. There is an older vine, still living, at San Gabriel, Cal., planted by the missionary fathers in 1775. It covers 10,000 sq. feet of ground, a little less than $\frac{1}{4}$ acre. The lima bean in California was first raised commercially in the Carpinteria valley, the celebrated Fordhook variety of Bush lima bean originating here. English walnut and lemon groves also thrive in this vicinity.

POINTS OF INTEREST, SANTA BARBARA, CAL.

Santa Barbara (pop. 16,000, alt. 100 ft.) is situated on the shores of the Pacific ocean, or, more accurately speaking, on the shore of the Santa Barbara channel. Its beautiful location and partial encirclement by hills and mountains have given it the name of the American Mentone. This city has extensive fruit growing interests and is noted for its display of flowers. It is a most attractive spot for the agriculturist, horticulturist and those in search of rest and recreation. Its climate is ideal. Around Santa Barbara are found some of the most charming auto drives in the state, some leading along the ocean shore, some along the foothills, others along shaded avenues skirted by walnut and lemon orchards, and still others along canyon streams densely shaded by grand old oaks and sycamores. Among these might be mentioned the Mountain drive, Tunnel drive and the Mission Ridge drive.

Some of the interesting beauty spots in and around the city are:

The De La Guerra mansion, 13 E. De La Guerra St., mentioned in Dana's "Two Years Before the Mast."

Museum of Natural History, Anacapa and Carillo Sts.

Plaza Alameda, a beautiful 10-acre park in the heart of the city.

San Ysidro Rancho and Crocker Rancho, distance 6 to 8 miles.

Painted Cave, distance 13 miles.

Smith's Canon, distance 13 miles.

Mission canon and the old mission founded in 1786.

At Carpinteria, 12 miles east of Santa Barbara, may be seen the largest and probably the oldest grapevine in the world, the main stem being over 100 inches in circumference. This vine has produced as high as ten tons of fruit in one season.

SANTA BARBARA MISSION.

A visit should be made by all means to the old Santa Barbara mission.

It is situated west of the town of Santa Barbara and overlooking it and the sea, from which the mission is three miles distant. Santa Barbara alone of all the missions keeps its ancient aspect. It is preserved and still in use, being now a Franciscan Apostolic college for the education of Franciscan novitiates who are to go forth wherever sent as missionaries. The mission was founded December 4, 1786, after the death of Father Serra. The Spanish Governor Neve, with Parde Serra and officers and soldiers explored the coast in April, 1782, and selected the site then known as Yanonalit from the name of the Indian chief who had his village there. Only the presidio was established at this time. Serra, in making the journey, had expected to found the mission at the same time, and his disap-

Route 392—Santa Barbara to Paso Robles, Cal.—141.7 m.

Reverse Route 30.

Via Gavlota pass, Los Alamos, Santa Maria, Arroyo Grande and San Luis Obispo. First 35 miles concrete, then good graded gravel for 15 miles, concrete balance of way excepting 4 miles of poor macadam between Los Alamos and Orcutt. Summary: 122 miles concrete; 15 miles good graded gravel; 4 miles poor macadam.

Owing to construction work between Nipomo and Arroyo Grande the Blue Book car was unable to follow the new highway completely between these two points and as a result of using the temporary detour some discrepancy in mileage may be encountered. Tourists reaching Arroyo Grande via the new highway should reset speedometer to 96.8 at this town in order to obtain readings corresponding with the route matter here given for balance of trip to Paso Robles.

From Santa Barbara to Gavlota the road follows closely along the ocean shore and a splendid panorama of mountain and marine scenery is constantly in view. Shortly beyond Gavlota the route leads inland and traverses an attractive hilly country, again meeting the sea shore and following same for a short distance near Pismo Beach.

For option via Los Olivos see Note (a).

(Santa Barbara Points of Interest, Cont'd.)

pointment is believed to have hastened his death. It was not until two years after his death that Neve's successor, Fages, authorized Serra's successor, Padre Lasuen, to establish the mission.

In 1803-1807 the mission was at the height of its prosperity, its neophytes then numbering 1,792. In 1808 a plague of ground squirrels destroyed its harvests. In 1812 the earthquake damaged the buildings, opened great fissures in the mountain, formed new springs of asphaltum and alarmed the people so that they fled from the buildings and lived in the open air. The same year a second alarm was caused by the visit of Bouchard, the pirate, who, however, came not to attack, but to trick the Spaniards out of their prisoners, in which he succeeded.

Santa Barbara was preserved from decay through the influence of a petition presented to Rome in 1853 requesting that the mission be erected into a hospice as the beginning of an Apostolic college for the education of Franciscan novitiates. This was done, and St. Anthony's college, near by, was founded through the efforts of Father Wallischeck. It is for the education of those who desire to enter the Franciscan order. Five of the early missionaries and three of later date are buried in the crypt under the floor in front of the high altar of the old mission church, and Bishop Diego rests under the floor at the right of the altar. There is a small cemetery walled in and entered only from the church. It is said to contain the bodies of 4,000 Indians and several whites, and the vault in which members of the Franciscan order are buried.

In the campanile are two old bells with identical inscriptions reading: "Manuel Var-

gas me fecit ano d. 1818. Mission de Santa Barbara de la nueva California," meaning "Manuel Vargas made me Anno Domini 1818. Mission of Santa Barbara of New California." Rawhide thongs hold the first bell to its beam; the second is hung by a framework of iron. Higher up is a modern bell, which is rung, the old bells being only tolled. The mission garden is inclosed by the mission buildings. No woman may enter here save a reigning sovereign. The only ones of the gentler sex who have ever been admitted have been Princess Louise during the time her husband was Governor-General of Canada, and the wife of President Harrison during her husbands' term of office. In the center of the garden a fountain, the most ornate and beautiful in the whole mission chain, pours its waters into sculptured bowls where goldfish play. Near by is a fine Italian cypress planted by Bishop Diego in 1842, the year he took up his residence here.

The mission library includes a large number of valuable old books transferred here for safe keeping by the other missions at the time of the secularization. Here also are kept the greater part of the old mission records. In this library Bancroft gathered much of his data for his history of the California missions, and here lives and works Father Zephyrin, author of a monumental work on the "Missions and Missionaries of California." The Franciscans who live here give their time and their skilled labor to keeping up this old mission so rich in beauty and historic association, but the mission has no other income than the funds contributed by the visitors. That the money thus given is wisely expended is evidenced by the preservation and care shown in the present condition of the buildings.

*San Luis Obispo, Cal. (pop. 6,000, alt. 201 ft.), is a modern little city located half way between Los Angeles and San Francisco, about 9 miles inland from the Pacific ocean. It is the county seat of San Luis Obispo county and traces its history back to the founding of the mission San Luis Obispo de Tolosa. The coast route of the California state highway, El Camino Real, passes thru the city. It is also a division point on the shore line of the Southern Pacific railway.

The Mission San Luis Obispo de Tolosa, restored without reference to the characteristics of the original mission, was founded by Padre Fr. Junipero Serra himself on September 1, 1772. Serra departed the next day, leaving Padre Cavaller in charge with two Indians from Lower California, four soldiers and their corporal. Their supply of provisions consisted of 50 pounds of flour, 3 bushels of wheat and a barrel of brown sugar. Fortunately for them, the Indians of the locality gratefully remembered that some time previous Lieutenant Fages had killed several bears to supply the starving people of Monterey with provisions, and so they brought the padre venison and seeds at frequent intervals, so that he and his comrades managed to subsist until new supplies arrived.

The padre built a log chapel and a log house for the missionaries, and the soldiers erected their own barracks. Converts were slow in coming in, as the mission had nothing to offer them better than what they already had. A year and three months after the founding of the mission only twelve had been gained, but the second year the Indians became interested in the abundant yield of the corn and beans planted by the padre, and in the other products of the mission rancharia, and the number of neophytes increased. In 1776 some Indians hostile to those sheltered by the padres attacked the mission by shooting flaming arrows onto the roof of tules and setting fire to it. Punishment followed swiftly upon the offense. Rivera, the commandante at Monterey, came with a small force, arrested the leaders and sent them prisoners to Monterey. But their success had been such that the mission buildings were jeopardized by similar attacks twice within the next ten years. This caused the Fathers to attempt the making of roof tiles. The experiment

proved so successful that all the missions were soon provided with tile roofs.

In 1798 Padre Luis Antonio Martinez, the most widely known and most popular of the padres, began his long term of service at this mission. In 1818 Bouchard, the South American revolutionist and pirate, descended upon the coast and Padre Martinez led a force of neophytes against him. Bouchard did little damage beyond the destruction of the mission ranch house. When he sailed away to Santa Barbara he left three of his men prisoners in the hands of the Spaniards. In 1830 Padre Martinez was banished in disgrace to Madrid, where he finished his days in retirement. He was dismissed on a charge of smuggling, but it is probable that his outspoken frankness led to his being made an example of to prevent the other padres from expressing their opinions of governmental policy in regard to the missions. Padre Martinez is the host whose novel entertainment of General and Senora Moreno on their wedding tour is described by Helen Hunt Jackson in "Ramona." In 1843 a decree completing the secularization of the mission was issued, converting it into a pueblo, freeing the neophytes, turning the mission house into a parsonage and converting the other buildings to public uses. In 1846 when Frémont, in co-operation with Stockton, was marching against the southern Californians, San Luis was thought to harbor revolutionists. Frémont accordingly surrounded and took it by assault one dark night, but it was found to contain only women and children.

The original church had adobe walls which stood on stone and cement foundations. The roof was of tiles. Under the restoration these mission characteristics have disappeared. The walls have been boarded, the roof shingled, and topped by a New England meeting house steeple, and the front arcade removed. The monastery, too, has been restored with the same want of discernment. At the end, however, are two old houses which happily have been left in their original state, as has the quiet, square, old-time garden. The mission is now a parish church which still in a slight way cares for the Indians, for the Tulareños from the interior valley who come periodically to the coast to gather shell-fish make their camp fires as of right on the mission grounds.

*Atascadero, Cal., is an interesting and splendid example of what can be done in this part of the country in the way of development. It covers a strip of land some 12 miles wide and 40 miles long, and numbers among its colonists persons from all parts of the United States. Just a few years ago it was an untrodden wilderness inhabited only by cattle, with but a single dirt road and a single house in its entire expanse. A touring information bureau is maintained here.

*Paso Robles Hot Springs, Cal. (pop. 1,450, alt. 720 ft.), situated in the foothills of the beautiful Santa Lucia mountains in a great natural park of live oaks, is famous as a watering place. It is an all the year round resort and offers every opportunity for all the sports and life out-of-doors conducive to health, pleasure and happiness. The beneficent waters of these springs were drunk by the Indians before California history began and believed by them to be blessed by the Great Spirit. Later, with the coming of the Padres, the fame of the healing springs of the Pass of the Oaks became more widely known and drew the natives from all the country to bathe in the magic waters.

*The Mission Santa Ynez is situated at Calahuasa, near Los Olivos, in the valley of the Santa Ynez river, about 30 miles from its mouth and about 35 miles from Santa Barbara. It is away from the main lines of travel, but this has been to its advantage, for it has suffered less from vandal tourists and is a real museum of historical and ecclesiastical objects. Santa Ynez was founded by Padre Presidente Tapis, September 17, 1804, making it the first mission founded in the nineteenth century. It was not comprehended in the original plan for California missions, but founded in response to a petition for a mission presented by a colony of neophytes who had settled in the locality several years before and who desired the benefits of a mission and priestly services without being obliged to

go to Santa Barbara or La Purisima, several leagues distant, for them.

Twenty-seven children were immediately baptized and the building of a church commenced. This was a simple structure roofed with tile and was speedily completed, but the earthquake of 1812 caused the partial collapse of the structure, ruined the roof, cracked the walls and destroyed several buildings near by. The padres, with their usual dauntless perseverance, at once began the building of a new church constructed of brick and adobe, which was completed in 1817 and is the one the tourist still sees. On one side were the orchards and houses and on the other Indian houses and the huts. In front was the bath and laundry reservoir.

The mission was abandoned about 1850 and the building was used by the civil authorities as jail, blacksmith shop, or for whatever purpose best suited their convenience. Thru the efforts of Father Alexander Arbuckle some portions of the structure have been restored, but the earthquake of 1906 caused considerable damage, which has not yet been repaired for lack of funds. The bell tower and several of the buttresses crumbled away during spring rains in 1911. These have been replaced with concrete, and the bells, which fortunately were not injured, have been rehung and are still used.

The large reservoir almost in front of the church entrance was for the use of the padres. It is built of burnt brick and is 20 feet long and 8 feet wide. It is at the bottom of a "sunk enclosure," also of burnt brick and 60 feet long by 30 feet wide and rising 6 feet above the reservoir proper. A sloping passage of burnt brick leads down to the reservoir. Connected with this reservoir by a cement pipe 660 feet long and laid underground is another reservoir 40 feet long and 8 feet wide and nearly 6 feet deep, which supplied the Indian village with water. The supply of water for both reservoirs was brought from the mountains in flumes where

necessary in crossing ravines, but elsewhere in cement pipes laid underground. The whole waterworks formed a noteworthy engineering feat.

Among the objects in the museum of relics are obsolete firearms, branding irons, huge locks and cumbrous keys, parchment scores of music with the ancient square notes, old books with wonderful rubrics, curious religious figures carved by the Indians, and the vast yellow silk umbrella used by the padres in their long tramps in the California sun, for the strict Franciscan rule forbade their traveling in any manner except on foot. At Santa Ynez there were several workers in leather and silver who were artists of so great skill in carved work inlaid with silver that today remaining specimens of their work are not only of great value, but take high rank in collections.

The Mission of La Purisima Conception, situated southwest of the Mission Santa Ynez, near Lompoc, consists of two missions. The older, known as Mission Vieja or old mission to distinguish it from its successor, is near the town. The later mission is located some three miles northwest of the town. Both are in ruins. La Purisima was officially founded December 8, 1787, when Presidente Lasuen raised the cross, blessed the site and conducted the usual dedicatory ceremonies, but as the rainy season was coming on nothing further was done until spring, 1788. Then laborers and soldiers from Santa Barbara began work upon the buildings and soon after Padres Vicente Fuster and Jose Arroita took charge. By the end of the summer 79 neophytes had been received. From the first the mission prospered. Over a thousand baptisms are recorded for the first decade. The chapel soon became too small and a new church was completed in 1802. In 1804 the mission attained its highest population, 1,582, and in 1810 its greatest worldly wealth, at which time the stock amounted to 20,000 head.

This prosperity was brought to a sudden end by the earthquake of 1812, which wrecked La Purisima, causing the complete collapse of all the buildings and leaving almost nothing fit for even temporary use. The earthquake was followed by torrents of rain, and floods added to the calamity. But the padres, undaunted as always, erected rude huts for immediate use, and then selected a new site and began the erection of another mission. The remains of the mission of 1802, now little more than a heap of adobes, may still be seen near the town. The new mission was

located across the river and about 5 or 6 miles from the former one. Not only a church and houses, but buildings of all kinds needed for carrying on the mission were built, and waterworks were constructed. From Salsperde lake, 3 miles distant, water for both irrigation and for domestic use was brought in cement pipes which the Indians made and laid under the direction of the padres. But misfortune had not turned its back upon La Purisima. In 1816-1817 a drought caused hundreds of its sheep to perish and in 1818 nearly all the neophytes' houses were destroyed by fire. In 1823 Padre Peyeras, who since 1803 had conducted the affairs of the mission, died. After him there was no one who could hold in check the turbulent Indians, and in 1824 the Indian revolt which broke out at Santa Ines spread to La Purisima. In 1835 the mission was secularized, the estates being at this time appraised at \$60,000. In the inventory was included the library valued at \$655. Under the management of the government administrators the mission property rapidly disappeared, and when by the decree of Michel-torena in 1843 it was returned to the padres there remained from the wreckage practically only the church property. The following year an epidemic of smallpox carried off most of the mission population and the closing event in the pathetic history of La Purisima was reached in 1845, when Pio Pico sold the remaining fragments of the estate to John Temple for \$1,110. In 1856 the United States restored the mission buildings to the Catholic church.

In style, decorations and dimensions La Purisima was the least pretentious of the California missions. Its construction was peculiar in that parts of the building were in two stories and that the church formed a room merely in the great building which had many rooms and two connecting wings. Across the front of the building ran a corridor 10 feet wide whose roof was supported by square pillars built some of stone, some of burnt brick and others of adobe. Probably they were made of whatever materials were nearest to hand at the moment. The length of the whole building was 300 feet; the width without the corridor 50 feet. The church was at the southwest end on the southeast side. It was 80 feet long and had low arched windows. Nothing now remains of the wings, even the foundations having disappeared in the plowing of the ground. Some of the walls have fallen and others are crumbling. All the pillars of the corridors have fallen.

Route 393—Paso Robles to Salinas, Cal.—99.6 m.

Reverse Route 29.

Via San Miguel, San Lucas, King City and Soledad. Concrete state highway the entire distance.

When Blue Book car was in this territory during summer of 1919 to secure road information for the 1920 edition the highway between San Ardo and San Lucas was closed for paving and a temporary detour had to be followed. Some slight discrepancies in mileage might therefore be encountered in the following route matter.

The route follows the Salinas river thru a pretty valley, bordered on each side by a chain of hills, which are particularly attractive in the early spring and after the rainy season of the winter months. A great variety of crops is raised on the fertile soil along the river bed.

*The Mission of Nuestras Senor de la Soledad is situated in a grain field 3½ miles west of the town of Soledad, named for the mission. Ruined and deserted, with sagging casements and fallen arches, there is little left to tell the visitor how well it once was builded. In its desolation there is a singular appropriateness in its being named for "Our Lady of Solitude." Years before the mission was founded Padre Crespi had called the locality La Soledad, "The Solitude," on account of its drear loneliness.

In 1814 Governor Arillaga, who had been taken ill while on a tour of inspection, hastened to La Soledad that he might be cared for by his friend, Padre Ibanez. The governor died at the mission and his remains still rest under the nave of the ruined church. When Bouchard, the South American revolutionist and pirate, harried the California coast, La Soledad, being inland, became a place of refuge.

Though growth at La Soledad was slow and the mission never acquired the wealth or renown of the others, yet it was blessed with plenty and prosperity, reaching the zenith of its wealth and influence about 1820. Then, owing to the political chicanery to which it was subjected during the years preceding its secularization, it declined. In 1846 the mission was sold to the Soberanes family for \$800.

It is claimed by this family that the church, whose ruins now remain, was built by their grandfather in 1850. He had been baptized, confirmed and married in the mission church, and grieved over its neglect and dissolution during the years of mismanagement by the civil authorities; accordingly when the mission was offered for sale he bought it and rebuilt the church. The Soberanes family still resides in Soledad.

One of the saddest incidents of mission history is the death of Padre Sarria at La Soledad in 1838. This venerable priest had held a prominent place in missionary labors, having been Commissario Prefecto, and then Presidente. When Mexico broke away from Spain, he as a loyal Spaniard refused to take the oath of allegiance to the Mexican republic, and was ordered exiled, but he was held in such high esteem and trust and the confi-

dence in his business management was such that the order was never enforced. When he became enfeebled by age he retired to La Soledad. After the secularization he refused to leave the fast thinning flock, and, though supplies of all kinds were running low, he continued to minister to the few Indians who clung about the mission. One Sunday morning while saying mass he fell upon the steps of the altar and immediately expired, in reality from starvation.

The ruins of La Soledad show that the walls were made of adobe mixed with flint pebbles and built upon foundations of rough rock. The walls were about three feet thick, and plaster is still sticking to them here and there, but the roof fell in over forty years ago. Fallen beams, heaps of tumbled adobes and ruined tiles show the outline of corridor and church. Beyond La Soledad is the beautiful watering place in the Santa Lucia mountains, known as Paraiso Springs, once part of the mission estate.

*Salinas, Cal. (pop. 5,000, alt. 44 ft.), is situated on the Salinas river and lies between the Cabilan and Santa Lucia ranges of mountains about midway of the Salinas valley. Passing thru this valley, the high ranges on either hand afford a continuous panorama of varied mountain scenery most delightful and attractive to the tourist with the ever changing effects of light and shade.

Three miles south of Salinas is situated the mammoth factory of the Spreckels Sugar Co., one of the largest in the world, and the immense tracts of sugar beets tributary to it. Eight miles north is Moss Landing, on an estuary of the Pacific. The immense alfalfa fields a few miles south of Salinas are always a source of interest and admiration to the tourist. From the main street of the city a fine view of the historical "Fremont's Peak" is had.

Salinas is one of the oldest towns in the state and was for a number of years the terminus of the Southern Pacific railroad out of San Francisco. Within a radius of 30 miles of the city there is grown an unusually fine grade of Chevier barley. These crops during the months of June and July are very beautiful as they undulate in the coast breezes. Salinas is the home of the universally known Salinas Burbank potatoes.

Are you using the BLUE BOOK intelligently? It is simple.
Read how on pages 12 and 13.

Route 394—Salinas to San Jose, Cal.—57.2 m.

Reverse Route 28.

Via San Juan, Gilroy and Morgan Hill. Concrete state highway the entire distance. A low range of hills is crossed on easy but very winding grades between Salinas and San Juan and tourists are cautioned to comply with rules governing speed on grades and curves posted along the highway. The balance of this trip is over level country and particularly attractive from Gilroy to San Jose. This latter stretch is thru the Santa Clara valley, one of the most highly cultivated and productive farming districts in the state.

*The Mission of San Juan Bautista is situated in the town of San Juan. It was founded June 24, 1797, and was the second in the "filling up the links of the chain" missions. This mission was well located, the soil being fertile and the region well populated. In 1803 the corner stone of the present church was laid, and in 1809 the sacristy was completed and the image of San Juan was placed on the high altar.

In 1836 San Juan was the center of the hostilities between José Castro and Alvarado on the one hand and Governor Gutierrez on the other. Revolutionary meetings, excited speeches and the martial sound of fife and drum characterized the struggle which forced the exile of the governor and resulted in the election of Alvarado. In 1845 the inventory taken in accordance with the decree of Pio Pico that all that remained of the mission property except the curate's house, the church and the court house, should be sold, gave the value as \$8,000. In this same year Castro organized his forces at San Juan to repel the invasion of Frémont, and when California became a part of the United States through the landing of Commodore Sloat at Monterey, Castro was at San Juan and from there treated with the conquerors. To his humiliation it was Frémont who raised the stars and stripes over San Juan. Here also Frémont organized the volunteer battalion he led against Flores and his reactionaries in the south.

The mission today is much repaired and in use. The arched corridor, 300 feet long, extends along one whole side of the weedy plaza. In the corner at the right stands the church. Between it and the monastery is an "ugly modern wooden building, surmounted by a bell tower erected by Father Rubio in 1874." The fachada of the church is simply the end of the building practically unornamented. The walls of the church were supported by four buttresses on either side.

Those on the north still remain. Both church and monastery are of adobe and the floor of the monastery is paved with the original tiles laid by the fathers, conclusive proof of their thorough knowledge of the craft of making burnt brick as well as adobe. The entrance of the church is defended against the depredations of irresponsible tourists by a barricade extending from wall to wall and from floor to ceiling and kept padlocked like that of any prison. The church, unlike the other missions, is lighted by eight small windows placed almost at the top of the wall above the cornice. Within the altar rail is the tomb of Padre Presidente Estéban Tapis, whose body rests beneath the floor. The inscription records his life work. He was in America forty years and in California thirty-five. He died November 3, 1825.

San Juan Bautista originally had a chime of nine bells cast in Peru and of wonderful sweetness of tone. Only one now remains of the original chime. Two bells now hang in the hideous incongruous belfry, but neither is of the original chime. Those bells have been scattered, some to other missions and some recast. In one room of the monastery is a museum of mission antiquities. Among its objects of interest are the old chorals of Padre Presidente Tapis, who was an accomplished musician and composed a great deal of church music. The old scores are done on parchment with the large square notes for the different voices done in different colors so that the parts could be easily followed. Another musical object and the strangest thing in the whole collection is an old barrel organ made by Benjamin Dobson, The Minories, London, 1735. Also in the musical part of the collection is an old wooden wheel with four hollow spokes, between each two of which is a wooden clapper which raps upon them as the wheel rotates. On the days when the bells were not rung this instrument, which could be heard for a great distance, was used to call the people to worship.

Route 395—Salinas to Santa Cruz, Cal.—40.5 m.

Reverse Route 67A.

Via Castroville and Watsonville. First 13½ miles concrete, followed by 5 miles of oiled dirt, then 5 miles of macadam; balance good gravel and dirt, with 2 miles of concrete entering Santa Cruz. Summary: 15½ miles concrete; 5 miles good macadam; 5 miles oiled dirt and 15 miles good graded gravel.

The route traverses a prosperous farming district. From Salinas to Watsonville the country is open and slightly rolling and the rich soil is particularly adapted to dairying and grain raising. Near Watsonville hundreds of acres of the most highly developed orchards produce some of the finest apples in the country.

*Gilroy, Cal. (pop. 4,000, alt. 192 ft.), is a thriving town at the south end of Santa Clara valley and within a few miles of San Juan Bautista mission, one of the best preserved of the old missions in California. The main street of Gilroy is part of the state highway from San Francisco to Los Angeles and is paved its full length of over a mile and a half. Mount Hamilton, with its observatory, is in sight on the north, and Fremont's Park on the south. The summer home of the late Robert Louis Stevenson, now occupied by Lloyd Osborne, and the cabin of the late Frank Norris, are in the low mountains on the west. The home of the late Henry Miller, cattle king of California, is 3 miles south.

Gilroy Hot Springs is situated in the Mount Hamilton spur of the Coast Range mountains, on the side of a beautiful canyon, 14 miles northeast of Gilroy and only 43 miles from the city of San Jose. The waters from these wonderful springs are 112 degrees of temperature and contain iron, soda, magnesia, sulphur and traces of iodine, arsenic and other valuable mineral properties. There are good

accommodations here in the way of bath-houses, hotels and garages, and this spot has become a mecca for the health seeking and an unsurpassed resting place.

*Morgan Hill, Cal. (pop. 1,200, alt. 387 ft.), is built on the famous Rancho San Francisco de Los Llagas, a piece of land granted to the Castro family by the Mexican government and later purchased by the Murphy family, who were members of the Donner party. Murphy's peak, towering 2,000 feet above the valley, may be seen about one-half mile to the west of town. The university of Santa Clara, Stanford and California university are all within 50 miles of Morgan Hill.

*Watsonville, Cal. (pop. 8,000, alt. 23 ft.), is the business and geographical center of the Pajara valley. It has splendid school buildings and is the seat of the Moreland Notre Dame academy and the St. Francis orphanage. Also has substantial mercantile establishments, and numerous fruit packing plants and kindred industries. It is but two and a half hours' ride by train from Los Angeles and one hour from the seaside resorts of Santa Cruz, Del Monte and Monterey.

GARAGES—Cedar Garage, 301-303 Pacific Ave.

Route 396—San Jose to San Francisco, Cal.—49.5 m.

Reverse Route 25.

Via Santa Clara, Palo Alto and San Mateo. Concrete boulevard all the way. Leaving San Jose and passing thru the college town of Santa Clara, the route leads thru a pretty farming district. Orchards of many varieties line the highway for miles, while to the West the wooded hills of the coast range rival with splendid views of the waters of the nearby bay. Approaching San Mateo and Burlingame the route passes thru a fashionable suburban district of San Francisco.

Route 406 offers a very good option from Uncle Tom's Cabin to San Francisco via San Bruno and S. San Francisco.

*Santa Clara, Cal. (pop. 7,000, alt. 83 ft.), situated in a fertile valley of its own name, is engaged principally in the cultivation of fruit. It grew up round the old mission of Santa Clara de Assisi, founded Jan. 12, 1777. In 1851 a Jesuit priest established Santa Clara college

in the old mission buildings and in 1855 it was chartered as a university. In a room of the college building is a collection of articles saved from the old mission—candlesticks, pictures, chairs, vestments and the key to the old mission.

BATTERIES—Guarantee Battery Co., 639 Van Ness Ave.

*Palo Alto, Cal. (pop. 6,500, alt. 63 ft.), is located on the peninsula 31 miles south of San Francisco. The southern arm of the bay of San Francisco is two miles to the east, and on the west twenty miles distant is the Pacific ocean. This city owes its existence to Stanford University. With the opening of University avenue from the quadrangle to the Southern Pacific railway, it was recognized that here was the location for the college city. The first house was built in 1891, the year the university opened for instruction. A visit to the university and its campus is well worth while.

From Palo Alto southward extends that wonderful fruit belt of California known as Santa Clara valley. In this territory is raised one-half of all the prunes produced in the U. S.; no other county in the U. S. raises so many cherries or so many apricots.

Camp Fremont is located on the State highway, one mile north of the city of Palo Alto. The remount station and base hospital are located on Willow road, one mile northeast of the city and can be reached either via Pope street bridge or by leaving Palo Alto on the Middlefield road across Middlefield bridge and taking second road to the right.

*Menlo Park, Cal. (pop. 800, alt. 63 ft.), is 30 miles south of San Francisco. Here on the

Flood estate is situated the dairy college of the University of California. The town is called "the village of beautiful homes," on account of the large number of suburban residences of San Francisco men. The country round about is especially rich in berries, nursery stock, and conservatories. There are many beautiful drives in the vicinity.

*Redwood City, Cal. (pop. 2,450, alt. 10 ft.), the county seat of San Mateo county, is situated 3 miles from the Bay of San Francisco and 5 miles south of San Francisco. It has manufacturing interests, but is chiefly a residence town. It was started in 1851 as the embarcadero for shipping lumber from the immense redwood forests on the eastern slopes of the mountains. It stood at the head of tidewater on Redwood creek and was incorporated as a city without a mayor.

*San Mateo, Cal. (pop. 6,500, alt. 22 ft.), is the center of a wonderfully attractive district for motorists, with perfect roads in all directions. One may drive across the Sierra Morena mountains to the coast in less than two hours; take the shorter run to Crystal Springs lakes; go to Palo Alto and Stanford university in half an hour; to Burlingame, Woodside, Redwood City or Menlo Park in a few minutes, thru some of the most beautiful scenery in California.

*Mission San Jose de Guadalupe, of which practically nothing remains but a small portion of the monastery, is in Alameda county, 28 miles from Oakland, in the foothills of a beautiful valley, now known as Santa Clara, looking out upon San Francisco bay. The mission church has entirely disappeared, the earthquake of 1868 having demolished what was left after secularization. A modern parish church has been built upon the site. In its belfry hang two of the old mission bells, and in the baptistry the old mission font is still in use. It is of hammered copper, about three feet in diameter and surmounted by an iron cross 8 inches high. The base is of painted wood. The corridor of the monastery is plain and without arches. Willows tied with rawhide to rafters of rough hewn logs compose the roof. The garden is well kept up and there is a beautiful alameda of olive trees planted by the padres which still produce abundantly. At the end of this avenue is an orphanage conducted by the Dominican sisters.

The mission, of which so little remains, was

founded in 1797 and was the first of the five intermediary missions founded in that year which were to clasp together the isolated mission units into one great chain, the limit of one being the boundary of the next, and so on. By the end of the first year San José Mission had 33 converts. It continued to prosper, but, owing to its location in the Sacramento and San Joaquin valley, which afforded good retreats for fugitives and also made it the first mission reached by trappers from the east, its history was far from placid. Estanislao and Cipriano, who terrified the ranchers and against whom the campaign of 1829 was waged, were runaway neophytes of San José mission. The mission attained its greatest population in 1824, having at that time 1,806 neophytes.

*Niles, Cal. (pop. 1,500, alt. 85 ft.), in Alameda county, is 30 miles southeast of San Francisco. Large seed farms and nurseries are located here and it is an important fruit center. In early times the town was famous for the great flour mills constructed by Don J. J. Vallejo.

- 51.3 1.5 End of street, just beyond RR and trolley; jog left and immediately right onto 10th St.

*Palo Alto, Cal. (pop. 6,500, alt. 63 ft.), is located on the peninsula 31 miles south of San Francisco. The southern arm of the bay of San Francisco is two miles to the east, and on the west twenty miles distant is the Pacific ocean. This city owes its existence to Stanford University. With the opening of University avenue from the quadrangle to the Southern Pacific railway, it was recognized that here was the location for the college city. The first house was built in 1891, the year the university opened for instruction. A visit to the university and its campus is well worth while.

From Palo Alto southward extends that wonderful fruit belt of California known as Santa Clara valley. In this territory is raised one-half of all the prunes produced in the U. S.; no other county in the U. S. raises so many cherries or so many apricots.

Camp Fremont is located on the State highway, one mile north of the city of Palo Alto. The remount station and base hospital are located on Willow road, one mile northeast of the city and can be reached either via Pope street bridge or by leaving Palo Alto on the Middlefield road across Middlefield bridge and taking second road to the right.

*Menlo Park, Cal. (pop. 800, alt. 63 ft.), is 30 miles south of San Francisco. Here on the

Flood estate is situated the dairy college of the University of California. The town is called "the village of beautiful homes," on account of the large number of suburban residences of San Francisco men. The country round about is especially rich in berries, nursery stock, and conservatories. There are many beautiful drives in the vicinity.

*Redwood City, Cal. (pop. 2,450, alt. 10 ft.), the county seat of San Mateo county, is situated 3 miles from the Bay of San Francisco and 5 miles south of San Francisco. It has manufacturing interests, but is chiefly a residence town. It was started in 1851 as the embarcadero for shipping lumber from the immense redwood forests on the eastern slopes of the mountains. It stood at the head of tidewater on Redwood creek and was incorporated as a city without a mayor.

*San Mateo, Cal. (pop. 6,500, alt. 22 ft.), is the center of a wonderfully attractive district for motorists, with perfect roads in all directions. One may drive across the Sierra Morena mountains to the coast in less than two hours; take the shorter run to Crystal Springs lakes; go to Palo Alto and Stanford university in half an hour; to Burlingame, Woodside, Redwood City or Menlo Park in a few minutes, thru some of the most beautiful scenery in California.

Route 407—Santa Cruz to San Jose, Cal.—58.7 m.

Reverse Route 75.

Fair Boulder Creek, Governors Camp, Congress Springs and Saratoga. Fair-to-good gravel and dirt road to Saratoga; balance concrete. Summary: 48 miles fair-to-good gravel and dirt; 11 miles concrete.

A very scenic trip across the Santa Cruz mountains and thru the giant timber of the California State Redwood Forest. Route conditions across the mountains are generally good, but long grades and numerous very sharp curves prohibit fast going. From Saratoga to San Jose the road leads thru a level orchard district.

Route 405 offers a shorter option via Alma and Los Gatos.

*Boulder Creek, Cal. (pop. 550, alt. 484 ft.), one of the great lumber towns of the coast, is a resort in the midst of beautiful hills, 14 miles north of Santa Cruz. It has important manufacturers of lumber. The California Redwood park is 9 miles distant by stage. This park was purchased by the state in 1902 for \$250,000 and is especially beautiful, its natural beauty and majesty having been left almost untouched. Free camp sites are granted and there are pleasant hotels within walking and driving distance. (For description see California Redwood Park.) Boulder Creek has three tributary canyons from which come the redwood, pine and oak lumber. The fishing is good, and hunters find excellent

coverts of deer, quail, wild pigeons and squirrels.

*The California Redwood Park, a great forest of the big trees, and the Big Basin, are two of those natural wonders peculiar to California, and every visitor ought to see them. Imagine a great bowl scooped out of the Santa Cruz mountains, the floor carpeted with grass and wild flowers, the walls bristling with redwoods, on every side the hills rimming it evenly, and the name Big Basin is explained. Many of the trees are 350 feet high and 50 to 60 feet around.

First class accommodations can be had by those wishing to spend a day or more at this park exploring and enjoying its wonders.

RESTAURANTS—O'Brien's Confectionery & Luncheon, 30 S. 1st St.

Route 411—Los Angeles to Mojave, Cal.—107.6 m.

Reverse Route 683.

Via Tropic, Burbank, San Fernando, Saugus, Mint canyon, Palmdale and Lancaster. Concrete to Acton with the exception of a 3-mile stretch of dirt near the junction of Mint and Soledad canyons, fair-to-poor gravelly dirt to Palmdale, concrete to Lancaster, very poor, rough and dusty road to Kern county line (mileage 91.3), last 16 miles good dirt. The 3-mile stretch mentioned above may be paved for 1920 travel. Summary: 69 miles concrete; 14 miles fair, poor gravelly dirt; 16 miles good graded dirt; 8 miles very poor rough and dusty.

A fine residential and agricultural district, typical of southern California, is traversed to Saugus. Here we enter a hilly, wooded country extending to Palmdale and cross an irrigated farming section to Lancaster. The last 25 miles are across the western edge of the Mojave desert.

Route 412 offers a somewhat prettier option to San Fernando via Hollywood and Lankershim. Route 412 to Mojave is 6 miles shorter than this route, but with inferior road conditions between Saugus and Mojave. Boquet canyon road is badly worn and in places very rough.

Left at 22.4 is Route 384 to Ventura.

*Burbank, Cal. (pop. 2,000, alt. 555 ft.), is situated eleven miles northwest of Los Angeles and nearly in the center of the San Fernando valley. It occupies a gentle slope at the base of the Verdugo mountains, the highest peak directly back of the city having an elevation of 3,000 feet above sea level and 1,100 feet elevation at the base of the mountain, dropping to about a four per cent grade to the valley's floor. An extensive panorama view is enjoyed from this locality.

Luther Burbank, the world famous plant wizard of Santa Rosa, has never had any connection with Burbank. He, like hundreds of thousands, is familiar with the little city and its fertile resources, but in 1878 Burbank was extensively populated by sheep. It comprised the historic Burbank ranch. Six families made their living ranching. David

Burbank, who is said to have no relationship to Luther, sold this land in 1887 to the Proviencia Land and Water Co., which in turn subdivided the ranch into a townsite.

South of Burbank in the little valley at the northeast foot of Cahuenga Park is Universal City, the only city in the world built solely for the production of moving picture films.

At West Glendale, four miles from Burbank, is Eagle Rock, an old landmark. The "eagle" on the side of the rock is caused by shadows cast by overhanging rocks.

An army water poisoner who was during the late war seen climbing one of the high water tanks in an army camp "somewhere in America" was shot and killed by Otto Kirby, private, who was serving as night picket, after he had challenged the German spy twice without avail. Young Kirby is the son of Mrs. F. B. Kirby and he is from Burbank.

41.2 5.8 Left-hand road; turn left away from poles.

Straight ahead before this turn is Soledad Canyon Road to Acton.

60.9 19.7 4-corners; turn right.

*San Fernando, Cal. (pop. 3,000). Just a few minutes' ride from this city is San Fernando Rey d'Espagna mission, occupying the Reyes Rancho. The Reyes hacienda temporarily housed the mission, which also included within its lands the famous Camulos Rancho, the home of Helen Hunt Jackson's "Ramona." The mission was founded by Padre Lasuen, September 8, 1797, but Padre Francisco Dumetz and his assistant, Francisco Favier Uria, were the first priests in charge. The baptismal register shows that ten children were baptized the first day and thirteen adults in October. The tile-roofed adobe church was consecrated in December, 1806, but was so severely injured in the earthquake of 1812, which damaged nearly all the missions, that thirty new beams were needed to support the shaken walls. A new chapel was completed in 1818.

The secularization of the mission was begun in 1834 by the appointment of Lieutenant Antonio del Valle as comisionado. In 1832 Micheltorena, who had been appointed governor, stopped at San Fernando on his journey north to take up his office and was there informed of the raising of the American flag at Monterey by Commodore Jones. It was by Micheltorena's decree in 1843 that San Fernando was returned to the padres, but there were only two vineyards and a few cattle left. Even this small gain was not to be theirs for long. The Californians led by Pio Pico and Castro revolted against Micheltorena, who with most of his troops marched south to suppress the rebellion. At San Fernando was fought the "bloodless battle of Cahuenga," resulting in the capitulation of Micheltorena. In 1847 San Fernando was again the scene of warlike operations. Frémont and his battalion arrived in January and remained until after the signing of the treaty of Cahuenga, which terminated all hostilities against the United States in its conquest of California. During their stay and on their departure Frémont's command confiscated without compunction whatever horses and cattle remained to the San Fernando mission. The following year is famous for the discovery of gold in California, and with this discovery the Mission of San Fernando is associated. In 1842 Francisco Lopez, major-domo of the mission, seeking stray horses, stopped to rest and eat in the canyon of San Feliciano. In digging up

some wild onions for his luncheon he discovered a piece of gold. Search revealed other pieces. On his return to San Fernando he showed these to friends, who at one declared there must be a placer of gold in the canyon. People from Los Angeles and Santa Barbara flocked to the new gold field. The first California gold ever coined at the Philadelphia mint came from this field. It was taken around Cape Horn in a sailing vessel by Alfred Robinson, translator of Boscana's "Indians of California," and amounted to \$344.75. In the two years following Lopez' discovery about \$100,000 was taken from this placer. The first gold pans were bateas or bowl-shaped baskets made by the mission Indians.

The church at San Fernando is only a pathetic ruin. It is built entirely of adobe, with the entrance at the southwest end, while the altar stands at the northeast. On the east side is an entrance with a half-circular arch sloping into a larger arch inside with a flat top and rounded corners. Various and curious styles of these outer and inner arches are worked out in the thick walls and are of interest as affording a wonderful example of variety in adapting the arch to its necessary functions. On the northwest side of the church is the old graveyard, the doorway to which has the half-circular arch on the inside and slopes outward to an exterior square arch. Close to the graveyard and still surrounded by the remains of the original adobe walls is the old olive orchard, where a number of fine trees are still growing. There are two superb palms over 100 years old which have been the inspiration of many an artist. They stand isolated and pictures of the mission usually have these stately trees in the foreground with the long, low line of the monastery corridor in the middle distance and the beautiful hills rising into the Sierra Madre mountains in the distance. The exterior of the old monastery has been restored by the Landmarks club, which also placed the protecting shake roof over the church ruin. Close to the monastery building a fine old fountain built of brick and cement still pours crystal waters from a great double bowl on a center standard into a reservoir below. The square structure built of boulders which stands about 200 yards from the monastery incloses two circular cisterns of brick.

Route 413—Mojave to Bigpine, Cal.—166.2 m.

Reverse Route 682.

Via Red Rock canyon, Little Lake, Lone Pine and Independence. Principally good natural prairie road and 8 miles of concrete between Independence and Bigpine. Summary: 158 miles good natural prairie road; 8 miles concrete.

This road parallels the eastern slope of the Sierra Nevada range and with the exception of some farming districts around the towns en route, traverses a barren desert country. The high Sierras, their peaks covered with eternal snow, Owens lake, which is followed for many miles, the big plains, lifeless and pitiless to the wanderer who should go astray, the rugged ranges to the east encircling Death valley, all combine into one mighty spectacle substantiating the traditions of the country that lies between the Rockies and Sierras. Aside from the larger towns on this route good accommodations and supplies are obtained at Cowan Sta. and Little Lake. The last 70 miles, leading across the northern parts of Mojave desert, are frequently traveled by night to avoid the excessive heat of the day.

After a heavy rain the Jawbone Canyon Road should be used in preference to the route here given, which goes via Red Rock canyon.

- | Total Between Mileage Points | | MILEAGE—Distance | |

Route 415 Page 454 Los Angeles Section

- 105.0 9.3 Fork, just beyond culvert; bear right.
 106.1 1.1 Fork; bear right. Avoid left-hand road 116.8.
 121.4 15.3 Lone Pine. Straight thru.
 122.7 1.3 Right-hand diagonal road; bear right.
 128.4 5.7 End of road; turn left across Los Angeles aqueduct and right immediately beyond.
 130.7 2.3 Right-hand road; turn right. Thru Manzanar 132.3.
 137.8 7.1 Independence, P. O. on left. Keep ahead.
 HOTELS—Independence Hotel, on east side of main highway at center of town.
 GARAGES—Independence Garage, on main highway at S. end of town.
 139.2 1.4 Fork; bear right.
 139.5 0.3 Fork; bear right across culvert.
 141.2 1.7 Left-hand road; turn left.
 143.7 2.5 Fork; bear left away from fence.
 151.2 7.5 Fork; bear right with travel.
 163.1 11.9 End of road; turn left and immediately right.
 165.2 2.1 End of road; turn left.
 165.7 0.5 End of road; turn right onto Main St.
 166.2 0.5 BIGPINE, P. O. on right.

Straight ahead is Route 415 to Bridgeport and Route 420 to Tonopah.

Route 415—Bigpine to Bridgeport, Cal.—122.7 m.

Reverse Route 294.

Via Bishop and Mono lake. First 28 miles good dirt; 12 miles of gravel highway. followed by 35 miles of good natural gravelly sand; balance (47 miles) fair-to-poor sandy road.

A new road was being graded thru Round valley when Blue Book car passed thru this territory and work was in progress on a new road south of Mono lake. Construction will probably be completed for the 1920 travel and some discrepancies in running directions and mileages might be encountered in the following text matter.

This route parallels the Sierra Nevadas at an altitude of 4,400 feet thru Owens valley and varying between 6,000 and 8,000 feet in the mountainous regions. The trip presents a wonderful panorama of mountain scenery and many features of geological interest. Mono lake, altitude 6,428 feet in 1908, has no outlet and its level is constantly rising. There is no life in its waters, but large numbers of sea gulls nest on the island. Near the lake are a number of volcanic craters. Convict lake Silver lake and Grant lake are within easy reach of this route and offer a paradise to the lover of the angling sport.

HOTELS—Bridgeport Hotel.
GARAGES—Bridgeport Garage, on Main St., next to Wedert's store.

***Bishop, Cal.** (pop. 1,500, alt. 4,347 ft.), is situated in a fine fruit growing region at the foot of the eastern slope of the Sierra Nevada mountains about 40 miles north of Independence. Not far distant is Bishop creek, a tributary of the Owens river. This creek is 14 miles long and in this distance falls 5,500 feet, or nearly 400 feet to the mile, flowing between canyon walls whose average height is 1,000 feet. The water of this creek is used seven different times for electric generating stations at different elevations, driving them "tandem." Two reservoirs surrounded by almost vertical cliffs nestle at the heads of canyons. To secure perfect regulation of flow and to prevent ice or snow from clogging or injuring the machinery the water is carried in pipes from the reservoirs to the seventh station. The highest of the stations is situated at an elevation of 8,000 feet, nearly 1,000 feet higher than Mount Washington, the highest mountain of the eastern states. After generating power at 8,000 feet, the water drops to 7,112 feet, turning the gener-

ators there, and then successively the generators at 6,276 feet, 5,156 feet, 4,730 feet and 4,460 feet. The power is transmitted upon aluminum wires carried on towers for 250 miles southward over hills and plains to the Mojave desert and thence to San Bernardino, Riverside and the Perris valley, and is being extended through the Coachella Valley, over the Colorado desert into the Imperial valley. Near Bishop on the north are geysers and hot springs.

Several companies are operating plants for the treatment of tungsten ore on a scale of such magnitude and with mines so extensive as to presage the possibility of Bishop becoming one of the chief tungsten producing centers of the U. S. A considerable number of silver, lead and zinc mines are likewise more or less allied with the business interests of the town.

El Camino Sierra, the state highway that commands the passes of the Sierras and is part of the proposed National Defense highway system for the Pacific coast, passes thru Bishop.

Route 417—Bridgeport, Cal., to Carson City, Nev.—85.8 m.

Reverse Route 292.

Via Coleville, Gardnerville and Minden. Good dirt and gravelly sand the entire distance.

A very scenic drive along the eastern slope of the Sierras. Good camping sites are numerous, particularly thru Walker river canyon and in the hills just north of Bridgeport. The country traversed is very attractive. Large herds of cattle are seen grazing on the fertile valleys, while the snow capped peaks of the Great Divide dominate the splendid panorama.

| ~MILEAGE~ | Distance | Total Between Mileage Points | |
|------------------|-----------------|-------------------------------------|--|

| 78.4 | 7.7 | | End of road, sign on left; bear right. |
| 80.2 | 1.8 | | Fork; keep left with travel. Avoid left-hand road 83.8. Same thorofare becomes Carson St. |

*Gardnerville, Nev. (pop. 500, alt. 4,800 ft.), located in the heart of the famed Carson valley, was a favorite resting place of the daring scout, Kit Carson. Good roads lead over the mountains to Lake Tahoe, Yosemite valley, Tonopah and Goldfield and to Wallersprings, where the great baths of western Nevada are located. Fremont in his historic

trip across the Sierras stopped here for several weeks to place his men and stock in proper condition for the perilous trip. A half a century later, Gardner, for whom the town was named, built his very modest hotel and blacksmith shop on the very site of Fremont's camp to care for the overland traveler and around it sprung up the present little city.

A brief description of the states covered by this volume will be found in the back of the book. Read it and get an idea of the country you are about to traverse.

- 47.2 12.6 **MEYERS**, store on right.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attache to the office of the first territorial secretary, and the old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city—and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of

the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found footprints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in the handling of lighted matches, cigars, cigarettes, etc., when touring through wooded sections.

| 92.1 | 0.2 | Goldfield,* hotel on left, P. O. on right. Turn right onto | |

*Goldfield, Nev. (pop. 5,850, alt. 5,676 ft.), was at one time the biggest gold producing camp in the west. Upon the discovery of this precious metal in its hills, a city seemed to spring up over night, which with the years developed into one of the liveliest and most modern of its day. Many will recall the big strike which was staged at Goldfield during the years of 1906 and 1907. Of late years, like most mining towns, Goldfield has somewhat

lost its prestige as the great mining camp of Nevada and has settled down to the ordinary life of a town of its size and location. During the past year or two numerous manganese properties have been discovered a few miles from Goldfield. Sulphur deposits have also been opened up. Stock raising is carried on to some extent, the desert affording excellent winter grazing, and as the water development increases so also does the live stock industry.

*Tonopah, Nev. (pop. 5,000, alt. 6,100 ft.), the county seat of Nye county, is queen of the mining camps that dot the map of the great southwest. One hundred million dollars has thus far been blasted from out the Tonopah mines, and, to all appearance, only a fair start has been made. Here, where fifteen short years ago the horned toad and the coyote

held full sway, stands today a forest of giant steel gallows frames, a great foundry, and machine shops, and, clinging to the hillsides, several thundering stamp-mills. Withal, Tonopah is a modern and up-to-date city, offering every convenience of a metropolis to the tourist. It is a radiating center for some of the finest natural roads in the west.

| 61.6 | 3.7 | Fork; bear right thru creek. |
| 68.4 | 6.8 | Left-hand diagonal road; bear left. Pass Pine Creek Ranch on left 73.0. Avoid right-hand road at end of fence 73.1. |
| 74.6 | 6.2 | Fork; bear right. |
| 80.3 | 5.7 | Caution—left-hand diagonal road; bear left, curving right around deep washout, passing alkali lake over to right. Caution for small ruts. |
| 88.1 | 7.8 | Fork; bear left. |

*Ely, Nev. (pop. 2,075, alt. 6,000 ft.), is practically the only large town between Salt Lake City and Reno on the Lincoln highway. It is one of the greatest mining centers in the country today, containing large deposits of copper, gold and silver. The largest copper pit in the world is located here and is well worth a visit from the tourist. A splendid free camping ground with light, water, grids for cooking and shower baths is maintained by the city for use of the tourist.

The wonderful piece of road work encountered out of Ely shows the eastern tourist what can be done by a few enterprising western men. Practically all of the road work on the Lincoln Highway in Nevada is due to the efforts of Mr. G. S. Hoag, of Ely, and his associates. The tourist is advised while in Ely to call upon Mr. Hoag, who will cheerfully give him reliable information concerning any changes which have been made in the route since Blue Book representative covered it.

- 90.0 1.9 Prominent fork; bear left. Thru 4-corners 93.7. Pass Wilson Ranch on left 99.6. Avoid left-hand diagonal road 99.7-105.9.
- 106.3 16.3 Fork; bear right across culvert.
- 119.1 12.8 Fork; keep left.
- 121.5 2.4 End of road; turn right.
Left is Route 671 to Austin.
- 135.0 13.5 Left-hand road; turn left. Thru dry wash 138.8. Pass Hay Ranch 146.9. Pass ruins of old stone house on right 150.5.
- 152.1 17.1 Fork; bear left.
- 156.0 3.9 End of road, just beyond RR; turn right along same. Pass sta. on right 159.5.
- 159.8 3.8 Fork; bear right across culvert, coming onto Main St.
- 160.3 0.5 EUREKA, court house on right.

Route 423—Barstow, Cal., to Las Vegas, Nev.—247.2 m.

Reverse Route 664A.

Via Ludlow and Searchlight. Principally improved gravel and oiled road to the Nevada line, except some poor stretches between Ludlow and Amboy; balance unimproved but fair natural desert road, except last 10 miles, which is usually rough on account of the heavy ore hauling from the manganese mines into Las Vegas.

This is a section of the Arrowhead trail and used principally by southern California-Salt Lake travel. As most of this route is across the Mojave desert, where the heat is intense during the summer months, a great many tourists make the drive at night.

Supplies may be obtained at some of the small places en route, but it is advisable to make some provision for carrying a reasonable amount at all times. The route follows closely the Santa Fe RR as far as Goffs.

in the Orange insert, center of Book

A careful analysis on things necessary—and superfluous—for touring in comfort. We recommend the particular makes of accessories listed as reliable.

Route 424—Las Vegas, Nev., to St. George, Utah—146.0 m.

Reverse Route 664.

Via St. Thomas, Bunkerville and Santa Clara. Gravel and natural prairie road thru a sparsely settled desert country. This is a section of the Arrowhead trail. Most of the road is in fairly good condition.

The scenic attractions along this route are almost beyond comparison. The Red Rock canyon, west of St. Thomas, is of especial interest.

It is advisable to carry a supply of provisions, gasoline and water, as St. Thomas, the nearest town, is 60 miles away.

For fording the Virgin river, the county furnishes a team of horses free of charge.

MILEAGE

*St. George, Utah (pop. 2,000, alt. 2,800), was settled in 1862 by a colony of Mormons from Salt Lake City; by 1877 a great temple had been erected, costing a million dollars. South of St. George at the junction of the Virgin and Santa Clara rivers, high up on the cliffs, is shown the picture of the early inhabitants

of this region. Twenty miles east are the great hot sulphur springs noted for their wonderful cures, while 20 miles further on is the wonderful Zion's canyon, a national monument. In this region, exist the only silver deposits found in sandstone. Copper is mined west of the city; oil is also found in this vicinity.

*American Fork, Utah (pop. 3,200, alt. 4,563 ft.), was settled by the Mormons in 1851. It contains a large Mormon tabernacle with a seating capacity of 3,000. Utah Lake, one mile distant, offers splendid fishing, bathing and boating; also excellent camp sites. The American Fork canyon, 6 miles northeast of the city, is said to be one of the most scenic canyons in America. This can be reached and entered for a distance of about 15 miles by fair auto road. American Falls claims to have built the first sugar beet factory in the west. Sheep and wool industry is of much

importance. About one hundred thousand sheep are owned by the citizens, bringing in a revenue of half a million dollars annually.

*Lehi, Utah (pop. 3,000, alt. 5,020 ft.) claims honor as being the home of the first successful beet sugar factory built in the intermountain west. It has been in operation since 1891. Five miles south of town on the shore of Utah lake is Saratoga Springs resort, where hot mineral waters pour from the earth. Many persons afflicted with rheumatism and kindred diseases take the baths here. Tents and restaurants are maintained all summer.

*Pasadena (pop. 50,000, alt. 829 ft.) was founded some thirty-five years ago by a group of home-seekers from the middle west, who designated it the "Indiana Colony." The unexcelled climate of Pasadena is one of its chief assets, and beautiful winter homes of many prominent American men are found here, a number of them being located on Orange Grove avenue, commonly called "The Avenue of Millionaires."

The Cawston ostrich farm in South Pasadena is always interesting. San Gabriel mission, 4 miles southeast of the city, is a reminder of the old Mission days. Mt. Wilson, 6,000 feet elevation, just north of the city, on top of which is located the Carnegie Solar observatory, with the largest reflecting telescope in the world, is reached by a good auto road. The tournament of roses, which is held in Pasadena on New Year's day, at a time when the rest of the country is in the grip of winter, is very famous. The Bush sunken gardens are also of intense interest.

South Pasadena, Cal. (pop. 8,000, alt. 650 ft.), located between Pasadena and Los Angeles, is a residential city. Near by is the Cawston ostrich farm of national repute; also the Busch Gardens of Pasadena. These gardens are not open to the public at the present time (1919-20). They were taken over by the government during the late war as alien property, but have since been restored to their owner, Mrs. Adolphus Busch. Since their restoration she has not permitted access to them by the public, but a very good view may be obtained by looking over the low iron fence surrounding the vast acreage.

*Monrovia, Cal. (pop. 6,000, alt. 1,200 ft.), in Los Angeles county, is a fine health resort, and the center of a fruit growing region. It is a jaunty town on whose palms, eucalypti and orchards Mt. Lowe and Mt. Wilson look down. It has a Greek theater similar to that at Los Angeles and is famous for its fine residences. The town was founded by W. N. Monroe, hence its name.

*Duarte, Cal. (pop. 650), is a post village in the San Gabriel valley on the southern slope

of the Sierra Madre mountains. The town has won fame through the numerous prizes won by its Thompson improved navel and Valencia oranges. The water supply is community owned and furnished at cost. The town is named for Andres Duarte, a Mexican military officer, a part of whose 4,000 acre grant from the Mexican government in the 40's is the site of the town. Duarte is one of the prettiest sections of the county.

*Azusa, Cal. (pop. 1,600, alt. 614 ft.), is surrounded by a fine fruit growing and mining region and lies on a gently sloping plateau about a mile from the foot of the steep southern front of the San Gabriel mountains. About 2 miles west of the town in San Gabriel wash, or the bed of the San Gabriel river, the largest stream flowing from the San Gabriel mountains. A mile directly north is the mouth of the canyon of the San Gabriel river. In the rainy season this stream is of considerable size and furnishes the water for irrigation of the surrounding ranches, but in the dry season it is a mere thread. The bed of the river is filled with large boulders which are crushed for road building purposes. The canyon is forested with oaks, sycamores and resinous pines, coursed by trails and pebbled brooks with waterfalls. In contrast with this camping region is the valley. Seen from "any outlook on the canyon's brim the files of citrus groves show like well-drilled troops maneuvering on the level plain below."

*Glendora, Cal. (pop. 2,000, alt. 745 ft.), was founded by G. D. Whitcomb, who personally superintended the planting of the pepper trees which line its streets. The poet Mueller in a visit to this town described it as a "Poem in Pepper-Trees." Judge Silent's park is one-half mile north of Foothill Blvd. on Grand Ave. The home of Nell Brinkley, famed artist, is three-quarters of a mile north of Foothill boulevard on Grand avenue. The home of Frank Chance, known as the "Cuba-Ranch," is one-half mile south of boulevard on Grand avenue. J. P. Englehart, well known lemon tree scientist, also makes his home in Glendora.

63.3 1.3 **SAN BERNARDINO, 3rd & E Sts., bank on right.**

SERVICE STA.—United States Tire Sales & Service Depots located here.

*Claremont, Cal. (pop. 2,000, alt. 1,200 ft.), was formerly the home of the Mission Indians, their rendezvous, known as Indian Hill, now being used as the Indian Hill golf links. An old Indian burial ground is located close to the town. Timber used for the construction of the San Gabriel Mission was hauled from here by oxen, a distance of 28 miles, and the Mission olives were first planted in this district by the padres. An old kiln where the Indians made their pottery is still standing.

They glazed the surface of this pottery with asphalt which they brought from Brea canyon. Pomona college, one of the largest educational institutions west of the Rockies, is situated in Claremont. Claremont also boasts of the largest ice manufacturing plant in the county, outside of Los Angeles.

This district is an important center of the orange and lemon industry of California, being known as the "hub of the citrus fruit." It also offers good hunting and fishing.

POINTS OF INTEREST, SAN BERNARDINO, CAL.

San Bernardino (pop. 18,225, alt. 1,054 ft.) is situated in the center of the fertile San Bernardino valley, which in point of scenic beauty is not excelled in the state. To the north is the famous landmark, "The Arrowhead," plainly discernible thruout the entire valley. The Arrowhead Hot Springs, Urbita Hot Springs and Harlem Hot Springs are popular and attractive resorts.

The most notable of the many drives in and about San Bernardino is the famous hundred and one mile highway, known as the "Crest-Drive," which begins and ends in this city.

This follows along past Arrowhead Springs, Thousand Pines, Squirrel Inn, Pine Crest and on thru the massive stone gates at South Park, where one is brought to the real "Rim of the World," for the line follows directly along the precipitous side of the mountains at an elevation of 5,000 to 7,000 feet, with long and almost sheer drops into the blue canyon below and vast visions of the valley and foothills beyond. The road then continues over mountain and thru valley to Big Bear lake, then down the wonderful Clark grade and the scenic Mill Creek canyon into Redlands, back into San Bernardino.

- 60.9 1.2 SAN BERNARDINO, 3rd & E Sts.

*Covina, Cal. (pop. 2,900, alt. 559 ft.), is 20 miles east of Los Angeles, in the center of one of the greatest orange districts in California, for which it is one of the most important shipping points. It is also the largest berry district in southern California. The water supply comes from the San Gabriel river and from wells, under a co-operative system at a cost of \$10 per acre per annum.

*La Verne, Cal. (pop. 954, formerly Lordsburg), is 30 miles east of Los Angeles. The district is devoted almost exclusively to orange and lemon culture. The largest orange packing house in the world is located here. The earliest settlers were Dunkards, who founded a school here now known as La Verne college.

*Claremont, Cal. (pop. 2,000, alt. 1,200 ft.), was formerly the home of the Mission Indians,

their rendezvous, known as Indian Hill, now being used as the Indian Hill golf links. An old Indian burial ground is located close to the town. Timber used for the construction of the San Gabriel Mission was hauled from here by oxen, a distance of 28 miles, and the Mission olives were first planted in this district by padres. An old kiln where the Indians made their pottery is still standing. They glazed the surface of this pottery with asphalt which they brought from Brea canyon. Pomona college, one of the largest educational institutions west of the Rockies, is situated in Claremont. Claremont also boasts of the largest ice manufacturing plant in the county outside of Los Angeles.

This district is an important center of the orange and lemon industry of California, being known as the "hub of the citrus fruit." It also offers good hunting and fishing.

Route 430

Page 472

Los Angeles Section

Route 430—Riverside to El Centro, Cal.—174.7 m.

Reverse Route 587.

Via Beaumont, Banning, Thermal and Brawley. First 21 miles concrete; graded gravel to Beaumont; alternate stretches of macadam, concrete and natural desert road balance of way. Summary: Approximately 40 miles concrete; 30 miles good macadam; 25 miles good graded dirt; 100 miles partly improved or natural desert road.

Considerable work has been done between Thermal and Westmoreland and the once dreaded desert stretch along the Salton sea presents no serious difficulties unless the tourist should be unfortunate enough to run into a sand storm. Supply and stopping places are frequent as far as Thermal. At this point tourists must replenish their gas and oil supply to capacity and provide for eatables and plenty of water. This route carries considerable travel and with the exception of about 20 miles of poor road, south of Thermal, good time can be maintained almost all the way. Use caution going over the 8-foot concrete stretch across the desert, owing to the excessive heat bad breaks are liable to occur at any time.

*Brawley, Cal. (pop. 4,500, alt. 50 ft.), is one of the principal producing centers and shipping points of the Imperial valley. It produces 80 per cent of the cantaloupe crop grown in the valley and gins more cotton

than any of the other valley towns except Calexico, which handles cotton from below the international boundary. The town is prosperous and has modern hotel and garage facilities.

About Blue Book Hotels and Garages

The listings of hotels and garages in the pages of this Book are arranged alphabetically and *not according to their standing*. We recommend them all as the most desirable in their locality. Their advertisements (see page number in Index of Cities and Towns, front of Book) outline their accommodations in detail and enable you to plan your stops intelligently.

Route 431—Riverside to Blythe, Cal.—193.1 m.

Reverse Route 593.

Via Beaumont, Banning, Thermal and Mecca. First 21 miles concrete; graded gravel to Beaumont, alternate stretches of gravelly sand, macadam and concrete to Thermal; balance mostly natural sand and gravel. Summary: 30 miles concrete; 30 miles fair-to-good macadam; 130 miles mostly fair-to-good natural desert road.

This is part of the most direct route between Los Angeles and Phoenix, and is preferable to the Needles Parker route excepting during the two months in spring when ferry service across the Colorado river at Blythe is stopped on account of high water. From Mecca to Blythe the route traverses an uninhabited desert region, but

road conditions are fair and a good average speed can be maintained. There are no stopping and supply stations between Mecca and Blythe, a distance of 95 miles, so tourists must arrange for supplies accordingly.

*Imperial, Cal. (pop. 3,000, alt. 50 ft.), is the oldest city of the Imperial valley and the center of a prosperous farming district, devoted largely to the growing of cotton and alfalfa. It is also a center for the cattle and hog industry and supports a large packing plant.

*El Centro, Cal. (pop. 6,000, alt. 50 ft. below sea level), is on the New National Southern highway, in the Imperial valley. It is, as its name indicates, the center of the valley, and is a rapidly growing place which already has substantial business blocks of concrete and numerous handsome residences. El Centro and Blythe are the two cities in California which hold cotton festivals, for they now grow Egyptian cotton with a longer and finer and stronger fibre than any produced in the south. (For an account of the Imperial valley and the formation of the county, see Calexico, and also see Imperial Valley.)

Imperial Valley, Cal., generally known as the "Nile of America," is situated in the extreme southeastern part of the state at an altitude varying from sea level to 202 feet. This depressed portion is surrounded, at a slightly higher level, by a conspicuous an-

cient beach-line, being supplied in ages past by the Colorado river.

In 1900 Imperial Valley was a barren waste, an abode of death rather than life, where many pioneers perished for the want of water. Today Imperial Valley supports eleven thriving towns and has contributed immeasurably to the glories of her state thru the fertility of its silt deposits. Its alluvial soil is easy of tillage and wonderfully productive. In 1901 the first canal to bring water for domestic purposes from the Colorado river was completed. Thus was launched the greatest irrigation system in the United States. Stepping forward seventeen years, as if by magic, picture the present scene: Three hundred thousand acres producing crops twelve months in the year. It leads the world in asparagus production, dates, canteloupes, cotton, long staple; seedless grape fruit, butter, alfalfa, dairying, etc. No snows—no winters—all summers.

This valley gained a great deal of prominence in the east when Harold Bell Wright's story, "The Winning of Barbara Worth," which was staged there. Mr. Wright lives on his ranch near Holtville.

Route 431A—Blythe, Cal., to Phoenix, Ariz.—172.5 m.

Reverse Route 592.

Via Quartzsite, Vicksburg, Salome and Buckeye. Mostly natural desert road to Palo Verde, balance fair graded dirt.

Considerable work has been done on this route and a good average speed can be maintained. It is possible to make the trip in one day. The route traverses a level desert region with only a few low mountain ranges dividing the huge mesas. Pa'o Verde lies at the edge of a rich agricultural district and the tourist now travels thru the best settled area of Arizona. Meals and supplies may be had at Quartzsite and Salome.

 Right on F St. then left on 2nd St. is Route 434 to Kingman, Ariz.

Route 434—Needles, Cal., to Kingman, Ariz.—71.0 m.

Reverse Route 603.

Via Topock and Yucca. Good gravelly dirt to Topock, fair-to-poor road to Yucca; balance good gravel. Summary: 40 miles good graded gravel; 31 miles fair-to-poor natural desert road.

Good time can be made between Needles and Topock and again between Yucca and Kingman, but the intermediate stretch is naturally slow on account of many cross washes and, in places, very poor road.

The route traverses a desert country, crossing the Colorado river on a splendid steel bridge at Topock.

*Needles, Cal. (pop. 3,000, alt. 491 ft.), 250 miles northeast of San Bernardino, is a railroad town with railroad shops, etc. The town is on the Arizona border and on the banks of the Colorado river. The climate is

beneficial for consumptives, the air being dry, without fog or dew, but the heats of summer are excessive. The Mohave Indians dwell in the vicinity. The town derives its name from the peculiar shape of the rocks in the neighborhood.

Reverse Route 602.

Via Seligman, Ashfork and Williams. Fine graded gravel to Hackberry, good road thru Truxton canyon to a point 6 miles east of Peach Springs, 10 miles of poor rough road thru canyon near western end of Yavapai county, followed by fair-to-poor going to Seligman; balance mostly good graded gravel and dirt. Summary: 140 miles good to excellent graded gravel; 25 miles fair to poor; 10 miles very rough.

Leaving Kingman the route follows close along the RR thru a flat prairie country to Hackberry, then enters Truxton canyon and traverses big flats and several low mountain ranges to Ashfork. Shortly beyond route enters a pine covered, hilly district. Good night stops may be had at Seligman, Ashfork and Williams.

 Right is Route 620 to Winslow and Route 441 to Grand canyon.

*Williams, Ariz. (pop. 1,275, alt. 6,750 ft.), is the southern terminus of the Grand Canyon railway. It is here that all travelers change cars or trains for that great scenic wonder—the Grand Canyon national park. In addition to being the "Gateway to the Canyon," Williams possesses a number of points of interest. The town lies at the very base of Bill Williams mountain, which has been accurately described as the most beautiful mountain in Arizona. The town, the mountain and one of the largest tributaries of the Colorado river derive their name from the famous old scout, guide, trapper and pioneer—Bill Williams, one of the most unique characters of the west, and a fast friend of Kit Carson. It was upon Carson's recommendation to General Fremont that Bill Williams was placed in charge of Fremont's celebrated expedition to California in 1848, upon which occasion the expedition passed over the old Santa Fe trail, immediately north of the town of Williams. Together with Dr. William Kent, Bill Williams was smoking in camp one evening when a party of twelve Ute bucks entered the camp, professing friendship. Suddenly they sprang upon the two white men and treacherously murdered them.

In Williams is located one of the largest saw mills in the southwest. This mill is but a short distance from the town and visitors are always welcome. Other features of interest in close proximity are Coleman lake, the Old Crater, Parker's cave, Elephant park, Bill Williams mountain and the Indian hieroglyphics. The Old Crater is the crater of an extinct volcano, about 30 feet in diameter and 70 feet deep. Descent into it is made by means of a ladder, which is perfectly safe.

Parker's cave is particularly interesting because of its associations with the once famous bandit, Parker. The Indian hieroglyphics are but a mile from town, and, altho they have suffered considerable weathering with the lapse of years, are still a fine example of Indian work. From the summit of Bill Williams mountain one of the grandest views in America may be had. On a clear day four states can be seen, while the walls of the Grand Canyon appear only a few miles distant. Elephant park has some of the most unique rock formations in the southwest.

*Flagstaff, Ariz. (pop. 3,500, alt. 6,907 ft.), is situated near the foot of the volcanic San Francisco mountains. This district is given largely to sheep and cattle raising. Nine miles distant are the prehistoric cliff dwellings; 16 miles, the Sunset mountain and lava beds; 40 miles, the Painted Desert; the Grand Canyon national park, 75 miles, and Oak Creek, a splendid trout stream, 16 miles. In the town is Lowell observatory, visited by many.

The Navajo National Monument is within the boundaries of the Navajo Indian reservation in Arizona. It can be reached only by saddle horse and pack outfit over a rough trail from Marsh Pass or Kayenta. To reach Kayenta one travels by road from Flagstaff, Arizona, or from Gallup, New Mexico.

This monument includes two interesting and extensive pueblo or cliff dwelling ruins, in a good state of preservation, known as Betata Kin and Keet Seel; also a third cliff dwelling ruin called Inscription House. The Betata Kin ruin is so named because it stands on a hill. It is situated at an elevation.

What to Take on the Tour

WHEN it comes to the selection of touring equipment, an ounce of common sense is worth a pound of advice. Necessary equipment for one tour is unnecessary for another. The list given below contains equipment which will enable you to meet every emergency short of an absolute wreck. It is not expected that any tourist will have to carry all of these items, but the list will offer suggestions and call to your mind articles you have overlooked. First familiarize yourself as far as possible with the conditions you will meet on the tour, the distance between supply stations, the condition of the roads, etc. With this in mind, determine, not how much you can take, but how much you can eliminate and still be prepared for the unexpected. Travel as light as possible. Every unnecessary pound wastes space and power. How much of the following do you need and how much can you do without?

(For Editor's List of Equipment and Accessories—See next page)

Where to stop at night has always been a problem to the motorist. This problem has been solved by the Auto Bed Camp—it's like carrying your hotel on your running board. Auto Bed Camp Equipments sell from \$15.00 up. Full details upon request.

What to Take on the Tour

EDITOR'S LIST OF EQUIPMENT AND ACCESSORIES

- 1 **Tool kit:**
large and small monkey wrench.
two sizes of screw drivers.
set of socket wrenches.
set of open end wrenches.
pipe wrench.
machinist's hammer.
punches, cold and cape chisels.
files.
cotter pin extractor.
cutting pliers; thin nose and slip joint.
knife.
small vise to clamp on running board.
- 2 **Tire equipment:**
two demountable rims, with extra tires, and tubes.
extra rim bolts and nuts.
two additional tubes, in bags.
two blowout patches.
one blowout shoe (outside).
one brace to fit rim bolts.
good set of tire tools.
tire and tube repair material and kit.
air valves and caps.
air pressure gage.
talc for tubes.
- 3 **Fuel and oil equipment:**
oil squirt can.
gallon can of oil.
gallon of gasoline (reserve).
grease gun and small can of grease.
combination funnel and pint measure.
piece of chamois.
- 4 **Repair material:**
wire insertion asbestos packing.
Several sizes soft iron wire.
box assorted nuts, bolts, and lock washers.
assorted cotter-pins and terminals.
electric tape.
length high tension cable.
length low tension cable.
radiator repair bolt, nut and washers.
- 5 **Tire chains:**
extra cross chains.
- 6 **Jack:**
small block of wood to place under jack.
- 7 **Spark plugs and gaskets:**
gage for testing spark gap.
plug terminals.
- 8 **Valve and spring assembly.**
- 9 **Spot light.**
- 10 **Trouble lamp.**
- 11 **Hand pump or engine pump.**
- 12 **Pull-out device.**
- 13 **Collapsible shovel.**
- 14 **Roll of chicken wire, 12" — to pull out of sand.**
- 15 **Waste and cheese cloth.**
- 16 **Folding bucket.**
- 17 **Thermos bottle and lunch kit.**
- 18 **Touring trunk (dust proof).**
- 19 **Suitcase carrier brackets.**
- 20 **Waterproof cover for luggage.**
- 21 **Hand soap.**
- 22 **First aid kit.**
- 23 **Extra bulbs in protective case.**
- 24 **Hydrometer for battery.**
- 25 **Motometer for Radiator.**
- 26 **Radiator hose and hose clamps.**
- 27 **Extra spring clip and bolts.**
- 28 **Spring clamp for broken spring.**
- 29 **Set of crankcase pet cocks.**
- 30 **Head-light dimmer lenses.**
- 31 **Celluloid cover for Blue Book.**
- 32 **Foot rest for gas throttle.**

Brake Linings

ASBESTOS BRAKE LINING

Before starting on that trip have your brakes relined with S-M-C. Its use means

Safety Made Certain

Better made, of superior quality asbestos, with friction wire interwoven, and treated with the Special S-M-C compound which makes it slip-proof, heat-proof, oil-proof and water-proof. Your garage man can supply S-M-C—see those letters on the roll.

Staybestos Mfg. Co., 5537 Lena St., Phila.

What to Take on the Tour

A few comments on the various items in the accompanying list are now in order. Any stock car in good condition is capable of making even a trans-continental tour. If petcocks are used under the crankcase, carry an extra set, or substitute beveled plugs, which will not be scraped off or opened by the high crown of a road.

The one part of the equipment which will not tolerate much pruning is the tool kit. We would strongly advise the use of the entire list of tools given under section No. 1.

You can make your trip a record of tire trouble punctuated with punctures and blowouts, but there is no need of it. Start the tour with good tires and tubes on all four wheels, with two complete changes (demountable rims, tires and tubes and with two additional emergency tubes in the car). A great many punctures occur in the tool box; inner tubes should be correctly folded and carried in bags to prevent chafing. Be generous with

Jack your car on ball bearings

Jacks

A few easy turns on the long handle and your car is raised. To lower it, merely reverse the turns and pull the jack out by the handle. You perform every operation without one getting under the car. The diamond point hardened steel top with BULL DOG grip blue the axle and holds it firm. There is no danger of slipping. You can avoid having the tire rim fall on a deflated tire.

What to Take on the Tour

insist on having it "chamoised." Unless your car is fitted with a tank containing a gasoline reserve, it will be a good idea to strap a gallon to the running board.

Material for roadside repairs earns the small space that it occupies. You can often repair a honeycomb radiator which has sprung a small leak, or been hit by a stone—by means of a bolt and nut with a leather and metal washer at each end. Pass the bolt through the opening where the leak occurs and tighten the nut. The washers at each end seal the opening between the cells. Carry a length of rubber tubing. If the feed line wears through file it in half at the point where the leak occurs, slip the ends into a piece of rubber tube and wire it tightly.

Some sort of emergency tire chains should always be carried, whether your tires are anti-skid or not. For heavy deep mud heavy single chains or mud hooks fastened over the tire and around one spoke of the wheel will insure a prompt getaway from the worst mud hole. It is possible to put on such chains without

getting off the running board. In using lighter chains for regular travel over slippery roads it is advisable to use springs to hold them fairly taut—though not too stiff to prevent creeping.

Buy the best, most durable jack on the market. The best is none too good to stand the heavy strain of the weight of your car. A long handle jack will enable you to place the tool under the rear axle without getting down on all fours. There are several excellent jacks on the market of this type. A small block of wood makes an excellent bed for the base of the jack when necessary to change a tire on uneven ground; it often saves valuable time in hunting for a stone and it takes up little space; some jacks have supplementary bases for this purpose. In case you break a spring a ball of heavy binder twine is invaluable; raise the body sufficiently to insert the ball between the axle and the frame; it will stay in place and has plenty of "give" to break the jar, enabling you to drive much faster to the nearest repair station.

Do not fail to carry extra plugs. Try them to be sure that they fit the thread, see that they have gaskets and that they will "spark" properly.

An approved type of headlight lens is necessary. A spotlight is a valuable addition to your equipment if you are following sign posts or a crooked, unfamiliar road after dark. Keep the

light down when you are approaching other users of the road. Abuse of the spotlight is resulting in unjust criticism of it. Ten or fifteen feet of electric cable fitted at each end with proper connectors will enable you to remove the headlamp or the spotlight and use it as a trouble light anywhere around the car.

A flat tire, a hot sun, and a poor pump will take all the joy out of life or touring. Some of the latest pumps are unusually easy to operate and are more efficient than the old "back breakers." Fortunately, too, the engine driven tire pump is gaining in popularity as part of standard equipment. Don't forget the pressure gauge, even though there is one connected in the air line of the engine pump. These gauges often read from five to fifteen pounds too high because of the additional pressure necessary to overcome the resistance of the valve itself.

It is better to *keep* out of trouble than it is to *get out* of trouble. When approaching mud or sand, or turning into a ditch, shift to a lower gear before you have to. It is seldom difficult to get out of a hole or sand if you handle the car properly. On bad sandy stretches, drive slowly, but as long as you can keep the car moving, *don't stop* and you will stay on top of the sand. The minute you stop, your rear wheels will immediately dig in. In such an event, try alternating reverse and first speed in quick

What to Take on the Tour

succession with passengers and extra weight removed. If you are still unsuccessful, your roll of 12-inch chicken wire—if you have included it in your equipment—will get you out. Simply work it under the drive wheel and corresponding front wheel; it will give you sufficient traction to pull out without trouble. You will run across few stretches of sand anywhere in this country that you cannot easily overcome. It is often advisable to deflate the rear tires to an inch and a half from the rim. This will give a broad traction about twice the ordinary width and by driving slowly you can go over the worst sand with comparative ease. Be sure to inflate immediately after passing the bad stretch.

Unless you buy a water-proof, dust-proof touring trunk you may find it necessary to send your "hotel clothes" on ahead. Suitcases with well designed suitcase carrier brackets are all right if you cover them carefully, not only on top, but also underneath, where water thrown onto the running board by the wheels can reach them.

Your battery is in danger of being overfed. Continuous day driving with no lighting and little demand for starting current may overcharge and overheat it. Feel of the top connectors and if they are more than blood warm, burn all the lights and go slow for a while. A battery needs water when the level begins to get low, not when its ten days or two weeks are up. Every

New York
Toronto, Canada

What to Take on the Tour

450 miles is a good average and that means every two or three days when you are touring. Carry your hydrometer and get distilled water from any reliable garage or from a druggist. To find the location of the nearest battery service station; refer to the General Index in the front of this book. Service stations of car and accessory manufacturers are also included. Their names, with street addresses, are listed under each town.

Lubricate according to mileage, not according to a certain number of days, weeks or months. Your engine is not at all interested in the calendar. Many tourists run their differentials dry, because in town they only filled them once in four or five months. Grease the speedometer swivel joint. If you never greased it before, hunt it up and give it a surprise.

Preparedness is worth the price. Select your equipment carefully. Then bear in mind that your car is traveling as far in a day as it sometimes travels in a week, and treat it accordingly.

- 58.7 13.8 Fork at foot of grade; bear left. Bear left away from RR 60.8.
- 61.3 2.6 Ferry across Colorado river.
Charges \$2.50 per car.
Leaving ferry, keep straight ahead along edge of bluffs. Ascend gully 61.7.
- 62.4 1.1 End of road; turn right across RR and curve left immediately beyond with main travel.
- 62.7 0.3 PARKER, center of town, sta. on left.
Straight ahead is Route 437 to Phoenix.

(Points of Interest, Continued.)

tion of 7,000 feet, in a crescent-shaped cavity 600 feet wide by 350 feet high, in the side of a soft red sandstone cliff which forms the walls of a small canyon. It is about 8 miles north of Marsh Pass and 18 miles northwest of Kayenta.

Originally the ruin contained 106 rooms. The roof is of spruce timbers, placed cross-wise, the ends projecting through the outer walls. Smaller poles are placed at right angles with these and then covered with a bunch of willows and mud which forms the roof. Inside, the walls are plastered with mud; and in nearly every room there is a small circular hole about 9 inches deep, which evidently was a fire place. The average size of the rooms is 6 x 6 x 6 feet.

The Keet Seel ruins (Navajo for "broken pottery") are in a crescent-shaped cave 400 feet long and 150 feet high on the west side of Laguna creek, 24 miles west of Kayenta.

These are similar to the Betata Kin ruins but much better preserved. There are 47 rooms with standing walls, the roofs having fallen in, and 56 rooms with well-preserved roofs. These are 7 by 7 feet in size. It is necessary to scale a steep cliff for 30 feet to reach the base of the ruins.

Inscription House Ruin is on Navajo creek, about 20 miles west of Betata Kin. It is regarded as extraordinary, because of the inscriptions in Spanish by early explorers which were written upon its walls as early as 1661. It is about half way up the side of a steep cliff in a crescent-shaped niche 50 feet in depth by 500 feet in length and about 75 feet in height. The Inscription House, unlike the others, is built of mud bricks with straw. The bricks are about 4 inches square by a foot or more in length, and laid with mud mortar. The roofs also are made of mud bricks on a framework of small posts. There are 64 rooms, 30 of which are roofed.

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in the handling of lighted matches, cigars, cigarettes, etc., when touring through wooded sections.

Routes 437-438 Page 482 Los Angeles Section

Route 437—Parker, Cal., to Phoenix, Ariz.—177.1 m.

Reverse Route 588.

Via Bouse, Vicksburg, Salome and Buckeye. Mostly natural desert road to Palo Verde; balance fair graded dirt.

The route traverses a barren desert country practically the entire distance. Palo Verde lies at the edge of a rich agricultural district and the tourist now travels thru the best settled area of Arizona. It is advisable to carry water both for drinking purposes and for the machine.

| 29.1 | 2.7 Toquerville. Straight thru. |
| 29.9 | 0.8 Left-hand road; turn left across iron bridge, descending rough grade thru coulee. |

*Zion National Monument, otherwise known as Zion Valley, is located in southern Utah and reached by the Arrowhead trail. Those who have visited this wonderland say that it excels the Grand Canyon or the Yosemite valley for grandeur and magnificence. The government made a special appropriation of \$15,000 for the building of a road in the can-

yon. The state highway, leading to this wonderland, is every mlie a built road. Transportation and camping facilities have been provided for in this section, and Zion National Monument, though but little known at present, will shortly be renowned over the entire country because of its magnificent scenery.

*St. George, Utah (pop. 2,000, alt. 2,800), was settled in 1862 by a colony of Mormons from Salt Lake City; by 1877 a great temple had been erected, costing a million dollars. South of St. George at the junction of the Virgin and Santa Clara rivers, high up on the cliffs, is shown the picture of the early inhabitants

of this region. Twenty miles east are the great hot sulphur springs noted for their wonderful cures, while 20 miles further on is the wonderful Zion's canyon, a national monument. In this region exist the only silver deposits found in sandstone. Copper is mined west of the city; oil is also found in this vicinity.

Route 451—San Bernardino to El Centro, Cal.—171.9 m.

Reverse Route 583.

Via Redlands, Beaumont, Banning, Thermal and Brawley. Concrete to Redlands; then 8.5 miles good macadam; poor dirt except for a short stretch of concrete entering Beaumont. From Beaumont alternating stretches of macadam, gravelly sand and concrete to Thermal, then natural desert road and 10 miles of concrete to Westmoreland; graded dirt balance of way. We are advised that the unpaved section on this trip from Redlands to Beaumont will be graded and hard surfaced in the near future. Summary: 25.9 miles macadam; 20 miles concrete; 103.1 miles desert road, dirt and gravelly sand; 15.5 miles sand; 7.5 miles poor dirt.

A charming variety of scenery is enjoyed on this trip to Beaumont, which runs for the most part thru vast groves of citrus fruit, as well as pear and apple orchards on the rolling hills east of Redlands. Considerable work has been done between Thermal and Westmoreland and the once dreaded desert stretch along the Salton sea presents no serious difficulties unless the tourist should be unfortunate enough to run into a sand storm. Supply and stopping places are frequent as far as Thermal. At this point tourists must replenish their gas and oil supply to capacity and provide for eatables and plenty of water. This route carries considerable travel and with the exception of about 20 miles of poor road south of Thermal, good time can be maintained almost all the way. Use caution going over the 8-foot concrete stretch across the desert, as owing to the excessive heat bad breaks are liable to occur at any time.

- 73.4 2.6 4-corners; turn left with pavement.

*Corona, Cal. (pop. 5,200, alt. 602 ft.), lies 48 miles s. e. of Los Angeles. It is the largest shipping point of lemons in the United States. It has two byproducts plants, shipping tons of citric acid manufactured from cull lemons—the only plants of the kind in the United States. One lemon grove of 820 acres is irrigated from two connected wells, an engine forcing water through pipes three and one-half miles at an elevation of 750 feet.

*Anaheim, Cal. (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from

the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

*Redondo Beach, Cal. (pop. 2,950, alt. 13 ft.), is a popular amusement and recreation beach resort situated on the shores of the Pacific, 15 miles southwest of Los Angeles. Connects with all important southern California resorts and cities by smooth macadam automobile boulevards.

"Spanish Promenade," a fashionable amusement district along the edge of the surf, is one of the attractions. Moonstone Beach, where semi-precious stones are washed up by the action of the ocean, is another allurement.

Largest hot salt water plunge in the world and mammoth auditorium, seating 10,000, are important features. Military band concerts daily. Tent City, seaside parks and children's playground offer breathing spots. Famous triangular pier is an unique over-the-sea structure.

Redondo Beach is built on a series of terraced hills, rising gradually from the sea, and covered in large part by great carnation gardens, giving the town the title of "The Carnation City."

POINTS OF INTEREST, REDLANDS, CAL.

Redlands (pop. 13,000, alt. 1,347 ft.), the center of the orange country, lies 8 miles southeast of San Bernardino, in a fruit, grain and mining region. It is the home of the university of its name—the youngest in the state, which yet has the finest college of music in California. It is also the home of the first irrigation system in this section. The Zanja, which runs thru the city, was built by the Indians to irrigate their ranches, for which purpose it is still used, only now for orange groves instead of gardens. Redlands ships more oranges than any other citrus center in the world. Some 5,000 cars, or 2,000,000 boxes, are shipped every year.

Many of the greatest Americans have visited Redlands, and have been highly delighted with this beautiful little city. William McKin-

ley, upon leaving its gates back in 1901, expressed his great pleasure in the drive thru its parks and avenues, and his admiration of its beautiful homes.

The chief scenic attractions of this vicinity are Smiley Heights, Sunset drive, the Rim o' the World drive to Bear valley, over the crest of the beautiful San Bernardino mountains, Forest Home and the Mill Creek canyon, a beautiful mountain resort and canyon of unexcelled popularity, and the Yucaipa valley, where the "big red apple grows." These are all within a few hours' run over splendid drives, and it is but 65 or 70 miles to the ocean over a paved road. In the southern part of the town itself may be seen the ruins of the historical old Brookside mission—an attraction for all tourists.

Route 470—Los Angeles to San Diego, Cal.—182.9 m.

Reverse Route 548.

Via Pomona, Riverside, Elsinore and Escondido. Oiled macadam to Pomona, concrete to a point 5 miles south of Temecula, gravelly dirt to Camp Kearny forks, concrete to Oldtown, dirt to San Diego. Summary: 65 miles concrete; 34 miles oiled macadam; 64 miles good graded gravelly dirt.

This is the inland route to San Diego. Although 50 miles longer than the coast road, the trip can easily be made in one day as far as distance and road conditions are concerned. There are many points of interest, however, which the tourist should not fail to visit and at least 2 days should be allotted to the journey. Of particular interest are the Glenwood Mission Inn and Roubidoux Mt. at Riverside, the Mission San Luis Rey, the latter 6 miles from the highway, but well worth while the little side trip (See Note [a] for directions), and Ramona's marriage place at Oldtown.

from trolley onto Mission Road. Cross trolley 2.8.

*Colton, Cal. (pop. 5,000, alt. 978 ft.), 3 miles south of San Bernardino, is the junction of three transcontinental railroads and a manufacturing city of importance. Colton Terrace oranges are at the top in market quotations. To the north and east, towering over the buttress-like surrounding mountains, may be seen the peak of San Bernardino and the ridge or back of Mt. San Geronio. Both are usually snow-clad. Seven miles south of Colton lies Riverside, and nine miles east, Redlands. Colton was founded in 1874. Frost and fog are unknown here and the climate is warm and dry.

*Ontario, Cal. (pop. 7,000, alt. 986 ft.), known as the "model colony," is 18 miles west of San Bernardino and 6 miles from Pomona. It is famous for its Euclid avenue, a beautiful street 200 feet wide and 9 miles long which extends among orchards to the very base of the mountains. An electric tram car line runs in the middle of the avenue and is separated from the driveways by lines of gum, pepper, cypress, Grevillea, and palm trees. This electric railway mounts from all elevation of 980 feet at the Southern Pacific station to a half mile elevation at the end of the avenue. In the early days of the town mules drew the passengers up this incline, but the return was made by gravity, the mules riding as passengers on an ingeniously contrived platform at the rear of the train.

Three miles west of Ontario at Guasti are the vineyards of the Italian vineyard company, which cover 3,500 acres and from which 20,000 tons of grapes are harvested annually. The annual yield of dry and sweet wines formerly produced here was 4,000,000 gallons and the product was said to equal in amount and quality that of some of the famous grape-growing district of Italy. The Italian vineyard company had the largest wine vaults in the world. Visitors are admitted to vineyards and the visit is especially interesting during the vintage season in September and October. The United States government has a 20-acre station at Guasti, where several hundred varieties of grapes are grown experimentally.

Ontario was founded in 1881 by W. B. Chaffey and George Chaffey, Jr., brothers from the province of Ontario, Canada, for which the town is named. At the founding of Ontario its founders set apart half the town and villa lots as endowments for a college of agriculture which was made a department of the University of California. In 1883 the corner stone of the college building was laid and in 1885 a \$20,000 building of brick was completed. To the north of the town is Mount San Antonio, locally known as "Old Baldy," on whose slopes are many charming summer retreats and good hunting and fishing.

Straight ahead before this turn is Route 458 to Redlands.

*Pomona, Cal. (pop. 15,000, alt. 861 ft.), meaning "Goddess of Fruits," is located in the center of an immensely rich agricultural district, where the orange and the lemon are supreme; in fact, this point is now the largest orange shipping place in the world. The city is 33 miles east of Los Angeles on two of the best highways in the state, and convenient to many attractive mountain drives and resorts. Many old adobe houses, fixed up in modern fashion by well-to-do white people, can be seen in this city. At Relay Heights is the

elegant home of Elsberry W. Reynolds, Chicago publisher of Harold Bell Wright's works.

Visitors should not fail to visit the famous Ganesha park, in all its scenic beauty and grandeur. This park contains a Greek theater, which has a 127-foot stage. This theater is located in a natural amphitheater with unsurpassed acoustic properties, surpassed only by those of the Mormon tabernacle at Salt Lake City, Utah.

Four miles north of Pomona is Pomona college, one of the foremost educational institutions of California.

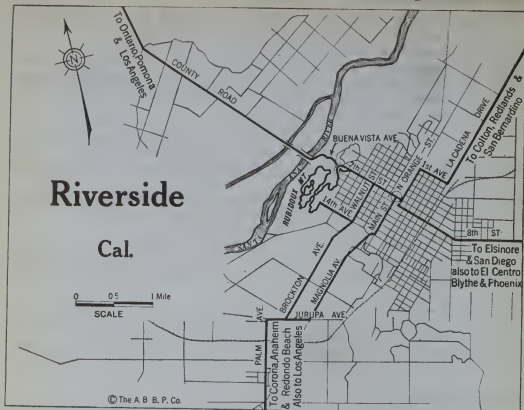

TOURISTS! Practically all towns of any size maintain a Commercial or Business Men's Club which will gladly and graciously dispense local information upon request.

LONG-DISTANCE TOURISTS

should by all means provide themselves with a copy of

VOLUME T

the new transcontinental edition of the Blue Book covering in one volume the main trunkline highways of the United States.

POINTS OF INTEREST, RIVERSIDE, CAL.

Riverside (pop. 18,000, alt. 900 ft.) is located 60 miles east of Los Angeles. The healthful climate, lure of mission architecture, substantial business blocks, beautiful parks, magnificent avenues, are among its many charms. The city proper contains 28,160 acres of citrus fruits, the like of which cannot be duplicated in any other city in the world. Fruit packing houses, employing thousands of men, pick and pack millions of boxes of citrus fruit for the eastern market. One of the most interesting sights to the visitors in California is to be found in the great orange packing houses. Close to the Santa Fe and Salt Lake stations, at Riverside, is the California Mission Packing House of the Sutherland Fruit Co., where the entire process of grading and packing oranges may be seen, and special souvenir boxes of fancy fruit purchased.

Riverside has many attractive parks, among which are White park, with its rare plants and extraordinary cactus garden; Fairmont park and the Evans athletic park. Mt. Rubidoux, while not a park proper, is the most talked of outing place in the city. Towering above the tall spires of the elegant church steeples, surmounted by a cross, fitting emblem of California's civilization, it first attracts and then holds the eye of the approaching visitor.

Named for the first white settler in the valley, Mt. Rubidoux was the "sacred mount"

of the red man and a famous look-out point in the early days. And today it is the "sacred mount" of the Christian, for Rubidoux' fame, now heralded far and wide, is due principally to the fact that here as Easter dawns each year thousands of persons, young and old, gather from miles and miles in every direction to participate in the beautiful sunrise service. Prompted by Jacob Riis and achieved thru the efforts of Mr. Frank Miller, master of the Mission Inn, this custom has become synonymous with Rubidoux. The first service, held in 1909, was attended by but some 40 or 50 persons. Now from fifteen to twenty thousand pilgrims make their way to the mount each Easter morn before the break of day, by foot and auto. (There is one road up the mountain and another down it, so there is no passing of cars, and the road is protected by stone wall its entire length.) One who has not attended can scarcely imagine the impressiveness of this service. The cross which crowns Mt. Rubidoux memorializes Father Serra, founder of the California missions. It was dedicated April 26, 1907, in the presence of the governor of California, state officials, two bishops and other prominent persons. A tablet to Father Serra was unveiled by President Taft on October 12, 1909.

A county fair is held yearly on a forty-acre tract within one mile of the business center of

(Riverside, Points of Interest. Cont'd.)

Riverside. The half-mile track here is one of the finest in the state.

Of all the travelers who visit southern California, not one out of a thousand fails to see the famous Mission Inn at Riverside, with its collection of antiques and art gallery of rare treasures. This wonderful work of architecture is the culmination of a lifetime desire by its builder, Frank Miller. The inn is unlike any other hostelry. It combines within its lofty cloistered walls, spacious sunlit courts and shadowed Moorish corridors, the peace of an old mission in the days of the padres, and the luxurious service of a great modern hotel. One of its unique features is the dining in the open Spanish court. The tables are placed under shade-giving orange trees and palms, and a huge old cottonwood, and it is possible every month, and almost every day of the year, to dine here. Its great pipe organ is another source of enjoyment and much comment. The Spanish Castle Knighthood Hall, the Art Gallery, Patio, the Cloistered Walk

and St. Cecilia's Oratory and Wedding Chapel are but a few of the many wonders of this place. To fully appreciate the inn, however, it must be seen, and a visit to it should not be overlooked by the southern California tourist.

Riverside, next to Los Angeles and Pasadena, may be said to be the best motor road center of southern California. The concrete boulevards extend in all directions, luring the autoist to the best of southern California's scenery—to the coast, to the famous Palm canyon in the Colorado desert, to the renowned Smiley Heights, Magnolia Ave. and the Missions Pala, Capistrano and San Luis Rey. The rim of the World drive has its starting point here. It goes for over fifty miles on the crest of the San Bernardino ridge, between an elevation of a mile and a half above sea level, with views down on the Santa Ana valley and the Mojave desert.

March field, one of the government aviation camps, is located $9\frac{1}{2}$ miles out on the San Diego road, near Allesandre.

*Pala, Cal., is in the Rasselas valley shut away from the world by a barricade of hills, but its chapel of San Antonio is the best known of all the asistencias (missionary chapels) on account of its picturesque campanile, which, like the belfries of Russia, stands apart from the chapel. It is a two-storied tower set on a mound of white adobe and is pierced by two arched orifices cut to fit the bells. The chapel itself is a long narrow adobe structure, 144 feet long and 27 feet wide, roofed with red tiles. The campanile chapel, with a few other buildings, were erected by the indefatigable Padre Peyri while resident at San Rey. The asistencia prospered, was given a resident padre and within a couple of years had over a thousand converts.

At the time of the secularization of San Luis Rey, Pala passed through the same vicissitudes. When it finally came into possession of the United States government it was given over to homesteaders, and was "taken up." The chapel and cemetery were ultimately decided back to the United States. The California Landmarks club brought about the agreement that the ruins should revert to the Catholic church.

Pala is of peculiar interest today as the present home of the evicted Indians of the Warner's ranch reservation, who were removed to Pala in 1903 after warlike protests

and many lamentations. Here they live in rows of white houses with dark roofs and peaked gables. These Indians are basket weavers and continue to regret the thatched huts and the grasses of their loved Agua Caliente. The Indian store and postoffice are near the chapel. James says that, though all the original Indians of Pala were ousted from their lands, those who lived anywhere within a score of miles still took a great interest in the old buildings, the decorations of the church, and the statues of the saints, and whenever a priest came and held services a goodly congregation assembled. With a desire to promote the good feeling aimed at in recent dealings with the evicted Indians of Warner's ranch, the bishop of the diocese sent them a priest. He, however, was of an alien race, and unfamiliar with either the history of the chapel, its memories, or the feelings of the Indians, and to their intense indignation, they found that without consulting them or his superiors he had destroyed nearly all the interior decorations by covering them with a coat of whitewash. The Indians now have a regular priest who holds services for them.

Pala celebrates the feast of San Luis toward the end of August. Booths are erected around the sandy square and Mexicans and Indians dance, the Indians to the measure of rattles. On the saint's day a procession of Mexicans and Indians passes around the square carrying the chapel images.

127.7 2.3 Fork; bear right along San Luis Rey river.

Straight ahead is Route 470 at mileage 130.1 to San Diego. Avoid right-hand road 131.9. Pass San Luis Rey Mission* 133.6.

*Escondido, Cal. (pop. 3,500, alt. 638 ft.), "The Hidden Valley," a city of San Diego county, is 35 miles north of San Diego. It is a favored spot in the foothills 700 feet above the sea and surrounded by irrigated lands which produce oranges, lemons, and various other crops. An extremely fine variety of Muscatel grape is grown here, its sweetness due to the peculiarity of the soil and the continuous sunshine. On Admission Day each year, that is on September 9th, the anniversary of California's admission to the Union in 1850, Grape Day is celebrated with a Grape festival which is a relic of the vintage fiestas of a hundred years ago, and is attended by thousands of interested sightseers and merry-makers.

Escondido was laid out in 1885 by a body of San Diego capitalists on what was previously known as the Wolfs Kill Ranch, or Rincom del Diablo—"the Devil's Corner." The founders at once built a \$10,000 school house and the University of Southern California erected a \$50,000 college.

Eugene, (pop. 12,000, alt. 435 ft.) is situated in the Willamette valley at the mouth of the McKenzie river and offers splendid hunting and fishing. Camping grounds are maintained on the river bank for tourists. The university of Oregon is located in this city.

*Oldtown, Cal., Ramona's marriage place, an interesting spot well worth visiting, is located here. Helen Hunt Jackson, the author of Ramona, has endeared her

heroine to the hearts of a thousand readers and the associations to be found in Ramona's Marriage Place bring one in closer touch and sympathy with her favorite character. An hour spent in this charming little spot is conducive of much enjoyment and rare education. A little way north of town still stands the first palm tree planted in California in 1769 by Father Serra, in whose memory the cross on the hill was erected.

*Mission San Luis Rey, located here, was named for St. Louis, King of France (Louis IX, 1215-1270), the last founded before the close of the century and the last south of Santa Barbara, was established June 13, 1798, was completed 1801, and in its prime was the pride of all the missions. It possessed more than 200,000 acres of land and had as much more subject to its control. It owned and pastured upon its lands 25,000 head of cattle, 90,000 sheep, 10,000 horses, and had 35,000 Indians to support. It raised and harvested more than 60,000 bushels of grain and 250 barrels of wine. For more than 30 years it was the home of Father Peytri, who of all the missionaries has left the most remarkable record in material accomplishments. The mission was at its zenith in 1826 and from then on declined.

The secularization took place in 1834. The lands were ostensibly apportioned among the Indians. In 1843 Micheltorena's decree restored the mission to the church, but by that

*Chino, Cal. (pop. 2,200, alt. 64 ft.), in the valley of the Santa Ana river, is a noted sugar-beet producing center. It is in the midst of the former Ranch of Santa Ana, whose 22,000 acres were granted to Don Antonio Lugo in 1841. Maria, the daughter of Don Antonio, married at the Mission San Gabriel Isaac Williams of Pennsylvania, a wealthy ranch owner who already possessed 20,000 acres. To these he added by purchase the Rancho Santa Ana del Chino. Thenceforth his house was renowned for its limitless hospitality to new settlers, priests and officers who traveled through Mexican California. In 1846 the skirmish known as the battle of Chino took place here. Eventually the estates were sold out of the family. Richard Gird,

vice-president of the Farmers' Exchange bank of San Bernardino, bought the house in 1881 and a part of the lands. He founded the town and named it for the Rancho.

Chino is in one of the most productive sections of California's "damp belt" and was made the site of the pioneer experiment in sugar beet raising. The third largest sugar beet refinery in the state is located here. Chino is also the site of a George Junior Republic farm of 200 acres. Pure, soft water is abundantly obtainable in all parts of the town at a depth of 15-35 feet. Artesian water has been piped from lands northeast of Pomona to a reservoir located north of Chino and thence distributed under pressure sufficient for all desired purposes.

(Points of Interest, Mission San Luis Rey, Cont'd.)

time there was scarcely anything left. The lands had passed into the ownership of private individuals and only a few cattle and horses and some valueless implements remained. In 1847 the celebrated Mormon battalion described by Parkman in his "Oregon Trail" was stationed at the mission and later a re-enlisted company was stationed there. On their departure the mission was placed in charge of an Indian agent.

In 1892 Father J. J. O'Keefe, who had been in charge at Santa Barbara and was well known to tourists, was sent to San Luis Rey to take charge of repairing the church and making such restorations and additions as might be needed for transforming the mission into a Franciscan college. On May 12, 1893, the restored building was rededicated, the bishop of the diocese, the vicar general of the Franciscan order and other dignitaries assisting. There were also present three old Indian women who had heard the mass said at the

original dedication in 1803. The monastery, which was entirely destroyed except the arches of the corridors, has been rebuilt, and the "patio," or quadrangle, restored on the old lines.

San Luis Rey is now a college for the training of missionaries for the field, and its work is in charge of Father Peter Wallischek, who was for many years identified with the Franciscan college at Santa Barbara. Guests are received at the monastery and the old-time hospitality extended.

On the "fachada," or facade, at San Luis Rey are two brackets at the foot of niches for statues. These brackets as well as the old pilasters, or engaged columns, are built of rounded courses of beveled brick, a device of the fathers for producing curved effects. The result is pretty and permanent. George Wharton James in "Old Franciscan Missions of California" gives an interesting description of the interior of this mission.

SERVICE STA.—United States Tire Sales & Service Depots located here.

***Anaheim, Cal.** (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

***Pomona, Cal.** (pop. 15,000, alt. 861 ft.), meaning "Goddess of Fruits," is located in the center of an immensely rich agricultural district, where the orange and the lemon are supreme;

in fact, this point is now the largest orange shipping place in the world. The city is 33 miles east of Los Angeles on two of the best highways in the state, and convenient to many attractive mountain drives and resorts. Many old adobe houses, fixed up in modern fashion by well-to-do white people, can be seen in this city. At Relay Heights is the elegant home of Elsberry W. Reynolds, Chicago publisher of Harold Bell Wright's works.

Visitors should not fail to visit the famous Ganesha park, in all its scenic beauty and grandeur. This park contains a Greek theater, which has a 127-foot stage. This theater is located in a natural amphitheater with unsurpassed acoustic properties, surpassed only by those of the Mormon tabernacle at Salt Lake City, Utah.

Four miles north of Pomona is Pomona college, one of the foremost educational institutions of California.

Be Sure You're Fully Equipped

In the *Orange* insert, center of Book, is a careful analysis by the Editor of necessary—and unnecessary—equipment for touring. Glance down the list and check your equipment. Read his advice. We recommend the particular makes of accessories listed as reliable.

0.0 0.0 RIVERSIDE, 7th & Main Sts. Go east with trolley on 7th St. one block.

0.1 0.1 Orange St.; turn right away from trolley one block.

0.2 0.1 8th St.; turn left. Cross RRs 0.4-0.5. Pass University of California Experimental state farm on left 3.1, ascending Box Spring grade just beyond. Cross RR 6.5. Pass Box Spring Sta. on right 6.8.

8.0 7.8 Left-hand diagonal road; bear left.

Straight ahead at this turn is Route 470 at mileage 65.7 to San Diego. Pass March aviation field over to right 8.6. Thru Armada P. O. 11.7. Thru Moreno 15.3.

16.3 8.3 Fork; bear left with pavement.

16.4 0.1 Fork; bear right with pavement. Avoid left-hand road 21.4-22.0 and right-hand road 23.5.

Left at 21.4 is Route 430 at mileage 21.4 to El Centro.

Pass Relief Hot Springs on right 27.7.

29.1 12.7 Fork just beyond bridge; bear left. Thru 4-corners 30.6.

30.8 1.7 4-corners; turn left with power line.

32.2 1.4 San Jacinto, 5-corners at fountain. Bear right.

34.7 2.5 4-corners, sign on far right; turn right onto Florida Ave.

35.5 0.8 Hemet.* Keep ahead on Florida Ave., crossing RR at sta. just beyond.

37.4 1.9 End of road; turn left. Turn right with road 37.6. Thru 4-corners 39.1. Avoid left-hand road 41.8. Pass Ethanac Sta. on left 47.9.

48.5 11.1 Turn left across RR and turn right along same just beyond. Pass Ellis Sta. on right 50.7.

51.2 2.7 End of road; turn right across RR and turn left just beyond along same.

51.6 0.4 PERRIS, hotel on right.

*Hemet, Cal. (pop. 1,000, alt. 1,600 ft.), in Riverside county, 34 miles southeast of the city of Riverside, is the center of the leading apricot-growing region of southern California. Peaches, walnuts and olives also thrive. The

level orchard covered valley contrasts to advantage with the rugged slopes of Mt. San Jacinto, 11,000 feet, plainly seen and easily reached by auto or stage. Idyllwild and Keen Camp are well known resorts half way to its summit.

How to Use the Route Chart and General Index

To lay out through trips between route centers you will find the Route Chart (page four) of great service.

For a comprehensive survey of all the territory and routes covered by this volume, see the large folded General Index Map in front of Book.

Route 483—Los Angeles to San Diego, Cal.—134.5 m.

Reverse Route 541.

Via Anaheim, Santa Ana, San Juan Capistrano and Oceanside. Macadam to Whittier; concrete to La Jolla; balance dirt. Summary: 13 miles macadam; 105 miles concrete; 16 miles good graded dirt. This is the coast route to San Diego and one of the most picturesque trips in California. Wonderful mountain and marine views present an ever changing panorama of equal grandeur and although the whole trip could easily be made in five hours, there are so many points of scenic and historical interest that one may linger along the highway for one or two days and enjoy every minute on this splendid highway.

Note (a) gives an option from Irvine to Serra Sta. via Laguna Beach, connecting with the regular route at mileage 62.2. Note (b) gives an optional entrance to San Diego via Oldtown, the seat of many historical points of interest.

*Whittier, Cal. (pop. 8,000, alt. 350 ft.), is 21 miles southeast of Los Angeles. In 1887 the town was named in honor of the Quaker poet by two New Englanders of the Quaker families of Pickering. The Haverhill poet's middle name was afterward given to the chief street and hotel. The Friends' college and a state school for boys and girls are located here and the town is surrounded by acres of walnut trees, celery and white sugar beets, and an orchard of alligator pears. The seed of the Avocado was imported from Mexico. A single tree near Whittier produced, in one year pears to the value of \$1,500 besides nearly 7,000 buds, which gave a further clear profit of \$1,500. Near the city are hundreds of oil

derricks producing enormous quantities of crude oil.

Two miles from Whittier is the former ranch and the hacienda of General Pio Pico, Governor of Mexico at the time of the disestablishment of the missions. He it was who stripped them of every shred of ecclesiastical and temporal prosperity and ordered their neophytes to be sold as slaves.

*Fullerton, Cal. (pop. 4,000, alt. 135 ft.), is situated within five miles of the largest oil fields in the U. S. An interesting feature of the town is its fifteen acre campus adorned with eleven buildings constituting a high school and junior college, costing three million dollars.

 Straight ahead at 45.2 is Note (a) to Laguna Beach, which rejoins this route at mileage 62.2.
 Right at 50.4 is Route 543 at mileage 36.7 to Anaheim.

*Anaheim, Cal. (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

*Santa Ana, Cal. (pop. 8,450, alt. 137 ft.), the county seat of Orange county and also its commercial metropolis, is 34 miles southeast of Los Angeles in a fruit and dairy region, and is connected to Los Angeles by the Coast Route boulevard. The great industry of the surrounding country is walnut growing, and there are few things handsomer than a walnut ranch—or more profitable. The town has a

fine public park, a good public library and good schools, and a \$200,000 group of polytechnic buildings, the Ebell women's club and the Sunset men's club. Near by is the 50-acre Santa Ana golf club, the gift of Mr. Irvine, who also gave to the city the picturesque park in the Santiago canyon. The northern part of the city is noted for its beautiful homes.

*Tustin, Cal. (pop. 750), was founded by Columbus Tustin in 1869. The homes are handsome and substantial and the town is the center of one of the richest and most beautiful orchard sections of Orange county. It has a \$50,000 up-to-date school building. It is the present terminus of the foothill line of the Southern Pacific railroad. Near by is the famous San Joaquin rancho of 80,000 acres, that extends from the mountains to the sea. The paved California state highway and branches of the 130 mile Orange county system of paved roads, pass through Tustin.

Lemon Heights, in the Tustin district, is a rival in beauty if not in fame, of the well known Smiley Heights, and the tourist will long remember Tustin for its stately trees and beautiful orchards.

*San Juan Capistrano, Cal., is the site of the old San Juan Capistrano mission, the "Melrose Abbey of the West," and the seventh mission in order of founding, considered to have been the most splendid of all the missions. Its ruins are both picturesque and imposing and possess, particularly when lighted by the full moon, a singularly romantic beauty. Against a background of purple mountains they stand on a hilltop at the border of the little town. The foundation of this mission was attempted in 1775 by Father Lasuen, but after the work had proceeded for eight days news received of the Indian revolt at San Diego made it necessary to postpone the prosecution of the work to a more auspicious time. Accordingly, the bells were buried and the workers retired to San Diego. Two years later Padre Serra, assisted by Fathers Pablo Mugartegui and Gregorio Amurrio, again took up the task. The cross was found still standing in its place, the bells were disinterred, and the first Holy Mass was celebrated on the Feast of All Saints, November 1, 1776, which is generally considered as the date of the founding of San Juan Capistrano. Fathers Mugartegui and Amurrio were in charge of the construction of the first building and the administrative affairs of the mission. They were both wise and zealous; the natives were well disposed, the lands were fertile, and the mission prospered from the first. In 1797 work was begun on the stone church, the remains of which are still to be seen, and it was consecrated September 7, 1806, with splendid ceremonies. The mission was at the zenith of its prosperity in 1812, when at the Feast of Purisima an earthquake sent the church tower and roof crashing down on the heads of the congregation, killing 43 persons, the officiating priest escaping as by a miracle. In 1833 Figuero secularized the mission by organizing the Indians into a "provisional pueblo" and issuing the statement that the padres had surrendered all temporalities. In 1846 the population, which had been 1,361, had dwindled to 113 souls. In February, 1896, the Landmarks Club of California secured a lease of San Juan Capistrano, including all the buildings in need of care, with the necessary ground and rights of way, and a preference to the club as purchaser in case the property should ever be for sale, and work was undertaken under the direction of Mr. R. Egan, who for many years had made personal efforts toward the preservation of the mission. The club has restored the old adobe church, the first one built at the mission and the one used after the destruction

of the church by the earthquake in 1812. The cloisters and kitchen have been reroofed and braced and various preservative repairs carried out. Mass is still celebrated in "Serra's Chapel," as the old church restored by the Landmarks club is called. In the campanario on the northeast corner of the church of 1797 hang four bronze bells rung by ropes attached to the clappers. The large ones are tolled for the death of adults and the small ones for the passing of little children.

Whoever sees the ruins of San Juan holds them ever after in lustrous memory. Grilled windows, quaint latticed chimney, irregular arches, bits of carving in the stone capitals of pilaster, and above wide wooden doors, owl-haunted colonnades of crumbling arches, clustered pillars with broken filletings, crumbling walls and floors adorned by vines and flowers in a bewildering riot of lines and colors, and roof tiles showing their red above the cream of the time-stained walls and against the exquisite blue of the sky, make a picture of never-to-be-forgotten beauty. The church, the ruins of which are still to be seen, was designed by Father Gorgonio. It is in the form of a Roman cross and is 180 feet long and 90 feet wide, with an arched roof that was a series of seven domes or bovedas, and a bell tower 120 feet high, surmounted by a gilded cock. From the dome over the transept rose a narrow spire of the large square mission tiles or ladrillos. The patio, or padre's garden, is still a lovely spot enclosed by a cloister garlanded with flower and vine. Until about 1895 San Juan had one of the best of the mission libraries. It consisted chiefly of well-known Latin and Spanish books of divinity, bound in sheepskin or parchment, tied with leather thongs or having metal clasps. The first page of the record of marriages was written and signed by Junipero Serra. A striking evidence of the industrial enterprises of the padres is presented in the ruins of the aqueducts or flumes, some of brick, others of wood, supported across ravines, which conveyed the water for irrigating the 80 acres of orchard, vineyard and garden which was once surrounded by an adobe wall. Several remnants of these aqueducts may still be seen in the village, and there remain reservoirs, cisterns and zanjas of brick, stone and cement located at advantageous points.

*Oceanside, Cal. (pop. 1,500, alt. 42 ft.), is a summer and winter resort on the Pacific, 42 miles north of San Diego. It was one of the boom towns of the '70's. Here the tourist leaves the railroad to visit the Mission San Luis Rey de Francia.

*Escondido, Cal. (pop. 3,500, alt. 638 ft.), "The Hidden Valley," a city of San Diego county, is 35 miles north of San Diego. It is a favored spot in the foothills 700 feet above the sea and surrounded by irrigated lands which produce oranges, lemons, and various other crops. An extremely fine variety of Muscatel grape is grown here, its sweetness due to the peculiarity of the soil and the continuous sunshine. On Admission Day each year, that is on September 9th, the anniversary of Cali-

fornia's admission to the Union in 1850, Grape Day is celebrated with a Grape festival which is a relic of the vintage fiestas of a hundred years ago, and is attended by thousands of interested sightseers and merry-makers.

Escondido was laid out in 1885 by a body of San Diego capitalists on what was previously known as the Wolf's Kill Ranch, or Rincom del Diable—"the Devil's Corner." The founders at once built a \$10,000 school house and the University of Southern California erected a \$50,000 college.

 41.5 0.1 SAN JUAN CAPISTRANO.*

*Anaheim, Cal. (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

*San Juan Capistrano, Cal., is the site of the old San Juan Capistrano mission, the "Melrose Abbey of the West," and the seventh mission in order of founding, considered to have been the most splendid of all the missions. Its ruins are both picturesque and imposing and possess, particularly when lighted by the full moon, a singularly romantic beauty. Against a background of purple mountains they stand on a hilltop at the border of the little town. The foundation of this mission was attempted in 1775 by Father Lasuen, but after the work had proceeded for eight days news received of the Indian revolt

at San Diego made it necessary to postpone the prosecution of the work to a more auspicious time. Accordingly, the bells were buried and the workers retired to San Diego. Two years later Padre Serra, assisted by Fathers Pablo Mugartegui and Gregorio Amurrio, again took up the task. The cross was found still standing in its place, the bells were disinterred, and the first Holy Mass was celebrated on the Feast of All Saints, November 1, 1776, which is generally considered as the date of the founding of San Juan Capistrano. Fathers Mugartegui and Amurrio were in charge of the construction of the first building and the administrative affairs of the mission. They were both wise and zealous; the natives were well disposed, the lands were fertile, and the mission prospered from the first. In 1797 work was begun on the stone church, the remains of which are still to be seen, and it was consecrated September 7, 1806, with splendid ceremonies. The mission was at the zenith of its prosperity in 1812, when at the Feast of Purisima an earthquake sent the church tower and roof crashing down on the heads of the congregation, killing 43 persons, the officiating priest escaping as by a miracle. In 1833 Figuero secularized the mission by organizing the Indians into a "provisional pueblo" and issuing the statement

***Hollywood, Cal.** (pop. 15,000, alt. 1,500 ft.), a populous suburb of Los Angeles, incorporated within the city, is situated among the Cahuenga foothills. Against the hillside the turrets of San Souci castle and Glengarry stand out prominently. These are both the possessions of a wealthy owner who has filled them with tapestries, pictures, carvings and rare glass. Hollywood is in the vicinity of the oil belt but is fragrant with flowers. Its

streets are planted with peppers and acacias and the flame tree brought here from the Antipodes. Roadways are lined with glossy magnolias and grounds are brilliant with poinsettia and roses. Strawberries are ripe here "from Christmas until Christmas." Paul de Longpre, the world's greatest painter of flowers, lived here until his death in 1911. In the country near Hollywood forty film-play producing companies have extensive plants.

(San Juan Capistrano, Points of Interest, Cont'd.)

that the padres had surrendered all temporalities. In 1846 the population, which had been 1,361, had dwindled to 113 souls. In February, 1896, the Landmarks Club of California secured a lease of San Juan Capistrano, including all the buildings in need of care, with the necessary ground and rights of way, and a preference to the club as purchaser in case the property should ever be for sale, and work was undertaken under the direction of Mr. R. Egan, who for many years had made personal efforts toward the preservation of the mission. The club has restored the old adobe church, the first one built at the mission and the one used after the destruction of the church by the earthquake in 1812. The cloisters and kitchen have been reroofed and braced and various preservative repairs carried out. Mass is still celebrated in "Serra's Chapel," as the old church restored by the Landmarks Club is called. In the campanario on the northeast corner of the church of 1797 hang four bronze bells rung by ropes attached to the clappers. The large ones are tolled for the death of adults and the small ones for the passing of little children.

Whoever sees the ruins of San Juan holds them ever after in lustrous memory. Grilled windows, quaint latticed chimney, irregular arches, bits of carving in the stone capitals of pilaster, and above wide wooden doors, owl-haunted colonnades of crumbling arches, clustered pillars with broken filletings, crumbling walls and floors adorned by vines and flowers

in a bewildering riot of lines and colors, and roof tiles showing their red above the cream of the time-stained walls and against the exquisite blue of the sky, make a picture of never-to-be-forgotten beauty. The church, the ruins of which are still to be seen, was designed by Father Gorgonio. It is in the form of a Roman cross and is 180 feet long and 90 feet wide, with an arched roof that was a series of seven domes or bovedas, and a bell tower 120 feet high, surmounted by a gilded cock. From the dome over the transept rose a narrow spire of the large square mission tiles or ladrillos. The patio, or padre's garden, is still a lovely spot enclosed by a cloister garlanded with flower and vine. Until about 1895 San Juan had one of the best of the mission libraries. It consisted chiefly of well-known Latin and Spanish books of divinity, bound in sheepskin or parchment, tied with leather thongs or having metal clasps. The first page of the record of marriages was written and signed by Junipero Serra. A striking evidence of the industrial enterprises of the padres is presented in the ruins of the aqueducts or flumes, some of brick, others of wood, supported across ravines, which conveyed the water for irrigating the 80 acres of orchard, vineyard and garden which was once surrounded by an adobe wall. Several remnants of these aqueducts may still be seen in the village, and there remain reservoirs, cisterns and zanjas of brick, stone and cement located at advantageous points.

*Santa Monica, Cal. (pop. 7,850, alt. 79 ft.), a shipping point and seaside resort, is situated on the Pacific 15 miles west of Los Angeles, from which it is a favorite drive and with which it is connected by electric express trains. It is distinctively an amusement town. Bathing and fishing may be enjoyed the year round. Long Wharf and Bristol Pier are popular gathering places, while Fraser's Pier is known as the Million Dollar Pier.

The amusements of Santa Monica are tasteful and fantastic and draw large crowds. Not far from the town are the soldiers' home and extensive moving picture film plants, the picturesque Topango and Santa Monica canyons, the interesting Japanese Fishing Village and the Brentwood country club, where golfing and other sports may be enjoyed. One of the natural charms of Santa Monica is its palisades, a battlement of cliffs which merge into hills and then into mountains. In the ravines and highlands plover and deer are found. The town itself is situated on a mesa

rimmed with palms and the streets show pretty vistas of gables heavily draped with climbing blossoms. Santa Monica is connected with Ocean Park and Venice by a cement sea walk five miles long. In fact, Santa Monica-Ocean Park is one municipality.

A free municipal auto camping park is maintained at Santa Monica and the commercial club has a free service bureau to enable the tourist to find hotel and apartment accommodations. The fastest auto road race course in the world is located here.

*Ocean Park, Cal. (pop. 8,000, alt. 21 ft.), in Los Angeles county, is one of the galaxy of beach towns of Los Angeles, a fine bathing resort, reached directly from Los Angeles by electric express cars and by beautiful paved boulevards. There is a fine theatre and Masonic hall here. The bathing pavilion cost \$150,000 and is said to be the finest on the coast. The temperature of Ocean Park is 50 degrees in winter and 80 degrees during the summer months. Santa Monica-Ocean Park now form one municipality.

TOURISTS! Practically all towns of any size maintain a Commercial or Business Men's Club which will gladly and graciously dispense local information upon request.

*Redondo Beach, Cal. (pop. 2,950, alt. 13 ft.), is a popular amusement and recreation beach resort situated on the shores of the Pacific, 15 miles southwest of Los Angeles. Connects with all important southern California resorts and cities by smooth macadam automobile boulevards.

"Spanish Promenade," a fashionable amusement district along the edge of the surf, is one of the attractions. Moonstone Beach, where semi-precious stones are washed up by the action of the ocean, is another allurements. Largest hot salt-water plunge in the world and mammoth auditorium, seating 10,000, are important features. Military band concerts daily. Tent City, seaside parks and children's playground offer breathing spots. Famous triangular pier is a unique over-the-sea structure.

Redondo Beach is built on a series of terraced hills, rising gradually from the sea, and covered in large part by great carnation gardens, giving the town the title of "The Carnation City."

*Wilmington, Cal. (pop. 2,500, alt. 7 ft.), is one of the beach towns in the Los Angeles chaplet of resorts. The town was laid out in

1858 by General Banning and by him named in honor of his native city, Wilmington, Del. In 1882 congress made it a port of entry, and established a customs house here. It is located at the head of Los Angeles harbor, or rather comprises the inner harbor. The city of Los Angeles has provided extensive docks for ships drawing 30 feet of water and the steamers of the Pacific Steamship company and the American Hawaiian Steamship company dock here. Los Angeles harbor is known to be the greatest lumber port in the world and Wilmington is fast developing into an important ship-building center. The Los Angeles Shipbuilding and Dry Dock company completed in 1917 a large and modern equipped plant for the building of steel vessels and has laid keel plates for four 8,800 tons capacity cargo ships for the government, the first quota of a contract for 8 vessels of this class. The Standard Oil Co. loads its tank steamers from its distribution plant here and the Union Oil company has commenced building operations on a 230-acre site on what is to be one of the largest oil refineries on the Pacific coast. The Diamond Match company has in Wilmington an extensive plant for extracting potash, iodine and other products from kelp.

 23.9 1.9 End of road; turn right with pavement.
 24.0 0.1 Left-hand road; turn left, curving right with road just beyond.

*Long Beach, Cal. (pop. 40,000, alt. 47 ft.), a popular summer resort of Los Angeles county, California, is situated on the Pacific coast, 20 miles south of the city of Los Angeles. To those who imagine that Long Beach is colder than interior towns, as many do, a pleasant surprise is in store, for the warm Japan currents make this a most delightful winter climate, and surf bathing is enjoyed here in the middle of January and February.

*Beverly Hills, Cal. (pop. 600, alt. 75 ft.), is a beautiful little residential town just fifteen minutes' ride from Los Angeles on a direct road to Venice, Ocean Park and Santa Monica. It is the site of a soldiers' home and boasts of having the finest motor race track and polo grounds in the state. Douglas Fairbanks, Enid Bennett, Pauline Frederick and Chas. Ray, movie stars, live at Beverly Hills, as also does King C. Gillette of Gillette razor fame.

*Santa Monica, Cal. (pop. 7,850, alt. 79 ft.), a shipping point and seaside resort, is situated on the Pacific 15 miles west of Los Angeles, from which it is a favorite drive and with which it is connected by electric express trains. It is distinctively an amusement town. Bathing and fishing may be enjoyed

the year round. Long Wharf and Bristol Pier are popular gathering places, while Fraser's Pier is known as the Million Dollar Pier.

The amusements of Santa Monica are tasteful and fantastic and draw large crowds. Not far from the town are the soldiers' home and extensive moving picture film plants, the picturesque Topogano and Santa Monica canyons, the interesting Japanese Fishing Village and the Brentwood country club, where golfing and other sports may be enjoyed. One of the natural charms of Santa Monica is its palisades, a battlement of cliffs which merge into hills and then into mountains. In the ravines and highlands plover and deer are found. The town itself is situated on a mesa rimmed with palms and the streets show pretty vistas of gables heavily draped with climbing blossoms. Santa Monica is connected with Ocean Park and Venice by a cement sea walk five miles long. In fact, Santa Monica-Ocean Park is one municipality.

A free municipal auto camping park is maintained at Santa Monica and the commercial club has a free service bureau to enable the tourist to find hotel and apartment accommodations. The fastest auto road race course in the world is located here.

Tent City, seaside parks and children's playground offer breathing spots. Famous triangular pier is an unique over-the-sea structure.

Redondo Beach is built on a series of terraced hills, rising gradually from the sea, and covered in large part by great carnation gar-

dens, giving the town the title of "The Carnation City."

*Westminster, Cal. (pop. 500), is 12 miles southwest of Anaheim. The town was started as a colony enterprise in 1871 by the Rev. L. P. Webber, who selected a tract of level land comprising about 8,000 acres, afterwards increased to 10,000 acres, between Anaheim and the ocean, where he endeavored to assemble settlers who would co-operate in church, school and social work. The distinctive feature of Westminster is the water supply. The town has more flowing artesian wells than any other section of equal area in the United States. Every property holder owns and controls his own water supply. Water in sufficient quantities for irrigation can be had at a depth of 50 to 200 feet. Moreover the soil is here so damp that a great portion of the land will grow crops without irrigation. In the southern portion of the colony are the celebrated peat lands.

*Santa Ana, Cal. (pop. 8,450, alt. 137 ft.), the county seat of Orange county and also its commercial metropolis, is 34 miles southeast of Los Angeles in a fruit and dairy region, and is connected to Los Angeles by the Coast Route boulevard. The great industry of the surrounding country is walnut growing, and there are few things handsomer than a walnut ranch—or more profitable. The town has a fine public park, a good public library and good schools, and a \$200,000 group of poly-technic buildings, the Ebell women's club and the Sunset men's club. Near by is the 50-acre Santa Ana golf club, the gift of Mr. Irvine, who also gave to the city the picturesque park in the Santiago canyon. The northern part of the city is noted for its beautiful homes.

*Huntington Beach, Cal. (pop. 1,500, alt. 20

ft.), is the largest beach town in Orange county. It is located three miles south of Los Angeles. A cement boulevard connects it with Santa Ana and points on the present coast boulevard. A good oil road along the seashore to connect the boulevard from Seal Beach to San Juan Capistrano is in progress of construction and has been completed as far south as Huntington Beach.

"Arbamar," the large camp grounds owned by the Southern California Methodist conference, is located here. During the summer months this camp site is the home of many conventions, assemblies, and chataquas. The Veterans Association of Southern California holds its annual encampment on these grounds. Huntington Beach has the longest municipal cement pier on the coast. Excellent fishing privileges may be enjoyed here.

SERVICE STA.—United States Tire Sales & Service Depots located here.

*Long Beach, Cal. (pop. 40,000, alt. 47 ft.), a popular summer resort of Los Angeles county, California, is situated on the Pacific coast, 20 miles south of the city of Los Angeles. To those who imagine that Long Beach is colder than interior towns, as many do, a pleasant surprise is in store, for the warm Japan currents make this a most delightful winter climate, and surf bathing is enjoyed here in the middle of January and February.

*San Pedro, Cal. (pop. 10,000, alt. 22 ft.), a city of Los Angeles county, and by annexation a part of Los Angeles, is the port of Los Angeles, with which it is connected by a favorite drive 26 miles long. Lobster canning and lumbering are the chief industries. The town received its name from Vizcaino, who anchored in the bay on November 26, the day of St. Peter, in the year 1603. It was in the port of San Pedro that the two sailors were fogged on the Pilgrim, which event caused Richard Henry Dana, an eyewitness of the scene, to write "Two Years Before the Mast," to expose the abuses to which crews were subjected in those days, and which resulted in the passing of a law prohibiting such prac-

tices and otherwise had a powerful influence in ameliorating the lot of the common seaman.

The federal government, by building a breakwater at a cost of \$3,000,000, has made a fair port of San Pedro harbor. This breakwater is the largest in the world. It is 800 feet long and 14 feet above water at low tide. The base is 190 feet wide and the top 20 feet across. As the water is about 50 feet deep, this sets up against the force of the waves a sea wall 64 feet high. A road leads over the breakwater to a promontory that fronts squarely on the breakers and affords a splendid view of the pinnacled shore line and the far-reaching snow-clad hills. The automobilist who takes this drive or the tourist who makes it in the regular pleasure car, may visit the beacon on Point Firmin and take a pleasant ramble among the castellated bluffs. The return to Los Angeles is made past the battle-ground of La Mesa on the old Dominguez ranch, where the American forces were defeated in 1846.

Terminal Island, reached by ferry, is a popular resort with quiet waters, good bathing, boating and fishing, a beautiful promenade and a fine pleasure wharf.

*Hollywood, Cal. (pop. 15,000, alt. 1,500 ft.), a populous suburb of Los Angeles, incorporated within the city, is situated among the Cahuenga foothills. Against the hillside the turrets of San Souci castle and Glengarry stand out prominently. These are both the possessions of a wealthy owner who has filled them with tapestries, pictures, carvings and rare glass. Hollywood is in the vicinity of the oil belt but is fragrant with flowers. Its

streets are planted with peppers and acacias and the flame tree brought here from the Antipodes. Roadways are lined with glossy magnolias and grounds are brilliant with poinsettia and roses. Strawberries are ripe here "from Christmas until Christams." Paul de Longpre, the world's greatest painter of flowers, lived here until his death in 1911. In the country near Hollywood forty film-play producing companies have extensive plants.

- 1.2 1.2 5-corners; turn left upgrade onto Sunset Blvd. Join trolley from left 1.4.

Cross RR at Hellman Sta. 20.1.

*San Gabriel, Cal. (pop. 1,200, alt. 406 ft.), is situated in a fine growing region and is the site of the old San Gabriel Archangel mission, founded in 1771. This, the fourth to be established in the chain of California missions, was founded Sept. 8, 1771, by Padre Pedro Cambon and Padre Angel Somera. Its initial success was retarded by the license of the Spanish soldiers in their treatment of the Indians, but, being located on the main road from Mexico to Monterey, it was an important stopping point and soon grew rich and populous. From 1806 Padre José Maria Zalvidea, one of the strictest of the fathers, was in charge and he brought the mission up to its highest state of efficiency. He it was who began the erection of the stone church that now remains, and which is the third mission church of San Gabriel. The first was located close to the river about five miles south of the present church, but, the site being found unsuitable, it was abandoned and a second building was consecrated on the present site in 1776. This was later replaced by the present structure, whose erection was made necessary by the earthquake of December 8, 1812, which overthrew the main altar and the steeple, cracked the sacristy walls, and injured the other buildings.

Several of the old altar statues, some quaint mural pictures, a font of hammered copper, and several other vessels, a chair carved by the Indians and monastic records remain and may be seen by the visitor. The facade of the church is strengthened by buttresses capped with pyramidal turrets which rise above the roof, and a steep shaded perron, the musicians' stairway, leads to the choir

gallery, and its beautiful campanile is famous in picture, song and story. The solid wall of the campanile is pierced with six irregular sized arches built to correspond with the sizes of the bells.

At the rear of the church are the remains of five brick structures used by the mission fathers for the rendering of tallow and the making of soap. Five other buildings were removed to make way for the public road. There are still remaining a few portions of the old cactus hedge planted by Padre Zalvidea. In mission days this hedge enclosed a vineyard of several hundred acres and served the double purpose of a barrier against marauding Indians and of furnishing food, for the prickly pear was much prized by the neophytes as an article of diet. In the garden of San Gabriel there were planted in 1804 the first orange trees recorded in California. Here, too, was nurtured the parent of the grape vines of this valley brought over from Spain in a three-storied galleon in 1798. The wines of the mission were famous. Today in the patio of an inn a block distant from the church there is a centenarian grape vine of the padres beneath which modest refreshments are served.

About two miles from the church is "El Molino Viejo," or the old mill of the mission built in Padre Zalvidea's time, between 1810 and 1812. There was a later mill, but that has disappeared. The existing one had to be abandoned by the Padres because of faulty location. The water was brought from Los Robles canyon and from Mill canyon by ditch to the funnel-shaped cistern 12 feet deep beneath the mill. After being used for the mill

 the water passed to the dam below, where it operated a saw mill also erected by Padre Zalvidea. The millstones are $2\frac{1}{2}$ feet in diameter and $\frac{3}{8}$ inch thick. They are now in use as a horse block at San Marino, the residence of Hon. J. De Barth Shorb. The mill was built to use as a fortress in case of Indian attack and as a provision for a water supply in such emergency the waterway was constructed which brings in the tiny stream of water that flows from under the buttress in the northeast corner of the mill. In 1859 the old mill was bought by Col. E. J. C. Kewen, member of the noted Walker filibustering expedition and at one time attorney-general of California. He converted it into a comfortable residence, but on his death in 1879 it was abandoned and has since served as a tool and bunk house. The last padre of this mission was Blaz de Ordaz. He died in 1850 and since then San Gabriel has been a regular parish church under the direction of the bishop of the diocese. The mission building is noteworthy as one of the few mission structures that was never closed.

Across the road from the church of San Gabriel in a theater erected for the purpose is produced at certain seasons the Mission Play, the story of the Franciscan missions depicted by John Steven McGroarty in a drama similar to the Passion Play of Oberammergau. In an ambulatory surrounding the play house are models of all the missions in their order. Seeing the Mission Play is a most impressive way of visualizing the early history of California. Hugo Reid, whose romance gave Mrs. Helen Hunt Jackson the idea for her story of "Ramona," lived at San Gabriel near the old mission, and so the author makes this the birthplace of her heroine.

Visitors are permitted to visit Ramona's old home, just to the side and rear of which is the centenarian grapevine, mentioned above as formerly having belonged to the mission. Stretched upon an arbor ten feet above the ground, this vine covers an area of approximately one acre and yields a crop of about two tons of grapes annually.

*Whittier, Cal. (pop. 8,000, alt. 350 ft.), is 21 miles southeast of Los Angeles. In 1887 the town was named in honor of the Quaker poet by two New Englanders of the Quaker families of Pickering. The Haverhill poet's middle name was afterward given to the chief street and hotel. The Friends' college and a state school for boys and girls are located here and the town is surrounded by acres of walnut trees, celery and white sugar beets, and an orchard of alligator pears. The seed of the Avocado was imported from Mexico. A single tree near Whittier produced, in one year pears to the value of \$1,500 besides nearly 7,000 buds, which gave a further clear profit of \$1,500. Near the city are hundreds of oil derricks producing enormous quantities of crude oil.

Two miles from Whittier is the former ranch and the hacienda of General Pio Pico, Governor of Mexico at the time of the disestablishment of the missions. He it was who stripped them of every shred of ecclesiastical and temporal prosperity and ordered their neophytes to be sold as slaves.

*Norwalk, Cal. (pop. 600), in Los Angeles county, is 17 miles southeast of Los Angeles. Near here Dr. C. J. Sketchly in 1882 established the first ostrich farm in North America, bringing 25 birds direct from the Cape of Good Hope. Since then several other such farms have been established in the state. Norwalk is the site of the new state insane asylum and is the center of a rich farming district.

They are now in use as a horse block at San Marino, the residence of Hon. J. De Barth Shorb. The

mill was built to use as a fortress in case of Indian attack and as a provision for a water supply in such emergency the waterway was constructed which brings in the tiny stream of water that flows from under the buttress in the northeast corner of the mill. In 1859 the old mill was bought by Col. E. J. C. Kewen, member of the noted Walker filibustering expedition and at one time attorney-general of California. He converted it into a comfortable residence, but on his death in 1879 it was abandoned and has since served as a tool and bunk house. The last padre of this mission was Blaz de Ordaz. He died in 1850 and since then San Gabriel has been a regular parish church under the direction of the bishop of the diocese. The mission building is noteworthy as one of the few mission structures that was never closed.

Across the road from the church of San Gabriel in a theater erected for the purpose is produced at certain seasons the Mission Play, the story of the Franciscan missions depicted by John Steven McGroarty in a drama similar to the Passion Play of Oberammergau. In an ambulatory surrounding the play house are models of all the missions in their order. Seeing the Mission Play is a most impressive way of visualizing the early history of California. Hugo Reid, whose romance gave Mrs. Helen Hunt Jackson the idea for her story of "Ramona," lived at San Gabriel near the old mission, and so the author makes this the birthplace of her heroine.

Visitors are permitted to visit Ramona's old home, just to the side and rear of which is the centenarian grapevine, mentioned above as formerly having belonged to the mission. Stretched upon an arbor ten feet above the ground, this vine covers an area of approximately one acre and yields a crop of about two tons of grapes annually.

Captain Hardy in MOTOR LIFE

The Monthly Magazine for Red-Blooded Motorists

"It doesn't do much good to true a wheel up if you don't apply the rim correctly. It may be necessary to put shims over the rim bolts in front or back so as to bring the rim into line and make it run true when you spin the wheel."

See Motor Life colored insert.

POINTS OF INTEREST, SAN DIEGO, CAL.

San Diego (pop. 96,000, alt. 69 ft.) is situated upon a beautiful bay of the same name in the extreme southwestern part of the U. S., 127 miles from Los Angeles, and 15 miles from the Mexican frontier. This bay was discovered 78 years before the Pilgrim Fathers landed, and comparatively few Americans are aware that San Diego has the same historical pre-eminence on the western coast that Plymouth, Mass., has on the eastern shores of their native land. In the month of September, 1542, Juan Rodriguez Cabrillo, with the good ships "San Salvador" and "Victoria," sailed thru what is now known as the "Silver Gate," or entrance to the harbor of San Diego, and dropped anchor under the shelter of Point Loma. These were the first ships to enter this harbor, and this hardy little band of explorers were the first white men to tread the soil of the Pacific coast, of what is now the United States of America. After a stay of six days, Cabrillo sailed away, and not until 60 years later did the next European expedition visit these shores. It was here that the first mission was built, and here was flung to winds of the west the first American flag. The ruined walls of the mission, the bells, brought from Spain, Ramona's Marriage Place, made famous by picture and story, and the Mexican town of Tia Juana, all belong to the very old and are most interesting places to visit today.

The harbor of San Diego covers upwards of 20 square miles, and within its environs have been established a military post—Fort Rosecrans—quarantine station, government works and a system of fortification for the locality. The city has an important foreign commerce, and various manufacturing industries. It also has a mild and genial climate, in which the orange, the fig and the olive flourish, while the equitable temperature makes of it an ideal health resort. To the north and east are many miles of fine roads traversing fertile valleys, mesas, canyons, winding around hill and mountain and unfolding views replete with wonderful scenic effects, while across the bay lies Coronado Beach, a most popular resort.

An enjoyable two hours' trip is that from San Diego to Point Loma and return, passing the International Theosophical Institution, the monument erected to the memory of the ill-fated crew of the torpedo boat Bennington, and affording a splendid view of San Diego and its great harbor from Point Loma. An old lighthouse may be seen on the precipitous peninsula, where extensive work on fortifications is now under way. Returning to San Diego we pass thru Sunset Cliffs and Ocean Beach, with its Casino and many other amusement features.

Camp Kearny and other government sites are in close proximity to San Diego and offer interesting side trips.

POINTS OF INTEREST, MISSION SAN DIEGO.

The Mission San Diego de Alcalá, stripped of all save its memories, stands alone upon an isolated hill six miles from San Diego. A fine automobile road leads directly to the ruins, or an electric car will take the visitor within two miles of the mission and the remaining distance may be accomplished by means of burro or on foot. This mission was the beginning of the missionary enterprise in California and was founded by that great-souled missionary, Padre Fr. Junipero Serra, whose name is today cherished by all Californians of whatsoever class or creed.

On July 16, 1769, Fr. Serra raised the cross at San Diego and blessed it, celebrated mass in a temporary chapel constructed of branches and reeds, while the bell was rung from the branch of a tree. Thus was formally established the Mission of San Diego de Alcalá. The mission was given the name of the patron saint of Spain.

Padre Serra's work did not open auspiciously. Disease made such ravages among the Spaniards that his helpers were soon reduced to twenty. The Indians became troublesome, pillaging and attacking when the Spaniards resisted. Not a neophyte gladdened the good father's heart for a year. But the Padre Presidente steadfastly refused to aban-

don his new field and announced that, though all hope vanished and all others departed, he would remain alone and continue his appointed task until his last breath. Hope grew brighter as converts were finally obtained through the unflinching patience and kindness of Serra, but in 1775 trouble was brought on by the Spanish soldiers, who could not be controlled, and began a treatment of the Indian women which was demoralizing to both races and sexes. To remove the Indian neophytes from the vicinity of the soldiers' barracks Serra in 1774 moved the Mission of San Diego six miles up the valley to the point where the ruins now stand. The following year while Serra was absent upon the founding of another mission, San Diego was attacked by the Indians, whose medicine men, having become jealous of the pale-faced conjurers, had incited them to massacre the Spaniards. A fierce conflict took place, after which the body of Father Jayme, the priest in charge, was found bruised from head to foot with stones and bearing 18 arrows. Spanish aid was summoned and the execution of the four Indian chiefs concerned in the attack was the first public execution in California.

By 1780 the new church, the original of the

Route 541—San Diego to Los Angeles, Cal.—134.5 m.

Reverse Route 483.

Via Oceanside, San Juan Capistrano, Santa Ana and Anaheim. Dirt to La Jolla; concrete to Whittier; balance macadam. Summarized: 16 miles good graded dirt; 105 miles concrete; 13 miles macadam. This is the coast route to Los Angeles, one of the most scenic highways of California. The route follows closely along the shore to San Juan Capistrano, then bears inland thru a rich agricultural district.

Note (a) gives an optional exit out of San Diego via Oldtown. Note (c) gives an option from Serra Sta. to Irvine, via Laguna Beach. Route 543 gives an option from San Juan Capistrano to Anaheim via Modjeska's home and Orange.

*La Jolla, Cal. (pop. 1,500, alt. 45 ft.), is a well known beach town, attractively situated on sheer cliffs overlooking the ocean. Near La Jolla is located Scripps institution for biological research, maintained in connection with the University of California.

*Oceanside, Cal. (pop. 1,500, alt. 42 ft.), is a summer and winter resort on the Pacific, 42 miles north of San Diego. It was one of the boom towns of the '70s. Here the tourist leaves the railroad to visit the Mission San Luis Rey de Francia.

(Mission San Diego, Points of Interest, Cont'd.)

present ruins, was completed. It was built of adobe, strengthened and roofed with pine timbers.

When the missions came under the rule of Mexico, Echeandia, the first Mexican governor, made San Diego his home and he undertook the secularization of that mission. Today only the fachada of the old mission church and a few portions of the walls and a portion of the garden wall remain. The fachada had been braced to prevent its falling. The present owner of the orchard, in digging

up some old olive trees, has found some relics, spurs, metates, hollow iron cannon balls, a gun barrel, etc., and these, together with beams from the old church and from the old olive mill, form part of the collection of relics that is shown. The picturesqueness of the old ruin is marred by the new modern church of brick erected for the training of the Indian children of this section. A fine description of the Mission of San Diego in its prime is given by Richard Henry Dana in "Two Years Before the Mast."

*San Juan Capistrano, Cal., is the site of the old San Juan Capistrano mission, the "Melrose Abbey of the West," and the seventh mission in order of founding, considered to have been the most splendid of all the missions. Its ruins are both picturesque and imposing and possess, particularly when lighted by the full moon, a singularly romantic beauty. Against a background of purple mountains they stand on a hilltop at the border of the little town. The foundation of this mission was attempted in 1775 by Father Lasuen, but after the work had proceeded for eight days news received of the Indian revolt at San Diego made it necessary to postpone the prosecution of the work to a more auspicious time. Accordingly, the bells were buried and the workers retired to San Diego. Two years later Padre Serra, assisted by Fathers Pablo Mugartegui and Gregorio Amurrio, again took up the task. The cross was found still standing in its place, the bells were disinterred, and the first Holy Mass was celebrated on the Feast of All Saints, November 1, 1776, which is generally considered as the date of the founding of San Juan Capistrano. Fathers Mugartegui and Amurrio were in charge of the construction of the first building and the administrative affairs of the mission. They were both wise and zealous; the natives were well disposed, the lands were fertile, and the mission prospered from the first. In 1797 work was begun on the stone church, the remains of which are still to be seen, and it was consecrated September 7, 1806, with splendid ceremonies. The mission was at the zenith of its prosperity in 1812, when at the Feast of Purisima an earthquake sent the church tower and roof crashing down on the heads of the congregation, killing 43 persons, the officiating priest escaping as by a miracle. In 1833 Figuero secularized the mission by organizing the Indians into a "provisional pueblo" and issuing the statement that the padres had surrendered all temporalities. In 1846 the population, which had been 1,361, had dwindled to 113 souls. In February, 1896, the Landmarks Club of California secured a lease of San Juan Capistrano, including all the buildings in need of care, with the necessary ground and rights of way, and a preference to the club as purchaser in case the property should ever be for sale, and work was undertaken under the direction of Mr. R. Egan, who for many years had made personal efforts toward the preservation of

the mission. The club has restored the old adobe church, the first one built at the mission and the one used after the destruction of the church by the earthquake in 1812. The cloisters and kitchen have been reroofed and braced and various preservative repairs carried out. Mass is still celebrated in "Serra's Chapel," as the old church restored by the Landmarks Club is called. In the campanario on the northeast corner of the church of 1797 hang four bronze bells rung by ropes attached to the clappers. The large ones are tolled for the death of adults and the small ones for the passing of little children.

Whoever sees the ruins of San Juan holds them ever after in lustrous memory. Grilled windows, quaint latticed chimney, irregular arches, bits of carving in the stone capitals of pilaster and above wide wooden doors, owl-haunted colonnades of crumbling arches, clustered pillars with broken filletings, crumbling walls and floors adorned by vines and flowers in a bewildering riot of lines and colors, and roof tiles showing their red above the cream of the time-stained walls and against the exquisite blue of the sky, make a picture of never-to-be-forgotten beauty. The church, the ruins of which are still to be seen, was designed by Father Gorgonio. It is in the form of a Roman cross and is 180 feet long and 90 feet wide, with an arched roof that was a series of seven domes or bovedas, and a bell tower 120 feet high, surmounted by a gilded cock. From the dome over the transept rose a narrow spire of the large square mission tiles or ladrillos. The patio, or padre's garden, is still a lovely spot enclosed by a cloister garlanded with flower and vine. Until about 1895 San Juan had one of the best of the mission libraries. It consisted chiefly of well-known Latin and Spanish books of divinity, bound in sheepskin or parchment, tied with leather thongs or having metal clasps. The first page of the record of marriages was written and signed by Junipero Serra. A striking evidence of the industrial enterprise of the padres is presented in the ruins of the aqueducts or flumes, some of brick, others of wood, supported across ravines, which conveyed the water for irrigating the 80 acres of orchard, vineyard and garden which was once surrounded by an adobe wall. Several remnants of these aqueducts may still be seen in the village, and there remain reservoirs, cisterns and zanjas of brick, stone and cement located at advantageous points.

Right at 123.6 is Route 519 to Pasadena.

*Tustin, Cal. (pop. 750), was founded by Columbus Tustin in 1869. The homes are handsome and substantial and the town is the center of one of the richest and most beautiful orchard sections of Orange county. It has a \$50,000 up-to-date school building. It is the present terminus of the foothill line of the Southern Pacific railroad. Near by is the famous San Joaquin rancho of 80,000 acres, that extends from the mountains to the sea. The paved California state highway and branches of the 130-mile Orange county system of paved roads pass through Tustin.

Lemon Heights, in the Tustin district, is a rival in beauty if not in fame of the well known Smiley Heights, and the tourist will long remember Tustin for its stately trees and beautiful orchards.

*Santa Ana, Cal. (pop. 8,450, alt. 137 ft.), the county seat of Orange county and also its commercial metropolis, is 34 miles southeast of Los Angeles in a fruit and dairy region, and is connected to Los Angeles by the Coast Route boulevard. The great industry of the surrounding country is walnut growing, and there are few things handsomer than a walnut ranch—or more profitable. The town has a fine public park, a good public library and good schools, and a \$200,000 group of polytechnic buildings, the Ebell women's club and the Sunset men's club. Near by is the 50-acre Santa Ana golf club, the gift of Mr. Irvine, who also gave to the city the picturesque park in the Santiago canyon. The northern part of the city is noted for its beautiful homes.

*Anaheim, Cal. (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was

in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

*Fullerton, Cal. (pop. 4,000, alt. 135 ft.), is situated within five miles of the largest oil fields in the U. S. An interesting feature of the town is its fifteen acre campus adorned with eleven buildings constituting a high school and junior college, costing three million dollars.

*Whittier, Cal. (pop. 8,000, alt. 350 ft.), is 21 miles southeast of Los Angeles. In 1887 the town was named in honor of the Quaker poet by two New Englanders of the Quaker families of Pickering. The Haverhill poet's middle name was afterward given to the chief street and hotel. The Friends' college and a state school for boys and girls are located here and the town is surrounded by acres of walnut trees, celery and white sugar beets, and an orchard of alligator pears. The seed of the Avocado was imported from Mexico. A single tree near Whittier produced, in one year pears to the value of \$1,500 besides nearly 7,000 buds, which gave a further clear profit of \$1,500. Near the city are hundreds of oil derricks producing enormous quantities of crude oil.

Two miles from Whittier is the former ranch and the hacienda of General Pio Pico, Governor of Mexico at the time of the disestablishment of the missions. He it was who stripped them of every shred of ecclesiastical and temporal prosperity and ordered their neophytes to be sold as slaves.

- 12.4 0.7 Norwalk.* Keep ahead on Front St. along RR.

*Anaheim, Cal. (pop. 5,000, alt. 134 ft.), is situated on the Santa Ana river, 27 miles southeast of Los Angeles and 10-12 miles from the ocean. It is in the fertile, well-watered plain of a beautiful valley and has a genial climate. Its history is interesting, as it was in the very beginning a strictly co-operative enterprise.

It is today a city, owning and operating its own waterworks and its electric light plant. It has extensive fruit canning and drying interests and a large trade in oranges, lemons, walnuts, and farm and dairy products. Six

miles west of Anaheim is an ostrich farm. At Anaheim the first irrigating flumes in the state were installed.

*Norwalk, Cal. (pop. 600), in Los Angeles county, is 17 miles southeast of Los Angeles. Near here Dr. C. J. Sketchly in 1882 established the first ostrich farm in North America, bringing 25 birds direct from the Cape of Good Hope. Since then several other such farms have been established in the state. Norwalk is the site of the new state insane asylum and is the center of a rich farming district.

Route 548—San Diego to Los Angeles, Cal.—182.9 m.

Reverse Route 470.

Via Escondido, Elsinore, Riverside and Pomona. Dirt to Oldtown, concrete to Camp Kearny forks, gravelly dirt to 5 miles south of Temecula, concrete to Pomona and oiled macadam to Los Angeles. Summary: 85 miles concrete; 34 miles oiled macadam; 64 miles good graded gravelly dirt.

This is the inland route to Los Angeles. Although 50 miles longer than the Coast road, the trip can easily be made in one day as far as distance and road conditions are concerned. There are so many points of interest, however, which the tourist should not fall to visit and which are in a pleasing manner described in this volume, that at least 2 days should be allotted to the journey. Of particular interest are Ramona's marriage place at Oldtown, the Mission San Luis Rey, 6 miles from the highway, but well worth while the side trip (see Note (a) Route 470 for directions), the Glenwood Mission Inn and Roubidoux Mt. at Riverside.

- 4.2 0.2 Right-hand road; turn right. Pass palm tree on right 4.4.
First palm tree planted in California 1769 by Father Serra, in whose memory the cross on the hill was erected by the order of Panama.
- 4.5 0.3 3-corners; bear left across wooden trestle.
- 4.8 0.3 Right-hand road; turn right onto concrete, shortly ascending grade. Avoid prominent left-hand diagonal road 13.0.
Straight ahead at 4.8 is Note (a) Route 541, connecting with Route 541 to Los Angeles.
 Diagonally left at 13.0 leads to Camp Kearny.

*Oldtown, Cal. Ramona's Marriage Place, an interesting spot well worth visiting, is located here. Helen Hunt Jackson, the author of "Ramona," has endeared her heroine to the hearts of a thousand readers and the associations to be found in Ramona's Marriage Place bring one in closer touch and

sympathy with her favorite character. An hour spent in this charming little spot is conducive of much enjoyment and rare education. A little way north of town still stands the first palm tree planted in California in 1769 by Father Serra, in whose memory the cross on the hill was erected.

Pass Anderson Sta. on left 109.8. Pass Val Verde Sta. on

*Escondido, Cal. (pop. 3,500, alt. 638 ft.), "The Hidden Valley," a city of San Diego county, is 35 miles north of San Diego. It is a favored spot in the foothills 700 feet above the sea and surrounded by irrigated lands which produce oranges, lemons, and various other crops. An extremely fine variety of Muscatel grape is grown here, its sweetness due to the peculiarity of the soil and the continuous sunshine. On Admission Day each year, that is on September 9th, the anniversary of Cali-

fornia's admission to the Union in 1850, Grape Day is celebrated with a Grape festival which is a relic of the vintage fiestas of a hundred years ago, and is attended by thousands of interested sightseers and merry-makers.

Escondido was laid out in 1885 by a body of San Diego capitalists on what was previously known as the Wolf's Kill Ranch, or Rincon del Diable—"the Devil's Corner." The founders at once built a \$10,000 school house and the University of Southern California erected a \$50,000 college.

From every issue of MOTOR LIFE you can learn something new about economical motor car operation. See Motor Life colored insert.

SERVICE STA.—United States Tire Sales & Service Depots located here.

*Ontario, Cal. (pop. 7,000, alt. 986 ft.), known as the "model colony," is 18 miles west of San Bernardino and 6 miles from Pomona. It is famous for its Euclid avenue, a beautiful street 200 feet wide and 9 miles long which extends among orchards to the very base of the mountains. An electric tram car line runs in the middle of the avenue and is separated from the driveways by lines of gum, pepper, cypress, Grevillea, and palm trees. This electric railway mounts from an elevation of 980 feet at the Southern Pacific station to a half mile elevation at the end of the avenue. In the early days of the town mules drew the passengers up this incline, but the return was made by gravity, the mules riding as passengers on an ingeniously contrived platform at the rear of the train.

Three miles west of Ontario at Guasti are the vineyards of the Italian vineyard company, which cover 3,500 acres and from which 20,000 tons of grapes are harvested annually. The annual yield of dry and sweet wines formerly produced here was 4,000,000 gallons and the product was said to equal in amount and quality that of some of the famous grape-growing districts of Italy. The Italian vineyard company had the largest wine vaults in the world. Visitors are admitted to vineyards and the visit is especially interesting during the vintage season in September and October. The United States government has a 20-acre station at Guasti, where several hundred varieties of grapes are grown experimentally.

Ontario was founded in 1881 by W. B. Chaffey and George Chaffey, Jr., brothers from the

province of Ontario, Canada, for which the town is named. At the founding of Ontario its founders set apart half the town and villa lots as endowments for a college of agriculture which was made a department of the University of California. In 1883 the corner stone of the college building was laid and in 1885 a \$20,000 building of brick was completed. To the north of the town is Mount San Antonio, locally known as "Old Baldy," on whose slopes are many charming summer retreats and good hunting and fishing.

*Pomona, Cal. (pop. 15,000, alt. 861 ft.), meaning "Goddess of Fruits," is located in the center of an immensely rich agricultural district, where the orange and the lemon are supreme; in fact, this point is now the largest orange shipping place in the world. The city is 33 miles east of Los Angeles on two of the best highways in the state, and convenient to many attractive mountain drives and resorts. Many old adobe houses, fixed up in modern fashion by well-to-do white people, can be seen in this city. At Relay Heights is the elegant home of Elsberry W. Reynolds, Chicago publisher of Harold Bell Wright's works.

Visitors should not fail to visit the famous Ganesha park, in all its scenic beauty and grandeur. This park contains a Greek theater, which has a 127-foot stage. This theater is located in a natural amphitheater with unsurpassed acoustic properties, surpassed only by those of the Mormon Tabernacle at Salt Lake City, Utah.

Four miles north of Pomona is Pomona college, one of the foremost educational institutions of California.

- Meeting branch trolley, turn right onto W. 2nd St.

- 14.2 9.9 Right-hand road; turn right. Same thorofare becomes Florida Ave.

*Corona, Cal. (pop. 5,200, alt. 602 ft.), lies 48 miles s. e. of Los Angeles. It is the largest shipping point of lemons in the United States. It has two byproducts plants, shipping tons of citric acid manufactured from cull lemons—the only plants of the kind in the United States. One lemon grove of 820 acres is irrigated from two connected wells, an engine forcing water through pipes three and one-half miles at an elevation of 750 feet.

*Ontario, Cal. (pop. 7,000, alt. 986 ft.), known as the "model colony," is 18 miles west of San Bernardino and 6 miles from Pomona. It is famous for its Euclid avenue, a beautiful street 200 feet wide and 9 miles long which extends among orchards to the very base of the mountains. An electric tram car line runs in the middle of the avenue and is separated from the driveways by lines of gum, pepper, cypress, Grevillea, and palm trees. This electric railway mounts from an elevation of 980 feet at the Southern Pacific station to a half mile elevation at the end of the avenue. In the early days of the town mules drew the passengers up this incline, but the return was made by gravity, the mules riding as passengers on an ingeniously contrived platform at the rear of the train.

Route 556—San Diego to El Centro, Cal.—122.1 m.

Reverse Route 586.

Via Jamul and Campo. Fine graded gravel to Campo, fair dirt and sand to foot of mountains, concrete highway thru Imperial valley. Summary: 31 miles concrete highway; 54 miles fine graded gravel; 37 miles fair dirt and sand.

An easy one day trip over a scenic mountain country and across the desert and agricultural sections of Imperial valley. A wonderful view of the latter and the Salton sea may be had from the summit of the mountain range. Dixieland lies at the edge of the irrigated district and the tourist now passes thru great fields of cotton and alfalfa, scarcely realizing that only a few years ago this wide area was a barren desert. Accommodations and supply stations will be found at frequent intervals.

Route 556 offers a longer option via El Cajon, having the advantage of 24 miles of pavement and has less grades.

- 1.3 0.6 M St.; meeting cross-trolley, turn left.

***El Centro, Cal.** (pop. 6,000, alt. 50 ft. below sea level), is on the New National Southern highway, in the Imperial valley. It is, as its name indicates, the center of the valley, and is a rapidly growing place which already has substantial business blocks of concrete and numerous handsome residences. El Centro and Blythe are the two cities in California which hold cotton festivals, for they now grow Egyptian cotton with a longer and finer and stronger fibre than any produced in the south.

The **Imperial Valley**, generally known as the "Nile of America," is situated in the extreme southeastern part of the state at an altitude varying from sea level to 202 feet. This depressed portion is surrounded, at a slightly higher level, by a conspicuous ancient beach-line, being supplied in ages past by the Colorado river.

In 1900 Imperial Valley was a barren waste, an abode of death rather than life, where many

pioneers perished for the want of water. Today Imperial Valley supports eleven thriving towns and has contributed immeasurably to the glories of her state thru the fertility of its silt deposits. Its alluvial soil is easy of tillage and wonderfully productive. In 1901 the first canal to bring water for domestic purposes from the Colorado river was completed. Thus was launched the greatest irrigation system in the United States. Stepping forward seventeen years, as if by magic, picture the present scene: Three hundred thousand acres producing crops twelve months in the year. It leads the world in asparagus production, dates, cantaloupes, cotton, long staple; seedless grape fruit, butter, alfalfa, dairying, etc. No snows—no winters—all summers.

This valley gained a great deal of prominence in the east when Harold Bell Wright's story, "The Winning of Barbara Worth," was staged there. Mr. Wright lives on his ranch near Holtville.

Route 558—El Centro, Cal., to Yuma, Ariz.—64.3 m.

Reverse Route 584.

Via Holtville. First 20 miles fair to good graded dirt and gravel thru irrigated district; balance over Yuma desert, deep sand and plank roads. During 1919 this route was impassable and tourists must make local inquiries before attempting to cross the desert.

Before starting this trip see that your gas tank is filled to capacity and have an extra supply of water and provisions, as there are no supply stations between Holtville and Yuma. Useful implements are shovel and hand axe. Immediately after crossing Highline canal (19.4) deflate tires and be sure to get them soft enough for good flat surface. Keep car moving and stay in the rut. Do not let wheels spin or jump; if they do, instantly ease up on throttle until such action ceases. In case car gets stuck in the sand cut some brush and lay it crossways for wheels to track on.

Note (a) offers an option from mileage 53.8 into Yuma over road slightly longer but having less sand.

*Agua Caliente, Cal. (pop. 1,000, alt. 50 ft.), meaning "warm water" or "warm spring," is situated 45 miles north of San Francisco. Here are located the springs of the same name, which have been selected to fill the needs of those who want rest and relaxation and also for those who need nature's sulphur waters to tone up the system. The springs are located between two mountain ranges in a flat, beautiful valley from two to three miles wide. This is "The Valley of the Moon" immortalized by the late Jack London in his wonderful

story of this name. The foothills of the mountains are within easy walking distance for those who wish to take a short exhilarating tramp, while a mile or two farther are the mountains for those who wish wilder scenery in climbing its slopes and roaming through the forests.

Santa Rosa, only 16 miles north of Agua Caliente Springs, is the home of Luther Burbank, the greatest horticulturist the world has ever known. Sonoma, one of the oldest towns in California, is only three miles south.

*Calexico, Cal. (pop. 797), in Imperial county, is located at the extreme southern boundary of the county which is at the same time the central part of the Imperial valley. Only the international boundary line divides it from Mexicala, a town on the Mexican side. At Calexico are a United States custom house, bureau of immigration and bureau of animal industry, two grammar schools, new and modern. Near the city is the headquarters of the California-Mexico Land Cattle company, which owns a large tract of land adjoining Calexico on the United States side and 1,000,000 acres on the Mexican side. The city is surrounded by the oldest farming settlement in the Imperial valley and it was here that water was first available for irrigation canals.

The Imperial valley extends from the Colorado river on the east to the Coast range on the west, and is from 30 to 45 miles in width and on the United States side extends from the Mexican boundary north 50 to 60 miles. In 1901 this great valley was considered the Colorado desert. Not a white man lived there and very few Indians. In January, 1902, a dozen surveyors were on the ground running lines for canals and a year later 2,000 settlers had arrived. Today the valley has an irrigable area of fully 1,400,000 acres, with an ample water supply for every acre, and a population of over 50,000 with towns equipped with telephones, electric lights, churches, banks and school houses and railways. Over 560,000 acres are under cultivation. Every sort of grain, alfalfa, large crops of fruit and vegetables are grown. The valley is a delta region, formed by the Colorado river and every acre is rich alluvial deposit. The land when irrigated is capable of producing immense crops. Long fibred cotton has been grown with a record yield per acre. Calexico in particular produces large crops of dates which rival imported varieties.

*El Centro, Cal. (pop. 6,000, alt. 50 ft. below

sea level), is on the New National Southern highway, in the Imperial Valley. It is, as its name indicates, the center of the valley, and is a rapidly growing place which already has substantial business blocks of concrete and numerous handsome residences. El Centro and Blythe are the two cities in California which hold cotton festivals, for they now grow Egyptian cotton with a longer and finer and stronger fibre than any produced in the south.

The Imperial Valley, generally known as the "Nile of America," is situated in the extreme southeastern part of the state at an altitude varying from sea level to 202 feet. This depressed portion is surrounded, at a slightly higher level, by a conspicuous ancient beach-line, being supplied in ages past by the Colorado river.

In 1900 Imperial Valley was a barren waste, an abode of death rather than life, where many pioneers perished for the want of water. Today Imperial Valley supports eleven thriving towns and has contributed immeasurably to the glories of her state thru the fertility of its silt deposits. Its alluvial soil is easy of tillage and wonderfully productive. In 1901 the first canal to bring water for domestic purposes from the Colorado river was completed. Thus was launched the greatest irrigation system in the United States. Stepping forward seventeen years, as if by magic, picture the present scene: Three hundred thousand acres producing crops twelve months in the year. It leads the world in asparagus production, dates, cantaloupes, cotton, long staple; seedless grape fruit, butter, alfalfa, dairying, etc. No snows—no winters—all summers.

This valley gained a great deal of prominence in the east when Harold Bell Wright's story, "The Winning of Barbara Worth" was staged there. Mr. Wright lives on his ranch near Holtville.

*Yuma, Ariz. (pop. 6,450, alt. 139 ft.), is located on the east bank of the Colorado river, 80 miles from the Gulf of California. The business portion of the city is built in the valley close to the river; the residence portion stretches way on to the Mesa and is on much

higher ground. Steamboats ascend the Colorado river from the Gulf of California to this place and many miles above it. From the dome of the courthouse, erected in 1910 at a cost of \$50,000, a magnificent view of the surrounding country may be obtained.

- 17.3 1.5 3-corners; bear left.

*Escondido, Cal. (pop. 3,500, alt. 638 ft.), "The Hidden Valley," a city of San Diego county, is 35 miles north of San Diego. It is a favored spot in the foothills 700 feet above the sea and surrounded by irrigated lands which produce oranges, lemons, and various other crops. An extremely fine variety of Muscatel grape is grown here, its sweetness due to the peculiarity of the soil and the continuous sunshine. On Admission Day each year, that is on September 9th, the anniversary of California's admission to the Union in 1850, Grape Day is celebrated with a Grape festival which is a relic of the vintage fiestas of a hundred

years ago, and is attended by thousands of interested sightseers and merry makers.

Escondido was laid out in 1885 by a body of San Diego capitalists on what was previously known as the Wolfs Kill Ranch, or Rincom del Diable—"the Devil's Corner." The founders at once built a \$10,000 school house and the University of Southern California erected a \$50,000 college.

*Oceanside, Cal. (pop. 1,500, alt. 42 ft.), is a summer and winter resort on the Pacific, 42 miles north of San Diego. It was one of the boom towns of the '70s. Here the tourist leaves the railroad to visit the Mission San Luis Rey de Francia.

*National City, Cal. (pop. 3,300, alt. 17 ft.), in San Diego county, is on the bay four miles from San Diego, and on the automobile road from San Diego to Coronado. It is a fine residence section easily reached by trolley and will repay a visit. It has lumber and fruit packing interests, and is the terminus of the Santa Fe railway which has located here its principal machine and car shops and yard. The terminal grounds are the largest in the United States and include 225 acres with six miles of water front and a round house accommodating 48 locomotives. The town was founded by the Kimball Brothers, who purchased the old Rancho de la Nacion,

or Nation's Farm, of the Spanish regime. They laid out the northwestern corner of the Rancho as a town and gave 17,000 acres of their best land to bring the Atchison, Topeka and Santa Fe railroad here.

*Tia Juana, Mex. Most of the tourists to the southland take in the trip to Tia Juana, especially those who are fond of gambling. Tia Juana Fair is always in full swing, operating every conceivable game of chance. Besides this, the Southern California jockey club has completed a large grandstand and race track where running and trotting races are pulled off. The village itself is typical of an old Mexican settlement, the place to eke out a sleepy, lazy existence.

HOTELS—Hotel Del Coronado.

*Coronado, Cal. (pop. 4,000, alt. 10 ft.), is a city of homes. It is essentially a suburb of San Diego and has all of the advantages of cosmopolitan life. To the west and directly in front, Point Loma, a rocky headland, juts into the ocean and protects the entrance to San Diego bay. Well to the south, rising from the sea and clothed always in a purple haze, are the Coronado Islands. Bleak, rocky cliffs, the habitat of myriad birds and really in Mexican jurisdiction, they nevertheless have given their name to the city of Coronado. To the north is the sea wall with its line of mansions

of well-to-do people, and to the south, where it reaches the mainland and saves Coronado from being an island, is the Silver Strand.

The Strand and Coronado and North Island, which is really part of Coronado, form the barrier which separates San Diego bay from the Pacific. The Strand itself is a stretch of beach eight miles long. Coronado lies directly opposite San Diego and is approximately a mile square. It is and has for many years been the playground of a continent and visitors from all the world, in every month of the year, bask in the sunshine of this beautiful city.

There Is a Blue Book for Every Section of the United States

The AUTOMOBILE BLUE BOOK is a veritable encyclopedia of touring information—13 volumes in all—uniform in size and binding. If this volume does not show the territory you want, see the "Volume Index Map Insert" and you will find one that does.

Each \$3.00 net

- Jog right across trolley, then left, and follow along same down to
- 23.0 1.3 Ferry across San Diego bay. Leaving ferry, keep ahead with trolley.
- 23.3 0.3 H St.; turn right with one line of trolley. Cross RR 23.5.
- 23.9 0.6 5th St.; meeting cross-trolley, turn left.
- 24.2 0.3 SAN DIEGO, 5th St. & Broadway.

Route 578—San Diego, Cal., and Return—24.2 m.

Reverse Route 577.

Via Coronado Beach, Palm City and National City. Pavement and macadam; some of it in rather poor condition.

From San Diego, the channel is crossed by ferry to Coronado Beach, then thru Tent City, paralleling an old RR and running on an old sand bar.

- 24.2 0.6 SAN DIEGO, Broadway & 5th St.

*Coronado, Cal. (pop. 4,000, alt. 10 ft.), is a city of homes. It is essentially a suburb of San Diego and has all of the advantages of cosmopolitan life. To the west and directly in front, Point Loma, a rocky headland, juts into the ocean and protects the entrance to San Diego bay. Well to the south, rising from the sea, and clothed always in a purple haze, are the Coronado Islands. Bleak, rocky cliffs, the habitat of myriad birds and really in Mexican jurisdiction, they nevertheless have given their name to the city of Coronado. To the north is the sea wall with its line of mansions of well-to-do people, and to the south, where it reaches the mainland and saves Coronado from being an island, is the Silver Strand.

The Strand and Coronado and North Island, which is really part of Coronado, form the barrier which separates San Diego bay from the Pacific. The Strand itself is a stretch of beach eight miles long. Coronado lies directly opposite San Diego and is approximately a mile square. It is and has for many years been

the playground of a continent and visitors from all the world, in every month of the year, bask in the sunshine of this beautiful city.

*National City, Cal. (pop. 3,300, alt. 17 ft.), in San Diego county, is on the bay four miles from San Diego, and on the automobile road from San Diego to Coronado. It is a fine residence section easily reached by trolley and will repay a visit. It has lumber and fruit packing interests, and is the terminus of the Santa Fe railway which has located here its principal machine and car shops and yard. The terminal grounds are the largest in the United States and include 225 acres with six miles of water front and a round house accommodating 48 locomotives. The town was founded by the Kimball Brothers, who purchased the old Rancho de la Nacion, or Nation's Farm, of the Spanish regime. They laid out the northwestern corner of the Rancho as a town and gave 17,000 acres of their best land to bring the Atchison, Topeka and Santa Fe railroad here.

Route 579—San Diego, Cal., and Return—25.3 m.

Reverse Route Not Compiled.

Via Point Loma and returning via Ocean Beach. Graded and dragged dirt and gravel road, some of which is oiled.

WHERE TO GO NEXT WINTER

EAST COAST
FLORIDA
WEST COAST

SEE THE SOUTHERN BLUE BOOK VOL. 6

Phoenix Grand Canyon Section

POINTS OF INTEREST, PHOENIX, ARIZ.

Phoenix (pop. 27,500, alt. 1,082 ft.), noted as a winter resort, is the capital of Arizona. It is centrally situated in the midst of the great Salt river valley and has an ideal climate, with a clear atmosphere and cloudless sky. With its beautiful tree lined streets and avenues full to overflowing with countless flowers, first of which are the rich, rare, radiant red roses, Phoenix is well called the "Rose City." The gardens are a great treat to the visitor. From November to May, and in less profusion throughout the other months of the year, countless thousands of roses blossom and bloom in every garden, along the roads and drives. There are also many other plant attractions,—palms, oranges, olives, dates and every known variety of tree and shrub growing luxuriantly here.

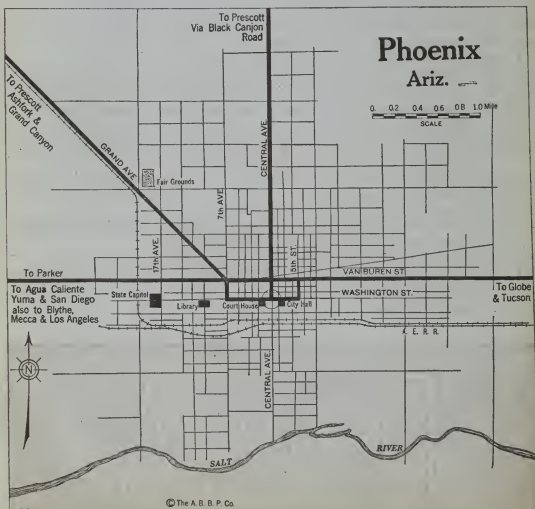

Many beautiful drives may be made in all directions from Phoenix, with wonderful natural roads for miles thru valleys lying between picturesque mountain ranges. Camelback mountain is 9 miles north of the city; Hole-in-the-Rock is about 7 miles to the northeast; Orangewood, 6 miles north on Central Ave., the heart of the orange section; Government date farm at Tempe, 8 miles east; Indian school (second largest in the U. S.) reached by Indian school car line.

Ostrich farms are in several directions, from 3 to 13 miles from Phoenix.

Adjacent to Phoenix are the other valley towns of Mesa, Tempe, Glendale and Peoria. Mesa is 16 miles east of Phoenix and is a growing town of over 2,000 population. Superstition mountain, one of the most interesting and grand of the mountain peaks of the west, seems to overlook the town, but in reality it is over 20 miles distant. Chandler is a new town 8 miles south of Mesa. The townsite has been beautifully planned. Good autoroads connect Chandler with Mesa and Phoenix. Good roads also link Mesa and Tempe, which is half way between Phoenix and Mesa.

Tempe is the seat of the Normal school. Glendale is located about 9 miles northwest and is connected by railroad and an electric line. At Glendale is located one of the longest beet sugar factories in the west. Peoria is a growing town. It is 4 miles northwest of Glendale and 13 miles from Phoenix. Two wonderful pieces of work, the Granite Reef dam, 26 miles from Phoenix, and Roosevelt dam, 75 miles away, can be reached by auto over the grandest scenic roads in the world.

Adjacent to Phoenix are the remains of prehistoric peoples who populated the Salt river

valley and constructed irrigation canals. In several cases the lines of these canals follow the present great canals of the Salt river irrigation system, which covers over 200,000 acres surrounding the city. Many Indian reservations are situated within close proximity to Phoenix, peopled with industrial workers,—makers of baskets, pottery, beadwork and blankets.

Papago Saguaro National Monument, which lies about 9 miles east of Phoenix, Arizona, was set aside to preserve its magnificent growth of desert flora, including many striking examples of giant cactus (saguaro) and many other species of cacti. There are also yucca palms of great size and perfection. The saguaro is that variety of cactus which grows in a cylindrical form 30 or 35 feet high, with a dozen branches of the same character

springing from a main stalk, generally near the top.

There are also within the tract prehistoric pictographs upon the faces of the rocks, adding to the interest of the reservation and to its ethnological and archaeological value. A ridge of low hills through the center of the reservation includes numerous caves of a good deal of interest. One of these openings, known locally as "Hole-in-the-rock," is 15 feet high and 25 feet long with two amphitheater approaches, one on either side. These approach rooms are about 300 feet square, with an overhanging rock for a roof in each case.

This monument is near the Salt river valley and can be seen in connection with a trip to that celebrated government irrigation system.

POINTS OF INTEREST, GRAND CANYON, NATIONAL PARK, ARIZ.

The Grand Canyon of the Colorado, the deep river trough of the Colorado river, chiefly in Arizona, is one of the most stupendous natural wonders of the globe. It is about 250 miles in length, with a width at the top of from 5 to 12 miles, and descends in a series of steps or benches to a depth in places of 4,000-5,000 feet below the plateau sur-

face which it trenches. Its grandest effect, as revealed by extreme depth, the fantastic carvings of the walls and of castellated buttes rising from the center, and the brilliancy of the rock coloring, are had from a point opposite the Kaibab Plateau of the Painted Desert, about 65 miles northwest of Flagstaff. Different parts of the Canyon or its continuations have received special names, such as

National Old Trails Route, Grand Canyon.

Marble Canyon, Glen Canyon (in Utah), etc. Southwest from Utah, the Colorado passes into Arizona and swings west between the high walls of the mighty Grand Canyon, which is the area of the National park. Thence emerging into more open country, it skirts Nevada and California, cuts through Mexico and deposits its vast burden of mud in the Gulf of California.

In ages before history the Colorado river flowed upon the surface of this now lofty tableland, but, like the roadside ditch, it gradually wore an ever-deepening channel. In time, as with the roadside ditch, the banks caved in and the current carried the soil away. Important agents in the development of the Canyon have been the gradual uplift of the whole plateau country, which has maintained the steep downgrade of the river; and the ever busy chisels of the untiring winds which have carved and polished through untold centuries, until today the Colorado flows through a series of beautiful self-dug canyons hundreds of miles long. The sides of these canyons are carved and fretted beyond description and almost beyond belief. The strata of the rock and soil exposed by the river's excavations are marvelously colored. The blues and grays and mauves and reds are second in glory only to the canyon's size and sculpture. The colors change with every changing hour. The morning and evening shadows play magician's tricks. That portion of the canyon affording the finest spectacle has been set aside by Congress as the Grand Canyon National Park.

The Indian legend of the Grand Canyon is picturesque. There was a great chief who mourned the death of his wife, and would not be comforted. To him came Ta-vwoats, one of the Indian gods, and told him that his wife was in a happier land, to which he would take him that he might see for himself, if upon his return he would cease to mourn. This the chief promised, whereupon Ta-vwoats made a trail through the mountains that guarded that beautiful land. This trail was the canyon gorge of the Colorado. Through it Ta-vwoats led the chief. When they returned the god exacted from the chief a promise that he would tell no one of its joys, lest through discontent with the things of this earth others should desire to go there. Then Ta-vwoats rolled a river into the gorge, a mad, raging stream, that should engulf any that might attempt to enter thereby. This river was the Colorado.

The exploration of the Grand Canyon was the culminating scene of one of the most stirring adventures of American history. This canyon was first reported to the civilized world by the early Spanish explorers in 1540 and first described in 1851 by the Sitgreaves expedition. The war department

explored the navigable waters from the south in 1858 but stopped at the foot of the canyons. Of the Grand Canyon, hugest and deepest of all, strange tales were told in the hunter's cabin and the prospector's camp of fearful whirlpools by which men and boats were overwhelmed and dragged into the abyss of waters, of underground passages and of giant falls whose roaring music could be heard on distant mountain summits. The Indians feared it. Even the hardiest of frontiersmen refused it, and it remained for a geologist and a school teacher, a one-armed veteran of the Civil war, John Wesley Powell, afterwards director of the U. S. Geological Survey, to dare and to accomplish. This was in 1869. Nine men accompanied him in four boats. There proved to be no impassable whirlpools in the Grand Canyon, no underground passages and no cataracts—but the trip was hazardous in the extreme. The adventurers faced the unknown at every bend, their boats were repeatedly upset in the rapids, food nearly exhausted and they were unable to build fires sometimes for days at a stretch. Four men deserted, hoping to climb the walls, and were never heard from again—and this happened the very day before Major Powell and his faithful half dozen floated clear of the Grand Canyon into safety.

It is possible to get a glimpse of the Grand Canyon Natural Park by lengthening your trans-continental trip one day, but this day must be spent either on the rim or in one hasty rush down the Bright Angel trail to the river's edge; one cannot do both the same day. Two arduous days, therefore, will give you a rapid glance at the general features. Three days will enable you to substitute the newer Hermit trail, with a night in the canyon, for the Bright Angel trail. Four or five days will enable you to see the Grand Canyon, but after you see it you will want to live with it awhile. There are two other trails, the Bass trail and the Grand View.

The canyon should be seen first from the rim. Hours, days, may be spent in emotional contemplation of this vast abyss. Navajo Point, Grand View, Shoshone Point, El Tovar, Hopi Point, Sentinel Point, Pima Point, Yuma Point—are a few only of many spots of inspiration. An altogether different experience is the descent into the abyss. This is done on mule-back over trails which zigzag steeply but safely down the cliffs.

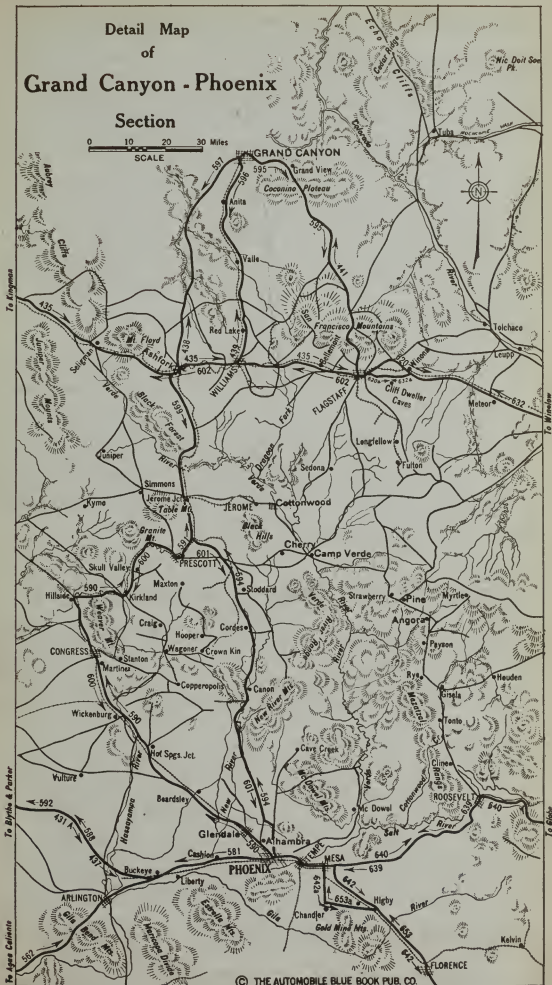

The hotels, camps and facilities for getting around are admirable and the border of the canyon is now reached by a branch of the A., T. & S. F. R. R., leaving from Williams Station, and by auto roads given in this volume. Do not miss an opportunity of seeing this stupendous and unparalleled spectacle—a sight never to be forgotten.

*Agua Caliente, Cal. (pop. 1,000, alt. 50 ft.), meaning "warm water" or "warm spring," is situated 45 miles north of San Francisco. Here are located the springs of the same name, which have been selected to fill the needs of those who want rest and relaxation and also for those who need nature's sulphur waters to tone up the system. The springs are located between two mountain ranges in a flat, beautiful valley from two to three miles wide. This is "The Valley of the Moon" immortalized by the late Jack London in his wonderful

story of this name. The foothills of the mountains are within easy walking distance for those who wish to take a short exhilarating tramp, while a mile or two farther are the mountains for those who wish wilder scenery in climbing its slopes and roaming through the forests.

Santa Rosa, only 16 miles north of Agua Caliente Springs, is the home of Luther Burbank, the greatest horticulturist the world has ever known. Sonoma, one of the oldest towns in California, is only three miles south.

American Express Travelers Cheques

are accepted by stores and restaurants in Phoenix and Agua Caliente.

Route 583—El Centro to San Bernardino, Cal.—171.9 m.

Reverse Route 451.

Via Brawley, Thermal, Banning, Beaumont and Redlands. Graded dirt to Westmoreland; natural desert road and 10 miles of concrete to Thermal; alternate stretches of macadam, gravelly sand and concrete to Redlands; then 8.5 miles of good macadam; balance poor dirt, except for a short stretch of concrete, entering Beaumont. We are advised that the unpaved section on this trip from Beaumont to Redlands will be graded and hard surfaced in the near future. Summary: 25.9 miles macadam; 20 miles concrete; 103.1 miles desert road, dirt and gravelly sand; 15.5 miles sand; 7.5 miles poor dirt.

The road leads thru a rich agricultural section of the Imperial valley to Westmoreland; then thru a barren desert country along the west side of the Salton sea to Thermal; replenish your gas, oil and water supply at Westmoreland. Use caution on the 3-foot concrete road, as bad breaks are liable to occur at any time, owing to the excessive heat. There is considerable travel over this route and excepting the 20-mile stretch just south of Thermal, good time can be maintained most of the way. There is no danger of any serious trouble unless the tourist should be unfortunate enough to be caught in a sand storm. From Beaumont the road is over rolling hills, with big mountain ranges always in view to Redlands, and passes thru miles of orange groves which line the highway into San Bernardino.

- 25.9 8.9 SAN BERNARDINO, E & 3rd Sts., bank on right.

Route 584—Yuma, Ariz., to El Centro, Cal.—64.3 m.

Reverse Route 558.

Via Holtville. Deep sand and plank road over Yuma desert, last 20 miles fair to good graded dirt and gravel thru irrigated districts.

Before starting this trip see that your gas tank is filled to capacity and have an extra supply of water and provisions, as there are no supply stations between Yuma and Holtville. Useful implements are shovel and hand ax. Deflate tires and be sure to get them soft enough for good flat surface. Keep car moving and stay in the rut. Do not let wheels spin or jump—if they do, instantly ease up on the throttle until such action ceases. In case car gets stuck in the sand, cut some brush and lay in cross- ways for wheels to track on.

- 61.5 0.4 Right-hand road; turn right. Cross RR at sta. 64.0—now on Main St.
- 64.3 2.8 EL CENTRO,* 7th & Main Sts.

HOTELS—The Barbara Worth, 7th & Main Sts.

*El Centro, Cal. (pop. 6,000, alt. 50 ft. below sea level), is on the New National Southern highway, in the Imperial valley. It is, as its name indicates, the center of the valley, and is a rapidly growing place which already has substantial business blocks of concrete and numerous handsome residences. El Centro and Blythe are the two cities in California which hold cotton festivals, for they now grow Egyptian cotton with a longer and finer and stronger fiber than any produced in the south.

The Imperial Valley, generally known as the "Nile of America," is situated in the extreme southeastern part of the state at an altitude varying from sea level to 202 feet. This depressed portion is surrounded, at a slightly higher level, by a conspicuous ancient beach-line, being supplied in ages past by the Colorado river.

In 1900 Imperial Valley was a barren waste, an abode of death rather than life where many pioneers perished for the want of water. Today Imperial Valley supports eleven thriving

Note (a) Route 584—Yuma to Knob Siding, Ariz.—14.7 m.

Reverse Note (a) on Route 558.

This route is 4 miles longer than regular route, but goes thru an irrigated section and has much less sand.

- 0.0 0.0 YUMA, 1st & Main Sts. Go east on 1st St.
 0.1 0.1 End of street; turn left.

 5.8 0.6 End of road; turn left across bridge. Thru washes 9.1-10.1.
 11.5 5.7 Left-hand road; turn left. Curve right and left with road 13.5.
 14.7 3.2 End of road, just beyond RR; turn right.
 Right is Route 584 to El Centro at mileage 10.5.

Route 585—El Centro to San Diego, Cal.—129.9 m.

Reverse Route 555.

Via new road across Cuyamaca mountains, El Cajon and La Mesa. First 31 miles on concrete highway thru Imperial valley, then fair road up east slope of mountains to summit of range. The next 65 miles are gravelly dirt with some sandy stretches, balance concrete. Summary: 55 miles concrete highway, 50 miles good gravelly dirt, 25 miles fair dirt and sand.

Leaving El Centro the route traverses a fine agricultural district to Dixieland, then a desert area to the edge of Imperial valley. Balance of way leads thru a scenic mountain country.

This route offers a longer option to Route 586, but has the advantage of 24 miles of paving, and has less grades.

(El Centro Points of Interest, Cont'd.)

towns and has contributed immeasurably to the glories of her state thru the fertility of its silt deposits. Its alluvial soil is easy of tillage and wonderfully productive. In 1901 the first canal to bring water for domestic purposes from the Colorado river was completed. Thus was launched the greatest irrigation system in the United States. Stepping forward seventeen years, as if by magic, picture the present scene: Three hundred

thousand acres producing crops twelve months in the year. It leads the world in asparagus production, dates, canteloupes, cotton, long staple; seedless grape fruit, butter, alfalfa, dairying, etc. No snows—no winters—all summers.

This valley gained a great deal of prominence in the east when Harold Bell Wright's story, "The Winning of Barbara Worth," was staged there. Mr. Wright lives on his ranch near Holtville.

Route 587—El Centro to Riverside, Cal.—174.7 m.

Reverse Route 430.

Via Brawley, Thermal, Banning and Beaumont. Graded dirt to Westmoreland, natural desert road and ten miles of concrete to Thermal, alternate stretches of macadam, gravelly sand and concrete balance of way. Summary: 40 miles concrete; 30 miles good macadam; 25 miles graded dirt and 100 miles partly improved and natural desert roads.

The road leads thru a rich agricultural section of the Imperial valley to Westmoreland, then thru a barren desert country along the west side of the Salton sea to Thermal. Replenish your gas, oil and water supply at Westmoreland. Use caution on the 8-foot concrete road, as bad breaks are liable to occur at any time owing to the excessive heat. There is considerable travel over this route and excepting the 20-mile stretch just south of Thermal, good time can be maintained most of the way. There is no danger of any serious trouble, unless the tourist should be unfortunate enough to be caught in a sand storm.

*Needles, Cal. (pop. 3,000, alt. 491 ft.), 250 miles northeast of San Bernardino, is a railroad town with railroad shops, etc. The town is on the Arizona border and on the banks of the Colorado river. The climate is

beneficial for consumptives, the air being dry, without fog or dew, but the heats of summer are excessive. The Mohave Indians dwell in the vicinity. The town derives its name from the peculiar shape of the rocks in the neighborhood.

POINTS OF INTEREST, PRESCOTT, ARIZ.

Prescott (pop. 5,100, alt. 5,320 ft.) is picturesquely situated in a basin or valley among the pine-clad mountains of Arizona, about 180 miles from Tucson. It is the county seat of Yavapai county, which county is known as the "Mother" of Arizona counties, because it was in Prescott in 1863 that the first territorial capital and county seat of the state were established. At that time Yavapai covered nearly half the area of Arizona.

The Grand Canyon National park is 130 miles distant, and can be comfortably made in a day. On this trip may also be seen Cathedral cave, with its myriad stalactite and stalag-

mite in thousands of weird, fantastic shapes. Within half an hour of Prescott is Granite Dells, with its beautiful lake and majestic granite formations, and Iron Springs, a resort at an altitude of 6,000 feet. Castle, the best preserved group of prehistoric cliff dwellings on the continent, and Montezuma Well, a cup-shaped lake formed by constant uniform inflow of subterranean waters, can also be made over splendid roads. From Montezuma Well to the Finnie Soda Springs is but a distance of half a mile and well worth the stopover. At Jerome and Clarkdale are located the great copper mine and mammoth \$2,000,000 smelter of the United Verde Copper Co.

Yavapai County and Prescott, Ariz.

Of all Arizona, Prescott and Yavapai County justly claim the best year-round climate, possessing factors combined to make outdoor living a real pleasure. Its cliffs and cave dwellings and hieroglyphic records are said by experts to be as old as the pyramids of Egypt, and of equal interest to those who delve in the lore of unknown people.

Yavapai County has made the greatest progress of any county

in Arizona since statehood, in the mileage and excellence of construction and upkeep of her State Highways and county roads. To El Tovar, Grand Canyon, from Prescott, a distance of 130 miles, the trip can be made comfortably in a day. Between Prescott and Ash Fork is Cathedral Cave, where myriad stalactites and stalagmites in thousands of weird, fantastic shapes may be seen. Within a half hour of Prescott is granite Dells, with its beautiful lake and majestic granite formations.

Numerous other interesting side trips from Prescott are those to the Verde Valley, forty-six miles east on the new State Highway; Montezuma Castle, the best preserved group of prehistoric dwellings on the continent; the Finnie Soda Springs, with its delightful bathing the year round; to its wonderful mining districts, particularly the great copper mines of Jerome and the mammoth smelter at Clarkdale; to the little oasis in the Bradshaw mountains, where Castle Hot Springs is situated a winter resort, which is fast taking rank with the most famous watering places in Europe and America.

Owing to the great extent of mountainous country Yavapai County abounds in attractions for the hunter and fisherman.

The above enumerates a few of the interesting places in Yavapai County, but the Autoists upon application to the Secretary of the Yavapai County Chamber of Commerce, Prescott, Arizona, will be furnished gladly all information pertaining to this wonderful section, including correct information as to roads, accommodations, etc.

- 129.0 1.1 Skull Valley, fork. Keep right, turning right with road across RR just beyond.
- 129.3 0.3 Irregular 4-corners; keep ahead.
- 135.1 5.8 Fork; bear right. Avoid left-hand road 136.0, soon coming onto winding road upgrade, using caution for dangerous curves. Reach summit of grade 140.0, following ravine down long winding grade. Thru covered wooden bridge 146.5—now on Granite St.
- Prescott City Map and Points of Interest, page 582.
- 146.7 11.6 Right-hand street; turn right with travel onto Walker St., shortly curving left onto Montezuma St.
- 147.4 0.7 **PRESCOTT**, Montezuma & Gurley Sts., plaza on right.
- HOTELS—Head Hotel, Cortez St., next to P. O.
GARAGES—Crutchfield Bros. Overland Garage, Cortez St. near P. O.
COMM. ORG.—Yavapai County Chamber of Commerce.
RESTAURANTS—The New Hoffman Grill, Cortez St., Opp. P. O.

Route 591—Prescott to Ashfork, Ariz.—65.8 m.

Reverse Route 599.

Via Jerome Junction. Fair to good natural gravel and dirt road the entire distance. This route traverses a rolling prairie country and crosses a low range of mountains on easy grades.

Grand Canyon-Phoenix Detail Map, page 573.

- 0.0 0.0 **PRESCOTT**, Cortez & Gurley Sts., court house on left. Go north on Cortez St. one block.
- 0.1 0.1 Willis St.; turn right four blocks.
- 0.4 0.3 Mt. Vernon St.; turn left. Jog left and right across RR 1.0.
- 2.2 1.8 Fork; bear left. Thru wash 2.6.
- 4.8 2.6 Fork; bear left.
- 7.7 2.9 Fork; bear left upgrade. Avoid prominent left-hand diagonal road 9.8. Thru Jerome Jct. 19.5.
- 20.9 13.2 Diagonal right-hand road; turn right with travel, avoiding right-hand diagonal road just beyond.
- 24.6 3.7 Fork; bear left. Thru cattle guards 29.4-34.5.
- 40.4 15.8 Fork; bear right upgrade. Enter hills 45.7, following upgrade thru canyon. Reach summit of divide 50.3, descending slight grade. Avoid right-hand road 54.9.
- Right at 54.9 leads to Cathedral Caves.
Sharp left at prominent reverse fork 61.9 is National Old Trails Road and Route 602 to Kingman.
- 65.6 25.2 Fork; bear right.
- 65.7 0.1 End of road; turn right.
- 65.8 0.1 **ASHFORK**, store on right.
- Straight ahead is Route 435 to Flagstaff.

Route 592—Phoenix, Ariz., to Blythe, Cal.—172.5 m.

Reverse Route 431A.

Via Buckeye, Salome, Vicksburg and Quartzsite. Fair-to-good graded dirt to Palo Verde, then mostly unimproved desert road. Considerable work has been done on this route and it is possible to make the trip in one day.

Leaving Phoenix the route traverses a rich agricultural district to Palo Verde, and then enters a level desert region, with only a few low mountain ranges dividing the huge mesas. Meals and supplies can be had at Salome and Quartzsite.

This route is preferable to the Parker-Needles route to Los Angeles. During high water in May and June the Colorado river ferry near Blythe is not in operation and it will be necessary during this period to go by way of Parker and Needles when bound for Los Angeles.

Route 594—Phoenix to Prescott, Ariz.—108.3 m.

Reverse Route 601.

Via Canon and Mayer. First 8 miles macadam paving, then very poor, rough road to Bumble Bee Station, fair road to Dewey, balance good graded gravel and dirt. Summary: 8 miles macadam; 50 miles very poor and rough; 50 miles fair-to-good gravel and dirt.

This route is known as the Black Canyon Road to Prescott, traversing for the biggest part thru a scenic mountain country. It is 40 miles shorter than Route 590 via Wickenburg and Skull valley and carries considerable travel in spite of the poorer road conditions. The trip can easily be made in one day. Supplies may be had at Mayer and Canon.

 Left across RR at 83.9 is Note (a), Route 620 to Cliff Dwellings.
 87.4 12.6 **FLAGSTAFF**,* sta. on left.

GARAGES—Babbitt's Garage, San Francisco St., diagonally Opp. C. H.

*Flagstaff, Ariz. (pop. 3,500, alt. 6,907 ft.), is situated near the foot of the volcanic San Francisco mountains. This district is given largely to sheep and cattle raising. Nine miles distant are the prehistoric cliff dwellings; 16 miles, the Sunset mountain and lava beds; 40 miles, the Painted Desert; the Grand Canyon, 75 miles, and Oak Creek, a splendid trout stream, 16 miles. In the town is Lowell observatory, visited by many.

The Navajo National Monument is within the boundaries of the Navajo Indian reservation in Arizona. It can be reached only by saddle horse and pack outfit over a rough trail from Marsh Pass or Kayenta. To reach Kayenta one travels by road from Flagstaff, Arizona, or from Gallup, New Mexico.

This monument includes two interesting and extensive pueblo or cliff dwelling ruins, in a good state of preservation, known as Betata Kin and Keet Seel; also a third cliff dwelling ruin called Inscription House. The Betata Kin ruin is so named because it stands on a hill. It is situated at an elevation of 7,000 feet, in a crescent-shaped cavity 600 feet wide by 350 feet high, in the side of a soft red sandstone cliff which forms the walls of a small canyon. It is about 8 miles north of Marsh Pass and 18 miles northwest of Kayenta.

Originally the ruin contained 106 rooms. The roof is of spruce timbers, placed crosswise, the ends projecting through the outer

walls. Smaller poles are placed at right angles with these and then covered with a bunch of willows and mud which forms the roof. Inside, the walls are plastered with mud; and in nearly every room there is a small circular hole about 9 inches deep, which evidently was a fire place. The average size of the rooms is 6 x 6 x 6 feet.

The Keet Seel ruins (Navajo for "broken pottery") are in a crescent-shaped cave 400 feet long and 150 feet high on the west side of Laguna creek, 24 miles west of Kayenta. These are similar to the Betata Kin ruins but much better preserved. There are 47 rooms with standing walls, the roofs having fallen in, and 56 rooms with well-preserved roofs. These are 7 x 7 feet in size. It is necessary to scale a steep cliff for 30 feet to reach the base of the ruins.

Inscription House Ruin is on Navajo creek, about 20 miles west of Betata Kin. It is regarded as extraordinary, because of the inscriptions in Spanish by early explorers which were written upon its walls as early as 1661. It is about half way up the side of a steep cliff in a crescent-shaped niche 50 feet in depth by 500 feet in length and about 75 feet in height. The Inscription House, unlike the others, is built of mud bricks with straw. The bricks are about 4 inches square by a foot or more in length, and laid with mud mortar. The roofs also are made of mud bricks on a framework of small posts. There are 64 rooms, 30 of which are roofed.

Route 596—Grand Canyon National Park to Williams, Ariz.—64.8 m.

Reverse Route 439.

Via Pitt Sta. First 25 miles fair natural dirt and sand road; balance graded gravel and dirt, most of it in very good condition. Summary: 25 miles fair natural dirt and sand; 40 miles good graded gravel. The shortest and best connection between the National Old trail and the Grand Canyon.

Leaving the canyon and again when approaching Williams the route winds thru beautiful pine forests, while the intervening distance is over an open rolling prairie country. There are no stopping or supply stations en route.

Route 601—Prescott to Phoenix, Ariz.—108.3 m.

Reverse Route 594.

Via Mayer and Canon. Good graded road to Dewey, fair to Bumble Bee Station. balance very poor, rough road, excepting 8 miles of paving just before reaching Phoenix. Summary: 50 miles fair to good gravel and dirt; 50 miles very poor and rough road; 8 miles of paving.

This route is known as the Black Canyon Road to Phoenix and leads principally thru a scenic mountain country. It is 40 miles shorter than Route 600 via Skull valley and Wickenburg and carries considerable travel in spite of the poorer road conditions. The trip can easily be made in one day. Supplies may be had at Mayer and Canon.

*Wickenburg, Ariz. (pop. 700, alt. 2,100 ft.), is located in one of the richest mining districts of the state, its most famous mine probably being the Vulture, which has produced over seventeen million in gold. This mine is 16 miles southwest of town. Located in the foothills at the edge of the desert, Wicken-

burg has a splendid climate summer and winter. The surrounding country is good grazing range and there are a number of small ranches along the Hassayampa river. The first telegraph line constructed in Arizona passed thru this town, extending from Tucson to Prescott.

*Williams, Ariz. (pop. 1,275, alt. 6,750 ft.), is the southern terminus of the Grand Canyon railway. It is here that all travelers change cars or train for that great scenic wonder—the Grand Canyon of the Colorado. In addition to being the "Gateway to the Canyon," Williams possesses a number of points of interest. The town lies at the very base of Bill Williams mountain, which has been accurately described as the most beautiful mountain in Arizona. The town, the mountain and one of the largest tributaries of the Colorado river derive their name from the famous old scout, guide, trapper and pioneer—Bill Williams, one of the most unique characters of the west, and a fast friend of Kit Carson. It was upon Carson's recommendation to General Fremont that Bill Williams was placed in charge of Fremont's celebrated expedition to California in 1848, upon which occasion the expedition passed over the old Santa Fe trail, immediately north of the town of Williams. Together with Dr. William Kent, Bill Williams was smoking in camp one evening when a party of twelve Ute bucks entered the camp, professing friendship. Suddenly they

sprang upon the two white men and treacherously murdered them.

In Williams is located one of the largest saw mills in the southwest. This mill is but a short distance from the town and visitors are always welcome. Other features of interest in close proximity are Coleman lake, the Old Crater, Parker's cave, Elephant park, Bill Williams mountain and the Indian hieroglyphics. The Old Crater is the crater of an extinct volcano, about 30 feet in diameter and 70 feet deep. Descent into it is made by means of a ladder, which is perfectly safe. Parker's cave is particularly interesting because of its associations with the once famous bandit, Parker. The Indian hieroglyphics are but a mile from town, and, altho they have suffered considerable weathering with the lapse of years, are still a fine example of Indian work. From the summit of Bill Williams mountain one of the grandest views in America may be had. On a clear day four states can be seen, while the walls of the Grand Canyon appear only a few miles distant. Elephant park has some of the most unique rock formations in the southwest.

 68.1 0.2 Goldfield,* P. O. on right. Turn right onto Columbia St. one block, turning left one block at first 4-corners just beyond.
 68.2 0.1 4-corners, bank on right; turn right onto Main St. Thru 4-corners 68.3. Cross RR 69.1 and three RRs 69.2.
 69.3 1.1 Fork; bear left with travel. Cross RR 69.4. Pass large mill on right 70.6. Avoid left-hand road 72.7. Pass road house on left 80.1. Thru 4-corners 82.3. Avoid left-hand road 84.0. Thru diagonal 4-corners 85.7.

*Goldfield, Nev. (pop. 5,850, alt. 5,676 ft.), was at one time the biggest gold producing camp in the west. Upon the discovery of this precious metal in its hills, a city seemed to spring up over night, which with the years developed into one of the liveliest and most modern of its day. Many will recall the big strike which was staged at Goldfield during the years of 1906 and 1907. Of late years, like most mining towns, Goldfield has somewhat

lost its prestige as the great mining camp of Nevada and has settled down to the ordinary life of a town of its size and location. During the past year or two numerous manganese properties have been discovered a few miles from Goldfield. Sulphur deposits have also been opened up. Stock raising is carried on to some extent, the desert affording excellent winter grazing, and as the water development increases so also does the live stock industry.

90.3 21.0 Fork; take either road. Same thorofare becomes Main St.

95.1 4.8 TONOPAH,* bank on left.

GARAGES—Tonopah Auto Supply Co., Main St. & Florence Ave.

Route 607—Needles to Barstow, Cal.—166.2 m.

Reverse Route 433.

Via Goffs, Amboy, Ludlow and Daggett. The road is either of gravelly sand or of an oiled surface. Between Amboy and Ludlow the old road is still preferable to the new road which follows the south side of the RR. Both, however, are in very poor condition. Average road conditions on this route are good and very fast time can be made except between Amboy and Ludlow.

This route crosses the Mojave desert and owing to the intense heat during the summer months, tourists frequently make this run at night. Supply and stopping places are encountered at frequent intervals.

- Right 300 ft. leads to Newberry Springs, a fine camping spot.

*Tonopah, Nev. (pop. 5,000, alt. 6,100 ft.), the county seat of Nye county, is queen of the mining camps that dot the map of the great southwest. One hundred million dollars has thus far been blasted from out the Tonopah mines, and, to all appearance, only a fair start has been made. Here, where fifteen short years ago the horned toad and the coyote

held full sway, stands today a forest of giant steel gallows frames, a great foundry, and machine shops, and, clinging to the hillsides, several thundering stamp-mills. Withal, Tonopah is a modern and up-to-date city, offering every convenience of a metropolis to the tourist. It is a radiating center for some of the finest natural roads in the west.

*Claremont, Cal. (pop. 2,000, alt. 1,200 ft.), was formerly the home of the Mission Indians, their rendezvous, known as Indian Hill, now being used as the Indian Hill golf links. An old Indian burial ground is located close to the town. Timber used for the construction of the San Gabriel Mission was hauled from here by oxen, a distance of 28 miles, and the Mission olives were first planted in this district by padres. An old kiln where the Indians made their pottery is still standing. They glazed the surface of this pottery with asphalt which they brought from Brea canyon. Pomona college, one of the largest educational institutions west of the Rockies, is situated in Claremont.

*Glendora, Cal. (pop. 2,000, alt. 745 ft.), was founded by G. D. Whitcomb, who personally superintended the planting of the pepper trees which line its streets. The poet Mueller in a visit to this town described it as a "Poem in Pepper Trees." Judge Silent's park is one-half mile north of Foothill Blvd. on Grand Ave. The home of Nell Brinkley, famed artist, is three-quarters of a mile north of Foothill boulevard on Grand avenue. The home of Frank Chance, known as the "Cub Ranch," is one-half mile south of boulevard on Grand avenue. J. P. Englehart, well known lemon tree scientist, also makes his home in Glendora.

*Azusa, Cal. (pop. 1,600, alt. 614 ft.), is surrounded by a fine fruit growing and mining region and lies on a gently sloping plateau about a mile from the foot of the steep southern front of the San Gabriel mountains. About 2 miles west of the town is San Gabriel

wash, or the bed of the San Gabriel river, the largest stream flowing from the San Gabriel mountains. A mile directly north is the mouth of the canyon of the San Gabriel river. In the rainy season this stream is of considerable size and furnishes the water for irrigation of the surrounding ranches, but in the dry season it is a mere thread. The bed of the river is filled with large boulders which are crushed for road building purposes. The canyon is forested with oaks, sycamores and resinous pines, coursed by trails and pebbled brooks with waterfalls. In contrast with this camping region is the valley. Seen from "any outlook on the canyon's brim the files of citrus groves show like well-drilled troops maneuvering on the level plain below."

*Duarte, Cal. (pop. 650), is a post village in the San Gabriel valley on the southern slope of the Sierra Madre mountains. The town has won fame through the numerous prizes won by its Thompson improved navel and Valencia oranges. The water supply is community owned and furnished at cost. The town is named for Andres Duarte, a Mexican military officer, a part of whose 4,000 acre grant from the Mexican government in the 40's is the site of the town. Duarte is one of the prettiest sections of the county.

*Monrovia, Cal. (pop. 6,000, alt. 1,200 ft.), in Los Angeles county, is a fine health resort, and the center of a fruit growing region. It is a jaunty town on whose palms, eucalypti and orchards Mt. Lowe and Mt. Wilson look down. It has a Greek theater similar to that at Los Angeles and is famous for its fine residences. The town was founded by W. N. Monroe, hence its name.

POINTS OF INTEREST, TRINIDAD, COLO.

Trinidad (pop. 14,000, alt. 5,998 ft.) is situated on the Purgatory river at the foot of the Rocky mountains, on the Colorado to Gulf and Old Santa Fe trails highways. South of the city is beautiful Fisher's peak, the highest peak in the Raton range and one of the old landmarks of the southwest. Overlooking the town to the north is Simpson's Rest. According to history, at the brow of this hill is a grave hewn out of solid rock, in which lies the body of General Simpson.

To the west the great Sangre de Cristo mountains rise to an elevation of over 14,000 ft. This range is covered with perpetual snow and forms the source of the city's water supply. At its foot is the beautiful Stonewall country, where is located Trinidad's wonderful mountain park known as Stonewall Gap. The wall of stone extends the full length of the valley at a height of 200 feet. The park was donated by the Colorado Fuel & Iron Co. and is maintained by the Trinidad chamber of commerce. It is easily reached by a delight-

ful automobile drive of 35 miles from Trinidad thru beautiful canyons and picturesque villages. A caretaker who resides in the park assures a well conducted and orderly campsite for tourists. The Stonewall country club has an attractive club house for its members and a small, well equipped hotel is maintained for the accommodation of pleasure seekers. Trinidad also maintains at Central park (in the city) a free camping ground for tourists.

Trinidad was for many years the home of the famous scout, Kit Carson, and in recognition of this it has dedicated a beautiful little park to his memory and placed his statue therein. The main highway from Colorado to the gulf passes thru this city. The section of this highway, also the National Old Trails Ocean-to-Ocean highway leading from Trinidad to Raton, N. M., is one of the scenic highways of the west. It was built by convicts from the state penitentiary with funds from the first appropriation for convict labor on roads in Colorado.

*Holbrook, Ariz. (pop. 1,000, alt. 5,057 ft.), is situated in a fertile valley on the little Colorado river. The principal industry of the surrounding country is stock growing and Holbrook is one of the leading shipping points on the Santa Fe for cattle and sheep. About 30 miles north of town are the Navajo and Hopi Indian reservations, the Painted Desert and many other interesting scenes. Eighteen miles east, on the road to Springerville, is the famous Petrified Forest. South are the White mountains, offering splendid hunting and fishing.

*Petrified Forest National Monument.—There are three groups of petrified trees in this reservation. The First Forest lies 6 miles from Adamana, Arizona, and the Second Forest is $2\frac{1}{2}$ miles south of it. The Third or Rainbow Forest lies 13 miles south of Adamana and 18 miles southeast of Holbrook, Arizona. It is best to approach the Third Forest from Holbrook; the other two are best reached from Adamana.

This area is of great interest because of the abundance of petrified coniferous trees which lie scattered about in great profusion. None are standing as in the Yellowstone National Park. These trees probably at one time grew beside an inland sea; after falling they became waterlogged, and during the decomposition the cell structure was entirely replaced by silica derived from sandstone in the surrounding land. Over a great part of the entire area trees are scattered in all conceivable positions and in fragments of all sizes.

In the First Forest may be seen the well-known Natural Bridge, consisting of a large petrified tree trunk 60 feet long spanning a canyon 45 feet wide, and forming a foot bridge

over which anyone may easily pass. The trunks in the Rainbow Forest are larger than elsewhere, more numerous and less broken. Several hundred entire trees are found here, some of which are more than 200 feet long. The color of the wood is deeper and more striking than in the other localities.

"There is no other petrified forest," says Prof. Lester F. Ward, "in which the wood assumes so many varied and interesting forms and colors, and it is these that present the chief attraction for the general public. The state of mineralization in which much of this wood exists almost places them among the gems or precious stones. Not only are chalcedony, opals, and agates found among them, but many approach the condition of jasper and onyx. The degree of hardness attained by them is such that they are said to make an excellent quality of emery."

"In the celebrated Petrified Forest, which is some 18 miles from Holbrook, Arizona, on the picturesque Santa Fe Railroad, there are ruins of several ancient Indian Villages," writes Dr. Walter Hough, of the Smithsonian Institution. "These villages are small, in some cases having merely a few houses, but what gives them a peculiar interest is that they were built of logs of beautiful fossil wood. * * * The pre-historic dwellers of the land selected cylinders of uniform size, which were seemingly determined by the carrying strength of a man. It is probable that pre-historic builders never chose more beautiful stones for the construction of their habitations than the trunks of the trees which flourished ages before man appeared on the earth. This wood agate also furnished material for stone hammers, arrowheads, and knives, which are often found in ruins hundreds of miles from the forest."

*Springerville, Ariz. (pop. 500, alt. 6,862 ft.), a growing town, is located in a beautiful basin known as Round valley. It is the trading point for a large agricultural and stock-raising territory, being the center of very important cattle and sheep interests.

The headquarters of the Apache national forest reserve are located here. This forest contains billions of feet of the finest yellow pine timber found in the southwest; all virgin forest, abounding in deer, turkey and bear, with exceptionally fine trout streams—a paradise for the camper and sportsman. Indian ruins, game, fine timber, good roads and beautiful scenery characterize the region.

Southwest of Springerville, the White mountains are crossed over a cinder road to Cooley's ranch, which offers an interesting stopping place. (Cooley was Gen. Crook's chief scout in his campaigns against Apache Indians, and has many testimonials from famous generals attesting his courage and cunning as a scout.)

This region was the home of Geronimo, the famous Apache chief. The Apaches, now peaceful, may be seen living the same primitive fashion as formerly.

Ft. Apache, one of the two remaining forts in the southwest, is still maintained by the war department and is in sight of the road.

The fort is located on a small plateau, surrounded by deep canyons with precipitous walls. South of the fort, Salt river is crossed over a steel bridge. This stream is seen again at Roosevelt, where the famous dam of that name has been built.

*Magdalena, N. M. (pop. 1,000, alt. 6,557 ft.), the business town of Socorro county, at the base of the Magdalena range of mountains, is located in the midst of a vast stock country, near famous zinc and lead mines which have been worked for the last 40 years. Within plain view and near the town is Profile mountain, on which can be plainly seen the profile of a woman's face, called by the early settlers of the country "Mary Magdalene," after whom the range of mountains was named. To the west a few miles is the greatest natural wonder of the state, "Salt Lake," an extinct volcano whose crater is filled with water so salty that there is precipitated salt in abundance for commercial use and many of the stock men get their supply there. North of town, probably 50 miles, is located the famous "Enchanted Mesa" and the Acoma Indian village which was built on a high mesa or table land only a few acres in extent and where these "real Americans" lived in comparative safety from marauding bands of the more warlike Indians.

*More months and miles
in the life of your car
and more health and
money for you*

*The most helpful
and most beautiful
motor magazine in
America
Established 1905*

No matter if you drive your own car

or keep a dozen chauffeurs, with as many cars, *Motor Life* will show you how to cut down your expense bills and at the same time add to your health and motoring enjoyment.

No dry, technical details

You associate the average motor magazine with mechanical drawings, with an atmosphere of oil and grease. *Motor Life* is different. You'll find the information you should have but you'll find it entertaining as well as helpful.

In interesting and human language

experts will tell you, in words and in pictures, how you can save dollar after dollar on the upkeep and operation of your car—how to get more mileage from your gasoline and tires, how to save needless hours in the repair shop, how to add to the selling value of your car and save money in many other ways—all at the simple expense of knowing how. They'll tell you how to get greater efficiency from your car for less money. They'll show you how you can get more enjoyment from your motoring by eliminating petty worries.

The new things in motordom

which you will find shown in every issue of *Motor Life* will help you keep up to date. You'll see the new cars, new motors, new bodies, new accessories, new refinements, new clothes. You'll find everything in *Motor Life* to interest you except trade gossip. *Motor Life* is published solely for the motorist, not for the trade.

The right thing at the right time

Motor Life, above all things, is timely. It tells you the things you want to know at the time you want them.

Features of the coming numbers:

JANUARY—*New Cars*—What the new automobiles will be like

FEBRUARY—*The Motor Shows*—The developments at the great national exhibitions

MARCH—*Private Garages*—Helpful suggestions on private garage matters

APRIL—*Spring Overhauling*—Preparing the car for the rigors of the summer burden

MAY—*Summer Accessories*—Latest ideas in equipment, accessories, clothes

JUNE—*Touring*—How to tour most efficiently and economically

JULY—*New Savings*—The newest ideas in motoring economy

AUGUST—*Aviation*—Devoted especially to automobiling's lofty relative

SEPTEMBER—*Camping Tours*—Dozens of suggestions for the self-propelled camping tour

OCTOBER—*Closed Cars*—A discussion of the new closed cars

NOVEMBER—*Winter Accessories*—New and timely adjuncts to comfortable zero motoring

DECEMBER—*Winter Motoring*—New ideas and developments in the scheme of winter automobiling

Only because you can afford a car is no reason why you should run it extravagantly

It's the waste and small leaks that make motoring expenses so high. Motor Life tells you how to avoid them, how to get 100 cents' value for every dollar you spend. You'll save whole days in the repair shop, gallons of gasoline and get hundreds of extra miles from your tires by following the simple suggestions of Motor Life's experts.

Motor Life is more than a magazine

because in addition to the magazine itself, you'll get individual, personal advice on any motoring problem that may bother you. Motor Life conducts four Service Departments—Technical Information, Touring Service, Shopping Bureau and Monogram Designing—that are absolutely free to its subscribers. No matter what your motoring problem is, tell us your troubles in a letter, and Motor Life's Service Departments will try to help you.

It will tell you how to save money

and have a good time doing it, besides telling you all about the interesting things you want to know in the realm of motoring, aeroplaning, motor boating, sports, etc., etc.

POINTS OF INTEREST, ALBUQUERQUE, N. M.

Albuquerque (pop. 26,500, alt. 5,008 ft.) was founded some three hundred years ago by the Spaniards under the leadership of the Duke of Albuquerque. The first church built by the Franciscan fathers, the Church of San Felipe, still stands and is one of the historical points of interest. This is one of the oldest churches in the U. S.

North of Albuquerque 20 miles is the ancient Indian settlement of Barnalillo, which point Coronado is said to have reached in his travels. It was here that an engagement took place in the sixteenth century between a band

of Indians and a father named Marcus, who with his followers was penetrating to the Jemez country. Many ruins of churches and pueblos, dating back some hundreds of years, can be seen all thru this vicinity.

Albuquerque is located in the Rio Grande valley. The city is noted for its climate and thousands are benefited by its health-giving atmosphere annually. Thirteen miles below the town is the picturesque pueblo of Ileta, and side trips of less than three miles of the road between Albuquerque and Santa Fe will take the tourist to the picturesque Indian villages of San Felipe and Domingo.

Route 624—Albuquerque to Santa Fe, N. M.—66.6 m.

Reverse Route 628.

Via Alameda and La Bajada Hills. Almost all graded dirt, with some sandy stretches.

The climb up La Bajada Hill is steep, with several sharp turns. Caution should be exercised on this hill; a long wheelbase car cannot make all the turns without backing. The scenery from the summit of the hill is very beautiful and the surrounding country may be viewed for many miles in either direction.

POINTS OF INTEREST, SANTA FE, N. M.

Santa Fe (pop. 8,000, alt. 6,998 ft.), the center of the most interesting fifty mile square in America, is the oldest state capital of the Union and second oldest city of the United States. The city itself is a veritable cluster of historic and famous landmarks, dwellings and old missions. It is of quaint aspect, with Mexican and Spanish characteristics, narrow streets, a central plaza and adobe houses. Every stranger visits the venerable shrine of San Miguel, a reminder of days of holy zeal and self sacrificing stress. Inside of the old church, which was partly burned during the Pueblo revolution of 1680, and restored in 1710, is found an old bell, cast in Spain more than a century before the discovery of America. The altar paintings lay claim to even greater age and are by the earliest Spanish masters, as the attendant will describe with more circumstance. A vesper service in this old chapel on a Sunday evening will be an impressive event to the reverent visitor.

On all sides are to be found the prehistoric ruins of communal villages and the homes of cliff dwellers, making this the most interesting and valuable archaeological region in the United States. Pajarito park, just across the Rio Grande to the west, is the site of more than 20,000 of these communal and cliff dwellings, and with the Painted Cave, the Stone Chert of Cochiti, the kivas and holy places, the arrowheads and stone implements which are so readily picked up, combine to make a trip to this park a most wonderful event.

The Palace of the Governors, in the heart of Santa Fe, is a historic structure; its mas-

sive walls are 300 years old, and they have withstood the ravages of time remarkably well. Recent repairs have revealed walls that antedate the Spanish construction—undoubtedly the remains of an ancient Indian ruin. Here have taken place historic gatherings innumerable. It has been occupied by a succession of almost 100 governors—Spanish, Pueblo, Mexican and American, beginning before 1620 and ending with Governor George Curry in 1909. Here is the Ben Hur room, in which Lew Wallace, when governor of New Mexico, wrote a part of his great novel, Ben Hur. The New Mexico historical society has occupied the east end of the building for many years, while the west end of the building is the home of the Museum of New Mexico and the Department of American Archaeology. Typical of the city is the school architecture in its location. Be sure to visit the Rito de los Frijoles room and others, in which mural paintings give a graphic representation of the Pajarito cliff dwelling region. The adjoining new Museum building is a replica of the Mission church at Acoma and other Pueblo missions, and contains the state art gallery, a magnificent auditorium and exquisite mural paintings of the life of St. Francis.

In the Plaza upon which these two notable structures face are the Civil war monument, the Kearny, End of the Trail and Lamy monuments. Other notable edifices near by are the Roman Catholic cathedral with its beautiful Byzantine decorations and old masters, the Scottish Rite Masonic cathedral, having beautiful mural and curtain paintings, the

(Santa Fe Points of Interest, Cont'd.)

oldest house in the U. S., the capitol, and numberless others.

From a scenic standpoint, Santa Fe is magnificently located. A splendid highway has been built by convict labor up Santa Fe canyon, affording a drive of unexcelled scenic beauty. Thousands of other interesting and historic points which the tourist may have time to enjoy can be reached over fine auto roads also, Santa Fe being the center of the

state's good roads system, and if possible, many days should be given to sight-seeing in this old romantic country.

The climate of Santa Fe is also a great attraction and drawing card, the average maximum temperature for the three hottest summer months being 69 degrees. The thermometer never goes above 90° degrees during the warmest part of the hottest day. The nights are always cool.

Quickest and Best Way to See the City.

Leave Chamber of Commerce office and go south on College avenue (The Santa Fe Trail), pass Loretto academy, St. Michael's college, stop at college for permit to go thru oldest church. Turn east at old church and take narrow street up Canyon road, turn to left at old bridge and follow Palace avenue west to farthest corner of Old Palace of Governors—opposite is the New Museum and the Plaza, with fountains, memorial tablets, monuments, etc. Turn north on Lincoln avenue as far as federal building, passing high school, then turn to right and take road up the hill past the Scottish Rite cathedral; take first turn to right beyond cathedral and follow road up to top of Fort Marcy, passing the Garita and ruins of the Place of Execution. On return pass Washington avenue as far as the Plaza,

then turn to the left and stop at the Cathedral of St. Francis, then go down San Francisco street, leading directly west from main door of cathedral at second street to left turn and pass the executive mansion and state capitol. Take street at west front of capitol building and follow south about one mile, passing penitentiary, U. S. Indian school and deaf and dumb asylum. On return stop at Palace of Governors and register—guides furnished for tour thru museum and artists' studios. A mile from Palace of Governors is Sunmount sanatorium, reached by the Santa Fe trail. The Federal cemetery is about a mile from the Palace in another direction. Inquire at chamber of commerce for information regarding side trips to Indian pueblos, cliff dwellings, and ancient ruins.

*Magdalena, N. M. (pop. 1,000, alt. 6,557 ft.), the business town of Socorro county, at the base of the Magdalena range of mountains, is located in the midst of a vast stock country, near famous zinc and lead mines which have been worked for the last 40 years. Within plain view and near the town is Profile mountain, on which can be plainly seen the profile of a woman's face, called by the early settlers of the country "Mary Magdalene," after whom the range of mountains was named. To the west a few miles is the greatest natural won-

der of the state, "Salt Lake," an extinct volcano whose crater is filled with water so salty that there is precipitated salt in abundance for commercial use and many of the stock men get their supply there. North of town, probably 50 miles, is located the famous "Enchanted Mesa" and the Acoma Indian village which was built on a high mesa or table land only a few acres in extent and where these "real Americans" lived in comparative safety from marauding bands of the more warlike Indians.

Route 630—Magdalena, N. M., to Springerville, Ariz.— 130.5 m.

Reverse Route 622.

Via Datil and Quemado. Dirt roads with variable stretches of natural gravel are traversed to the Arizona line, balance gravel. Summary: 115 miles dirt and variable stretches gravel, 15 miles good gravel.

The road goes thru a mountainous country with several long stretches of open rolling prairie. The Continental Divide is crossed just east of Datil at an altitude of 8,300 ft.

As the mileage is great between points of provisions, tourists are advised to keep their supplies replenished.

Left is Route 631 to Winslow.

*Springerville, Ariz. (pop. 500, alt. 6,862 ft.), a growing town, is located in a beautiful basin known as Round valley. It is the trading point for a large agricultural and stock-raising territory, being the center of very important cattle and sheep interests.

The headquarters of the Apache national forest reserve are located here. This forest contains billions of feet of the finest yellow pine timber found in southwest; all virgin forest, abounding in deer, turkey and bear, with exceptionally fine trout streams—a paradise for the camper and sportsman. Indian ruins, game, fine timber, good roads and beautiful scenery characterize the region.

Southwest of Springerville, the White mountains are crossed over a cinder road to Cooley's ranch, which offers an interesting

stopping place. (Cooley was Gen. Crook's chief scout in his campaign against Apache Indians, and has many testimonials from famous generals attesting his courage and cunning as a scout.)

This region was the home of Geronimo, the famous Apache chief. The Apaches, now peaceful, may be seen living in the same primitive fashion as formerly.

Ft. Apache, one of the two remaining forts in the southwest, is still maintained by the war department and is in sight of the road. The fort is located on a small plateau, surrounded by deep canyons with precipitous walls. South of the fort, Salt river is crossed over a steel bridge. This stream is seen again at Roosevelt, where the famous dam of that name has been built.

Use the National Parks!

The National Park Service invites motorists to use and enjoy the great national playgrounds established by Congress. They include the broadest range of sublime scenery in the whole world, and, remember, they belong to you.

Route 631—Springerville to Winslow, Ariz.—135.8 m.

Reverse Route 621.

Via St. Johns, Petrified Forest National Monument and Holbrook. Graded gravelly dirt and dirt over rolling prairie to Holbrook. There are long stretches of graded and gravelly highway and an elegant dirt road between Holbrook and Winslow. With the exception of a few poor stretches thru the Petrified Forest and thence to Holbrook, this is a good road and fast time can be maintained during favorable weather conditions. Summary: 119 miles graded gravelly dirt with some stretches of gravel; 16.8 miles dirt.

- 72.5 12.2 Fork; bear left with travel. Enter Petrified Forest Na-

*Petrified Forest National Monument.—

There are three groups of petrified trees in this reservation. The First Forest lies 6 miles from Adamana, Arizona, and the Second Forest is 2½ miles south of it. The Third or Rainbow Forest lies 13 miles south of Adamana and 18 miles southeast of Holbrook, Arizona. It is best to approach the Third Forest from Holbrook; the other two are best reached from Adamana.

This area is of great interest because of the abundance of petrified coniferous trees which lie scattered about in great profusion. None are standing as in the Yellowstone National Park. These trees probably at one time grew beside an inland sea; after falling they became waterlogged, and during the decomposition the cell structure was entirely replaced by silica derived from sandstone in the surrounding land. Over a great part of the entire area trees are scattered in all conceivable positions and in fragments of all sizes.

In the First Forest may be seen the well known Natural Bridge, consisting of a large petrified tree trunk 60 feet long spanning a canyon 45 feet wide, and forming a foot bridge over which anyone may easily pass. The trunks in the Rainbow Forest are larger than elsewhere, more numerous and less broken. Several hundred entire trees are found here, some of which are more than 300 feet long. The color of the wood is deeper and more striking than in the other localities.

"There is no other petrified forest," says Prof. Lester F. Ward, "in which the wood assumes so many varied and interesting forms and colors, and it is these that present the chief attraction for the general public. The state of mineralization in which much of this wood exists almost places them among the gems or precious stones. Not only are chalcedony, opals, and agates found among them, but many approach the condition of jasper and onyx. The degree of hardness attained by them is such that they are said to make an excellent quality of emery."

"In the celebrated Petrified Forest, which is some 18 miles from Holbrook, Arizona, on the picturesque Santa Fe Railroad, there are ruins of several ancient Indian Villages," writes Dr. Walter Hough, of the Smithsonian Institution. "These villages are small, in some cases having merely a few houses, but what gives them a peculiar interest is that they were built of logs of beautiful fossil wood. * * * The pre-historic dwellers of the land selected cylinders of uniform size, which were seemingly determined by the carrying strength of a man. It is probable that pre-historic builders never chose more beautiful stones for the construction of their habitations than the trunks of the trees which flourished ages before man appeared on the earth. This wood agate also furnished material for stone hammers, arrowheads, and knives, which are often found in ruins hundred of miles from the forest."

0.0 0.0 **EL PASO, Oregon & Mills Sts.**, plaza on right. Go northwest

***Flagstaff, Ariz.** (pop. 3,500, alt. 6,907 ft.),
 is situated near the foot of the volcanic San
 Francisco mountains. This district is given
 largely to sheep and cattle raising. Nine
 miles distant are the prehistoric cliff dwell-
 ings, 16 miles, the Sunset mountain and lava
 beds; 40 miles, the Painted Desert; the Grand
 Canyon, 75 miles, and Oak Creek, a splendid
 trout stream, 16 miles. In the town is Lowell
 observatory, visited by many.

The **Navajo National Monument** is within
 the boundaries of the Navajo Indian reserva-
 tion in Arizona. It can be reached only by
 saddle horse and pack outfit over a rough
 trail from Marsh Pass or Kayenta. To reach
 Kayenta one travels by road from Flagstaff,
 Arizona, or from Gallup, New Mexico.

This monument includes two interesting
 and extensive pueblo or cliff dwelling ruins,
 in a good state of preservation, known as
 Betata Kin and Keet Seel; also a third cliff
 dwelling ruin called Inscription House. The
 Betata Kin ruin is so named because it
 stands on a hill. It is situated at an eleva-
 tion of 7,000 feet, in a crescent-shaped cavity
 600 feet wide by 350 feet high, in the side of
 a soft red sandstone cliff which forms the
 walls of a small canyon. It is about 8 miles
 north of Marsh Pass and 18 miles northwest
 of Kayenta.

Originally the ruin contained 106 rooms.
 The roof is of spruce timbers, placed cross-
 wise, the ends projecting through the outer

walls. Smaller poles are placed at right
 angles with these and then covered with a
 bunch of willows and mud which forms the
 roof. Inside, the walls are plastered with
 mud; and in nearly every room there is a
 small circular hole about 9 inches deep,
 which evidently was a fire place. The average
 size of the rooms is 6 x 6 x 6 feet.

The Keet Seel ruins (Navajo for "broken
 pottery") are in a crescent-shaped cave 400
 feet long and 150 feet high on the west side
 of Laguna creek 24 miles west of Kayenta.
 These are similar to the Betata Kin ruins
 but much better preserved. There are 47
 rooms with standing walls, the roofs having
 fallen in, and 56 rooms with well-preserved
 roofs. These are 7 by 7 feet in size. It is
 necessary to scale a steep cliff for 30 feet to
 reach the base of the ruins.

Inscription House Ruin is on Navajo creek,
 about 20 miles west of Betata Kin. It is
 regarded as extraordinary, because of the
 inscriptions in Spanish by early explorers
 which were written upon its walls as early
 as 1661. It is about half way up the side of
 a steep cliff in a crescent-shaped niche 50
 feet in depth by 500 feet in length and about
 75 feet in height. The Inscription House, un-
 like the others, is built of mud bricks with
 straw. The bricks are about 4 inches square
 by a foot or more in length, and laid with
 mud mortar. The roofs also are made of mud
 bricks on a framework of small posts. There
 are 64 rooms, 30 of which are roofed.

*Magdalena, N. M. (pop. 1,000, alt. 6,557 ft.), the business town of Socorro county, at the base of the Magdalena range of mountains, is located in the midst of a vast stock country, near famous zinc and lead mines which have been worked for the last 40 years. Within plain view and near the town is Profile mountain, on which can be plainly seen the profile of a woman's face, called by the early settlers of the country "Mary Magdalene," after whom the range of mountains was named. To the west a few miles is the greatest natural won-

der of the state, "Salt Lake," an extinct volcano whose crater is filled with water so salty that there is precipitated salt in abundance for commercial use and many of the stock men get their supply there. North of town, probably 50 miles, is located the famous "Enchanted Mesa" and the Acoma Indian village which was built on a high mesa or table land only a few acres in extent and where these "real Americans" lived in comparative safety from marauding bands of the more warlike Indians.

MOTOR LIFE'S shopping service brings Fifth Avenue to your door, buying for you any motor clothes or accessories you cannot obtain locally. See colored insert.

Route 637—Globe to Tucson, Ariz.—117.4 m.

Reverse Route 647.

Via Winkelman, Mammoth and Oracle. Mostly graded and improved road to Mammoth, natural desert road to Oracle, fine gravel highway to Tucson. Summary: 53.2 miles gravel; 49.8 miles graded gravelly dirt; 14.0 miles natural desert.

The route traverses a very scenic mountainous country to Winkelman, then a partly irrigated valley to Mammoth and finally crosses a rolling prairie and mesa country to Tucson. About ten miles before reaching Winkelman the route follows the Gila river thru an attractive canyon on a narrow, winding road with several very steep grades. Drive carefully and keep to the right at turns.

Go upgrade along hillside 9.5. Pass volcano cinder bed 9.9. Curve right downgrade 11.8, entering forest reserve, and cross Fish creek just beyond. Keep right at fork and follow the new graded road; practically no intersections for miles.
- 16.9 14.9 Cross White Mountain Divide (altitude 9,300 ft.). Mt. Ord may be seen ahead to left.
- 18.2 1.3 Those desiring water will find an excellent spring a few feet to the right of the road at this point. Keep straight ahead, entering Apache Indian Reservation 19.3. Caution should be used at all times for narrow turns between pines. Pass sheep corral 25.0. Cross small meadow 26.0.
- 30.0 11.8 Caution for rather sharp turn downgrade, crossing small ford upgrade again. Follow road between pines on natural road in pine forest. Cross small meadow 37.0-38.0.
- 39.2 9.2 Fork; keep left.
- 41.7 2.5 Cooley's Ranch on right. Keep straight ahead past ranch building, shortly descending rather sharp grade thru Black canyon, winding with some sharp turns. Pass mail sta. 43.6, continuing downgrade. Caution for a few rough spots.
- 47.6 5.9 Caution for sharp right turn downgrade across bridge, turning left upgrade. From here on the road is direct along base of mountains with White River canyon a few hundred feet to left.

Roosevelt Dam, Globe, Ariz.

- 59.5 11.9 White River Indian School, P. O. and office of Superintendent over to left (gas and oil). Bear slightly left, crossing square. Pass store (on right). Go downgrade, following direct road.
- 64.2 4.7 End of road; turn right (left leads to Ft. Apache one mile).
- 65.0 0.8 Fork; bear right.
- 65.2 0.2 Fork; bear left, turning next right 65.3.
- 65.5 0.3 Fork; bear left.
- 71.4 5.9 Fork; bear left along valley. Cross arroyo 72.2. Cross dry creek bed several times. Caution—steep downgrade to bridge 77.9 and steep upgrade beyond. Cross creek bed 78.9, winding steep upgrade, descending steep grade along Black river, crossing same on bridge 83.9.
- 84.3 12.9 3-corners; curve right (left leads to Forage Sta.)—long steep upgrade, fine views—shortly descending along creek. Cross several dry fords. Avoid right fork 90.5.
- 101.7 17.4 3-corners at Forage Sta.; bear left (right leads to sawmill). Go up and downgrade in winding road, reaching foot of steep grade 107.7. Ford creek 110.7, continuing winding descent. Cross Sycamore creek 122.9.
- 124.2 22.5 Rice (Indian Sta.). Straight thru across dry river bed.
- 124.9 0.7 Fork; bear right across RR at sta. Cross RR 125.5. Cross dry river bed 125.4-127.6-130.8-131.3. Pass Cutter Sta. on left 138.0. Cross RR 139.6. Cross RR at Pinal Sta. on left 143.9. Under RR 144.3. Cross RR 145.9.
- 146.4 21.5 **GLOBE,*** court house on right.
- HOTELS—Dominion Hotel, Opp. P. O. on Broad St.
GARAGES—Palace Garage, Oak St., Opp. C. H.
Right is Route 639 to Phoenix.

Route 639—Globe to Phoenix, Ariz.—114.7 m.

Reverse Route 640.

Via Roosevelt Dam, Mesa and Tempe. First 4 miles concrete, then good graded gravelly dirt to Roosevelt Dam, fair road to Fish Creek Sta., followed by 20 miles of very poor, rocky road thru mountains, good graded dirt and gravel to Tempe; balance concrete and macadam. Summary: 13 miles pavement; 65 miles good graded gravel and dirt; 17 miles fair road; 20 miles extremely poor, rocky surface.

This route takes the tourist across a wild and rugged mountain country for the first 75 miles and enters a fine irrigated district just before reaching Mesa. Numerous grades and sharp curves call for slow and careful driving. This is a section of the Apache trail.

Mileage Points

We are advised that a new road is under construction between Globe and Mesa via Superior and tourists should make inquiries regarding same.

- 0.0 0.0 **GLOBE**, Broad & Oak Sts., court house on far right. Go west on Broad St. Ascend slight grade 1.7.
- 3.9 3.9 Fork; bear right. Cross RR 6.1.
Left fork at 3.9 leads to Miami, 2.8 miles.
HOTELS—Garryowen Hotel, Sullivan St.
Cross wooden trestle over Pinal creek 6.6. Avoid right-hand road 12.0.
- 15.6 11.7 Fork; bear right upgrade. Reach summit 17.8, descending grade thru hills.

*Globe, Ariz. (pop. 12,000, alt. 3,525 ft.), was first settled in 1876, being originally a silver mining camp. In 1882 copper was beginning to be extensively mined, and since that time a tremendous amount of the metal has been taken out of the surrounding country. Through this section of the country a giant cactus, called in Spanish, Sojuaro, is to be seen. This plant grows sometimes to the height of 40 feet and in the springtime has a beautiful orchid-like flower at the top.

Roosevelt Dam, a United States reclamation project, officially entitled the Salt River project, may be visited from Globe. The sand-

stone and cement structure rises 284 feet above its foundations, which is sunk 30 feet in solid rock. The base is 168 feet thick and the top 20 feet. It has two spillways, each 300 feet long, and the total length is some 1,080 feet. It is capable of holding water sufficient to cover 1,300,000 acres one foot deep and assures the permanent supply to 240,000 acres. The lake back of the dam is 25 square miles in area, into which flows water from over 6,260 square miles. The first stone was laid September 20, 1905, and it was completely finished February 5, 1911. The total cost was approximately \$9,000,000, of which \$3,500,000 was spent on the dam proper.

- 21.6 6.0 Fork; bear left downgrade. Pass Spring Creek Store on right 24.7.

- 0.0 0.0 PHOENIX, Central Ave. & Washington St., bank on right.
 Go north on Central Ave. three blocks.
- 0.2 0.2 Van Buren St.; turn right. Cross long concrete bridge over Salt river 8.5.
- 8.9 8.7 4-corners; turn left.

*Mesa, Ariz. (pop. 3,500, alt. 1,482 ft.), is located on the Apache trail auto route. It lies in one of the richest sections of Arizona and is surrounded by fine alfalfa ranches, dairies, grain lands, olive orchards, orange groves and fine stock farms. It is the center of the Pima long staple cotton industry, and the Goodyear Rubber company's cotton ranch of 15,000 acres is a point of particular interest. Mesa was

settled in 1879 by a colony of Mormons from Salt Lake City and other places in Utah and is today the seat of the Mormon church in Arizona. The Papago and Apache Indian tribes have schools near Mesa and the government maintains an agricultural experiment farm nearby. Sixty miles distant is Roosevelt dam, the greatest irrigation project on the western hemisphere. Granite Reef dam at Mesa is another interesting point.

- 9.1 0.2 End of road at flour mill; turn right onto Mill Ave. Cross RR at lumber office 9.2.
- 9.3 0.2 Tempe, Mill Ave. & 5th St. Keep ahead on Mill Ave.

- 0.4 0.3 Left-hand diagonal road; turn left onto Ash St. past small wooden church on left.

*Springerville, Ariz. (pop. 500, alt. 6,862 ft.), a growing town, is located in a beautiful basin known as Round valley. It is the trading point for a large agricultural and stock-raising territory, being the center of very important cattle and sheep interests.

The headquarters of the Apache national forest reserve are located here. This forest contains billions of feet of the finest yellow pine timber found in southwest; all virgin forest, abounding in deer, turkey and bear, with exceptionally fine trout streams—a paradise for the camper and sportsman. Indian ruins, game, fine timber, good roads and beautiful scenery characterize the region.

Southwest of Springerville, the White mountains are crossed over a cinder road to Cooley's ranch, which offers an interesting

stopping place. (Cooley was Gen. Crook's chief scout in his campaign against Apache Indians, and has many testimonials from famous generals attesting his courage and cunning as a scout.)

This region was the home of Geronimo, the famous Apache chief. The Apaches, now peaceful, may be seen living in the same primitive fashion as formerly.

Ft. Apache, one of the two remaining forts in the southwest, is still maintained by the war department and is in sight of the road. The fort is located on a small plateau, surrounded by deep canyons with precipitous walls. South of the fort, Salt river is crossed over a steel bridge. This stream is seen again at Roosevelt, where the famous dam of that name has been built.

- 0.7 0.3 4-corners; turn right with travel and at end of road just beyond turn left. Thru gate 5.0.
- 6.8 6.1 Left-hand road; bear left across RR and right along same just beyond.

***Lordsburg, N. M.** (pop. 2,000, alt. 4,300 ft.), is a cattle and mining town. Gold, silver and copper are produced in great abundance. The principal mines tributary to the town are Bonnie, Atwood, Hecla, Octo, Last Chance, Viola and 85. The old town of Shakespeare, 3 miles southwest, was a stage station on the old Butterfield stage route to Tombstone, Tucson, Sonora, Mexico points, Yuma and California points. The present Sunset trail follows this old stage route from Lordsburg west.

***Mesa, Ariz.** (pop. 3,500, alt. 1,482 ft.), is located on the Apache trail auto route. It lies in one of the richest sections of Arizona and

is surrounded by fine alfalfa ranches, dairies, grain lands, olive orchards, orange groves and fine stock farms. It is the center of the Pima long staple cotton industry, and the Goodyear Rubber company's cotton ranch of 15,000 acres is a point of particular interest. Mesa was settled in 1879 by a colony of Mormons from Salt Lake City and other places in Utah and is today the seat of the Mormon church in Arizona. The Papago and Apache Indian tribes have schools near Mesa and the government maintains an agricultural experiment farm nearby. Sixty miles distant is Roosevelt dam, the greatest irrigation project on the western hemisphere. Granite Reef dam at Mesa is another interesting point.

POINTS OF INTEREST, TUCSON, ARIZ.

Tucson (pop. 27,500, alt. 2,389 ft.), is one of the oldest cities of America. On one side is the old Spanish and Mexican quarter, a relic of the picturesque days of more than a century past; on the other side a modern and well ordered city of the up-to-date American type. In addition to the numerous Papago Indian villages in close proximity to the city, a few of the most interesting sights are the San Xavier mission, built in 1687 by the Jesuit Fathers, and the ruins of old Fort Lowell, six miles east, an important pivotal point for years in the Indian wars which were waged in the days of early settlement. Eighteen miles northwest are the Painted Rocks, weird pictures of men and beasts, monuments of an unknown race of people, which have withstood the elements of centuries. A very enjoyable day's trip takes one to the Casa Grande (great house) National Monument, considered one of the oldest and most famous ruins in America. The United States government has roofed it over in recent years to keep the walls from being washed down by the rains, and explorations have been made uncovering a buried village and many varieties of ancient pottery and Indian relics.

Tumacacori National Monument includes 10 acres of land in Santa Cruz county, Arizona, 57 miles from Tucson and 17 miles north of Nogales. The state highroad is a good automobile road.

The special feature of this monument is a very ancient Spanish mission ruin, built by Jesuit priests from Spain and operated by them for nearly a hundred years. The

most authentic information is that this mission, known as the Mission San Jose de Tumacacori, was founded by the Jesuit priest, missionary, and explorer, Father Eusebio Francisco Kino, between the years 1687 and 1690.

After the year 1769 priests belonging to the order of Franciscan Fathers took charge of the mission and repaired its crumbling walls, maintaining peaceable possession thereof for about 60 years. In the early part of the nineteenth century the mission was attacked by Apache Indians, who drove the priests away and disbanded the peaceable Papago Indians residing in the vicinity of the mission. When found by the Americans, about the year 1850, the mission was in a condition of ruin.

The ruins as they stand consist of the walls and tower of an old church building, the walls of a mortuary chamber at the north end of the church building, and a court or churchyard, surrounded by an adobe wall 2½ feet thick and 6 feet high. The walls of the church building are 6 feet thick, built of adobe and plastered both inside and outside with lime mortar 1 inch thick. About 25 feet north of the church building, and in the center of the churchyard, there is a circular mortuary chamber. The wall is 2½ feet thick by 16 feet high, built of adobe, surmounted on the top with a row of ornamental cornice brick (made of burned brick). The chamber has one entrance. The walls were originally decorated on the outside with white plaster studded with fragments of red brick. The entrance to the church is at the south and has an arched doorway.

*Florence, Ariz. (pop. 1,000, alt. 1,300 ft.), is situated on the Gila river 235 miles from its mouth and 75 miles north of Tucson. At Florence, in the Casa Grande National Monument, is the ancient ruin called Casa Grande, the best preserved of all ancient cities. It was a ruin when the Spaniards discovered it in 1510 and is supposed to be an ancient communal house. It has thick walls of adobe concrete, and its base lines are laid to the cardinal points of the compass. The ruins stand in a great plain that would be very productive if irrigated. The ancient people brought water from the Gila river by means of an acequia or canal 30 miles long,

whose course can still be traced. It is supposed that the river carried more water then than it does today. A reservoir inside the Casa Grande provided a supply of water. The building appears to have been intended also as a defense against a primitive enemy.

The town of Florence was founded in 1869; the first house was built in 1866. The buildings are of adobe and the population is largely Mexican. Primrose Hill near the town is the site on which Charles D. Poston, Arizona pioneer, writer on Indian affairs and on the Sun Worshipers of Asia, delegate to congress and superintendent of Indian affairs of Arizona territory, proposed to erect a temple to the Sun for Parsee worship.

The Publishers of the Automobile Blue Books will greatly appreciate any suggestions or corrections from their motor patrons. They well realize the difficulty of the task to which they have set themselves—and the valuable assistance motorists are constantly in a position to lend.

Route 643—Tucson to Douglas, Ariz.—144.6 m.

Reverse Route 652.

Via Vail, Benson, Tombstone and Bisbee. Good gravel highway to Vail, poor road to Benson, fine graded gravel highway to Douglas. Summary: 115 miles fine graded state highway; 30 miles natural gravel and dirt, most of it in very poor condition.

Leaving Tucson the route leads thru a flat undeveloped country to Vail, then crosses a hilly section across mesas, in many places covered with a rich growth of cactus and thru some grazing lands to Benson. From Benson to Bisbee, big plateaus and several mountain ranges are crossed over splendid roads. Easy grades prevail thru the mountains near Bisbee.

From here on to Douglas the Blue Book car was unable to follow the new highway and the log given on this stretch is over the old road. Tourists should make inquiries at the Commercial club at Bisbee to secure proper directions to Douglas.

*Bisbee, Ariz. (pop. 16,000, alt. 5,300 ft.), is located in the Mule mountains, about 10 miles from the Mexican border. Lead, silver, gold and copper are mined here, and the town has extensive copper smelting works whose daily output is 7,000 tons. It is the greatest copper producing town in the state, and its only industry is mining. The town occupies the

steep sides of a canyon whose bed forms the main street. The houses climb tier upon tier to the top and reach down into every crevice. Level land is very scarce and front foot prices are placed at metropolitan figures. Water is piped across the valley from Naco, ten miles distant. About 5,000 men are employed in the two great mines, the Copper Queen and the Calumet & Arizona.

POINTS OF INTEREST, DOUGLAS, ARIZ.

Douglas (pop. 7,000, alt. 3,955 ft.) is named for James Douglas, its founder and head of the Phelps-Dodge interests in Arizona. In the 70's, when southeastern Arizona writhed under the slaughters of Apache battles, Mr. Douglas came to Arizona. The city limits extend to International street, whose center is the boundary line between Mexico and the United States. Its chief industry is the reduction of copper ores shipped daily. One of the

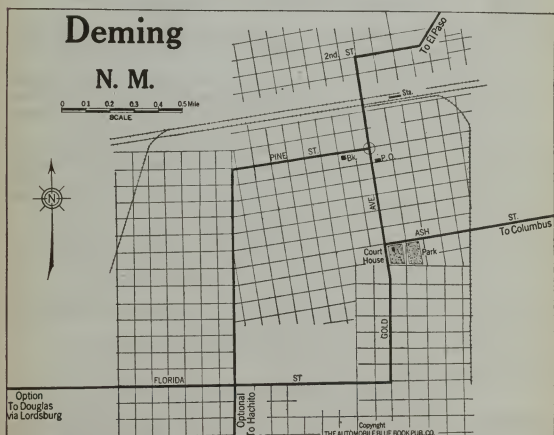

longest trains in the world is the daily train of 60 cars carrying 100,000 lbs. of ore from the mines of the Warren district. The two smelters draw their ore from Arizona, New Mexico and Sonora, Mexico. These two smelters have a physical valuation of \$10,300,000. By auto and train from Douglas one may go to all the famous mining camps of Arizona and Sonora, Mexico.

The army camp, Harry K. Jones, is located at Douglas.

POINTS OF INTEREST, DEMING, N. M.

Deming (pop. 2,000, alt. 4,315 ft.) is situated in the center of the famous Mimbres valley, which is underlaid by a great body of the purest water, and it is rapidly assuming prestige as the most important center in the U. S. where water is pumped from shallow depths for profitable intensive farming. Hundreds of wells deliver from 500 to 2,000 gallons of water per minute for irrigation.

Deming is one of the chief railroad centers of New Mexico and is purely an American community. Surrounding the city are many points of interest. To the north may be seen some of the largest copper mines in the U. S.; the largest army sanatorium in the world, the great Gila national forest and many ruins of the cliff dwellers may also be seen here. There are many famous hot springs in the immediate vicinity.

POINTS OF INTEREST, EL PASO, TEX.

El Paso (pop. 100,000, alt. 3,762 ft.) was first seen by a white man on May 4, 1598, when Juan de Onate at the head of a band of Spanish explorers crossed the Rio Grande at this point, forming his settlement on the south bank of the river, giving it the name of "Paso del Norte" (The Pass of the North). The present site of the city of El Paso at the time of Onate's visit was forbidding. The valleys were on what is now the Mexican side of the river and Indians at that time were in possession. So far as history records, the first building on the territory now covered by El Paso was erected by Ponce de Leon in 1827, on the present site of the Mills building.

El Paso is the largest American city immediately upon the Mexican border and the most important port of entry and commercial gateway into that country. It is regarded by the supreme military authorities of the U. S. as being one of its most important military posts. This is due to the strategic position of the city combined with railroad facilities, which make it easy to reach or to dispatch troops in every direction in case of trouble. It is a supply point for a military district stretching from Del Rio, Texas, on the east, to Nogales, Ariz., on the west.

To the tourist the military activities in and around El Paso are always a source of enjoy-

- 63.9 1.3 End of road; turn left across culvert with poles.

(El Paso Points of Interest, Cont'd.)

ment and material interest. Ft. Bliss, a great military post, is situated in a commanding position on a high mesa to the northward from the business section of the city, and can be reached by a short drive over excellent streets. It is occupied by a brigade comprising representation from every branch of the military service of the government. The regiments composing the garrison are provided with bands made up of some of the best musicians of the country and with the maneuvers thru which the troops are constantly being put in the solution of war games afford the visitor unusual opportunities to see soldiers in action.

El Paso is the principal city in one of the largest reclamation projects undertaken by the United States government. The Elephant Butte dam at Elephant Butte, N. M., is one of the engineering marvels of the world. This dam contains 610,000 cubic feet of masonry and the lake formed by it is the largest artificial body of water in the world except Gatun lake on the Panama canal. This dam can be reached by auto from El Paso over splendid gravel roads, some of them paved for 20 miles at a distance with asphalt, and will ever be a

source of water supply for this portion of the southwest.

El Paso is the largest city in the U. S. from which tourists may make an excursion by trolley into a country where the language, manners, customs, modes of dress and style of architecture are absolutely foreign to American conception of these details of life. Juarez, just across the Rio Grande, is probably one of the most typically Mexican cities in the republic of Mexico, and is in a sense the playground of El Paso. Here are the bull rings and cock pits and the largest gambling houses in the matter of floor space and number of games in operation in the world. Here also can be seen a church built in 1638, still used as a house of worship, and the shell torn and battle scarred ruins, reminders of the battles which have been fought for its possession by the warring factions which have arisen from time to time since the late Francisco I. Madero raised his flag of revolt in February, 1911. At Ysleta, 12 miles from El Paso, may be found another old mission founded in 1656 and still used as a place of worship. The narrow streets, old adobe buildings and plazas make these ancient cities places of deepest interest to the traveler.

QUICKEST AND BEST WAY TO SEE THE CITY.

Visit Ft. Bliss, Camp Cotton, and other camps in or near the city, all of which are reached by well paved streets. When returning from Ft. Bliss, over Dyer, Montana to Mesa Ave., turn north on Mesa to Kern Place, then to scenic points, from which a splendid panoramic view of El Paso, the Mexican city of Juarez and the irrigated valley of the Rio Grande, may be had. Leaving Scenic Point via Oregon St., drive to San Antonio St., to Stanton St., crossing the International bridge to Juarez, in which there are many points of historical interest and during the racing season the great track of the Jockey Club Juarez, said to be the most complete racing plant on the American continent.

MOST POPULAR SHORT TRIPS OUT OF CITY.

Paved County road to Ysleta, which lays claim to being the oldest city in what is now continental United States, which claim is disputed by St. Augustine, Fla., and Santa Fe, N. M.

The Hucco tanks via Ft. Bliss and good dirt road, for view of Picture Rocks, and other evidences of ancient Indian civilization.

North from city over well paved roads to the irrigated Mesilla valley to ruins of old Ft. Sheldon, where may be found medicinal hot springs and a view of one of the diversion dams built by the government and part of the Elephant Butte project, which is 110 miles north of the city.

- 64.4 0.5 Right-hand road; turn right with poles.
 65.4 1.0 End of road; turn left.
 66.4 1.0 4-corners; turn right.
 67.7 1.3 Mesilla Park, end of road just beyond RR. Turn right along same. Thru Mesquite 75.9. Pass Vado Sta. on right 80.1. Thru Berino 83.6. Thru Anthony, N. M., 88.4, crossing New Mexico-Texas state line just beyond. Pass Latuna Sta., Tex., on right 88.6. Thru Vinton 91.8. Thru Canutillo 94.4. Avoid right-hand road, athletic association on left, 96.2. Cross RR 102.0. Same thorofare becomes West Boulevard. Cross Missouri St. at filling sta.; turn right away from trolley.
- El Paso City Map and Points of Interest, page 639.
- 107.1 39.4 Irregular 4-corners; jog right and left, keeping ahead on Missouri St., joining trolley.
 107.6 0.5 Oregon St.; at far side of park turn right. Cross RRs 107.9.

 HOTELS—Sheldon Hotel, Mills, Oregon & Sheldon Sts., Opp. Plaza.
 GARAGES—Auditorium Garage, 314-326 Mills St., 2 blks. E. of Plaza.

Note (a) Route 645—Aden Sta., N. M., to El Paso, Tex.—51.0 m.

Reverse Note (a) on Route 650.

Via Lanark. First 39 miles gravel and sand, balance concrete. Summary: 39 miles gravel and sand; 12 miles concrete. The sandy stretches become very heavy in dry weather and we recommend this option for wet weather only. This is a section of the Borderland trail.

- 0.0 0.0 ADEN, store on right. Go east along south side of RR.
 1.7 1.7 Fork; keep left. Thru cattle-guards 4.5-11.5.
 12.9 11.2 Afton Sta., fork. Keep right along RR. Thru cattle-guards 17.4-19.0.
 22.8 9.9 Lanark, N. M., fork (center of town to right). Keep left along RR.
 31.2 8.4 Irregular 4-corners, just beyond cattle-guard; bear left with travel across RR. Thru cattle-guard 32.8.
 35.3 4.1 Fork; keep right. Avoid left-hand road 36.6.
 39.1 3.8 Cross RR and at 4-corners just beyond, turn right along same. Bear right with road across RR 46.1. Cross long concrete viaduct over RRs 49.6.
 50.0 10.9 Missouri St., turn right away from trolley.
 50.4 0.4 Irregular 4-corners; jog right and immediately left with trolley still on Missouri St.
 50.8 0.4 Oregon St., at far side of park on right; turn right with cross trolley. Cross RRs 50.8.
 51.0 0.2 EL PASO, TEX., Oregon & Mill Sts., plaza on left.
 HOTELS—Sheldon Hotel, Mills, Oregon & Sheldon Sts., Opp. Plaza.
 GARAGES—Auditorium Garage, 314-326 Mills St., 2 blks. E. of Plaza.

Route 646—Tucson, Ariz., to Lordsburg, N. M.—169.5 m.

Reverse Route 657.

Via Vall, Benson, Dagoon, Willcox and Bowie. Fine graded gravel highway to Vall, poor rocky road to Benson, fair to good natural desert road to Lordsburg. Summary: 120 miles fair to good natural desert road; 30 miles poor, rocky road; 20 miles fine graded highway.

The route crosses a sparsely settled desert region, but offers many splendid views of great valleys and rugged mountain ranges. A good stopping place may be found at Willcox.

Reverse Route 637.

Via Oracle, Mammoth and Winkelman. Graded gravel highway to Oracle, a natural desert road to Mammoth; balance mostly graded and improved roads with a natural gravel or gravelly sand surface. Summary: 53.2 miles gravel; 49.8 miles graded gravelly dirt; 14.0 miles natural desert.

The route traverses a large mesa to Oracle, enters a hilly region at this point and follows along a partly irrigated valley to Winkelman. It now follows closely along the Gila river thru an attractive canyon for 10 miles. The road here is narrow and winding and some of the grades are very steep. Drive carefully and keep to the right on turns. Leaving the river, the road goes thru Dripping Spring valley, where a luxurious growth of desert plants and shrubbery of all kinds abounds. A long, winding grade brings the tourist to the top of a gigantic mountain range, with splendid scenery all around him. The road surface is good and wide enough to pass at any place.

*Lordsburg, N. M. (pop. 2,000, alt. 4,300 ft.), is a cattle and mining town. Gold, silver and copper are produced in great abundance. The principal mines tributary to the town are Bonnie, Atwood, Hecla, Octo, Last Chance, Viola and 85. The old town of Shakespeare,

3 miles southwest, was a stage station on the old Butterfield stage route to Tombstone, Tucson, Sonora, Mexico points, Yuma and California points. The present Sunset trail follows this old stage route from Lordsburg west.

***Globe, Ariz.** (pop. 12,000, alt. 3,525 ft.), was first settled in 1876, being originally a silver mining camp. In 1882 copper was beginning to be extensively mined, and since that time a tremendous amount of the metal has been taken out of the surrounding country. Through this section of the country a giant cactus, called in Spanish, Sojuaro, is to be seen. This plant grows sometimes to the height of 40 feet and in the springtime has a beautiful orchid-like flower at the top.

Roosevelt Dam, a United States reclamation project, officially entitled the Salt River project, may be visited from Globe. The sand

stone and cement structure rises 284 feet above its foundation, which is sunk 30 feet in solid rock. The base is 168 feet thick and the top 20 feet. It has two spillways, each 200 feet long, and the total length is some 1,020 feet. It is capable of holding water sufficient to cover 1,300,000 acres one foot deep and assures the permanent supply to 240,000 acres. The lake back of the dam is 25 square miles in area, into which flows water from over 6,260 square miles. The first stone was laid September 20, 1905, and it was completely finished February 5, 1911. The total cost was approximately \$9,000,000, of which \$3,500,000 was spent on the dam proper.

It is impossible to include the listing of every desirable hotel or garage where Blue Book users and cars can be best accommodated. The Publishers will therefore appreciate the names of any hotels or garages not listed that are worthy of Blue Book endorsement.

- 156.7 0.4 DOUGLAS, G & 10th Sts., banks on left and right.
GARAGES—Douglas Motor Co., 12th & G Sts.

Route 652—Douglas to Tucson, Ariz.—144.6 m.

Reverse Route 643.

Via Bisbee, Tombstone, Benson and Vail. Good graded gravel highway to Benson, poor road to Vail, fine gravel to Tucson. Summary: 115 miles fine graded state highway, 30 miles poor gravel and dirt.

Leaving Douglas the route traverses the Sulphur Springs valley, then enters a mountainous region and crosses the Continental Divide near Bisbee. Easy grades prevail thru the mountains. Crossing immense plateaus and several smaller ranges we reach Benson and traverse a hilly grazing and mesa country to Vail. From Vail a flat and undeveloped country is followed to Tucson.

Owing to construction work on the new highway between Douglas and Bisbee the Blue Book car was unable to cover same and the route matter here given goes via the old road. Tourists should make local inquiries at Douglas to secure proper running direction to Bisbee.

*Bisbee, Ariz. (pop. 16,000, alt. 5,300 ft.), is located in the Mule mountains, about 10 miles from the Mexican border. Lead, silver, gold and copper are mined here, and the town has extensive copper smelting works whose daily output is 7,000 tons. It is the greatest copper producing town in the state, and its only industry is mining. The town occupies the steep sides of a canyon whose bed forms the main street. The houses climb tier upon tier to the top and reach down into every crevice. Level land is very scarce and front foot prices

are placed at metropolitan figures. Water is piped across the valley from Naco, ten miles distant. About 5,000 men are employed in the two great mines, the Copper Queen and the Calumet & Arizona.

✓*Tombstone, Ariz. (pop. 1,500, alt. 4,250 ft.), is the center of a large mining area and cattle industry. The first silver mine was discovered here in 1877 by Edward Schirffelin. Local points of interest include the Bird Cage theatre, made world famous in "Wolfville Tales" by Alfred Henry Lewis, and the Schirffelin monument.

Route 653—Tucson to Phoenix, Ariz.—134.2 m.

Reverse Route 642.

Via Florence, Mesa and Tempe. Excellent state highway first 50 miles, then fair-to-good gravelly sand to Higley, graded dirt to Tempe, concrete to Phoenix. Summary: 50 miles excellent state highway; 70 miles fair-to-good graded dirt and gravel; 9 miles macadam and concrete.

This route traverses a level and in places very picturesque desert region to Higley, then enters an agricultural section and passes thru the best settled area of Arizona.

For option from Higley P. O. to Mesa via Chandler, see Note (a).

*Florence, Ariz. (pop. 1,000, alt. 1,300 ft.), is situated on the Gila river 235 miles from its mouth and 75 miles north of Tucson. At Florence is the ancient ruin called Casa Grande, the best preserved of all ancient cities. It was a ruin when the Spaniards discovered it in 1510 and is supposed to be an ancient communal house. It has thick walls of adobe concrete, and its base lines are laid to the cardinal points of the compass. The ruins stand in a great plain that would be very productive if irrigated. The ancient people brought water from the Gila river by means of an acequia or canal 30 miles long, whose course can still be traced. It is supposed that the river carried more water than it does today. A reservoir inside the Casa Grande provided a supply of water. The building appears to have been intended also as a defense against a primitive enemy.

The town of Florence was founded in 1869; the first house was built in 1866. The buildings are of adobe and the population is largely

site on which Charles D. Poston, Arizona pioneer, writer on Indian affairs and on the Sun Worshipers of Asia, delegate to congress and superintendent of Indian affairs of Arizona territory, proposed to erect a temple to the Sun for Parsee worship.

*Mesa, Ariz. (pop. 3,500, alt. 1,482 ft.), is located on the Apache trail auto route. It lies in one of the richest sections of Arizona and is surrounded by fine alfalfa ranches, dairies, grain land, olive orchards, orange groves and fine stock farms. It is the center of the Pima long staple cotton industry, and the Goodyear Rubber company's cotton ranch of 15,000 acres is a point of particular interest. Mesa was settled in 1879 by a colony of Mormons from Salt Lake City and other places in Utah and is today the seat of the Mormon church in Arizona. The Papago and Apache Indian tribes have schools near Mesa and the government maintains an agricultural experiment farm nearby. Sixty miles distant is Roosevelt dam, the greatest irrigation project on the western hemisphere. Granite Reef dam

Left on Main St. is Route 653 to Phoenix.
- 15.3 0.4 MESA, Main & McDonald Sts., banks on right.

Route 654—Deming to Lordsburg, N. M.—62.4 m.

Reverse Route 640A.

Via Gage and Separ. Graded road to Gage, then natural desert road to Lordsburg. Good time can be made in dry weather, as the surface is principally gravelly sand. The Continental Divide is crossed on the plains near Wilna Sta. without perceptible grades.

Tourists bound for Phoenix have the choice of three distinctive routes. The shortest is via Lordsburg and Globe and the longest via Douglas and Tucson. The first is recommendable for its historic and scenic attractions, the latter for the best road conditions. The Wilcox-Benson-Tucson route can be made in the shortest time owing to the fact that part of the Lordsburg-Globe route (from Roosevelt Dam thru Superstition mountains) is poor.

*Globe, Ariz. (pop. 12,000, alt. 3,525 ft.), was first settled in 1876, being originally a silver mining camp. In 1882 copper was beginning to be extensively mined, and since that time a tremendous amount of the metal has been taken out of the surrounding country. Through this section of the country a giant cactus, called in Spanish, Sojuaro, is to be seen. This plant grows sometimes to the height of 40 feet and in the springtime has a beautiful orchid-like flower at the top.

Roosevelt Dam, a United States reclamation project, officially entitled the Salt River project, may be visited from Globe. The sand

stone and cement structure rises 284 feet above its foundations, which is sunk 30 feet in solid rock. The base is 168 feet thick and the top 20 feet. It has two spillways, each 200 feet long, and the total length is some 1,080 feet. It is capable of holding water sufficient to cover 1,300,000 acres one foot deep and assures the permanent supply to 240,000 acres. The lake back of the dam is 25 square miles in area, into which flows water from over 6,260 square miles. The first stone was laid September 20, 1905, and it was completely finished February 5, 1911. The total cost was approximately \$9,000,000, of which \$3,500,000 was spent on the dam proper.

- 19.5. Thru cattle-guard 23.0. Avoid right-hand road 23.2.

GARAGES—Douglas Motor Co., 12th & G Sts.

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in the handling of lighted matches, cigars, cigarettes, etc. when touring through wooded areas.

Route 659—Deming to Silver City, N. M.—54.0 m.

Reverse Route 656A.

Via Faywood Hot Springs. First 30 miles fine graded gravel; balance natural prairie road and in fair condition.

The route traverses a big stock raising country.

This route in connection with Route 660, Silver City to Lordsburg, offers a longer option between Deming and Lordsburg, but is recommendable as it takes the tourist over a pretty section of New Mexico and avoids the monotonous journey across the flats along railroad.

Salt Lake-Ogden Section

POINTS OF INTEREST, SALT LAKE CITY, UTAH.

Salt Lake City (pop. 147,000, alt. 4,248 ft.), founded in 1847 by the Mormons under the leadership of Brigham Young, is today a city covering 25 square miles. The Mormons built up a community here isolated and apart from the rest of the country until the advent of the railroads and the discovery of mines brought in the so-called gentile population. The population now is like that of any other large city, representing all creeds and classes.

The city is beautifully situated at the foot of the Wasatch mountains, with the Oquirrh mountains bounding it on the southwest and the Great Salt lake on the northwest. Ft. Douglas, established so many years ago by the U. S. government, guards the city, and a beautiful view of the mountains, valley and lake may be had from this point, which is only a fifteen-minute car ride from the city. The streets of Salt Lake, as laid out by Brigham Young, are marvels of width and length, 660

feet in a block and 130 feet from property line to property line. Their beauty is enhanced by the great shade trees which line their border and the succession of gardens which surround the residential homes—all this verdure being the result of a wonderful system of irrigation. Streams of pure water are conducted in ditches along both sides of many of the streets.

The local center of Salt Lake City, constituting the "sacred square of the Mormons," is Temple Block, which covers an area of ten acres and contains the famous Tabernacle, a vast auditorium building 250 feet long, 150 feet wide and 70 feet high, giving seating accommodation to 8,000 people, built without a single nail, and housing the most wonderful organ in the world; the Temple, built of white granite hauled by ox team from Big Cottonwood canyon, near the city, and which it took forty years to construct at a cost of

over \$4,000,000, and the Assembly Hall, devoted to divine service, with a seating capacity of 3,000 people. These are wonderful and interesting buildings, one and all. With the exception of St. Patrick's cathedral, in New York City, the Temple is said to be the grandest and costliest ecclesiastical structure in this country. It is 200 feet long, 100 feet wide, 100 feet high, with six spires—one at each corner and one at the center of each end—rising 220 feet. The walls are 10 feet thick, and no mortar or plaster was used in the construction. The sacred rituals and ceremonies of the Mormon church are performed in this edifice and only members of the church may enter its doors. The Tabernacle is open to the public and free organ recitals are given here every day at noon from the middle of April until August 1st. This is a treat that should be taken advantage of by every visitor to the city. The organ, built under the supervision of Brigham Young, contains 5,500 pipes ranging from two inches to thirty-two feet in length and capable of 400 tonal variations.

Near the Temple is the Bee Hive and Lion house, where Young and several of his wives lived, and the Amelia palace or Gardo house, the former residence of Young's favorite wife.

The Bee Hive house is now the official residence of the president of the Mormon church, the Lion house has been turned over for the use of the church societies, and the Amelia palace is now a private residence. In this vicinity also is the old Salt Lake theater, second oldest theater in the U. S., and reported to be the only one in America which has not been reconstructed. The timbers supporting the floor were rough hewn and still retain the bark. Nearby is the public library, the Alta club, University club and Eagle gate, which was the old toll gate. Opposite Temple square are buildings housing various executive offices of the Mormon church, and the Latter Day Saints' university, and in the immediate neighborhood is Zion's co-operative mercantile institution, the Mormon's great department store.

Other buildings and institutions of note are the capitol, the city and county buildings, penitentiary, museum, exposition buildings and the University of Utah. The business blocks are substantial and imposing, and while Salt Lake City's manufacturing industries are not of first importance, thru its central position the city has acquired marked renown as a trade distributing point for a vast mineral, agricultural and stock raising re-

gion. The residence sections occupy the mountain benches, once the shores of a great inland sea known to geologists and scientists as "Lake Boonville," from which, ages ago, the waters receded until they settled in the basin of the Great Salt lake, 18 miles from the city. Of its parks, Liberty is the largest. This was the former farm of Brigham Young. Pioneer Square is a pretty little park, marking the place where the pioneers camped their first night on the site of what is now Salt Lake after coming thru a rift in the mountains, now known as Emigration canyon, which canyon is reached by trolley or auto just a short distance away.

Great Salt Lake is a big attraction. On its shores, at Saltair, sea bathing may be enjoyed in a mountain altitude, and most of the joys of Coney Island can be had on the "board walk." One of the largest dancing pavilions in the world is located here. The lake is 40 miles wide by 80 miles long. The water is 23 per cent salt and so heavy that a person not knowing how to swim can float on it like a chip. It is delightfully exhilarating. This

lake has no outlet. It encloses several islands which are said to be inhabited by birds and buffalo. Altho the lake is so salty, the islands have fresh water springs that rival the drinking water of Salt Lake City.

John C. Fremont was the first man to navigate the waters of this strange lake, in 1842, on his way to Oregon. He set out in a rubber boat from the mouth of the Weber river with the nearest island as his goal. This he found to be a desolate rock, 14 miles in circumference, and he named it Disappointment Island, it later being called Fremont's Island. The bathing beach and resort are 30 minutes' ride from the city by train. An auto road to the beach winds thru a pretty farming district, skirts the salt flats and thence over a mountain edge and past gigantic ore-concentrating mills to the lake.

From Ensign park, the northern boundary of the city, a wonderful panoramic view of the surrounding country is obtained. Before the promontory, on an elevation overlooking the city, the beautiful new Utah state capitol arises, built of Utah granite at a cost of

\$2,500,000; to the west the Oquirrh mountains extend toward the heavens, ore mills and rail-road tracks perched on their sides, and to the northwest spreads the light green expanse of the Dead Sea of America.

The attractions of Salt Lake City are so manifold that lack of space forbids us to adequately describe or even mention many of them. However, for the tourist who wishes to see the most important and interesting points in addition to the foregoing, we might mention the City Creek canyon, easily reached by foot from the center of the city; Big and Little Cottonwood canyons, and the hot pots at Heber.

Bingham, "Where Copper is King," claims a special attraction, as the world's greatest mining camp. It is situated 25 miles south of Salt Lake and is reached by one of the most unique lines in the world, it being practically a town hung up on the side of the mountain. 2,000 men are employed digging out the copper ore and something like \$65,000 profit is banked by the Utah Copper Co. every day. It takes two mills working night and day concentrating the ore and it is said that the work being done is far more stupendous than the great engineering feat of digging the Culebra Cut in Panama.

QUICKEST AND BEST WAY TO SEE THE CITY

Leave the Brigham Young Monument at the head of Main street, opposite the Utah Hotel, and go east one block to the Eagle Block, then north one block to Canyon road, bearing right, and continue for three miles up City Creek canyon. Returning, take left hand road, which leads to the Highland boulevard. Continue on this road overlooking the valley and Fort Douglas, with the valley and the University of Utah as a background looking to the west. From this view you can see Great Salt Lake and the mountains in the lake to the west. Continue past Fort Douglas to 10th South street, then west to 9th East street, which goes south to 10th South, then west to Liberty park, traveling thru Liberty park and returning to the city on 5th East, through to South Temple, and then back to Hotel Utah.

*Farmington, Utah, (pop. 1,250, alt. 4,250 ft.), the county seat of Davis county, is 15 miles

Great Salt Lake. It is the home of the Miller Floral Company, the largest growers of flowers in the intermountain country.

POINTS OF INTEREST, OGDEN, UTAH.

Ogden (pop. 35,000, alt. 4,307 ft.) is beautifully located on the western slope of the Wasatch mountains and is the second largest city in Utah. It is thoroughly modern in every respect, and as a commercial center is a place of no mean importance. Ogden also takes pride in its parks and its beautiful homes. The city is a railroad center, being the terminus of four great railroad systems, and is connected with two interurban lines. It is

also the center of one of the largest agricultural and mining districts in the west. The climate of this region is healthful and invigorating. No side trip in the west is more popular than the trip to Ogden Canyon. This can be made in one hour over good macadam roads all the way. The scenery is truly wonderful. Ogden has provided a free camping ground for auto tourists, centrally located in a grove of stately trees on the banks of the Ogden river.

*Farmington, Utah (pop. 1,250, alt. 4,250 ft.), the county seat of Davis county, is 15 miles north of Salt Lake City and 3 miles east of Great Salt Lake. It is the home of the Miller Floral Company, the largest growers of flowers in the intermountain country, and of the famous Lagoon resort.

*Lehi, Utah (pop. 3,000, alt. 5,020 ft.), claims honor as being the home of the first successful beet sugar factory built in the intermountain west. It has been in operation since 1891. Five miles south of town on the shore of Utah lake is Saratoga Springs resort, where hot mineral waters pour from the earth. Many persons afflicted with rheumatism and

and restaurants are maintained all summer.

*American Fork, Utah (pop. 3,200, alt. 4,563 ft.), was settled by the Mormons in 1851. It contains a large Mormon tabernacle with a seating capacity of 3,000. Utah Lake, one mile distant, offers splendid fishing, bathing and boating; also excellent camp sites. The American Fork canyon, 6 miles northeast of the city, is said to be one of the most scenic canyons in America. This can be reached and entered for a distance of about 15 miles by fair auto road. American Falls claims to have built the first sugar beet factory in the west. Sheep and wool industry is of much importance. About one hundred thousand

POINTS OF INTEREST, PROVO, UTAH.

Provo (pop. 11,000, alt. 4,542 ft.), the third city in population in the state, is situated 45 miles southeast of Salt Lake City on the shore of the beautiful Utah lake, the largest fresh water lake in the state. Fine fishing is to be had in this lake, as well as in the Provo river, which flows into it.

Five miles north of Provo is Utah's most famous mountain, Mount Timpanogos, whose summit is more than 12,000 feet above the level of the sea. On the north slope of this mountain is a great glacier which is said by scientists to be the lowest glacier in the Rocky mountains and the furthest south in the country. In going from Provo to the top of Mount Timpanogos one traverses through the

pass through in going from Provo to northern Greenland. This mountain may be reached by way of Provo canyon. Each year a number of hikes are conducted under the direction of the Provo commercial club and the Brigham Young university.

About 8 miles to the south of Provo is the Strawberry project which puts about 70,000 additional acres of good land under irrigation. This project was undertaken by the federal government and brings water to the farm at a cost of about \$80.00 an acre.

Provo canyon is an ideal summer home and resort for people who seek to spend part of the summer in a canyon that has cool days and nights, unexcelled scenery, good

Route 663 A—Fillmore to St. George, Utah—172.0 m.

Reverse Route 425.

Via Kanosh, Beaver, Parowan and Cedar City. Graded dirt and gravel road all the way, except some stretches of rough, sandy road in the last 30 miles. This is a section of the Arrowhead trail and traverses large prairie and agricultural districts divided by mountain ranges, reaching a maximum altitude of almost 7,000 feet between Kanosh and Beaver. Accommodation and supplies may be had at the various towns en route.

*St. George, Utah (pop. 2,000, alt. 2,800 ft.), was settled in 1862 by a colony of Mormons from Salt Lake City; by 1877 a great temple had been erected, costing a million dollars. South of St. George at the junction of the Virgin and Santa Clara rivers, high up on the cliffs, is shown the picture of the early

inhabitants of this region. Twenty miles east are the great hot sulphur springs noted for their wonderful cures, while 20 miles further on is the wonderful Zion's canyon, a national monument. In this region exist the only silver deposits found in sandstone. Copper is mined west of the city; oil is also found in this vicinity.

- 1.4 1.0 Left-hand road; turn left, shortly curving right. Cross RR 2.5.

- 149.8 0.6 Left-hand road; turn left, taking first right-hand road at sign just beyond—now on Aultman St. Pass court house on left 150.0.
- 150.2 0.4 ELY,* Aultman & Murry Sts.

HOTELS—Northern Hotel, Cor. Aultman & Murray.
GARAGES—Lincoln Highway Garage Co., on Aultman St.

*Ely, Nev. (pop. 2,075, alt. 6,000 ft.), is practically the only large town between Salt Lake City and Reno on the Lincoln highway. It is one of the greatest mining centers in the country today, containing large deposits of copper, gold and silver. The largest copper pit in the world is located here and is well worth a visit from the tourist. A splendid free camping ground with light, water, grids for cooking and shower baths is maintained by the city for use of the tourist.

The wonderful piece of road work encountered out of Ely shows the eastern tourist what can be done by a few enterprising western men. Practically all of the road work on the Lincoln highway in Nevada is due to the efforts of Mr. G. S. Hoag, of Ely, and his associates. The tourist is advised while in Ely to call upon Mr. Hoag, who will cheerfully give him reliable information concerning any changes which have been made in the route since Blue Book representative covered it.

Route 664—St. George, Utah, to Las Vegas, Nev.—146.0

Reverse Route 424.

Via Santa Clara, Bunkerville and St. Thomas. Gravel and natural prairie road thru sparsely settled desert country. This is a section of the Arrowhead trail. It is advisable to carry a supply of provisions, gasoline and water on this route, as there are no towns between St. Thomas and Las Vegas. The scenic attractions are almost beyond comparison. The Red Rock canyon west of St. Thomas is of especial interest. For fording the Virgin river, the county furnishes a team of horses free of charge.

Route 664 A—Las Vegas, Nev., to Barstow, Cal.—247.2 m.

Reverse Route 423.

Via Searchlight and Ludlow. Unimproved but fair natural desert road to California state line; balance improved gravel and oiled dirt road, except some poor stretches between Amboy and Ludlow.

This is a section of the Arrowhead trail. While supplies may be obtained at a few of the small places en route, it is advisable for tourists to make some provision for carrying a small amount of same. The route is across the Mojave desert practically all the way and intersects the Needles-Barstow route just west of Goffs, following the Santa Fe RR into Barstow. Owing to the intense heat during the summer months, it is advisable to drive this route at night.

 247.2 149.8 BARSTOW, CAL., P. O. on right, sta. on left.

Route 665—Salt Lake City to Gold Hill, Utah—147.8 m.

Reverse Route 305.

Via Tooele, St. John, Johnson pass, Orr's Ranch and new cut-off across American desert. Concrete to Magna, good graded gravel to Orr's Ranch, next 18 miles poor; good natural dirt next 22 miles, followed by 18 miles of good gravel highway across the Salt basin, last 14 miles good natural prairie road. Summary: 18 miles concrete; 68 miles good gravel; 36 miles fair to good natural prairie road; 26 miles poor surface.

The first 60 miles of this route are thru a densely settled agricultural section of Utah. The balance is over an uninhabited prairie and desert country, Orr's Ranch being the only habitation between Clover and Gold Hill, a distance of 90 miles. Tourists are cautioned to fill their gas tank at Tooele or Stockton to capacity as it is not safe to rely on any gas being obtainable at Orr's Ranch, where supplies have to be hauled to the ranch from a great distance. Good meals and emergency accommodations here.

Since the completion of an 18-mile stretch of gravel highway across the Salt basin of the Great American desert and the opening of Johnson pass, the Lincoln highway between Salt Lake City and Ely has been shortened by over 30 miles and the poor road near Fish Springs forever eliminated. More work is contemplated for the improvement of the Lincoln highway on this section, but it is very probable that for the 1920 season travel will go over the route here given.

A number of roads in this vicinity, including several of the main highways, will be closed for construction and repair work during the coming year. It being impossible for us to determine at the present time just which roads will be included in this construction work, we advise tourists to call upon Mr. W. D. Rishel, Secretary of the Utah Automobile Club, Commercial Club Building, Exchange Pl., opposite P. O., Salt Lake City, for the most recent information.

- 67.3 14.3 Fork; bear right onto straight road across valley.
- 71.1 3.8 End of road at abandoned ranch; turn left. Bear right around ledge of rocks 75.2, following winding road thru hills. Pass Pinto House on left 77.9.
- 85.1 14.0 EUREKA, court house on left.
Straight ahead is Route 671 to Austin.

*Ely, Nev. (pop. 2,075, alt. 6,000 ft.), is practically the only large town between Salt Lake City and Reno on the Lincoln highway. It is one of the greatest mining centers in the country today, containing large deposits of copper, gold and silver. The largest copper pit in the world is located here and is well worth a visit from the tourist. A splendid free camping ground with light, water, grids or cooking and shower baths is maintained the city for use of the tourist.

The wonderful piece of road work encountered out of Ely shows the eastern tourist what can be done by a few enterprising western men. Practically all of the road work on the Lincoln highway in Nevada is due to the efforts of Mr. G. S. Hoag, of Ely, and his associates. The tourist is advised while in Ely to call upon Mr. Hoag, who will cheerfully give him reliable information concerning any changes which have been made in the route since Blue Book representative covered it.

Route 671—Eureka to Austin, Nev.—71.7 m.

Reverse Route 301.

Via Lincoln highway. With the exception of a 10-mile stretch of poor, rough road encountered 6 miles west of Eureka, general conditions on this trip are fair and a good average speed can be maintained.

Route crosses several mountain ranges and a number of vast sage brush flats. The country is uninhabited save for a few ranches along the way. No supplies are to be had on this trip, water is scarce, so tourists must arrange supplies accordingly.

| MILEAGE | | Distance | Total Between Mileage Points |
|---------|----------------|--|------------------------------|
| Total | Mileage Points | | |
| 0.0 | 0.0 | EUREKA, court house on left. Go northwest. Pass ruins of old smelter on left 0.4. | |

| 71.1 | 27.1 | Fork, stone house on right; bear left downgrade. Same thoro-fare becomes Main St. | |
| 71.7 | 0.6 | AUSTIN,* Main & Cedar Sts. | |

HOTELS—International Hotel & Garage, Cor. Main & Cedar Sts. Straight ahead on Main St. is Route 672 to Fallon.

Route 672—Austin to Fallon, Nev.—117.3 m.

Reverse Route 300.

Via Frenchman's, Sand Springs and Salt Wells. Fair-to-good natural prairie road most of the way to Sand Springs; balance good graded sandy dirt. Several poor stretches are encountered where road crosses flats and in wet weather may be found almost impassable. In the hills road conditions are generally better.

The route traverses a barren sage brush country which is uninhabited with the exception of a few ranches. Water is scarce and supply should be replenished at every opportunity. Seven miles before reaching Fallon the route enters a well developed and productive irrigated district. Good meals, accommodations and supplies are found at Frenchman's and Salt Wells.

| MILEAGE | | Distance | Total Between Mileage Points |

| 32.0 | 24.7 | Fork; bear left with travel. Thru gates at Alpine Ranch 48.2. | |

*Austin, Nev. (pop. 700, alt. 6,594 ft.), is interesting as being typical of what is now popularly known as "Ghost Cities of the West." The westbound tourist first catches a glimpse of Austin from the lofty summit of the Toiyabe range, a patch of pleasant green nestled in an otherwise desolate and narrow canyon, with a wide expanse of desert valley and the Mt. Airy range beyond. From the summit the road descends on what was for-

merly the old overland trail of the Pony express riders, now a well-built, safe government road. The discovery of ore was made by one of the Pony Express riders accidentally in 1862, and the camp has since produced 50,000,000 dollars in silver bullion. The numerous ore dumps on either side of the road represent the failures and successes of thousands of people from the time of the original discovery down to the present day.

- 52.9 20.9 Fork; keep right. Pass ruins of old stone house 54.8.
- 61.2 8.3 Right-hand road at corrals, East Gate Ranch ahead on right; turn right.
- 61.5 0.3 Fork; bear right. Thru gap in hills 64.4.
- 68.0 6.5 Fork; bear right with travel.
- 71.6 3.6 Fork, just beyond wash; bear left. Cross alkali flat 81.5.
- 83.0 11.4 Frenchman's (P. O. Fairview), store on left. Keep ahead. Ascend easy grade across divide 85.5. Thru Sand Springs 91.2. Cross alkali flat 91.7.
- 102.9 19.9 Salt Wells, store on left. Straight thru. Avoid right-hand diagonal road 104.2.
- 107.7 4.8 Right-hand diagonal road, just beyond irrigation canal; bear right along same. Avoid left-hand diagonal road 107.9.
- 110.2 2.5 End of road; turn left along irrigation canal.
- 113.1 2.9 Fork; bear right with irrigation canal.
- 115.6 2.5 4-corners; turn right across irrigation canal. Avoid left-hand road 116.1.
- 116.4 0.8 End of road; turn left.
- 116.9 0.5 4-corners, brick school on far right; turn right.
- 117.0 0.1 Broadway; turn left.
- 117.2 0.2 Main St.; turn right one block.
- 117.3 0.1 **FALLON,*** Main St. & Williams Ave., court house on far left.
 Left on Williams Ave. is Route 674 to Reno and Route 673 to Carson City.

*Fallon, Nev. (pop. 741), is in the heart of Carson valley, 15 miles from Hazen, and is situated on a low, broad alluvial fan of Carson river. It is the headquarters of the Truckee-Carson irrigation project. This was the first of such projects undertaken by the United States government. The water is obtained from the Carson and Truckee rivers, whose waters run to waste in the early summer, being lost in inland lakes or sinks by evaporation. The waters of the Truckee are brought over the divide at Fernley by means of a large canal and turned into a huge reservoir on the Carson river. The present constructed reservoirs on the project have a total of 650,000 acre feet. An acre foot is the amount of water necessary to cover an acre of land one foot deep. The area to be irrigated comprises 290,000 acres on the western rim of the Great

Basin in the bed of the ancient and now extinct Lake Lahontan. This is one of the driest sections in the United States and was called the "Forty-mile Desert" by the early emigrants who crossed it on their way to California.

To the uninitiated the valley appears utterly desolate, but it has all the potential resources of the country around Boise, Idaho, or that about Greeley, Colo. The soil is a sandy loam, clay loam, or volcanic ash, and will produce every variety of crop known to the north temperate zone. Potatoes and celery and cantaloupes raised here are of superior quality and are shipped for consumption on dining cars. Considerable areas here yet remain to be taken up by settlers. The maximum claim allowed is 80 acres. The government has established an experiment farm near Fallon.

PIONEER TRAIL ASS'N.
CARSON CITY, NEVADA

Route 673—Fallon to Carson City, Nev.—65.7 m.

Reverse Route 166.

Via Dayton and Mound House. First 20 miles rather poor, sandy dirt and some rocky stretches around Lahontan lake, which will probably be in good shape for 1920 travel, then 25 miles fine natural prairie road; balance good graded gravelly dirt.

Leaving Fallon the route traverses an irrigated farming district to the Lahontan dam, then an open rolling sage brush country for 30 miles, where it enters an irrigated valley which it follows for 20 miles before reaching Carson City. Meals and supplies may be had at Dayton.

This road has recently been added to the Lincoln highway system and is officially designated as the Pioneer Branch of the Lincoln highway.

| MILEAGE | | Total Distance Between Mileage Points | Description |

- 28.6 1.1 4-corners, just beyond irrigation ditch; turn right.
- 29.5 0.9 End of road; turn left away from irrigation ditch. Thru Fernley 29.8.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attache to the office of the first territorial secretary, and the Old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city—and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of

the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found footprints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

*Wadsworth, Nev. (pop. 800, alt. 4,077 ft.), is situated on the Truckee river 34 miles east of Reno. It is in a mining region. It is an old town and was one of the important stations on the original route of the Central Pacific, but the railroad now curves south of the town to secure a more even grade on the westward climb. Wadsworth was at one time a trading post and served as an Indian agency and fort.

The Truckee river, named in honor of an Indian guide of General Fremont, makes a bend to the north at Wadsworth and flows through a canyon for 20 miles to Pyramid and Winnemucca lakes, where its waters were formerly evaporated. Now by the government irrigation project (See Fallon) they are turned into the reservoirs of the Carson river and

used for irrigating the lands. Fishing in Pyramid lake is excellent. Three varieties of trout are caught here, some of which attain a weight of 30 pounds. At the mouth of the river is a reservation of the Piute tribe.

*Sparks, Nev. (pop. 3,500, alt. 4,225 ft.), is a city of Washoe county, 3 miles east of Reno on the Truckee river. It is the seat of Nevada state university and of the state asylum for mental diseases. There are mines in the vicinity. The town was named in honor of John Sparks, governor of Nevada, 1903-1906, and is the second city in population in the state. Trains make a stop of 15-20 minutes at the repair shops here, where a huge mountain-climbing locomotive is substituted for the ordinary type.

 136.6 18.7 Left-hand diagonal road; bear left. Thru diagonal 4-corners 137.5.

*Tonopah, Nev. (pop. 5,000, alt. 6,100 ft.), the county seat of Nye county, is queen of the mining camps that dot the map of the great southwest. One hundred million dollars has thus far been blasted from out the Tonopah mines, and, to all appearance, only a fair start has been made. Here, where fifteen short years ago the horned toad and the coyote

held full sway, stands today a forest of giant steel gallows frames, a great foundry, and machine shops, and, clinging to the hillsides, several thundering stamp-mills. Withal, Tonopah is a modern and up-to-date city, offering every convenience of a metropolis to the tourist. It is a radiating center for some of the finest natural roads in the west.

***Goldfield, Nev.** (pop. 5,850, alt. 5,676 ft.), was at one time, the biggest gold producing camp in the west. Upon the discovery of this precious metal in its hills, a city seemed to spring up over night, which with the years developed into one of the liveliest and most modern of the day. Many will recall the big strike which was staged at Goldfield during the years of 1906 and 1907. Of late years, like most mining towns, Goldfield has somewhat

lost its prestige as the great mining camp of Nevada and has settled down to the ordinary life of a town of its size and location. During the past year or two numerous manganese properties have been discovered a few miles from Goldfield. Sulphur deposits have also been opened up. Stock raising is carried on to some extent, the desert affording excellent winter grazing, and as the water development increases so also does the live stock industry.

Why hesitate to tour through any part of the United States or adjacent Canada? There is a 1920 Automobile Blue Book covering every section. This should solve the problem for you.

- 84.6 33.0 Left-hand diagonal road, just beyond houses; bear left along fence—RR over to left. Avoid left-hand road 85.4. Pass stone cabins on left 86.2. Pass ranch on left 87.3. Thru gap 88.9. Route 682—Bigpine to Mojave, Cal.—166.2 m.

Reverse Route 413.

Via Independence, Lone Pine, Little Lake and Red Rock canyon. Principally good natural prairie road and 8 miles of concrete between Bigpine and Independence. Summary: 158 miles good natural prairie road; 8 miles concrete.

The road parallels the eastern slope of the Sierra Nevada range and with the exception of some farming districts around the towns en route traverses a barren desert country. The high Sierras, their peaks covered with eternal snow, Owens lake, which is followed for many miles, the big plains, lifeless and pitiless to the wanderer who should go astray, the rugged ranges to the east encircling Death valley, all combine into one mighty spectacle substantiating the traditions of the country that lies between the Rockies and Sierras. Aside from the larger towns on this route good accommodations and supplies are obtained at Cowan Sta. and Little Lake. The last 70 miles, leading across the northern parts of Mojave desert, are frequently traveled by night to avoid the excessive heat of the day.

Right before this turn is Route 685 to Bakersfield.
- 166.2 0.3 **MOJAVE**, sta. on right.
Straight ahead is Route 683 to Los Angeles via Mint canyon.
Left is Route 369 to Barstow.

Route 683—Mojave to Los Angeles, Cal.—107.6 m.

Reverse Route 411.

Via Lancaster, Palmdale, Mint canyon, Saugus, San Fernando, Burbank and Tropic. Good dirt to Los Angeles County line 16 miles, then very poor, rough and dusty road to Lancaster; concrete to Palmdale, fair-to-poor gravelly dirt to Acton; balance concrete, excepting a 3-mile stretch of dirt near the junction of Mint and Soledad Canyons (this stretch may be paved for 1920 travel). Summary: 69 miles concrete; 14 miles fair-to-poor gravelly dirt; 16 miles good, graded dirt; 8 miles very poor, rough and dusty.

Following the RR across the western end of the Mojave desert, we enter an irrigated farm district at Lancaster, extending as far as Palmdale. From here on to Saugus the route traverses a hilly, wooded country. The balance is thru a fine agricultural and residential district, typical of southern California.

Route 684 offers a shorter option via Elizabeth lake and Boquet canyon, but road conditions to Saugus, where the two routes combine, are not as good as on the Mint Canyon Road. For a somewhat prettier entrance into Los Angeles use Route 684 from San Fernando, going via Lankershim and Hollywood.

*Burbank, Cal. (pop. 2,000, alt. 555 ft.), is situated eleven miles northwest of Los Angeles and nearly in the center of the San Fernando valley. It occupies a gentle slope at the base of the Verdugo mountains, the highest peak directly back of the city having an elevation of 3,000 feet above sea level and 1,100 feet elevation at the base of the mountain, dropping to about a four per cent grade to the valley's floor. An extensive panoramic view is enjoyed from this locality.

Luther Burbank, the world famous plant wizard of Santa Rosa, has never had any connection with Burbank. He, like hundreds of thousands, is familiar with the little city and its fertile resources, but in 1878 Burbank was extensively populated by sheep. It comprised the historic Burbank ranch. Six families made their living ranching. David

Burbank, who is said to have no relationship to Luther, sold this land in 1887 to the Providencia Land and Water Co., which in turn subdivided the ranch into a townsite.

South of Burbank in the little valley at the northeast foot of Cahuenga Park is Universal City, the only city in the world built solely for the production of moving picture films.

At West Glendale, four miles from Burbank, is Eagle Rock, an old landmark. The "eagle" on the side of the rock is caused by shadows cast by overhanging rocks.

An army water poisoner who was during the late war seen climbing one of the high water tanks in an army camp "somewhere in America" was shot and killed by Otto Kirby, private, who was serving as night picket, after he had challenged the German spy twice without avail. Young Kirby is the son of Mrs. F. B. Kirby and he is from Burbank.

- 33.4 1.3 Elizabeth Lake, right-hand road at high-power line. Turn right.

- 78.2 9.8 San Fernando,* sta. on left.

GARAGES—Ridge Road Garage.

GARAGES—Walker's Garage, San Fernando Blvd.

*San Fernando, Cal. (pop. 3,000). Just a few minutes' ride from this city is San Fernando Rey d'Espagna mission, occupying the Reyes Rancho. The Reyes hacienda temporarily housed the mission, which also included within its lands the famous Cambulos Rancho, the home of Helen Hunt Jackson's "Ramona." The mission was founded by Padre Lasuen, September 8, 1797, but Padre Francisco Dumetz and his assistant, Francisco Favier Uria, were the first priests in charge. The baptismal register shows that ten children were baptized the first day and thirteen adults in October. The tile-roofed adobe church was consecrated in December, 1806, but was so severely injured in the earthquake of 1812, which damaged nearly all the missions, that thirty new beams were needed to support the shaken walls. A new chapel was completed in 1818.

The secularization of the mission was begun in 1834 by the appointment of Lieutenant Antonio del Valle as comisionado. In 1832 Micheltorena, who had been appointed governor, stopped at San Fernando on his journey north to take up his office and was there informed of the raising of the American flag at Monterey by Commodore Jones. It was by Micheltorena's decree in 1843 that San Fernando was returned to the padres, but there were only two vineyards and a few cattle left. Even this small gain was not to be theirs for long. The Californians led by Pio Pico and Castro revolted against Micheltorena, who with most of his troops marched south to suppress the rebellion. At San Fernando was fought the "bloodless battle of Cahuenga," resulting in the capitulation of Micheltorena. In 1847 San Fernando was again the scene of warlike operations. Fremont and his battalion arrived in January and remained until after the signing of the treaty of Cahuenga, which terminated all hostilities against the United States in its conquest of California. During their stay and on their departure Fremont's command confiscated without compunction whatever horses and cattle remained to the San Francisco mission. The following year is famous for the discovery of gold in California, and with this discovery the Mission of San Fernando is associated. In 1842 Francisco Lopez, major-domo of the mission, seeking stray horses, stopped to rest and eat in the canyon of San Feliciano. In digging up

some wild onions for his luncheon he discovered a piece of gold. Search revealed other pieces. On his return to San Fernando he showed these to friends, who at once declared there must be a placer of gold in the canyon. People from Los Angeles and Santa Barbara flocked to the new gold field. The first California gold ever coined at the Philadelphia mint came from this field. It was taken around Cape Horn in a sailing vessel by Alfred Robinson, translator of Boscana's "Indians of California," and amounted to \$344.75. In the two years following Lopez' discovery about \$100,000 was taken from this placer. The first gold pans were bateas or bowl-shaped baskets made by the mission Indians.

The church at San Fernando is only a pathetic ruin. It is built entirely of adobe, with the entrance at the southwest end, while the altar stands at the northeast. On the east side is an entrance with a half-circular arch sloping into a larger arch inside with a flat top and rounded corners. Various and curious styles of these outer and inner arches are worked out in the thick walls and are of interest as affording a wonderful example of variety in adapting the arch to its necessary functions. On the northwest side of the church is the old graveyard, the doorway to which has the half-circular arch on the inside and slopes outward to an exterior square arch. Close to the graveyard and still surrounded by the remains of the original adobe walls is the old olive orchard, where a number of fine trees are still growing. There are two superb palms over 100 years old which have been the inspiration of many an artist. They stand isolated and pictures of the mission usually have these stately trees in the foreground with the long, low line of the monastery corridor in the middle distance and the beautiful hills rising into the Sierra Madre mountains in the distance. The exterior of the old monastery has been restored by the Landmarks Club, which also placed the protecting shake roof over the church ruin. Close to the monastery building a fine old fountain built of brick and cement still pours crystal waters from a great double bowl on a center standard into a reservoir below. The square structure built of boulders which stands about 200 yards from the monastery incloses two circular cisterns of brick.

*Gardnerville, Nev. (pop. 500, alt. 4,800 ft.), located in the heart of the famed Carson valley, was a favorite resting place of the daring scout, Kit Carson. Good roads lead over the mountains to Lake Tahoe, Yosemite valley, Tonopah and Goldfield and to Wallers-springs, where the great baths of western Nevada are located. Fremont in his historic

trip across the Sierras stopped here for several weeks to place his men and stock in proper condition for the perilous trip. A half a century later, Gardner, for whom the town was named, built his very modest hotel and blacksmith shop on the very site of Fremont's camp to care for the overland traveler and around it sprung up the present little city.

- 23.9 1.5 End of road; turn right. Cross RR 25.7.

*Carson City, Nev. (pop. 2,475, alt. 4,720 ft.), capital of the state, is situated on the western border in Ormsby county. The city had its birth in the early territorial days, somewhere about the year 1851, and was named in honor of the famous scout and frontiersman, Kit Carson. The city is historically interesting, and to speak of it is to conjure pictures of many of the famous men of the past who at one time or another lived here. Mark Twain came here as a young attache to the office of the first territorial secretary, and the old-timers will show you the house where came to live the brother of Twain after the fasting of the Aurora days. Then there is the grave of Hank Monk in the cemetery on the outskirts of the city and who has not heard of the famous stage driver and the ride he gave to Horace Greeley?

There are many valuable and renowned hot springs in the vicinity of Carson City, which attract thousands of tourists annually. Away back in the days when Carson City was known far and wide as the battleground of the two fighting gladiators, Corbett and Fitzsimmons, Carson Hot Springs (known then as Shaw's Hot Springs) was daily in the public eye, for here one of the greatest fighters chose to make his training quarters, finding it a most ideal spot.

Among the many points of interest within a few miles of the city, which should be viewed, if possible, is the Nevada state prison, situated on an excellent boulevard. Not only as a model penal institution is this place interesting, but because it is the site of some of the most wonderful discoveries of prehistoric life. Within the prison walls are found foot-

prints in the solid stone of the giant who in some day when the present site was a lake made his way along the shore, sinking deep into the mud and leaving imprints which have caused generations in centuries after to wonder at his stature and his strength. Here also are found many bones of mastodons.

Visitors are welcome to this institution and courteous guards will explain and show these relics of the bygone ages.

*Willard, Utah (pop. 577), is 12 miles north of Ogden on Great Salt Lake. It is a quiet old town whose streets are lined with poplars. It was started by the early Mormon settlers at the mouth of a canyon where a perennial mountain stream affords water for irrigation. The houses are surrounded with peach orchards and the growing of peaches and tomatoes is the principal industry. In the canyon back of Willard a stream leaps over in a beautiful water fall and disappears in the terraces below.

*Brigham, Utah (pop. 5,000, alt. 4,305 ft.), is situated at the western base of the Wasatch mountains 20 miles north of Ogden and near the northern shore of Great Salt Lake. It is noted for its peaches. In summer the town is almost completely hidden beneath peach trees which grow luxuriantly because every street has its irrigating ditch running the entire length of the street. Since 1907 Brigham has celebrated "peach day" early in September. On that day free peaches, plums and melons are given to the thousands of visitors to the town. Tomatoes are also grown in large quantities and a factory near the station cans in the height of the season 60-75 cars of tomatoes a day. Brigham was settled in 1853 and named for Brigham Young.

 Straight ahead is Route 691 to Montello.

Route 690 A—Brigham, Utah, to Montello, Nev.—149.0 m.

Reverse Route 319.

Via Corinne, Kelton cut-off, Lucine and Tecoma. This road passable only in dry weather. First 20 miles graded dirt; good dirt to Kelton, with some short rough stretches between Blue Creek Sta. and Kosmo; balance fair-to-good natural prairie road.

Traversing an irrigated farming country for the first 25 miles over level country, the tourist then crosses several low mountain ranges and reaches the Salt Lake basin 5 miles east of Kosmo. A good dirt road, permitting fast speed, is then followed across the mud flats adjacent to the lake to Kelton. From here on road winds over a rolling, barren sage brush district.

Kelton is the only place between Corinne and Lucine where accommodations and supplies may be had and tourists are cautioned to have enough gas and oil on hand to carry them for 60 miles.

 90.1 6.8 Halleck Sta., 3-corners; bear right away from RR. Pass court house on right 111.1—now on Idaho St.
 111.2 21.1 ELKO,* Idaho & 4th Sts.
 Straight ahead on Idaho St. is Route 693 to Winnemucca.

*Elko, Nev. (pop. 3,000, alt. 5,063 ft.), was settled by George F. Paddleford in December, 1868, and is an important mining, agricultural and stock raising center. The origin of the name is uncertain, but it is generally supposed to have been given on account of the large number of elk formerly found in this vicinity. The hot springs one and one-half miles west of the town were a favorite camping station on the old overland emigrant route, but the present town originated with the coming of the railroad in 1868. The railroad passes through the older part of the

town, which is built on the flood plain. The newer part forms the residence district and is located on the terrace north of the river. Agriculture and stock raising are the chief industries. A stage line runs from Elko to Tuscarora, a mining camp 50 miles north. Lone Mountain, another mining camp, is 28 miles north of Elko. At the hot springs west of the town there is a hotel with bath houses. There are several Indian reservations in Nevada and Indians may usually be seen around Elko. They are remnants of the Piutes, Shoshones, and other tribes.

Route 693—Elko to Winnemucca, Nev.—145.0 m.

Reverse Route 314.

Via Carlin, Battle mountain and Golconda. Mostly fair natural prairie road with some graded stretches first 45 miles, poor road thence to Battle mountain and for 16 miles west of same to Valmy Sta., good gravel over old RR grade to Golconda; balance fair natural prairie road. Summary: 27 miles good gravel over old RR grade; 62 miles fair-to-good natural prairie road; 56 miles poor road.

With the exception of some agricultural districts near Elko, this route traverses a sparsely settled sage brush country. Huge valleys are crossed and big mountain ranges are always in sight.

*Battle Mountain, Nev. (pop. 1,000, alt. 4,511 ft.), was named from the mountain to the southwest, where in the early sixties a band of gold-seeking emigrants under Captain Pierson fortified themselves when attacked by the Indians. The highest point of the mountain is known as Antler peak. The town is a distributing and shipping point for the Austin, Reese river and other mining districts and

the center of an extensive cattle and sheep raising district. Within a 20-mile radius are the producing mining camps of Maysville, Hilltop, Galena, Copper Canyon and Copper Basin. Deposits of lead, copper, silver and gold occur in the mountains on the southwest, and placer gold has been obtained on the south side of the mountain. About \$6,000,000 worth of ore has already been taken from these districts.

*Winnemucca, Nev. (pop. 2,500, alt. 4,347 ft.), is near the Humboldt river, 100 miles in a direct line west of Elko. The town was named for the chief of the Piute tribe of Indians and was originally a small trading station established in 1850 and known as French Ford on the overland emigrant route to California. Before the Oregon Short line was built it was the gateway to the whole of southern Idaho. The town supplies an extensive ranching and mining country, including Paradise valley on the northwest and Quinn river valley on the north. The narrow bottoms along the Humboldt produce bountiful crops of wild hay.

North of the town an area of 40 miles long from east to west and 8-10 miles wide from north to south is covered with sand dunes. These dunes are 75 feet high with the steeper slopes on the eastern side, which indicates that the whole vast field of sand is slowly moving eastward. The sand is a light creamy yellow and "form beautifully curved ridges and waves covered with a fretwork of ripples and many of the ridges are marked in a most curious manner by the footprints of animals which form strange hieroglyphics that are sometimes difficult to translate." From Winnemucca a stage line runs to the National mine 70 miles distant in the Santa Rosa range.

Route 695—Lovelocks to Reno, Nev.—97.6 m.

Reverse Route 312.

Via Wadsworth and Sparks. 60 miles of this trip are over an old RR grade with good gravel surface; 37 miles fair-to-good natural prairie road with some stretches of deep sand approaching Wadsworth. The worst places are usually kept strowed and no difficulties should be encountered.

After leaving an irrigated farming district adjacent to Lovelocks this route enters a barren desolate country, with no habitation or water until it reaches Wadsworth. From here it extends thru a partly irrigated valley along the Truckee river to Reno. This route joins the Lincoln highway just before reaching Wadsworth and is a section of the Overland trail, which is also part of the Pikes Peak Ocean-to-Ocean highway.

*Wadsworth, Nev. (pop. 800, alt. 4,077 ft.), is situated on the Truckee river 34 miles east of Reno. It is in a mining region. It is an old town and was one of the important stations on the original route of the Central Pacific, but the railroad now curves south of the town to secure a more even grade on the westward climb. Wadsworth was at one time a trading post and served as an Indian agency and fort.

The Truckee river, named in honor of an Indian guide of General Fremont, makes a bend to the north at Wadsworth and flows through a canyon for 20 miles to Pyramid and Winnemucca lakes, where its waters were formerly evaporated. Now by the government irrigation project (see Fallon) they are turned into the reservoirs of the Carson river and

used for irrigating the lands. Fishing in Pyramid lake is excellent. Three varieties of trout are caught here, some of which attain a weight of 30 pounds. At the mouth of the river is a reservation of the Piute tribe.

*Sparks, Nev. (pop. 3,500, alt. 4,225 ft.), is a city of Washoe county, 3 miles east of Reno on the Truckee river. It is the seat of Nevada state university and of the state asylum for mental diseases. There are mines in the vicinity. The town was named in honor of John Sparks, governor of Nevada, 1903-1906, and is the second city in population in the state. Trains make a stop of 15-20 minutes at the repair shops here, where a huge mountain-climbing locomotive is substituted for the ordinary type.

American Express Travelers Cheques

*Ely, Nev. (pop. 2,075, alt. 6,000 ft.), is practically the only large town between Salt Lake City and Reno on the Lincoln highway. It is one of the greatest mining centers in the country today, containing large deposits of copper, gold and silver. The largest copper pit in the world is located here and is well worth a visit from the tourist. A splendid free camping ground with light, water, grids for cooking and shower baths is maintained by the city for use of the tourist.

The wonderful piece of road work encountered out of Ely shows the eastern tourist what can be done by a few enterprising western men. Practically all of the road work on the Lincoln highway in Nevada is due to the efforts of Mr. G. S. Hoag, of Ely, and his associates. The tourist is advised while in Ely to call upon Mr. Hoag, who will cheerfully give him reliable information concerning any changes which have been made in the route since Blue Book representative covered it.

- 17.5 15.1 Fork; bear left. Avoid left-hand roads 22.3-31.5. Pass Hylton and Hanna Stores 33.1.

- 45.5 12.1 Fork; bear right. Avoid right-hand road 45.6 and left-hand road 46.2. Pass Sadler's Ranch 50.7. Avoid left-hand roads 52.1-53.6 and right-hand road 61.5.
- 106.0 60.5 EUREKA, court house on right.

Route 698—Ogden, Utah, to Pocatello, Idaho—150.2 m.

Reverse Route 702.

Via Brigham, Logan, Preston and McCammon. First 6.1 miles concrete; then 68 miles asphalt macadam; 333 miles good to fair gravel; then concrete to two miles past Logan; good gravel to Preston; 26.7 miles fair gravelly dirt; balance good gravel to Pocatello with some fine stretches where fast time is possible. Summary: 11 miles concrete; 7 miles asphalt macadam; 108 miles gravel and 24 miles dirt.

A thickly settled farming section is traversed by this route and supplies and accommodations may be obtained at several points. The road passes thru some pretty canyons and there is good fishing along the way.

- 40.4 0.1 End of road just beyond small concrete bridge; turn left.

*Willard, Utah (pop. 577), is 12 miles north of Ogden on Great Salt lake. It is a quiet old town whose streets are lined with poplars. It was started by the early Mormon settlers at the mouth of a canyon where a perennial mountain stream affords water for irrigation. The houses are surrounded with peach orchards and the growing of peaches and tomatoes is the principal industry. In the canyon back of Willard a stream leaps over in a beautiful waterfall and disappears in the terraces below.

*Brigham, Utah (pop. 5,000, alt. 4,305 ft.), is situated at the western base of the Wasatch

mountains 20 miles north of Ogden and near the northern shore of Great Salt lake. It is noted for its peaches. In summer the town is almost completely hidden beneath peach trees which grow luxuriantly because every street has its irrigating ditch running the entire length of the street. Since 1907 Brigham has celebrated "peach day" early in September. On that day free peaches, plums, and melons are given to the thousands of visitors to the town. Tomatoes are also grown in large quantities and a factory near the station cans in the height of the season 60-75 cars of tomatoes a day. Brigham was settled in 1853 and named for Brigham Young.

- Cross RR 40.7. Cross small iron bridge 40.8, turning right with road just beyond.

*Logan, Utah. (pop. 10,000, alt. 4,600 ft.), is situated on two plateaus, one above the other, at the base of the mighty Wasatch range. Dairying and agriculture are the principal industries and the country takes pride in its many pure-bred herds of cattle, the Holstein and Jersey predominating. Some of the finest hard grains in the world are also said to be raised on the dry farms in Cache county. Logan is an important educational center, having among its institutions of learning the state agricultural college, Brigham Young college and New Jersey academy. Logan temple, standing on the brow of the plateau just east of the business section, is a wonderful and interesting structure which attracts the attention upon first entering the valley.

*Smithfield, Utah (pop. 2,200, alt. 4,500 ft), was settled by the Mormons in 1859. Several

skirmishes were had with the Indians in the early days and the first settlers were obliged to live for a long time in a fort for protection. The town is located at the highest point in the picturesque Cache valley and is noted for its farming and dairy interests. Much sugar beet is grown in this section and the town has a splendid sugar factory.

*Preston, Ida. (pop. 4,200, alt. 4,721 ft.). Five miles north of this point, on a creek called Battle creek, the most important battle in Idaho was fought between government troops from Ft. Douglas under Colonel Conners and Chief Bear Hunter and his tribe. One of the largest electrical plants in the intermountain country is located a few miles northeast of town. The first railroad in Idaho was built thru Preston. Several warm springs are located about 4 miles northwest of Preston along the Bear river.

 HOTELS—Hotel Bannock, W. Center & Arthur Sts.
 GARAGES—Trist Automobile Co., 630-650 W. Center St.

Note (a) Route 698—Logan to Bear Lake, Utah—45.2 m.

Reverse Note (b) on Route 698.

Via Logan canyon. Gravelly dirt road all the way.

A good mountain road with no serious grades, but many narrow places where passing space is difficult to find. A large fund, however, has been appropriated for grading and widening, and work is to be started shortly.

Leaving Logan we soon enter a beautiful canyon by the same name and follow a rushing stream with many exceptional beauty spots to the summit of a majestic mountain range. A 6-mile descent brings the tourist to the shores of Bear Lake, a wonderful body of water, 5,900 feet above sea level and with an area of 140 square miles. Around the lake are located many resorts catering to the comfort of their visitors.

- 0.0 0.0 **LOGAN**, Center & Main Sts., court house on far left. Go east on Center St.
 0.2 0.2 Right-hand road at sign; jog right and left away from pavement.
 0.3 0.1 3-corners, old mill on left; bear left.
 0.8 0.5 Irregular 4-corners; bear left across bridge and follow winding road along stream thru beautiful canyon.
 5.3 4.5 Fork; bear left.
 12.5 7.2 Fork, just beyond small wooden bridge; bear left. Caution for sharp right

*Pocatello, Ida. (pop. 20,000, alt. 4,461 ft.), is the seat of Bannock county and the second largest city in the state. It is situated in the center of that portion of the Fort Hall Indian reservation thrown open to public entry in 1902. In the early days it was a trading and fur post. Today the largest wholesale dealers of the west have their warehouses here. It is the railroad terminal for six divisions, has complete construction and repair shops costing over two million dollars and a monthly payroll of nine hundred thousand dollars. The government has just recently completed, at a cost of more than a

million dollars, one of the finest irrigation systems in the west, for the irrigation of a large tract of land lying adjacent to the city.

The Idaho Technical Institute is located in Pocatello; twenty-five miles west of the city may be seen the American Falls, with its 42 ft. fall, while to the north are the towns of Blackfoot, Sheely and Idaho Falls, known as the greatest potato producing sections in the U. S. To the south are some of the most valuable springs in the west, among them being Lava Hot Springs, Heisse Hot springs and Soda springs, the latter being especially well known for its mineral water "Idan-ha," which is marketed all over the states.

- and left turn 18.2. Pass spring (fine water) in large cave on left 19.7.
 30.0 17.5 Fork; bear right. Ascend long grade 31.4. Reach summit of mountain range 35.2, descending long winding grade. Note wonderful view of mountains and lake 36.6.
 41.7 11.7 End of road; turn right and immediately left.
 41.9 0.2 Garden City, end of road. Turn right.
HOTELS—Ideal Beach, S. end of Bear lake.
 45.1 3.2 Left-hand road; turn left thru gate.
 45.2 0.1 BEAR LAKE.

Note (b) Route 698—Bear Lake to Logan, Utah—45.2 m.

Reverse Note (a) on Route 698.

Via Logan canyon. Gravelly dirt road all the way.
 A good mountain road with no serious grades, but many narrow places where passing spots are difficult to find. A large fund has been appropriated for grading and widening, and work is to be started shortly.
 Leaving the lake the road ascends on long steady grade to the summit of a mighty mountain range, from where a wonderful view of the surrounding country may be had. The descent is over easy grades along rushing mountain streams with many spots of exceptional beauty. Of particular attraction is the stretch thru Logan canyon, one of the prettiest of its kind in Utah.

- 0.0 0.0 BEAR LAKE. Go south.
 0.1 0.1 End of road, just beyond gate; turn right.
 3.3 3.2 Garden City, left-hand road, school on left. Turn left.
HOTELS—Ideal Beach, S. end of Bear lake.
 3.5 0.2 End of road; turn right and immediately left. Ascend long, winding grade 4.2. Reach summit of mountain range 10.0, descending long winding grade beyond. Pass spring (fine water) in large cave on right 25.5. Caution for sharp right and left turn 27.0. Curve right across small wooden bridge 32.7.
 42.2 38.7 Fork, reservoir on left; bear left.
 44.4 2.2 Irregular 4-corners; bear right.
 44.9 0.5 3-corners, old mill on right; bear right.
 45.0 0.1 End of road; turn left onto Center St.
 45.2 0.2 LOGAN, Center & Main Sts., court house on right.

Route 699—Pocatello, Idaho, to Yellowstone National Park, (Yellowstone, Mont.)—183.5 m.

Reverse Route 701.

Via Blackfoot, Idaho Falls, Rexburg, St. Anthony, Ashton. Gravel to Firth; dirt to Lorenzo; gravel to Sugar, and dirt balance of way. Between Marysville and Mack's Ranch the road is apt to be rough and rutted. Summary: 134 miles dirt; 49 miles gravel. One of the richest farming sections in Idaho is traversed by this route as far as Marysville, both dry and irrigated farms being successful. This region is thickly settled, several large and prosperous towns being on the route. Beyond Marysville the road enters the mountains and winds thru a pine forest most of the way to Yellowstone, passing several summer resorts and ranches of wealthy easterners. This part of the route lies in the Targhee National Forest and affords many good camping places and trout streams, altho it is rather thinly settled and supply points are not frequent.

- 0.0 0.0 POCATELLO, IDAHO, W. Center & Main Sts., bank on right. Go northeast on W. Center St.
 0.1 0.1 Cross long viaduct over RR yards and at end of road at far side of viaduct, turn right downgrade and then curve sharp-right, descending grade onto Center St., where keep ahead.
 1.0 0.9 12th Ave.; turn left.
 1.5 0.5 4-corners, just before end of road; jog right and immediately left thru irregular 4-corners. Avoid left-hand diagonal road 3.6. Avoid left-hand road 4.7. Turn left with road at Ft. Hall Indian Agency 11.2.
 12.6 11.1 Ft. Hall Sta.,* end of road. Turn left across RR and immediately right along same. Pass Gibbon Sta. on right 17.8. Turn left across small iron bridge with road 23.8.
 23.9 11.3 First right-hand diagonal road, sign on right; bear right. Avoid left-hand diagonal road 24.6. Cross RRs 24.8, coming onto paving—now on Broadway.

*Fort Hall, Ida. (pop. 1,960, alt. 4,444 ft.), is an Indian agency. The training school is located one mile south of the city and can be seen to the east of the Utah-Idaho-Yellowstone highway. Vocational and academic instructions are given here to the Indians, who are kept at the school from Sept. 1 to June 30 each year. The Indians of the agency farm about 10,000 acres of irrigable land annually

and sell about \$50,000 worth of cattle. The main irrigation canal is crossed by the highway two miles south of Fort Hall. The old Hudson Bay trading post, which was the first settlement in Idaho and probably the oldest west of the Rockies, was located 10 miles west of the agency in the Snake river bottoms. All that now remains of it are the mounds of earth where stood the old adobe buildings.

- 25.0 1.1 Blackfoot,* Broadway & Bridge St., bank on left. Turn right onto Bridge St. and then left at RR onto Main St. Cross RRs 25.4-26.5, avoiding left-hand diagonal road just beyond. Pass Wapello Sta. on right 30.9.

- 81.3 0.6 4-corners; turn right across RR, coming onto Main St. at small green in center.

*Blackfoot, Ida. (pop. 5,000, alt. 4,503 ft.), located at a point about eight miles north from the place where Blackfoot river and the Great Snake river join. It is just one mile north of the Fort Hall reservation and is one of the principal trading points of the Indians. The city came into existence because of its natural location for a stage station in the early 60's, and it has since grown to be one of the richest farming centers in the mountains. For many years Blackfoot was known as Grove City, because of its many trees.

*Idaho Falls, Idaho, (pop. 10,000, alt. 4,708 ft.), the county seat of Booneville county, and the commercial and geographical center of the irrigated district of the Upper Snake river

valley, is the largest town in the county and valley. It is the supply point of a country that extends out for a hundred miles in all directions. The potato growing industry of the west centers here, the annual shipments from the Idaho Falls district being more than 50,000 car loads annually. The Fort Produce Co. is operating here the first potato processing plant of its kind in the country. Millions of pounds of sugar, manufactured by the great factories in the valley, the largest of which is located at Idaho Falls, are also shipped from this point. Idaho Falls is the beginning of the Idaho Falls-Yellowstone highway from this city to the southern entrance of the Yellowstone park.

- 81.9 0.6 Rexburg, bank on right and left. Keep ahead.

 149.6 4.6 Left-hand diagonal road; bear left away from poles.
 152.2 2.6 End of road; turn left across small wooden bridge over Buffalo river and take right-hand road immediately beyond.
 153.9 1.7 Fork, at sign; bear left.
 Right fork leads to Uden's Ranch, $\frac{1}{4}$ mile.

*St. Anthony, Idaho (pop. 2,500, alt. 5,060 ft.), seat of Fremont county, was the original home of the Blackfoot tribe of the Shoshone Indians. This country was explored by Lewis and Clark on their famous expedition in 1805.

Power and electric light for the surrounding country is furnished by the falls of the Snake river in St. Anthony. This is one of the greatest seed pea producing regions in the world. The commercial club maintains a free camping ground for the use of tourists.

Avoid left-hand diagonal road 154.5.
Left at 154.5 leads to Trudes Ranch.

155.0 1.1 Fork; bear left.

157.2 2.2 Fork, sign in center; bear left.
Right fork leads to Big Springs.

Pass Mack's Ranch on left 158.3. Turn left across long wooden bridge over Snake river 158.4. Thru irregular 4-corners 158.5, keeping ahead up short, steep grade. Turn right with road passing ranch house on left 161.0.

162.0 4.8 Fork; bear right.

163.0 1.0 Fork; bear right.

164.9 1.9 Fork just beyond small wooden bridge; bear left. Pass Valley View Ranch on right 168.0. Thru ford 168.4.

169.3 4.4 Fork, sign in center; bear right.

Left fork at 169.3 leads to Lake P. O.
Sharp left at abandoned house 169.4 is Route 467 to Butte and Route 470 to Dillon.

Reach summit of Continental Divide, Idaho-Montana state line—173.3.

175.6 6.3 Right-hand road; turn right upgrade.

177.3 1.7 Irregular 4-corners; bear slightly right. Avoid left-hand diagonal road 177.7.

177.9 0.6 Diagonal 4-corners; bear left. Cross small wooden bridge over Madison river 178.4, passing camping ground just beyond. Avoid right-hand diagonal road 178.7.

178.9 1.0 Left-hand road; turn left onto straight road thru pines. Avoid right-hand road 183.2.

183.3 4.4 End of road; turn right.

Yellowstone National Park Detail Map, page 708.

183.5 0.2 **YELLOWSTONE, MONT.**, end of road at RR, P. O. on left.

GARAGE—Stewart's Garage, Main St., ½ Blk. W. of park entrance.
Left is Route 700 to Gibbon Sta.

Route 700—Yellowstone, Mont., to Madison Junction, Yellowstone Park, Wyo.—13.7 m.

Reverse Route 703.

The first five miles of this route are fine asphalt macadam and the balance is good gravel.

This route forms a connection between the western entrance of the park and the main park loop, joining the latter at Madison Junction, where, in accordance with traffic regulations, the tourist must turn right and can join Route 700A at mileage 38.9. There are, however, certain periods of the day when travel is permitted in both directions on most parts of the loop so tourists desirous of traveling against traffic may do so upon securing a permit from any of the ranger stations.

For information on these matters read the park rules and regulations—see index in front of book. Tourists are also advised to read the points of interest write-up before entering the park—see index.

YELLOWSTONE NATIONAL PARK.

The Yellowstone is the first, the largest and probably the most widely known of our scenic national parks. Its geysers are celebrated the world over for the size, power and variety of action, as well as number. In fact, there are more and larger geysers in the Yellowstone National Park alone than in all the rest of the world put together.

But the Yellowstone is supreme also in two other features. The Grand Canyon of the Yellowstone has no equal in the world for romantic beauty and for the wide variety and glory of its colors. The park itself, which contains 3,348 square miles, constitutes the largest and most populated game or wild animal preserve in the world. In no other large area inhabited by wild animals are conditions so favorable for increase, because in the Yellowstone no shot legally has

been fired at animals since the protection laws of 1894 were enacted. As a consequence, wild animal life has increased to an extent which, considering hunting by Indians, could not have been equaled in the early days. The animals also have become surprisingly fearless of man.

Motorists may enter the Yellowstone National Park from all four sides; from the north the road comes in by way of Livingston, on the east the new road from Cody gets the motorist in the park thru scenery of sensational variety and beauty; the road from the south comes in from the celebrated Jackson Hole country and within sight of the lordly Teton Mountains; the west entrance is at Yellowstone, Montana. A good road comes up from Salt Lake City and Ogden thru the Logan Valley to Pocatello,

Yellowstone Falls, Yellowstone National Park, Wyo.

Idaho Falls, Ashton and Yellowstone, and those entering at Yellowstone, making the complete loop of the park, may double back to Yellowstone and follow the famous West Gallatin Canyon into Montana. People going west on the Lincoln Highway, or any of the trails south of the Yellowstone Trail, will no doubt want to take the Cody entrance up the famous Shoshone Canyon to the eastern entrance of the park and over Sylvan Pass, joining "the loop" just north of Lake Yellowstone. There are some wonderful scenes on this road, especially Sylvan Pass and Shoshone Canyon. Shoshone Canyon rivals Yellowstone Canyon, with the water coming over the giant dam and dropping 326 feet below. The road from Cheyenne to Cody has been recently repaired, and should easily be made in three or four days.

The roads from all of the entrances lead by way of more or less scenically beautiful country to the central loop road of a hundred and forty miles, upon which are located the four great hotels and five permanent public

camp. This loop road also reaches the geysers, the canyon, the lake and the various other principal spectacles of the Yellowstone. These roads have been built by the War Department under appropriations granted from time to time by Congress over a long period of years and amounting in all to several million dollars. Up to August 1, 1915, no motors were permitted to enter the Yellowstone. At that time private motors were allowed to come in and traverse the park roads in one direction at stated hours of the day. With the passing of the horse-drawn stages in 1917, and the substitution of motor stages, travel restrictions have been so greatly modified that the motorist will find himself almost as free there as in any section of the United States.

The extraordinary hot water manifestations, including the geysers, the hot springs and formations, mud volcanoes, paint pots, and all the rest, while appearing in various widely separated sections of the park, are principally found grouped in three geyser basins in

Golden Gate Canyon, Yellowstone.

the central west part of the park. These are called the Norris, the Lower and the Upper Basins. The geysers exhibit a large variety of character and action. Some, like Old Faithful, spout at accurate intervals; others are irregular. Some burst upward with immense power. Others shoot streams at angles or bubble and foam in action. There are many hot springs of large size. The regions are grotesquely carved and gorgeously colored by the many colored mineral deposits found in the water. Marvelously colored hot spring, mud volcanoes and other strange phenomena are frequent. At Mammoth Hot Springs and at Thumb the hot water has brought to the surface quantities of white mineral deposits, which build terraces of beautifully encrusted basins high up into the air, often engulfing trees of considerable size. Over the edges of these basins pours the hot water. Microscopic plants called algae grow on the edges and sides of the basins in the hot water, painting the formations brilliant shades of yellow and red and pink. In cold weather the colors fade. When dry, the algae die.

The Grand Canyon of the Yellowstone River is one of the greatest spectacles. Its finest scenic part is the three or four miles below the Great Falls. The sides are a thousand feet deep and superbly colored. It is the veritable cameo of canyons. The principal views are from abutting precipices on the rim.

Standing on Inspiration Point, which pushes out almost to the center of the canyon, one seems to look almost vertically down upon the foaming river. To the south is a waterfall nearly twice the height of Niagara Falls. From that point to where you stand, and beneath you, widens out the most glorious

kaleidoscope of color you will ever see in Nature. The steep slopes are inconceivably carved and fretted by the erosion of the ages. Sometimes they lie in straight slopes at easy angles, from which jut high carved rocky prominences. Sometimes they lie in huge hollows carved from the side walls. Here and there rise rocky needles like cathedral spires.

The whole is streaked and spotted and stratified in every shade from the deepest orange to the faintest lemon; from deep crimson thru all the brick shades to softest pink; from black thru all the grays and pearls to glistening white. The greens are furnished by the dark pines above and the plunging river below. The blue is found in the dome of sky overhead.

Another interesting feature of the Yellowstone is its abundant wild animal life. It is the largest and most successful preserve in the world. Its 3,000 square miles of mountain and valley wilderness remain practically as Nature made them.

No tree has been cut except when absolutely necessary for roads or trails or camps. No herds invade its valley. Visitors for the most part keep to the beaten road, and wild animals have learned in the years that they mean them no harm. The only hunting is done with a camera. It is true that most persons who go to the Yellowstone see very little of the animals. This is because nearly all persons who are touring the park stick to the roads; but the quiet watcher on the trails may see deer and bear and elk and antelope to his heart's content; he may even see mountain sheep, moose and bison by journeying on foot or on horseback into their more distant retreats. In the fall and spring.

Courtesy Union Pacific R. R. Co.

Mammoth Hot Springs, Yellowstone National Park.

when the crowds are absent, wild deer gather in great numbers at the hotel clearings to crop the grass, and rangers' children feed them flowers. One of the diversions at the road builders' camps in the wilderness is cultivating the acquaintance of the animals. There are photographs of men feeding sugar to bear cubs while mother bear looks idly on. Thus, one of the most interesting lessons from the Yellowstone is that wild animals are fearful and dangerous only when men treat them as game or as enemies.

The grizzly bear is one of the shyest of animals and may be seen only with difficulty. It lives principally on roots, berries, nuts and honey—when honey may be had. It cannot climb trees like the brown bear. Its little ones are born in caves where bears hibernate thru the winter and are little larger than squirrels when they first come into the world.

The brown, cinnamon and black bears, which, by the way, are the same species, only differently colored—the blonds and brunettes, so to speak, of the same bear family—are quite different. They are playful, comparatively fearless, sometimes even friendly. They are greedy fellows and steal camp supplies whenever they can. The large meat wagons which supply the distant hotels and camps overnight are equipped with iron

covers because the bears used to rip off the wooden tops during the resting time and run off with sides of beef and mutton. One night, several years ago, teamsters drove three bears from the top of a single one of these big wagons.

This wild animal paradise contains 30,000 elk, several thousand moose, innumerable deer, many antelope, and a large, increasing herd of wild bison. There are two buffalo herds, one known as the tame herd, the other as the wild herd. The wild herd is a remnant, and one of the very few remaining remnants, of the enormous herds of wild buffalo which used to fill the west of the United States.

The motorist who goes to the Yellowstone with the intention to see wild animals and who will adapt himself to the conditions, will have no difficulty in seeing more wild animals in a state of nature than he will for all the rest of his life. Let his movements be leisurely and his bearing quiet and unobtrusive and the animals will very soon show themselves. It is not an uncommon thing for those who live in the Yellowstone to have wild deer enter their houses. In fact, after the rush of the summer visitors goes, deer come down in large numbers and graze like cattle on the lawns of the hotel. There are a very large number of smaller wild animals also. Foxes in large number abound.

FISHING IN THE YELLOWSTONE NATIONAL PARK.

Three watersheds originate within the limits of the Yellowstone National Park. All three are distinguished trout water. The greatest watershed, of course, is that of the Yellowstone River. This originates in Yellowstone Lake, the largest body of navigable water at that height and altitude. This is the river which makes the two great waterfalls of the park and surges thru the Grand Canyon. Lake and river and tributaries all abound in trout.

Trout of large size are caught from boats at the head of the river and anglers take them in large numbers at many points thruout its course, fishing from the shore. Tributary streams thruout the entire northwest part of

the park also abound in trout. The Lamar Creek and many others are celebrated fishing streams. The Snake River watershed, in the southern and eastern part of the park, has few anglers, although it contains some of the best trout water in America. In Shoshone Lake, Mackinaw trout are of a very large size. The northwestern part of the park is drained by the Madison River and its many tributaries. Very large native trout are taken on the fly in the Madison, and thruout this wilderness there is quite remarkable fishing which few visitors avail themselves of. There is excellent grayling fishing in some of these streams. Six varieties of trout in all flourish in the Yellowstone.

HOTEL AND CAMP LIFE IN THE YELLOWSTONE NATIONAL PARK.

The four hotels are handsome and luxurious. They stand at convenient intervals; each is provided with garage facilities and every convenience. Besides the hotels there are five very excellent tent camps at convenient intervals. The Yellowstone, more so probably than any other national park, is the ideal camp ground for those who wish to bring in their own tents and camping outfit. Thruout this large area there are innumerable camping grounds which will be assigned by the superintendent of the park. Many motorists bring in camp equipment with them on their cars and this method makes one wonderfully independent, as it is possible to camp for a day or two in many spots convenient for the sightseeing and the splendid fishing.

The day is coming when the Yellowstone will be the most populated of all our national parks, when it will be dotted with campers from north to south and east to west. The National Park Service is doing everything in its power to help the good cause.

When the magnificent Teton Mountains and the Jackson Hole country, lying just south of the border, are included in the National Park—and that day will surely come—the park's attractiveness will be largely increased. But as it is, these sections of the country can be used by motorists with just as great freedom as if they were already included within the boundaries. The road from the park south of Jackson's Hole is now generally good and nowhere really bad. There are no

mountains in the United States quite so spectacular in their majesty as the Teton range.

It will be seen that the popular idea that the Yellowstone is simply a reservation enclosing a number of interesting geysers is altogether false. In fact, the geyser basins, interesting though they are, unique though they are, constitute a very small part of the attractions of the Yellowstone National Park. The fact is that were there no geysers, were there no canyon, the wilderness in itself, with its splendid fishing waters, its wild animal life and its wide diversity of extraordinary scenery, would constitute one of the

most wonderful and attractive playgrounds anywhere in the world. It is a wonderland of the first order, but even if it were not a land of wonders its destiny still would be to become the greatest camp ground probably in America.

The motorist who is bent absolutely on seeing the sights of the Yellowstone, as quickly as possible and passing on, can, if he rushes, get thru his sights in three or four days; but the Yellowstone will be a hard place to leave for the motorist who enjoys life in an extraordinary section of the country and the beauty and wonders of an unusual mountain country.

YELLOWSTONE FOSSIL FOREST.

The fossil forests of the Yellowstone National Park cover an extensive area in the northern portion, being especially abundant upon the west side of Lamar River from about twenty miles above the junction with the Yellowstone. Upright fossil trunks are found nowhere else in the United States. The lo-

cality is known locally as Specimen Ridge. Also a small and accessible fossil forest containing a number of standing trunks is near Tower Falls. Just outside the park in the Gallatin Mountains, still another petrified forest, containing more than 35,000 acres, has recently been discovered.

Old Faithful Geyser, Yellowstone National Park.

Route 700A—Trip from Gardiner, Mont., Through Yellowstone Park and Return—146.9 m.

Via Mammoth Hot Springs, Norris Junction, Geyser Basin, Madison Junction, Thumb Ranger Sta., Canyon Junction and Tower Falls Ranger Sta. Over gravelly dirt and gravel roads all the way.

This is the famous loop trip thru Yellowstone Park, which takes in practically all the points of interest which can be reached by automobile. As a general rule, traffic on the loop is permissible in one direction only, counterclockwise, and tourists coming into the loop from any one of the four park entrances must move with the traffic to the desired exit. However, tourists desirous of traveling against traffic may do so upon obtaining a permit from any ranger station and also at certain periods of the day two-way traffic is permitted on most parts of the loop. For regulations concerning them see the index in the front of the book. Before making this trip tourists should study the park rules and regulations and the points of interest. Mileage Points

Yellowstone National Park Detail Map, page 708.

0.0 0.0 GARDINER, MONT., at stone entrance arch to park. Go southwest, entering Yellowstone Park.

When Blue Book car covered this, a temporary entrance a short distance east of the entrance arch was in use, but the regular stone entrance arch was expected to be in use by 1920. If by any chance the temporary entrance is still in use, tourists should set to 0.2 instead of 0.0 at the start to compensate for the difference in mileage between the two starting points.

Cross iron bridge over Gardiner river 1.5-2.9, crossing Montana-Wyoming state line just beyond.

4.1 4.1 Fork; bear right. Avoid left-hand road 4.5.

Left at 4.5 leads to Tower Falls.

This route after completing the park circuit comes in from left at 4.5. Tourists who have entered the park from the west, south or east entrances and who wish to continue on the circuit will reset their odometer to 4.5 at this point to complete their trip.

Avoid right-hand diagonal road 4.7.

4.8 0.7 Left-hand road, flag pole on right; turn left.

5.0 0.2 End of road, just beyond Mammoth Hotel; turn left upgrade, passing Liberty Cap on right immediately beyond.

5.2 0.2 Right-hand diagonal road at summit of grade; bear right at low concrete wall and numerous signs.

Straight ahead before this turn, leads to Mammoth Hot Springs Camp, also to Free Public Auto Camp.

Ascend long winding grade 5.4, passing Jupiter Terrace on right.

Right at 6.5 is trail leading to Snow pass.

Pass Bunsen Peak on left 7.4 and Hoodoos on left 7.7. Thru Silver Gate 7.8 and Golden Gate 8.6. Pass Rustic Falls in Glen Creek on left 8.8, entering valley just beyond.

At 8.9 a good view of the Quadrant mts. may be had ahead in the distance and of the Electric Peak on the far right (the highest mountain in the park, with an altitude of 11,175 ft.).

Pass Swan Lake on right 9.6. Cross small iron bridge over Gardiner River 12.1. Cross small iron bridge over Obsidian Creek just beyond camping grounds 12.5. Pass Willow Park on right 13.6. Pass Beaver Dam in Obsidian Creek on right 14.7 and Apollinaris Springs on left 15.4.

Right at 15.4 is Riverside-Willow Park Trail.

Pass camping ground on right 15.5. Pass Crystal Spring on left 16.2. Cross culvert over Obsidian Creek 16.7, keeping ahead along foot of Obsidian Cliff just beyond. Pass Beaver Dam on right 17.2 and Beaver Lake on right 17.4. Pass Roaring Mountain on left 20.3.

Roaring Mountain is one of the interesting phenomena of the park, altho it has not been as active in recent years as formerly. The numerous steam jets bursting from its sides and the hiss and roar of the escaping vapor are responsible for its name.

Pass Twin Lakes on right 20.8 and camping grounds on right 21.7. Pass Bijah's Spring on right 21.9. Pass Frying Pan Hot Springs on right 22.7. Pass camping ground on left 24.4, crossing small wooden bridge over Gibbon River just beyond.

24.6 19.4 Norris Ranger Sta. Keep ahead.

24.8 0.2 Norris Junction, fork. Bear right upgrade.

Left fork leads to Canyon Junction, forming a direct connection between opposite sides of the loop, two-way traffic being permissible at all times. This road is valuable to anyone who wishes to take a short cut across the loop, but the tourist should be careful to

travel in accordance with traffic regulations on rejoining the loop at Canyon Junction. The distance between the two junctions is 10.8 miles.

Come along Norris Geyser Basin 25.1. Pass Congress Pool on left 25.3 and Black Growler on right 25.4.

Norris Geyser Basin is one of the three geyser basins in the park and in order to see all the geysers, hot springs and pools, the tourists should leave the car and follow the foot-paths which are laid out across the surface of the basin.

Pass Minute Man Geyser on left 25.7 and Monarch Geyser about 75 yards over to left, passing numerous steam vents and boiling springs just beyond. Pass Big Blue Hot Springs on left 26.5, entering Elk Park immediately beyond. Pass camping grounds (good water) 27.1. Come along Gibbon river 27.4, following same. Pass Duck Rock in Gibbon river 27.7 and Chocolate Springs on banks of river 27.9. Enter Gibbon Meadows 28.3, good camping grounds on right.

Left at 29.1 leads to Gibbon Paint Pot, $\frac{1}{2}$ mile.

Pass Mt. Schurz on right 29.2. Cross small iron bridge over Gibbon river 29.8. Pass Beryl Hot Springs 30.2. Cross small iron bridge over Gibbon river 31.0 and concrete bridge over same 32.0—now in Gibbon Canyon. Pass Iron Springs on right 33.2 and Gibbon Falls on left 33.7.

Gibbon Falls, 84 feet high, is one of the prettiest water falls in the park.

Pass camping grounds with good water at foot of grade 34.0.

35.1 10.3 Gibbon Junction, right-hand diagonal road, abandoned camp on left. Bear right across small iron bridge over Gibbon river.

Straight ahead before this turn is the mesa road, which rejoins the main route at Firehole Cascades. It is a poor sandy road, which is almost impassable for automobiles.

Pass camping ground on banks of Gibbon river 37.7.

38.9 3.8 Madison Junction, fork. Bear left.

Right fork is Route 700 to Yellowstone.

Tourists entering from western entrance of park at Yellowstone, Mont., join loop at this point and must bear right, resetting odometer to mileage 38.9 and use the following data.

Yellowstone National Park Detail Map, page 708.

39.0 0.1 Left-hand road, just beyond small concrete bridge over Gibbon river; turn left upgrade.

When Blue Book car covered this, a new road was under construction, from mileage 39.0 to the Firehole Cascades. If this is completed, follow it, resetting to proper mileage again, after rejoining old road.

A short distance to the right at the bridge over the Gibbon river at 39.0, the Gibbon, Firehole and Madison rivers join.

Pass Firehole Cascades in the Firehole river 41.2, continuing along the river. Pass camp on left 43.0.

44.6 5.6 Fork at Fountain Ranger Sta.; bear left away from Firehole River, entering a valley.

Right fork is the Fountain freight road, which is not used for automobile travel.

Pass camping ground on left 45.1, crossing iron bridge over the Nez Perce creek immediately beyond. Come along Lower Geyser Basin 46.5. Pass White Sulphur Springs on right 46.8 and Mammoth Paint Pots on left 46.9.

In order to observe all the wonders of the Lower Geyser Basin, the tourist will have to leave his car and use the foot-paths upon the surface of the basin.

47.0 2.4 Fork; bear right, entering pines.

Left fork leads to Firehole Lake, Great Fountain Geyser, Surprise Pool and Dome Geyser. This is a very interesting side trip, altho over a rather poor road.

48.1 1.1 End of road; turn right upgrade. Curve left along Firehole river 49.3, passing Excelsior Geyser over to right across the river.

49.4 1.3 Fork; bear right across small iron bridge over Firehole river. Recross Firehole river 50.1, entering pines just beyond. Pass Biscuit Basin on right 52.7 and Gem Springs and Artemisia Geyser Crater on right 53.0. Avoid right-hand road 53.3.

Right at 53.3 leads to Morning Glory Spring.

- 53.5 4.1 Right-hand road, Riverside Geyser ahead on right; turn right across iron bridge over Firehole river, entering Upper Geyser Basin. Avoid right-hand diagonal road just beyond Grotto Geyser (on left) 53.7.

Diagonally right at 53.7 leads to Daisy Geyser, Punch Bowl Spring, The Spouter, Emerald Pool, Sunset Lake, Handkerchief Pool and Three Sisters. This side trip includes some of the most interesting sights in the Upper Geyser Basin. It is 2.1 miles in length, rejoining the loop at mileage 54.6.

Pass Giant and Oblong Geysers on left 53.8 and Castle Geyser on left 54.4.

- 54.7 1.2 Fork; bear left, passing Old Faithful Inn on right immediately beyond.

- 54.9 0.2 Old Faithful Geyser on left; keep ahead, avoiding right-hand road.

Old Faithful Geyser, the most interesting in the park, plays every 60 minutes, spouting to a height of 125 to 150 feet.

Pass Old Faithful Camp on left 55.0, entering pines just beyond. Cross small wooden bridge over Firehole river 55.5, ascending long grade immediately beyond. Pass Kepler Cascade in Firehole river on right 56.6. Recross Firehole river 57.2.

- 58.2 3.3 Left-hand diagonal road; bear left across small concrete bridge over Firehole river.

Straight ahead before this turn leads to Lone Star Geyser, $\frac{1}{4}$ mile.

Follow Spring creek, crossing same several times, and continue ahead in Spring Creek canyon. Pass U. S. Engineering Sta. on right 60.8. Norris Pass on right 62.8. Enter Craig Pass 63.2. Cross Continental Divide (altitude 8,240 ft.) and pass Isa Lake on left 63.5.

Isa Lake is located on the very crest of the Continental Divide, sloping toward both the Atlantic and Pacific oceans.

Start along winding descent 63.7, using caution for sharp turns. Cross iron bridge over Herron creek 64.3 and concrete bridge over De Lacy creek 64.7, ascending grade immediately beyond. Bear left with road at Shoshone Point 65.2.

From Shoshone Point 65.2 Shoshone Lake is visible in the distance over to the right.

Pass U. S. Engineering Sta. on left 68.3. Cross Continental Divide (altitude 8,345 ft.) 70.1, descending the Pacific slope of the divide.

Note at 72.8 beautiful view of Yellowstone Lake ahead in the distance.

- 73.8 15.6 Thumb Ranger Sta., on left; keep ahead, avoiding right-hand road and coming along shore of Yellowstone lake.

Right at 73.8 is Route 715, Vol. 10, to Dubols.

Tourists coming from southern entrance of park join loop at this point and must turn right, resetting odometer to mileage 73.8 and using following data.

Pass Hot Springs on shore of lake 73.9-74.3. Pass camping grounds on right 74.7, on left 75.3 and on right 76.3. Leave Yellowstone lake 78.5 and follow winding road thru the pines.

Note at 81.6 good view of Teton Mts. 50 miles to right.

Pass Knotted Woods on left 81.8. Caution for sharp left turn in middle of downgrade 83.3. Pass Natural Bridge on left 85.8. Curve left along shore of Yellowstone lake 86.9. Pass U. S. Fish Hatchery on right 88.9. Pass Lake Hotel on left 89.3. Pass Lake Camp on left 89.6.

- 89.8 16.0 Lake Ranger Sta. on right; keep ahead, leaving Yellowstone lake.

- 90.7 0.9 Fork, camping ground on right; bear left, following Yellowstone river.

Right fork is Route 683, Vol. 10, to Cody.

Tourists entering park from Cody join loop at this point and must bear right, resetting odometer to mileage 90.7 and using following data.

Pass rapids in Yellowstone river on right 93.8. Pass Mud

Volcano and Green Gable Springs on left 96.7. Enter Hayden Valley 97.1. Caution for sharp turn 98.2. Cross small concrete bridge over Antelope creek 98.4.

- 98.8 8.1 Fork; bear right. Cross small concrete bridge over Trout creek 98.9, passing U. S. Engineering Sta. immediately beyond.

Left fork at 98.8 leads to Sulphur mts.

- * Cross small wooden bridge over Alum creek 101.8 and concrete bridge over Otter creek 103.8. Pass River Gauging Sta. on right 104.0.

- 104.2 5.4 Fork; bear right.

Left fork leads to Public Auto Camp.

- 104.3 0.1 Fork, bear right; avoid right-hand road which crosses bridge over Yellowstone river just beyond.

Right across Chittenden bridge leads to Grand Canyon Camp, 0.8 mile, and to Artists Point, 2.0 miles; a beautiful trip which should not be missed as it is one of the best places from which to view the splendor of the Grand Canyon.

Pass Upper Falls of the Yellowstone River (109 ft. high) on right 104.7.

The best way to observe the Upper Falls is to descend the steps leading to the Observation Platform in the canyon.

- 104.8 0.5 Canyon Ranger Sta. on right; keep ahead. Avoid left-hand road at Canyon Junction 105.0.

Left at 105.0 is the Canyon Road to Norris Junction, which has two-way traffic at all times and forms a direct connection between opposite sides of the loop. It is valuable to anyone who does not wish to make the longer trip around by way of Tower Falls, but tourists must be careful to travel in accordance with traffic regulations when rejoining the loop at Norris Junction. The distance between the two junctions is 10.8 miles.

Cross long iron bridge over Cascade creek 105.1. Pass Lower Falls of the Yellowstone river on right 105.5.

The Lower Falls of the Yellowstone river is one of the beauty spots of the Grand Canyon. They are 308 feet high and steps lead down to them, where an excellent view can be obtained.

- 105.6 0.8 Fork; bear left.

Right fork leads to Inspiration Point and it is well worth the time of the tourist to visit the point as it affords a magnificent view of the Grand Canyon and the Lower Falls of the river.

- 105.8 0.2 Fork, Grand Canyon Hotel on left; bear right. Ascend long, steep grade (2.8 miles in length) 108.4, affording some wonderful views of the surrounding country. Avoid right-hand road at entrance to Dunraven Pass 111.9.

Right at 111.9 leads over the summit of Mt. Washburn; a good side trip with fine views from the summit of same (altitude 10,388 ft.). Some rather steep grades will be encountered, but there should be no trouble in negotiating them.

Cross summit of Dunraven Pass 114.9 (altitude 8,900 ft.), using caution for the narrow road along the mountain side. Pass camping ground on left 121.5, bearing right along Tower Creek just beyond, continuing downgrade. Pass steps on right leading to edge of Tower Falls 121.9. Cross small iron bridge over Tower Creek 122.0. Pass Palisades across canyon on right 122.3. Under Overhanging Cliff 122.4. Pass The Needles across canyon on right 122.6. Bear left downgrade 122.7, leaving Tower creek. Avoid left-hand diagonal road at Camp Roosevelt 124.1 and right-hand road 124.3.

Right at 124.3 leads to Buffalo Corral and Soda Butte.

- 124.5 18.7 Tower Falls Ranger Sta. on left. Keep ahead upgrade.

- 125.7 1.2 Fork; bear right. Cross small wooden bridge 125.8.

Left fork at 125.7 leads to Petrified Trees, 1.5 miles.

Ascend long winding grade 126.0, using caution. Cross small wooden bridge over Black Tail Deer creek 135.2. Pass Beaver Dam and huts in stream on left. 137.3 and Wraith Falls on left 137.5. Cross small wooden bridge over Lava creek 137.6. Enter canyon 138.0. Pass Undine Falls on right 138.3, continuing downgrade.

Note at 138.5 magnificent view ahead of Mammoth Hot Springs in distance.

Leave canyon 140.5, using caution for sharp left turn. Cross long iron bridge over Gardiner river 140.8, ascending grade immediately beyond.

This bridge over the Gardiner river is the highest and longest steel bridge in the park.

Pass U. S. Power Plants 142.3.

142.4 16.7 End of road at summit of grade; turn right downgrade.

This is where route rejoins the start of the loop. Left is the loop around park at mileage 4.5 and also leads to the west and south exits.

Cross Wyoming-Montana state line 144.0, crossing the Gardiner river just beyond. Pass Mt. Everett on right 144.2. Recross Gardiner river 145.4.

146.5 4.1 Fork; bear left.

146.9 0.4 GARDINER, MONT., at stone arch; exit from Yellowstone Park.

Route 701—Yellowstone National Park (Yellowstone, Mont.), to Pocatello, Idaho—183.5 m.

Reverse Route 699.

Via Ashton, St. Anthony, Rexburg, Idaho Falls and Blackfoot. Dirt to Sugar; somewhat rutted and rough between Mack's ranch and Marysville; gravel to Lorenzo; dirt to Firth and gravel balance of way. Summary: 134 miles dirt; 49 miles gravel.

From Yellowstone to Warm River Sta. this route winds thru the mountains in a pine forest most of the way, passing several summer resorts and ranches of wealthy easterners. Altogether, as a whole, this section is thinly settled and supply points are infrequent. This part of the route lies in the Targhee National forest and good camping sites and trout streams are numerous. Beyond Warm River Sta. the road enters one of the richest farming regions in Idaho, both irrigated and dry farms being successful, and passes thru several large towns.

*St. Anthony, Idaho (pop. 2,500, alt. 5,060 ft.), seat of Fremont county, was the original home of the Blackfoot tribe of the Shoshone Indians. This country was explored by Lewis and Clark on their famous expedition in 1805.

Power and electric light for the surrounding country is furnished by the falls of the Snake river in St. Anthony. This is one of the greatest seed pea producing regions in the world. The commercial club maintains a free camping ground for the use of tourists.

- 116.0 2.6 4-corners; turn right and left at first 4-corners just beyond.
 116.2 0.2 Rigby, flag pole in center. Keep ahead.
 116.4 0.2 End of street; turn right three blocks.

 170.9 12.4 Ft. Hall Sta.,* end of road. Turn left across RR and immediately right along same. Entrance to Indian agency on left 172.1. Bear right with road 174.1. Avoid right-hand road 178.8.
 182.0 11.1 Irregular 4-corners; turn right and at 4-corners just beyond, turn left onto 12th Ave.
 182.5 0.5 Center St.; turn right.
 Left on 5th Ave. at court house at 183.0 is Route 702 to Ogden.
 183.3 0.8 End of road under viaduct; turn right upgrade, then curve

*Idaho Falls, Idaho (pop. 10,000, alt. 4,708 ft.), the county seat of Booneville county, and the commercial and geographical center of the irrigated district of the Upper Snake river valley, is the largest town in the county and valley. It is the supply point of a country that extends out for a hundred miles in all directions. The potato growing industry of the west centers here, the annual shipments from the Idaho Falls district being more than 50,000 car loads annually. The Fort Produce Co. is operating here the first potato processing plant of its kind in the country. Millions of pounds of sugar, manufactured by the great factories in the valley, the largest of which is located at Idaho Falls, are also shipped from this point. Idaho Falls is the beginning of the Idaho Falls-Yellowstone highway from this city to the southern entrance of the Yellowstone park.

*Blackfoot, Idaho (pop. 5,000, alt. 4,503 ft.), located at a point about eight miles north from the place where Blackfoot river and the Great Snake river join. It is just one mile north of the Fort Hall reservation and is one

of the principal trading points of the Indians. The city came into existence because of its natural location for a stage station in the early 60's, and it has since grown to be one of the richest farming centers in the mountains. For many years Blackfoot was known as Grove City, because of its many trees.

*Fort Hall, Idaho (pop. 1,900, alt. 4,444 ft.), is an Indian agency. The training school is located one mile south of the city and can be seen to the east of the Utah-Idaho-Yellowstone highway. Vocational and academic instructions are given here to the Indians, who are kept at the school from Sept. 1 to June 30 each year. The Indians of the agency farm about 10,000 acres of irrigable land annually and sell about \$60,000 worth of cattle. The main irrigation canal is crossed by the highway two miles south of Fort Hall. The old Hudson Bay trading post, which was the first settlement in Idaho and probably the oldest west of the Rockies, was located 10 miles west of the agency in the Snake river bottoms. All that now remains of it are the mounds of earth where stood the old adobe buildings.

*Pocatello, Ida. (pop. 20,000, alt. 4,461 ft.), is the seat of Bannock county and the second largest city in the state. It is situated in the center of that portion of the Fort Hall Indian reservation thrown open to public entry in 1902. In the early days it was a trading and fur post. Today the largest wholesale dealers of the west have their warehouses here. It is the railroad terminal for six divisions, has complete construction and repair shops costing over two million dollars and a monthly payroll of nine hundred thousand dollars. The government has just recently completed, at a cost of more than a million dollars, one of

the finest irrigation systems in the west, for the irrigation of a large tract of land lying adjacent to the city.

The Idaho Technical Institute is located in Pocatello; twenty-five miles west of the city may be seen the American Falls, with its 42-foot fall, while to the north are the towns of Blackfoot, Sheely and Idaho Falls, known as the greatest potato producing sections in the U. S. To the south are some of the most valuable springs in the west, among them being Lava Hot Springs, Heisse Hot springs and Soda springs, the latter being especially well known for its mineral water "Idan-ha," which is marketed all over the states.

- 61.1 0.1 4-corners, large wooden church on right; turn left one block.
- 61.2 0.1 Clifton, end of road, store on right. Turn right.

- 68.7 1.8 Right-hand road, house on far right; turn right. Under high-tension line 70.1. Cross small iron bridge over Bear river 71.5, following long winding road upgrade.
- 74.0 5.3 Preston,* 4-corners, banks on left. Turn right. Pass Preston Sta. on right 74.3.
- 74.4 0.4 Left-hand diagonal road, just before RR; bear left away from trolley.
- 74.6 0.2 5-corners; bear left.
- 75.4 0.8 Irregular 4-corners at foot of grade; bear right.
- 76.9 1.5 End of road; turn left away from RR.
- 77.3 0.4 Whitney, end of road, P. O. on left. Turn right. Cross RR at Whitney Sta. 77.6. Cross RR 79.7.
- 81.5 4.2 Franklin, Idaho, fork at top of grade. Bear right along RR, passing abandoned stone house on right.
Left fork leads to business center, $\frac{1}{4}$ mile.
- 81.7 0.2 End of road just beyond switch; jog left and immediately right. Cross Idaho-Utah state line 82.9. Pass Webster Sta., Utah, on right 84.5. Pass Merrill's Sta. on left 86.1.
- 88.1 6.4 Richmond (business center two blocks to left). Straight thru across trolley.
- 94.1 6.0 Smithfield,* bank on left. Straight thru with trolley. Cross trolley switch 95.1. Thru prominent 4-corners 96.8.
- 101.5 7.4 Logan,* Main & Center Sts., tabernacle square on left. Straight thru on Main St.
- 102.7 1.2 Fork, water-trough in center; bear right. Cross RRs 103.7-103.9. Bear right with travel 108.9. Cross RR 109.5.
- 109.8 7.1 Right-hand road; turn right across small concrete bridge.
- 109.9 0.1 4-corners, stone house on left; turn left three blocks.
- 110.2 0.3 4-corners; meeting cross-trolley, turn right two blocks.
- 110.5 0.3 Wellsville, 4-corners, church and school on left. Turn left.
- 111.6 1.1 4-corners, log cabin on left; turn right two blocks.
- 111.9 0.3 4-corners, house on left; turn left, ascending grade into canyon. Caution for turns upgrade 119.0.
- 123.5 11.6 Mantua, small brick school on right. Keep ahead.
- 124.0 0.5 Right-hand road, sign on left; turn right. Enter Brigham canyon 124.5. Same thorofare becomes 1st Ave. S.

*Preston, Ida. (pop. 4,200, alt. 4,721 ft.). Five miles north of this point, on a creek called Battle creek, the most important battle in Idaho was fought between government troops from Ft. Douglas under Colonel Conners and Chief Bear Hunter and his tribe. One of the largest electrical plants in the intermountain country is located a few miles northeast of town. The first railroad in Idaho was built thru Preston. Several warm springs are located about 4 miles northwest of Preston along the Bear river.

*Smithfield, Utah (pop. 2,200, alt. 4,500 ft.), was settled by the Mormons in 1859. Several skirmishes were had with the Indians in the early days and the first settlers were obliged to live for a long time in a fort for protection. The town is located at the highest point in the picturesque Cache valley and is noted for

its farming and dairy interests. Much sugar beet is grown in this section and the town has a splendid sugar factory.

*Logan, Utah (pop. 10,000, alt. 4,600 ft.), is situated on two plateaus, one above the other, at the base of the mighty Wasatch range. Dairying and agriculture are the principal industries and the country takes pride in its many pure-bred herds of cattle, the Holstein and Jersey predominating. Some of the finest hard grains in the world are also said to be raised on the dry farms in Cache county. Logan is an important educational center, having among its institutions of learning the state agricultural college, Brigham Young college and New Jersey academy. Logan temple, standing on the brow of the plateau just east of the business section, is a wonderful and interesting structure which attracts the attention upon first entering the valley.

- 128.1 4.1 Brigham,* P. O. on left. Meeting trolley, turn left onto Main St., passing large brick church on left.
Right on Main St. is Route 690 to Snowville.
- 133.0 4.9 Right-hand diagonal road; bear right. Thru Willard* 135.3. Pass Hot Springs Sta. on right 140.3.

- 0.0 0.0 MADISON JUNCTION, WYO. Go west along Madison river (bear right if coming from Gardiner). Cross small iron bridge over Madison river 6.0. Pass Riverside Ranger Sta. on left 9.5. Cross Wyoming-Montana state line 11.6. Thru Christmas Tree Park 12.8.
- 13.6 13.6 Yellowstone Ranger Checking Sta., Mont., on right. Stop here and register.
- 13.7 0.1 YELLOWSTONE, sta. on left.
GARAGES—Stewart's Garage, Main St., ½ Blk. W. of park entrance.
Right is Route 701 to Pocatello.

Route 707—Salt Lake City, Utah, to Evanston, Wyo.—86.0 m.

Reverse Route 730.

Via Parley's canyon and Coalville. First 5 miles pavement; then graded gravel to summit of Parley's canyon; balance dirt, with a few rough stretches. Summary: 5 miles pavement; 20.1 miles graded gravel; 65.4 miles dirt.

The route traverses a hilly sage-brush and prairie country, with a few farming and some coal-mining districts. This is a section of the Lincoln highway.

A number of roads in this vicinity, including several of the main highways, will be closed for construction and repair work during the coming year. It being impossible for us to determine at the present time just which roads will be included in this construction work, we advise tourists to call upon Mr. W. D. Rishel, Secretary of the Utah Automobile Club, Commercial Club Building, Exchange Pl., opposite P. O., Salt Lake City, for the most recent information.

- 0.0 0.0 SALT LAKE CITY, E. South Temple & Main Sts, at Brigham

*Brigham, Utah (pop. 5,000, alt. 4,305 ft.), is situated at the western base of the Wasatch mountains 20 miles north of Ogden and near the northern shore of Great Salt lake. It is noted for its peaches. In summer the town is almost completely hidden beneath peach trees which grow luxuriantly because every street has its irrigating ditch running the entire length of the street. Since 1907 Brigham has celebrated "peach day" early in September. On that day free peaches, plums and melons are given to the thousands of visitors to the town. Tomatoes are also grown in large quantities and a factory near

the station cans in the height of the season 60-75 cars of tomatoes a day. Brigham was settled in 1853 and named for Brigham Young.

*Willard, Utah (pop. 577), is 12 miles north of Ogden on Great Salt lake. It is a quiet old town whose streets are lined with poplars. It was started by the early Mormon settlers at the mouth of a canyon where a perennial mountain stream affords water for irrigation. The houses are surrounded with peach orchards and the growing of peaches and tomatoes is the principal industry. In the canyon back of Willard a stream leaps over in a beautiful water fall and disappears in the terraces below.

Young Monument. Go east with trolley on E. South Temple St.

- 1.3 1.3 9th St., E.; turn right away from trolley.
 4.3 3.0 21st S. St., large brick school on left; turn left away from trolley. Pass small green on right 4.6, joining trolley. Pass State penitentiary on right 5.2. Turn right and left with road 5.5.
 5.6 1.3 Irregular 4-corners; turn right with poles.
 6.4 0.8 Right-hand road; turn right with poles, ascending winding grade along RR. Pass reservoir on right 8.3, entering Parley's canyon. Continue up long steady grade, using caution for blind curves. Cross RR numerous times. Pass Dale Sta. on right 12.8.
 14.3 7.9 Fork, sign in center; bear right, continuing along RR. Pass Barclay Sta. on left 17.5. Reach summit of Parley's pass 20.6, continuing along RR and descending grade. Cross RR 21.6.
 26.0 11.7 Prominent left-hand diagonal road; bear left with branch poles. Cross RR 26.4.

 67.4 16.6 Right-hand road; turn right across RR and immediately left along same. Thru Castle Rock 68.9. Jog left and right across RR 75.4. Pass Wasatch Sta., Utah, on right 76.3. Cross RR 83.6.
 85.5 18.1 3-corners; bear left onto 6th St.
 85.9 0.4 Main St., town hall on left; turn right.
 86.0 0.1 EVANSTON, WYO., Main & 5th Sts.
 Straight ahead is Route 709 to Rock Springs.

Route 708—Ogden, Utah, to Evanston, Wyo.—78.8 m.

Reverse Route 731.

Via Morgan, Henefer, Echo City and Castle Rock. Good gravel to Echo City; balance fair dirt, some of which is rough and cut up in places. Summary: 35 miles dirt; 44 miles gravel.

This route follows the beautiful canyon of the Weber river as far as Henefer, altho there are some places where the canyon widens out and assumes the proportions of a valley, towns being located at these spots. From Henefer to Echo City the road winds thru a fertile valley and the balance of the way leads thru the pretty Echo canyon, with some beautiful scenery. The route traverses a fertile country and supply points are frequent.

GARAGES—Lincoln Highway Garages, C St. at 2nd, on Lincoln Hgwy.
Western Auto Transit Co., C St., 1½ blocks south of railroad.
Straight ahead on C St. across RRs is Route 710 to Rawlins.

Route 710—Rock Springs to Rawlins, Wyo.—113.8 m.

Reverse Route 728.

Via Point of Rocks and Wamsutter.

Natural prairie road with long stretches of graded dirt, several miles of which are over an old railroad grade, very rough and with numerous bad culverts requiring caution. The road is only fair at its best and rather slow, tho there are several fast good stretches. It is a section of the Lincoln highway and extends thru a sparsely settled sage-brush country.

Accommodations are to be had only at Wamsutter with emergency supplies at store in Point of Rock. The water at both Point of Rock and Wamsutter is slightly alkali, but a fine spring is passed twenty miles beyond Wamsutter, the first really good and enjoyable drinking water before Rawlins is reached. The spring is about 200 yards north of the road.

- 73.6 1.7 Left-hand road, ranch on left, Kansas Valley lake on right; turn left. Cross bridges over irrigation ditches 74.8-75.6.

POINTS OF INTEREST, LARAMIE, WYO.

Laramie (pop. 9,000, alt. 7,165 ft.) is situated on the famed Laramie plains. It was founded with the building of the Union Pacific railroad near the location of old Fort Sanders, and the surrounding mountains and hills were the scene of many desperate engagements with Indians in the early days. For many years stock raising was the principal industry of the Laramie plains, but lately many natural deposits of volcanic ash, soda, graphite, epsom salts, plaster of paris, and the various clays have been uncovered in the valleys, as well as ores of the precious metals in the mountains. All the ingredients for the manufacture of glass are found within a short radius

and the Great Western Plate Glass works have erected the necessary buildings for the manufacture of this product. Oil is also being developed to a large extent.

In Laramie is located the state university with its several colleges, the state normal school, school of mines and engineering, and a U. S. agricultural college and experiment station. In the Sand Creek region, near the city, is a wonderful work of nature in stone and sand pillars, and one imagines he is approaching a city of ancient architecture when at a distance. This section is well worth the detour of the autoist to see the action of time, tide and winds on these rocks.

- 76.7 3.1 End of road; turn right with poles. Cross numerous small bridges over irrigation ditches 79.2-81.4, using caution. Turn right with road across ditch 83.5, one block.

- 124.0 19.2 Grand Ave.; turn right one block.
- 124.1 0.1 LARAMIE, Grand Ave. & 2nd St., bank on right.

Route 714—Laramie to Cheyenne, Wyo.—59.0 m.

Reverse Route 726.

Via Tie Siding, Buford and Granite canyon. Graded dirt and gravel to Tie Siding, then rough rocky stretches for ten miles and balance graded and natural gravelly road. Summary: 49 miles dirt and gravel; 10 miles rocky road.

The route traverses the gently rolling Wyoming prairies, for the most part following the general course of the RR crossed at Red Butte Flag Sta. to Tie Siding. For the next ten miles the road ascends the west slope of Sherman Hill and is both rough and rocky. At mileage 26.0 and $\frac{1}{4}$ mile to south of road is to be seen the Ames monument, erected in 1868 to commemorate the highest point on the Union Pacific RR. The highest point reached by the route is a mile and a half this side of Buford, where an elevation of 8,132 feet is attained. One of the greatest gravel pits in the west is that near Buford, supplying the ballasting material for several of the western Union Pacific divisions. The balance of the way the route descends over 2,000 feet over Sherman Hill, all of it very gradual, except a few short pitches entering and leaving gullies near Granite canyon. This is a part of the Lincoln highway.

The first ten miles from Laramie was being graded, straightened and widened when the Blue Book car passed thru and should be in good shape for the 1920 season.

POINTS OF INTEREST, CHEYENNE WYO.

Cheyenne (pop. 16,000, alt. 6,088 ft.), the capital of Wyoming, is on the eastern slope of the Laramie range of mountains. Coal and iron are found in the vicinity of Cheyenne, and it is one of the chief cattle centers of the west. Adjoining it on the northwest is Fort D. A. Russell, one of the greatest military posts in the U. S., established as an outpost of civilization in 1867. From a garrison built of logs it has expanded to one of brick and stone, containing several thousand troops. Maneuver grounds, covering an immense area, are located a short distance from the fort.

Broad streets and boulevards, well made and well kept, are a pride in Cheyenne, as are also its parks. Great attention is given to what is known as the boulevard system, which is a series of driveways to the north of the city connecting with the fort.

This track lies within Frontier park, where annually the big frontier celebration is held, attracting thousands of spectators from all parts of the globe. If for no other reason, Cheyenne has become popular thru this alluring exposition of frontier skill and courage, participated in by thousands of cowboys, cowgirls, Indians and others. For four days during the month of July each year the gamut of wild west sports and pleasures are presented in the daily program, a spectacle well worth seeing.

Tourists coming to Cheyenne are provided ample recreation. Game is plentiful in the hills and the streams are alive with trout. There are the unexplored caves in Table mountain and the monument at Cheyenne pass, marking the old Oregon trail and the graves of the immigrants. This was the pass thru which the people had to go to get to California in the days of the gold fever. There is a fine spring of drinking water at the mouth of this pass which is quite an attraction and the presence of which made this a point of vantage to the early settlers. The city dam is another interesting sight. These points are between 25 and 30 miles away.

On the Lincoln highway, west of Cheyenne, may be seen the Ames monument, erected to the memory of Ames brothers whose genius made the Union Pacific R. R. possible. On a side track south of the Ames monument is Idaho Falls, a wild glen with water falls. At Granite Springs, on the Union Pacific, is obtained the water used on all the Union Pacific R. R. dining cars. East of the city 8 miles is the big government co-operative experiment farm, and southeast of Cheyenne 15 miles is the Natural Fort, a picturesque spot. Other points of interest are the state capitol building, the big Union Pacific shops and the old stage coach barn, to which all the gold of the Black Hills was brought in the early days.

Route 716—Cheyenne, Wyo., to Denver, Colo.—114.7 m.

Reverse Route 725.

Via Greeley. Gravel and dirt roads all the way, with the exception of the last few miles into Denver, which are concrete.

The greater part of this route passes thru northern Colorado's agricultural district. This is the best and most popular route between these terminals.

Denver-Pueblo Section

POINTS OF INTEREST, DENVER, COLO.

Denver (pop. 254,000, alt. 1 mile), the most famous of the mid-western capitals, commands a beautiful view of the Rocky mountain range, with Pikes Peak on the south and Long's Peak on the north. To the east is the vast expanse of the great American plains. Northward the fertile valley of the Platte stretches away until it becomes a part of the wonderful agricultural section of northern Colorado that, in a few years, has been transformed by irrigation from a sandy waste into one of the most prolific agricultural districts of the world, and again to the south the country is rolling and dotted with well cultivated farms watered by a high-line canal. The climate here is dry and healthful. In summer the nights are always cool, and altho considerable snow falls during the winter, there are many days that are warm and delightful. The sun shines on an average of 345 days in a year.

Founded by gold diggers, Denver has grown in half a century far beyond the wildest

dreams of the most imaginative of the early pioneers. The first settlement was Montana, at the mouth of Dry creek. This consisted of a party of gold-seekers, who located there in 1858. But previously, in 1857, John Smith, a trapper and trader, built a cabin near what is now the corner of Eleventh and Wewatta streets, in the Platte river bottoms. Two other cabins were erected the following summer near the Smith cabin. These cabins became the nucleus of the town of Auraria, which was organized in October, 1858. The location was on the west bank of Cherry creek, near its junction with the Platte river. An unsuccessful attempt was made to organize the town of St. Charles on the east side of Cherry creek, in the territory now embraced by East Denver, in September, 1858. In the following November, however, the town of Denver was incorporated on the same spot where St. Charles had failed. The new town was named after General James W. Denver, then governor of Kansas Terri-

tory. Six days later, with a full set of officers, Denver began its historical and brilliant career. Later the town of Auraria became a part of Denver and is now known as West Denver.

Denver may well be called a city of lights, so high a state of development has been reached in the lighting system; the main business thoroughfares in the early part of the night are almost as light as day. On each side of Fifteenth, Sixteenth and Seventeenth streets, the main arteries of trade, the city has erected ornamental light poles of wrought iron, the plan being different on each street. Seventeenth street is known as the "National Thoroughfare," as it begins at the very portals of Union station. At the edge of the depot grounds stands "Welcome Arch," constructed of bronze and iron. It is 86 feet wide, 65 feet high and has 2,000 incandescent lights. It was built in 1906 by a popular subscription, costing \$22,500. The side fronting the depot is emblazoned with the word "Welcome" and the reverse side with the word "Mizpah" (The Lord watch over thee)—an adieu to those who are leaving the city.

Denver has many men of great wealth, both retired and in active business, who have built magnificent mansions of brick and stone for their families. Palatial homes of men who started out without a penny and cast their lot in this western country in the earlier days are now scattered all over Capitol Hill and other residence districts, and to anyone having the time a trip over these streets and avenues would be well worth while.

Denver has many beautiful parks, the largest of these being City park. It contains 320 acres and was purchased as raw land from the state in 1879. This park is a splendid

example of what can be accomplished in the way of creating a beauty spot on land that only a few years ago was covered with cactus and buffalo grass and devoid of trees. It has two lakes, an extensive zoo, a fine aviary and a splendid museum of natural history. In the center of the larger of the two lakes is a magnificent electric fountain, which cost \$20,000 and which displays its beautiful combination of colors every evening in summer. In the park are beautiful driveways lined with trees and shrubbery, and flower beds that are not surpassed in any park in the world. The wonderful sunshine of Colorado imparts to the flowers a richness of hue that is the marvel of visitors.

Denver is the chief supply center for the agricultural, stock raising and mining regions of Colorado and New Mexico, and in the vicinity are some of the most extensive smelting works of the country, the value of ore treated by which amounts to between \$20,000,000 and \$30,000,000 annually. Denver also has important manufacturing industries, which comprise canning and packing, manufactures of iron, steel, glass, paper, shoes, flour, cotton and woolen goods. The city contains the car shops of the D. & R. G. and the Col. & Sou. Rys. It is an important railway center and the emporium of the rich gold and silver mining districts of the state, as well as chief center of the coal trade.

There is so much in and about Denver that the tourist deems it almost his duty to see that many days can be profitably and enjoyably spent here. Space will not permit of our describing each of these varied attractions, but among the many points of interest special mention might be made of the following:

State Capitol, standing at the crest of a slope that is the west slope of Capitol Hill.

State Capitol, Denver, Col.

The grounds, valued at \$1,000,000, cover three full squares, with one of the finest lawns in the world. The building is constructed of Colorado granite and is massive. It is finished inside with bronze and Colorado onyx, with a great gilded dome that is artistically lighted at night. This edifice cost \$2,800,000, exclusive of the site.

State Museum, across the street from the Capitol, houses the state bureau of mines, the state historical society's wonderful anthropological collection, the war relief museum, and the state bureau of agriculture and horticulture. An interesting exhibit is maintained, open free to visitors.

New postoffice, said to be the most beautiful postoffice in the United States. Built of Colorado marble.

United States mint, one of the largest and most modern mints in the country. Open to visitors from 10:00 a. m. to 3:00 p. m. daily, except Sunday.

Library, a magnificent building which forms part of the civic center.

Denver courthouse was completed in 1883 at an approximate cost of \$300,000. The sandstone of which it is constructed was taken from a quarry near Canyon City, Colo.

The Auditorium, finished in time for the Democratic national convention in 1908, has a seating capacity of 10,000, and was erected at a cost of \$537,000.

Pioneer Monument (MacMonnies Fountain) was completed in 1910 at a cost of \$75,000, raised by popular subscription. The crowning figure is the statue of Kit Carson.

Baker Homestead, a historic spot on W. Colfax avenue near the Larimer street viaduct, about a mile west of the city hall, was a meeting place for the plainmen in the early days, and Indian powwows were not infrequently held here. A landmark of pioneer days is the log cabin of William H. Clark, a 58'er residing at 5041 Pearl street.

There are many ways to reach the mountains quickly from Denver. More than one hundred short excursion trips may be made from this city by motor, train or trolley, into the mountains. Just beyond the flat-topped foothills are the mountain parks, made accessible by wonderful automobile roads. You can get to the mountain parks by auto to Golden, the seat of the Colorado school of mines, and by auto to the top of Lookout mountain. The new Mountain Parks automobile road takes one past Wild Cat Point and over Lookout mountain around Genessee peak, thru Bergen park, and on nine miles to Idaho Springs. The road is laid on a shelf, chiseled out of solid granite, and altho at times it skirts the brink of a precipice, it is safe as a city boulevard, being protected by stone walls and steel cables.

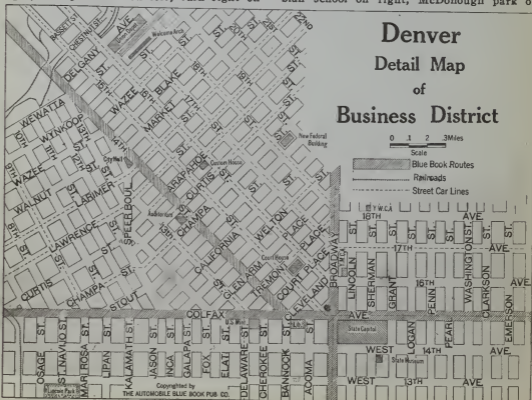

Tourists should have the pleasure of a visit to the Rocky Mountain National park, more familiarly known as Estes park, one of the grandest spots in this region. Mt. McClellan, Georgetown Loop, Moffat Road, Mt. Morrison, Palmer Lake and Boulder are some of the popular points that are numbered among the one-day railroad trips out of Denver, and many of these can be reached by auto over good roads in even shorter time.

Trip Through Denver and Environs.

(Distance, Not Including Trip to Genesee Mountain and Colorow Point, 63 Miles.)

Leaving state capitol, Pioneer monument, civic center, Carnegie library and mint, one block west. North on Broadway, passing Denver motor club. Cross Welton and down 19th street, East Denver high school on right, new postoffice on left; turn right on

*Littleton, Colo. (pop. 1,500, alt. 5,358 ft.), is the county seat of Arapahoe county, which, at the time of the discovery of gold in July, 1858, embraced a great deal larger territory than the present county. Located near Littleton is the largest game preserve in the world. On the west bank of the Platte river, between Littleton and Fort Logan, stands a log cabin erected in 1859 by Sam R. Brown. It is a suggestive reminder of bygone days.

*Palmer Lake, Colo. (pop. 600, alt. 7,229 ft.),

situated on the "top of the divide" is, next to Manitou, the most celebrated resort in this state. With its additions of Glen Park and Pine crest, it offers the tourist a variety of attraction. Elephant Rock, Dome Rock, Balanced Rock, the Perpetual Ice Cave, which has never been fully explored, the Camel, the Saddle Horn, the Beaver Dams and the Courts are all very interesting sights. Palmer lake itself has two outlets, one at the north end and one at the south.

Colorado Springs Colo.

POINTS OF INTEREST, COLORADO SPRINGS, COLO.

Colorado Springs (pop. 29,078, alt. 6,036 ft.) lies on the sheltered plateau just east of Pikes Peak. The town was founded July 31, 1871, by General William Jackson Palmer, and is the central gateway to the mountain country. It is a tourist town of the first rank and is visited annually by more than 150,000 strangers. The summers are cool and delightful, and the winters, contrary to somewhat general impression, are mild and invigorating. There is hardly one day in the year that the automobile owner cannot drive his car with pleasure. The region is world-famed as a health resort. In and not far from the limits of the town are several sanatoria—the Glocker, Cragnor, Star Ranch and the national sanatorium of the Modern Woodmen of America. Other notable institutions are the Union Printers' home, the Myron Stratton home and the Colorado school for the deaf and blind. Among its educational institutions is Colorado college, the oldest and recognized as one of the best institutions for higher learning in the west. It was founded in 1874 and has recently completed an endowment fund of \$1,000,000. Monument park to the north and Cheyenne mountain to the southwest are romantic spots loved by "H. H.," Mrs. Helen Hunt Jackson. "My Garden," 4½ miles southwest of Colorado Springs on the slopes of the Cheyenne mountain, was a favorite retreat of the gifted authoress; it was here that she was buried, but the body was later removed to Evergreen cemetery.

In the Pikes Peak region there is said to be a greater variety of wonderful scenery, more easily accessible, than in any similar area on the American continent. Development of good roads has within the last few years made feasible to the automobile tourist

many wonderful mountain trips. Colorado Springs is on main traveled highways, both north and south and east and west. The Pikes Peak Ocean-to-Ocean highway, which traverses the central section of the U. S., enters the mountain range via Ute Pass at this point. The Colorado-to-Gulf highway, from Galveston and Corpus Christi, has Colorado Springs as one of its main objective points. It is easily reached by way of the new Santa Fe trail from Pueblo, the Lincoln highway from Denver, the Rainbow route from Canon City, and many other roads of interstate character. Radiating from Colorado Springs are many automobile roads, varying in length from a few miles to several hundred, and affording circle trips of great interest and variety. The city of Colorado Springs has set aside Prospect Lake park as a public free camping ground for automobile touring parties. Colorado City (annexed to Colorado Springs in June, 1917) and Manitou also have provided public camping grounds.

Five miles southwest of Colorado Springs is Stratton park, a natural spot beautified by the late multi-millionaire, Winfield Scott Stratton. It is at the entrance to the Cheyenne canyons. South Cheyenne canyon, about a mile long, is very beautiful and wonderful. Its entrance is guarded by the Pillars of Hercules, and the canyon ends abruptly at the Seven Falls, to the top of which a series of steps lead, giving the spectator an opportunity to get a close view of the Bridal Veil and others of the Seven Falls. North Cheyenne canyon is a part of the public park system; it is longer than its sister canyon and has a grandeur all its own. At the head of the canyon has been constructed a road leading over the ridge and down

through Bear Creek canyon. This drive is known as the High Drive and in panoramic views of mountains and plain it has few equals. Broadmoor, at the foot of Cheyenne mountain, is a fashionable residence section, noted for its many mansions and its new \$1,000,000 hotel and golf course.

The Garden of the Gods is a great natural park of several hundred acres, celebrated in song and story. The immense tract is crowded with wonderfully and fantastically shaped formations of red sandstone. Two large rocks form the gateway, an impressive handiwork of nature. The rocks rise to a height of 330 feet; inside are the Cathedral Spires, symmetrical and standing out in bold relief. Other noted rock groups are: Siamese Twins, Toad and Toadstools, Bear and Seal, and Gates Ajar. On the face of one of the rocks are carved the names of H. Hunt, A. C. Wright, J. Hinman and others of the Lawrence party that came to the region in 1858. The Garden of the Gods has recently been given to the city of Colorado Springs, as a public park, by the heirs of the late Charles Elliott Perkins. Adjoining the Garden of the Gods is Mushroom Park, whose most noted formation is the Balanced Rock. Also adjoining is Glen Eyrie, the vast mountain estate of the late Gen. Wm. J. Palmer, and his former home. This is now open to the public and offers a most unusual attraction.

A trip to the Manitou Cliff Dwellings, through Phantom Cliff canyon and over the newly constructed Manitou Skyline Drive into Williams canyon, can conveniently be taken in connection with the drive through the Garden of the Gods. A visit to the cliff dwellings is highly instructive and educational and in connection with the picturesque new auto drive is one of the best of the trips in the Pikes Peak region. Indians gave their native dances at the Taos Indian Pueblo and a museum of cliff dwellers' relics affords an hour's interesting study.

In Williams canyon which opens directly into the town of Manitou, just north of the Soda Springs, are castellated limestone walls, different in coloring and in structure from those of the other canyons of the region. On the sides of the canyon, reached by carriage over the famous Temple Drive, is the Cave of the Winds.

Ute Pass is the theme of many an historic or legendary tale. A well worn trail, made by the moccasined feet of Ute Indians, is said by historians to have been cut down this pass hundreds of years before Columbus discovered America. It was through this pass that the tide of gold-seekers swept over the range in the early days of Leadville and Aspen. Today the road has been rebuilt by convict labor and is a part of the Pikes Peak Ocean-to-Ocean highway which crosses central Colorado. Rainbow Falls is about one mile above Manitou. One of the most famous automobile roads in the Rocky mountains is the Crystal park auto road to Crystal park.

Colorado Springs boasts the most unique park system in America. It comprises in all 2,600 acres and includes, besides the Garden of the Gods and Northern Cheyenne canyon,

already mentioned, Palmer park, a series of rugged bluffs northeast of the city, accessible to automobiles and commanding magnificent views of the mountain range; Monument Valley park, in the heart of the city; and several auto boulevards and numerous mountain trails.

Another of the famous trips by rail from Colorado Springs is that by way of the Short Line to Cripple Creek. In addition to its scenic grandeur, it has the added interest of affording a visit to the world's greatest gold camp. The Mt. Manitou scenic railway leads from Iron Springs at Manitou to Mt. Manitou park.

Just west of Colorado Springs stands Pikes Peak, which has been the center of attraction for so many years in Colorado history. On Nov. 15, 1806, Zebulon Pike got the first glimpse of what he called "The Great White Mountains," which afterwards was named Pikes Peak in honor of its discoverer. A week later his expedition reached the forks of the river at the present site of Pueblo. After establishing a camp, Pike and three companions started on the afternoon of November 24, with an idea of ascending the mountain. Pike's experience in judging distance in Colorado was the same as every other newcomer's. He greatly underestimated the distance to the peak, and after traveling $2\frac{1}{2}$ days, he came to the summit of an intervening mountain, where he made the following entry in his journal: "Arose hungry, dry and extremely sore from the inequality of the rocks on which we had lain all night, but was amply compensated for toil by the sublimity of the prospects below." He ventured the prediction that human foot would never rest on the summit of the mountain, but succeeding explorers found an easier means of approach.

The Peak was first ascended by Dr. Edwin James and three other men belonging to Long's expedition, on July 13 and 14, 1819. In July, 1858, gold was discovered in the South Platte and in the stream beds of its tributaries. The following spring saw a great migration of gold-seekers bound to reach Pikes Peak or "bust." This was the common name of the region until the new territory of Colorado was organized in 1861. In 1873 the United States government established a meteorological station on the summit of Pikes Peak. In October, 1890, the Manitou & Pikes Peak cog-wheel railway was finished, and the first passenger train made the trip to the top on June 30, 1891. Pikes Peak is the best known of all American mountains. While not the highest peak in the Rockies, its pre-eminence is due to the fact that it rises abruptly from the plains and is so much higher than all surrounding mountains that it affords a view of unbounded sweep and unusual grandeur. It is truly the "Sentinel of the Rockies." The Pikes Peak auto highway, which is the highest automobile road in the world, was opened to traffic in the summer of 1916.

The Colorado Springs Chamber of Commerce has ground floor headquarters in the Independence Building, 121 East Pikes Peak avenue. It maintains a bureau of information for automobile tourists.

Route 722—Colorado Springs to Pueblo, Colo.—42.6 m.

Reverse Route 735.

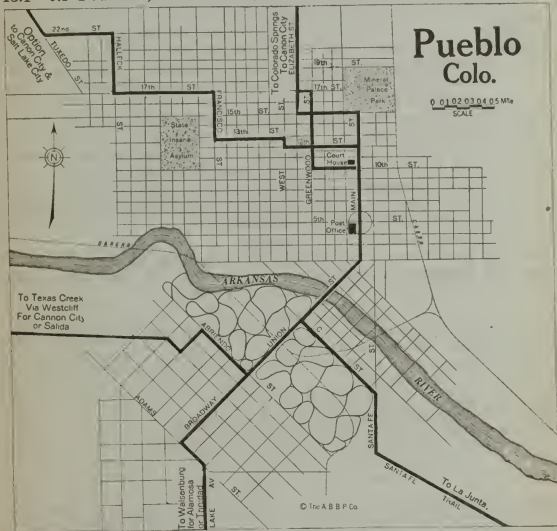

Via Fountain. Good gravel roads entire distance. This road follows the RR all the way, thru a farming country along eastern base of the Rockies and within sight of Pikes Peak.

This is a section of the Colorado-to-Gulf highway.

POINTS OF INTEREST, PUEBLO, COLO.

Pueblo (pop. 58,000, alt. 4,668 ft.) is Colorado's second largest city, and is rightly called "The Pittsburgh of the West" on account of its large iron, steel and smelting industries. It is one of the historical places of Colorado. It was in Pueblo that the Pike exploring party camped in November, 1806, at the forks of Fountain creek and the Arkansas river. After Pike's party the next men to visit the spot were the members of Long's expedition. They found no trace of the cottonwood stockade erected by Pike's soldiers. Subsequently this neighborhood was occupied by fur traders and trappers for a number of years.

Jim Beckworth, a mulatto, who had lived among the Indians, claimed the honor of establishing the first permanent settlement where Pueblo now stands, in the year 1842. A short time later an adobe affair enclosed by cottonwood pickets was built for protection against hostile Indians and thieving whites. It was then called Fort Napeste, and this was for many years the rendezvous for voyageurs of the plains and in the mountains. It was later plundered and burned and the inmates massacred by a band of Utes. At the time of the civil war this village had but two score souls. It is now an important manufacturing

(Pueblo Points of Interest, Cont'd.)

center; has a splendid system of schools and parks, and is the seat of the state mineral palace and other state institutions.

Being located within 30 miles of the Rocky mountains, many pleasure resorts are easily accessible. Colorado Springs is but 40 miles to the north, Canon City 40 miles to the west, and Beulah and Rye, two beautiful summer resorts, 30 miles to the southwest, while within a radius of 30 to 90 miles to the south are located some of the largest coal fields in the world. To the east extends the beautiful and fertile Arkansas Valley of Colorado, known as the "Valley of Content."

The completion of the new Santa Fe trail in Pueblo county is an exemplification of the "honor system" of working convicts on state highways, which system has proved of great benefit, both to the state and to the inmates

of its penal institutions. At Pueblo the Rainbow route has its beginning and runs west thru orchard lands and the city of Florence to Canon City. Here is the incomparable Sky Line drive, a real boulevard running along a hog back at the city limits. The Royal Gorge drive, to the top of the canyon, thru which the Arkansas river flows on its way to the valley, is a never-to-be-forgotten trip. Still to the west is Salida in a mountain park at the foot of Collegiate range with its snowy peaks, Harvard, Princeton and Yale. From here one may go over Monarch Pass down the Gunnison and Uncompaghre valleys or over the Holy Cross route by way of Leadville, Tennessee Pass, Eagle and Grand river canyons, thru Glenwood Springs and Grand Junction to the Utah line.

 *Greeley (pop. 8,200, alt. 4,652 ft.).—It was of this city that Horace Greeley made his famous remark, "Go west, young man." Under the leadership of Nathan C. Meeker, the friends of that great journalist organized the Union Colony, which founded the city in 1870 and named it for Horace Greeley, who gave it an immense amount of free advertising in the New York Tribune. It was at that time a cactus plain, uninhabited save for two or three isolated ranchers. When the colonists, mostly easterners, struck their tents, their sleep that night was disturbed by the howling of the wolves. This very much discouraged them, yet they set to work and constructed the first extensive system of irrigation canals in Colorado, which has earned for Greeley the title "Father of Irrigation" in the west. They set out trees and before long the place was dubbed "Forest City"; however, in time the colony was made one of the most fruitful garden spots in the world. The State Teachers' college, with its 1,500 enrollment, contributes greatly to the beauty.

Route 726—Cheyenne to Laramie, Wyo.—59.0 m.

Reverse Route 714.

Via Granite canyon, Buford and Tie Siding. Graded and natural gravelly road first 30 miles; rough rocky stretches to Tie Siding and balance graded dirt and gravel. Summary: 49 miles dirt and gravel; 10 miles rocky road.

The route ascends over 2,000 feet over Sherman Hill between Cheyenne and Buford, all of it very gradual, except a few short pitches entering and leaving gullies near Granite canyon. One of the greatest gravel pits in the west, is that near Buford, supplying the ballasting material for several of the Western Union Pacific divisions. The highest point reached by the road is a mile and a half beyond Buford, where an elevation of 8,132 feet is attained. Four miles beyond this summit and $\frac{1}{4}$ mile to south of road is to be seen the Ames Monument, erected in 1868 to commemorate the highest point on the Union Pacific RR. From this point on to Tie Siding the route descends west slope of Sherman Hill and is both rough and rocky. Balance of the course traverses the gently rolling Wyoming prairies, for the most part following the general course of the RR crossed at Red Buttes Flag Sta. This is a part of the Lincoln highway.

The last ten miles into Laramie was being graded, straightened and widened when the Blue Book car passed thru and should be in good shape for the 1920 season.

Via Bosler, Harper, Rock River, Medicine Bow, Carbon, Hanna and Ft. Steele. Graded dirt and gravel with some natural prairie road to Medicine Bow, part of route being over old RR grade that is very rough and slow in spots. Mostly graded dirt beyond Medicine Bow, very rough in places. From Hanna, the route climbs and follows rolling ridges of the foot hills for several miles, leaving the RR. Much of this is just natural prairie road. The North Platte river is crossed at Ft. Steele, from which point a wide, well graded road follows the RR to Rawlins. This is part of the Lincoln highway.

Some exceptionally fine fishing and camping spots are found along the North Platte river ten to fifteen miles south of Ft. Steele and this country is much frequented by tourists.

124.1 14.5 RAWLINS, Cedar & 5th Sts.

HOTELS—The Ferris Hotel, 4th & Buffalo Sts.

GARAGES—Rawlins Motor Co., 506 Buffalo St.

Route 728—Rawlins to Rock Springs, Wyo.—113.8 m.

Reverse Route 710.

Via Wamsutter and Point of Rocks.

Natural prairie road with long stretches of graded dirt, several miles of which are over an old railroad grade, very rough and with numerous bad culverts requiring caution. The road is only fair at its best and rather slow, tho there are several fast good stretches. It is a section of the Lincoln highway and extends thru a sparsely settled sage-brush country.

Accommodations and supplies are to be had only at Wamsutter, with emergency supplies at a store in Point of Rock. The water is, at both Point of Rock and Wamsutter, slightly alkali, but a fine spring is passed twenty miles beyond Rawlins, the last really good and enjoyable drinking water before Rock Springs is reached. The spring is about 200 yards north of the road.

St. Avoid left-hand road 113.5, crossing small iron bridge just beyond. Cross RRs 113.7.

113.8 0.4 **ROCK SPRINGS, C & Main Sts.**, brick bank on right, green on left.

GARAGES—Lincoln Highway Garage, C. St. at 2nd on Lincoln Hgwy.
Western Auto Transit Co., C. St., 1½ Blks. S. of RR.
Straight ahead on C St. is Route 729 to Evanston.

Route 729—Rock Springs to Evanston, Wyo.—115.6 m.

Reverse Route 709.

Via Greenriver, Lyman and Ft. Bridger. Good to fair dirt all the way with some good stretches of natural prairie road.

This route follows the general direction of the RR thru the low hills to Greenriver and from there to Lyman it traverses a rolling, thinly settled prairie. Lyman, Urie and Ft. Bridger are located in an irrigated farming section and from Ft. Bridger on to Evanston, the road winds thru the hills over gentle grades. This is a section of the Lincoln highway.

A number of roads in this vicinity, including several of the main highways, will be closed for construction and repair work during the coming year. It being impossible for us to determine at the present time just which roads will be included in this construction work, we advise tourists to call upon Mr. W. D. Rishel, Secretary of the Utah Automobile Club, Commercial Club Building, Exchange Pl., opposite P. O., Salt Lake City, for the most recent information.

Route 731—Evanston, Wyo., to Ogden, Utah—78.8 m.

Reverse Route 708.

Via Castle Rock, Echo City, Henefer and Morgan. Fair dirt to Echo City, rough and cut-up in places; good gravel the balance of the way. Summary: 35 miles dirt; 44 miles gravel.

This route passes thru the pretty Echo canyon as far as Echo City and then enters a fertile valley which is followed for seven miles, when it narrows into the beautiful Weber canyon, which is followed to within a few miles of Ogden. There are a few places where the canyon widens out and assumes the proportions of a valley, and towns are located at these points. The route traverses a fertile country and supply points are frequent.

- 1.2 1.0 End of street, library on right; jog left and immediately right across trolley onto double drive.

*Littleton, Colo. (pop. 1,500, alt. 5,358 ft.), is the county seat of Arapahoe county, which at the time of the discovery of gold in July, 1858, embraced a great deal larger territory than the present county. Located near Littleton is the largest game preserve in the world. On the west bank of the Platte river, between Littleton and Fort Logan, stands a log cabin erected in 1859 by Sam R. Brown. It is a suggestive reminder of bygone days.

situated on the "top of the divide" is, next to Manitou, the most celebrated resort in this state. With its additions of Glen Park and Pine Crest, it offers the tourist a variety of attraction. Elephant Rock, Dome Rock, Balanced Rock, the Perpetual Ice Cave, which has never been fully explored, the Camel, the Saddle Horn, the Beaver Dams and the Courts are all very interesting sights. Palmer lake itself has two outlets, one at the north end and one at the south.

*Palmer Lake, Colo. (pop. 600, alt. 7,229 ft.),

TOURISTS! Practically all towns of any size maintain a Com-
 mercial or Business Men's Club which will gladly and graciously
 dispense local information upon request.

The White House, Canyon de Chelly, New Mexico.

DETAIL ROAD MAPS

(PILOT MAPS)

of WESTERN CALIFORNIA

ON pages 756-757 will be found **key maps** showing the plan of dividing the detail maps into double page size. It will be noted these double page maps are arranged in **numerical** order and follow the key map on consecutive pages.

Owing to the small scale of the **General Index** map, it is impossible to show all towns on it, but they are shown on the following **detail maps**, and a complete alphabetically arranged index of all towns on the **detail maps**, with key to their location, is to be found in the General Index, pages 26-55.

The **heavy black lines** on the maps represent the **best** auto roads, while the balance are connections which may be used as options to our routes or to reach unimportant places not given in the Blue Book text matter.

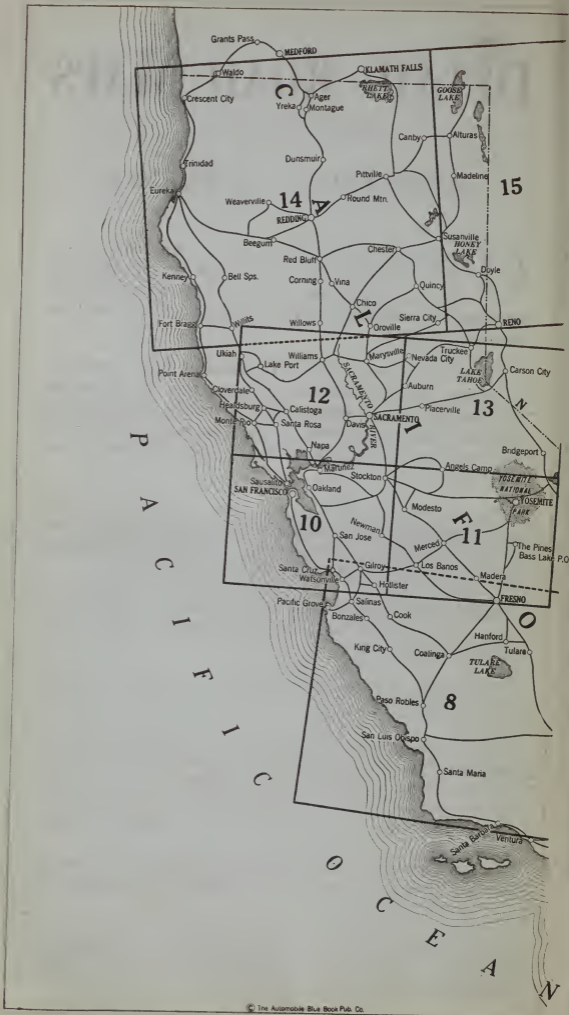

Open (parallel) lines represent secondary roads suitable for auto travel and often used in case regular road is closed, or for detours, etc.

Single lines are unreported roads, not considered suitable for auto travel.

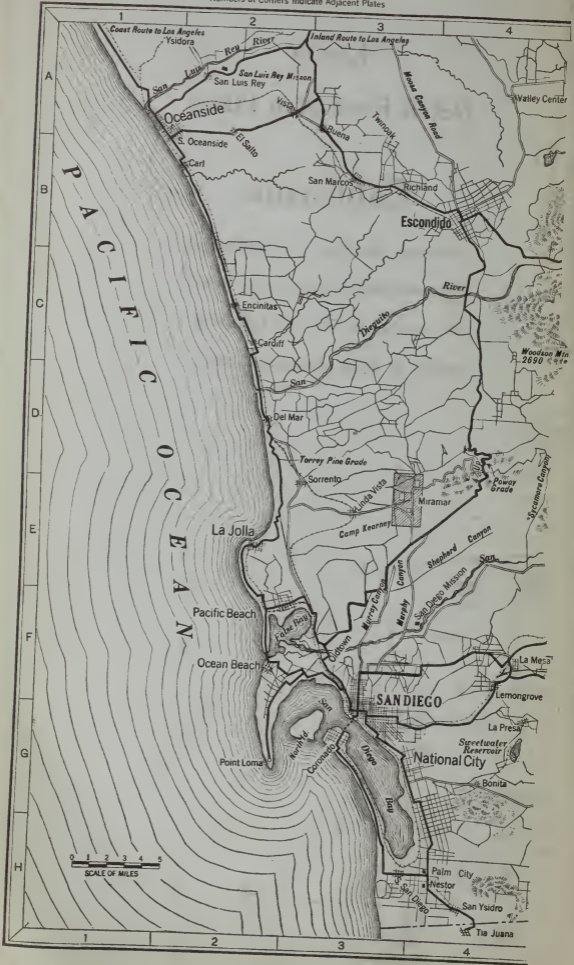

The figures outside the borders of the map give the numbers of adjoining sections and are very helpful in locating the succeeding plate without turning to the key map, but care should be exercised in noting the exact place where the line leaves one map and continues on the adjoining sheet.

These maps are compiled from government survey sheets and are brought up to date each year from data gathered by Blue Book scout cars.

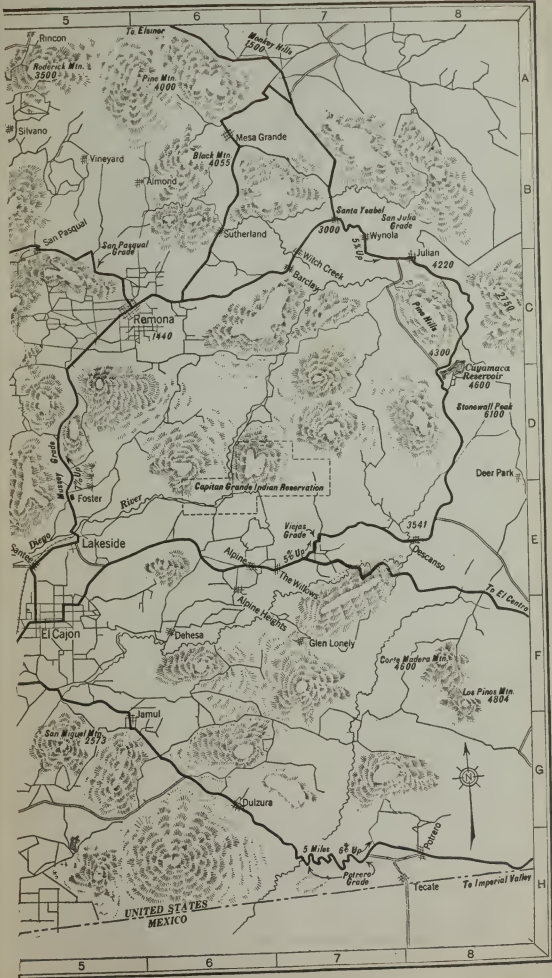

Acknowledgment is also made of valuable assistance given by the various state and county engineers, highway commissioners and thousands of individual automobilists.

*The most convenient way
to use your Blue Book*

The Blue Book Holder with a transparent face

- holds the Blue Book open, in the strongest wind;
- prevents fluttering or torn pages;
- keeps the Blue Book clean;
- makes it rain-proof in any ordinary storm;
- does away with that "death grip."

A staunchly built leather holder with a transparent face that protects your book at any speed or in any weather. May be hung on robe rail or carried in the driver's lap. Pages can be turned without removing the book from holder. The most convenient way to carry or pack the Blue Book.

Royal Blue finish, to match the Blue Book

Genuine Leather \$3.00 each

Imitation Leather \$2.00 each

For sale by all Blue Book dealers or
sent postpaid on receipt of price

"Meet Captain Hardy"

"Now, as I was saying, or was about to say, electricity is a lot like some people I know. If it's got some work to do and sees an easy way to dodge it, it just dodges. It steers the easiest course it can find. It doesn't do you any good to clean the points of a spark plug and then leave all this soot up underneath on the porcelain. The current flows from the center electrode up over the soot to the shell without going near the points at all.

"And one more thing, use the manufacturers' gauge when you test the width of the spark plug gap. Your guess may be good but it isn't good enough."

MOTOR LIFE

THE MONTHLY MAGAZINE FOR
RED-BLOODED MOTORISTS

DISCOVERED CAPTAIN HARDY

Before Motor Life readers knew him he was a marine engineer and a designer of marine engines. Years ago when people turned to look at motor cars, Cap turned to repairing them. He has been at it ever since.

The old captain is human. He lives and talks to you from the pages of Motor Life every month, and from the wealth of his practical experience he is helping Motor Life readers to get 100 cents' worth of service for every dollar spent on their cars.

This is just one of the features of Motor Life—the most helpful and most beautiful motor magazine published.

See colored insert of Motor Life and note the special offer to Automobile Blue Book users.

AUTOMOBILE REGULATIONS FOR NATIONAL PARKS—(Continued)

(Yosemite Park Regulations, Cont'd from Page 63)

12. **Muffler cut-outs.**—Muffler cut-outs must be closed on Valley Roads or while approaching or passing riding horses, horse-drawn vehicles, hotels, camps or checking stations.

13. **Teams.**—When teams, saddle horses, or pack trains approach, automobiles will take the outer edge of the roadway regardless of the direction in which they may be going, taking care that sufficient room is left on the inside for the passage of vehicles and animals. Teams have the right of way, and automobiles will be backed or otherwise handled as may be necessary so as to enable teams to pass with safety. In no case must automobiles pass animals on the road at a speed greater than 8 miles per hour.

14. **Accidents; stopovers.**—If, because of accident or stop for any reason, automobiles are unable to keep going they must be immediately parked off the road, or, where this is impossible, on the outer edge of the road. If on a one-way road, the automobile must wait where parked for the next hour schedule going in its direction of travel. If for any reason the automobile is stopped on the floor of Yosemite Valley it must be parked off on the right-hand edge of the road.

15. **Fines and penalties.**—Violation of any of the foregoing regulations will be punishable by revocation of automobile permit or by immediate ejection from the park, or by a fine of not to exceed \$500; or by any combination of the three, and be cause for refusal to issue new automobile permit to the owner

without prior sanction in writing from the Director of the National Park Service.

16. **Time.**—Automobile drivers should compare their watches with the clocks at checking stations.

17. **Reduced engine power, gasoline, etc.**—Due to the high altitude of the park roads, ranging between 4,000 and 10,000 feet, the power of all automobiles is much reduced, so that a leaner mixture and about 50 per cent more gasoline is required than at lower altitudes. Likewise, one gear lower will generally have to be used on grades than would have to be used in other places. A further effect that must be watched is the heating of the engine on long grades, which may become serious unless care is used. Gasoline can be purchased at regular supply stations as per posted notices.

Motorcycles equipped with single speed engines will encounter serious difficulties in negotiating the heavy mountain grades, and drivers are warned against making the attempt with this class of machine.

18. **Garage.**—In Yosemite Valley automobiles may be housed free of charge at Camp Curry, Yosemite Camp, and other camps of this character. The garage operated by the Yosemite National Park Co. is equipped for the housing of automobiles, as well as general repair work, parts, supplies, etc., at prices regulated by the National Park service.

REGULATIONS GOVERNING THE ADMISSION OF AUTOMOBILES INTO YELLOWSTONE NATIONAL PARK FOR THE SEASON 1919-1920

Pursuant to authority conferred by section 2475, Revised Statutes, United States, and the act of Congress approved May 7, 1894 (28 Stat., 73, as amended by the act approved June 28, 1916), (39 Stat., 218), the following regulations governing the admission of automobiles and motorcycles into the Yellowstone National Park are hereby established and made public.

1. **Entrances.**—Automobiles and motorcycles may enter and leave the park between 6 a. m. and 9:30 p. m. by any of the entrances, viz., northern or Gardiner entrance, western or Yellowstone entrance, eastern or Cody entrance, southern or Snake River entrance.

2. **Automobiles.**—The park is open to automobiles operated for pleasure, but not to those carrying passengers who are paying, either directly or indirectly, for the use of machines (excepting, however, automobiles used by park concessioners).

Careful driving is demanded of all persons using the roads.

The Government is in no way responsible for any kind of accident.

3. **Motorcycles.**—Motorcycles are admitted to the park under the same conditions as automobiles and are subject to the same regulations, as far as they are applicable.

4. **Permits.**—The permit must be secured at the ranger station where the automobile enters, and will entitle the permittee to go over or all of the roads in the park. It is good

for the entire season, expiring on December 31 of the year of issue. The permit must be conveniently kept so that it can be exhibited to park rangers on demand. Each permit must be exhibited to the checking ranger for verification on exit from the park.

5. **Fees.**—Fees for automobile and motorcycle permits are \$7.50 and \$2.50, respectively, and are payable in cash only.

6. **Direction.**—Automobiles will pass around the road system forming the "loop" in the direction opposite to that of the hands of a clock, as indicated by the arrows printed in red on the automobile guide map. The reverse direction may be taken as follows:

Norris Geyser Basin to Mammoth Hot Springs, between 11 a. m. and 1 p. m. and after 4:30 p. m.

Upper Geyser Basin (Old Faithful) to western entrance, any time after 1 p. m.

Grand Canyon to Yellowstone Lake, any time after 1 p. m.

Mammoth Hot Springs to Tower Falls, early enough to reach Tower Falls by 1 p. m.

Grand Canyon to Norris Geyser Basin direct, any time day or night.

The superintendent of the park has authority to change routing of cars if necessary.

7. **Automobile Stages.**—Automobile stages are operated by the Yellowstone Park Transportation Co., to and through the park from the northern or Gardiner entrance, the west-

AUTOMOBILE REGULATIONS FOR NATIONAL PARKS—(Continued)

ern or Yellowstone entrance, and the eastern or Cody entrance, connecting with all trains at park terminals. These cars are of 10 passenger capacity and are painted yellow. They are required to travel on a regular schedule. In order that they may encounter no delay, accident or inconvenience from dust, other motor vehicles must not pass or attempt to pass the automobile stages on the park roads, unless said stages are not in motion and passage may be made with assurance of safety. On the other hand, if other cars are signaled for the right of way by an automobile stage, they must yield and permit it to continue on its regular schedule.

8. **Distance Apart, Gears and Brakes.**—Automobiles while in motion must not be less than 50 yards apart, except for purpose of passing, which is permissible only on comparative levels or on slight grades. All automobiles, except while shifting gears, must retain their gears constantly engaged. The driver of each automobile will be required to satisfy the ranger issuing the permit that all parts of his machine, particularly the brakes and tires, are in first-class working order and capable of making the trip, and that there is sufficient gasoline in the tank to reach the next place where it may be obtained. The automobile must carry at least one extra tire.

9. **Speeds.**—Speed is limited to 12 miles per hour ascending and 10 miles per hour descending steep grades, and to 8 miles per hour when approaching sharp curves. On good roads with straight stretches, and when no team is nearer than 200 yards, the speed may be increased to 25 miles per hour.

10. **Horns.**—The horn will be sounded on approaching curves or stretches of road concealed for any considerable distance by slopes, overhanging trees, or other obstacles, and before meeting or passing other machines, riding or driving animals, or pedestrians.

11. **Lights.**—All automobiles must be equipped with head and tail lights, the headlights to be of sufficient brilliancy to insure safety in driving at night, and all lights must be kept lighted after sunset when automobile is on the roads. Headlights must be dimmed when meeting other automobiles or horse-drawn vehicles.

12. **Muffler cut-outs.**—Muffler cut-outs must be closed while approaching or passing riding horses, horse-drawn vehicles, hotels or camps.

13. **Teams.**—When teams, saddle horses, or pack trains approach, automobiles will take the outer edge of the roadway, regardless of the direction in which they may be going, taking care that sufficient room is left on the inside for the passage of vehicles and animals. Teams have the right of way, and automobiles

will be backed or otherwise handled as may be necessary so as to enable teams to pass with safety. In no case must automobiles pass animals on the road at a speed greater than 8 miles per hour.

14. **Accidents; stop-overs.**—Automobiles stopping over at points inside the park, or delayed by breakdowns or accidents of any other nature, must be immediately parked off the road, or, where this is impossible, on the outer edge of the road.

15. **Fines and Penalties.**—Violation of any of the foregoing regulations will be punishable by revocation of automobile permit, or by immediate ejection from the park, or by a fine not to exceed \$500, or six months' imprisonment, or by any combination of these penalties, and be cause for refusal to issue a new automobile permit to the offender without prior sanction in writing from the Director of the National Park Service.

16. **Garages, Repairs, Supplies, Free Automobile Camps.**—Gasoline, oils, tires and accessories are available for purchase at regular supply stations at Mammoth Hot Springs, Upper Geyser Basin (Old Faithful), Yellowstone Lake, and Grand Canyon. Repair shops and garages are maintained at these points. Automobile supplies may also be procured at Tower Falls Camp. Prices of supplies and rates for repair work are strictly regulated by the National Park Service. Free public camps for motorists and shelters for cars are maintained at points indicated on the automobile guide map.

17. **Reduced Engine Power; Gasoline, etc.**—Due to the high altitude of the park roads, averaging nearly 7,000 feet, the power of all automobiles is much reduced, so that a leaner mixture and about 50 per cent more gasoline is required than at lower altitudes. Likewise, one lower gear will generally have to be used on grades than would be necessary elsewhere. A further effect that must be watched is the heating of the engine on long grades, which may become serious unless care is used.

18. These regulations do not apply to motor traffic on the county road in the northwest corner of the park.

Automobile Camps and Shelters

Free public automobile camps and shelters are provided at Mammoth Hot Springs, Upper Geyser Basin, Outlet of Yellowstone Lake, and Grand Canyon—a shelter for machines and a fireplace protected from the weather, which may be used by the tourists in common. Tourists may camp on designated areas close to the shelters. Detailed information regarding these camps and shelters may be obtained at the various entrances to the park.

Conserve the Forests!

Serious forest fires have been caused by passing acts of carelessness. The Forestry Department urges that motorists observe the greatest caution in handling lighted matches, cigars, cigarettes, etc., when touring through wooded sections.

ABSTRACTS OF STATE MOTOR LAWS

For States Covered by Route Matter in Volume 8

ARIZONA.

Registration. Annually, on and after January 1, with secretary of state, Phoenix.

Fees. All computations based on A. L. A. M. formula. 25 H. P. and less, \$5, to 40 H. P. (incl.), \$10; more than 40 H. P., \$15; motorcycles, \$2.

Chauffeur's License, \$5.

Number Plates. Conspicuously displayed front and rear; furnished.

Speed. Reasonable and proper with regard to traffic conditions; closely built-up territory, 1 mile, 6 minutes; elsewhere within city limits, 1 mile, 4 minutes; outside city limits, 1 mile, 2 minutes.

Fines. Punishable as misdemeanor; if convicted, first offense not exceeding \$100; second offense, \$50 to \$100; third offense, \$100 to \$250.

Non-residents. Exempt for 6 months, providing home state laws are complied with and home state initials and number displayed.

CALIFORNIA.

Registration. Annually, February 1, with superintendent of motor vehicle department, Sacramento.

Fees. All automobiles, except electric vehicles, 40c per H. P. (A. L. A. M. formula). Electric motor vehicles, \$5; motorcycles, \$2. Additional for commercial vehicles having other than pneumatic tires: Special rate of \$5 to \$20. All fees reduced one-quarter after April 30; all fees reduced one-half after July 31; all fees reduced three-quarters after Oct. 31.

Chauffeur's License. \$2.

Numbers. Front and rear, furnished by state. Non-swinging, and at least 16 inches from ground.

Speed. "Reasonable and proper." Shall never exceed 35 miles per hour. In built-up sections, not over 20 miles per hour; in business districts, not over 15 miles per hour, and where operator's view is obstructed, as at intersections, curves, bridges, etc., not over 10 miles per hour.

Lights. One-half hour after sunset to $\frac{1}{2}$ hour before sunrise. Two lights in front; red in rear, with white illuminating number.

Dimmers. The headlights must be so constructed or arranged that no portion of the beam of reflected light, when measured seventy-five feet or more ahead of said lamps, shall rise or shall be capable of being raised from the driver's seat to more than forty-two inches above the level surface on which the vehicle stands ahead of such vehicle.

Fines. Vary according to section of law violated. Practically all violations are considered misdemeanors, punishable by a fine not exceeding \$500, or 6 months' imprisonment, or both.

Non-residents. Exempt 3 months, providing following regulation for non-resident registration is complied with: Within 24 hours owner must apply to registration department for a 3-months' touring permit, whereupon a distinctive registration device will be furnished the applicant free of charge.

NEVADA.

Registration. On or before first Monday in February of each year, with secretary of state, Carson City.

Fees. Thirty-five cents per hundred lbs. or fraction thereof, weight to be factory advertised weight, and in addition 125 lbs. for each passenger for which vehicle is built to accommodate to carry when loaded to capacity, every truck 35c per 100 lbs. of weight or fraction thereof, and in addition the body allowance weight, and in addition the rated loaded capacity. Motorcycles, 35c per 100 lbs. plus 125 lbs. to rider.

Chauffeur's License. None required.

Numbers. License plate supplied by state. Must be conspicuously displayed in rear.

Speed. "Reasonable and proper," having regard to traffic conditions. Speed may be regulated by local authorities, although maximum speed shall never be set at less than 12 miles an hour.

Fines. Punishable as misdemeanor. Not exceeding \$100 or 30 days, or both, for first offense.

Non-residents. Exempt 30 days, provided home state registration laws have been complied with and home state number is conspicuously displayed.

STATE MOTOR LAWS—(Continued)

NEW MEXICO.

Registration. Annually, on January 1, with secretary of state, Santa Fe. Fees. Less than 15 H. P., \$6; for each additional H. P., add 40c; 50 H. P. or more, \$20.

Chauffeur's License. None required.

Number Plate. Conspicuously displayed on the rear of machine; furnished.

Speed. Reasonable and proper, with regard to traffic conditions.

Fines. \$1 to \$100.

Non-residents. Exempt for 30 days provided numbers and initials of home state are conspicuously displayed.

OREGON.

Registration. Annually, on January 1, with secretary of state, at Salem. Fees. All steam, gasoline and hydrocarbon operated vehicles (except motor trucks having a rated maximum load carrying capacity of 1 ton and over), up to and including 23 H. P., \$15; in excess of 23 H. P. and inclusive of 26 H. P., \$22; in excess of 26 H. P. and inclusive of 30 H. P., \$28; in excess of 30 H. P. and inclusive of 36 H. P., \$36; in excess of 36 H. P. and inclusive of 40 H. P., \$48; in excess of 40 H. P., \$56. For any registration made on or after July first of any year, but one-half of said fees shall be paid; and for any registration made on or after October first of any year, but one-fourth of said fees shall be paid.

Chauffeur's License. \$4 annually, with secretary of state, on January 1. For all licenses issued after July 1 but one-half fee shall be paid, and for registrations made on or after October 1 but one-fourth fee shall be paid.

Numbers. Front and rear, furnished by state.

Speed. Careful and prudent, not to exceed 30 miles per hour.

Fines. \$1 to \$400.

Non-residents. Reciprocal.

TEXAS.

Registration. Annually, with county tax collectors.

Fees. 35 cents per H. P., A. L. A. M. Minimum, \$7.50. Three-quarters annual fee after April 1. One-half annual fee after July 1. One-quarter annual fee after October 1.

Numbers. Furnished by state, distributed by tax collectors.

Speed. Reasonable and proper. Public highways 25 miles per hour; in or near built-up sections, 18 miles per hour; business districts, 15 miles per hour.

Chauffeur's License. Annual. \$3.

Lights. One-half hour after sunset to ½ hour before sunrise; 2 white lights in front visible 500 feet, 1 red light in rear visible 500 feet.

Dimmers. Rays of light must not project above a parallel 4 feet above the road, unless lamp is equipped so that rays are not dazzling.

Fines. Violation a misdemeanor; \$10 to \$200.

Non-residents. Exempt for 30 days provided home state laws have been complied with and home number is conspicuously displayed.

UTAH.

Registration. Annually, March 1, with secretary of state, Salt Lake City.

Fees. Not exceeding 25 H. P., \$5; exceeding 25 H. P., but not more than 40 H. P., \$10; exceeding 40 H. P., \$15; electric pleasure vehicles, \$10; motorcycles, \$3.

Chauffeur's License. Annually, January 1, \$2; after July 1 of any year, \$1.

Numbers. Front and rear, non-swinging, supplied by state.

Speed. "Reasonable and safe."

Lights. Two white in front; red in rear, white illuminating number. One hour after sunset to one hour before sunrise.

Fines. Violation a misdemeanor, \$5 to \$100, or imprisonment in county jail for a period between 10 days and 3 months, or both. Second conviction entails revocation of license.

Non-residents. Exempt 30 days, provided home state laws have been complied with and home number is conspicuously displayed.

(No later data obtainable at time of publication.)

BRIEF GENERAL DESCRIPTION OF STATES COVERED BY THIS VOLUME

ARIZONA.

Arizona is essentially a vast table-land or series of plateaus, and probably more than one-half its area occupies a position 5,000 feet above sea level. The territory is entirely within the basin of the Colorado, two of whose principal tributaries, the Gila and the Little Colorado, traverse it from east to west. Many of the streams of this territory flow to a greater or less extent in deeply eroded chasms or canyons, the most remarkable of which, constituting one of the most stupendous features of the earth's surface, is the Grand Canyon of the Colorado, whose walls for more than 300 miles rise precipitately from 3,000 feet above the water's edge. The "Chalcedony or Petrified Forest of Arizona," situated in the eastern part of the territory, and visited from Adamana or Holbrook, is another national curiosity which attracts thousands of tourists annually.

The great wealth of this state consists in its mineral treasures, gold, silver, lead, copper, salt, borax, etc. The mines were wrought for many years by Mexican and Spanish proprietors, but the scanty water supply and the difficulties of transportation, both in those days and more recently, very greatly interfered with the productiveness of many of the mines. The lately increased railroad facilities, however, have given a new impetus to the development of the vast mineral resources, and the crushing, milling and amalgamation of ores figure now as one of the leading industries.

Arizona is by nature better adapted to pastoral than to agricultural pursuits. Much attention has been devoted lately to irrigation, however, and excellent crops are the result. The Pueblo Indians and other half civilized tribes have been for an unknown period successfully engaged in agriculture, and the remains of many ancient aqueducts, now dry, show that at a former period irrigation was extensively practiced.

Spanish missions were established in this region about the year 1580 and long before the advent of the whites there were, as at present, Indian communities which had attained a respectable degree of civilization. Very remarkable ruins to this prehistoric period exist in this territory. These ancient houses, like the "casa grandes" of some of the present half civilized tribes of Arizona and New Mexico, were simply great tenement houses of several stories, each containing hundreds and even thousands of inhabitants. These great structures were built of stone or sun-dried brick and served for defense against hostile tribes as well as for inhabitants. The cliff-dwellings and cave dwellings in and about the Walnut canyon and near Phoenix are easily accessible points to the tourist.

The climate is cool in the mountain regions, and owing to scanty rainfall there is an absence of catarrhal diseases in this country. In the southwestern part of the state the summer temperature is excessive.

CALIFORNIA.

California was the New or Upper California of the Spaniards and Mexicans, so called to distinguish it from the California peninsula or Lower California. Its coast was visited by Cabrillo in 1543, by Drake in 1579 and by Sebastian Viscayno in 1602. In 1769 the Franciscan fathers planted colonies at San Diego, and a few years later they established the Mission of Dolores at San Francisco. Before long they had built a chain of these missions. After 1821, when Mexico was freed from Spanish domination, Mexican and other settlers began to come into this territory. In 1846, during the Mexican war, Commodore Sloat and Stockton occupied the most important points along the coast and, with aid from General S. W. Kearny and Colonel Fremont, subjected the country to the authority of the United States. In 1848 gold was discovered here and the rush of adventurers to California began. They poured in from every part of the world. In 1849 a state constitution was formed and the following year the state was admitted into the Union.

A most conspicuous feature of California is its vast mountain system. Along its eastern boundary extends the lofty Sierra Nevadas or Snowy mountain range, averaging some 70 miles in breadth and embracing among its peaks some of the highest points in the United States. Mount Whitney, east by south of Fresno, with an elevation of 14,898 feet, is as-

sumed to be the highest summit of the national domain outside of Alaska. Along the coast extends the Coast range, uniting with the Sierra Nevada system. By some geologists Lassen Peak is considered to be the termination of the Sierra Nevada proper. Between these ranges lie the magnificent valleys of the rivers Sacramento and San Joaquin, renowned for its beauty and fertility and known as the Great Valley of California. Included in the Sierra Nevada are the deep rift or glacial valleys—Yosemite, King's, Tuolumne—which have become world famous for their magnificent scenery. A third range of mountains, the San Bernardino, occupies the southern part of the state. East and north-east of this range lies the great depressed and arid region of the Mohave and Colorado Deserts, Death Valley, etc., a portion of which at one time formed the course of the Colorado river. The coast line is nowhere deeply indented, except by the Monterey and San Francisco bays, the last named affording magnificent harborage and a port of first commercial importance. There are any number of beautiful lakes within the state's boundary, among which might be mentioned beautiful Lake Tahoe, Mono, Goose and Lower Klamath lakes.

The soil of a large portion of California is deep, rich and very profitably cultivated, and the state has for many years been famous for

STATE HISTORY—(Continued)

her vast fields of wheat, her fine fruits and the products of her generous vineyards. Oranges, lemons, and other sub-tropical fruits are raised in abundance. Ostrich farming is also carried on to some extent. Also is this state noted for the beauty of its flowers and evergreen shrubs and for its mammoth trees, among which are the sequoia and the redwood. There are also numerous species of pine, fir and cypress, some of which are of gigantic dimensions. In the Sequoia and General Grant National parks grow a million sequoia trees, of which 12,000 are more than ten feet in diameter and many of them two or three thousand years old.

California has but two seasons, the dry season and the winter, or rainy season, which lasts from late October to the end of April. It is called the rainy season because it is the only period in which rain falls, though the rain is not continuous. From May to October rain is practically unknown, the earth becomes dry to a depth of several inches, the air contains dust and the small streams dry up. At the approach of the rainy season cyclonic storms occur. From February to May is the most delightful part of the year. Everywhere the nights are cool, the air mild, the sky always clear, and the earth carpeted with flowers of brilliant hues. In July San Francisco is cooler than New York, its average temperature being 60° F. in summer and

49° F. in winter. Snow is almost unknown there; the mercury never remains below the freezing point over 24 hours, and flowers bloom in the gardens all winter. San Diego in the extreme south has a mean winter temperature of 54° F. and a mean summer temperature of 68° F. In summer the seasonal heat is tempered during the day by a brisk breeze from the ocean and during the night by a land current flowing down from the mountains. In the arid lands at the southwest the heat is non-prostrating because of its dryness, and sunstrokes never occur. In the Great Valley the extremes of temperature are somewhat greater than outside, but on the whole the temperature varies little. The mean temperature for this section is 64° F. In short, few countries on the globe can boast so delightful a climate as California. As a whole it is dry and invigorating and characterized by an absence of storms, by low wind velocities, and by a high percentage of sunshine. The flowers of California include more than 2,500 species, and bloom in prodigal profusion. In February and March the tourist may travel hundreds of miles through the state literally treading flowers at every step. No other state contains one-half the number or variety, and California, owing to its natural and developed wonders, is one of the richest and most interesting states in the Union.

CALIFORNIA'S OLD MISSIONS.

California's early history and romance are interwoven with the old missions founded by the Spanish padres between 1769 and 1823. Several English voyagers and at least one Russian visited the California coast in the seventeenth century, and Spain, fearing lest her rivals should claim the territory, ordered Don José de Galvez, the King's ambassador in Mexico, to send forward missionaries and soldiers to Christianize and subjugate Upper California. Don José chose for chief missionary Junipero Serra, a Franciscan monk, a native of the Balearic Isle of Majorca, who had held the chair of philosophy in the University of Palma, and who from youth had wished to minister to the natives of the Spanish colonies in the New World. He chose for his assistants Fray Juan Crespi and others of the same Majorcan monastery. After teaching a while in Mexico and acquiring great influence among the Mexican Indians, Father Serra and his helpers were sent into California with Portola's military expedition. The company reached San Diego and established there on Sunday, July 16, 1769, the first of the Spanish missions whose organization consumed fifty-four years, and which, a day's journey apart, formed a chain from San Diego to Sonoma. They were placed at intervals of a day's journey on foot that the traveler might always find refuge at the end of the day. All the monks of the missions were of the order of St. Francis of Assisi, that "Mirror of Perfection and Husband of Poverty" who in the thirteenth century banded his disciples under vows of unrelenting poverty and self denial. Their labor was disinterested and purely missionary. Their stipend was \$400 a year but paid in clothes and other necessities. They

could not divert to their own use either the alms or the proceeds from crops. All these must be employed for the benefit of the converts.

The Fathers established around their missions olive, orange and grape plantations and cattle and horse ranches. They gathered the degraded and indolent Indians (the California coast Indians were the lowest type in North America) into "pueblos" under the control of the mission, converted them to Christianity and gradually weaned them from their barbaric life, taught them cleanliness, farming and civilized pursuits. The Indians sometimes rebelled at the lash or reverted to their savage state and massacred and burned, but for the most part the mission fathers and their Indian children lived on terms of peace and often of real affection, and the Indians became in time a peaceful and industrious people. In the 65 years before the missions were dis-established they had converted 80,000 Indians, erected \$1,000,000 worth of buildings and developed wheat and stock raising to a high degree of perfection. Monterey was the ecclesiastical and military capital of the country. Second in importance was the presidio and mission at San Francis d'Assisi, established in 1776, and then in order came San Diego, Santa Barbara, and Los Angeles.

The missions are remarkable for their architectural beauty. That churches and cloisters of any sort should be erected in this wilderness with no materials at hand and by unskilled workmen with the rudest of tools is a marvel. But the wonder grows when it is known that these structures, far from being uncouth or clumsy, are among the most beautiful examples of architecture in America.

Their lines are graceful and harmonious and the blending of the dull red tiles of the roofs with the soft terra cotta and buff walls of stone is very beautiful, while the whitewashed walls of plaster symmetrically broken by shadowy arches through which shows the green of gardens and orchards, make a most pleasing effect. Timber for the mission buildings was transported on the shoulders of Indians from pine forests 30 to 60 miles distant up the mountains. Adobe bricks and floor and roof tiles were formed and baked on the spot. Stone was quarried out of the neighboring hills and transported by Indians to the mission. Most of the missions were built around a large rectangular court, or "patio," surrounded with a cloister with massive arches supported by pillars. On this cloister the cells of the fathers and all the apartments, including schoolrooms, workrooms, storerooms, etc., opened. In the center of the "patio" was a fountain surrounded by a garden. At opposite exterior angles of the quadrangle and forming wings, stood the churches and the houses for the Indians. The "fashada," or the facade of the church, was finished with a stepped and curved pediment surrounded by a lantern. This is one of the features of the mission style which has most strongly influenced modern architecture. Another distinctive feature is the stepped half dome surmounted by a lantern which tops the terraced bell towers pierced with open arches. Roofs are long, low and sloping, with broad overhanging eaves; gables are curved and pedimented, and walls, piers and buttresses are exceedingly solid and massive. These are the external characteristics of the California missions, but the inherent characteristic is the spirit of this architecture, a spirit of simple, sincere dignity, of immediate contact with nature shown in the suitability of the structures to land and climate, a spirit of virility, of originality, of clear vision and great imaginative power. It is this spirit of the padres as creative artists that has had a distinct influence upon the California architecture of the present time.

The sites of the missions show that the padres selected them with a keen eye to scenic splendor or pastoral beauty. Their charm of location is unsurpassed and probably not equaled by any twenty-one other churches in the world. The missions in order from the most southern up follow the coast line and are San Diego, San Luis Rey, San Juan Capistrano, San Gabriel, Los Angeles, San Fernando, San Buenaventura, Santa Barbara, Santa Ynez, La Purissima, Concepcion, San Luis Obispo, San Giguél, San Antonio, Mission Soledad, El Carmelo, San Juan Bautista, Santa Cruz, Santa Clara, San Jose, Mission Dolores, San Raphael Archangel, Mission San Francisco Solano. (For detailed description of each of these missions see index in front of book. For interesting Mission Tour see pages 184-194.)

From the very beginning it had been the intention of the Spanish government in sending missionaries into the country to turn the mission estates into administrative districts. The fathers, therefore, never enjoyed title to the land. In 1777 Spain began the founding of

towns and divided Upper California into four provinces, or military districts, called "presidios," namely, San Diego, Santa Barbara, Monterey and San Francisco. The object of these "presidios" was to protect the missions from Indian attacks or foreign invasion, the mission fathers in case of need calling upon the commandante of the presidio to which his mission was attached. The presidios were officered and soldiered from Spain and Mexico and in the beginning the salaries were paid from the national treasury. Under the mission system the church held the lands in trust and the Indians under parental control. When the natives were sufficiently civilized the system was to come to an end, the lands were to be allotted to the individual Indians, who were then to have absolute control over their own persons and property like any other citizen, and the mission was to become simply the parish church and the mission padre was to become the parish priest. The presidios were to be the instruments of effecting this change. Such a change is known as secularization, and there could be no complaint if it had been wisely and properly made. But about 1812 began the Mexican revolt against Spanish rule, culminating in the independence of Mexico in 1821. With the establishment of the Mexican Republic the Californias, upper and lower, passed under the control of Mexico. That country, with the ostensible purpose of carrying out the original intention of Spain, passed bills in the legislature of Mexico and in the provincial legislature of California, authorizing the appointment of comisionados to take over the church property and carry out the secularization of the missions.

Had this been done honestly, giving the padres time to bring about the change in a salutary manner, the missions and their noble work might have been preserved. But unscrupulous politicians improved the opportunity and seized at once every single head of cattle, every single horse, and every single acre of ground save only a kitchen garden for the priest, and with no check upon their procedures or the prices obtained, hoodwinked the Indians out of the land and distributed the herds and horses for political favors. The padres at one stroke absolutely deprived of all sources of income could do little to influence the Indians whom the politicians, in order to get the better of them, initiated into every form of besotting vice, and inflamed them against the priests. The Indians were scattered and perished in great numbers and those who survived reverted to their original state of degradation. The mission buildings were plundered and fell into decay and were finally sold for a song, and when under the United States regime the Catholic church undertook to reorganize the missions it was found that aliens held title not only to the lands but to the churches themselves. Repossession of most of them was obtained by friendly intercession or by suits in the courts, but today some of the churches are still held by outsiders, notably the Mission of San Fernando and that of La Purissima Concepcion and San Antonio de Padua and Solano. The last two were purchased by W. R. Hearst for the California Historical Landmarks League of

STATE HISTORY—(Continued)

San Francisco. This club obtained the control of a number of missions and through a fund obtained by appeals in Out West, of which Mr. Lummis was editor, is preserving

and safeguarding the missions from further destruction by the elements and by vandal souvenir hunters.

NEVADA.

Nevada is a mountainous state, the principal chains from west to east being the Virginia mountains, west of Pyramid lake; the Lake range, between Pyramid and Winnemucca lakes; the Truckee mountains, east of Winnemucca lake; the Trinity mountains, Antelope mountains, West Humboldt mountains and East Humboldt mountains. South of these ranges are 15 other short parallel ranges and one isolated range, the White mountains in the southwest. The general elevation of the state is about 4,000 feet above sea level. Wheeler peak, near the eastern boundary, attains an elevation of 13,058 feet. Other lofty peaks are Poston Mount, 11,977 feet; Tayabe Dome, 11,779 feet; Mount Silliman, 11,623 feet; Davies mountain, 11,656 feet; and White mountain, 11,277 feet.

The mountain ranges and valleys are cut by the small Humboldt river, which flows west and then southwest. This river forms the only east and west valley in the state suitable for a railway, and determines the course of one of the transcontinental lines. The waters of the Humboldt are strongly alkaline. All the rivers of the state are small and, with the exception of the Snake river tributaries in the extreme north and those of the Colorado in the extreme south, all end in lakes or "sinks," i. e., marshy spots in desert sands. Most of the lakes are either alkaline

or saline, some are of complex caustic solutions. Beautiful Lake Tahoe, having a depth of 1,500 feet and situated at an elevation of 6,700 feet, is on the California boundary, one-third of its area being within the state of Nevada.

The climate of Nevada is dry, healthful and invigorating, but characterized by violent extremes. The sun is pleasantly warm at midday but the nights intensely cold. A little less than 4 per cent of the area of the state is under cultivation, but it is lack of rain rather than poor soil that gives the state the reputation of being a desert. The soil is productive where irrigation is practicable. Notwithstanding the severe winters, and the parched and arid soil, stock raising is very profitable, the stunted herbage being so rich and succulent that cattle fatten readily without grain. It is, however, as a mining state that Nevada is chiefly known. Under Virginia City and Gold Hill lies the famous Comstock lode, once the most profitable gold and silver deposit in the world. These two metals are still the leading minerals of the state. Copper, lead, quicksilver and nickel are also found, and there are extensive deposits of sulphur, borax, soda, potash, rock salt, and many other valuable minerals. Mineral and thermal springs are numerous.

UTAH.

Utah is a part of the territory acquired by the United States from Mexico in 1848. In the preceding year Brigham Young, the head of the Mormons, after their expulsion from Nauvoo, Ill., had come to this then almost utterly unknown region, which he afterwards named Deseret. The great body of his followers migrated to the region in 1848. Salt Lake City was founded and a prosperous agricultural community sprang up, which increased rapidly through the vigorous Mormon propaganda carried on in the United States and Europe. The Territory of Utah was organized in 1850, Young being appointed governor. In 1857, Young having openly defied the federal authority, President Buchanan sent troops to enforce obedience. A compromise was effected and the authority, for practical purposes, remained in the hands of Young and his followers. In 1882 congress passed a stringent law against polygamy and in 1890 the Mormon church publicly decreed the discontinuance of the practice, which, however, still persists to some extent.

The great Wasatch range of mountains divides Utah into two somewhat unequal parts, the western being the smaller but more important division. These mountains are ex-

ceedingly wild and picturesque, pierced by many canyons and sending up many peaks which during most of the year are covered with snow. In the Great Basin is located the Great Salt lake, a shallow expanse of strong brine, covering 2,000 square miles and receiving the waters of the Bear, Weber and Jordan rivers, with some smaller streams. It is now merely the remnant of a former much more extensive lake basin, whose ancient beach lines are clearly incised as terraces upon the encircling mountains, 900-1,000 feet above the present water level. To this former body of water geologists have given the name of Lake Boonville.

The principal wealth of Utah consists in her ores—gold, silver, lead, copper, etc. Excellent building granite is also found in abundance here. Much capital has been invested in enterprises connected with the mining and reduction of ores, particularly of the ores of lead, the smelting and refining of which is the most important industry of the state.

Utah has a healthful and agreeable climate, being agreeably warm during the summer months and not extremely cold during the winter. It has but little rainfall.

STEAMSHIP AND FERRY SCHEDULES

(Compiled from the latest data obtainable.)

MARTINEZ-BENICIA FERRY AND TRANSPORTATION COMPANY
BENICIA, CAL.

Leave Benicia every hour on the hour from 7:00 A. M. to 10:00 P. M.

Leave Martinez every hour on the half hour from 7:30 A. M. to 10:30 P. M.

During the summer months half hour service is maintained to Martinez from 10:00 A. M. to 8:00 P. M.;
to Benicia from 9:30 A. M. to 7:30 P. M.

Rates: Automobiles (each), 75c.

MONTICELLO STEAMSHIP COMPANY

VALLEJO, CAL.

Daily Schedule.

Boats leave San Francisco for Vallejo, Mare Island, Napa, St. Helena, Callstoga: 7:00, 9:45 A. M., 12:30, 3:20, 6:00, 8:30 P. M. 8:30 P. M. boat connects only to Napa.

Boats leave Vallejo for San Francisco: 7:30, 9:45 A. M., 12:30, 3:20, 6:00 and 8:30 P. M.

Automobiles not otherwise specified:—Not over 12 feet in length, \$1.50 each; over 12 feet and not over 13 feet in length, \$2.00 each; over 13 feet and not over 14 feet in length, \$2.50 each; over 14 feet in length, \$3.00 each; motor trucks, 3-ton capacity, \$4.00 each; motor trucks, 5-ton capacity, \$5.00 each.

Note.—Over all dimensions to apply excluding tops down and extended, tire holders and tires, baggage racks, baggage and bumpers. Tolls on automobiles at San Francisco, 10 cents each way. Tolls on automobiles at Vallejo, 10 cents each way. Three per cent war tax on all freight.

NORTHWESTERN PACIFIC RAILROAD

(United States Railroad Administration.)

SAN FRANCISCO, CAL.

Auto Boat Schedule—(Boats run daily except as noted).

Automobiles, motorcycles, teams or livestock will be handled on regular passenger boats only as follows: From San Francisco—6:15 P. M., 7:45 P. M., 7:15 P. M., 7:45 P. M., 8:45 P. M., 9:15 P. M., 11:45 P. M., 1:00 A. M. From Sausalito—6:03 A. M., 6:33 A. M., 8:03 P. M., 9:20 P. M., 10:52 P. M., 12:20 A. M. (Daily except Sundays and Holidays.)

Daily swing service from Sausalito to Tiburon connects with the 8:30 A. M. and 4:00 P. M. boats from San Francisco.

Daily boats, Tiburon to Sausalito, 9:42 A. M. and 5:00 P. M.

When regular passenger boats carry automobiles they will be restricted to four.

PACIFIC STEAMSHIP COMPANY

"THE ADMIRAL LINE."

Puget Sound—California Route.

San Francisco—Wilmington Route.

San Francisco—Loos Bay-Portland Route.

Frequent sailings between Seattle, San Francisco and Los Angeles from July to October.

The present rate on automobiles between San Francisco and Seattle is \$1.85 per 100 lbs., with a 2,000 lb. minimum, in addition to which there will be a charge of approximately \$2 for wharfage and handling at Seattle.

The present rate between San Francisco and Wilmington (the port for Los Angeles) also San Diego is \$1.06½ per 100 lbs. with a 2,000 lb. minimum.

For additional information inquire at 112 Market St., San Francisco and 77 Washington St., Seattle.

RICHMOND-SAN RAFAEL FERRY AND TRANSPORTATION COMPANY

SAN FRANCISCO, CAL.

Leave Point Richmond—Daily (except Sunday): 7:30, 9:30, 11:30 A. M.; 1:30, 3:30, 5:30, 7:00 P. M. Sundays and holidays—7:30, 9:00, 10:30 A. M., 12 M., 2:00, 3:30, 5:00, 6:30, 8:00 P. M.

Leave Point San Quentin—Daily (except Sunday): 8:15, 10:15 A. M., 12:15, 2:15, 4:15, 6:15, 7:45 P. M. Sundays and holidays—8:15, 9:45, 11:15 A. M., 12:45, 2:45, 4:15, 5:45, 7:15, 8:45 P. M.

Rates: Automobiles (each way) 75 cents, passengers (one way) 15 cents, (round trip) 25 cents.

SOUTHERN PACIFIC COMPANY

"OAKLAND HARBOR ROUTE."

San Francisco to Oakland, Cal.

Leave San Francisco (south of Ferry Building) daily every half hour, commencing at 6:00 A. M. and until 9:00 P. M., then as follows: 9:00 P. M., 11:15 P. M., 12 M. and 1:00 A. M.

Sundays and important holidays, additional sailings at 9:30 P. M. and 10:30 P. M. Trip consumes 35 minutes.

Oakland to San Francisco, Cal.

Leave Oakland (foot of Broadway) daily every half hour, commencing 6:15 A. M., and until 8:45 P. M., then as follows: 9:45 P. M., 10:45 P. M., 12:00 M. and 12:45 A. M.

Sunday and important holidays, additional sailings at 9:15 P. M. and 10:15 P. M. Trip consumes 35 minutes.

Rates: Automobiles (one way war tax included) 97 cents. Passengers (each) 6 cents.

The Most
Convenient Way
to use your
Blue Book

THE MOST CONVENIENT WAY TO USE YOUR BLUE BOOK

The Blue Book Holder with a transparent face

- holds the Blue Book open, in the strongest wind;
- prevents fluttering or torn pages;
- keeps the Blue Book clean;
- makes it rain-proof in any ordinary storm;
- does away with that "death grip."

A staunchly built leather holder with a transparent face that protects your book at any speed or in any weather. May be hung on robe rail or carried in the driver's lap. Pages can be turned without removing the book from holder. The most convenient way to carry or pack the Blue Book.

Royal Blue finish to match the Blue Book

Genuine Leather \$3.00 each

Imitation Leather \$2.00 each

For sale by all Blue Book dealers or sent postpaid on receipt of price
